BILL FOR PERMANENT TAX COMMISSION FOR THE STATE IS RECOMMENDED

Introduced as a Substitute for the Wilson Bill.

Answer to North Dakota Criticism to be Hot One.

Nothing in Charge That Elevators Steal Farmers' Wheat.

(From a Staff Correspondent.)

St. Paul, Minn., March 1.—(Special to The Herald.)—The senate tax committee this morning recommended for passage, as a committee bill, a substitute for Senator Wilson's bill providing for a permanent tax commission. The commission is to be appointed by the governor within ten days after the passage of the act, is to be non-partisan, and its members are to draw $6,000 a year each with a secretary at $2,000, and clerks up to $6,000 a year. Its members cannot serve on political committees. One members is to be appointed until 1911, one until 1913 and one until 1915, after which the term is to be for six years. The commission is to have general charge of taxation in the state, and is to enforce the tax laws, call for reports of the business of individuals, firms and corporations, investigate conditions in this state and the tax systems of other states, and report proposed laws or tax codes to the legislature. It is allowed to reassess property at any time.

* * *

The subcommittee of the house grain and warehouse committee, appointed to look into the charge of North Dakota that elevators steal farmers' wheat by means of the suction draft that blows the dust out of the grain, will report that there is nothing in it; that the draft takes out

GEORGE F. LOFTUS,
Who Was on the Grill Before Legislative Committee at St. Paul.

LOFTUS ON THE GRILL

Before the Peterson Committee and Fireworks Are Lively.

Personalities and Verbal Brickbats Flew Back and Forth.

(From a Staff Correspondent.)

St. Paul, March 1.—(Special to The Herald.)—Personalities and verbal brickbats flew back and forth with diverting but bewildering rapidity in the meeting of the S. D. Peterson committee to investigate the Minnesota Shippers & Receivers' association which, under the direction of George S. Loftus, has taken an aggressive part in politics in the last few years, demanding that candidates tell how they stood on certain public questions, and opposing them if they refused to tell.

Mr. Loftus was the witness who occupied the stand during the afternoon, accompanied by his attorney, T. J. Manahan, and the examination was conducted by Chairman Peterson, who was one of those opposed by the association, assisted by members of the committee.

The fireworks started early, and kept up until the finish. Mr. Loftus

(Continued on page 2, fourth column.)

FIRST DEATH IN 65 YEARS.

That of Mrs. Dandereau Breaks Remarkable Family Record.

Westbrook, Me., March 1.—The death in this city of Mrs. Clarence Dandereau is the first that has occurred within sixty-five years in her father's family, which consisted of himself, his wife and seven sons and seven daughters. Mrs. Dandereau's age was 65 years. She leaves two sons and a daughter.

IGNORANT OF FORTUNE.

Son Discovers He is One of Three Heirs to $15,000,000.

Colorado Springs, March 1.—Charles L. Vanwert, a Colorado Springs jeweler, has been notified that he is one of three heirs to the estate of his father, the late James L. Vanwert, estimated at $15,000,000 to $18,000,000. The widow and a daughter by a second marriage are the other heirs.

The estate consists mainly of coal and other mineral lands in Kentucky and Virginia. Charles came to Colorado in an early day and was followed later by his father. The latter died in Louisville, Ky., about a month ago.

The son has lived modestly here, ignorant of his great fortune.

NO RECOUNT TO BE MADE

On Tax Amendment to Constitution by Legislature's Order.

Bill Raising Vessel Tonnage Tax Will Not be Passed.

(From a Staff Correspondent.)

St. Paul, March 1.—(Special to The Herald.)—Two points of particular interest to St. Louis county developed at committee meetings yesterday afternoon.

One was that no bill will be passed raising the vessel tonnage tax, thus driving away from Duluth the tonnage that has been registered there and provided the state and county revenues that they would not have had if it had not been for the attractive tax rate offered by the state.

The other was that no bill providing for a recount of the vote by which the tax amendment to the constitution was adopted and the good roads amendment was defeated, will be passed.

In the house committee on taxes and tax laws, which did a commendable afternoon's work and cleared the boards pretty well, the Adams bill, raising the tonnage tax from 3 cents per ton to 10 cents per ton was referred to its author. This was done because

(Continued on page 2, first column.)

MILLIONAIRE ARRESTED

For Throwing Cabbage at Clay Clement in St. Louis Theater.

St. Louis, March 1.—Charles McLean, millionaire patent medicine manufacturer, and son of the late Congressman James H. McLean, was arrested Wednesday night at the Garrick theater on the charge of disturbing the peace. The complaining witness is Dan S. Fishell, resident manager of the Garrick.

The arrest followed an exciting episode, during which two cabbages were thrown across the footlights as Clay Clement, playing in the role of Sam Houston, was reaching his climax in the second act. Mr. Fishell says he saw McLean throw the cabbage from a box.

$50 FOR STOLEN KISS

And Then the Kisser Appealed From the Verdict.

Detroit, Mich., March 1.—Considerable spice has been interjected into a case being heard before Judge Murphy in which Jennie Wheeler is the plaintiff and Richard P. Ross the defendant. It is an appeal by Ross from a verdict of $50 given the woman by Justice Ott. It seems that one warm day in August, 1905, while Ross was passing the house, 4 Jones street, in which Mrs. Wheeler was living at that time, the woman, whom he had met on two previous occasions, called him into the house to consult him in regard to securing space for her for a restaurant booth at the state fair. She alleges that Ross seized, kissed her and tore her clothing. Supt. Rutledge and Detective McCarty have testified regarding the complaint.

MAIL STEAMER GOES ASHORE.

Flushing, Holland, March 1.—The Dutch mail steamer Koningin Wilhelmina, from Queensborough, Eng., went ashore at 6 o'clock this morning during a thick fog, on a dyke eastward of the entrance of the harbor. The passengers and mails were landed and the vessel is expected to float at highwater. There were ninety passengers on board.

HANDED A LEMON

Oliver Given Back Panama Canal Check Without a Word.

May Sue Government to Recover Expense of Making Bid.

Washington, March 1.—William J. Oliver, Jr., of Knoxville, Tenn., today called at the office of the Isthmian canal commission and received from Mr. Roger's, the commission's counsel, the certified check for $200,000, which was submitted at the time Mr. Oliver presented his bid for constructing the Panama canal on a percentage basis. Mr. Oliver left the building without making any complaint or lodging any protests against the action of the president in rejecting the proposals for constructing the canal. Mr. Oliver stated that pending the arrival in Washington of his counsel, Judge Morgan J. O'Brien of New York, who is now on his way here, he would withhold from publication the statement that he intended to give out. He also intimated it was possible that he would find some way of bringing legal action against the government to recompense him for the loss he has sustained in connection with the preparation of his bids.

CARLISLE TO TAKE A BRIDE

Former Secretary of Treasury Will Marry a Virginia Woman.

Richmond, Va., March 1.—Information has been received in this city confirming the report of the engagement and approaching marriage of Mrs. Gertrude Tucker Logan of Virginia and John G. Carlisle, former secretary of the treasury.

The former report, which emanated from Washington in the shape of a rumor, could not be verified on account of the absence from Virginia of Mrs. Logan, who has been spending some time in the North. Friends of Carlisle refused either to confirm or deny the report. There is now no further doubt of the fact that the marriage will take place, but the date of the ceremony has not been announced.

Mrs. Logan, who is a daughter of John Randolph Tucker of Lexington and a sister of Harry St. George Tucker, president of the Jamestown Exposition company, is a most charming woman.

ROSE TO RUN AGAIN.

Kansas City, March 1.—W. W. Rose, who was twice ousted from the office of mayor of Kansas City, Kan., by the state authorities for non-enforcement of the anti-liquor and anti-gambling laws, was nominated for that office again yesterday by the Democratic primary. Rose had no opposition.

JEROME MAY ATTEMPT TO PROVE THAT THAW IS ACTUALLY A PARANOIAC

SIR CHENTUNG LIANG-CHENG,
Chinese Minister, Elected President of Alumni Association of an American Academy.

Exhaustive Questioning of Evans Points to That Conclusion.

Theory of Insanity of Adolescence Does Not Suit Attorney.

Evans Says Thaw Was Insane When He Killed White.

New York, March 1.—District Attorney Jerome's intention of applying for a commission in lunacy to examine Harry K. Thaw seemed to be definitely established today during the continuance of his cross-examination of Dr. B. D. Evans, the principal medical expert for the defense.

Mr. Jerome, during his examination, constantly referred to the subject of paranoia, but was unable to secure from the witness any admission that would tend to show Thaw a paranoiac. By this line of questioning it seems probable that the prosecution will attempt to show that instead of being afflicted with the insanity of adolescence, Thaw is actually a paranoiac.

New York, March 1.—When the Thaw trial opened this morning District Attorney Jerome announced that there had been received a second packet of letters from J. D. Lyon, the Pittsburg banker, who, until November last, had custody of Thaw's will. The letters received today were written to Mr. Lyon by Thaw while in the Tombs and all bear dates subsequent to June 25 last. Mr. Lyon first sent on only letters written prior to the roof garden tragedy.

Mr. Jerome was very anxious to have the later letters and they were sent on by consent of Thaw's attorneys. The letters are held subject to the court's orders.

Dr. Britton D. Evans was recalled as soon as the letters from Pittsburg had been examined by counsel, and Mr. Jerome continued his cross-examination of the alienist.

Mr. Jerome asked the witness if he had any knowledge of facts that have not been testified to.

An argument was the result, Mr. Jerome claiming that the only point in the case was whether or not the defendant was insane when the homicide was committed.

Dr. Evans was allowed to answer, and said that so far as he could recall he had told all of importance that he could remember of what he had heard and seen on the first three visits to Thaw in the Tombs.

"Taking everything that you have

(Continued on page 3, third column.)

PROPERTY RIGHTS IN QUOTATIONS

Strengthened by Decision Rendered by Minnesota Supreme Court.

Minneapolis, March 1.—(Special to The Herald.)—Property rights in grain quotations of the Minneapolis chamber of commerce were strengthened by a decision of the state supreme court, handed down today in the case of the chamber against J. E. Wells. The latter is not a member of the exchange, but claimed the right to use the quotations, on the ground that the chamber's property rights in them were extinguished by the fact that they were posted in public places and thereby became public property. The court, in overruling this contention, gives the chamber the upper hand in a fight now pending against several bucket shops.

FINE SCHOOL BUILDING AT ALLEGHENY BURNED.

Pittsburg, March 1.—One fireman was seriously injured and five others slightly hurt early today at a fire in Allegheny which completely destroyed the Fifth ward school building, a three story structure, valued at $150,000.

The school building was one of the finest in Allegheny and was attended by 1,500 pupils. Crossed wires are said to have caused the fire.

COMING IN LIKE A LION, ALL RIGHT.

SERIOUS COLLISION IN NORTHERN PACIFIC YARDS MAY CAUSE TWO DEATHS

JOHN F. WILKIE,
Chief of the Secret Service of the United States, Who Has Taken Charge of the Big Robbery Mystery at Chicago.

A Switch Engine Crashes Into a Fast Freight Train.

Ole Bergstrom and Morris Stearin Are Badly Hurt.

Number of Cattle Injured and Had to be Killed.

A switch engine, pulling three boxcars, crashed into a fast freight train this morning a few minutes before 7 o'clock, in the Northern Pacific yards on Garfield avenue, a short distance below the round house.

Ole Bergstrom of Moose Lake, Minn., engineer on the switch engine, and Morris Stearin of Duluth, fireman on the same engine, were badly injured in the accident, and in both cases the wreck may have fatal results. Bergstrom is the worst hurt of the two, but the condition of both is critical. A possibility exists that they will recover, but in any event they will be maimed for life.

One of Stearin's legs was amputated this morning at St. Luke's hospital, where the men were taken. Bergstrom's legs were also badly crushed, and one of them may have to be amputated. In addition to the broken and crushed limbs, the bodies of both men were cut and bruised. While pinned in the cab, Bergstrom was badly burned by escaping steam.

One of the cars attached to the switch engine was loaded with cattle,

(Continued on page 3, third column.)

MARRYING THE GIRL

Made Full Reparation, Says Prosecution in Strother Case.

The State's Attorney Begins His Evidence in Rebuttal.

Culpepper, Va., March 1.—Commonwealth Attorney J. A. C. Keith will today begin the presentation of his evidence in rebuttal in his attempt to shatter the plea of justification advanced by the defense for James A. and Philip Storther, on trial here for the murder of William F. Bywaters, their brother-in-law. The rebuttal will begin immediately after the defense has called to the stand Dr. Chelf one of the physicians who attended Mrs. Viola Bywaters at "Rotherwood," the Strother home, who was declared by her brothers to have been the victim of a criminal operation performed in Washington at the insistence of Bywaters.

Prior to adjournment yesterday afternoon, Judge Harrison stated that he was desirous of expediting the trial, and with this understanding the counsel for the defense agreed to complete their case without delay.

The commonwealth attorney has advised the court, that the state expected to complete its rebuttal in one day.

Although the names of the witnesses for the rebuttal have not been announced, according to Capt. Micajah Wood, associated in the prosecution, they will be called mainly to show that when Bywaters married Viola Strother he made full reparation for the wrong he is alleged by the defense to have done her, and that the shooting was not therefore justified.

CHINESE MINISTER

Elected President of Washington Alumni Association of Andover Academy.

Washington, March 1.—At the annual meeting of the Washington alumni association of Andover academy, Sir Chentung Liang-Cheng, Chinese minister to the United States, was elected president of the association. The meeting which was held last night was addressed by Ephriam Adams of Waterloo, Iowa, of the class of 1884. John A. Mellhenny of Louisaina, recently appointed as a member of the civil service commission, was among those elected to membership. The Chinese minister presided over the meeting.

MILITARY CADETS ARE REINSTATED.

Washington, March 1.—The appointment of B. O. Mahaffay of Texas, John A. Cleveland of Alabama, and Trumett F. Keller of New York, as second lieutenants in the army, is provided for in a bill passed by the house late last night. They were dismissed from the military academy for insubordination in 1901, but, according to the committee report accompanying the bill, their subsequent career has been especially praiseworthy, and their parents urged that the young men be set right by congress.

DOG FOLLOWS MASTER'S FUNERAL TO CHURCH.

Trenton, N. J., March 1.—All through the funeral services of Col. Michael Hurley, member of the Democratic state committee, held at St. Mary's cathedral, his pet dog sat outside the door and howled, refusing to be driven away. The dog also followed to the cemetery and sat on the grave until a member of the family caught him and took him home.

Col. Hurley was a member of the city council, and in his honor all city business was suspended. His boyhood chum, Bishop James A. McFaul, preached the funeral sermon.

METHODISM IN NORTH COUNTRY

Presiding Elder Copper Tells of Progress Being Made.

Bemidji, Minn., March 1. —(Special to The Herald.)—The second quartely conference of the Bemidji Methodist church was held at the church Wednesday evening, and the occasion was made a noteworthy one on account of the presence of Rev. E. K. Copper, presiding elder. Reports were read from the various officers of the different organizations of the church, all of which were very flattering.

Mr. Copper told of the work that is being done in the North country toward advancing Methodism. Mr. Copper spent last Sunday at International Falls and was much gratified at the interest that was awakened there. He established a board of trustees, consisting of several members. Five lots have been donated to the church society there, the property being considered well worth $1,500. Arrangements are also being perfected for the building of a handsome church edifice at International Falls.

Rev. Copper also visited Littlefork, where much interest was shown, and he has every reason to believe that property will also be donated for a church in that village.

A. M. E. church association has but recently been established at Walker, and four fine lots in the heart of that village have been purchased for the society. Rev. K. B. Alexander of Ohio has been appointed pastor at Walker, and until the arrival of that gentleman the pulpit will be supplied by Rev. Copper.

TERRIFIC TORNADO

Literally Wipes Out the Town of Washington, Ark.

Information is Meager But Destruction is Complete.

Little Rock, Ark., March 1.—A special to the Arkansas Democrat from Nope, Ark., says that a destructive tornado struck the town of Washington, late last night, and almost literally wiped it out of existence. Two negroes are reported killed and several persons were injured. Among the buildings destroyed were the Presbyterian church, Episcopal church, Judge W. Y. Etter's dence, T. W. William's store, dence of Sheriff Wilson structures. All wires are

NO RECOUNT TO BE MADE

(Continued from page 1.)

the bill was defective, but sentiment developed in the committee that was decidedly against the bill. It was shown that it would result in decreasing the revenues now derived from vessel taxes, not in increasing them, so long as there are other states where the vessels could register and get the same tax rate that has induced them to register in Duluth.

Elmer E. Adams of Fergus Falls, the author of the bill, stated to The Herald yesterday afternoon that it was his idea to increase the revenues, not to decrease them. He said that he believed that there should be a conference of the lake states to agree upon a uniform method of assessing and taxing vessel property, in order that it should not escape all taxes except a merely nominal amount, and that his bill was intended to bring about that result more than it was to injure Duluth.

The reference of the bill to its author practically kills it, though it would permit him to introduce another correcting the technical defects found in the present bill, but since the committee is clear sixteen against the measure, it is not likely that he will offer another bill.

* * *

No acion has been taken upon the Case bill providing for a recount of the vote on the two constitutional amendments affecting taxation and good roads, but at the meeting of the house committee on election yesterday afternoon Chairman Tighe of St. Paul stated that he had canvassed the committee and had found not to exceed three or four of the seventeen members in favor of it.

Representative Brady of St. Paul wanted to act upon it, but Representative Opsahl of Bemidji, who is against it, said that out of fairness it ought to be put over until there was a larger attendance. There were only ten members present, so it was put over, and Chairman Tighe said that he would call a meeting of the committee as early next week as possible, when the bill will be finally considered and acted upon.

There is not the slightest question of its defeat. Nobody denies that a mistake has been made. Nobody denies that an amendment is being added to the constitution that the people have rejected. Nobody denies that another amendment is being left out that the people actually voted in by many thousands. But the members of the committee are against a recount, because it will interfere with pet plans to juggle with the state tax system, and undoubtedly the committee will recommend the bill for indefinite postponement, and the house will adopt the report of the committee.

* * *

The Christenson bill, putting street railroads under the jurisdiction of the railroad and warehouse commission, will be amended so as to preserve to the cities the rights they now have and the powers they now enjoy in regulating the electric lines that transport passengers, with more or less discomfort and delay, from one part of the cities to other parts.

Bert Fesler, city attorney of Duluth, was one of the city counsels that appeared before the committee to object to taking away from the cities the rights they now possess, and he was backed by the city attorneys of St. Paul and Minneapolis. He proposed an amendment to the effect that the bill should not affect the power now held by the cities over their electric lines, and the committee referred the matter to a subcommittee to draft an amendment along the line. The effect will be to give the city councils and the railroad and warehouse commissions concurrent jurisdiction.

Incidentally there was a spirited set-to between Mr. Fesler and Representative Christenson of St. Paul, the author of the bill.

Mr. Christenson, after the city attorneys had talked, tried to dispose of their arguments by saying that aldermen were not of much account anyway, and that there was small danger that they would try to bring the street car lines to time.

Mr. Fesler immediately arose and resented this reflection upon the councils and the city attorneys who represented them and their cities. He admitted that unless Mr. Christenson could bring proof of what he had said he should withdraw his charges.

Representative Timberlake of Minneapolis supported this suggestion, and Representative Jefferson of Bingham Lake said that the discussion was wandering off the track, and that the committee should accept Mr. Fesler's amendment, which seemed to be clearly proper, and recommend the bill for passage as amended.

Chairman W. A. Nolan said that if somebody had made such a charge against his constituents as had been made against the constituents of the city attorneys who had addressed the committee, that he should insist that it be proved or withdrawn.

Thereupon Mr. Christenson made the amende honorable, the reference to the sub-committee was voted for, and the committee adjourned, peace and harmony prevailing.

The sub-committee consists of Representatives Timberlake, Libby, Glotfelter, Brady and Doyle.

* * *

The Knutson committee to investigate the Hill-Steel trust ore lands deal had another meeting yesterday afternoon, with Louis W. Hill, vice president of the Great Northern, as the only witness.

Mr. Hill did not produce the record books of the Lake Superior company, which had been asked for, but submitted instead a transcrit from those records, giving the details as to the ore lands only. He stated, in response to questions by Clarence B. Miller of Duluth, that by advice of counsel he had not sent for the record books, and would not do so.

W. R. Begg, general counsel for the Great Northern, stated that he had given that advice because the books belong in Michigan, where the home office of the company is located, and where the law requires the books to be kept.

Not much information was obtained from Mr. Hill, in spite of the searching questions made by Mr. Miller. As to facts and details his memory was poor, and he did not show a desire to make guesses for the benefit of the committee. He said that the members and officers of the Lake Superior company drew no salaries, but he would not admit that this was because they were already paid by the Great Northern, and that they considered their work for the Lake Superior company as part of their duties as Great Northern officers. He admitted that the offices of the subsidiary companies formed to take over individual mines, named after presidents of the United States, are in the Great Northern office building.

Mr. Miller asked the present value of the securities transferred by the Great Northern to the Lake Superior company Oct. 29, 1899, and what the company proposed to do with them.

Mr. Begg objected because this was outside the scope of the inquiry, which was directed, he thought, to the ore lands deal alone, and after a conference of the committee, with Representative Thayer supporting Mr. Begg's contention, Mr. Miller said that a majority of the committee had overruled the objection.

Mr. Hill, however, could not give an estimate of the value of the securities, and could not say what was to be done with them. He did not think there was any idea of transferring them back to the Great Northern, but he could not say what would be done with them when the legal life of the Lake Superior company expires, which will be in about ten years.

* * *

The house committee on taxes and tax laws put in a busy afternoon yesterday, and got out of the way practically every important tax measure that is pending except the taxation of iron mines.

As to this, no action will be taken until after the hearing this afternoon before the special joint committee to investigate the taxation of iron mines, and probably not until that committee makes a report.

The committee recommended for passage Representative Tighe's bill providing that when the state has more than 25 per cent in excess of the amount it needed for state purposes, received from the various revenue measures that have been proposed, the balance shall be apportioned to the local subdivisions of the state in proportion to the amount of taxes of the state's receipt of a large amount of revenue more than it needs, which would certainly be the result if all of the pending revenue measures were enacted into law.

The committee also approved Representative Rines' bill changing the present law as to exemptions from personal property assessments, so that only heads of families, or persons not members of families, shall be entitled to the exemption. As it is now every individual is entitled to an exemption of $200, and the intent of the bill is to prevent members of a family dividing the property up, for purposes of making assessment returns, and by each taking advantage of the exemption, reducing the amount returnable for taxation.

Besides recommending these bills for passage, the committee killed a trio of bills. One was that by Representative Hicks of Minneapolis to provide that where a judicial district is also a congressional district there may be two members of the state board of equalization instead of one. At present the board is composed of one member for each judicial district. This bill would have given Hennepin county two members of the board, and the committee killed it. It also dispatched the bill by Representative J. T. Johnson, providing that where a judicial district comprised more than seven counties, it should have two members of the board of equalization.

The third bill killed was by Representative Case of Cloquet, and it provided that the railroads should pay their gross earnings taxes twice a year instead of all in a lump once a year.

* * *

The outlook now is that the bill increasing the gross earnings taxes of railroads that will be considered will be that by Clarence B. Miller of Duluth, increasing the tax from 4 to 5 per cent, and requiring the railroads to pay special assessments for drinage and local improvements.

Representative Spooner has a bill in increasing the tax to 6 per cent, but leaving the railroads exempt from assessments, and it was largely through his efforts that the Miller bill, which is now on general orders in the house for consideration in committee of the whole, was referred to the judiciary committee. However, he stated that if it was shown that it was constitutional, he would favor the Miller bill.

When the house judiciary committee took up the Miller bill yesterday, it was decided to refer it to the attorney general for his opinion as to its constitutionality. Later in the day a sub-committee waited upon him, and he pronounced it constitutional beyond question.

* * *

Attorney General Young, by the way, has given a local paper a very surprising opinion on reapportionment. The law says that the legislature may reapportion directly after any state or federal census. This has been taken to mean, since the constitution is usually construed to extend only such powers as it actually gives in so many words, that no apportionment could be made except in the first sessions after the census had been taken. Mr. Young gives an opinion that this provision is merely directory. It certainly is "directory" inasmuch as it gives the power but does not command the action, but it takes pretty good eyesight to see in any extension of power to apportion in subsequent sessions, when the only power extended is to apportion at "the first session after each enumeration."

The opinion will be used, if it was not made for that purpose, to excuse postponement of action on reapportionment. The house will probably pass a bill, but when it gets to the senate that body will turn it down, because the constitution always says that reapportionments shall be effective at the next election. It will be able to say, now, that the attorney general has held that the next legislature can apportion just as well. When the next session comes, somebody else will read the constitution according to what it says, and not according to what Attorney General Young thinks, and it will be clear that no apportionment can be made then.

* * *

The sub-committee of the house committee on grain and warehouse, appointed to investigate the howl from North Dakota that "suction drafts" in elevators are robbing the producers, visited some of the Minneapolis elevators yesterday afternoon to see the thing work, and will report the result to the main committee later.

* * *

No more free booze, no more free cigars, no more free carriage rides for indolent voters, no more election money or promises of jobs.

These are the results intended to be reached by the Davidson corrupt practices bill, which the house committee on election agreed unanimously to recommend for passage yesterday afternoon. It prohibits all these things, under penalties, and only allows candidates and campaign committees to spend money for hiring halls, paying speakers, printing, advertising and contributions to campaign committees.

* * *

The house elections committee confronted five different primary election bills yesterday afternoon, and despairing of a quick agreement on any one of them, appointed a sub-committee of three to get together with the authors to frame a substitute bill to be reported out as a committee bill.

The committee took a vote on two propositions, and the result was that all but two favored extending the primary election system to state officers and United States senators, and the vote in favor of a June primary as against a September primary was three to two.

* * *

John Zelch and R. J. Wells, two members of the special committee to investigate the taxation of iron mines, announced yesterday afternoon that they had colaborated on a 10-cent tonnage tax bill, without waiting for further hearings on the matter, or for the report of the committee of which they are members.

The bill they propose admits the exorbitance of the tax it inflicts by providing that the money so raised shall not be used, but placed in a fund and only the interest used for state purposes.

They have figured out, somehow, that the revenue from their bill will be $3,-000,000 the first year and will increase gradually until it is $20,000,000 the twentieth year, and that the income from the taxes will increase from $120,000 the first year to $2,400,000 the twentieth year.

It would have been hard to devise anything showing more conclusively the absurdity and injustice of the whole tonnage tax proposition.

* * *

The house committee on taxes and tax laws will meet this afternoon with the special investigating committee to hear the testimony from the Duluth witnesses relative to the iron mining industry of Northern Minnesota.

RESTORES your HAIR to its NATURAL COLOR.

Miss Fannie McWamee, Lake Geneva, Wis., writes of HAIR HEALTH:

"My hair had been gray ever since I was sixteen years old. It started to get gray right on the crown of my head, was dry and full of dandruff, and my scalp itched dreadfully. I used HAIR HEALTH according to directions, and my hair is now soft and glossy, and very few gray hairs left. I do not think I could get along without HAIR HEALTH now, for it is such a fine hair dressing.

Guaranteed perfectly pure.

Philo-Hay Spec. Co., Newark, N. J.

50c At W. A. ABBETT'S.

LOFTUS ON THE GRILL

(Continued from page 1.)

had stated that he was a member of the corporation known as the Loftus-Hubbard Elevator company, and Mr. Peterson asked him who managed it.

"That is no concern of yours," responded Mr. Loftus, acridly.

Meanwhile, Attorney Manahan objected to the question, and Representative Bouck of the committee, said Manahan would object to everything, and that if the committee was going to entertain his objections, it might as well quit.

"Are you investigating the Loftus-Hubbard Elevator company?" asked Mr. Manahan.

"Yes," replied Mr. Bouck, "and we will investigate you before we are through with this."

Loftus refused to answer the question, and Mr. Peterson found, in response to further questions that Mr. Loftus could not state how many members in good standing the association has, but its lists number 372 members. He couldn't say how many were in St. Paul, but admitted that a number of resignations had been sent in recently.

"For what reason?" inquired Mr. Peterson.

"Perhaps because they had been solicited to do so by certain interests."

"What interests?"

"Various interests."

"You stated that you were not particular about what people you take into your association, the other evening, didn't you?"

"I did not. I said that there were people not far away whom it would not take in, and you can draw your own conclusions."

"Whom do you mean?"

"I mean you, for one."

"For what reason would you reject me?"

"I can give you several if my attorney will let me."

Representative Lennon of the committee here interposed to say that Loftus, and not Manahan, was the witness, and that he should answer the question.

Manahan objected to the question, as Mr. Peterson's record was not material to the case. Chairman Peterson overruled the objection on the ground that the matter had already been gone into, and insinuations made, so he insisted upon an answer.

"Because I know your record," said Loftus. "You have a bad record. You have beaten men out of money, made false representations, and your standing is bad in the community in which you live."

"Mr. Loftus," said Chairman Peterson, "you have insulted the committee and the committee's chairman. You have gone beyond the bounds of decency in making assertions you cannot prove. I am going to prove a little of your reputation before we get through."

This part of the incident was dropped temporarily, and Loftus testified that nobody had full say in the association, and that the directors authorized the campaign against candidates who refused to go on record favoring legislation wanted by the association, and that he did not recall who was the author of the cards sent out to candidates for signature, that he believed the association had a right under its constitution to go into politics.

"Do you get that authority out of your constitution?" asked Mr. Lennon. Manahan objected to the question, and Mr. Lennon said he was talking to the witness, not to Manahan.

"You have been pretty promiscuous in your butting in here," he told Mr. Manahan. Finally Loftus answered the question in the affirmative, and read the clause of the constitution that he referred to, which authorized the association to take steps in the interests of the shippers. He said he would furnish the minutes of the meeting of the association. He admitted that the cards had been sent out under his direction, and said that directors throughout the state had sent some of them.

"When a candidate did not answer to your satisfaction, what did you do?" asked Mr. Lennon.

"That depended upon circumstances; there was no established rule."

"Did you keep a list of those that were all right and those that were not?"

"We kept one list and checked off those that answered properly, as well as old members whom we believed to be all right."

"Some were marked O. K. and others scratched?"

"Yes."

"Those that were scratched you marked for defeat?"

"Yes."

Asked how the association worked against them, Mr. Loftus said that they telephoned, telegraphed or wrote local shippers, or sent letters and circulars out to the voters generally. Work was not confined to association members. There was one solicitor out, F. W. Schroder of St. Paul, who might have done some work in Brown county and elsewhere.

"Did he make much headway in New Ulm, where the reputation of Peterson was so bad?" asked Chairman Peterson.

"I don't know."

"When you asked Peterson to become a member, and send $5," asked Mr. Peterson, "were you in good faith, when you believed him to be so bad?"

Mr. Loftus didn't think he had ever asked Mr. Peterson to join, and Mr. Peterson produced an application blank and circular asking the recipient to send $5 and join, also the envelope in which it came. Both Loftus and Manahan denied that they had had anything to do with sending it, though they admitted that it was the same as many others that were sent out.

"If I had sent you the $5, what would you have done?" asked Peterson.

"If I had known you as well as I do now, I would have returned the money."

"Oh, then you have lately found out how bad I am?"

"I have known about you for some time."

"Did you try to defeat anybody except legislative candidates?" asked Mr. Bouck of the committee.

"No."

"Did you send out, under Senator La Follette's frank, a tirade against Senator Nelson?"

Mr. Loftus admitted that such circulars had been sent out in that manner, containing a speech by La Follette giving the records on senators, including Senator Nelson, on certain public questions.

"You don't believe in rebates?" asked Mr. Peterson.

"I do not."

"Did you ever try to get any for yourself?"

Mr. Manahan objected, and Mr. Peterson changed the form, asking if the witness had tried to get any for members of the association. The witness said he had not, though he frequently received claims from members for overcharges or errors in freight charges. It might be called a form of rebate, but was not actually a rebate.

"Did you ever, in putting up to a railroad a claim of your own and some shippers that appealed to you, did you ever agree in consideration of getting your claim through to drop the others?"

"No."

"Have you collected rebates in the last five years?"

"Not since the Elkins law went into effect. If you go back when everybody got them it is different."

"You collect overcharge rebates?"

"Yes, every day."

Mr. Lennon roused Mr. Manahan later in the proceedng, when he objected to Manahan's interposing suggestions.

"Don't butt in so much," said Mr. Lennon.

"At least use good English," demanded Mr. Manahan heatedly.

"I'll give you the best I've got, and that is the best I can do," responded Mr. Lennon amiably.

The hearing adjourned to this afternoon.

Underwear Specials.

Women's 50c fleeced vests at **39c**

Women's Jersey ribbed wool Vests; our regular 98c kind. Saturday **79c**

Children's Undershirts, 25c kind for **15c**

MAKING A GOOD STORE BETTER

We believe in making a good store still better. There are enough grocers and druggists in Duluth to supply three cities of its size. We intend to specialize on other lines—mainly women's and children's clothing, dry goods, shoes and house furnishings,and leave alone the overdone grocery and drug lines hereafter. Extensive alterations will soon be under way, which, when completed, will make this store forge to the front as never before. Watch us.

Closing Out Groceries!

Groceries are going so fast that it is hard to determine just what we shall have to sell when this ad appears. Every lot is getting smaller. Bulk goods are nearing the bottom of every barrel and bin. Your opportunity to stock up with things to eat at cost and less will soon slip away from you if you don't hurry. Some lots of canned goods, 20c kinds are closing at 13c; 25c kinds at 17c; 15c kinds at 7½c, and 10c kinds at 5c or 6c. Here is the idea in a nutshell: If we have anything you can use you can have it at a price that you will be glad to pay. We are in earnest about closing this department in the least possible time. Must have the room.

FINE FIXTURES FOR SALE AT ABOUT HALF WHAT THEY COST US.

MARRIED MEN WORST.

So Bishop of London Says---City, However Growing More Moral.

London, March 1.—"Taking them all round, married men are much looser in their morals than single men."

This affirmation by the bishop of London quite startled his hearers at a meeting of the Council for Promoting Public Morality. Those present were pleased, however, to learn on the bishop's authority that London is becoming more moral, thanks to the efforts of the police to drive undesirable characters off the streets.

There is still, however, much to be done. The bishop said he would never rest content until the open sale in shops of things to make sin easy was suppressed.

MORE PAY FOR LOEB.

Friends Urge the Congress to Give Him an Increase.

Washington, March 1.—Congress may exhibit its regard for the White House by increasing the salary of William Loeb, secretary to the president. The figure that is suggested as a proper one at which to fix Mr. Loeb's compensation is $7,500. Now, Mr. Loeb draws $5,000, the same compensation that members of congress get under the present dispensation, which will cease to be of effect March 4.

The post of secretary to the president, so Mr. Loeb's friends say, is an important one—quite as important as the place of a member of the senate or house or of the cabinet. Why, they are asking, should Mr. Loeb be forced to juggle along on $5,000 when others are allowed much more than that for duties no more important?

DENTISTRY!

FEBRUARY SPECIAL

$8 Crowns for..	$ 6.00
$7 Crowns for..	$ 5.00
$15 Set of Teeth for..	$12.00
$10 Set of Teeth for..	$ 8.00
$8 Set of Teeth for..	$ 5.00

No need to pay the dentist a big profit. We are satisfied with a reasonable profit. The above prices are for strictly first-class, guaranteed work. Very best materials.

MISS ADELAIDE NICHOLS

PERIODS OF PAIN

While no woman is entirely free from periodic suffering, it does not seem to be the plan of nature that women should suffer so severely. Irregularities and pain are positive evidence that something is wrong which should be set right or it will lead to serious derangement of the feminine organism.

Thousands of women, have found relief from all periodic suffering by taking Lydia E. Pinkham's Vegetable Compound, which is made from native roots and herbs, as it is the most thorough female regulator known to medical science.

It cures the condition which causes so much discomfort and robs that period of its terrors. Women who are troubled with painful or irregular functions should take immediate action to ward off the serious consequences and be restored to health and strength by taking

Lydia E. Pinkham's Vegetable Compound

Miss Adelaide Nichols of 324 West 22nd Street, New York City, writes:—Dear Mrs, Pinkham:—"If women who suffer would only rely upon Lydia E. Pinkham's Vegetable Compound their troubles would be quickly alleviated. I feel greatly indebted for the relief and health which has been brought to me by your inestimable remedy."

Lydia E. Pinkham's Vegetable Compound cures Female Complaints such as Falling and Displacements, and Organic Diseases. Headache, General Debility, Indigestion, and invigorates the whole feminine system. For the derangements of the Kidneys of either sex *Lydia E. Pinkham's Vegetable Compound* is excellent.

Mrs. Pinkham's Standing Invitation to Women

Women suffering from any form of female weakness are invited to write Mrs. Pinkham, at Lynn, Mass. From the symptoms given, the trouble may be located and the quickest and surest way of recovery advised.

WEST END

NEW SITE IS ALL RIGHT

Superior Street Location for Police Station Satisfactory.

Other News From the Western Part of the City.

The plan to erect the new police station in the West end on Superior street, instead of either First or Michigan streets, seems to dispose of the controversy among the citizens of that locality over a site.

The objections to a First street site were many, and there were those who were loath to see the new lockup erected on Michigan street. The Superior site appears on the horizon as a compromise, and there seems to be no objections to it to speak of.

The site at 1916 West Superior street is the most favored by the special committee of the council, which is looking after the matter, although it has not been definitely decided to erect the building there.

It is proposed to make the structure two stories high, and it will be a valuable improvement to the thoroughfare.

Rough plans are now being prepared by the building inspector, and will be submitted to the council at its next meeting.

MISSIONARY WILL TALK.

Rev. E. S. Lindblad to Preach in First Swedish Baptist Church.

Rev. E. S. Lindblad of St. Paul, the American Baptist Publication society's Sunday school missionary for the state of Minnesota, will be in the West end Sunday and will preach morning and evening in the First Swedish Baptist church.

In the morning the regular service and the Sunday school session will be combined, and Rev. Mr. Lindblad will deliver an address to both the young and old members of the church. He will be assisted in the conduction of the service by the pastor, Rev. E. Edstam.

In the evening Rev. Lindblad will speak again.

His talk will have to do with his work as a Sunday school missionary in the state.

NORWEGIAN SERVICES

Will be Held at Synod Church Twice a Month.

As a result of many requests which have been received by the trustees and by the pastor, Rev. E. Wulfsberg, services will be held in the Norwegian language twice each month in the English Lutheran Synod church, Third street and Twentieth avenue west.

The first Norwegian service will be held Sunday morning at 11 a. m., and will be conducted by the pastor. Only one service is held at the English Lutheran Synod church on Sunday. Sunday school is conducted in both languages.

West End Shortrails

The young people's society of the Bethany Lutheran church met in the parlors of the church last evening.

A son has been born to Mr. and Mrs. Charles Gordon of 211 Eighteenth avenue west.

A building committee is to be appointed by Duluth camp, No. 2341, Modern Woodmen of America, to consider plans for a two-story brick and stone building, which the lodge will erect on the site of the present Norwegian-Danish M. E. church, at First street and Twenty-first avenue west. It will contains hall to be used for divers social affairs, lodge rooms and club rooms.

The Mork baseball team is considering a change of name and may toss during the coming season as the Universal Milling company's team.

Robert Swanstrom is ill with typhoid fever at his home on Twenty-first avenue west.

M. A. Fedje has been ill for several days, but is able to be out again.

The Unique and Elite Social clubs of the West end gave a joint dance at Lester Park Saturday evening.

Miss Ellen Skilund of 413 North Twenty-first avenue west was surprised Tuesday evening by a number of her friends. They all appeared in masquerade costume.

The young ladies' sewing circle of the Epworth league of the First Norwegian-Danish M. E. church held a social in the church parlors Tuesday evening.

Your prescriptions will be properly filled at the Lion Drug store.

Since the fall of snow began, West end ski enthusiasts have been out on the hill at Twentieth avenue west. A scaffold has been erected there and some very good jumps have been made.

The funeral of Mrs. Eva Nickelson, who died Tuesday at St. Luke's hospital, will be held Sunday afternoon at Bethany Swedish Lutheran church, Twenty-third avenue west and Third street. Mrs. Nickelson was the wife of Charles H. Nickelson and had resided in the West end for the past nineteen years. She leaves a husband and three children.

"For weak lungs or lingering cough nothing equals the Norwegian Cod Liver oil sold at the Lion Drug store."

HAD "BRAIN STORM."

Excuse of Man Arrested for Drunkenness In New York.

New York, March 1.—"The policeman says you were drunk last night. What have you to say?" asked Magistrate Flinn in the Tombs court of a man arraigned before him. The prisoner said he was Charles Ryan, and that he lived at 18 West street.

"It was this way, your honor," said Ryan: "I am subject to brain storms, and last night I suffered a brain explosion and for the time being became helpless. This well-meaning officer, ignorant of modern therapeutics, diagnosed my trouble as dipsomania. It's all a terrible mistake. I beg you to let me go home."

"You must have been reading about the Thaw trial," said "Battery Dan."

"Yes, I have read every line of the evidence."

"Well, you've got a good excuse, and I'll let you go this time," said the court.

The prisoner would not leave the court room until he had asked Magistrate Flinn for a pass to the Thaw trial. The magistrate ordered him from court on pain of arrest.

KODOL digests what you eat and quickly overcomes Indigestion, the forerunner of Dyspepsia. Made in strict conformity to the National Pure Food and Drugs Law, and sold on a guarantee relief plan. At all druggists.

ROMANTIC MARY FOUND

Truant Who Was Seeking Titled Mother Hires as Nursemaid.

New York Gerry Society Holds Sad and Homesick Girl.

New York, March 1.—Mary Clay, the 14-year-old daughter of G. H. Clay, of Narbeth, Pa., who was reported missing at police headquarters on Saturday, was located at the home of Mrs. Breese of 207 West One Hundred and Thirty-fifth street, where she had gone to become a nursemaid. After being brought to headquarters the girl was given into the custody of the Gerry society for the night and her father was summoned from Philadelphia.

Mary told a mixed story to the police. She said that she had run away from the girl's school under charge of Miss Chapley, on Feb. 13, and had come down to the city with the intention of making money enough to take her to Germany, where she wanted to find her real parents. A strange woman had come to her while she was in school, she said, and told her that she was not the daughter of G. H. Clay, but that her mother was the Countess von Graff of Donner Castle, Blitzen Mountain, Germany.

This mysterious woman had shown her letters and documents to prove that she was the daughter of a countess, the girl said, and it was her intention never to see the man she called father again. She would seek her titled mother, she said, and come into her inheritance across the sea. The girl was convinced that G. H. Clay and his wife, who died a few years ago, had been appointed caretakers for her by the countess.

The girl first went to the Young Women's Christian association at East Fifteenth street upon her arrival in New York, and was sent by that institution to the Home for Respectable Girls, 219 East Forty-sixth street. She remained there until a week ago Friday, when she departed, leaving no trace behind her. According to the girl's statement to the police, she went the rounds of the theatrical booking agencies, trying to get a position as a chorus girl or a dancer in vaudeville. She could dance the highland fling and a Spanish dance, said Mary, but that didn't seem to satisfy the theatrical agents.

When her efforts to get on the stage fell through the girl answered an advertisement for a nursemaid in the home of Mrs. Breese. Saturday Mary went out with the baby in its perambulator and suddenly became ill on the street. She hurried back to Mrs. Breese's home and her mistress called in a physician. The doctor said that the girl had a weak heart and that she ought not to be allowed to work.

Mrs. Breese talked with the girl and learned enough of her story to warrant communication with the police. After the police at headquarters had heard Mary's story of the German countess and her determination to go across the sea in search of a mother and fortune, they disillusionized her of the romantic notions she had been treasuring and the girl who went to the Gerry society for the night was a sad and homesick child.

When Mr. Clay was searching for his daughter in the city last week, he told the police that she had been brooding over the death of her mother, and that he was afraid that her mind had been affected. He said that she was fantastic and flighty and much given to reading full-blown romances.

Benefit Food Sale!

The ladies of the Holy Apostles' and St. Luke's Episcopal churches will conduct a food sale Saturday morning at Kelly's furniture store. A large variety of delicious food will be for sale. Sale opens at 10 o'clock.

SERIOUS COLLISION IN NORTHERN PACIFIC YARDS

(Continued from page 1.)

and while the car itself was not smashed, the heavy jolt threw the cattle about in such a way as to cause a panic among them. The legs of several were broken, and they were otherwise injured, so that they had to be killed.

The switch engine was backing down the track at considerable speed when it ran squarely into the engine of the fast freight. One of the engines was on the wrong track, and each engineer thought he had a clear track. Just which one was running on to the wrong rails doesn't appear to be definitely known.

Because of the heavy snow then falling a person could see only a short distance. The crash came before the engineer or fireman had a chance to make a leap for safety. The shock of the impact drove the tender of the switch engine into the cab, shattering the cab and pinning the men in the wreckage. Yard men and the train crew of the fast freight came to their rescue and soon liberated them, but not before Bergstrom was seriously burned by escaping steam. Both engines were badly battered up in the collision.

The tracks were hardly injured in the least, and the wreck was cleared away by this noon. Traffic was not interfered with to any extent, for the reason that the accident occurred at a point in the yards where there are a number of tracks running parallel.

JEROME MAY ATTEMPT TO PROVE THAT THAW IS ACTUALLY A PARANOIC

(Continued from page 1.)

testified to into consideration what, in your opinion, was the mental condition of the defendant when he wrote those letters?" asked Mr. Jerome.

"He was in a state of mental instability."

"Do you mean that he was insane."

"Not necessarily. He was in a state of mental unsteadiness."

Mr. Jerome handed the witness a copy of the letter Thaw wrote to Anthony Comstock complaining that "dens of vice" were maintained by Stanford White and "other rich scoundrels," for the ruin of young girls.

Dr. Evans examined the paper some twenty minutes. Mr. Jerome asked him if anything in the letter suggested the mental state of the writer.

"It shows," said the expert, "that his mind seemed to be running upon young women and their supposed wrongs and indicates a delusive state in the writer's mind."

"Were the delusions of an exalted or depressed nature?"

"I don't think there is enough in the letter for anybody to say as to that."

Dr. Evans' testimony was called to Thaw's will and codicil and he stated that the ideas and delusions indicated in those documents were different from the ones indicated in the letter.

"Are not the ideas or delusions shown in the will and codicil more concentrated than in the letters?" asked Mr. Jerome.

"Yes, that is my opinion," was the answer.

The will and codicil were written some years after the letters, and Dr. Evans' answer would indicate that in his opinion Thaw's mental disease changed in form and became more serious.

Mr. Jerome then took up the letters, nine in number, and began asking the witness if in his opinion, considering all other things in the case, the writer was insane when the letters were written. Yesterday Dr. Evans was obliged to state his opinion on each letter in excluding everything else.

"This letter shows an unsteady state of mind," said the witness regarding the first letter. He would be no more definite.

"What would you have treated him for?"

"I don't know. I don't think I ever treated a patient by letter."

"Was the unsteadiness normal or abnormal?"

"Well, it was abnormal in that it was not perfectly normal."

"Was the defendant insane?"

"The unsteadiness had perhaps not reached the state of unbalance or insanity."

"Dr. Evans refused to even attempt to classify the unsteadiness, saying that it often took months to classify a case when under close observation, and it was impossible to try to do it on the strength of a letter."

"Then you cannot say what the form of the mental instability?" suggested Mr. Jerome.

"It was no particular form."

Mr. Jerome next had the witness take up each one of the nine letters in turn, asking an opinion as to the state of mind of the writer at the time of the writing, taking into consideration everything connected with the case, including Mr. Delmas' long hypothetical question.

"As to exhibit A," said Dr. Evans, "I would say the writer was bordering on insane instability—that he was over the border."

"In what direction?" insisted the prosecutor.

"There's only one way over," said Dr. Evans, "into insanity."

"You mean he was moving toward insanity?"

"He was further over than when some of the other letters were written."

As to exhibits B, C. and D, Dr. Evans declared they showed a delusive state of mind—that the writer was not perfectly sound—mentally unsteady.

Exhibit F, he said, threw no light on the mental condition of the writer.

This letter shows a state of mental unsoundness in the writer at the time it was written, said Dr. Evans, in reference to exhibit G.

"At last we have got a letter which shows the defendant was insane?" asked Mr. Jerome.

"In a degree, yes."

"What sort of insanity was it?"

"You can't tell what form of insanity it was from letters. No man could. There are indications that might show one of several kinds. There might be a temporary state of acute mania. There might also be indications of simple melancholia."

"Did you ever know a person suffering from acute mania to write a letter?"

"Yes, many."

"When persons suffering from acute mania write letters, do they remember them afterwards?"

"Sometimes."

"What kind of acute mania did he suffer from?"

"I cannot tell. If of any at all it was a very mild form."

Exhibit H, the doctor said, threw no light on the mental condition of the writer, but exhibit I, the last of the defendant's letters, showed mental unsoundness.

"Now," said Mr. Jerome, "please answer me plainly, was the writer of these letters san or insane?"

"When writing some he was insane. How long the insanity lasted I am unable to tell."

"Those letters were written in 1903," said Mr. Jerome. "Now tell me what form of insanity Thaw was suffering from at the time of his marriage, April 4, 1905."

"If that was the time he executed the will and codicil, I would say he was suffering a temporary attack, due to strain, stress or anxiety, or insanity of adolescence."

"Remember," continued the allenist, "I had not seen him at that time. I had not seen him for nearly a year afterwards. I base my opinion on observations since that time and the documents executed at that time."

Mr. Jerome now came directly to the issue in the case and asked: "On the night that he killed Stanford White, was this defendant sane or insane?"

"I am firmly of the opinion that he was insane."

Dr. Evans answered quickly and with directness for almost the first time during his cross-examination.

"What form of insanity was it?" continued Mr. Jerome.

"It was an explosive outbreak of adolescent insanity."

"Now, then, he probably was insane when he wrote those letters in 1903?"

"As a matter of general opinion he was deranged, a degree of adolescent insanity."

"Is the insanity of adolescence acute or chronic?"

"There are acute outbreaks of adolescent insanity, and I have known many cases to clear up overnight. There was a sudden outbreak of one case I have in mind at night, and the next morning the patient was perfectly lucid."

"Do you consider insanity which lasts from 1903 to 1906 acute or chronic?"

"If the insanity continued it would be chronic, but if there were lucid intervals it would not be so considered."

"Would you keep such a man under treatment?"

"Not necessarily. Pneumonia is a recurrent disease, but if a person has an attack in July he would not be kept under treatment for fear he might have another attack in September."

"If a man was crazy, but had lucid intervals for three years would you call it acute or chronic?"

"If he had lucid intervals I would not call it chronic."

"Persons suffering from paranoia often remain in a healthy physical condition, do they not?"

"Yes."

"How many cases of paranoia have you ever treated in your life?"

"I don't know."

"One hundred?"

"I think so."

"Five hundred?"

"I doubt it. It is not a common disease."

"Does a person suffering from paranoia have many lucid intervals?"

"Yes. I have seen many of them and have seen them recover."

"Is it not true that many paranoics disclose no indication of insanity until you get on to the subject of their particular delusion?"

"Yes."

"Was this defendant suffering from acute or chronic adolescent insanity when he shot and killed Stanford White?" persisted the prosecutor.

"At the time of the shooting there was an acute outbreak," replied Dr. Evans.

"Was it acute or chronic adolescent insanity from which he suffered?"

"I am confident that there had been other outbreaks. I believe that when he shot and killed Stanford White it was an acute attack and I believe a recurrent attack."

"Is there such a difference as acute and chronic adolescent insanity?" asked Mr. Jerome as he picked up a medical book from his desk and opened it at a marked page.

"There has been such a classification," said Dr. Evans, "and I can picture a case which might be called chronic during the period of ones adolescence—that is from 10 to 40 years of age."

LATE DOINGS IN UPPER MICHIGAN

Henry Marks, Charged With Arson, Acquitted at the Soo.

Sault Ste. Marie—Henry Marks, who was charged by John Tait, clerk of Luce county, with conspiracy with others in arson cases, was acquitted by a jury Wednesday night. The case was tried at Newberry several months ago, but the jury disagreed, and the action was brought here on a change of venue. It attracted wide attention because Northern Michigan politics was said to play a part in the fight. It was alleged that Marks conspired to have a building at McMillan burned because of a raid made on a questionable resort in which he was interested.

Calumet—The Calumet Gas company is to issue more stock. This decision was reached at a meeting of the directors of the company this week, although it was a plan which had been discussed for some time past. It is intended to bring the total issue to 9,000 shares by means of this sale, retaining 100 shares in the treasury as unissued stock.

The directors of the Castle Dome Development company have decided to more vigorously carry on the work at their property, some twelve miles distant from Globe, Ariz. This decision was reached at a meeting held this week, and the plans were outlined then. Already over $30,000 has been expended in development work, and excellent results have been obtained. Capt. Harry Hill of this city, is the president of the company; Edward F. Cuddihy is treasurer, and W. J. McDonald is secretary. The directors are almost all Calumet residents.

Marquette—The board of trustees of the Peter White public library has entered into a contract with Charles B. Ulrich of Hancock, representing the Art Metal Construction company of Jamestown, N. Y., by which the company will erect a set of second story stacks in the library building, to duplicate the stacks now in use on the main floor and which were installed by the same company.

Thomas Morgan, a resident of Marquette for about forty years, passed away Wednesday morning at his home at 221 West Baraga avenue. Mr. Morgan had been ailing for some time past, but the end came rather suddenly, the fatal turn to his illness being unexpected. Mr. Morgan was born in Ireland in 1841 and was thus in his 66th year. He emigrated to the United States when a young man, first residing in Green Bay, Wis. He came to Marquette in 1867, and had been a resident of the city continuously from then until the time of his death.

The final step in disposing of the criminal cases on the calendar for the February term of circuit court was taken Wednesday afternoon, when Judge J. W. Stone imposed sentences on six prisoners. The sentences are as follows:

Albin Jussila, assault to do great bodily harm, maximum ten years; minimum six months; court recommends one year, Michigan reformatory, Ionia.

Fred W. Bailey, forgery, maximum-fourteen years; minimum one year; court recommends two years, state house of correction and branch prison, Marquette.

Philip Verran, assault and batters, ninety days in the county jail.

Matti Lahti, assault and battery, ninety days in the county jail.

Michael Tansey, burglary; maximum fifteen years; minimum one year and six months; court recommends three years, Michigan reformatory, Ionia.

HAPPENINGS IN THE DAKOTAS

Woman In Serious Condition From an Accidental Shooting.

NORTH DAKOTA.

Devils Lake—Mrs. H. E. Willis, wife of the station agent at Grand Harbor, is in the hospital here in a serious condition as the result of a pistol wound. She is an expert markswoman and accustomed to the handling of firearms, and was cleaning a 38-caliber revolver. She was not aware it was loaded, and in some manner discharged it, the ball penetrating one of her lungs. Her husband was away, and on returning to the station, above which the family lived, he heard groans, and upon investigating discovered his wife lying unconscious on the floor.

Grand Forks—While watching a fire at Osnabrock, Mrs. Mike Hertzel and Charles Lindeby, driving in a cutter, were struck by a Great Northern passenger train. The horse was killed, the sleigh demolished, but the occupants escaped with but slight injuries. The fire started in Armstrong's bakery and destroyed that building, as well as Troyer's harness shop, Olsen's hotel building and Flager's meat market, in addition to the household effects of families living on the second floors of all the buildings, entailing a loss of $20,000, with an insurance of about half that amount. A defective pipe or chimney is blamed for the fire.

Efforts of authorities here to locate the relatives of John Cochrane have proved unavailing. The man was employed as shoveler on the Great Northern and became insane and soon died. He was taken to a hospital, but did not recover his mental capacity to tell anything of his relatives beyond the fact that he had two brothers in St. Paul.

Fargo—Some surprise was caused in the district court yesterday when the attorneys for Mrs. Laura Cramer and Arthur Cramer endeavored to exclude testimony showing that they had killed Fred Cramer, the woman's husband. Objections were also made to the admission of an official statement of Mrs. Cramer made to Coroner Mitchell at the time of the inquest.

The prosecution is making a strong case against the defendants aside from their former admissions. It is shown that after having complained of Cramer's brutality, Mrs. Cramer had threatened to shoot him. A large crowd struggled for admission to the court room.

Bismarck—A big meeting of real estate men and representatives of Commercial clubs was held here yesterday. Nearly every county in the state was represented. The delegates express surprise when it is suggested to them that there was suffering in their localities during the winter. A campaign of publicity and education to counteract the effects of baseless reports published in Eastern papers was outlined and the real estate men will work with the commissioner of agriculture and immigration to make the best use of the $20,000 voted by the legislature for his department. The delegates believe that the coming year will be one of great progress and development in the state and look forward to a large immigration. North Dakota was never so prosperous as now, they say, and its great resources must be better advertised.

SOUTH DAKOTA.

Huron—Mrs. Bridget Shannahan is dead at the home of her son, Denny Shannahan, in Foster township, aged 100 years. She came to Dakota territory in 1882.

Rapid City—South Dakota's representatives in congress will interest themselves in securing a federal building for this city.

Whitewood—The building for the new creamery, which is being established by farmers, is about completed. Aside from the machinery the cost will be about $3,000.

Y. M. C. A. BUILDING AT UTICA, N. Y., DESTROYED.

Utica, N. Y., March 1.—The Y. M. C. A. building in this city was completely destroyed by fire today. The loss will be upwards of $150,000. A clothing store, music store and plumbing establishment located on the ground floor were also burned.

Price Day Tomorrow!

We fully expected to have our informal opening, but this weather is against it, yet we are determined to keep busy even in stormy days and tomorrow we plan to give unusual values in new goods.

New White Lingerie Waists—our regular $1.75—at $1.00
New White Lingerie Waists—our regular $2.50—at $1.75
New White Lingerie Waists—our regular $3.50—at $2.50

An immense variety to select from—all handsomely trimmed with lace and embroidery.

New Black Voile Skirts

Which were received yesterday—full pleated—made of the best voile—our regular $12.50 Skirt—for tomorrow and tomorrow only—**at $9.75.**

New Silk Jumper Dresses

In black, brown and navy—Chiffon Taffeta—the very newest designs—**for $19.50.**

Coats

We have a few of the Long Coats for ladies in fancy mixtures, which we are determined to close—the $12.50 to $18.50 Coats—Tomorrow—**at $3.75.**

This seems a ridiculous price, but nevertheless you know that prices do not enter into consideration with us—the goods must be sold and you know that we never disappoint.

Skirts

In dark fancy stripes and plain colors—fully as good and desirable as anything shown for this spring, but they have been in our house two months and must go—the $10.50 to $16.50 quality—**at $5.00.**

Suits

We have a few Suits left that we advertised at $7.50. You may find one that will suit you. If so, you are fortunate in purchasing a $25.00 or $35.00 garment—**at $7.50.**

Silberstein & Bondy Company.

BRAINERD PROTESTS

Against the Imposition of Tonnage Tax on Iron Ore.

Would Prevent Mining of Low Grade Ore for Years.

Brainerd, Minn., March 1.—(Special to The Herald.)—The Commercial Club of Brainerd, through its legislative committee, has forwarded to every member of the legislature of the state of Minnesota the following protest:

The Commercial Club of Brainerd respectfully represents:

That at the present time it is very inadvisable to impose a tonnage tax on all the iron mined in the state, to say nothing of the injustice;

That two-thirds of all the iron ore found in Minnesota is low grade;

That practically all the iron ore in Itasca, Cass, Crow Wing, Morrison, Todd, Mille Lacs, Aitkin and Sherburne counties is, and will be, low grade and high in phosphorus, and of small value in the ground as compared with the Vermilion ores;

That the Michigan ores of similar character and grade have a short railroad haul and shorter water haul and shallow overburden of surface, so that they cost at the furnace about 50 to 75 cents less a ton than the Minnesota ores;

That the only ore sold in the ground on the Cuyuna range has been sold at 5 cents per ton, which is a fair price for ore averaging less than 30 per cent iron and high in phosphorus;

That if a tonnage tax of 5 cents per ton were levied upon iron ore it would prevent the mining of all low-grade ore for many years, and not only greatly injure the state of Minnesota, but the owners of the ore;

The tonnage tax is in principle unjust and morally wrong—as well tax each thousand feet of logs cut or each barrel of flour manufactured or each bushel of wheat sold, in addition to the state taxes which all property pays;

That a large part of the iron ore is owned by Iron companies does not excuse—it was opened by Minnesota men originally and much of it is yet—it is their property just the same as the farmer's land is his property, and they came by it honestly, pursuant to the laws of the state.

All the iron lands in the counties above named except Itasca, and all that part of Itasca county west of the Mississippi, is owned by Minnesota people.

We do not believe that this legislature will or should adopt a policy of overtaxing any particular class of property because a majority of the people are enriched and not oppressed by payment of the tax.

It has been a principle of taxation in all nations, for all time, supported by common honesty, that the property of every citizen, rich or poor, should pay the same proportionate tax as near as practicable, and we believe that any tax or penalty imposed on the property of one man and not imposed on the property of every other man in the same community is wrong in principle, inequitable and oppressive. No man who has honestly acquired and owns any special class of property should forfeit a part of it to the state under the guise of taxation before he can use it.

We believe that the friends of this measure have not been fully advised as to the situation, and that upon investigation it will be found that no such bill should pass.

BANKER TELLS MARITAL WOES

Startling Charges Against Wife Suing Him for Separation.

New York, March 1.—In some ways perhaps the most remarkable document ever filed in the supreme court of this state is the one prepared in answer to the suit for separation brought by the wife of Harry E. Ensign, a banker, at No. 31 Nassau street, a Yale graduate, and who has extensive commercial interests in the West.

Mr. Ensign lays bare his married life and describes his sensations when the extraordinary beauty and winning ways of a woman whom he first met at night in a London street convinced him he could not live happily until she belonged to him, and him alone.

Like Evelyn Nesbit, Mrs. Ensign was sent to a select boarding school, but there she refused to study. Private tutors were of no avail. "The refinements and influences of Christian life" were wasted on this young woman. A country home in Morristown, N. J., was transformed into an English villa, and still Mrs. Ensign was unsatisfied. Finally a home was established for her in Carisbrooke, England, and there she is said to have entertained objectionable persons.

Mrs. Ensign added to her offenses, in her husband's eyes, by blacking her eyebrows and powdering and painting her cheeks.

Mr. Ensign rebelled when his wife knocked him senseless down stairs with a leather satchel. But his rebellion was not long in passing. He forgave her when he had to take her from a Yale dormitory, he says, in the dead of night. He saved her from jumping, lightly clad, from her bedroom window. On that occasion, Mr. Ensign admits, he did speak firmly to her, and it may be even used some profanity. Now, miserable and heartbroken, he bears his troubles with such dignity as he can.

"Having sown the wind," he says, "I have reaped the whirlwind."

In behalf of Ida Elizabeth Ensign, Albert R. Lesinsky of No. 32 Liberty street, has begun the suit against Mr. Ensign, who is represented by Perry Allen, of No. 20 Broad street. She sets forth that they were married in London in August, 1898, and that in this city, in Raton, N. M., and in Morristown, N. J., the defendant treated her in a cruel and inhuman manner. She says misconduct of this nature occurred in the Plaza hotel in this city, in Blois, France; in their residence here, No. 14 East Sixtieth street, and other places, and that since November, 1906, he has failed to provide for her.

STEPPED ON PIER AS TWO, BUT THEY LEFT IT AS ONE.

New York, March 1.—When the White Star liner Celtic reached her pier on the North river, among the passengers was a little German girl who had come all the way from Hamburg by way of Naples to meet her intended husband in this country. When the gangplank for the third-class passengers was lowered she was the first to run down in search of her lover.

The immigration inspectors, however, had forbidden him to come into the inclosure, where the third cabin passengers are kept until they are removed to Ellis island. When he tried to explain that he was an American citizen and entitled to take his intended bride from the boat they told him he would have to marry her first.

He then gave his name as Simon Clutch of White Plains, and that of the girl as Ann Welsburg of Hamburg. The latter showed papers from her parents stating that she was coming to this country to marry Simon with their consent. A nearby minister was summoned and the pair were married on the pier. They were then allowed to start for the home Simon had prepared in White Plains.

WOMAN IS PISTOL SHOT.

Detectives Looking for One Who Smashed Fifty Arc Lights.

Atlantic City, N. J., March 1.—Detectives are on a hunt for a woman dead shot whose trusty revolver, aimed while she was flying along in a big automobile, smashed fifty arc lights on the boulevard leading from the mainland to Atlantic City, Sunday night. Other travelers are believed to have been enjoying the same sport, and constables have been placed along the speedway to break up the new game.

For weeks past county officials have been watching for the globe smashers. Last night they declare that the reports of pistol shots punctuated the approach of a big gray car, running at limit speed, and when the machine passed, a woman was seen sitting alongside the driver, whanging away with a big revolver as she whizzed down the road. Before the astonished officer recovered from his astonishment the car had disappeared, but the markswoman was getting a globe with every shot. Neither the car nor the woman have been located.

WOMAN STOCKBROKER.

Goldfield, Nev., March 1.—Miss Bird M. Wilson is the first woman stockbroker history has recorded. Her operations are confined to the Goldfield stock exchange. Before the San Francisco fire Miss Wilson was the only woman privileged to practice before the United States circuit court of appeals in San Francisco. She was also one of the best court reporters in the state of California.

WILL ARREST THE GHOST.

Donovan Says Spook Helped Tom Platt Steal Land.

Chicago, March 1.—Charging that the ghost of La Flora S. Baker came back to earth and "spirited away" 225 shares in the Algoma Nickel company, and aided United States Senator T. C. Platt in the alleged juggling of $300,000 worth of Wisconsin timber land, James Donovan has injected another sensational feature into a noted case.

As there is evidence in the court records showing that Mr. Baker died in February, 1894, and that the New York Life Insurance company paid to the children of Mr. Baker $25,000 insurance, after the burial, Mr. Donovan's story is considered remarkable.

"If La Flora S. Baker is dead, he has a mighty active ghost," said Mr. Donovan. "Since the alleged burial, I have talked with Mr. Baker. He isn't dead, and unless the deeds and stock involved in this case are delivered to the heirs and myself, I will have Mr. Baker, along with Tom Platt and a number of prominent citizens, before the criminal court before many days."

Baker was a partner of Donovan. The latter claims to have been swindled out of millions in securities and lands. The widow of Mr. Baker, Mrs. Emma Baker, and a daughter, Mrs. Kittie Irene Baker-Wykom, live in Big Rapids, Mich.

NEEDS OF THE MISSION WORK

Discussed by Minneapolis Conference of the Augustana Synod.

Minneapolis, March 1.—(Special to The Herald.)—At yesterday's session of the Minneapolis conference of the Evangelical Lutheran Augustana synod, the morning devotion was conducted by Rev. C. Alm. The following were chosen honorary members: Rev. Mathias Peterson, A. J. Brown and Gutaf Ristrom; members of board of deacons and trustees of Augustana church, B. A. Bonstrom of Buffalo, and Rev. L. A. Johnston, D. D. of Moline, Ill.

The whole session was devoted to discussing the needs of mission work on different fields and making appropriations for mission work on these fields. For this purpose about $13,000 was distributed among the mission stations and small churches.

In the afternoon the conference had the pleasure of listening to interesting reports from its missionaries in Canada. Rev. L. J. Fihn is stationed in Calgary, Alberta, and gives his time to this growing city and the adjacent territory in Southern Alberta. Rev. O. Lindgren is stationed on the field in northern Alberta. He has a very extensive and promising field. Rev. P. N. Sjogren has taken up work in Port Arthur and Fort William, and churches have been organized in both these places and preparations made for the erection of church buildings.

The city missionary in the Twin Cities, Rev. L. A. Haeanzon, also read a very interesting report. His work has been divided into several parts: First, immigrant mission which consists in meeting the immigrants at the depots and distributing religious literature among them and assisting them with advice and such pecuniary help as they may be in need of.

Second, work in the hospitals. In these institutions we have a large number of our people and a large portion of the missionaries' time has been devoted to their spiritual care.

Third, the poorhouses also receive a good deal of attention and inmates have been helped by giving them religious books and also a few Christmas presents. The prisons have also been visited.

Fourth, the great number of boarding houses have also been visited and religious tracts and papers distributed.

ANNUAL INSPECTION

Of the Ascalon Commandery, Knight Templars, at Brainerd.

Brainerd, Minn., March 1.—(Special to The Herald.)—The annual inspection of Ascalon commandery, No. 16, Knights Templar, took place last night, John T. Black of Duluth, grand sword bearer of the grand commandery, making the inspection. The commandery here is reported to be in fine shape. Work was also done in the Knight Templar and Malta degrees and the evening closed with a banquet served by the ladies of the Eastern Star.

A lodge of the Degree of Pocahontas was instituted last night by the great sachem, who was here from Eveleth. A large delegation of Redmen and ladies from Little Falls was present. A sumptuous banquet closed the evening's doings.

PANTON & WHITE COMPANY THE BIG GLASS BLOCK STORE WHERE QUALITY IS PARAMOUNT

PANTON & WHITE COMPANY THE BIG GLASS BLOCK STORE WHERE QUALITY IS PARAMOUNT

SCHEDULE FOR HAULING MILK

Presented to Railroad and Warehouse Commission by H. Bridgeman.

St. Paul, March 1.—Slight progress was made in the hearing on milk and cream express rates before the railroad and warehouse commission yesterday. Morning and afternoon sessions were devoted to the taking of testimony from representatives of the co-operative and centralized creameries. The express company representatives were heard just before adjournment was taken.

It was shown all through the hearing that the present rates on milk and cream now being used by the different companies are greatly at variance on the same amount of freight at equal distances. Commissioner Staples presented a schedule for the inspection of the witnesses, showing that there is a difference of from 30 to 64 cents on cans of milk and cream when hauled by the different companies for the same distances. He stated that it was the purpose of the commission to adjust these rates as equitably as possible, and that the commission would be greatly obliged for information or suggestions that would help in making a just schedule.

H. Bridgeman of Duluth, in behalf of the milk and cream dealers and butter manufacturers of St. Paul, Minneapolis and Duluth, offered a new schedule of rates for the consideration of the commission. The proposed schedule was signed by the various Twin City and Duluth centralizers, and is as follows:

Milk—Up to 40 miles, 1½ cents per gallon; up to 75 miles, 2 cents per gallon; up to 120 miles, 2½ cents per gallon; up to 200 miles, 3 cents per gallon. Cream—Up to sixty miles, 2 cents per gallon; up to 90 miles, 2½ cents per gallon; up to 120 miles, 3 cents per gallon; up to 150 miles, 3½ cents per gallon; up to 200 miles, 4 cents per gallon; up to 300 miles, 5 cents per gallon; up to 400 miles 5½ cents per gallon; up to 500 miles, 6 cents per gallon.

Found at Last.

J. A. Harmon, of Lizemore, West Va., says: "At last I have found the perfect pill that never disappoints me; and for the benefit of others afflicted with torpid liver and chronic constipation, will say: Take Dr. King's New Life Pills." Guaranteed satisfactory. 25c at all druggists.

NEIGHBORS HEARD HER SCREAMS BY TELEPHONE.

Centerville, Iowa, March 1.—Rural telephone users all over Wayne county heard the screams of Mrs. George Stech while she struggled desperately with a tramp who attacked her in her home near the county line. Men in the homes of her nearest neighbors, who hastened to get out teams and rush to her assistance were too late to save Mrs. Stech or capture her assailant. Posses with bloodhounds are searching the countryside, and there is a chance that the tramp will be lynched if captured.

Mrs. Stech says the tramp came to her door and demanded admittance. She was alone in the house with her 3-year-old girl, and frightened, she closed the door in the tramp's face and locked it. The man at once commenced to break down the door. Mrs. Stech carried her little girl to a bedroom and locked her in. She then ran to her telephone and rang to call for help, but before she could speak the tramp had forced his way in and seized her. She dropped the receiver, leaving the telephone open and the central operator heard her first scream.

For half an hour the woman struggled desperately with her assailant all over the little room. Each time she found herself near the telephone she screamed for help. In nearly every home on the system to which her telephone belonged her screams were heard.

The first of her neighbors to arrive found Mrs. Stech bound and unconscious. The tramp had disappeared. The men who started out to hunt him down, after hearing her story, were armed, and said they would shoot him on sight.

Stops itching instantly. Cures piles, eczema, salt rheum, tetter, itch, hives, herpes, scabies—Doan's Ointment. At any drug store.

GIRL ACTS AS DETECTIVE.

Causes Arrest of Alleged Robber, Whom She Trails for Months.

New York, March 1.—Samuel Davis, 29 years old, has been locked up charged with grand larceny, the complainant being Simon Gottlieb of 509 Randolph street, Philadelphia. The arrest was brought about by Gottlieb's daughter, Sarah, aged 19 years, who came here three months ago and enlisted the aid of the police in a search for Davis who, it is alleged, robbed the complainant of $1,400.

The girl sought the man Davis, and located him in a hall on Connor street, where he was a guest at a wedding. She identified him by a hand from which the index finger was missing, and telephoning the police headquarters, secured his arrest.

SHE SOLD HER CHILD FOR ONLY A SHILLING.

London, March 1.—An instance of a child being sold for a shilling was brought to the notice of the Leeds coroner yesterday, and a written agreement as to the sale was produced in court.

The coroner was inquiring into the cause of the death of Doris Silvers, aged 2 years, who had been adopted by a married woman named Ellen Gaunt. Mrs. Gaunt said the mother of the child was a widow, who had to go out to work. She met Mrs. Silvers in a public house in Leeds, and gave her a shilling for the child.

In proof of her statement the woman produced a dirty scrap of paper, on which was written:

I, Mrs. Gaunt, bought from Mrs. Emily Silvers her baby daughter Doris on the 14th day of November, 1905.

Witnessed by M. William Gaunt and Sarah Elizabeth Smart.

"Bull and Butcher" inn, Water lane, Leeds.

A penny stamp had been affixed to the document. Replying to the coroner, Mrs. Gaunt said she did not now know the whereabouts of the mother. The child had been insured for $15.

Address R. B. Jones, T. P. Agt., Madison, Wis.

ROMANCE IN TILTON'S LIFE.

Dead Editor's First Wife Never Recognized His Divorce.

New York, March 1.—Still another romance as pathetic in all its details as the one which caused the tragic self-destruction of Mrs. Bertha Bauduay, was revealed in the death of Ralph Tilton, son of Theodore Tilton, and editor of the Delineator, in this city.

This tells of his marriage, 15 years ago, to Miss Emily Stilman Hubbell, daughter to Mrs. Elbert E. Hubbell, of Bridgeport, and of his desertion of her two years later to get a divorce in the West.

Mrs. Tilton never recognized the divorce and ever spoke of Tilton as her husband. Stranger than all, she is declared often to have lunched with Mr. Tilton and his second wife. She is said to have always treated the second wife with a gentle courtesy that was touching in its pathos.

The original Mrs. Tilton is now living quietly with her mother in a small village in WWindham county, Conn., away from the social life to which she had been accustomed.

Someone is making his or her debut as a Herald want advertiser today. And—the ad. may be worth finding and answering.

BEST NEWS IN YEARS

Duluth People Are Jubilant Over Prospect of Steel Plant.

Morning Paper Suggests That it May Go to Superior.

The all-absorbing topic of conversation in Duluth last evening and today was the story made public in The Herald of the proposed erection of a steel plant in Duluth.

Expressions of pleasure were heard on all sides, and the general opinion seemed to be that it was the best piece of news that has been given Duluth people in many years.

Few expressed curiosity regarding the size of the plant or its location. They seemed to be satisfied that if the Steel corporation decided to locate a plant here, it would be in keeping with the other enterprises of the company.

The News-Tribune this morning, on its Superior page, hinted at the possibility of the plant being built in Superior instead of Duluth.

"A prominent Superior man identified with large interests" is quoted by the morning paper as saying that the outlook is very promising for the plant to be erected in Superior. The paper also suggests the old steel plant in Superior being utilized, and calls attention to the improvements which have been made in the terminal facilities there.

Great capital was made of the fact that the resolution passed by the finance committee read "in the vicinity of Duluth," and the paper sought to show that this, in all probability, meant Superior.

Four-column black headlines on the front page, however, state that the "Steel corporation makes first move to build great iron works at Duluth," so the readers can take their choice.

While nothing definite can be known until after the experts appointed by the special committee in charge of the plans visit Duluth and make their report, it is generally believed that the plant will be located in the vicinity of the ore docks of the Duluth, Missabe & Northern railroad, or between them and West Duluth.

Several of the prominent local officers of the corporation, including Mr. Cole and Mr. Cotton, are in St. Paul today appearing before the legislative committee on the tonnage tax.

The resolutions passed by the finance committee of the Steel corporation regarding the steel plant, and which were made public in The Herald extra last evening, are reprinted here for the benefit of the few subscribers who did not secure a copy of the extra:

"Resolved, that it is the sense of this committee that a substantial plant for the manufacture of iron and steel be constructed and operated in the vicinity of Duluth, Minn., provided it is practical and will be reasonably profitable; and,

"Resolved further, that the subject matter be referred to a special committee consisting of Messrs. Gary, Corey, Perkins and Frick, to make an exhaustive study of the question and to report facts at their earliest convenience to this committee."

KEEPS BODY OF HIS DEAD WIFE

Grief-Stricken Husband at Asheville Will Not Permit Burial.

Asheville, N. C., March 1.—W. C. Gray, of Edgerton, Mass., who came here some time ago and took a villa for the season, has been shut up in his house for two weeks with his dead wife's body and refuses to leave it. He had his wife's body embalmed, and spends almost the entire time by the side of the corpse. He says he is not going to be separated from her, even by death. All efforts to comfort him by his neighbors have been refused. He refuses admittance to all visitors. Crepe was put on the house by him the day his wife died, and he will not allow it to be removed. He has almost become distracted by grief. His young son, who is with him, has interceded in behalf of their neighbors. The old man replies:

"They didn't come to see her when she was sick and they can't come now."

He is hysterical at times, and sits for hours by the coffin, weeping. He says he will take the body back to their old home in Massachusetts, when the winter season has passed in the North, and that he will not allow it to be buried until the frost is out of the ground.

Mrs. Gray died of pulmonary congestion on Thursday night, Feb. 11. The house was at once closed, crepe hung on the door, and an undertaker summoned, who was instructed to clothe the body in fine raiment and place it in the most expensive casket that could be obtained. After this was done, no one but a son and daughter were allowed admittance. The interest of the neighbors was aroused by the fact that the front door of the house had been draped with crepe for two weeks.

Gray, who is about 65 years of age, becomes violent when any suggestions are made to him about the disposal of the body. During the daytime he leaves the body only to take slight nourishment, and most of the nights he spends in lonely vigil by the casket.

MONEY HE CAN NOT LOSE.

Congressman Wants to Pay Back $1,861 and Cannot.

Washington, March 1.—There is a man in Washington with $1,861 that he wants to get rid of and can't. Perfectly true, incredible although it sounds, and what's more, it is real money.

Ernest M. Pollard of Nebraska came to congress to fill a vacancy caused by the promotion of Senator Burkett to the upper house. For several months between the time Mr. Burkett became a senator and the time Mr. Pollard was elected, there was no representative, but when he was elected Mr. Pollard was paid the salary for that interim and was told that it was one of the good things about being a congressman; everybody took it under such circumstances, and he would be foolish to refuse it.

Mr. Pollard took it, and when his constituents found it out they criticised. Then he set about to return the money to the treasury. The treasury refused it. The sergeant-at-arms of the house refused it. Nobody would touch it. Such a case of ingrowing congressional conscience was inheard of. Mr. Pollard came to be regarded by the various people to whom he tendered his $1,861 as a dangerous sort of crank.

But nothing could discourage him. He introduced a resolution asking the judiciary committee to report how he could get the money back into the treasury. He also introduced a bill authorizing the treasurer of the United States to receive and receipt for it.

In due time the judiciary committee brought in a report. The committee held that Mr. Pollard was not properly entitled to the money. But the committee didn't tell him how to get rid of it. No mention was made of any public official who, in the ordinary course of trade, could take it in and give a receipt which Mr. Pollard could show to the folks out in Nebraska as evidence that he had disgorged.

Then Mr. Pollard went to the ways and means committee and begged it to report a bill to relieve him of that $1,861, which was burning several holes in his pocket. The committee deliberated, and decided that Mr. Pollard was entitled to the money, the judiciary committee to the contrary notwithstanding, but just to oblige Mr. Pollard it agreed to report a bill. But the bill has not been passed, and Mr. Pollard is still frantically endeavoring to find some official to take that money from him.

PILES CURED IN 6 TO 14 DAYS. PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c

BECAME RICH ON $1.00 A DAY

Massachusetts Man Has Saved $10,000—All Credit to Wife.

New York, March 1.—Working for twenty-seven years for not more than $1 a day, Octave Girard of Ware, Mass., has accumulated $10,000 and with his wife has settled down to enjoy a respite from toil. He is now nearly 72 years old, but hopes to live many years to enjoy the results of his industry.

The accumulation of this little fortune is the more remarkable because he has had no trade and no education, and to this day cannot read or write.

He and his wife have successfully reared thirteen children, of whom ten are now living.

He says that he and his family have always been well clothed and had plenty to eat.

He adds that it is due to the thrift of his wife rather than his own industry that they have got along so well. Instead of spending large sums for clothing for the children, Mrs. Girard bought the raw wool, washed it, carded it and spun it into substantial cloth.

And all the time they put money in the bank.

Mr. and Mrs. Girard both came from Canada, and Mr. Girard remarks that the inspiration to save money came from his observation of the way the old folks were treated in Canada.

"The old folks seemed to be always in the way," he says. "No matter how good the children might be, their old parents were something of a burden; besides, it seemed hardly fair that young people should be saddled with the care of their parents. So I decided that I'd lay by my savings so that I might never be a burden to my children, if I happened to have any."

Mr. Girard came to the United States when he was 16 years old, arriving in Worcester with 10 cents in his pocket. From there he walked sixteen miles to Grafton, where he got a job with a shoemaker. He did not make much of a go of the shoemaking business, and after several years went to New Bedford, where he shipped on a whaling vessel, the Jerry Perry. He followed the sea for five years, going almost around the world. All the time he was saving money.

When his zeal for the sea had died out he returned to Canada to marry his old sweetheart, Miss Amanda Girouard. After his marriage he began to save more systematically and to work more steadily.

He went to Ware and was employed as a coachman at $1 a day, and for twenty-seven years he continued in that position. He would still be at work if the family who employed him had not closed their house.

Mr. and Mrs. Girard's system has been not to increase their expenses, no matter what the increase in the cost of living. They have steadily saved a certain amount each day, and when their children began to work and pay board, they saved a still larger amount. This was carefully salted down in the bank.

Only once did they attempt an investment and it was a good one. Mr. Girard bought a nice piece of property for $900 and sold it some time later so to make $900. Then he bought a better place for less money than he paid for his first property.

Liquor has been a pitfall that Mr. Girard has always avoided, but he has smoked tobacco was beneficial to the health.

His pleasures have not been many, viewed from one standpoint, but he has cared for little recreation except fishing and shooting, and now that is forbidden him, for, as an alien, he cannot fish or hunt in Massachusetts without paying a license fee of $15 a year.

Mr. Girard lays down the following rules for accumulating money:

"Steady work at low wages rather than intermittent work at large wages."

"Do not increase your expenses as your wages increase."

"Marry young, and don't marry a doll-faced woman."

"Let liquor alone."

"Own your own home."

Heavy, impure blood makes a muddy, pimply complexion, headaches, nausea, indigestion. Thin blood makes you weak, pale, sickly. Burdock Blood Bitters makes the blood rich, red, pure—restores perfect health.

DID NOT LIKE DICTATION.

Why John F. Stevens Resigned as Panama Canal Engineer.

Washington, March 1.—The true reason of the resignation of John F. Stevens as chief engineer of the Panama canal, is that he refused to be dictated to from Washington.

Stevens would not yield his judgment to that of Secretary Taft on several important matters, and the friction grew so warm that Mr. Stevens gave an ultimatum.

He said that unless he could have full swing in all big matters pertaining to the construction he would resign. Taft reported this to President Roosevelt, who immediately cabled Stevens that his resignation would be accepted.

THOMAS FOLEY DEAD.

Successful Railroad Contractor and Business Man Passes Away.

St. Paul, March 1.—Thomas Foley, a member of the firm of Foley Bros. & Kelly, wholesale grocers, and of Foley Bros., the large railroad contracting firm, died yesterday at St. Joseph's hospital, following an operation performed last Friday.

Mr. Foley was born 66 years ago in Lanark county, Ontario, and lived in Canada until 1881, when with his brothers Timothy, John and N. H., he moved to St. Cloud, where the four engaged in business as railroad contractors, and also as lumber dealers.

Some years later when the Kelly Mercantile company of St. Paul went into the hands of a receiver they secured an interest in it, and the company was reorganized under the firm name of Foley Bros. & Kelly. Subsequently the brothers established large stores in different parts of the Northwest, one of the most important of them being at Winnipeg, Man.

Mr. Foley has been a resident of St. Paul for the past eleven years. He is survived by his wife, five sons and three daughters. Mrs. Foley was Miss Jessie A. Craig, of Lanark county, Ontario, and married Mr. Foley in 1878.

M'CAULEYS RECONCILED.

Former Minneapolitans Drop Divorce Quest for Love of Children.

Chicago, March 1.—After three attempts to have his martial ties severed by court, William Louis McCauley, formerly of Minneapolis, secretary of the W. B. Stone Coal & Coke company, and his wife, Jennie, left Judge Carpenter's court yesterday resolved upon another effort to live together in harmony. Their children had much to do with the decision to stop the divorce proceedings which had been begun by the wife.

SIEBECKER ELOPES.

Son of a Supreme Court Justice Gives Up Career at the Bar.

Madison, Wis., March 1.—Karl Siebecker, son of Judge Siebecker of the supreme court of Wisconsin and a nephew of Senator Robert M. La Follette, Wednesday eloped to Freeport and there wedded Miss Julia Jackson of Cincinnati. He is 23 and his wife 21.

News of the elopement reached Madison yesterday. Judge and Mrs. Siebecker some time ago sanctioned the engagement of the young people, but it was against their wishes that the marriage take place so soon. The young man has given up the idea of becoming a lawyer and has dropped out of the university law school. He has secured a position with the Madison Kipp Lubricating company, and will wear overalls and carry a lunch in a tin pail.

The young couple were married after Karl finished his course in the law school.

STOLE; BLAME FAST LIFE.

Chicago Bank Employes Admit Embezzlement of $10,000.

Chicago, March 1.—Two hours after governent authorities had been apprised that the Hamilton National bank had been looted of $10,000, Charles H. Thornton, note teller of the institution, and William F. Baker were on their way to the Cook county jail to await preliminary examination on the charge of embezzlement.

High living and fast life are said to explain the downfall of the young men, who had been employed at the bank since its organization four years ago. This explanation was given by the prisoners to the attorney for the government, to whom they acknowledged that nearly $10,000 of the bank's funds had been taken by the use of cashier's checks, altered certificates of deposit and false entries in the records.

KING'S SET GO BROKE.

Invested Heavily in a Get-Rich-Quick Gold Mine.

London, March 1.—The members of the king's set are going to their annual holiday at Biarritz with heavy hearts. They all have been plucked clean by the promoters of a Siberian gold mine swindle. They were to have made fortunes, but the promoters conducting the bull operations left them in the lurch.

Lord Knollys was inveigled into accepting a directorship and is almost broke. Sir Ernest Cassel, who was conducting a deal from which King Edward was to be the largest beneficiary, dropped $2,500,000. Lord Farquhar, head of the banking house of Herries & Farquhar, was severely hit, as was Mrs. George Keppel. Consuelo, dowager duchess of Manchester, dropped many thousands, and the duke of Marlborough is considerably involved.

For a mild, easy action of the bowels, a single dose of Doan's Regulets is enough. The treatment cures habitual constipation. 25 cents a box. Ask your druggist for them.

UNITED STATES CONSUL WINS BRIDE FROM OPERA.

Minneapolis, March 1.—A hymeneal alliance of almost international interest was effected at the home of Mrs. S. C. Tooker, 820 Summit avenue, yesterday afternoon, when Mme. Norma Romano, late principal soprano with the Savage English Grand Opera company, became the bride of Samuel H. Shank, United States consul at Winnipeg.

The marriage was the culmination of a romance, which had its beginning when the singer played a vaudeville engagement at the Dominion theater, Winnipeg, last September. Mr. Shank, who is a close personal friend of Manager Kobold, was presented to Mme. Romano and the traditional love at first sight became an actuality, which resulted in the longest engagement the former grand opera singer had ever signed for.

Mme. Romano was heard here during the first engagement of the Savage company, when she sang in company with Joe Sheehan, the late Winnifred Goff, Marion Ivel and other favorites with the local public. Mr. and Mrs. Shank will live in Winnipeg, and Mme. Romano says that for the present at least her name will not appear on theater programs, although she may do some concert work.

TO GRIND MANITOBA WHEAT.

Washburn-Crosby Company Planning to Build Mill in Canada.

Winnipeg, Man., March 1.—The Keewatin Enterprise, published in the center of the milling industry on the great water power of the Winnipeg river, 130 miles east of Winnipeg, announces that the Washburn-Crosby company of Minneapolis have an option on two valuable sites close to the water power, and at the annual meeting of the stockholders to be held in a fortnight, will consider favorably a proposition to erect an 8,000-barrel mill to grind Manitoba wheat. The company has prices on the old Kewatin sawmill and the Keewatin Power company's dam. Correspondence with the town council indicates that the company will build. Three of the largest mills in Canada are now at Kewatin.

WEDS OPERA STAR.

Italian Baron Captures Kentucky Singer by Romantic Wooing.

New York, March 1.—Baron Charles V. Bendetti of Florence, Italy, and Miss Jeanette Locke, a grand opera singer of Lexington, Ky., have been married in this city by Rev. Henry M. Warren. Their courtship, it is said, was romantic.

The baroness will not give up her operatic career. Her husband has a winter castle in the south of Italy, where the couple will go for a short stay. He also has a summer home in Florence.

25c for 35c Prophylactic Tooth Brushes—any style—adults', youths' or children's sizes.

GYPSY RIGO LOSES JOB.

Bohemian Fiddler About to Run Away With Another's Wife Again.

New York, March 1.—Janczi Rigo, who made himself notorious by eloping with Princess Chimay, only to have her desert him for a Bulgarian baggage smasher, has lost his job as leader of the orchestra in the Harlem Casino because of his infatuation for Mrs. Caspar Emerson, Jr., the wife of a newspaper artist. Mrs. Emerson says she is a cousin of the Princess Chimay, who was Clara Ward, of Detroit. She bears a strong resemblance to the unfortunate princess. The picture of Rigo's former wife is tattooed on his arm.

Mrs. Emerson says she is going to marry Rigo as soon as she gets a divorce from Emerson. She has filed a suit in Philadelphia. Rigo says he is about to start on a tour of the world at a salary of $600 a week, and will sail for Havana in a few days.

Rigo came to New York a year or more ago, and after filling some theatrical engagements employed a competent press agent, Manager Hamann, of the Harlem Casino. One-hundred-and-twenty-fourth street and Seventh avenue, engaged Rigo as leader of the orchestra, and it was a wise business move. The housewives and spinsters thronged to the casino to gaze on the fat and oily Rigo and listen to him make strange noises on a fiddle.

HEAVY SLEET STORM RAGES AT LA CROSSE.

La Crosse, Wis., March 1.—A heavy storm of sleet, raging for twelve hours, has broken down the telegraph wires of the railways centering here. East and north of La Crosse freight traffic has been suspended, while passenger trains aro being operated slowly and with difficulty. In the yards the tracks are under water, adding a further element of danger to the fast trains.

"Dr. Thomas' Eclectric Oil is the best remedy for that often fatal disease—croup. Has been used with success in our family for eight years."—Mrs. L. Whiteacre, Buffalo, N. Y.

THE SNOWFALL WAS GENERAL

Storm is Over and Colder Weather is in Prospect.

Snow was falling more or less all day yesterday in Duluth and it kept up practically all night and until noon today. At times there was a slackening in the storm, but it was coming down pretty steadily most of the time. This morning it was snowing in Winnipeg and Port Arthur and yesterday the snowfall was general in all the Northwestern states.

The storm center this morning and last night was over St. Louis and the whole of the Mississippi valley district got a lot of precipitation, some snow and some rain. The heaviest rainfall recorded was .42 of an inch at Little Rock. In Duluth the total amount of snowfall up to noon today was about nine inches. There were about eight inches of snow on the ground before in the city, while on the range there was much more.

The temperature for yesterday and today has been very moderate. This morning the government thermometer registered 20 degs. above at 7 o'clock and at noon it was 23 degs. above. The prospects for tomorrow point to lower temperatures, however, and Forecaster Richardson predicts that the mercury in the morning will be between the zero mark and 10 degs. above.

The low pressure area over St. Louis is moving in a northeasterly direction and fair weather will result at Duluth as soon as it has passed. Another storm center is hanging over the Alberta district, but it will have little effect on Minnesota weather. There is an area of high pressure over Western South Dakota, Nebraska and Kansas, which is moving in the direction of Duluth and which will bring the colder temperature.

CONSUELO TO COME "HOME"

Duchess Will Spend Summer With Her Brother In Newport.

Newport, R. I., March 1.—Wearied of courts and kings and fleeing from the notoriety of her wrecked home life, the duchess of Marlborough is coming to America again. With the two children for whose sake she has shunned the divorce courts, which otherwise she would have invoked to free her from her titled husband, the duchess will arrive in Newport early in the season and there will take refuge with her brother and sister-in-law, the W. K. Vanderbilts.

How long she will remain is problematical, but it would surprise none of the Newport colony if the duchess had determined to renounce her British home in everything except the name. It is believed she is thoroughly tired of court ways and the life abroad, and would much prefer to spend the rest of her life among her own people.

She will live at Marble house and is expected to spend the season very quietly, entertaining little or none at all and confining herself largely to the care of her children.

Rumors that the duchess is coming to America in order to get a divorce from her husband without the notoriety achieved by the Countess de Castellane are sturdily denied, and it is said with authority that she has put away all thought of appealing to the courts.

ANOTHER HUGE SUNSPOT.

Pittsburg Astronomer Predicts Electrical Disturbances Next Week.

Pittsburg, March 1.—Another big sunspot is due about today, according to John A. Brashear, the Allegheny astronomer, who discovered the big sunspots several weeks ago. Mr. Brashear observed five small spots Monday. Its full effect will not be perceived on the earth until the middle of next week, when there may be electrical disturbances.

The spot should make its appearance in the western part of the sun. It will then gradually move toward the central meridian, arriving there five or six days.

If you are selling enough goods—then your advertising in The Herald is sufficient.

NEWS FROM WEST DULUTH

CITIZENS JUBILANT

West Duluthians Pleased at Prospects of Getting Steel Plant.

Announcement Will Give New Impetus to Business There.

Citizens and business men of West Duluth are greatly pleased at the announcement that the United States Steel corporation will probably establish a steel plant in Duluth in the near future. It is almost a certainty that if the plant is brought to this city it will be located in West Duluth.

The West Duluth Commercial club has been very active for several months in the agitation for a steel plant in Duluth and now that the steel company has taken the first step toward bringing a plant here the club will continue to work with the Duluth club in showing the advantages of the city. At the meeting this evening the Commercial club will hear a report from the committee which was appointed some time ago to ascertain the prospects of getting a plant here. This committee will probably be kept at work in order that statistics may be shown the inspecting committee of the steel company upon its arrival.

"If a steel plant is established in West Duluth and there is a good chance now that it will be," said L. A. Barnes this morning, "it will mean a great deal to West Duluth and the whole Northwest. People here in West Duluth are feeling very jubilant today. The establishment of such a plant means a new impetus to all branches of business in West Duluth.

"Seeing that the great steel trust is about to establish a monster plant here, will induce other manufacturing concerns of other cities to seek a location in Duluth and if they come to Duluth they will locate in West Duluth, as this is the logical manufacturing district of the city.

"West Duluth people are proud of their Commercial club and also the Duluth club and the Real Estate exchange for doing so much to bring this plant here. I hope to see West Duluth one of the biggest manufacturing centers in the country within a few years."

WITH THE CURLERS.

Filiatrault Wins From Hewitt in Trophy Contest.

In the series of contests being held at the Western rink for the West Duluth Commercial club trophy, only one game was played last evening, between rinks skipped by Filiatrault and Hewitt. The former won by the score of 5 to 10. Two pratice games were also played, one between Meldahl and Zauft and another between rinks skipped by Silger and Ferguson. In the first, Zauft was the winner by a score of 13 to 9 and Silger won in the second by a score of 13 to 8.

This evening rinks skipped by Hoag and Deatherage will play for the trophy. It is possible that another game will be on also, but it has not been announced.

The following is the lineup and scores:

In the trophy contest:	
Wilson,	C. Nelson,
McCormick,	Winton,
Everd,	Martin,
Filiatrault,	Hewitt,
—skip 15.	—skip, 10.
Practice games:	
Lathers,	J. Method,
Scott,	Hamilton,
V. Method,	Deatherage,
Meldahl,	Zauft,
—skip, 9.	—skip, 13.
Lindquist,	Mathews,
Larson,	C. Mathews,
Johnson,	Fleischer,
Silger,	Ferguson,
—skip, 13.	—skip, 8.

TO JUMP FOR PRIZES.

Members of Ski Club Will Have Trial Contests Sunday.

The West Duluth Ski club held a successful meeting last night at the Nelson hardware store on Central avenue and it was decided to hold a series of trial contests for prizes on the hill Sunday afternoon. There was a good attendance of the members at the meeting and considerable enthusiasm was shown.

Members of the club who will take part Sunday will probably be the best riders in the organization and from these several will be picked to represent the West Duluth club in future tournaments. The prizes which will awarded Sunday, although not large, will serve to bring the ski riders to the hill. The contest will be for members of the West Duluth club only.

The first prize for the longest standing jump will be $3, while the next best man will be awarded $2. As there will be a total of seven prizes given the five who are next best after the second will be awarded $1 each. The hill between Fifty-ninth avenue and Sixtieth street will be put in the best shape possible tomorrow and some contests are promised. For the first time since the club was organized a small fee will be charged to spectators.

BLAZE IN RESIDENCE.

Joseph Gauthier's Home Partially Destroyed by Fire.

The residence of Joseph Gauthier, 4713 West Oneota street, was partially destroyed by fire yesterday afternoon, the total loss amounting to about $1,000 which is covered by insurance. The blaze started from unknown origin and had made such headway when the fire department arrived that the firemen had great difficulty in getting it under control.

The fire evidently started in the second story and the firemen first attacked the roof and slowly fought the fire back and had it well under control before it reached the first floor. Mr. Gauthier stated that the blaze probably started from defective wiring.

DREDGING NECESSARY

West Duluth Dock Proposition May Prove Impractical.

Would Cost $5,000 to Dig Channel to the Dock.

Apparently that West Duluth dock question has not been settled yet. That the proposition is impractical in the extreme and could not be carried out without the expenditure of a sum of money which would be altogether out of proportion with the importance of the improvement, is now claimed by a number of people who have looked into the matter.

A number of West Duluthians have been looking over the map in that part of the river, and it revealed the startling fact that it is exactly 2,350 feet from the end of the proposed dock to a place where the water is over seven feet deep, and that for most of this distance the depth it not over five or six feet. The dock as at present proposed will be accessible from the eastern end of the Oneota street bridge, and will adjoin the public slip, 100 feet in width, which is platted inside the dock line through the West Duluth Land company's property. To dredge out this slip to a depth of ten feet, the least depth which would be practicable, would cost in the neighborhood of $5,000, and without this dredging the dock would be accessible for only the very smallest craft in the harbor.

The steamer Newsboy could not go within 2,000 feet of the structure, and it is even doubtful if the Mary Mann could land there. A scow drawing two or three feet of water could, of course be unloaded there, but even so, the advantage of delivery would be little to West Duluth merchants or to the wholesalers with the approach connecting with the eastern end of the bridge, the haul to the central portion of West Duluth would be long and tedious. As a tramp for excursion parties also, the walk would offer no especial inducements.

The cost of dredging to the dock in addition to the $3,200 which the engineer estimates the structure and approaches would cost would bring the cost up to $8,000, a sum of money which, in the opinion of some West Duluthians, could be expended in a way far more advantageous to the citizens of West Duluth.

OFFICERS ARE NAMED.

Swedish Finns Choose Officers for Co-operative Store Company.

The officers and directors who will have charge of the co-operative store which will soon be established in West Duluth have been named. John Nyman has been chosen as president of the company; Axel Nyman, treasurer, and John Lyande, secretary. Three directors have also been elected and they are John Erickson, Albert Johnson and John Lindquist.

Plans for the establishment of the store are being perfected this week and at the next meeting several committees will report. There is some probability that the building in which the Headquarters grocery store is now located will be leased by the co-operative people. The building is situated on Ramsey street and would be an excellent location for the new store.

Literary Meeting.

Members of the Literary club of the Epworth league of the Asbury M. E. church will hold a literary and social session this evening at the home of Mrs. Charles Remfry, 627 North Fifty-eighth avenue west. The evening topic will be "A Night in Our Town," and several papers will be read. Miss Gertrude Smith will sing a solo. The next monthly meeting will be held on the evening of the first Friday in April, at the home of Mr. and Mrs. Axel Lindgren.

West Duluth Briefs.

E. G. Wallinder, who resides on Nicollett street, left this morning for an extended business trip to Colorado and other Western states.

The Duluth box factory has closed down for a few days.

F. A. Watson has moved into the residence at 225 Fifty-fourth avenue west.

Charles Johns left today for Hibbing, where he expects to start in business.

Mrs. H. Eischend left this morning for Ashland, Wis., to attend the funeral of her sister-in-law, Mrs. Girard.

Watch and jewelry repairing. Hurst.

Mayor Cullum has approved the resolution passed at the last council meeting, to establish a fire alarm box at the American Carbolite works.

Miss S. Lindgren has returned from her Eastern trip. While away she visited Chicago and New York.

Mr. and Mrs. Julius Benson, 325 North Sixtieth avenue, will leave within a few days for Washington state, where they will make their future home.

Rev. Thomas Grice, pastor of the Asbury M. E. church, will occupy the pulpit at Coleraine and Bovey, Sunday, and Rev. J. D. Fetters will preach at the Asbury church.

Leonard Erickson yesterday resumed his work at Proctor after having been confined to his home, 128 North Fifty-seventh avenue west, by illness for several days.

Miss Myrtila Busha of Carlton is spending a few days visiting friends in West Duluth.

A social meeting of the Young Ladies' Sewing circle of the Swedish Mission church was held last evening at the home of Mrs. John Olson, 618 North Fifty-sixth avenue west.

Members of West Duluth lodge, No. 17, I. O. G. T., were driven in a large sleigh to the West end last evening, where they surprised the West end lodge, No. 11, at a business meeting.

Fred Potter of Houghton, Mich., is spending a few days in West Duluth visiting friends.

Mr. and Mrs. M. Dormedy and niece, Miss Arteau, left this morning for Ashland, to attend the funeral of Mr. Dormedy's sister, Mrs. Girard.

Mr. and Mrs. A. E. Gardiner have returned from a three-months' wedding trip in Southern California. They will remain for some time with Mrs. Gardiner's parents, Mr. and Mrs. Ira J. Ide, of Seventy-first avenue west, before going to Brandon, Can., where they will make their home.

D. E. H., March 1, 1907.

Feels like talking overcoats when you look thru the window. A few winter overcoats left at most all of the advertised cut prices. Good overcoats for boys, 3 to 99 years of age—good for next winter, as well as during the rest of this season.

Feels like talking spring Suits and Coats, when you see the salesmen unpack, try on and admire the garments which arrived here today from the Stein-Bloch tailor shops. It's the second big shipment. If you want to kill time, come in and have a try-on. We don't want you to buy until you are ready, but we'd like to have you look at these beautiful styles and see how well they are made and how they fit, before you fall in the hands of some high-price, low-art merchant tailor.

TEACHER'S SCORN KILLS BOY

Pathetic Notes Show Reprimands at School Caused Suicide.

Chicago, March 1.—Schoolboy notes and verses found by the parents of Paul Berek, Jr., 14 years old, who committed suicide while brooding over his expulsion from the Mark Skinner school, led them to believe a teacher's reprimands drove him to shoot himself.

One note addressed to his mother and found in the boy's pocket said that he took his life because he could not bear the disgrace of having his parents know he had been expelled from school. Another note said he had been reprimanded by his teacher because he did not speak English as well as other pupils in the school, and that because of this he was reprimanded and dismissed.

Mrs. Coles, principal of the Skinner school, said the boy had been reprimanded several times, and that he was unusually sensitive.

The following lines, written on a scrap of paper, were found under a small wooden heart evidently carved by the boy:

This is the coffin
Which-in I bury
My sin, my soul,
My heart of weariness.

With the verse were two notes written in the Hungarian language, in which the boy begged his parents' forgiveness.

Young Berek was considered an unusually bright boy by his parents and neighbors. He came to the United States from Hungary over three years ago. His parents were exiled, and the father, Paul Berek, is known as the butcher playwright. One of the father's productions, a play entitled "The Judge's Daughter," was given in Hungarian at a downtown theater last year. The family lives at 375 West Van Buren street.

2,000 Men Wanted for the Steel Corporation

Is what you are liable to see in this paper before long. We also want 2,000 men or more to look over the "Fitwell" new spring line of Suits and Top Coats just received. See the individuality of fit, style and material in every garment. You will find us at 112 West Superior street.

Quick Action on Coughs and Colds
A Valuable Home Made Remedy

The stately pine tree growing in the solitude of the Eastern mountains holds the proud distinction of yielding to the human race a greater variety and more meritorious medicine than any other plant in the vegetable world.

Its tinctures, oils and extracts are in constant use by the doctors all over the world and highly prized on account of their certain action on the mucous membranes and their great healing qualities.

A renowned Philadelphia doctor has recently given to his fellow physicians a new and probably the most valuable of pine products. It is known to the profession as Concentrated oil of pine. In speaking of this oil a well known local physician declared it is without an equal for the speedy relief of acute colds and coughs and all manner of throat and lung trouble. The original formula used and now generally prescribed is as follows:

"One-half ounce of Concentrated oil of pine; two ounces of glycerine; half pint of good pure whiskey; mix thoroughly and use in tablespoon doses every four hours."

On inquiring at one of the leading drug stores it was found that the Concentrated oil of pine comes put up for medical use only in one way, and that is, in half-ounce bottles. Each bottle is enclosed in a round air tight case and securely sealed. This protects it from heat and light. The oils sold in bulk as Oil of Pine are useless, on account of their impurities they produce nausea and kidney troubles.

There are also several patent medicines put up by chemical firms under similar names but these can be avoided by making sure to get the "Concentrated" oil of pine in its original package, the mixture can then be made at home by purchasing the other ingredients and mixing them in a ten ounce bottle. A cold should never be permitted to linger as nine tenths of the serious ailments originate in a cold which at first seemed trivial. The constitution becomes weakened by coughs and cold and any disease is then liable to set in. In these days when consumption is so prevalent it behooves one to be extremely careful.

DEMOCRATS OF MICHIGAN

Place Several Candidates in Nomination at Flint Convention.

Flint, Mich., March 1.—The Democratic state convention yesterday afternoon placed in nomination the following ticket:

For justice of the supreme court, George H. Stone, of Ithaca, and John R. Carr of Cassopolis.

For regents of the university of Michigan, Woodbridge N. Ferris, of Big Rapids, and Judge Henry A. Harmon, Detroit.

For member of state board of education, Stanley P. Parkhill, of Owosso.

The resolutions adopted were in favor of non-partisan judiciary elections, direct popular nominations of United States senators, congressmen and all state and municipal officials; demanded that the legislature provide for non-partisan delegates to the proposed constitutional convention; favored the initiative and referendum, and demanded that the legislature enact a law empowering municipalities to own and operate all public utilities within their limits, if they desire to do so.

AGREEMENT IS REACHED

By Conferees on La Follette Bill for Railroad Employes.

Washington, March 1.—Conferees on the La Follette bill to promote the safety of employes and travelers upon railroads by limiting the hours of service of employes reached an agreement on the measure, and their report will be made today. The bill was amended in several particulars.

The provision relating to employes who have been on duty for sixteen hours out of twenty-four was amended so that the required eight hours off duty shall be consecutive. The provision of the bill as it came from the house relating to the number of hours of work for operators or other employes having to do with orders connected with the operation of trains was materially changed. As agreed upon by the conferees, such men shall not be "required or permitted to remain on duty for a longer period than twelve consecutive hours in any twenty-four hours' period." This is an increase in the hours from nine hours. The provision fixing one rule for day and another for night service was eliminated. The clause in regard to prosecutions was amended so as to read "in all prosecutions under this act the common carrier shall be deemed to have had knowledge of all acts of its officers and agents who have direction and control of employes."

LITTLE SCHOOLMA'AM

Marries Rich Viking and Now Lives in a Castle.

New York, March 1.—Miss Mary E. Tate, principal of public school 45, in East Thirty-sixth street, and her corps of women teachers were thrown into a flutter of excitement when a postman delivered to each of them a letter bearing the postmark of Helsingfors, Finland. There was a chorus of "Os" and "ahs" and then came shrieks of delight and a hurried consultation.

"Lena did marry a millionaire, after all," exclaimed one teacher.

"Gracious!" chorused another, "and she lives in a castle."

Two years ago Miss Lena C. Schleussner was appointed teacher in 45. She was one of the prettiest little schoolma'ams in New York, and straightway all the girls and teachers in No. 45 fell in love with her. She saved her salary to take a European trip.

Last summer the long-looked-for trip came. When the big steamer had been out a short time and the little schoolma'am was pacing the deck, she became conscious of one man looking at her. He was a handsome, blond young giant, who looked like a viking in modern American clothes. Miss Schleussner never has explained how she and the viking became acquainted, nor how she learned to pronounce his name—Valkeapaa. It is evident that no other man on the trip had a chance against the Finn. At the ending of the voyage the two young people were as good as engaged. Mr. Valkeapaa is a member of a prominent family in Helsingfors. He also is wealthy.

Mr. Valkeapaa followed Miss Schleussner home and gained her father's consent. The marriage took place during the last week of January, and the viking and his bride sailed for his ancestral home.

The Shield of Quality is the "Always Ready"

VENTILATED

Always Ready to Wear. Needs no sewing

A complete garment worn under the corset to protect the clothing from injury by perspiration.

MADE IN CALIFORNIA

Price, Plain, all sizes----65c

Ventilated, all sizes------75c

Guaranteed to wear and be satisfactory for six months. Can be laundered in hot water; see directions on each envelope. Takes the place of a dozen ordinary shields. For sale by

The Albenberg Co.,

Cor. Firs Ave. W. and Superior St., Duluth.

Beware of imitations; look for our name on every shield.

When ordering by mail send bust measure.

Oakland, Cal.

WESLEY HEARING IS POSTPONED

Case Closely Connected With That of Paul Fournier.

Bemidji, Minn., March 1.—(Special to The Herald.)—The preliminary hearing of James ("Shorty") Wesley, charged with having killed N. O. Dahl, on his claim near Quiring post-office, on April 7, 1904, which was set for yesterday has been again postponed on the motion of County Attorney Henry Funsley, until March 7.

The case of Wesley is closely connected with that of Paul Fournier, who awaits the action of the grand jury on the charge of having killed Aagot Dahl, the daughter of N. O. Dahl. In the Fournier case, eighteen witnesses were examined at the preliminary hearing, and it is stated that at least fourteen of these would be used in the Wesley hearing, which would make a large bill of expense to the county. These witnesses have given bonds to appear before the grand jury, which will convene at the term of court that will be held beginning March 19. In continuing the case, Judge Sidnvik probably had in mind the summoning of these witnesses and the expense that would be incurred, which might be avoided by using them at the time of the Fournier hearing before the grand jury.

STUDY OF THE CUYUNA RANGE

Professor Leith Says Preliminary Statement Will be Issued.

To the Editor of The Herald:

A recent copy of your paper contains the statement that the United States geological survey will issue no report on the Cuyuna iron range, because I have resigned from the survey. Permit me to state publicly what I have said in response to letters of inquiry, that the geological structure of the Cuyuna district is being studied with a view to presenting an adequate map and discussion in the final general monograph of the Lake Superior region, now being prepared by President Van Hise and his assistants. Such geological study of the Cuyuna district must be based almost entirely on drill records, and cannot be made in advance of drilling. It is too early to present any satisfactory monographic report on the geology of this region. I have prepared, however, a brief preliminary statement of the geology as it seems to develop from the data available, which will appear in the next number of Economic Geology.

While it is true that I have resigned my commission on the survey, I still give a part of my time to survey work on a per diem basis, and the essential geological results of my other professional work in the Cuyuna district and elsewhere will be available to the survey. Very truly yours,

C. K. LEITH.

Madison, Wis., Feb. 26.

RAISES CHILDREN

Like Chickens in Many of the Large French Cities.

Paris, March 1.—M. Lion, who rears children under glass at an institution in Paris, is shortly to open other establishments. His system, which was first introduced at Nice five years ago, of preserving the lives of children born half developed, by keeping them in a glass case until they attain a normal weight and size, is an elaborate one.

The air with which each receptacle is supplied is filtered five times through cotton-wool, to insure its absolute purity. It is also raised to a certain temperature before entering the receptacle, and is automatically maintained at that degree of heat.

The institutions at Paris and Nice, as well as others at Marseilles, Lyons and Bordeaux, are entirely philanthropic and for the benefit of poor children, parents who can afford to pay having the apparatus sent to their own homes. It is stated that the experiments of M. Lion have been attended with remarkable success.

SEWAGE CAUSES CHOLERA.

St. Paul, March 1.—Dr. Bracken of the state board of health has investigated the epidemic of winter cholera at the state farm school, and finds that it was caused by the sewage of the institution running into the well where all of the water used by the students is secured.

PRICE MORE MODERATE

Strawberries Are Now Arriving From Louisiana and Texas.

Practically All Vegetables Are Holding Firm in Price.

Strawberries are fast becoming more reasonable in price. They have dropped about 20 cents a quart in the last two weeks, and from now on will be on the down grade, so far as price is concerned, and on the up grade in quality. Some of the berries look pretty good now, but they seem sadly out of place in Duluth today, with snow whirling around promiscuously. Louisiana and Texas berries are now arriving. Heretofore most of them have been from Florida and Cuba.

* * *

Speaking of fruit, it is still difficult to keep a full supply of oranges on hand, owing to the car shortage in California. Some of the shippers have quit business altogether for the time being, because of the fact that they can make no shipments. Prices are being quoted in Duluth on three or four different grades, and, everything considered, the prices are quite reasonable. Some of the grades still continue to run in extraordinarily large sizes, owing to the unusual amount of rain in California during the season for growing.

* * *

The big increase in the demand for apples lately is said to have been due to the warmer weather. Whatever the cause, the price has advanced. One reason is the extra cold storage charges that have accumulated on apples that have been in storage all winter, but this stock is of the very best. Only the best is selected for cold storage purposes, for it does not pay to put any other kind in cold storage.

* * *

The potato market continues firm, and there is no prospect of a drop in the near future. The cabbage market is getting firmer, and the prices are held up pretty well. The onion market is also holding firm, and practically all vegetables are doing the same. It looks as if they would rule high during the month of March. The dealers say now is as good a time as any to lay in a supply of vegetables for a while ahead.

* * *

Choice celery is arriving from California in car lots. The stalks are all clean and nice and crisp. The local commission houses offer a tempting array.

* * *

Dealers say it is impossible to predict twenty-four hours in advance what the egg market will be. First it will show a weakness and then strength, and the prices bob up and down in a manner that is most distracting. Thirty cents a dozen is now the highest price asked at wholesale for strictly fresh eggs, and storage eggs are quoted at 24 and 25 cents. The supply seems rather doubtful, being liberal at times and short at times.

* * *

Receipts of butter are fairly liberal, but the market is holding firm. Local dealers say the New York and Chicago markets are stronger at present than at any time during the season, and for this reason there is poor prospect of a lower market for some time, at least.

* * *

What is true of butter is also true of cheese. The market in all lines of cheese is decidedly firmer, and recently there has been an advance in some lines of 2 cents a pound. This is because of the great scarcity of cheese, and the fact that there is more than the usual demand for it during Lent. The factories have advanced their prices accordingly.

* * *

The fish market remains about the same as last week. There have been few changes in this market since the first of the year. The better grades of fish are hard to get, and prices are consequently a little high. There is plenty of poultry, and the demand for it is large, with prices remaining about the same.

TOOK THE FIRE AS JOKE.

Cleveland Audience Refused to Budge From the Theater.

Cleveland, March 1.—Members of a company playing in the Empire theater were forced to sing while the place was on fire and the auditorium was filled with smoke. Although the cry of fire was raised the spectators refused to be panic-stricken and would not budge from their seats.

Announcement was made from the stage that the place was on fire, and it was suggested that the audience retire in order. The people would not go out, and when the smoke became so thick that the stage could not be seen from the last ten rows the holders of seats there moved up.

The chorus girls and the actors went through their lines red-eyed and weeping from the smoke. Jokes were cracked at the expense of the "fire" and the entire program was given.

Crossed electric light wires started the blaze in the fan room of the theater, and damage to the extent of $1,000 was done. The fire burned for half and hour, and above the singing of the chorus could be heard the blows of the firemen.

SHE SWATTED THE PASTOR.

Flint African M. E. Church Row Causes a Fistic Encounter.

Flint, Mich., March 1.—Dissensions which have disturbed the African M. E. church for some time as a result of differences over the use to be made of a bequest of $500 left the church by James J. Hurley, came to a climax when Mrs. Maggie Fields, in the presence of the congregation and the presiding elder, marched to the front part of the church and gave the preacher, Rev. C. F. Hill, a blow in the face with her fist. In endeavoring to avoid more blows, the pastor seized the irate woman and she was slightly injured on the wrist in the scuffle.

Mrs. Fields says she has long had a grievance against the pastor and she could get no satisfaction through him or the official board of the church and she sought this way of bringing matters to a crisis.

LARGE HERD OF SHEEP.

To be Fattened Near Nary and Prepared for the Market.

Bemidji, Minn., March 1.—(Special to The Herald.)—A large herd of sheep, numbering over 7,000, will be fattened near the village of Nary, nine miles south of Bemidji, during the coming spring and summer, and put in condition for the market.

William Hubbard of Mankato owns six sections of land lying within a radius of three miles of Nary, and he began the experiment last spring of putting sheep on the partially cleared portions of the land, with the result that the scrub and brush was cleaned and the sheep fattened rapidly and were in prime condition in the fall.

There were 7,500 sheep on the land last year. They were put in two bands of 3,000 each and one of 1,500. There is twelve miles of woven wire fence that surrounds the "pasture," which makes an ideal place for the sheep.

This year the number of sheep will be 7,000, and they will be brought to Nary as early as possible.

GIRL'S DRESS SET AFIRE BY A MATCH AT A BALL.

New York, March 1.—Gertrude Fische, 14 years old, of 518 East Seventy-seventh street, is in Flower hospital suffering from burns which she received at a masquerade ball at the New York Maennercher hall. She is in a critical condition and there is little hope of her recovery.

Gertrude was seated with a dozen others about a table in the cafe of the hall, waiting for the grand march to begin. The party was chatting and laughing. One of the men struck a match to light a cigar. The head broke off and flew onto the girl's dress. In a moment she was on fire from head to foot.

The people in the hall rushed to the street and little attention was paid to the suffering girl. A young man named Charles Urban was the first to recover his presence of mind, and smothered the flames with his coat, but not until the girl had been badly burned. The incident broke up the ball, and 400 merrymakers went home.

Food Poisons.

90 Per Cent of All Diseases the Result of Undigested Putrefying Foods.

Men of affairs, women of society and children with active brains are too often sedentary in their habits, giving little time to exercise. To this evil is added that of high and irregular living—as a result, the stomach cannot stand the demands made upon it. The abused and overtaxed stomach does not properly do the work of digestion, food taken in ferments and the poison permeates the whole system. The body loses in weight and becomes a prey for the attack of whatever disease it may encounter.

Did it ever occur to you how busy that stomach of yours is? It only holds three pints, but in one year you force it to take in 2,400 pounds of material, digest it and prepare it for assimilation into the blood. No wonder it rebels when overworked. We crowd it with steaks and pastry, irritate its juices with spices and acids, and expect the stomach to do its work. It can't do it. All over the inner layer of the stomach are glands which secrete the juices necessary to digestion. The entrance of food into the stomach is the signal for these glands to do their work. The more the food, and the more indigestible, the greater the demand upon them and upon the muscles of the wall adjoining.

Think of the tons of high-seasoned game, sweetmeats and appetizers crammed into this little four-ounce mill, and then wonder, if you will, why you are dizzy or nauseated or constipated. Don't blame your stomach or curse your fate that you should be born so unfortunate. Blame yourself and apply the remedy.

First, get a small package of Stuart's Dyspepsia Tablets, taking one after each meal and at bed time. They are not a medicine, but a digestive. Your stomach is worn out and needs help, not medicine. Stuart's Dyspepsia Tablets will do the work that the stomach falls to do. There's enough power in one grain of Stuart's Dyspepsia Tablets to digest 3,000 grains of ordinary food, so you needn't feel that anything you eat will remain in your stomach undigested.

Stuart's Dyspepsia Tablets will rout the poison because they remove the cause—food fermentation. They are nature's own cure for dyspepsia. The host of troubles dyspepsia is father of cannot be numbered, for a healthy stomach is the source of all health.

Seize your opportunity before worse conditions confront you. Send today for a free trial package of Stuart's Dyspepsia Tablets. They will bring your stomach relief. F. A. Stuart Co., 83 Stuart Bldg., Marshall, Mich.

The 50 cent size for sale at your druggist's.

NEW SINGER STANDS OVER SIX FEET HIGH.

London, March 1.—A new contralto of great prominence has been found in Miss Marie Stuart, whose debut at Queen's hall was received with enthusiasm by the audience and recorded with praise by the critics.

Miss Stuart's voice, which is described as being a pure contralto of rich quality, is said to be very like that of Miss Clara Butt, and, curiously enough, Miss Marie Stuart resembles Miss Clara Butt in another particular—her height.

Miss Stuart, besides being tall, is of striking appearance, having dark and handsome features and a spirited manner. But perhaps the most remarkable fact in connection with the debut of the new contralto is that she owes her voice to a surgical operation.

In her early days, Miss Stuart, who comes of a Wolverhampton family, displayed musical talent, and appeared as a child pianist of considerable skill. Her voice was nothing extraordinary, and it was her intention to devote her life to the piano. Three years ago the event happened which has led her to follow in the steps of the great singers.

Miss Stuart suffered from an affection of the throat, for which she had to undergo an operation. The surgeon who operated told her that when the throat healed she would probably find that she possessed a singing voice of considerable volume, but warned her against attempting to sing too soon.

Miss Stuart took heed of the warning, but one day while she was playing the piano, she felt impelled to sing, and her friends were astonished at the quality and power of her voice.

It was found that the surgeon's view had proved correct, and Miss Stuart soon afterward began the study of singing under Mr. Breeden, at the Birmingham School of Music, of which Sir Edward Elgar is president.

THROWS AWAY $1,000.

Capitalist Drops Gold to Save Himself From Drowning.

San Bernardino, Cal., March 1.—George H. Dunham, a mining capitalist of St. Louis was forced to throw away $1,000 in gold to save himself from drowning. He had gone to examine mining claims in the desert and carried gold with which to make the first payment on the mine. While crossing the Majave river his wagon was overturned and Dunham was thrown into the stream. He found he could not keep afloat with the gold and sacrificed the treasure, reaching the shore exhausted.

CAR RUNS AWAY AND VISITS CANDY STORE.

Pittsburg, March 1.—Two persons were seriously injured, several slightly hurt, a two-story frame building and a street car demolished, causing a monetady loss of $7,000, lost night, when an empty street car on the Wylie and Bedford avenues branch of the Pittsburg Railway company got beyond the control of the motorman on a steep grade at Webster avenue and Thirty-Third street, and after running wild for two squares, left the rails, crashing into Reinecker's confectionary store in the Herron Hill district of this city.

The store was filled with patrons when the car struck the building. All of the injured except the motorman of the car were in the store. A defective brake is given as the cause of the accident.

AGED COUPLE DIVORCED.

"On Account of Youth and Inexperience," Said the Judge.

Richmond, Ind., March 1.—"On account of the youth and inexperience of the parties to this divorce case I will grant the plaintiff's petition for divorce," remarked Judge Henry C. Fox, in the circuit court, after hearing the evidence in the case of David Brumley, aged 80 years, against Martha E. Brumley, aged 65. The testimony showed that each had been twice married, that each had several children, and that the children had caused the trouble.

BODY HANGS ON A PILE FOR A MONTH.

Cahokia, Ill., March 1.—On account of the failure of the Illinois law to provide for a fee for the finding of a body, the unidentified body of a boy apparently 16 years old, evidently drowned, has been allowed to hang on a government piling in the Mississippi river, where it became lodged a month ago. The authorities learned of the body yesterday, and it was removed to the morgue in East St. Louis.

"FROST" HITS FUNSTON.

Evanston Man Admits He Himself Swam Marilao River.

Chicago, March 1.—Was it Col. Albert S. Frost, candidate for the mayoralty of Evanston, and the First South Dakota volunteers, or Gen. Frederick Funston and the Twentieth Kansas that swam the Marilao river in the face of a hot fire and captured the Filipino redoubts?

History says that it was Funston who performed the deed of valor.

When it became known in South Dakota that the colonel had been placed in nomination for mayor of Evanston they wrote back letters indorsing him and at the same time laying claim for him to the honors that Funston has been enjoying unchallenged so long.

Col. Frost yesterday admitted that it was his regiment and himself that swam the Marilao and stormed the Filipino intrenchments, and he says that Funston and his regiment did not cross the stream until the next day, after the fight was all over. The difficulty of getting correct news at the front caused a wrong report to be sent out, explains Col. Frost.

MINISTER AND FAMILY BLOWN UP BY DYNAMITE.

Carmi, Ill., March 1.—By an explosion of dynamite yesterday, Rev. J. D. Tittle, his father, his wife and baby were killed, and two children of the family were fatally injured. Mr. Tittle, who was a Baptist minister, had the dynamite in his home expecting to use the explosive in blowing out stumps. How the dynamite happened to explode is not known. All who could tell anything about it were killed. The residence was totally destroyed.

KISS COST HIM $47.75.

Osculation in Baltimore Barroom Proves Expensive Luxury.

Baltimore, Md., March 1.—One little kiss cost George Wilkinson $47.75, according to a decision in the criminal court. Pansy Schmidt, a comely woman, told the court she was 'tending bar at her husband's saloon on Mulliken street. It was time to close for the night. While reaching with both hands above her head to turn out the lights, she said Wilkinson embraced her and stole a kiss.

"Go 'way, you horrid thing," she said, and Wilkinson went. Then she swore out a warrant for his arrest, and Wilkinson admitted he had kissed Mrs. Schmidt, and asserted that he had kissed her a number of times before.

"I kissed her right on the mouth," he said, with emphasis, as though recalling a pleasant memory.

To remove a cough you must get at the cold which causes the cough. There is nothing so good for this as Kennedy's Laxative Cough Syrup. The liquid cold relief that is most quickly effective. Sold by all druggists.

CITY BRIEFS

Women Hold Sale.

A sale of home cooking will be held tomorrow at the F. S. Keily Furniture company's store on West Superior street, by the members of the guilds of Holy Apostles' and St. Luke's Episcopal churches. The sale will begin at 10 o'clock.

To Talk on India.

Rev. J. C. Faries, pastor of the Glen Avon Presbyterian church, will give a lecture this evening on "India." The address will be given at the Glen Avon church and will be illustrated with stereopticon views. No admission will be charged.

Minneapolis Flour.

Minneapolis, March 1.—Millers are holding flour firm at quotations, but buyers are looking for lower prices, and as a result the amount of business consummated has been very light. The railroad service is not improving in a way to help the millers. Cars are more numerous on the Northern roads, but this does not increase the service to the millers, as these cars are not available. Shipments, 41,000 barrels. First patents, $4.20@4.30; second patents, $4.00@4.15; first clears, $3.50@3.35; second clears, $2.40@2.60.

Will Speak at Sioux City.

Rev. M. S. Rice is at Sioux City, Iowa, where he will deliver an address this evening at the annual meeting of a men's organization of that city. Mr. Rice will return tomorrow evening.

Visiting in Duluth.

Hon. O. G. Kinney and wife of Colfax, Wis., have been the guests of Mr. and Mrs. A. E. Halverson of 2721 West Second street for a few days. Mr. Kinney was formerly a member of the Wisconsin state legislature and at the last election was the opponent of Congressman Jenkins. Mr. Kinney has disposed of his mercantile interests in Colfax and has entered the wholesale business at Superior, Wis.

Mrs. Eagle Dies.

Mrs. Della Eagle, 36 years of age, died yesterday afternoon at St. Mary's hospital. She was the daughter of Mr. and Mrs. Burke of 27 East Third street. The funeral will be held from the cathedral tomorrow morning at 9 o'clock and interment will be at Calvary.

Company Asks New Trial.

The Interstate Iron company, against whom Niko Wiita was recently awarded a verdict of $15,000 damages for the loss of his eyesight in an alleged premature explosion in the Lincoln mine, has filed a notice of a motion for judgment notwithstanding the verdict, or for a new trial. The motion will be based on a claim that the verdict is not justified by the evidence and for alleged errors in law. The notice was filed by Theodore Hollister, attorney for the Iron company.

Former Resident Here.

M. J. Bryan, formerly general agent in Duluth for the Wisconsin Central railroad, was a visitor in the city yesterday. Mr. Bryan is now located in Chicago and is in Duluth for the first time in three years. He was at one time prominently connected with the Northern league ball team in Duluth and has many friends here.

Sergeant Boyce Re-Enlists.

Sergeant Boyce yesterday re-enlisted in the United States army after having been in the service for the past fifteen years. This is his sixth enlistment. The sergeant served through the Cuban campaign and distinguished himself for bravery. He was present at the surrender of Santiago.

Leaves For the West.

Charles F. Butts left today for Minneapolis, where he will spend a week visiting relatives before going to Seattle Wash., where he has taken a position with a large insurance and rental company. For the past year and a half Mr. Butts has been in charge of the insurance and rental end for William C. Sargent & Co. B. N. Hanson, stenographer for the Duluth Universal Milling company in the Board of Trade, has also taken a position at Seattle and accompanies Mr. Butts.

Many Citizenship Applicants.

The new naturalization law which went into effect last fall has not caused much of a decrease in the number of aliens who have taken out naturalization papers according to the report of Deputy Clerk of Federal Courts Pressnell. Nine declarations of intention were issued during February by the circuit court, six petitions for papers were issued, and three certificates of naturalization were issued. The district court received the same number of declarations and petitions, nine of the former and six of the latter, but issued only one certificate.

Bryan Seat Sale Is Heavy.

The sale of seats for the lecture by William Jennings Bryan at the First Methodist church next Tuesday evening, has been heavy, and as practically every season ticket holder is expected to be present, the big auditorium will doubtless be crowded to the doors.

Skating Party Postponed.

The roller skating party which was announced to be given at the Lincoln rink this evening by the union of young people's societies of Duluth will not be given until March 8. The affair will take place at Lincoln rink.

Admiralty Case Heard.

In the admiralty case of Anton Lien against the steamer C. W. Watson, and the Gilchrist Transportation company, a hearing was given this morning before Judge Page Morris in federal court. John Jenswold is representing the libellant and J. H. Norton, E. P. Towne and L. C. Harris the steamship company.

Wants Case Transferred.

A motion has been made by John Jenswold, Jr., attorney for Olaf J. Frykland against the Cloquet Lumber company and F. E. Fletcher, that the case be remanded to the Carlton county district court. It was recently transferred to the United State court upon motion of the attorney for the lumber company and Mr. Jenswold now asks that it be remanded to the district court upon the plea that Mr. Fletcher, one of the defendants is not a non-resident of the state.

Will Return to Duluth.

J. W. Wing, formerly a clerk at the Duluth land office, who was transferred two years ago to the office at Minot, N. D., has been ordered to report at the local land office again. Mr. Wing will take the place of Miss Webster, the former stenographer, besides doing other clerical duties.

Raney Sent to Asylum.

William Ramey has been committed to the state asylum at Fergus Falls as a result of an examination held yesterday to determine his sanity. Ramey imagines that he has enormous wealth at his command and talks of railroads that he intends to build or wealth that he believes he can manufacture out of earth. He claims to have divine inspiration concerning places where he is to go to find all sorts of precious metals or stones. Ramey was born in Kentucky. He has been working in the woods for various logging concerns. He has a brother residing in Mt. Clemens, Mich.

Court Fixes Doyle's Bail.

Late yesterday afternoon Judge Ensign set James C. Doyle's bail at $3,000, which amount Doyle is now attempting to raise among his friends to secure his release from jail pending an appeal that he expects to make to the supreme court. The court, yesterday morning, denied Doyle's motion for a new trial. He was convicted of bigamy and was sentenced to the state penitentiary for a term of three years and three months.

OPERATIONS TO BE LARGE

Paving Work for 1907 Promises to Break All Records.

Board of Public Works is Swamped With Petitions.

The board of public works is swamped with work. At nearly every meeting of the city council another paving proposition is submitted and put up to the board or the engineering department to handle.

Paving propositions without number have either been ordered or are being petitioned for by the board at the direction of the council or by property owners anxious for the improvement.

Twenty-fourth avenue east is already in the hands of Contractor McDonnell and work has been in progress there for more than a month. Sixteenth avenue east was ordered paved at the last meeting of the council, and the paving of Twenty-ninth avenue west may be ordered next Monday. Jefferson street has been ordered paved and work will be commenced there as soon as practicable.

The council has called for estimates on the paving of East Second street from Seventh to Thirteenth avenues east, for the paving of East Fourth street from Fifth avenue west to Fourteenth avenue east, and for the much need improvement of Lake avenue from Superior street to Fourth street. Fourth avenue west from the railroad right of way to Second street, is also under consideration and may be paved before next winter.

The property owners on Ramsey street and Oneota street in West Duluth, from Forty-sixth avenue west to Central avenue are busy on a petition for the paving of this district. The paving of Twentieth avenue east from Superior to Fourth streets has also been considered and Garfield avenue from Pine street to the viaduct is another, though more remote, possibility.

Two blocks on East Third street from Nineteenth to Twenty-second avenues east is in need of paving and this job may be let before next winter, and the resurfacing of the western portion of London road is also one of the propositions which have been given consideration.

Three jobs have been carried over from 1906. Contractor Hugh Steele has just begun work on Commerce street, a $10,000 job, and the Robinson street macadam paving is yet to be completed by the same contractor. The Barber Asphalt company will lay an asphalt paving on Greysolon road this summer as the grading of this avenue was all that could be done last year.

The grand total is somewhat imposing and there have been a good many doubts expressed as to whether half of the tremendous pile of work could be completed before snow flies again.

Found.

Certificate for copper shares. Owner may have the same by calling and identifying at the store where they have everything in the line of music, talking machines, phonographs and records. Zenith Music Co., 6 East Superior street. Fred G. Bradbury, proprietor.

PROPOSES NEW SYSTEM

Register of Deeds Palmer Drafts Bill of Interest.

Will Record All the Instruments Offered for Filing.

Because no provision is made under the existing state laws for the transcribing in the records of certain valuable papers and documents filed with the register of deeds, and because of the danger of loss and mutilation of the same through handling, and the great inconvenience encountered in keeping the files in order for ready reference, M. C. Palmer, register of deeds of St. Louis county has drafted and forwarded to the legislature a bill that is of interest to attorneys and all others who have business with his office.

By provisions of the proposed bill the register of deeds in each and every county of the state of Minnesota is authorized and directed to transcribe in appropriate records to be provided by the county for such purpose, and to appropriately index all instruments affecting lists of lands selected by railroad companies under grants from the United States, or the state of Minnesota; all instruments affecting condemnation proceedings; awards of damages in condemnation proceedings; building line easements; easements of slopes; easements for electric light and telephone poles; now on file in the registers' office and which have not heretofore been recorded.

It is further provided that the transcribing of such instruments shall have the effect of a record of the same from the time when such instruments were filed with the register, and such records shall be prima facie evidence of the facts therein set forth, and of the contents of the original instruments so recorded. The expense of transcribing shall be paid on allowance by the county commissioners.

Under the proposed act it shall be the duty of the register of deeds in each county of the state to record at length in suitable books provided by the county all the instruments hereafter received by him, either for filing for recording, except such as may be received under the provision of section 4711, revised laws of 1905, and he shall receive the same fees therefor as are allowed for the recording of other like instruments.

Mr. Palmer's bill has received the endorsement not only of the local attorneys but of the district court judges.

Owing to the fact that there are an immense number of original papers of the nature mentioned, received by the register of deeds for filing, and not for recording, there has accumulated in this and other counties thousands of files that have required a great deal of space and which have of necessity been stacked away in boxes and other receptacles to keep them from becoming scataered and lost.

Time and again occasions have arisen when it was necessary for attorneys and others to refer to the papers on file and the search through the great mass of documents on file has been attended with a great deal of inconvenience.

From handling, the papers may easily become mutiliated, misplaced, or lost and in such case there is absolutely no remedy as the register has no record.

Mr. Palmer proposes to have every instrument presented for filing, or for recording, transcribed in suitable books, and then the original documents are filed away and subsequent reference can be quickly and conveniently made to the records.

The difficulties heretofore encountered by those who have attempted to find files that were left with the register years ago, has fully demonstrated the necessity of some such plan as Mr. Palmer proposes and the local attorneys claim that the bill he has drafted will make ample provision for a needed improvement in the office of the register of deeds.

JURIST TO RESIGN.

Judge Williston of Red Wing Will Retire From the Bench.

St. Paul, March 1.—(Special to The Herald.)—It was reported at the capitol today that Judge W. C. Williston of Red Wing, one of the oldest jurists in the state has resigned.

Judge Williston threatened to resign last fall. He is 73 years old, and has not been in good health for some years. It is said that the judge, who is in Florida, has forwarded his resignation, although it has not yet reached the hands of the governor.

Judge Williston has been judge of the First district at Red Wing, continuously since 1891, and had been on the bench of the same district previous to that time. His term does not expire until 1911.

Housewives who take pride in their cooking want baking powder that is sure and safe—that is Hunt's Perfect Baking Powder—made in Minneapolis.

CLAIMS CONSUMPTION HAS ITS ORIGIN IN THE CRADLE

According to the views of Professor Von Behring, as expressed by him in a paper read before the Society for the Care of Sick in the Colonies at Stuttgart, Germany, recently, the tubercular bacilli find their way into the human system through milk. This theory is at direct variance with the doctrine of Dr. Robert Koch, who says that tuberculosus milk is not dangerous, but that consumption in most cases is contracted through the inhaling of germs. The theory of Dr. Koch appears to be the one most generally accepted by the medical profession, and by all those who have made a careful study of the problem of tuberculosis.

The splendid results that have been accomplished through the organized effort to check the spread of tuberculosis, through treatment and precautions advocated under the Koch theory, seem to bear out the latter. The part of wisdom is to overlook no precaution that would tend to prevent infection with the dread white scourge.

Coughs and colds should never be neglected. These leave the lungs sore and in a condition peculiarly receptive to the tubercular germ, which fastens on the sore places and sets up what is called "mixed infection," the starting point of consumption.

To break up a cold quickly the following formula prescribed by a well-known authority on lung troubles is most efficacious. Mix a half pint of good Whiskey with two ounces of Glycerine and a half ounce of Virgin Oil of Pine (Pure). Shake well and use in teaspoonful doses every four hours. It is claimed this mixture will break up a cold in twenty-four hours and cure any cough that is curable. The ingredients are inexpensive and can be purchased at any good drug store.

Virgin Oil of Pine (Pure) is put up, for dispensing only, in half-ounce vials. Each vial is securely sealed in a round wooden case with an engraved wrapper showing the name—Virgin Oil of Pine (Pure), guaranteed under Food and Drugs Act of June 30th, 1906, Serial number 451, prepared only by Leach Chemical Co., Cincinnati, Ohio—plainly printed thereon. The oils sold in bulk and the many rank imitations of Virgin Oil of Pine (Pure) put out under similar name and style of package are not only ineffective for the purpose, but are often dangerous. It is always well to remember that the object of an imitator is to deceive. There is no known substitute for Virgin Oil of Pine (Pure).

STEEL PLANT FOR DULUTH.

A huge steel plant for Duluth with its thousands of skilled workmen and with the vast attendant industries of all kinds that are certain to be in its train!

Millions of dollars for the city each year and tens of thousands of more citizens, all of the class that make for permanent progress!

The hopes of twenty years on the verge of realization and the dreams of the late George C. Stone and of thousands of others who have always seen in Duluth the "Pittsburg of the West" about to become actualities!

Such is the grandly glowing prospect held out to the people of this city, thanks to Thomas F. Cole, president of the Oliver Iron Mining company, Frank B. Kellogg, Joseph B. Cotton and W. J. Olcott. And it means to Duluth more than anything else that could possibly be conceived of, for it means not only a plant to cost millions of dollars and thousands of skilled mechanics with their families and their homes, but it means also great works of all kinds that will take the steel output and turn it into all kinds of high grade products to supply the varied needs of the great and growing Northwest.

But much hard work is yet to be done before Mr. Cole's glowing, almost bewildering promise shall become an actual reality. All of the people of this city interested in its upbuilding and future greatness must get busy at once and gather together such arguments, such an array of convincing facts, as will cause Messrs. Gary, Corey, Perkins and Frick, in whose mighty hands lies the settlement, to know that Duluth is the place and now is the time for the erection and equipment of a steel plant here. And these facts must be presented in irrefutable form to the experts whom the four magnates shall send here to investigate.

The Commercial club, the embodiment of the business life of the city, must prepare at once an array of facts and figures of every necessary kind to present to these shrewd experts. They must not be guesswork but must be capable of the completest substantiation. They must set forth succinctly but accurately all procurable facts about the territory that is now and may be made tributary to such a plant as the United States Steel corporation projects. They must have railway rates to all points ready for study and comparison. They must be able to show what a field lies open before a steel plant and its attendant industries.

The wholesale merchants and the manufacturers already here, who are more closely in touch with Northwestern trade and conditions than any other business men, must be ready to supplement and strengthen the Commercial club's facts and show wherein a steel plant may be made "reasonably profitable" as the United States Steel corporation exacts.

The United States Steel corporation, the greatest industrial concern in the world, has made an enviable record for itself in business, in finance and in national affairs ever since its organization. It has built up every place with which it has been connected. Once convinced that a field lies open to it, its officers and directors have never counted the cost to occupy that field and occupy it thoroughly and yet ever in the most honorable way.

The advent of such an industry to Duluth means more than can be thought of in a day, a week or even a month. It means the coming of a Greater Duluth almost in a day instead of by long years of slow growth. It means a vast increase in business in all lines. In a word, it means prosperity of the most brilliant kind.

To the already great interests centered in Duluth of the United States Steel corporation, in which Thomas F. Cole has a leading part, will be added a large executive and clerical force needed to handle the new business and these will become citizens of Duluth and will in turn supplement the work of the officials long resident here who have had charge of the mining and shipping industries of the gigantic corporation.

The Commercial club and the business men generally have it in their hands to make such a showing for Duluth as shall convince the experts and, through them, the finance committee of the United States Steel corporation. With such a prospect, they should be at work early and late. And all of the people of the city, and of the iron ranges also, should give them the heartiest support. In this way Duluth can secure a vast steel plant and make of itself the Pittsburg of the West and the greatest manufacturing center in the entire Northwest.

PROPHETS OF CATASTROPHE.

The prophets of catastrophe have been so unduly busy in the last ten months that their nerves must certainly be in a deplorable condition. Beginning just after the San Francisco disaster—some of them claim to have begun before that calamity, but they have failed to present irrefutable proof of the justice of their claims—they have tried to keep the people in a state of constant trepidation with their dire predictions. So frenzied have they become recently that it would seem as if prolonged retirements to sanatoriums would do them good.

First, one of these birds of ill-omen prophesied the destruction of Naples, but Mount Vesuvius refused to carry out his wishes. Then another harbinger of disaster tried to affright Boston or New York or some other coast city, but again the prophecy miscarried. Next Professor Hugh Clements of London—whence his title came is not clear—predicted the overwhelming of Chicago by earthquake and tidal wave and he may have caused some few timid people to lose sleep, but for the third time, nature refused to respond to the incantation.

Now comes Professor Matteucci, director of the Vesuvius observatory, with the most alarming prophecy of them all. He gravely declares that, in less than a month, a fearful comet will rush headlong into the atmosphere of Old Earth and mankind will vanish like dry grass in a prairie fire while the world itself will be converted in a twinkling into a white-hot coal.

But what good do these predictions of evil do any how? Will giving heed to them supply the needed food until the times of their fulfillment shall have passed? Will we not have to keep on with our daily "chores" meantime, as well as after the ill-omens fail to "pan out?" How much more pleasing would it be if one of these prophets would predict an early spring, a fine crop year or, above all, the ability of the railroads to handle all traffic promptly and cheaply? Just let one of them try the last named forecast and he will see how quickly the people will rise up and honor him in his own country.

AMERICA'S RICHEST MEN.

Under the revised estimate of the wealth of John D. Rockefeller that gives him a total of $300,000,000, the Standard Oil magnate is placed only on an equality with Andrew Carnegie, while Senator William A. Clark of Montana, who is said never to know within $25,000,000 of just how much he is worth and whose aggregate must have been vastly enlarged recently as the result of the advances in copper, may be even richer than either of the other two.

The total accumulated property of the United States is figured conservatively at $107,000,000,000. If the wealth of the oil, iron and copper Croesuses be as estimated, their combined riches represent less than one per cent of the nation's aggregate. This has caused as conservative a paper as the New York Times to rejoice in the statement: "The wealth of the country is evidently not in few but many hands; immense as they are the big fortunes are petty fractions of the vast whole."

That is true and yet it does not detract one iota from the truth of the oft-repeated assertion that the wealth of America is unduly centralized in the hands of a few. The three richest men of the nation, even if they own less than one per cent of the aggregate possessions, are only one-two-hundred-and-sixty-six-thousandth part of one per cent of the total population. Viewed from this standpoint, their holdings become proportionately enormous. It would be grotesque even in a country governed by an oligarchy; it becomes a gross injustice, a glaring evil, in this country for it belies all pretensions to equality of opportunity and justice.

So long as so minute a portion of the total population as Rockefeller, Carnegie and Clark—each one-eight-hundred-thousandth part of one per cent—shall have possession of bewildering millions to use as he may please, he is a constant danger to the life of the republic. The sooner the conditions that permit the acquirement and building of such vast "swollen fortunes" shall be done away with forever, the better it will be for the future of the United States.

TRAGEDY OF TWO BROTHERS.

Intensely tragic as any conception of melodramatic novelist or playwright is the story of Frank Withey, a wealthy business man of Hadley, Mich., and, unlike the usual happy ending of novel or play, this real-life drama closes in the gloom of saddest disappointment.

Over two score years ago, Frank and James Withey, youthful brothers, were separated by an unkind fate. Frank prospered from the time he was thrown out into the world, but prosperity never made him forget his brother. Twenty-eight years ago, he initiated a search for that brother. He traced him from place to place, often losing the trail, but never abandoning the quest. Several times, he seemed about to secure the eagerly desired positive clue, but each time it proved elusive almost at the last moment and he was never able to find the brother.

About three years ago, the last clue ran up against a dead wall but Frank Withey retraced it slowly and laboriously and finally it led him to Port Huron, Mich. There, he learned, to his intense disappointment and grief, that he had at last found the abiding place of his long lost brother but that brother had died in poverty, alone and friendless, three years ago.

Fate plays often cruel tricks but more often it is kindly, especially in cases of long separated close relatives. If a novel writer or a melodramatic playwright had had the ordering of the climax, such an one would have reunited the brothers for a serene old age at the home of the more fortunate one. Providence, however, decreed otherwise and now all that the sorely disappointed brother can do is pay such respects as he may to the grave of the one found only to be lost forever.

THE PASSING SHOW.

As an "artful dodger" of unpleasant questions, E. H. Harriman is entitled to at least the past master's degree.

* * *

Congressman McCleary, Minnesota's "stand pat" victim, has fallen out of the house and into the second assistant postmaster generalship.

* * *

Duluth is making preparations already to surpass its past record of last year. By starting early and keeping at it, it can do so and also give New York a "run for its money."

* * *

Carlton county is a section after President Roosevelt's heart. It had 480 visits by the stork and only 117 by the grim reaper last year. Cloquet led with 211 new arrivals and 75 departures forever.

* * *

Senator Hopkins of Illinois seems to have taken a second thought as to his threatened filibuster against the rivers and harbors bill. At any rate, it is now out of danger and the assuredly meritorious projects will not suffer.

* * *

Duluth's wholesalers may be overworked as the result of the breaking of the blockades on the railroads, but it is the kind of overwork that rejoices the heart and the pocketbook alike and makes for Duluth's commercial greatness.

* * *

Norman county had 389 additions to its infant population last year while those who departed this life numbered only 117. Ada led with 57 new babies and only one death. That is the right kind of a record to make and to keep.

* * *

President Roosevelt "has his mad up" as a result of Panama canal resignations and he is determined to have the work go on, even if he has to take charge himself as commander-in-chief of the army to whom the army engineers who will be put in control will look.

* * *

Rich Wisconsin men are said to be willing to donate enough money to give the state capitol a finer park than any other commonwealth possesses. So far St. Paul men have not given any signs of opening their purses for the benefit of the Minnesota state house approaches.

* * *

Once more has "Our Teddy," who is often depicted as a slashing terror with a "big stick" and a "chip on his shoulder," become a practical peacemaker. He has sent a "well-heeled" warship to Nicaragua and Honduras to tell them to quit their comic opera scrapping. And they will obey.

HOTEL GOSSIP.

"Seven times around the world, fourteen times across the Pacific, nineteen times across the Atlantic, first time in Duluth, but I hope my next visit to Duluth will be with the G. A. M. B. A. Y. C." So registered John R. Rogers of New York, advance man for McIntyre & Heath in "The Ham Tree," in the register of visitors which W. S. Chadwick, ticket agent at the union depot, is keeping. Mr. Rogers also registered at the Spalding, but in not so unusual a manner.

It is claimed that the theatrical man stated facts in thus briefly detailing his travels. He has been in the show business for more than forty years, and is known from the Atlantic to the Pacific, and in a good many foreign countries. He has a long string of "firsts" to his credit. He told about them last night as follows:

"I was the first manager to take J. K. Emmett around the world, first to take Hawley and Bulsley around the world, first around the world with Baker and Farren, first around the world as manager of Imogene, first around with Minnie Palmer and first around with Wilson Barrett.

"I was the first man who succeeded in making any money starring Mary Anderson, later known as 'Our Mary.' I was the first to bring the Royal Italian Opera company to America. I originated the present advertising agency, starting out with a story and ending up with an advertisement, and also claim to have been the first to use pictured lithographs for show work. I also originated the large show posters for walls.

"In all my travels this is my first visit to Duluth. I am sorry I did not drop into your town before, and shall certainly make every effort to get here again. I did not know what I was missing. You have the best bunch of good fellows here that I have run across in many a day, and I don't know when I enjoyed an evening more than I did the one tonight."

Mr. Rogers' actions bore out his words, for he waited until ten minutes of train time before starting for the Spalding to pack up his grip.

* * *

At the McKay: Mrs. P. Montague, A. R. Worth, J. E. Allen, St. Paul; J. Raymond, J. Nixon, Deerwood, Minn.; G. E. Spofford, Long Prairie, Minn.; H. E. Tolman, St. Cloud, Minn.; C. O. Gilram, Davenport; J. C. Ryan, Minneapolis; D. K. Gibbs, Brainerd, Minn.; J. D. Conan, Ely; Miss Burha, Cloquet, Minn.; M. L. Starkweather, Greenville, Mich.; Mr. and Mrs. E. Hull, Buffalo; B. F. Fowler, Two Harbors; J. E. Allen, St. Paul.

* * *

At the Lenox: J. T. Shea, Grand Forks; T. S. Byron, Detroit, Mich.; C. W. Martin, E. T. Collom, Minneapolis; R. Wade, Chicago; C. E. Buckbee, St. Paul; Josephine Dolar, Rosholt, Wis.; W. X. Bergquist, F. M. Nast, Minneapolis; J. M. Martin, W. S. Gilpin, Virginia; M. Cronin, Sparta, Minn.; C. McLaughlin, Ely; F. J. Hahn, St. Paul; Mr. and Mrs. W. McDonald, Lake Linden, Mich.; C. A. Wright, Detroit, Mich.; G. A. Burns, Eveleth; J. T. Bryant, Clinton, Iowa; N. J. Osborne, Webb City, Iowa; W. H. Bendix, Michigan City, Ind.; W. S. Summers, Eau Claire, Wis.; F. G. Cummer, Minneapolis; C. T. Burr, Minneapolis.

* * *

At the Spalding: G. E. Belott, Louisville, Ky.; C. T. Daubach, Minneapolis; B. N. Dudgion, Seattle, Wash.; A. H. Barnard, Minneapolis; E. M. Boyd, Saginaw; C. V. Salus, St. Paul; A. Munch, St. Paul; Mr. and Mrs. M. K. Knauff, Two Harbors; W. J. Rashleigh, Aurora, Minn.; W. J. Richards, Crystall Falls; M. A. Beckman, St. Paul; W. J. Grady, Decatur, Ill.; E. Hikok, St. Louis; H. L. Burns, Sparta, Minn.; C. H. Parsons, Des Moines; R. McRae, Seattle; W. C. Everett, Sault Ste. Marie; L. Combs, Valley City, N. D.

* * *

At the St. Louis: C. Wilson, Bemidji; C. G. London, Minneapolis; J. C. Haas, St. Paul; W. F. Mackey, Stillwater; M. W. McCarthy, Stillwater; F. McKeoun, A. Sherping, Grand Rapids; H. Hanscome, A. Thompson, Minneapolis; A. S. Brig, Aberdeen, S. D.; A. Bergstrom, Hibbing; J. Dockett, C. Kimball, Spokane, Wash.; E. E. Burdette, Seattle; C. A. Peterson, Akeley, Minn.; W. F. Oakley, Milwaukee; J. McDonald, Aurora, Minn.; A. G. Showns, St. Louis; C. Jensmore, Eveleth; Mr. and Mrs. J. C. Towne, Chisholm, Minn.; Mr. and Mrs. W. Schulze, Virginia; C. F. Coffin, Eau Claire; L. A. Johnson, Tower; T. York, Hibbing; M. Atkinson, Hibbing; C. F. Caldwell, Kalso, B. C.; C. A. Simenson, Grand Forks.

A Fellow Feeling.

St. Peter at the Pearly Gates
Held up a warning hand
Before a new arrival there,
And bade the stranger stand.

The new arrival wanted in,
Of course, and told a tale
Of human virtues that would make
The very devil pale.

St. Peter hemmed and hawed a while;
He'd heard that kind before;
"I never told my wife a lie,"
The man said at the door.

And Peter flung it open wide.
Such self-restraint as this
In earthly life was surely worth
Eternity of bliss.

The man flew through the open way,
Regardless of expense,
And added, when he got inside:
"Except in self-defense."

St. Peter frowned; then smiled and said:
"You worked me that time—but
I used to be a man myself,"
And slammed the portals shut.
—W. J. LAMPTON in New York Times.

Reflections of a Bachelor.

Chicago News: Any man can stand abuse if it's because he is rich.

A nice thing about gambling is your wife won't be mad with you if you win.

A man thinks he deserves a lot of credit for having some relative who becomes famous.

When a man says people have entertained him delightfully he means they let him do all the talking.

It takes a good deal of beauty for a girl not to need to be told she has it if you want to be popular with her.

Reason for Odd Prices.

New Orleans Times-Democrat: "There's a reason for everything," said the dry goods merchant. "There's even a reason for odd prices—$1.12, $4.99, $3.24, etc.

"The reason for these prices is that they keep the patron waiting for change, and while he waits he looks around, seeing, two to one, something else that he wants to buy.

"Odd prices, causing the customer to examine the stock, are responsible for some 15 or 20 per cent of each day's sales."

The Grippe.

An ache in the back and a pain in the head—
That's the grippe!
A choke in the throat, and a yearning for bed—
That's the grippe!
A river of heat, then a shiver of cold,
A feeling of being three hundred years old,
A willingness even to do as you're told—
That's the grippe!

An arrow of pain, now in this place, now in that—
That's the grippe!
A feeling of doubt as to where you are at—
That's the grippe!
A stupid sensation—of course, wholly new!—
A foolish depression—why should you feel blue?—
A doubt as to whether this is really you—
That's the grippe!

Strange visions at night, that deprive you of rest—
That's the grippe!
A taste in your mouth and a weight on your chest—
That's the grippe!
A tired sensation that runs through your veins—
A queer combination of aches and of pains,
A vapid admission of absence of brains—
That's the grippe!
—Somerville Journal.

Is Marriage a Failure?

St. Cloud Times: One million four hundred thousand divorces in twenty years in this country. Is marriage a failure?

THE WEATHER.

March came in like a perfect lamb, with soft-falling snow for fleece and with not a sign of a bluster and blow, while the breath of the new month was as pleasantly balmy as any one could desire. The renewed snow storm that began about midnight lasted all through the morning, but the absence of wind did not add to the drifts of the day before. The total snowfall since Wednesday has been nearly nine inches, and it has put the street railway company to much trouble. The cold wave predicted for today did not materialize during the morning, the temperature being almost like that of midspring. Last night's lowest temperature was 18 degs., while yesterday's highest was 20 degs., both above the line. The weather man has changed his mind as to a severe cold wave, and now puts zero as the probable minimum tonight, while tomorrow he says will be cloudy.

The sun set this afternoon at 5:53 o'clock and will rise at 6:46 o'clock tomorrow morning. Today had five minutes over eleven hours of the sun, or would have had if it had not been for the clouds.

A year ago today was cool, cloudy and threatening, with slight snow, but the month was neither lion-like nor lamb-like.

Says Mr. Richardson of conditions: "The Eastern Texas storm has advanced its center to the Upper Mississippi valley, causing further snow or rain in the western lake region, Mississippi and Missouri valleys and Southern states, and higher temperatures throughout most Northern districts, but zero weather continues in the Dakotas, Manitoba and Saskatchewan. Some rain also fell during the past twenty-four hours in the Pacific states, due to the barometric disturbance developing over Western Canada. It is much colder this morning from Nebraska southward to Texas, attending the rise in pressure there. The easterly movement of the Mississippi valley disturbance will cause colder weather and further snow in this section this afternoon and perhaps tonight. Clearing skies may be expected Saturday."

Following were last night's lowest temperatures, as recorded by the weather bureau:

Abilene	32	Medicine Hat	4
Asheville	40	Memphis	56
Atlanta	42	Miles City	2
Battleford	—16	Milwaukee	32
Bismarck	— 18	Minnedosa	—4
Bodeau	14	Modena	28
Buffalo	16	Montgomery	60
Cairo	54	Moorhead	6
Calgary	10	New Orleans	68
Charleston	52	New York	24
Chicago	32	Norfolk	38
Cincinnati	46	Northfield	—14
Concordia	10	North Platte	10
Davenport	40	Oklahoma	28
Denver	14	Omaha	14
Detroit	18	Phoenix	40
Devils Lake	0	Pierre	—4
Dodge	14	Pittsburg	34
Duluth	18	Port Arthur	10
Edmonton	—10	Portland, Or	40
El Paso	34	Prince Albert	—16
Escanaba	18	Qu Appelle	—6
Galveston	58	Rapid City	0
Grand Haven	24	St. Louis	48
Green Bay	24	St. Paul	24
Havre	—12	San Antonio	52
Helena	24	San Francisco	50
Houghton	18	Santa Fe	24
Huron	—4	Ste. Marie	16
Jacksonville	62	Shreveport	56
Kamloops	0	Sioux City	8
Kansas City	24	Spokane	34
Knoxville	46	Swift Current	4
La Crosse	30	Washington	32
Lander	10	Wichita	12
Little Rock	58	Williston	—16
Los Angeles	46	Winnemucca	40
Madison	32	Winnipeg	0
Marquette	18	Yellowstone	20

Department of Agriculture, Weather Bureau, Duluth, March 1.—Local forecast for twenty-four hours ending at 7 p. m. Saturday: Duluth, Superior and vicinity, including the Mesaba and Vermilion iron ranges—Snow and colder tonight with lowest temperatures from zero to 10 degrees above. Saturday partly cloudy. Brisk northerly winds.

H. W. RICHARDSON,
Local Forecaster.

Chicago, March 1.—Forecasts until 7 p. m. Saturday: Wisconsin—Rain, turning to snow tonight, followed by fair Saturday. Colder. Cold wave in west portion.

Minnesota—Snow and colder tonight. Saturday fair.

North and South Dakota—Generally fair tonight and Saturday. Slowly rising temperature.

PASSING PLEASANTRIES.

Chicago Tribune: Nan—How's this for a picture hat?

Fan—It's good enough for the comic supplement.

Washington Herald: Dubley—He's a good Christian, anyway.

Wiseman—Huh! Not much, he isn't!

Dubley—Why, you've said so yourself.

Wiseman—Nothing of the sort; I said he was a church member.

Washington Star: "Did you ever try the stock market?" asked the Eastern man.

"No," answered Bronco Bob, "but it's my guess that a deal in stocks is pretty much like a deal in faro. You want to fight shy unless you know the dealer."

Philadelphia Press: "I don't know much about your congressman's official record, but I hear he's a finished parliamentarian."

"He is now, you bet! He was married to Miss Strongmind a few days ago."

Chicago Tribune: "Conductor," said the gasping passenger, vainly trying to raise a window, "there are at least a billion microbes in this car."

"You ought to be able to stand that if the company can," growled the street car conductor. "We don't get a blamed cent for carrying 'em."

Somerville Journal: Mrs. Watkyns—Which do you prefer, Mr. Wylkyns, blondes or brunettes?

Mr. Wylkyns—It depends on which I am with.

Cleveland Plain Dealer: "I wouldn't think it safe to put denatured alcohol into an automobile."

"Why not!"

"I'd be afraid the different parts would get tight."

Puck: Lawyer—Well, what was done in the interim?

Witness—I don't know, sir. I didn't go into the interim. I stayed in the anteroom.

Philadelphia Press: Knox—Why don't you cut that out? Tone your talk down a bit.

Kandor—What's wrong? It's all right to call a spade a spade, isn't it?

Knox—Well, instead of calling it you might whisper it occasionally.

Washington Post: "Binks is very exact about matters of etiquette and form, I am told."

"Rigidly so. Whenever he went on a spree while he was in mourning for his rich uncle, he insisted that he saw nothing but black snakes."

Baltimore American: Daughter (tentatively)—Father, William is coming today to see you about me, and please don't forget that it will cost his feelings a good deal to approach you on the subject.

Father (grimly)—Oh, let him come along with the cost to his feelings. I'll foot the Bill.

Washington Star: "You cannot fully explain sun spots or earthquakes, can you?"

"Fortunately, no," answered the professor. "If these things were fully and satisfactorily explained, there would be no further demand for magazine articles about them."

Philadelphia Press: "Rubber," suggestively remarked the young woman crossing the muddy street.

The man behind her paused. Then he picked up the rubber, assisted her to replace it, and went his way.

All is not slang that sounds it.

Washington Star: "What made you so sympathetic toward the prisoner?"

"Well," answered the juror, "after being locked up away from home and friends ourselves, we realized what it is to be in the clutches of the law and felt sorry for him."

TWENTY YEARS AGO.

Taken From the Columns of The Herald of This Date, 1887.

***The Duluth & Winnipeg bill has been practically killed in the state senate. The company has forfeited a valuable land grant by its failure to comply with the provisions under which it was given.

***The following real estate transfers have been recorded:

H. F. Thompson to C. Tower, Jr., lots 1, 2, 14, 16, block 18, Endion, $3,500.

Western Land association to O. N. Hoyt, fractional block 132, Third division, $300.

Jennie M. Wait to Fred Weise, lot 387, block 170, Second division, $475.

Guy Wells to Kate Buchanan, lots 118, 124, block 35; lots 129, 131, 139, block 36; lots 147, 148, 149, block 37, Third division, $8,000.

S. Leidel to James Sullivan, lots 95, 92, 96, 102, Minnesota avenue; lots 95, 99, St. Louis avenue, Upper Duluth, $3,000.

R. J. Wemyss to Job Latshaw, lot 122, block 45, Third division, $800.

Mary A. Safford to Samuel Croll, lots 1 and 2, block 134, Portland, $750.

***A. H. Spring has been confined to his house for the past few weeks by an attack of inflammatory rheumatism.

***"The Chimes of Normandy" will be produced at the opera house Friday and Saturday evenings by the St. Paul Amateur Opera company, including Mrs. W. J. Evans as Serpolette, Miss MacMurphy as Germaine and Miss Mayhew as Gertrude.

***C. S Blake, a former resident of the West end, but who for the past three years has been living in Minneapolis, has returned to Duluth and will permanently reside here.

***The death of Will Young, a former well known resident of Duluth, is announced from Toledo, his former home.

***The clearings of the associated banks of Duluth today were $289,729.70.

***DeCourcey, the detective for the St. Paul & Duluth company, has acquitted himself well in the handling of the wheat stealing case. He unearthed the whole plot and succeeded in causing the arrest of the whole gang.

***The police department is agitating the purchase of a patrol wagon, in order to remove the necessity of witnessing the disgraceful scenes that are now common to our streets.

* * *

***It is now said that Minneapolis and St. Paul will bury the hatchet and consolidate as one city. This action is to be taken on account of Duluth's rapid growth.

MINNESOTA OPINIONS.

Bemidji Sentinel: Judging from the number of legal actions Attorney General Edward Young is beginning in the courts, he apparently is neglecting no opportunity to keep himself in the limelight.

Hallock News: "Do we need more money?" asks a writer in Harper's Weekly. Not yet, but soon. Easter bonnets are not quite ripe.

Olberg Journal: An era of prosperity has struck Clearwater county farmers. The raising of a few paltry bushels of wheat has seen its days of usefulness here. The farmers have joined hands and fortune in the promoting of diversified farming to which our county is so admirably adapted.

Thief River Press: There is talk of an executive mansion for Minnesota's governor. Johnson House has been suggested as a name.

St. Hilaire Spectator: What has become of our county seat fight? There doesn't seem to be anything doing and we are getting lonesome.

Cass Lake Voice: A Minnesota legislator wants all paint cans to be labeled with a full description list of the ingredients, and it might be a good thing, so that careless persons can be warned against unusual and unwholesome mixed drinks.

Clay County Herald: California's most beautiful woman attributes her beauty to her habit of plowing for one hour every morning. Women who have no plow handy might secure the same results by pushing the lawn mower around this summer.

Eveleth Star: Our merchants are all preparing for a good active summer trade. It looks very much as though they would not be disappointed.

Walker Pilot: The Princeton Union can not refrain from remarking on the pronounced Irish wit of some of the Johnsons of the state. Quite an observer is Bro. Dunn. Irish wit among Johnsons is about as scarce as Scandinavians named O'Connor.

Crookston Times: Virginia, Minn., has named a new $50,000 school building the "John A. Johnson," in honor of the governor. Virginia must be preparing to ask for something particularly good.

Dark Days Ahead.

Mother's looking worried lately—
Father's getting rich;
All his risks are paying greatly,
Sister's looking rather stately,
But our woes will soon be doubled,
Mother's looking badly troubled—
Father's getting rich.

Shame and sorrow soon must follow—
Father's getting rich;
We'll have wealth in which to wallow;
Mother's cheeks are getting hollow;
Long we've diligently sought it;
Now they'll ask us how we got it—
Father's getting rich.
—Chicago Record-Herald.

Colorado's New Governor.

Boston Herald: Colorado's Methodist minister governor is a joy. His inauguration was a sort of a prayer and praise meeting, and he has now invited all the state officials and the legislators of all shades of politics to a good fellowship dinner at his expense. Meanwhile, he supplements his executive duties by preaching sermons telling how everything in the universe, and particularly in Colorado, is attuned to the happiness of mankind. What a contrast to her Bloody Bridles Governor of sorrowful memory!

"Puck" Outdone.

Boston Herald: The inventor had called on his patent attorney and told him to "do the best he could." He had left his blue prints and plans, and it was up to the attorney to guard his secret.

"I'll see," said the lawyer, when his client had gone, "what's in this."

He unfolded the plans. Across the top was this big headline:

"Device for laying cables around the world in twenty-four hours."

"One end of the cable is fastened to a post," the explanation said. "The rest of the coil is carried far up above the clouds—up above the earth's atmosphere, by an immense balloon. As the world revolves, the balloon stands still and the cables will unwind from the coil. In twenty-four hours the circuit will be made. The earth will be entwined."

Squaw at a Bank.

El Reno American: A full blood Indian squaw attired in the regulation costume of a well bred society woman in Indian life—brightly colored blanket and skirt with beaded leggings and moccasins, with the latest approved Cheyenne coiffure, which is the same they have been wearing the past hundred years—was recently seen to walk into the El Reno State bank and fill out a check in a full round hand, which she presented at the proper window and received her pin money, supposedly. The officials at the bank say it is a common occurrence, but to the average citizen it seemed a singular proceeding.

That's All.

If you would join
The social whirl,
Or win a most
Bewitching girl,
Or be ko-towed to
Every day,
And deferred to
In every way,
You need not have
A family tree,
Nor be a wise guy,
No, sirree!
All that you need
To cut a dash
Is plenty of
The cold hard cash.
—J. M. LEWIS in Houston Post.

The Limit of Confidence.

New York Medical Journal: Some amusement has been occasioned by newspaper reports of a sermon recently preached by a noted clergyman. He was appealing to the people to repose in their pastors the same degree of trust with which they followed the advice of their lawyers and their doctors. "If," he is reported to have said, 'you get a prescription from your doctor you take the medicine trustfully." Then he phrasalrased Tennyson's noble lines thus:

Yours not to reason why,
Yours but to do and die.

We are quite sure that the good man did not realize what an interpretation his words might bear.

ANENT THE LEGISLATURE.

Owatonna Journal-Chronicle: Upon the Republican members of the legislature rests the determination of whether Minnesota shall have both a Democratic governor and a Democratic legislature two years hence, or whether the Republican party, proving itself worthy the confidence of the people, shall have a fighting chance to regain its old standing in the state.

Willmar Tribune: If the ante-election promises of the legislators count for anything the reciprocal demurrage bill will pass at this session.

S. A. Langum in Preston Times: Legislative members as good, honest and true as any, are today riding on passes, yet will vote right on any and all railroad legislation, when the time comes.

Anoka Free Press: The eyes of the state are on Eberhart and his senate committees. If the committees fail to make good with the people, Mr. Eberhart's political death knell will have been sounded.

Rush City Post: It is up to some enterprising legislator now to draft a bill for the dimension of stalls in the hotel stables and for the sanitation thereof. There is no fun in making horse play with the horse left out.

St. Cloud Journal-Press: If the introduction of bills was any evidence of what the legislature will do, the corporations would have cause for apprehension. A large majority of the bills are too drastic and impractical, and should be killed. But there is no occasion to worry about the corporations. They have a way of taking care of themselves.

Princeton Union: Were all the measures introduced at this session of the state legislature enacted into laws the statutes of Minnesota would make a tome approaching in height the pyramid of Cheops.

Redwood Reveille: The attorney general has decided that the $250 graft proposed by the legislators is unconstitutional. How could you, Ed?

Anoka Free Press: The correspondent who wrote that the legislature is one of the chief industries of St. Paul did not hit very far from the true mark.

Le Sueur News: "Made by the Third House" should follow the enacting clause of some of the proposed laws.

Pointed Paragraphs.

New York Press: Better a good enemy than a bad friend.

Uneasy is the tooth that wears a misfit crown.

When courtship ends in matrimony a man's troubles begin.

Words seldom fall a woman—unless she is at her own funeral.

Some men marry widows so they won't have to buy new furniture.

At least the man who says witty things gets a lot of self-approval.

Even when a woman does trust her husband she doesn't let him know it.

Old King Cold.

Old King Cold is a horrid old soul,
And hugs like a lover bold;
He holds us fast in his icy grasp,
And heeds not when we scold.

His icy kiss doth press our lips,
His frost is on our brow,
And his coming pains our finger tips,
And chilblains are itching now.

He calls for furs, he calls for fire,
And he calls for hot scotch three,
Old King Cold is a frigid old soul,
As you can plainly see.

In the Courthouse square he is always there,
By our side he walks with glee,
And his fond caress doth all distress,
And from him we all do flee.

Go North, old King, where there is no Spring,
To the land of the Eskimo,
With the Polar bear you can make your lair,
And ride upon a floe.

FAST TRAIN IS WRECKED

Leaves the Rails While Running Forty Miles an Hour.

Engineer Killed and a Number of Passengers Hurt.

Connellsville, Pa., March 1.—Baltimore & Ohio train No. 49 westbound, running eighteen minutes late and forty miles an hour, was wrecked last night near Indian Creek, seven miles east of here. The entire train consisting of a combination smoking and baggage car, two day coaches and the private car of Robert J. Finney, superintendent of the Pittsburg division of the Baltimore & Ohio railroad, left the rails and after running for 200 feet along the ties was thrown into a ditch at the foot of the mountains where the wreckage was completely burned.

The engineer was killed, the fireman fatally injured and the baggagemaster, express messenger, conductor and six passengers were seriously injured. About thirty passengers were more or less cut and bruised. The dead :

Wylie Irwin, Pittsburg, engineer, caught under the wrecked engine and burned to death before the eyes of the passengers who were powerless to liberate him.

The injured: T. D. Frederick, Pittsburg, fireman, fatally injured; P. R. Hurton, Pittsburg, baggagemaster; J. M. Smith, Cumberland, Md., express messenger. The following passengers were injured: C. S. Shipley, Charleroix, Pa., B. O. Hull, Garrettsville, Ohio; Mrs. J. W. Tissue, Morgantown, W. Va.; J. A. Roman, Baltimore; Miss Jessie Cockran, Dawson, Pa.; A. Lape, Dawson, Pa.

There were forty-one passengers on the train including a party of Baltimore & Ohio railroad officials on a tour of inspection. When the train was three miles east of Indian Creek the engineer began to speed in an endeavor to make up eighteen minutes lost early in the trip. The train was making about forty miles an hour. Suddenly the whole train swayed and with much jarring and cracking left the rails. Fortunately the train took a course northwest from the track and after running over 200 feet along the ties plunged into a ditch at the foot of the mountains. The four cars piled in a heap almost directly over the engine. The passengers were thrown and tossed about like packages.

Screaming and fighting desperately, they managed to break the windows of the cars and gain places of safety just as all the cars became ignited from the engine and began to burn fiercely. Within a few minutes all had reached safety. While they stood about in a dazed condition, hardly realizing their exceptional escape they were attracted by the cries of Engineer Irwin. Several of the passengers accompanied by Capt. Finney and the other railroad officials ran to the engineer's rescue. Their efforts were accelerated by Irwin's pathetic pleadings, but without success. The flames quickly burned their way to the doomed man.

Relief trains were dispatched from this city and the injured brought to the hospitals here.

Talking to the Associated Press regarding the cause of the wreck Superintendent Finney said:

"The wreck was caused by some part of the engine mechanism becoming loosened and dropping to the track, throwing the train from the rails. It would be hard to prove this now as everything is broken or burned."

BRIEF TELEGRAMS.

The rumor that William F. Walker, the alleged Connecticut embezzler, was captured in Ontario, Or., is found to be without foundation.

Five workmen in the top story of the John Schaber Picture Moulding factory on Spring street, Cleveland, had a narrow escape from death by suffocation Thursday night when the building took fire and was partially destroyed. The damage amounts to $60,000. The firemen climbed to the third story and rescued the workmen.

A collision Thursday at Chariton Station, between a westbound Burlington freight train and a lone eastbound engine, resulted in the death of Engineer Al Roberts, Fireman C. Donovan and Brakeman Edward Lambert. The accident is ascribed to failure of the brakes to work. Both engines were wrecked and rolled down an embankment.

Judge Dunne of San Francisco Thursday dismissed the entire jury panel of fifty selected last Thursday to try Abraham Ruef on the charge of extortion. A new panel will be drawn. Of the fifty chosen, only forty-one could be located and out of this number only nine expressed a willingness to serve.

Adolphus Busch, the millionaire brewer of St. Louis, left Pasadena for the East in his special car Wednesday. His departure was very hurried, but nothing was given out as to the cause.

F. A. Tracy, manager of the Helvetia Mining company at Vail, Ariz., was shot and killed Thursday by Lieut. Harry Wheeler, a ranger. It is said that Tracy was threatening to shoot E. W. Silverton and his wife. Wheeler arrested him and Tracy shot and wounded the lieutenant twice. Wheeler was taken to the Tombstone hospital.

Madam Norma Roma, late prima donna of the Henry W. Savage Opera company, was married to Samuel H. Shank, United States consul at Winnipeg, Man., at Minneapolis, Thursday.

In a collision of work trains at the Salt Lake route washout near Caliente, N. Mex., at least three persons were killed and several fatally injured.

Augustus Busch, son of the millionaire brewer of St. Louis and president of the New State Brewing company of Oklahoma City, Okla., has been indicted by a federal grand jury in Indian Territory, charged with introducing into the Indian Territory intoxicating liquors in the form of low grade beers.

PASHA MUST EXPLAIN HOW GEMS DISAPPEAR.

Paris, March 1.—As the result of a complaint lodged by Mme. Carlier, the well-known actress, a certain pasha, who is a notable figure in the Egyptian colony, has been arrested. Finding herself short of money eighteen months ago, the actress borrowed $2,000, depositing her pearl necklace, which is worth more than that amount, and two emerald rings, valued at $1,250, as security. The money was given to her by an intermediary between the pasha and the actress.

A short time afterward the actress thought she would like to have her jewels back. She therefore paid the $2,000 and obtained the necklace, but not the emerald rings. She lodged a complaint against the man who had styled himself as the intermediary in the transaction, but as she went on a voyage at that time the inquiry into the matter could not take place.

The doings of Simeonl de Flores, the financier, drew attention to the pasha, who figured among those who had offered their services to the banker, and Mme. Carlier decided to modify her complaint so that it should apply to the pasha. After inquiring into the affair, M. Flory, the examining magistrate, issued a warrant against the pasha, who was arrested.

RHEUMATISM BREAKS DOWN

THE STRONGEST CONSTITUTION

Rheumatism is caused by a sour, acid condition of the blood, brought on by chronic constipation, weak kidneys, poor digestion and a general sluggish condition of the system. Because of these irregularities the refuse and waste matters of the body are not promptly expelled, but are left to sour and ferment, producing irritating acids which are taken up by the blood and distributed to all parts of the system. This acrid matter weakens and diseases the blood so that instead of supplying the body with nourishing, healthful properties it deposits the poison with which it is loaded into the muscles, nerves, bones and joints, and Rheumatism gets complete control of the system. Some suffer almost constantly with the disease, while others have intervals of freedom, during which they live in constant dread of the next attack, when an exposure to cold or dampness or some other irregularity will cause the symptoms to return. If the cause is not removed Rheumatism will progress and reach a point where it becomes incurable, and the strongest constitution will break down. S. S. S. has been curing Rheumatism for more than forty years. It attacks the disease at its head by going down into the blood and removing every particle of the acrid matter and building up the weak, sour blood to a state of purity and richness. S. S. S. is the King of blood purifiers, just what is needed for the cure of Rheumatism. Book on Rheumatism and any medical advice sent free.

SPORTS OF THE DAY

VETERANS WILL DINE

Duluth Curlers Who Have Played Ten Years Meet Tomorrow.

Afternoon of Play Followed by Feast at Commercial Club.

"Should auld acquaintance be forgot, an' never brought to min'
Should auld acquaintance be fogot and days o' auld lang syne?"

The veteran curlers of the Duluth curling club, those who have been ardent followers of the game of the stane and broom for ten years or over, will gather tomorrow afternoon at the curling rink for their annual meeting, and it has been ascertained by Charles West, who has the affair in charge, that thirty-two of the old timers will be on hand, enough for eight rinks, and four sheets of ice will be occupied during the afternoon.

In the evening the curlers will adjourn to the Commercial club dining room, where at 7 o'clock an elaborate supper will be served and a program of toasts rendered, E. P. Towne officiating as toastmaster.

These meetings of the veterans have been held each year for some time past and have always been most enjoyable. No definite organization has been perfected, however, and the work of preparing for the banquet has been the labor of some self-appointed committee on each occasion.

Tomorrow night, however, an attempt will be made to perfect a regular organization of the veteran curlers of Duluth with regular officers and a membership limited to ten year curlers.

The rinks which will play down tomorrow evening compose the cream of the local curlers and are as follows:

Craig,	Hegardt,
Magner,	Gibson,
West,	Myron,
Hurdon, Skip.	A. B. MacFarlane, Skip.
Spencer,	Sherwood,
McLennan,	Todd,
Stocking,	Frick,
MacLeod—Skip.	Dunlop—Skip.
Towne,	Green,
Cutler,	Jacobi,
Duncan,	Jones,
Woodruff—Skip.	Catlin—Skip.
Newcome,	Anneke,
E. N. Bradley,	Forsythe,
Currier,	Day,
A. H. Smith—Skip.	Macrae—Skip.

PORTAGE LAKES ARE CHAMPIONS

Defeat of Canadian Soo Puts Final Cinch on Title.

Houghton, March 1.—The Portage Lake Hockey team clinched the championship by defeating the Canadian Soo seven yesterday by a score of 10 to 1. The Canadian team was only saved from a shutout by the work of Capt. Roy Brown in scoring a lucky pass near the middle of the second half. The first half ended 4 to 0. Both teams played hockey of the fast and clean order, but the visitors were simply swept off their feet and the local team registered at will.

Goal Tender Regan and Fred Taylor of Portage Lake, and Roy Brown and W. Taylor of the Soo's, were the stars of contest.

The line-up:

Canadian Soo	Position	Portage Lake
Lehman	goal	Regan
Brown	point	F. Taylor
McRobie	cover point	Holden
Marks, Lalonde	rover	Cochrane
W. Taylor	center	Stuart
Oullette, Marks	left wing	Lake
McGray	right wing	Forrester

KELLEYS WIN.

Defeat Tuxedo Club In Close Game 1 to 0.

Another victory was added to the string of the Kelley Hardware Ricochet team last evening when it defeated the Tuxedo club at the Temple roller rink by the score of 1 to 0. Not until the closing minutes of play of the last half was the contest decided when the score of 1 was made by Hanson. It was the first game which the Tuxedo club had played, but they managed to keep their opponents hustling.

A fourth ricochet team will probably be added to the three already in existence before the end of the week and there may be a regular schedule of games. The teams now in the field are the Kelleys, the Tuxedos and the Big Duluths.

The game is still young in the Northwest, but has already made a great hit. It was invented by two St. Paul men three years ago.

MILTON-DENO.

New Man Goes on With Little Wonder Tonight.

Kid Deno will be George Milton's opponent on the wrestling mat at the Met tonight. Deno will go on at 120 and Milton at 117, and with the three pound margin the new comer should give the little champion a lively set to.

A $10 side bet is up on the match with a percentage of the house receipts.

Gophers Defeat Purdue.

La Fayette, Ind., March 1.—Minnesota defeated Purdue in basketball here last night by a score of 37 to 26. The visitors scored all their goals on long throws to the cage.

Stays With Gotch.

Cincinnati, March. 1.—Frank Gotch, champion wrestler of America, last night again failed to throw Charles Olson of St. Louis within the fifteen minute limit. Olson was never seriously in danger, although decidedly on the defensive all during the bout. Gotch had much trouble in keeping Olson on the mat and was very much disgusted after it was over.

Norman Hapgood, who settles the affairs of the nation through Collier's Weekly, puts the sporting world hep to the fact that slang is a dead number, and that it is doomed to fade gently away into the background and mingle with the distance. He says that baseball slang will soon be but a forgotten memory or something of that kind.

Grantland Rice, the humorous poet, writes the following epitaph on the old familiar phrases:

"Above your tomb we drop a tear—
You're down and out and that's no 'idle pipe;'
We hate to see you 'twenty-three' from here,
But so it somes to those so overripe.
Our hearts are broke, for never, never more
Can we write down, 'Bay's hit sewed up the score.'

"We hate to dump you in this clammy spot,
And plant a brick above your busted bun;
You once were kicking and your pace was hot,
But now at last your hectic stride is done.
Our eyes are dimmed—no longer can we write:
'Bill Bradley jammed a corker out to right.'

"Farewell, O Slang, a long farewell to you—
You're listed now among the honored dead;
Above your mound we scrape the word 'Skidoo,'
And swing the laurel wreath above your head.
On—on your way—you've rounded-out your time
In baseball prose as well as baseball rhyme.

Norman must have been searching his soul for an editorial thought when he got this mad hunch on baseball slang. Like the cocktail slang follows the flag, and it should find a breeding ground in the great national playgrounds.

• • •

North Dakota may have a little league of her own this summer. The "Society of the Little Snowed Ins" will include Minot, Rugby, Devils Lake, Grand Forks, Fargo, Valley City, Jamestown and Bismark. Kent, Laxdal and Price are said to be pushing the league.

The snowball league will be a compact affair, and it might be a success playing weekly games with semi-professional teams, but it is hard to see how some of the smaller towns could support a regular professional team.

EVERY RECORD IS SMASHED

Sam Olsen Holds High Score and High Average Marks.

The Big Duluth bowlers last evening demonstrated that the Columbias are not the only prize babies in the local bowling world, by breaking all records for the Head of the Lakes in their game with Floan & Leveroos' Orphans.

Sam Olsen broke the high score record, boosting Jimmy Klerney's mark of 265 made three years ago, to 267, and also incidentally broke the Northern Minnesota record for three games, rolling 725, an average per game of 242. The former mark was 676, credited to F. Steigler. The team also smashed the mark for total pins in three games with a final total of 2,982 as compared with the Columbias' 2,917 mark, which was the limit till last night. Only hard luck in the final contest prevented the Big Duluth from rolling a 3,000 game. The team now holds every record in the local league.

The scores made were:

BIG DULUTH.

	1st.	2nd.	3rd.	Total.	Av'ge.
S. Olsen	267	245	213	725	241 2-3
Berini	199	191	221	611	203 2-3
Bergstrom	144	168	184	496	165 1-3
W. Taylor	169	195	149	594	198

CASS LAKE WINNER

Over Park Rapids Bowling Team by Majority of 174.

Cass Lake, Minn., March 1.—(Special to The Herald.)—In an interesting and exciting bowling meet here last night between Park Rapids and Cass Lake, the locals came out victorious by a majority of 174. The following is the score of the three games played:

CASS LAKE.

Olson	112	152	157
Hansen	147	148	170
Cummings	195	164	136
Miskella	134	131	138
Burns	183	155	192
Totals	771	750	793

PARK RAPIDS.

Petra	137	151	135
Smith	144	177	108
Delaney	104	137	208
Rhodes	129	174	159
Downs	158	107	112
Totals	672	746	722

Freak Auto Bill.

Copies of the automobile bill which has been introduced into the legislature for the purpose of regulating the conduct of those persons to whom the bill sarcastically refers as "so-called chauffeurs," were received here today. Its contents are practically the same as outlined in The Herald last week.

MAN AND WOMAN SHOT IN AMUSEMENT PARK.

Brunswick, Ga., March 1.—Lillian Davenport was shot and killed, and W. H. Brown, a bartender, was probably fatally wounded at Windsor Park. The woman's husband, manager of the Majestic theater was arrested, charged with the double crime, which he denies. Windsor Park is an amusement resort near the city and it was to this place that Brown and the actress went. They were seated on a bench in a secluded spot, when they were shot.

VICTORS BY ONE POINT

Company A Wins Close Shoot From Company C Team.

Shoot With Ashland and Superior is Being Arranged.

One of the most hotly contested shoots on record was held at the Armory last evening when Companies A and C, and the Field Staff and Band team clashed, and Company A took the lead by the narrow margin of one point over Company C while the Musicians were only three points behind the leaders.

The new 22-calibre Krags were used at a fifty foot range, with the targets adjusted for the 200, 300 and 500 yard distance, and the work done was of a fairly high order.

The musically inclined section again proved themselves crack shots, for Private Holter of the Musicians team, and Grinden, musician for Company C, were the two high men, with scores of 69 out of a possible 75, while Capt. Resche, Private Olson of Company A, and Sergeant Swan of Company C, had 68 to their credit.

The individual scores were as follows:

FIELD STAFF AND BAND TEAM.

Maj. Resche	22	22	24	68
Lieut. Weaver	22	19	21	62
Lieut. Chisholm	22	21	21	64
Corp. Wirth	24	17	19	60
Lieut. Kjall	22	22	21	65
Sergt. Westberg	25	19	21	65
Sergt. Sodahl	23	21	21	65
Sergt. Simpson	24	21	22	67
Corp. Berger	20	19	20	59
Private Holten	21	23	25	69
Totals	225	204	215	644

COMPANY A TEAM.

Whitaker	24	20	20	64
Peterson	22	22	23	67
Benison	21	20	18	59
Weisinger	20	19	23	62
Lindvald	24	20	22	66
Rabideaux	23	22	20	65
Dash	20	19	21	60

Sergt. Nelson	23	22	21	66
Private Kentel	21	18	21	60
Totals	224	203	219	646

It was expected that Company I of Superior would be on hand to take part in last evening's shoot, but some of the crack Wisconsin shots are at a field meet at Madison and the Superiorites did not care to enter into the competition with some of their best men out of it.

A meet is being planned for the near future, however, in which not only the Superior militia, but the boys in blue from Ashland will also compete.

BOX OF DIAMONDS

Is Stolen by Stranger From a Houston Jewelry Store.

Houston, Tex., March 1.—A local jewelry company has been robbed of between $60,000 and $70,000 worth of diamonds by a stranger, who entered the store and asked to have an unmounted stone matched, in order to have both mounted for earrings. A box of loose diamonds was produced by the clerk, and they went through them, trying to select a similar stone. The stranger did not appear to be satisfied, and said he would send his wife around in the afternoon. He left the store and, as the clerk supposed, the box of diamonds was returned to the safe. Taken from the safe again in the afternoon, it was then discovered that the box that had been returned contained only tissue paper instead of the valuable jewels. It was identical in appearance with the box for which it had been substituted.

CAT ROUTS BURGLAR BY NOISE AND CLAWS.

New York, March 1.—Mrs. Lillian V. Hall believes that her pet cat Tom is a better protector than a watch dog. Twice the cat has given evidence of knowing a thief when he sees one, and yesterday he attacked a burglar who had entered the apartments of Mrs. Hall at No. 58 West One Hundred and Fourth street.

Tom had heard a noise in the bedroom, where in a dresser drawer were money and jewels worth $500, and going thither from the dining room, returned in a minute to leap upon the lap of Mrs. Hall. The animal tapped her in the face with his paw several times, and raced to the bedroom again, meowing angrily meanwhile. Mrs. Hall followed, and the next moment saw a bewildered man speeding down the hall, the cat in pursuit and trying to claw the fugitive.

The burglar was so surprised by the cat's attack that he had difficulty in finding a way out of the house.

The drawer where the jewels were had been opened, but everything was intact.

"Once before," said Mrs. Hall, last night, "the cat gave an alarm when a man had entered the hall. We ran out in time to see the fellow steal an overcoat and hat from the hallrack."

GOES FROM ALMSHOUSE TO VAUDEVILLE STAGE.

New York, March 1.—The interest aroused concerning Bert Harte's daughter, Mrs. Jessamy Harte Steele, when taken from the Portland almshouse and given a theatrical benefit in this city, is considered sufficient to warrant her appearance in vaudeville and she has signed a contract with a vaudeville agent. She had been planning to go on the stage before it became necessary for her to seek financial assistance.

She will give sketches of early California life as depicted in her father's writings, and, having some musical training, will sing songs relating to the days of '49. Songs of this character as employed by David Belasco in "A Girl of the Golden West" have proved popular in the East.

The Supreme Test — Every

GORDON HAT

must give absolute satisfaction to the man who wears it

THREE DOLLARS

REV. MR. AKED'S FAREWELL

Will be Dramatic Leave Taking---Pews Sold Like Theater Tickets.

London, March 1.—The farewell appearance of the Rev. Mr. Aked, who goes to the Fifth Avenue (New York) Baptist church at Pembroke Chapel, Liverpool, on March 3, will be a dramatic leave taking. The pews are being sold like theater seats. The applications already received are sufficient to fill the chapel five times over.

The congregation chose as Mr. Aked's successor the Rev. C. H. Watkins, one of the most brilliant young Baptists. He was trained, like Mr. Aked, at the Midland Baptist college. He is now at Oxford university.

CHARGED WITH LOOTING AT A RAILROAD WRECK.

Johnstown, Pa., March 1.—Passenger Flagman C. E. Hoover who gave the first news of the wreck of the Pennsylvania special last Saturday morning, is under arrest, charged with larceny. Detective Charles A. Robinson alleges that Hoover had in his possession a ladies' watch with diamond settings, worth $1,500, and over a dozen small articles of fair value. He said he intended to turn the articles over to the high officials, and the police here are inclined to believe him. Two other railroaders, Vincent Sherlock, a freight brakeman, and Michael Burke, a railroad hand, were also arrested on a charge of looting the Pullmans.

Both men were released on bail. Burke had two diamond pins, worth $1,500, about him, while Sherlock had a fine overcoat.

SLAVE TO HAVE MONUMENT.

Colored Man Who Founded Unique Town to Have Grave Marked.

Hasings, Me., March 1.—On the side of a hill not very far from the deserted lumber mill here is the grave of "Nigger Tom," to whom is given the credit of discovering the town of Hastings and becoming the first settler thereof. The grave is marked only by a mound of earth and a beech tree. On the sides of the latter are marks which show that some one at some time engraved the biography of "Nigger Tom," for it reads:

TOM, 1863.
FIRST SETTLER AND A SLAVE.

The last time he was seen alive was in the fall of 1863, when a party of lumber prospectors were tramping through the woods and stopped at the camp of "Nigger Tom."

Next year a small lumber mill was built near the spot where Tom's camp had been situated and the place was called Hastings. It was more than seven miles from the railroad, the nearest station being at Glidad. It had and holds to this day the distinction of being the only town in the world which is not reached by a carriage road, and also the largest settlement in Maine which is exempt from state and bank taxes.

FAMILY RULES SWISS TOWN.

Hold All Offices in Village on Lake of Four Cantons.

Geneva, March 1.—A striking example of oligarchic rule presents itself the Lucerne Tageblatt says, at Vitznau, a little town on the Lake of the Four Cantons. Here the Zimmermans are extraordinary prolific. The burgomaster is Joseph Maria Zimmerman and Melchier Zimmerman is vice burgomaster. Louis Zimmerman is the clerk, and Anton and Remigius of that name are the poor law guardians. Johann Joseph Zimmerman is the magistrate, Franz the treasurer and Maria the surveyor, while Joseph No. 1 and No. 2, bench. Mechler No. 2 is justice of the peace. Joseph No. 3 owns the best hotel in the place; John Maria is the tax collector, and Anton No. 2, with Melchier No. 3, looks after the public works department.

Saved Her Son's Life.

The happiest mother in the little town of Ava, Mo., is Mrs. S. Ruppee. She writes: "One year ago my son was down with such serious lung trouble that our physician was unable to help him; when, by our druggist's advice, I began giving him Dr. King's New Discovery, and I soon noticed improvement. I kept this treatment up for a few weeks when he was perfectly well. He has worked steadily since at carpenter work. Dr. King's New Discovery saved his life." Guaranteed best cough and cold cure by all druggists. 50c and $1.00. Trial bottle free.

Closing Out Price

On the best Rural Delivery Mail Boxes made. Dust and water proof. While they last, $1.65.

JOS. E. FOX,

CONCERNING WOMEN

The regular meeting of the Saturday club will be held tomorrow afternoon at the club room of the library. During the half hour devoted to current events, Miss Jennie Moody will speak on the work of the juvenile court of Duluth, over which Judge Ensign presides.

The study for the afternoon will be on the "Art of the Roman Empire," with Mrs. W. J. Stevenson as leader. The outline of study is as follows:

Art Development in the Empire.

Roman Architecture, Sculpture and Painting.

Decline of the Art.

Y. W. C. A. Notes.

The Outing club of the Young Women's Christian association will leave the rooms tomorrow afternoon at 2:30 o'clock and go on an inspection visit to the sandpaper factory on Garfield avenue. Any of the members of the association interested in the visit are invited to go with the party.

* * *

The speaker at the devotional service Sunday afternoon at the Y. W. C. A. will be Rev. H. K. Madsen of the Norwegian-Danish Methodist church. The subject of Rev. Madsen's talk will be "The Religious Development of Norway and Woman's Part in the Work." The soloist for the afternoon will be Miss Gladys Olsen. The service is at 4 o'clock.

Lecture Tonight.

This evening the last lecture in the course of evening lectures arranged by the Twentieth Century club will be given at the club room of the library with Mrs. Robert Morris Seymour as speaker. Mrs. Seymour's subject will be "Democratic Art," and anyone interested is invited to attend the meeting. Mrs. Seymour is one of the most interesting of the lecturers who appear before the women's clubs of the city and much interest is felt among a large number of men and women in this lecture which will be delivered at 8 o'clock.

Emerson Club.

In spite of the inclement weather the first of the meetings of the Emerson club to be held at the library was well attended and a number of new members were present. The class has begun its consideration of the American writer with a study of his essay on "Self Reliance." The meetings will be held every other Thursday evening at the library and will continue through May. After a summer recess, the study will be resumed in the fall.

Musical Lectures.

The first of a series of three lectures by Mrs. Stella Prince Stocker on the "Niebelungen Ring" will be presented tomorrow afternoon at the Unitarian church, at the corner of Eighth avenue east and First street. The lectures will be musically illustrated, and the subject of the first will be "Rheingold" and will be given at 3 o'clock. The two remaining lectures will be given Thursday afternoon and Friday evening of next week.

Forward Guild.

The Forward Guild of the First Presbyterian church will meet tomorrow afternoon in the church parlors. The study of China will be continued with "Rex Christus," by Rev. A. H. Smith as the text book. The leader for the afternoon will be Miss Kensigner, and the younger women of the church are invited to be present at the meeting.

Hosts at Dinner.

Mr. and Mrs. William B. Silvey were hosts at dinner last evening at the Spalding. Jonquil and ferns were the table decorations, and the covers were laid for the following guests:

Messrs and Mesdames—
D. G. Cutler, H. T. Abbott,
Morton Miller, William Dalrymple.
E. P. Towne,
Misses—
Markell, White.
Messrs—
Herbert Spencer, A. W. Taussig.

Sleighride.

Miss Hazel McFarlane entertained at a sleighride last evening. The drive to Lester Park was enjoyed, and supper was served after the return at the home of the hostess. The chaperones were Mrs. J. Shield and Miss Laura McFarlane. Those present were:

Misses—
Adalia Oppel, Goldy Martell,
Lottie McFarlane, Eva Lewis,
Alice Pickthorn, Annie Hoffman,
Nellie Rooney, Ellen Anderson,
Elizabeth McFarlane, Dollena McFarlane.

Messrs—
B. Schwieger, George Lewis,
Frank Schweiger, Charles Lewis,
Herman Haukins, D. Mc Farlane,
Oleson, Beatty,
Sidney Erickson, Herman Oppel,
Nelson, Albert Salvoy.
Fred Hoffman,

Events of Interest.

Mrs. Victor Frederickson, Mrs. Dennis Johnson and Miss Freida Lindberg entertained last evening at the home of Mrs. Frederickson of 2313 West Fourth street, in honor of Miss Johnson, who will leave soon for her home in Chicago.

* * *

Mr. and Mrs. L. Fox have issued invitations for the wedding of their daughter, Miss Jennie Fox, and Charles Harris, which took place Sunday afternoon, March 17, at the old Masonic temple. The service will be read at 5 o'clock.

* * *

Mr. and Mrs. C. D. Jacobs have returned from St. Paul where they were married Wednesday of this week at the home of Rabbi Kypens. Mrs. Jacobs was formely Miss Bessie Kollen of Louisville, Ky. They are at the St. Louis and will be at home in this city.

What Retail Markets Offer.

Chickens, 18 cents a lb.

Fillet of beef, 35 cents a lb.

Squash, 5 cents a lb.

Spinnach, 50 cents a peck.

Louisiana strawberries, 15 cents a pint.

Tomatoes, 25 cents a lb.

Mint, 10 cents a bunch.

Cauliflower, 35 and 40 cents each.

The black sheep in the poultry yard of a local fancier are reposing stark and stiff in the window of the market. This poultry yard maintains only chickens of the bluest blood. When one of a race develops some plebelian characteristic, instead of letting the poor thing cut himself off from home and family and develop along his own line of inclination and allowing the individual to realize himself, the gentleman in charge of the runways points an inexorable finger at the offender who has grown a few white feathers when they should be all green, or whose feet are marked a little differently, and he is then seized by the executioner and off goes his head. A string is tied around the skin at his neck, his feathers are plucked, he lies there plump and tempting looking, and in response to a natural query the market man says, "Eighteen cents, ma'am." If you have chicken the next day or two and it happens to come from one market in particular, you may know that you are dining off a blue blooded aristocrat who suffered death because of the democracy of his views on growing feathers of off color, or having feet a little different from the others of his race.

The vegetable market is especially tempting.

The Evening Story.

LADY ISABEL AND MISS NOBODY

By Mrs. Neish.

(Copyright, 1907, by Joseph B. Bowles.)

It was towards the end of last winter that Lady Isabel confided in me about her other brother's love affair.

"My dear girl," she said pathetically, "you ought to be really and truly thankful Providence has not blessed you with brothers."

"Ought I?" I answered doubtfully. "Do you know, I have an idea I should simply love to have brothers?"

"It's only an idea," she responded lightly. "You see, you write fiction, and so you are full of imagination, and you imagine it would be nice to have brothers; but out of the realms of fancy, in real, hard, everyday life, they are a great nuisance and a fearful responsibility."

"All brothers?" I asked.

She nodded. "All mine, at any rate. Look at Bob," she continued, "dear old boy, he's awfully nice and all that, but very dull and heavy, you know, with the sort of heavy dullness that so often characterizes the future head of the family, and yet he is always falling in and out of love."

"You have only one other," I said, "and he is not even dull."

"No," she admitted. "Cyril is certainly anything but dull—in fact, is the other extreme; he is too lively, and that is just what is worrying me now."

"In love, too?" I asked, with sympathy. She nodded. "You know, he has been sort of engaged to Violet all his life—one of those matches mothers make over their cradles, and which is an absolute necessity for a penniless younger brother."

"Your cousin is very pretty," I said tentatively.

"I know," assented Lady Isabel, impatiently, "but so are lots of other women, and men never notice women they have known all their lives; besides he is in love just now."

"Who is she? Isn't she a nice girl?"

"Nice?" echoed Lady Isabel, raising her eyebrows with some slight show of irritation. "Yes, she may be nice enough for all I know. I don't know her, but she is a mere nobody—a governess, or a companion, or something—a dowdy little thing, who probably loves him entirely for himself, and won't give him up even although she knows he is poor."

"Must she give him up?"

"Of course she must," answered Lady Isabel sharply. "Papa says he will cut Cyril out of his will if he does not marry Violet, and he has left it entirely to me to manage."

"Is your father angry about it?"

"Angry? He is simply furious. I have just been interviewing him—I mean Cyril—but he says he doesn't care a button about the governor, and he shall marry whom he likes. The worst of it is," added Lady Isabel, "he has lent her my mother's string of emeralds—he got Bob to give it to him out of the safe where papa put it after poor mamma died. Bob has had charge of everything lately, since papa has been so ill, and now"—Lady Isabel paused tragically—"he has had the audacity to give it to Cyril for this girl, because, he says, it was to go to Cyril's wife anyway, and I have all the diamonds except the ones to go to his wife," she finished up a little incoherently.

"This girl will perhaps give it back to him if he does not marry her."

"Will she?" said Lady Isabel. "Catch her doing anything so silly—I know I shouldn't if I were in her place!"

"No, dear, I am quite sure you wouldn't," I rejoined, with what I felt was a peculiarly feminine sweetness of tone.

"Marjorie, what am I to do?" said Lady Isabel despairingly a day or so later. "I knew it was coming; and so has—Violet. She has asked papa to lend her those emeralds for Lady Avington's ball, and he has promised, and Cyril is in such a state, he gave them to the girl because he couldn't afford a really nice ring—you know, he is like me, always hard up, and he says he is ill if he is going to take them away from her again. Men are so dreadfully emphatic," sighed Lady Isabel. "It is exactly what Vernon says when he means to have his own way."

"Well, what about the emeralds; do tell me what happened?" I asked as we sat chatting, about a fortnight later, over luncheon.

"I have got them," she said triumphantly. "Miss Burnett gave them to me at once. I went and called upon her and asked her for them back myself."

"What was she like?"

"Oh, a nice little thing," answered Lady Isabel, indifferently. "Rather pretty—in a sort of helpless dolly fashion."

"Why did she give them up to you?"

"Well, you see, she has given Cyril up as well."

"Really!" I said in amazement.

"Yes; she refused to see him or answer his letters; and then I invited him and Violet to dine here, and throw them together, and dear Violet has so much tact," said Lady Isabel enviously, as though she was quite without that quality herself. "Cyril was furiously angry at first, but," she said presently, "like all men, he got over it in a very short time, and now, of course, he's going to marry Violet."

"But, my dear Isabel, how did you manage the other poor girl?" I asked. "She seems to have broken off her engagement without giving you much trouble at any rate."

"Yes, said Lady Isabel thoughtfully, "but it was quite easy. You know, these sort of middle-class girls are much more particular about their men than we are —" she hesitated.

"And so—"

"Well, I just told her about a few of Cyril's escapades, you know—some things I could say and some I, of course, could only hint—and she turned very icy at once, and I could see it would be all right, and so I thanked her—no, I mean, of course, she thanked me, and then I came away."

"Poor girl," I repeated.

"Oh! she'll soon get over it—at least, I can't imagine anything fretting long for Cyril; but I was in an awful fright at first, because I thought she might have had the emeralds changed for paste, you know."

"Oh, Isabel!"

"My dear Marjorie, please don't say 'Oh, Isabel' in that tone—it's just the sort of thing a girl in that class would do; and even two or three of the stones would have kept her in clothes for a year. Anyhow, you know, I don't really trust anybody, so I took them to Rubenstein's and had them looked at."

"And were they all right?"

She nodded. "Yes, I am bound to say they were. She was evidently quite as honorable as even Violet or I, in spite of the fact that she is a mere nobody."

"Perhaps, indeed, even for that very reason," I said, with mild sarcasm.

All this having happened at the end of last year, Lady Violet's marriage is already a thing of the past.

But yesterday morning I was suddenly reminded of poor Miss Burnett and the emeralds, Lady Isabel and I were driving from Dover street into Piccadilly, when she turned to me suddenly and said, "Oh, by the way, dear, do you mind stopping at Rubenstein's? I want to get my diamond brooch, I left it to be cleaned and mended the other day.

As we reached the shop door a tall woman standing with her back to us was saying in a high, languid voice, that made Lady Isabel start sharply and clasp my arm. "Yes, all right; by Monday next, then—but you will be sure and see they are exactly like the real stones."

"Oh, yes, your ladyship," answered the junior partner, "our imitations are quite perfect, you really need have no anxiety; in these days, indeed, it is often quite impossible to tell the real from the false."

"I do not, of course, want the family to know," said Lady Violet, "but it's only for a time; I hope to soon be free from my little difficulties, and then perhaps you'll put them back for me."

"Of course, your ladyship," he began half hesitatingly, "if"—but with a gesture Lady Isabel drew me into the street.

"Well!" she gasped, "of all the low class frauds! Our family jewels. How dare she! I shall go at once and tell papa and Cyril."

"My dear Isabel," I said soothingly, "I beg you will not be so extremely foolish. I can quite understand your natural dislike to a fraud, but I should strongly advise you not to interfere. It's never safe to interfere between the married; and it was you who made the match between Lord Cyril and your cousin, instead of letting him marry poor honest little Miss Nobody. As to your brother," I added sententiously, "he is quite happy—don't destroy his trust in his wife. He will never find it out, and—does it matter very much? No one will know but you and I, and, as your jeweler himself remarked, 'In these days it is often quite impossible to tell the real from the false.'"

WILD DREAM FROM WEST

Tells How Duluth Dog Travels 1,500 Miles in Two Weeks.

The Fake Factory at Vancouver, B. C., Does Great Work.

An enterprising newspaper correspondent located at Vancouver, B. C., has sent what appears to be a gilt-edged pipe dream, concerning the wonderful doing of a remarkable Duluth dog, to a newshungry public. The canine in question, said to be a Scotch collie, owned by T. G Young, formerly of Duluth, is credited with having traveled 1,500 miles by foot to join his mistress at Duluth.

When he arrived in the Zenith City he found she was not here, but his animal instinct told him she was visiting friends in Superior, so he galloped merrily across the ice, and, sure enough, found her "strolling in a park."

This part of the story is about as remarkable as the feat of the dog, for Superior does not know the meaning of the word park, and strolling anywhere is not a popular pastime, even at the Head of the Lakes, when the thermometer registers below zero. The St. Paul News gives the interesting account of the dog and his master, whose name does not appear in the Duluth directory:

Vancouver, Wash., Feb. 28.—A most striking example of animal instinct is furnished by the performance of a Scotch collie owned by T. G. Young.

This dog traveled 1,500 miles without other guidance than instinct, over a road he had never traveled.

Mr. Young and family, with the exception of a daughter, moved from Duluth, Minn., to the Dalles, taking the dog along.

The dog missed the daughter, who has been his lifelong friend. After the third day at the Dalles the dog disappeared.

Two weeks ago Miss Young was visiting at Superior, Wis. She was strolling in a park when, with a dash, her Scotch collie, which she had supposed was lost for good, rushed upon her. For fully an hour the dog was frantic with delight.

There was no mistaking that the dog footed it all the way home from the Dalles, Or., to Superior, Wis. When he left the Dalles he was a fat, well-kept fellow, but when he arrived at Superior he was little more than skin and bones and his feet were raw from exposure and the wear of travel.

RAILROADS

MANY NEW CARS.

Milwaukee Road to Spend $3,800,000 for New Equipment.

Milwaukee, Wis., March 1.—Work shortly will be begun at West Milwaukee shops of the Chicago, Milwaukee & St. Paul railway on 3,000 steel underframe box cars to be built at a cost of something over $3,000,000, according to a statement made today by A. E. Manchester, the company's superintendent of motive power. The construction of steel under-frame freight cars is a new departure for the railroad, but experiments and practical usage assure the success of the new system of buildings.

With reference to the shortage Mr Manchester says those who are doing the most howling are responsible in a large measure themselves for conditions. There are plenty of cars, he said, but those complaining have them tied up.

OFFER ARBITRATION.

Railroads Favor This Method of Settling the Wage Difficulty.

Chicago, March 1.—Arbitration as a means to avert a strike in the event of an unfavorable vote by trainmen and conductors on a wage proposition made by the railways was offered by the general managers yesterday. Mr. I. G. Rawn of the Illinois Central, who acted as chairman of the managers' committee, which held a meeting yesterday to consider the situation said that the managers feel that they had offered concessions which would really prove to be oppressive to a number of the roads.

What the increase offered amounts to, Mr. Rawn said was a question to be computed by the different roads as the same conditions do not apply to all systems. In a general way he said the officials contemplated increasing the pay of conductors in the passenger service $10 a month, baggageman $6, and brakemen and flagmen $5, with extra for overtime. The increase offered men in the freight service he said was a flat 10 per cent while on work trains and mixed trains the increase amounted in some instances to 18 per cent.

Whether arbitration will be ultimately accepted by the employes none of the officers of the organizations involved would say. It was declared to be almost certain, however, that the wage proposition of the railroads would not be accepted by the men. The last of the trainmen's committees left the city today and no further effort to seek a conference with the managers will be made it is said, until the result of the proposed strike vote is known.

MUSIC AND THE DRAMA

TONIGHT'S ATTRACTIONS.

LYCEUM—"The Millionaire Detective."
METROPOLITAN—Burlesque.
BIJOU—Vaudeville.

"THE MILLIONAIRE DETECTIVE."

Charles E. Blaney and Howard Hall's new comedy drama, "The Millionaire Detective," will be presented for the first time in Duluth at the Lyceum this evening.

The authors have written a play that sustains its interest throughout. There is novelty in the plot and the climaxes are dramatic. A good story interestingly told, it will appeal to all classes.

WRESTLING WITH BURLESQUE.

The regular performance by the Colonial Belles at the Metropolitan this evening, with its funny burlesques, tuneful musical numbers, clever trick bicycling and other features, will be enlivened by a wrestling match between Kid Deno and George Milton, both of whom have reputations to sustain. The Belles will give the last matinee of their engagement tomorrow afternoon and conclude their stay with a performance tomorrow evening.

MATINEE FOR SCHOOL CHILDREN.

Tomorrow afternoon a special matinee for school children will be given at the Bijou, with the regular performances tomorrow evening.

Attention Mothers.

That son of yours, who is about to embark upon the career of long trousers will appreciate your dressing him in a suit of that swagger cut, so desirable in young men's clothing. "Fitwell" clothes always pleases the young men.

FITWELL CLOTHING PARLORS,

First Class Accommodations. Reasonable Rates

DAN HANNA FACES DIVORCE.

Former Senator's Son Probably Will be Sued by Second Wife.

Cleveland, March 1.—Though not officially admitted by the principals or their attorneys, it is reported as a settled fact that Dan R. Hanna, son of the late Senator M. A. Hanna, is soon to be made, for the second time, defendant in a suit for divorce. The papers in the case, the reports state, have been drawn and will be filed within a week.

Mrs. Hanna was the daughter of Charles Gordon, member of one of the wealthiest families in Cleveland. She married Walter DeS. Maud, an English army officer, in 1897, but they separated a year later.

Hanna's first marriage was in the nature of an elopement match with Carrie May Harrington, better known as Mrs. May Harrington Hanna, and now Mrs. E. K. Stallo, wife of a rich resident of New York and Cincinnati. The youngest of three children, was still a baby when his parents' troubles began and was but 3 years old when his mother applied to the divorce court for relief. She secured a divorce in 1898, charging gross neglect of duty and cruelty. Both were granted custody of the children. Four years ago, despite Hanna and scores of detectives, she fled with the children to Europe.

Advice to mothers: Don't let your children waste away. They can be strong, healthy and vigorous with Hollister's Rocky Mountain Tea. It's a swift winged messenger of health. 35 cents, Tea or Tablets. Ask your druggist.

WIFE-BEATER LASHED.

Women Apply Whip to Bare Back of Old Offender.

South Pass City, Wyo., March 1.—A posse of women, escorted by a man, went to the home of Robert Hubbard, a notorious wife beater, near here, last night, called Hubbard out of the house, gave him twenty lashes across the bare back and commanded him to leave the community before sunrise. He left.

The man who accompanied the women, stripped Hubbard of his coat, vest and shirt in order that the lashes might be laid across his bare back, but the women themselves plied the whip.

Hubbard pleaded piteously for mercy and promised never again to beat his wife if the women would let him off, but he was an old offender and the posse was determined to whip him and did so.

Mrs. Hubbard witnessed the chastisement of her husband and made no effort to interfere.

SWEPT UNDER THE ICE.

Dan McCarthy Drowned at Sauk Rapids by Capsizing of Boat.

Sauk Rapids, Minn., March 1.—Dan McCarthy, aged 30 and single, was drowned at the Watub pulp and paper mill. McCarthy, who was one of the foremen in the dam, and John Schwalbowski had gone out in a boat to place dynamite for the purpose of blowing out a coffer dam. The boat overturned and both were thrown into the river. Schwalbowski swam ashore, a distance of several hundred feet, but his companion, after once being apparently safe on some planks, fell again into the water and was swept under the ice. His body has not been recovered.

AN IOWA ELOPEMENT IS NIPPED IN THE BUD.

Charlton, Iowa, March 1.—An officer with a warrant put an end to an elopement here Wednesday and temporarily suspended the culmination of a little romance.

Edward Clark, 25 years of age, who travels for a Chicago jewelry house, met and fell in love with pretty Mattie Eggers, the 17-year-old waitress in a hotel diningroom at Osceola. On each of his trips Clark made further progress in the affair of his heart, and soon it became noised about that "Mat" and "Ed" were engaged.

Then the girl's mother and brother stepped in and forbade the match on the ground that the girl was too young. The young people pleaded for a speedy marriage, but the mother and brother remained obdurate.

Finally an elopement was planned and the two lovers took the train for Chariton. The mother became aware of the elopement and telegraphed to the police here to have the couple arrested, and shortly after their arrival, while they were searching for a minister to tie the knot, the lovers were confronted with an officer with a warrant.

They accompanied the officer back to Osceola where they hoped to appease the wrath of the young woman's relatives and become united.

JENNIE LEE DIVORCED.

La Crosse Girl, Who Inspired a Popular Song, Wins Decree.

Milwaukee, Wis., March 1.—Mrs Jennie Lee-Ebert of La Crosse, whose elopement about a year ago with Walter Ebert of this city caused a flurry in society circles of La Crosse, was quietly divorced yesterday in Judge Tarrant's court. The proceedings were at noon and only a few knew at the courthouse that the well known case was being heard.

Mrs. Ebert was given a decree on the charge of desertion and non-support, husband making no contest. In lieu of alimony, she was awarded a sum of money, and given permission to use her maiden name of Jennie Lee. Walter R. Ebert was formerly a chauffeur for W. W. Cargill, a capitalist of that city.

GIRL LAUGHS EIGHT HOURS.

Started by Witty Remark, Young Woman Cannot Stop.

Florence, N. J., March 1.—Eight hours of hearty laughter, with scarcely a minute of rest, was the discomfort endured by Miss Barbara Barr of this city and a member of the Baptist church choir. Miss Barr was visiting the home of friends, when someone made a witty remark which aroused the mirth of all those present. After a few minutes Miss Barr found it was impossible to stop laughing. Her laughter could be heard for a square.

All kinds of plans to stop her were tried, but without success. Doctors Thatcher and Baird were summoned and conveyed the exhausted and semi-unconscious girl to her home. Until late in the evening she continued and the physicians were unable to cope with the case. Miss Barr grew weaker every minute, but, still laughing, she sank into slumber and the spell gradually passed away. When she awoke the effect for some time rendered her helpless. The peculiar thing about the case is that she does not remember the joke.

Back From New York and Eastern Markets

Our Madam L. M. Barrie, manager of the Millinery Department, has just returned from New York and Eastern markets, after an absence of six weeks. We are saving neither time nor expense in our endeavor to make our Millinery Department the first at the Head of the Lakes. Whatever is new and up-to-date in the Millinery field has been carefully selected by Madam Barrie during her long absence. We expect much that is new and beautiful in the millinery line on the arrival of our Spring Stock, and promise the ladies of Duluth a rare treat in exclusive Millinery Creations when our stock is arranged and ready for sale.

D. E. H., March 1, 1907.

FORWARD MARCH!

March is here, and here are the Coats and Shoes to march in any kind of weather.

New goods are now arriving every day—the new Hats, Shoes and Shirts are already going at a lively rate.

As the Scotch have it, March comes in like an adder and goes out like a peacock's feather.

It's the month to look out for your feet—only a step from wet shoes to the doctor. Columbia Shoes are cheaper than doctor bills and Columbia Shirts and Ties are as fine as peacock feathers.

March in.

BIG DEAL IS CLOSED

William O'Brien Sells Pine Stumpage to Mining Company.

Consideration Said to be in Neighborhood of $600,000.

One of the largest pine timber deals in Northern Minnesota for a long time past is said to have been closed within the past few days. The transaction is reported to involve the transfer from William O'Brien, the well known St. Paul lumberman, to the Oliver Iron Mining company, of a large tract of standing pine along the east side of the Cloquet river, above the railroad bridge in townships 57-10 and 55-11.

Although the amount of timber involved is not stated, it is understood htta the pine was sold for about $10 per 1,000 feet, on the stump, and the total consideration was in the neighborhood of $600,000.

The reported deal is accepted in the local lumber circles as being true, the information coming through sources considered as very reliable.

The transaction is of much interest for several reasons. In the first place it is understood that William O'Brien secured the land by means of scrip a few years ago the timber costing him in the neighborhood of only 75 cents per 1,000 feet. Previous to his acquiring the lands, it is said that various timber men sent estimators over the same ground, but their reports did not show very much timber.

The Oliver Iron Mining company owns some pine lands either adjoining, or located not far distant from the O'Brien tract, and it is understood that the corporation desired the last named tract to increase its holdings of pine. The mining companies consume annually several million feet of dimension stuff in their operations, and of late years the large companies have been providing for their future supply of lumber by securing tracts of standing timber. The steadily increasing prices of timber and of lumber have demonstrated the wisdom of securing a supply for future operations.

The timber that is reported sold comprises only a portion of Mr. O'Brien's holdings in pine timber lands. He and his associates are interested in some immense tracts of pine along the line of the Duluth, Rainy Lake & Winnipeg road and along the international boundary line.

How to Remain Young.

To continue young in health and strength, do as Mrs. N. F. Rowan, McDonough, Ga., did. She says: "Three bottles of Electric Bitters cured me of chronic liver and stomach trouble, complicated with such an unhealthy condition of the blood that my skin turned red as flannel. I am now practically twenty years younger than before I took Electric Bitters. I can now do all my work with ease and assist in my husband's store." Guaranteed at all drug stores. Price 50c.

GIVEN FOR LOVE AND ONE DOLLAR

Mrs. Charles P. Livermore Gets Costly Residence at Newport.

Newport, R. I., March 1.—A princely gift has been made by the Baroness Sellliere, whose first husband was the late Charles F. Livermore, a Boston banker, to her daughter-in-law, Mrs. John R. Livermore.

It is the superb summer residence of the baroness in Bellevue avenue, and all its exquisite furnishings.

It was rumored last autumn that the baroness had given her home to Mrs. Livermore, but it was not till Wednesday, when the deeds transferring the property were filed for record here, that the report could be verified.

Mrs. Livermore is the widow of the oldest son of the baroness, who died in New York a year ago. She has two children, and, although as a daughter of Mr. and Mrs. H. Mortimer Brooks, she is prospectively a great heiress, the baroness, who has given up coming to Newport for the summer, deeply touched at her early widowhood, decided to present her with her summer home, which has been one of the show places of Newport since it was built sixteen years ago.

The deed says the transfer is made "for the sum of love and affection and $1."

The place, which is known as Inch-

10

iquin, is a stone villa surrounded by 96,061 square feet of land. There are also a stable and conservatories on the place, which is worth, furnished as it is $250,000. The villa overlooks the picturesque Bailey's beach and the privilege of the use of the pavilion at this exclusive bathing place goes with the transfer.

The Baroness Sellliere is one of the most beautiful women in society. Her first husband, Charles F. Livermore of Boston, died early in life, leaving her with three children. Her marriage to the Baron Raymond Sellliere of Paris was a notable incident of 10 or 15 years ago.

The last season the baroness spent the summer here she and Mrs. Hermann Oelrichs had differences over dances which, unbeknown to each other, they arranged to give on the same night. They later came to an agreement, but the baroness has not been here for a season since.

Mrs. John R. Livermore will occupy the villa next season. It is directly opposite the palatial villa of her mother, Mrs. H. Mortimer Brooks.

ANNOUNCE MORE EXAMS.

Civil Service Commission Has Many Vacancies to Fill.

Announcements have been made by the United States civil service commission that examinations for marine firemen, ink chemist and ink maker, and architectural draftsman, will be held on March 13. Another for deputy forest supervisor will be held on March 20, and one for a civil engineer student on April 3 and 4.

Five vacancies exist in the position of marine fireman in the quartermaster's department of the government on as many steamers stationed on the Pacific coast. The salary ranges from $500 to $900 a year. In the position of ink chemist and ink maker there is a vacancy in the bureau of engraving and printing, and the successful applicant will be eligible for any other vacancies which occur.

There are seven vacancies in the position of junior architectural draftsman in the supervising architect's office, and the salaries range from $840 to $1,000 a year. Two deputy forest supervisors are wanted to fill vacancies, at a salary of $1,500 a year, and the examination for this position will be held on March 20.

As there are eight vacancies in the position of civil engineer student in the office of public roads, department of agriculture, the commission hopes to secure a good list of applicants for the examination. The position pays at the rate of $600 a year, and there is good chance of promotion in this department.

Persons wishing to secure further information about the examinations can get it from the civil service commission at Washington, or A. Grabarkiewicz, at the Duluth postoffice.

Little globules of sunshine that drive the clouds away. De Witt's Little Early Risers will scatter the gloom of sickheadache and biliousness. Recommended and sold by all druggists.

LOVE POTION BEATS DOCTORS' MEDICINE.

Cincinnati, March 1.—Dan Cupid, as a healer of diseases, has succeeded in a case in this city which for five years has baffled human doctors.

William T. Leachman, high salaried general manager of the United States Printing company, the United States Playing Card company, the United States Poster company and the Middletown Paper company, has been ill for five years. He was stricken while visiting at the home of George Cormany, and it was only natural that Miss Elizabeth Cormany, then a pretty miss of 17, should administer to his wants.

During all the five years she has continued to act as Leachman's nurse, and the couple soon fell in love.

A week ago Leachman was thought to be dying, but he did not want to die a grass widower, as he had divorced his first wife. A messenger was sent for a license and a justice of the peace, and the invalid and nurse were married at midnight.

The next day Leachman was able to sit up in bed, and he has been rapidly recovering since. In a week or two the pair expect to start on their honeymoon to Europe.

NICOTINE KILLS A CHILD.

Connecticut Boy Smokes Seventy-Year-Old Pipe Secretly.

Waterbury, Conn., March 1.—Guy Tanner, age 6, is dead of nicotine poisoning. Death came with violent convulsions. As an examination showed unmistakable signs of poison, the medical examiner, Dr. A. A. Crane, returned a certificate of death by nicotine poisoning, caused by a pipe 70 years old, which the boy had used clandestinely for weeks. His father, Gilbert Tanner, and his grandfather had used the pipe all their lives.

HOLE IN MISSISSIPPI TO FIND GARDEN OF EDEN.

Jackson, Miss., March 1.—Prof. Clinton McMickle, a Kansas scientist and archaeologist, is so confident that the Garden of Eden was located in Yazoo county, this state, that he wants to organize a stock company for the purpose of making exclusive excavations on the farm of W. A. Henry, about seven miles south of Yazoo City. He expects to unearth the ruins of a once splendid city erected shortly after the expulsion of Adam and Eve from the Garden.

Prof. McMickle is positive that on the Henry farm will be found the ruins of a magnificent temple, the doors of which are pure gold.

He declares this was the site of the ancient city of Peseidon, destroyed by a conjunction of Mercury, Venus, Mars and Jupiter, just 4,235 years ago.

Prof. McMickle state that he has conclusive evidence, based on the book of Genesis and Greek and Egyptian records that Yazoo county was the birthplace of man, and it will only be necessary to dig the required depth in order to find prof of his belief.

"As we say, or your money back."

A Big Saving at Ericson's

On every Suit and Overcoat in the store. Plenty of use for a winter overcoat for another month or two, and it would even pay you to buy ahead at these prices:

COASTING PARTY ENDS IN A SECRET MARRIAGE.

Newark, N. J., March 1.—Charming Miss Julia Elston and Percy Smith first met at a coasting party on the Joralemon street hill, Belleville, N. J., three weeks ago. They will go down life's toboggan together on a bob-sled built for two. Their marriage was announced yesterday, but to get a good start, so to speak, they wedded last Wednesday.

Miss Elston, 20 years old, lives at No. 129 Stephens street, Belleville. Mr. Smith, 19 years, dwells on High street, same town. Mr. Smith, dragging his sled, went to the coasting place. He knew all the young women and men who were coasting except Miss Elston. The chill wind had kissed her cheeks into a glow; her eyes were far brighter than the snow crystals shining in the electric rays. Mr. Smith was promptly introduced to her, and thereafter she sat on his sled.

"You know how the Chinaman described tcbegganning?" he asked, the first time they arrived at the bottom of the hill.

"No," she said, curiously.

"'Whizz-zz—walkee back a milee,'" returned young Smith, and he added fervently, "I wish we had to walk back three miles."

This was the beginning of his courtship. With her ready permission—for he had well guided his bob-sled—he visited her. They went to Elizabeth to visit Miss Elston's sister-in-law on Wednesday. Then they went to the parsonage of the Methodist Episcopal church in Elizabeth, and, with religious care, the Rev. Mr. Letsinger started them as partners on the matrimonial toboggan. The bridegroom dined at his father-in-law's house yesterday and at dessert broke the happy news.

BABY'S FACE IN TERRIBLE STATE

Awful Humor Was Eating Away Face and Ears—Body Mass of Sores—Three Doctors Tried to Help Little Sufferer But She Grew Worse—After Spending Many Dollars On Doctors and Medicine

CUTICURA CURES IN TWO WEEKS AT COST OF 75c.

"I feel it my duty to parents of other poor suffering babies to tell you what Cuticura has done for my little daughter. She broke out all over her body with a humor, and we used everything recommended, but without results. I called in three doctors, they all claimed they could help her, but she continued to grow worse. Her body was a mass of sores, and her little face was being eaten away. Her ears looked as if they would drop off. Neighbors advised me to get Cuticura Soap and Ointment, and before I had used half of the cake of Soap and box of Ointment the sores had all healed, and my little one's face and body were as clear as a new-born babe's. I would not be without it again if it cost five dollars, instead of seventy-five cents, which is all it cost us to cure our baby, after spending many dollars on doctors and medicines without any benefit whatever. Mrs. George J. Steese, 701 Coburn St., Akron, Ohio, Aug. 30, 1905."

ITCHING TORTURES

Speedily Cured by Cuticura

A warm bath with Cuticura Soap and a single application of Cuticura Ointment, the great Skin Cure, will afford immediate relief, permit rest and sleep, and point to a speedy cure of the most distressing forms of torturing, disfiguring, humors, eczemas, tetters, rashes, itchings, and irritations of infants, children, and adults when all other remedies and even physicians fail.

Complete External and Internal Treatment for Every Humor of Infants, Children, and Adults consists of Cuticura Soap (25c.) to Cleanse the Skin, Cuticura Ointment (50c.) to Heal the Skin, and Cuticura Resolvent (50c.), (or in the form of Chocolate Coated Pills, 25c. per vial of 60) to Purify the Blood. Sold throughout the world. Potter Drug & Chem. Corp., Sole Props., Boston, Mass.

Mailed Free, How to Treat Skin Diseases.

EDUCATION FOR SON-IN-LAW

French Nobleman Brings Daughter's Suitor to This Country.

New York, March 1.—A romance of the old school came from across the Atlantic on the arrival of the steamship La Provence, on which Viscount d'Avenel, the Viscountess d'Avenel, their daughter, and the suitor for the latter's hand, Viscount de Romanet, were passengers. Viscount d'Avenel is a descendant of one of the oldest families of the French nobility, as is also Viscount de Romanet. The latter travels in the suite of his intended father-in-law for the express purpose of seeing the world and being constantly near the young woman whom he desires to marry. Viscount d'Avenel is to deliver a series of lectures at Harvard on the subject of political economy in France.

"Why do I bring Viscount de Romanet with me?" asked Viscount d'Avenel.

"Why, so the young man may know the world before he marries my daughter. When we decided on this American tour we decided the young man should come along with us and see this great country, which I have seen before. Then he will be able to talk of matters of worldly interest, and will be better able to face the future as a married man."

ROTHSCHILD WEDDING

Attended by Men Who Represented Five Hundred Millions.

Vienna, March 1.—At the first Rothschild wedding that has taken place in Vienna the relatives of the bridegroom represented a total capital of more than $500,000,000. It was the marriage of the Hon. Charles Rothschild, younger son of Lord Rothschild, and Fraulein Roszika von Wehtheimstein, daughter of one of the wealthiest Hungarians. The ceremony took place in the Josefstadt synagogue, which was built by the bride's uncle, and attracted such crowds that the police had to clear the street. The bride's dress was of splendid white satin, with a deep lace flounce and a veil of costly lace, and a court train. The newly married pair went to Venice for the honeymoon and will afterwards settle in England.

GIRL OF FIFTEEN WEDS SEVENTY-FOUR-YEAR-OLD.

Prescott, Mich., March 1.—Rosa Jenkins, 15 years old and just graduated from the grammar school, went away Saturday on her honeymoon trip with John Donovan, her 74-year-old husband. Donovan is an industrious and prosperous blacksmith, and has long been a friend of the Jenkins family. The couple have gone to Cornwall, Canada, whence the groom came in an early day. A crowd at the depot showered the departing couple with rice and old shoes.

PARROT CRIES "FIRE," THEN DIES IN SMOKE.

Marion, Ind., March 1.—A parrot gave the alarm of fire which saved the home of its mistress, Mrs. Alena Tressel, from destruction Saturday night, but before the firemen could stay the progress of the flames "Pretty Polly" had perished.

Mrs. Tressel and daughter had gone from their home, at 705 West Seventh street, to attend a play. An overheated stove, which was near the wall, set fire to the paper. A neighbor's attention was attracted by the screams of the parrot, which called shrilly, "Fire! Fire Fire!" Before the firemen could break into the house the parrot had suffocated. The bird's cage had been left close to the stove. When called from the theater and notified that their house was on fire the daughter of Mrs. Tressel faintd.

TOM JOHNSON WOULD MAKE A FINE BURGLAR.

Cleveland, Ohio, March 1.—Mayor Tom L. Johnson would have made a fine burglar. He admitted this to H. B. Swartz of Wooster, an inventor, who brought the mayor a new voting machine to examine. Mr. Swartz returned to Wooster much impressed with the mayor's ability as a mechanic and with the knowledge that his voting machine could be "worked with a hairpin."

The Wooster man submitted the machine to the mayor with the statement that it could not be manipulated fraudulently.

The mayor put on his glasses, examined the mechanism for awhile and then sent for one of the office stenographers. He borrowed a hairpin and with a few pokes and jabs showed the inventor how he could "run up" a few hundred votes for any candidate he wished.

The Wooster man acknowledged the defect in his machine and said he would try again. He expressed wonder at the mayor's ability as a mechanic.

"Oh, I'm an expert lock-pick, too," said the mayor. "Let me get an inkling of the general makeup of the lock and I can pick it.

"Once in the railroad business I had charge of the cash boxes on the street cars. I told the directors the locks could be picked. They laughed at me. I took a dozen of them to the office and, before the directors, picked ten of the locks in an average of less than two minutes each."

BOY GAMBLER TAKES FIVE DAYS IN THE JUG.

New York, March 1.—With a complete layout of dice, cards, sweatboard and a plethoric roll of bills, Sammy Pulchin, aged 12, faced the judge of the children's court on the charge of being a gambler.

"I pleads guilty, jedgo," said Sammy, "but dis is how 'tis. I goes up ter de Talla to see 'De Molder in de Subway' las' Saterday and me boss fires me. I tells him me grandmudder is croaked, an' I fergits dat I springs de same gag on 'im w'en de Giants wuz playin' de Colts. So w'en I shows up Monday mornin' I gits de razoo. I know me mudder needs me money, so I takes a chanct wid de bones and gits away wid it. If yuh lets me go dis time I won't gamble no more. Me mudder is poor and lives at 260 Siegel street, Brooklyn, and I wants ter bring de cush over to her."

Justice Wyatt found Sammy guilty and fined him $5, but although the lad had prospered off the newsboys and messengers since he started to run the games in theater alley he announced that he would rather do five days in the jug than part with the coin.

A DIFFERENCE.

It Paid This Man to Change Food.

"What is called 'good living' eventually brought me to a condition quite the reverse of good health," writes a N. Y. merchant.

"Improper eating told on me till my stomach became so weak that food nauseated me, even the lightest and simplest lunch, and I was much depressed after a night of uneasy slumber, unfitting me for business.

"This condition was discouraging, as I could find no way to improve it. Then I saw the advertisement of Grape-Nuts food, and decided to try it, and became delighted with the result.

"For the past three years I have used Grape-Nuts and nothing else for my breakfast and for lunch before retiring. It speedily set my stomach right, and I congratulate myself that I have regained my health. There is no greater comfort for a tired man than a lunch of Grape-Nuts. It insures restful sleep, and an awakening in the morning with a feeling of buoyant courage and hopefulness.

"Grape-Nuts has been a boon to my whole family. It has made of our 2-year-old boy, who used to be unable to digest much of anything, a robust, healthy, little rascal, weighing 32 pounds. Mankind certainly owes a debt of gratitude to the expert who invented this perfect food." Name given by Postum Co., Battle Creek, Mich. "There's a reason."

COEDS PARADE IN MALE ATTIRE

On Evanston Streets and Win Bet From a Man.

Chicago, March 1.—Donning men's clothing, six pretty coeds, members of the Bachelor Girls' club of Evanston, won a wager of a theater box party and three pound boxes of candy.

The wager had been made by George Williams, a dental student. Now Williams is figuring his losses, which he said would amount to a couple of months' allowance from home. The party lasses who refused to be dared are: Miss Katherine Johnson, Miss Jennie Peterson, Miss Olive Mircle, Miss Beatrice Carrigon, Miss Mary Peterson and Miss Anette Andrews.

Williams, when he learned that the young girls were equipped in their club house, with men's wearing apparel, dared them to venture out clad in this garb. He no sooner uttered the dare than the young club members accepted it.

It was agreed that they were to appear at Chicago avenue and Davis street at 9 o'clock. Williams also had consented that he would not disclose the plan. Hardly had the hour hand of the town clock reached the appointed time when the young women, clad in new gray suits, brushed by Williams.

"Good evening, Mr. Williams," said Miss Olive Mircle.

"Lovely night, isn't it?" spoke up Miss Mary Peterson.

"Delighted to see you, old chap," answered Miss Annette Andrews.

"Well, you see, old boy, it is on you," said the crowd in unison.

When Williams regained his composure, he answered: "You win, girls."

At the time the pretty misses paraded the busiest street of the suburb, a number of their friends were standing on the streets. No one recognized them, and as Williams had promised not to betray them they went back to their club rooms unidentified.

In January, 1906, the club was organized. Quarters were obtained at 1345 Chicago avenue. Every Wednesday they meet. Last Wednesday they held an elaborate stag smoker.

The following rules were made and are strictly enforced

Members must not entertain.

Members must not allow themselves to become serious.

Members must not wear picture hats or high heel shoes.

Members will please dispense with smart talk.

Any member who marries will be fined $25, this money to go into the treasury.

Must not stay out later than 10 o'clock at night.

CHORUS GIRLS MUST WEAR "APRONS" IN PUBLIC

Battle Creek, Mich., March 1.—"The billboards in this city must not portray anyone in a costume that would be unfit to wear on the public streets," is the dicum of Prosecuting Attorney Stewart, who ordered sheets of black paper pasted over portions of show bills which pictured a stabbing scene.

In the future the beauties of the ballet who are to appear before the Battle Creek public must confine the display of their charms to the stage and on the billboards they must wear modest aprons bearing the words, "In accordance with the statutes."

PICTURESQUE ANSWER READY IN POKER SUIT

John G. Howard Makes Interesting Come-Back at Mattson.

Divulges Some of Doings of the "Duluth Social Club."

Charging Jacob Mattson, the Finnish saloonkeeper on Lake avenue with running gambling devices to fleece unsuspecting countrymen and others, and of harboring females in his place of business, contrary to the city ordinance, also with being a "squealer," John G. Howard has made a very interesting "come-back" at Mattson for the latter's allegations made in the complaint filed with the judgment, a few days ago.

Mattson claimed judgment for the amount named, by default. He claimed that he lost about $2,250 playing poker with members of the Duluth Social club, in rooms under the Torrey building, and won $1,250 in chips, on which he only received $150 when he cashed in. He claimed Howard was the banker, and could not pay the balance of the $1,250 because of excessive and injudicious credit extended to members of the club, who had failed to liquidate their indebtedness.

This morning John G. Howard, through his attorneys, Davis & Hollister, filed in the district court notice of a motion to have the judgment vacated and set aside, with leave for Howard to serve and file an answer to the complaint. Attached to the notice is his proposed complaint, which handles Mr. Mattson in picturesque style.

Mr. Howard bases his motion on the following grounds: That the judgment was irregular and illegal, because it was entered within twenty days of the date of service, or attempted service of summons and complaint on Howard; that if twenty days did elapse, Howard was misinformed and misled as to the time of the actual service, without fault on his part, and justice demands that the judgment be vacated and he be permitted to serve and file his answer to the complaint.

The notice is accompanied, also, by affidavits, in one of which John G. Howard says that he was out of the city on a visit in January, returning Feb. 13, when he was informed by his brother, Benjamin F. Howard, that suit had been started by Mattson, and that the papers were served Feb. 7. Other affidavits by B. F. Howard and Alma Anderson, domestic for John G. Howard, who received the papers, corroborate the claim of Mr. Howard that Feb. 7 was the date of service, instead of Feb. 5, as Mattson claims.

The chief interest, however, hinges on the proposed answer to Mattson's complaint.

John G. Howard admits that he had a key to certain rooms in the Torrey building, where he, Mattson and a number of others known as members of the Duluth Social club occasionally went "to play that great American game known as poker, for money."

Mr. Howard denies that he supplied the players with meals, cigars, or drinks, except as he contributed his fair share to pay for what he ate, drank and smoked.

He claims that it was customary for some one of the members of the club to act as "banker," but says "that other members of the said club held the honorable position of 'kitty,' or 'banker' as often or oftener than did the defendant."

Mr. Howard expressly alleges that whenever he acted as "banker," the "rake-off" netted him no profit or in other words, the "kitty" was profitless, except in so far as he participated in his share of the entertainment, "intellectually and physically furnished by the so called game of poker," and the refreshments eaten, drank or smoked by him.

"The 'kitty,' in this case," Mr. Howard alleges, "pulled no chestnuts out of the fire for the defendant's benefit."

It is further denied by Mr. Howard that he has any information sufficient to form a belief that Jacob Mattson is a citizen of the state of Minnesota. He claims that Mattson is a Finlander and that he, in connection with his brother, operated a saloon on Lake avenue fully equipped with gambling devices, contrary to the city ordinances and permitted females to frequent the place on divers occasions. For these alleged violations, Mattson, according to Mr. Howard's proposed answer, has been "haled before the courts, convicted and fined."

To make it a little stronger Mr. Howard alleges that Mattson harbored at his saloon a "capper" by the name of Erick Mattson, by whose seductive wiles unsuspecting Finlanders and others were induced to enter the lair of the plaintiff and were relieved by gambling devices of their hard-earned coin.

Mr. Howard alleges in his proposed answer that on his information and belief that in all the games in which he participated within the times mentioned in the complaint, Mattson won more than he lost, "that Mattson was a sort of hoodoo to most of the gentlemen with whom he played and there came to be a well defined suspicion among the members of the so-called social club that the plaintiff, like 'Ah Sin,' kept an ace up his sleeve."

Mr. Howard denies that he acted as banker of the games alleged to have been played Jan. 11 and 12, when Mattson claims to have won $1,250 in chips. He admits that on or about the dates mentioned Mattson was a winner in a considerable amount but got no money or valuables from any of the players. Howard claims that it was usually his, the defendant's, luck "to win only from those who cannot or do not, pay."

It is alleged further by Mr. Howard that Mattson got $150 for his chips, but no more, because the loser had nothing to pay with, but his 'I. O. U's.'"

Another shot is given Mattson in Mr. Howard's claim that "the plaintiff has, since on or about Jan. 12 been a daily attendant at a room in one of the promient hotels of the city where poker is played for money, and has been a considerable winner and that that plaintiff is one of those kind of players who wants to be in a game where it is 'heads I win, tails you lose,' or when he does loose, squeals like the proverbial stuck pig."

Mr. Howard alleges it to be his belief that in the course of all the games played by Mattson in the club rooms, he, Mattson, was winner of an amount aggregating several thousand dollars in the excess of all the sums lost by him.

Speaking of Mattson's complaint, Mr. Howard says:

"That the cause of the wail set up in this complaint is due to the fact that said plaintiff was not able to separate the other members of the said club from all their coin with neatness and dispatch, but, on the contrary, lost a few 'Suomen Pankki' to the other members of the club."

The proposed answer closes with the request that Mattson take nothing by his alleged cause of action and that he be further stuck for the costs.

DENY MAILING A PIG'S TAIL.

Ohioan and Young Woman Arraigned in Court for the Offense.

Cleveland, March. 1.—Claude Platt of Wellington, Ohio, denied, when arraigned before Federal Commissioner Walther, that he had sent a pig tail through the mail to Miss Jennie Platt, his divorced wife. So did Miss Lucila Underwood, arraigned beside him. Both were held in $1,000 bond until Saturday for examination.

A clerk in the Wellington postoffice testified that Platt drove Miss Underwood in a rig to the postoffice and that the latter purchased a stamp. The clerk who sold Miss Underwood the stamp said he placed the package in Mrs. Platt's mail box.

Mrs. Platt later received a package containing the pig tail, together with certain alleged facetious comments written on note paper. She complained to the postal authorities with the result that her former husband and Miss Underwood were arrested.

Ladies!

We would be pleased to have you call and inspect our exclusive line of Oxfords and Fancy Slippers for spring and summer wear. They are the snappiest that have been shown in Duluth, and something that will be sure to please you.

THOSE WHO HAVE PASSED BEYOND

Chicago, March 1.—Wilhelm Rapp, editor-in-chief of the Illinois Staats Zeitung, and said to be the oldest German editor in the United States, died today from the effects of a street car accident sustained four years ago. Mr. Rapp was born in Wurtemburg in 1828, and had been connected with the Staats Zeitung since 1862. Mr. Rapp leaves one son and two daughters. The son is the husband of the opera singer, Madame Schumann-Heinck.

London, March 1.—Rosina Brandram, who was principal contralto of the Savoy theater, died here today. Miss Brandram created all the more notable contralto parts since Gilbert and Sullivan series after "Iolanthe," and also appeared in many of the curtain-raisers which found a place in the Savoy bills. Miss Brandram remained with the Savoy company up to the time of its final disbandment in 1903.

The winds of March have no terror to the user of De Witt's Carbolized Witch Hazel Salve. It quickly heals chapped and cracked skin. Good, too, for boils and burns, and the best relief for Piles. Sold by all druggists.

AGREEMENT REACHED.

Senator Kittredge Will Not Press Adverse Report Against Elliott.

Washington, March 1.—The South Dakota senators have reached an agreement concerning the nomination of J. D. Elliott to be United States attorney for the District of South Dakota. The nomination was reported adversely from the committee on judiciary, because of opposition from Senator Kittredge, but he has agreed not to press the adverse report to the point of having the nomination rejected in the event assurance is given that President Roosevelt will not give Mr. Elliott a recess appointment after March 4. That assurance has been given.

PARALYZED AT HIS POST.

Electric Car of Dubuque Runs Wild With Motorman Helpless.

Dubuque, Iowa, March 1.—Suddenly stricken with paralysis, Motorman Carl Carter stood powerless at his controller while a heavy car on the Union electric line ran wild through the heart of the business district. The passengers, in a panic at the increasing speed, called the conductor, who stopped the car before any damage was done.

Carter lost control of the car at the top of a grade. When he started to shut off the current he felt a sudden twitching on the right side of his body. In a moment he was unable to move either the motor or brake. The entire right side of Carter's body is affected. He is in a dangerous condition.

The "Universal" Coffee Percolator

KELLEY HDW. CO.

DRAFT WAS WORTHLESS

Axel Stillman Arrested for Getting Money on False Pretenses.

Judge Imposes Heavy Sentence for First Offense Drunkenness.

Axel Stillman is of the opinion that the Duluth police are a remarkably swift organization, and that there is no need of any increase in the number of the officers on the force.

Axel's career in this city was short. He came here from Willow River yesterday afternoon, and about 10 o'clock last evening, it is claimed, tried to pass a sight draft for $25 on Sixtus Lindahl who holds forth in a thirst parlor on the Bowery.

Sixtus wasn't easy, however, and decided that Stillman didn't look like a man who could write sight drafts on the Scandia American bank of Crookston at will, so he refused to take it. He notified the police and about 1 o'clock Stillman was surrounded by some officers. Four of the husky guardians of the peace handed on the startled Stillman almost simultaneously and he went very meekly to the station.

Stillman says that he has an account with the Scandia American bank at Crookston, and that while working at Willow River, where he had been for a month before coming here he had passed a number of the drafts which had been honored by the Crookston bank.

A dispatch to the bank in question denies any knowledge of Stillman and says that the draft is no good.

Stillman will be arraigned this afternoon charged with obtaining money under false pretenses. The amount is small enough to make the offense petty larceny as 1 cent more would have made a grand jury offense of it.

* * *

A $40 fine for drunkenness, first offense, was inflicted by Judge Windom this morning. The culprit was Albert Bernhardt of 1106 West Michigan street, who was arrested on a warrant sworn out by his wife.

Though the warrant only charges drunkenness, Mrs. Bernhardt also accused Mr. Bernhardt of gross infidelity and heartless abuse of herself.

* * *

Upon the non-appearance in court of Mrs. Bechtel who swore out the warrant for his arrest, Andrew Thompson was dismissed yesterday by Judge Windom. Thompson had been charged with trespass by Mrs. Bechtel, but though the warrant was only served yesterday, it was sworn out three months ago, and since that time Mrs. Bechtel has decided not to push the prosecution.

Thompson has been out of town during a great deal of the time since the warrant was sworn out and upon learning on his return that the warrant was waiting for him, appeared at once and requested that it be served.

FEAST OF PURIM IS CELEBRATED

Jewish People of Duluth Hold Services and Festival.

Among the Jewish people of Duluth yesterday was a day of feasting and gift-giving in honor of the deliverance of the Jews by Queen Esther from massacre in ancient Persia as recorded in the scriptural book of the same name. The feast is known as "Purim," and is a memorial rather than a religious festival, its only religious feature being the reading of the book of Esther in all synagogues.

It is recorded in this book that after they had thwarted the plots of Haman for the destruction of their people, Esther and Mordecai decreed that thereafter the fourteenth day of the month of Adar should be a day of feasting, gift and alms giving. Yesterday was Adar 14 as well as Feb. 28, and the ancient decree of Esther was observed generally by Duluth Hebrews.

Tonight services will be held at Temple Emanuel, Seventh avenue east and Second street, at 8 o'clock. The sermon will be "The Festival of Purim—A Tribute to Woman." The general public will be welcomed to the service.

NEW POSTMASTER.

Edward Wassenheiser Appointed for Deerwood, Crow Wing County.

Washington, March 1.—(Special to The Herald.)—Edward A. Wassenheiser has been appointed postmaster at Deerwood, Crow Wing county, vice R. H. Morford, resigned.

SUMMONS IN APPLICATION FOR REGISTRATION OF LAND—

State of Minnesota, County of St. Louis. —ss.

District Court, Eleventh Judicial District.

In the matter of the application of Lewella C. Armstrong to register the title to the following described real estate situated in St. Louis County, Minnesota, namely: Lots numbered Fifteen (15) and Sixteen (16) in Block Ninety-one (91), West Duluth, Sixth Division, according to the plat thereof on file and of record in the office of Register of Deeds for said St. Louis County.

Applicant,

vs.

Asa Smith and Jessie F. Smith, his wife; Alfred Merrit, Mary W. Wallace, Nellie W. Care, Belle Wisdom, B. H. Wisdom and the unknown heirs of Benjamin H. Wisdom, deceased, and all other persons or parties unknown, claiming any right, title, estate, lien or interest in the real estate described in the application herein.

Defendants.

The State of Minnesota to the above named defendants:

You are hereby summoned and required to answer the application of the applicant in the above entitled proceeding and to file your answer to the said application in the office of the Clerk of said Court, in said county, within twenty (20) days after the service of this summons upon you, exclusive of the day of such service, and, if you fail to answer the said application within the time aforesaid, the applicant in this proceeding will apply to the court for the relief demanded therein.

Witness, J. P. Johnson, clerk of said court, and the seal thereof, at Duluth, in said county, this 1st day of March, A. D. 1907.

J. P. JOHNSON, Clerk.

By V. A. DASH, Deputy.

(Seal of District Court, St. Louis County, Minn.)

NATIONAL BISCUIT COMPANY

STONE PILE FOR WIFE DESERTERS

And Drastic Measures to Prevent Divorces Are Proposed.

Toledo, Ohio, March 1.—Judge John F. Kumler, who, since his elevation to the common pleas court in Toledo on Feb. 1, has granted twenty divorces, refused two, reconciled two couples and made a record for heavy alimony imposed, appears as a new champion of marriage and divorce regulation.

He would require thirty days between the application for and issuance of a marriage license and the advertisement of the proposed union in newspapers. He would permit no divorced persons to remarry within five years' time. He believes in heavy alimony as a check on husbands who grow tired of their wives and turn to divorce for relief. He would prevent men shirking the payment of alimony by indicting them for non-support, so as to reach them in case they flew the state.

Wife deserters the judge would punish with rock-breaking sentences at 50 cents a day, 40 cents daily to be given the deserted family. It is likely that the suggestions of Judge Kumler will be put before the legislature.

That's all. 'Nuf said, when you say that Hollister's Rocky Mountain Tea is the greatest family remedy on earth. It does you good going and coming. 35 cents, Tea or Tablets. Ask your druggist.

The "hundred-times-a-day-question"—how to make a little more money, will not down. But, to the store man, advertising in The Herald always figures in the answer.

HOMESICK CAT.

"Footed" It One Hundred Miles to Its Former Owner.

Washington, Penn., March 1.—When Mrs. Alex McBane of Ironton, Ohio, was visiting at the home of Mrs. W. L. Clarke, this city, just before Christmas, she took a great fancy to the family cat, a large Maltese. After Mrs. McBane's return home Mrs. Clarke put the cat in a box and shipped it to her as a Christmas present. It reached its destination, but Mrs. McBane said it was evidently "off its feed," as it did not seem to like its new surroundings.

Three weeks ago she wrote that it had disappeared. Tuesday afternoon the cat limped into the Clarke home, footsore and disheveled, but apparently all right otherwise. It is 100 miles from Ironton to Washington, and the Ohio river intervenes, but the cat managed in some way to cover the distance.

FAIR PLAY.

The American People are Noted for Their Love of Fair Play. So True Is This, That It May Be Said To Be a National Trait of Character.

The man who strikes another a foul blow, or maliciously tries to injure him in his business, or in his social standing is detested and abhorred. The American people are not generally slow to manifest their disapproval of such unfair treatment when an opportunity is afforded.

Illustrative of this disposition is the fact that although base, false and malicious attacks upon Dr. Pierce, of Buffalo, and his widely celebrated Family Medicines have sometimes injured the sale of these meritorious remedies for a time, yet when such unjust assaults have been met and their falsehoods completely refuted, a natural reaction has followed and their sale has been fully restored again.

An the case of the *Ladies' Home Journal*, of Philadelphia, which, in 1904, published a most maliciously false, slanderous and libelous article, attacking Dr. Pierce and his "Favorite Prescription"—the well-known cure for woman's peculiar weaknesses and distressing ailments—Dr. Pierce brought suit in the Supreme Court of the State of New York against the publishers of that paper and a verdict was given the Doctor, the judgment being for a substantial amount ($16,000.00) yet not for enough to properly recompense Dr. Pierce for the great injury and injustice done him. While he and his "Favorite Prescription" were completely vindicated and the latter remedy was proven, in open court, to contain no alcohol and none of the dangerous and injurious drugs which the above mentioned paper had alleged it contained, yet Dr. Pierce has, through his attorneys, moved for a new trial trusting that thereby he may finally be accorded a more just and adequate compensation for the great damage which he was made to suffer by reason of the base falsehoods published concerning him and his business.

There are hundreds of thousands of people all over this blessed country of ours who have been cured of obstinate, chronic diseases through the use of Dr. Pierce's Medicines and it is only natural that such people should rise up and speak their sentiments pretty freely when Dr. Pierce and his medicines are so unjustly attacked.

These grateful patients of Dr. Pierce are to be found in almost every hamlet and country village, and in the farmhouses and mechanics' cottages in every nook and corner of this great country. Common gratitude prompts such people to stand up and defend Dr. Pierce and his medicines against unjust and malicious attacks.

Dr. Pierce's Medicines have been on sale in drug stores all over this country and in many foreign lands for more than forty years and yet their sale continues to grow in a substantial and most gratifying way. This could not be the case if they were not remedies of more than ordinary merit.

WHAT DO THEY CURE?

Dr. Pierce's Favorite Prescription is not advertised as a "Cure All" but admirably fulfills a singleness of purpose, being a superior and most positive remedy for one class of diseases only—those easily recognized weaknesses, derangements, irregularities and painful disorders peculiar to women. It is a powerful, yet gently acting, invigorating, tonic and strengthening nervine. For weak, worn-out, over-worked women—no matter what has caused the break-down,—whether it be from too frequent bearing of children or from much worry, care, or over exertion of any kind, "Favorite Prescription" will be found most efficient in building up the strength, regulating all the womanly functions, banishing pain and bringing about a regular and healthy, vigorous condition of the whole female system. Thus it corrects prolapsus, or falling of womb, retroversion, anteversion and other displacements of the female pelvic organs, due to weakness or over exertion, lifting or fatiguing over-work. In short, it makes weak women strong and sick women well.

As to Dr. Pierce's Golden Medical Discovery it has a very large range of application, yet it is by no means recommended as a "Cure-All." It possesses marvelous alterative, or blood cleansing, properties and is at the same time a most invigorating tonic, or strength giver. It exerts a specific, cleansing, soothing and healing effect upon all the lining mucous membranes of the system; hence, its great curative value in all catarrhal affections, no matter where located.

In Chronic Nasal Catarrh, it is well to cleanse the passages two or three times a day with Dr. Sage's Catarrh Remedy fluid, while persisting in the use of the "Golden Medical Discovery" for its blood cleansing and specific curative effects upon the diseased mucous membranes. It will cure a very large per cent. of all cases, even after they have reached the ulcerative, or chronic stage, and *no matter of how many years' standing they may be.* It is equally efficacious in affections of the mucous lining of the larynx, bronchia and respiratory organs in general, thus curing bronchitis, laryngitis and other affections giving rise to obstinate, hang-on-coughs. It is not so good in acute coughs following sudden colds, as in the lingering, chronic coughs. Nor must the "Golden Medical Discovery" be expected to work miracles. It will not cure consumption in its advanced stages—no medicine will do that, but for all obstinate hang-on-coughs due to laryngal or bronchial irritation and kindred affections, of the throat which, if neglected or badly treated, are likely to lead up to consumption, the "Discovery" can be relied upon to produce the best curative results.

The "Golden Medical Discovery," is, from its tonic and specific curative control over mucous surfaces, especially efficacious in curing indigestion, dyspepsia, weak stomach and "Liver Complaint," or biliousness. Even ulceration of the stomach and bowels has in thousands of cases been cured by it; also obstinate chronic diarrhea.

In addition to all the foregoing, not the least valuable of the marvelously efficacious properties possessed by the "Discovery" is the unequaled regulating and strengthening effect exerted by it over the heart's action. It has made some wonderful cures of very pronounced valvular and other affections of that organ.

The reason why "Golden Medical Discovery" cures so wide a range of diseases is made plain in a booklet sent free on request mailed to Dr. R. V. Pierce, Buffalo, N. Y. If interested, send for it.

The powerful alterative or blood purifying properties possessed by the "Discovery" will naturally suggest its use for the cure of blotches, pimples, eruptions; as eczema, salt-rheum, and other skin affections. In all of which it has made remarkable cures; also in scrofulous sores and old, open ulcers, or eating sores. To heal the latter, use Dr. Pierce's All-Healing Salve as a local application, while taking the "Golden Medical Discovery" to correct the blood and cleanse the system. A box will be mailed to any address on receipt of fifty-four cents in stamps. If your druggist don't have it in stock, address Dr. Pierce, as above.

MENACE TO THE PUBLIC

Pennsylvania Doctors Deprecate the Pretensions of Trained Nurses.

Trying to Form a Dictatorial and Fee-Grabbing Monopoly.

Philadelphia, March 1.—The bill now before the legislature providing for the state registration of nurses and fixing a minimum of $25 a week for their services, has evoked a storm of protest from physicians throughout the commonwealth, who unhesitatingly declare that the average trained nurse is getting to be far more of a dictatorial and fee grabbing nuisance in the sick room than the "ministering angel" as which she is regarded by the general public.

The Pennsylvania State Committee on Nursing, of which Dr. J. Cheston Morris of No. 1514 Spruce street, Fellow of the Philadelphia College of Physicians and member of the American Academy of Medicine, is president, has formulated this protest in a public statement, in which their objections to the proposed law are expressed as follows:

State law for the "registration of nurses" is not only unnecessary, but, as the experience of New York and New Jersey show, is positively harmful. The tendency of such law is to lead the average nurse to assume too much, and not only lessen her usefulness as a nurse but jeopardize the life of the patient.

Instead of such law being, as is claimed by its advocates, a protection to the community, it becomes a positive meanace to the public good. Physicians know that as a general rule hospital trained nurses claim too much. They are often overbearing and dictatorial and require too much attention and waiting upon. Now to pass laws to confer marks of distinction upon them accentuate these qualities and render their presence in the sick room a positive danger.

The nurses in asking for these laws are working against their own best interests, for, if the laws are enacted, it will only be a little while before doctors will refuse to employ such nurses and will turn to those of less pretensions but of greater usefulness.

The spirit of trade and the feverish desire to maintain prices under cover of "protecting the public" cannot be concealed in this wild scramble for state law and recognition.

Twenty-five dollars to $30 per week and higher is the claim. Down with the poor, down with the doctors and down with the patient—anything to maintain and advance prices, and mark that nursing is the best paid occupation now open to women.

Instead of being satisfied with the best there is, we see unrest, jealousy and a selfish zeal on the part of a few nurses for personal recognition and monopoly. Let these nurses offer some practical solution of the problem of furnishing trained nurses for the great body of the people, who cannot afford their present charges, before they ask for the creation of a monopoly.

The movement savors of trusts and trade.

The Northampton County Medical society at its annual meeting in Easton, Pa., Jan. 18, adopted a resolution disapproving of the movement to make nursing a mere trade, and of the fixing of $25 as a minimum charge per week, thus depriving poor people of nursing assistance.

Arguments may be brought forward to justify trades unions in the commercial world, but the most case-hardened and reckless agitator and striker would shrink from trading in the blood and sufferings of humanity.

The comittee also quotes from an address delivered by Dr. George G. Groff professor of anatomy and physiology in Bucknell university, at one of the commencements of the Philadelphia School for Nurses, in which he gave a list of the questions propounded to nurses in a western school to show that a nurse is really expected to be a doctor, and that this idea causes them to usurp the physician's prerogatives in the sick room, often to the detriment of the patient.

The doctor quotes the dictum of Mrs. E. G. Pennell in a recent magazine article in which she says: "To advance the higher evolution of the trained nurse, the domination of the doctor and the man must cease when he leaves the sick room."

"This, then," comments Dr. Goffs, "is the idea: To place helpless patients under the care of two different individuals. Under the doctor while he is present, and under the nurse all the rest of the time. The doctor is to prescribe the medical treatment, but the nurse is to give the medicine if she thinks proper.

"In a trial at Tom's River, N. J., trained nurses testified in court under oath that they threw away the medicine prescribed by the doctor and administered their own. These nurses had been recognized by a so called nurses' law. They had "R. N." after their names. They were following the dictum that "the domination of the doctor and the man must cease when he leaves the sick room." It is claimed that being recognized by state law the same as doctors, they had the right to decide upon the advisability of withholding or administering the doctors' medicine or substituting their own. And this is called evolution! Nay, it is retrogression, a step in the direction of the dark ages."

The committee closes with an appeal to the medical profession throughout the state to ask the members of the legislature "to think a long while before striking a blow at the fireside; to consider whether it is wise to give special distinction to a few nurses in the interest of monopoly, and so to legislate against over 95 per cent of the homes of the state which cannot afford $25 per week when disease and death threaten the loved ones."

CARTER'S LITTLE LIVER PILLS.

CURE

Sick Headache and relieve all the troubles incident to a bilious state of the system, such as Dizziness, Nausea, Drowsiness, Distress after eating, Pain in the Side, &c. While their most remarkable success has been shown in curing

SICK

Headache, yet Carter's Little Liver Pills are equally valuable in Constipation, curing and preventing this annoying complaint, while they also correct all disorders of the stomach, stimulate the liver and regulate the bowels. Even if they only cured

HEAD

Ache they would be almost priceless to those who suffer from this distressing complaint; but fortunately their goodness does not end here, and those who once try them will find these little pills valuable in so many ways that they will not be willing to do without them. But after all sick head

ACHE

Is the bane of so many lives that here is where we make our great boast. Our pills cure it while others do not.

Carter's Little Liver Pills are very small and very easy to take. One or two pills make a dose. They are strictly vegetable and do not gripe or purge, but by their gentle action please all who use them.

CARTER MEDICINE CO., NEW YORK.

Small Pill. Small Dose. Small Price.

ON HUNT FOR THIEVES.

Heir to $1,500,000 Doing His Own Detective Work.

New York, March 1.—Jerome Alexandre, son of James Joseph Alexandre, the late millionaire shipowner, came into an estate worth $1,500,000 yesterday. Also he came into a great responsibility for, as the new master of Nirvana he has set himself to run down single-handed the band of robbers who stole a great safe containing $20,000 in jewels from the beautiful mansion at Stamford, Conn., two years ago.

Alexandre had been waiting for yesterday his twenty-first birthday anniversary, ever since the best detectives in New York and Connecticut failed to find a trace of the band that broke into the Alexandre mansion one night and carried off the 900-pound safe so quietly that not a sleeping soul in the house woke up.

Among the jewels that were taken were the rings his father had given to his mother upon their engagement, on their marriage, on the day that he became owner of the New York, Havana and Mexican Mail Steamship line, and upon the day when he felt death drawing near ten years ago.

Also, there was the ring which young Jerome had intended to give Miss Violet Oakley, a stenographer in the offices of Paul Bonner, his stepfather, in New York. But, as the burglars took this circlet, the couple eloped without it.

The young millionaire, now in full possession of his share of his father's $5,000,000 estate and owner of Nirvana, has been working in his stepfather's office and living at the New Western, Forty-ninth street and Madison avenue. Yesterday he held a celebration at Nirvana, with his wife at his side and 100 cheering employes gathered around. They welcomed the master and mistress to their beautiful home and drank their health. The young master responded with a speech.

ONE GENERAL CAN GET $1,000 FROM FORAKER.

Washington, March 1.—During the senate committee's inquiry into the Brownsville affair, Temple Thornton, formerly a corporal of Company D, of the Twenty-fifth Infantry, estimated that twenty minutes was the shortest time in which a gun could be cleansed if shot only once. He was asked by Senator Foraker if he had ever seen a commissioned officer clean a rifle. The witness had not, and Senator Foraker said:

"We are told that one of our generals can clean a gun in two minutes."

"I'll work for him the rest of my life if he can do it in two minutes, or five minutes, or ten minutes," replied the witness. "If he cleans a gun in ten minutes he breaks the record."

Senator Foraker smiled and said to Senator Scott:

"I give $1,000 to charity if the general I mean can clean a gun in ten minutes. I doubt whether he could clean a gun in an hour."

SAYS THAT STUDENTS DO TOO MUCH DANCING.

Seattle, Wash., March 1.—Unless the gay whirl of society at the University of Washington is checked and the students give more attention to study there will be an absolute restriction of every form of entertainment during the school terms.

This order has been issued by the faculty, and already its displeasure has been shown by condemnation of a comic opera and a minstrel show to have been produced by the students, while the number of optional studies has been reduced and glee club trips prohibited. Dances, too, have been frowned upon and ordered reduced in numbers.

The defection of the Pan-Helenic league, the organization of more secret societies and social organizations, and the refurnishing of the boathouse as a hall for dances have shown a tendency which has assumed an alarming proportion in the estimation of the faculty.

WHEN TURNED OUT, THEY STEAL ENTIRE HOUSE.

New York, March 1.—Until last week the David Mayer Brewing company, of One Hundred and Sixty-eighth street, owned the two-story frame building, with a kitchen attached, at No. 63 Creston avenue, the Bronx. Last week they found a purchaser who offered $4,500.

As the forty foreigners who occupied the house were paying practically no rental, little ceremony was used in dispossessing them. The men vowed vengeance, and on Thursday, Friday and Saturday they descended in a body upon their former home. And, with picks, axes, saws and sledge hammers, tore down the house and carted it away so thoroughly that not ten fair-sized sticks were left.

When the purchaser sent an agent to the Bronx to see if the title covered all the property, the agent found that all there was to which to prove title was a large, deep hole in the ground. David Mayer was sent for, and when he recovered from his amazement he appealed to the police captain, who called out the reserves. Six men were arrested on the charge of grand larceny.

SUFFER FROM HEAT AT TEN BELOW ZERO.

Winnipeg, Man., March 1.—Under date of Jan. 29, mail advices from White Horse, Y. T., say:

"Last Sunday was the coldest day of the winter at this place, the temperature being 70 degs. below zero. Regular services were held at all the churches, but not to minstrel show crowds. At Yukon Crossing the temperature went to 82 degs. below, according to the government thermometer, and nearly an inch of blue snow fell at Tantalne.

"At Minto, twenty miles below Yukon Crossing, ice worms began to chip at midnight Saturday, and many of them attained a growth of several inches by Monday morning, when the temperature rose to 45 deg. below zero, causing them to die from heat and suffocation. Yesterday and today the weather has been warm and sultry, the temperature having risen to 10 degs. below zero. If the temperature rises many degrees the suffering caused by the intense heat will be terrible."

AFTER THE EASY BOSS

Rhode Island Governor Tries to Oust Gen. Charles R. Brayton.

Controlling Influence in Politics Ever Since the Civil War.

Providence, R. I., March 1.—While the remainder of the country takes fleeting interest in the dispatch announcing the fifteenth or the twenty-fifth unsuccessful ballot for United States senator by the Rhode Island general assembly, residents of the state are watching a far more bitter and interesting battle.

This is the struggle between the Democratic governor, James H. Higgins, who, at the age of 30, took possession of the executive chamber last month, and Gen. Charles R. Brayton, Republican boss of the state, the "acknowledged head and chief captain of the Swiss mercenaries of Rhode Island politics," as he was called in a newspaper article twenty-one years ago. Today, when he is 67 and blind, his title still clings to him.

In the opinion of many Rhode Island people, the senatorship is of less importance than the struggle between these two men. Whether the incumbent, George Peabody Wetmore, retains his seat, or whether Samuel Pomeroy Colt, president of the United States Rubber company and the rival Republican candidate, takes his place, or whether it goes to Robert Hale Ives Goddard, representative of the old Rhode Island aristocracy and compromise candidate of the Democrats and Mugwumps, or whether a dark horse slides in on a consolidation of the Republican vote, is to the average Rhode Islander a matter of smaller interest.

What really matters is whether Governor Higgins can carry out his announced ambition to drive Gen. Brayton from the office he has long occupied in the Rhode Island state house. That leads to the important question, "Is the boss losing his grip?"

Ever since the Civil war Gen. Brayton has been the controlling influence in Rhode Island politics. Born at Opponaug, this state, in 1840, of a distinguished Rhode Island family—his grandfather was chief justice of the court of common pleas and later a supreme court judge—he had finished two years of a college course at Brown university when the war broke out and he enlisted.

Starting as a lieutenant of artillery, he was promoted to a captaincy for merit, and later was brevetted brigadier general. At the close of the war he was made postmaster at Milton Head, S. C., refused a captaincy in the regular army, returned North, and in 1874 was made postmaster at Providence.

He held this office until 1880. During the years he held the office he had been exercising to the full his genius for political mangement. From that day to this he has been the dominant political factor in the state.

Three Democrats have sat in the executive chair during that time, but never with a friendly assembly at their backs, and they have been unable to effect reforms.

The last public office of consequence held by Gen. Brayton was that of chief of the state police, created as a tail to a prohibitary law passed in 1886. The office carried a salary of $3,000. Illicit selling flourished while this law was in effect, and eventually Gen. Brayton resigned his office and worked openly, and it may be added successfully, for the defeat of prohibition.

When the new $3,000,000 state house was opened five years ago Gen. Brayton established himself in a chair in the corner of the office allotted to the sheriff of Providence county, and there he has stuck. From this chair he has directed legislation; in it he has given audience to seekers of favor and passed sentences on those who showed signs of independence. It is from this chair that Governor Higgins is now trying to separate the old boss.

In his efforts he has had the support of a Providence newspaper, which assigns a reporter to keep a daily record of Gen. Brayton's life while he occupies his seat in room 207. He has been absent only three or four days since the session began.

Governor Higgins has been as active in the war as his office permits. He appealed to the state house commission to pass an order directing the sheriff to refuse objectionable characters a resting place in his office. To this the commission answered that it did not believe it had the power to say who should be admitted to individual offices at the state house.

The same end was sought by the introduction of a bill in the assembly. It was immediately tabled.

Another bill was offered in the house directing the Jamestown exposition commission to order the executive secretary, George N. Kingsburg, to refrain from associating with Gen. Brayton. The point of this is that during the last three years or so Mr. Kingsbury has attached himself to the general as companion.

This bill also was tabled. Mr. Kingsbury's comment thereon was:

"Ain't that a corker!"

And there the matter stands. Meanwhile the fight for the senatorship goes on, and on its course to date some observers base their belief that for the first time in these many years Gen. Brayton has been unable to deliver the goods. They believe that had he been able he would have wound the thing up, as he expresses it, some time ago.

In appearance Gen. Brayton is a large man, six feet tall or upwards, with a heavy frame and a striking face. His blindness is the result of cataracts and of about four years' standing.

For an absolute boss it cannot be denied that he has been an easy one. His ostensible business is that of attorney at law, and as such he receives retainers from corporations in need of legislation. His rates are understood to be low.

During his regime the state has been and today is prosperous. The new state house, the largest individual state job of recent years, was erected without a suggestion of scandal. There is no suspicion of a general looting of the treasury. Brayton, while removed from want, is not a rich man in the modern acceptance of the term.

HUSK CORN FOR CHURCH.

Kansas Women Shuck Forty Bushels In as Many Minutes.

Topeka, Kas., March 1.—It took twenty-two Reading, Kan., women just forty minutes to shuck forty bushels of corn. They are prominent members of the Methodist Episcopal church.

Henry Jacoby told the women he would give them the corn if they would husk it. They donned sunbonnets and aprons and went to work. When the job was finished the corn was stored in the church belfry and will be sold in one bushel lots at the church fair to highest bidders, for the benefit of the church.

COPPER STOCKS ARE IRREGULAR

Denn-Arizona Has Better Tone—Low Priced Shares Weak.

The copper stock market closed irregular today. North Butte opened at $114, sold off to $113 and closed at $113 bid and $113.50 asked. Amalgamated opened at $110.87½, advanced to $111.12½, declined to $109.62½ and closed at $110.75 bid. Anaconda opened at $293, sold off to $290, rallied to $295.50 and closed at $294.25 bid. Butte Coalition opened at $34.75, rallied to $35 and closed at $35 bid and $35.50 asked. Calumet & Arizona opened ex-dividend at $187, fell off to $185 and closed at $185 bid and $186 asked.

Greene-Cananea opened at $20.50 and $20.25 and closed at $20 bid and $20.50 asked. Cananea Central sold at $32 and $31.50 and closed at $31.87½ bid and $32.12½ asked. Greene Consolidated opened at $30.25, sold off to $29 and closed at $29.87½ bid and $30 asked.

Denn-Arizona and Denn mining stock had a better tone. Denn-Arizona sold at the opening at $50, advanced to $55 and closed at $54 bid and $55 asked. Denn mining stock sold at $15 and $14 and closed at $15 bid.

Globe Consolidated sold at $16.75 and $16.50 and closed at $16.50 bid. National sold at $1.25 and closed at $1.25 bid. Copper Queen of Idaho was traded in at $1.50 and closed at $1.50 bid and $1.75 asked and Cliff at $4 and closed at $3.75 bid and $4 asked.

Superior & Pittsburg was inactive and closed at $25.75 bid, Keweenaw at $16.50 bid and $17 asked, Hancock at $13 bid and $13.50 asked, Carman at $5.50 bid, and Calumet & Montana at $2.50 asked. Calumet & Sonora sold at $28 and closed at $28 bid. Black Mountain was inactive and closed at $7.12½ bid.

Wire trouble resulted in few quotations at the broker's offices.

CHANGES MADE IN THE SHIP SUBSIDY BILL.

Washington, March 1.—By a vote of 129 to 111 the line from the Pacific coast via Hawaii and the Samoa Islands to Australia was stricken from the ship subsidy bill. An amendment offered by Mr. Fordney of Michigan reducing the subsidy for a mail service from the Atlantic coast to Buenos Ayres from $400,000 to $266,666, was defeated by a vote of 114 to 140.

TO MAKE IT SQUARE.

Los Angeles Times: Edwin Markham, the author of "The Man With the Hoe," is a bitter opponent of child labor. Discussing the effort that he is making toward the reform of child labor laws, Mr. Markham said recently:

"I would abolish, too, the contemptibly unjust system of fines. What right has an employer to fine a hand an hour's pay for five minutes's lateness? What right has he, because the hand has damaged some goods, 2 cents's worth, to fine him a dime?"

Mr. Markham after a moment's pause, smiled.

"I wish to goodness," he said, "that every victim of the despicable fine system had the same story to tell as an actor I heard of yesterday.

"This actor worked under a manager who was a great finer. For a bad makeup, for lateness, for noise in the wings, for a hundred things, the players were nilked from a quarter to $2. The worst of all the fines was one of 10 cents for failure to return 'properties,' for this was a duty that every one continually forgot.

"In a financial drama one night the supply of stage money ran out, and the manager loaned an actor eight or nine dollars in real bills to use in the next scene.

"The manager said sternly to the actor the following Saturday:

"'By the way, Booth, you haven't returned that 19 I gave you in act three Monday night.'

"'Never mind,' said the actor. 'Just fine me a dime.'"

THE UNEXPECTED.

Detroit Free Press: A magazine editor was talking about W. W. Jacobs, the famous humorist.

"I went abroad this summer," he said, "to try and get Mr. Jacobs to write for me; but I found that he had all he could do for six or seven years to come.

"He is a quiet, modest chap. When I praised his wonderful skill in the writing of short stories, he said that it was only their surprises that made his stories take.

"Then, to illustrate what he meant, he told me a story wherein the surprises came fast and furious.

"He said that a lawyer, defending a man accused of housbreaking, spoke like this:

"'Your honor, I submit that my client did not break into the house at all. He found the parlor window open and merely inserted his right arm and removed a few trifling articles. Now, my client's arm is not himself, and I fail to see how you can punish the whole individual for an offense committed by only one of his limbs.

"'That argument,' said the judge, 'is very well put. Following it logically, I sentence the defendant's arm to one year's imprisonment. He can accompany it or not, as he chooses.'

"The defendant smiled and with his lawyer's assistance unscrewed his cork arm, and, leaving it in the dock, walked out.'"

IS IN FAVOR OF OWNERS

Supreme Court Hands Down Decision in Chambers Case.

Old Railroad Right of Way Reverts to Owners.

The state supreme court today handed down a decision affirming the order of the lower court in favor of Mrs. Emily Chambers of Fond du Lac, Minn., in the condemnation proceedings instituted by the Great Northern Power company to acquire for its use a strip of ground formerly used for the operation of a railroad.

The land in question was the right-of-way of the old Lake Superior & Mississippi Railway company, which ran along the bank of the St. Louis river, above Fond du Lac, and which was abandoned for railroad purposes several years ago. The power company claimed that the railway company had not abandoned its right-of-way by the removal of its tracks, and sought to secure the strip of land for its own purposes.

Mrs. Chambers and other owners of abutting property claimed that the abandonment was completed and that the land in the right-of-way reverted to the owners of the abutting property.

The supreme court holds as follows:

"The title acquired to lands in condemnation proceedings for right of way purposes by the Lake Superior & Mississippi Railway company, under its charter, chapter 3, laws of 1857, and amendments, was in the nature of an easement or terminable fee, and the lands revert to the original owner when abandoned by the railway company for the purpose acquired, viz: the maintenance and operation of a railroad.

"Under a charter which authorizes a railway company to acquire by condemnation proceedings a strip of land 200 feet in width over private property for a right of way for the purpose of operating a railroad thereon, the company abandons the right of way by failing to operate trains thereon for a period of ten years and by removing the track and bridges, and by constructing and operating a new line to accomplish the same purposes.

"The trial court was justified in holding that the nonremoval of certain state abutments, the right to maintain telegraph and telephone poles, were not sufficient to establish an intention to abandon the right of way for the purpose of maintaining and operating a railroad. Order affirmed."

Say, Mr. Businessman!

If you have any use for a young man, who is experienced in general merchandise, who can handle your trade among three nationalities, who is capable to work in your warehouse as well as in your office, who is strictly temperate and sober, but who is not willing to work for nothing, please address, before March 15th, Z. 21, Herald.

THE DOG WAS "WISE."

New York Sun: Into the car came a woman carrying a dog that was just about as big as a pound of butter. The dog began to bark as soon as the woman sat down. He distributed his greetings indiscriminately at first, but presently he singled out the man opposite for special attention and barked at him constantly and viciously. The woman said: "There, there, Sport," and "Now, dear," and "Please do be still," but all her adjurations made no impression.

"It is no use to talk to him," the woman finally explained to the woman sitting beside her. "I can't stop him. He always barks just that way at any man who tries to ogle me. It is embarrassing, but I haven't the heart to scold him for it. He means all right. Sport is little, but he is brainy and you can't fool him. He is the best protector I ever had. No man need try to flirt with me when Sport is around without everybody finding out what he is up to."

The woman spoke in a loud voice. People stopped talking just then, even the cars stopped running, and everybody heard what she had to say. The man opposite heard. His embarrassment was deep hued. He went out to the rear platform and studied the fronts of the buildings on the east side of Broadway, and every other man in the car screened his face with a newspaper lest Sport should become suspicious of him and bark again.

DULUTH TO HAVE CLERK

New Office for Railway Mail Service to be Created July 1.

Rivers and Harbors Committee to Visit Duluth Next September.

FROM THE HERALD WASHINGTON BUREAU.

Washington, March 1.—(Special to The Herald.)—Representative Bede was today advised by the second assistant postmaster general that the request made by Postmaster Eaton for the creation of the office of chief clerk of the railway mail service at the Duluth postoffice would be granted. This new office cannot, however, be created until the beginning of the next fiscal year, July 1, because at present there is no appropriation available to pay such an official.

Morris Schendling of Virginia, Minn., left Washington for home yesterday, having spent several days in Washington. During his visit here he was taken by Representative Bede to the White House, and was introduced to President Roosevelt. He also called upon Secretary Straus, at the department of commerce and labor, and besides met the senators and members from Minnesota and other prominent men in Washington official life.

S. L. Perrin of Superior, who has been in Washington several weeks watching the river and harbor legislation in so far as it affected Superior harbor, left for home today.

Representative Bede said today that it has been arranged that the committee on rivers and harbors will visit Duluth, probably some time in September. The members of the committee are greatly interested in Duluth-Superior harbor improvements and desire, after having heard so much expert testimony from experts of the engineer corps of the army, to look the situation over for themselves. The visit should argue well for most favorable action on behalf of the committee for the Duluth harbor at the next session.

EASTERN ROAD WANTS SLADE

General Superintendent of Great Northern May Go East.

St. Paul, March 1.—(Special to The Herald.)—For several days rumors have been in circulation in railroad circles here that George T. Slade, general superintendent of the Great Northern railroad had tendered his resignation to accept the position of general manager of the Wheeling & Lake Erie railroad. Mr. Slade has been in Chicago for a week or more, atending a meeting of railroad men and the rumor cannot be confirmed here. Louis Hill, vice president of the Great Northern railroad, stated to the Associated Press that it was true so far as he had been able to learn that Mr. Slade had received an offer from one of the Eastern railroads, but that it was not from the Erie. He said that Mr. Slade had not yet tendered his resignation and he thought that the Great Northern had the first claim on Mr. Slade's services, but he added, "if the Eastern road outbids us in salary or in title we may lose him. At present we do not think we will lose him."

Mr. Slade is a son-in-law of President J. J. Hill of the Great Northern.

Weather Forecast: Snow and colder tonight with lowest temperatures from zero to 10 degs. above. Saturday partly cloudy. Brisk northerly winds.

POSTWOMAN'S 100,000 MILES ON FOOT.

London Tribune: An extraordinary instance of the arduous work done at some of the remote branches of the postoffice service is reported from Newnham, near Baldock, Herts, where Mrs. Clark, at the age of 66, still fulfils the duties of postmistress and "postwoman."

For twenty years she did most of the outside work of the office, while her sister was postmistress, and during the last fifteen years she has walked 52,000 miles in delivering letters. In the whole thirty-five years she has traveled about 100,000 miles on foot. With a large postbag strapped across her shoulders and wearing a little cloth cap and heavy boots she trudges regularly on her rounds in spite of rain or storm or snow.

Mrs. Clark began her association with the postoffice at the age of 14 and has thus been in the service for fifty-two years. Her ordinary daily round is eleven miles, and her work, particularly at Christmas time, often makes it necessary for her to plod along the lonely country roads by night. She knows every inch of the district, and she even despises the use of lanterns, and she even despises neighbors carry when abroad in the darkness.

STAGS BESIEGE A CHURCH.

The church at Hilwarthshausen, Germany, is in a state of siege from herds of deer that live in the surrounding hills. The owner of the surrounding lands has let them multiply unmolested, so that they have become fearless.

It has become a common occurence for them to stroll into the church in ones and twos while services are being held, and they have even shown a disinclination to be driven out. One Sunday recently the pastor remained for a short time in the church after thecongregation had left. When he came out he found himself confronted with seven full grown stags with branching antlers.

When he attempted to pass them they closed in on him in a semi-circle and corralled him on the church steps. When he raised his stick and tried to shoo them away they began prodding at hi mwith their antlers, tearing his gown and bruising him. Unable to drive them off he was forced to retreat into the church and wait until some of the vallagers came to his rescue.

THE RIGHT SYMPTOM.

Senator Burrows of Michigan is given credit for the following story:

On one occasion when Mr. Burrows was running for office, he was called upon to address a crowd of farmers who only the day before had listened to a stump speech from Mr. Burrows' opponent.

"Of course," remarked the senator with a smile, "it would be very unbecoming in me to say anything about my friend who was here yesterday, but you all know what an eloquent speaker he is, and what an extremely loud voice he possesses. It reminds me of a couple of girls I heard talking in Kalamazoo the other day, the conversation running thus:

"'Well, Martha, how is your husband today?'

"'Poorly, miss, quite poorly. He's got another dose o' 'at ere exclamatory rheumatism.'

"'You mean 'inflammatory' rheumatism, Martha. "Exclamatory' means to cry out.'

"'Dat's it, mum, dat's is prezactly. He don't do nothin' 'cept holler.'"

HOUSE BUILT BY BLIND MEN.

Worked on Pitch Dark Nights as Well as Daylight.

Two totally blind men have built a house for themselves at Berkeley, Cal., doing all the carpenter work themselves without any assistance whatever.

It was a coincidence that both these men were named Joseph—Joseph Brown and Joseph Martinez. The house, according to Popular Mechanics, is of the popular bungalow type, one and one-half stories high and constructed entirely of wood. It is eighteen feet wide by twenty-five feet long.

As the builders are sightless the work necessarily progressed slowly. From early morning until frequently long after sunset the two men toiled patiently at their task. The shades of night did not hinder the work for noonday and midnight are equally dark to them and out of the blackness came the song of the saw and the blows of the hammer to passersby, who heard, but saw no workmen.

From day to day the work has been curiously watched by crowds, including many carpenters. The general work is pronounced as good as that performed by many builders who are blessed with perfect eyesight.

Brown and Martinez were not blind from their birth, but were deprived of their sight many years ago. They were door to door peddlers for many years and managed in the course of time to accumulate snug sums of money that were wisely deposited in bank. At the time of the great fire in San Francisco these men lost everything save their little bank accounts.

Recently they pooled their holdings, purchased a small lot in Berkeley and some lumber. They then set to work resolutely and have built themselve a house.

GREAT MEN'S FOOD.

Winston Churchill, when he has an important piece of writing before him, eats very little meat and cuts his allowance of tobacco in half. He finds that this regime gives unusual clarity to his mind.

David Belasco drinks an occasional cup of black coffee while at work. The noted playwright has been known to toil steadily at his desk for twenty hours at a stretch, taking nothing but strong coffee—a large cup every second or third hour.

Conan Doyle finds that he does his best work in the late afternoon, after having drunk copiously of Russian tea.

Booth Tarkington, when at work, rises at 5 o'clock in the morning, drinks a little cocoa, and writes till 9. Nearly all his best passages have been written at sun rise.

Richard Harding Davis, strange to say, has a great fondness for mince pie, and in the midst of his work will will send downstairs for a quarter section every hour or two.

WISE WOMEN USE WHITE LOAF BAKING POWDER

Because it is PURE, WHOLESOME AND ECONOMICAL.

CURIOUS DISHES.

Chicago Chronicle: "A couple of lax sandwiches, if you please."

"We don't keep 'em, sir."

"Ah, don't you? A cromasey, then."

"Sorry, but we don't carry cromascles."

"Then give me bubble and squeak."

The waitress, with a sour smile, shook her head.

"Toad in the hole?"

"No sir."

Red with rage, the man clapped on his hat and left the eating house.

"He is an English emigrant," the waitress said. "Lots of English emigrants come here, and they are always asking for the queerest dishes—bubble and squeak, lax sandwiches, toad in the hole, cromascles. It would pay us to serve them these dishes, and we'd do so, only we don't know what they are."

DAKOTA'S IMMENSITY.

Providence Journal: Sir Thomas Lipton, at a dinner in Chicago, praised America's bigness.

"I once heard," he said, "a Dakotan talk about the big farms they had out there.

"'We have some sizable farms,' he said, thoughtfully. 'Yes, sir; pretty sizable. I've seen a man on one of our big farms start out in the spring and plow a straight furrow till fall. Then he turned around and harvested back.'

"'Wonderful,' said I.

"'On our Dakota farms,' he went on, 'it's the usual thing to send young married couples out to milk the cows. Their children bring home the milk.'

"'Wonderful,' I repeated.

"'Once,' he said, 'I saw a Dakota farmer's family prostrated with grief. The women were weeping, the dogs were barking, the children were squalling and the tears streamed down the man's face as he got into his twenty-mule team and drove off.'

"'Where was he goins?' said I.

"'He was going half way across the farm to feed the pigs,' said the Dakotan.

"'Did he ever get back?' I asked.

"'It ain't time for him yet,' was the reply."

WHEAT HAS WEAK TONE

Bullish News Causes Prices to Go Down in America.

Flax Closes Lower After Quiet Session in Duluth Market.

Duluth Board of Trade, March 1.—Wheat was easier in all of the American markets today. All of the news was bullish. Receipts in the Northwest were larger than for the same time last year and the stocks at Minneapolis have increased. Liverpool closed ½d to ¼d lower, Berlin ⅝c higher and Budapest ¼c lower.

The Modern Miller says: "Reports have been received from milling correspondents located in the principal winter wheat producing states in reply to inquiries as to whether the crop has been damaged and to what extent and the cause of the damage. The only established damage of any extent is in Texas, where the green bug, or the oats louse has destroyed most of the crop. As the bug is still in the wheat field outlook in that state is for almost a total loss.

"The important statement comes from Indian Territory that the green bug has made its appearance there, showing that the pest is moving northward. Elsewhere damage unimportant or uncertain. Most complaints come from Michigan, Ohio and Indiana. Winter killing is reported where plant was unprotected during severe cold weather. Thawing and freezing and submerged lowlands are causes given for damage. Late sown wheat is most affected.

"Many correspondents speak of the brown appearance of the plant, but say it will take growing weather to reveal the condition of the crop. If the root is not injured and spring conditions are favorable, a satisfactory outcome is expected. Reports from Kansas, Nebraska and Oklahoma are almost uniformly favorable. Damage, if any, is light and prospects are said to have never been better at this season of the year."

The May option closed ¾c lower in Duluth and Kansas City, ⅞c in Chicago and Minneapolis, ⅝c in New York, ½-⅝c in St. Louis and ⅜c in Winnipeg. The July option closed ⅝c lower in Duluth and Winnipeg, ¾c in Chicago, New York and Kansas City, ⅜-¾c in St. Louis and ⅜c in New York.

May corn closed ¼-⅜c lower in Chicago and was ½d higher in Liverpool. May oats closed unchanged in Chicago.

Car receipts at Duluth were 116 against 45 last year, and at Minneapolis 471 against 250 last year, making a total for the Northwest of 587 against 295 last year. Chicago received 21 against 7 last year. Winnipeg received 74 against 127 last year.

Primary receipts of wheat were 763,000 bus, last year 372,000 bus. Shipments 255,000 bus, last year 194,000 bus. Clearances of wheat and flour aggregated 364,000 bus.

Argentine shipments of wheat were 3,456,000 bus.

Primary receipts of corn were 629,000 bus, last year 540,000 bus. Shipments 564,000 bus, last year 451,000 bus. Clearances of corn were 439,000 bus.

Argentine shipments of corn were 73,000 bus.

Wheat was active in the Duluth market. May wheat opened ¼c lower at 80c, advanced to 80⅛c by 9:45 and declined by the close to 79⅜c, a loss of ⅜c from yesterday. July wheat opened ½c lower at 80⅛, advanced to 80⅝c and declined by the close to 80⅛c, a loss of ⅝c from yesterday. September wheat was inactive and closed ⅜c lower at 78c.

Durum wheat was ¼c lower and cash spring wheat was selling at the May price. It is estimated that the stock of wheat in store in Duluth will increase 625,000 bus., this week.

Flax was quiet. May flax opened ⅛c higher at $1.22¾, declined to $1.21⅝ and closed at $1.21¾, a loss of ⅜c from yesterday. July flax opened unchanged at $1.22⅝ and closed at $1.22⅝, a loss of ⅜c from yesterday. October flax opened unchanged at $1.18½ and closed at that price. It is estimated that the stock of flax in store at Duluth will increase 140,000 bushels this week.

The coarse grains were unchanged.

Following were the closing prices:

THE CHICAGO MARKET.

Wheat Opens Weak With Pit Traders as Active Sellers.

Chicago, March 1.—The wheat market opened weak today with pit traders and longs active sellers. The depressing influences were liberal receipts in the Northwest and a large increase in stocks of wheat at Minneapolis. May wheat opened ⅛c to ¼c lower at 77⅜c to 77½c, and sold down to 77¼c. Minneapolis, Duluth and Chicago reported receipts of 608 cars against a holiday last week and 302 cars one year ago.

The market continued to grow weak on increasing northwestern receipts and reports that the crop in the Northwest is in excellent condition. The low point for May was 76¾c. The close was weak, with May off ⅞c at 76¾c.

The corn market was very dull and prices were easier more in sympathy with wheat than because of any news directly affecting the corn market. May corn opened a shade higher at 47⅝c and sold at 47⅜@47½c. Local receipts were 344 cars with none of contract grade.

Prices were easy until the close. The low point for May was 47⅜c. The close was easy with May ¼c lower at 47⅛@47⅜c.

The oats market was firm. Trading was very quiet and there was no early news strongly affecting prices. May oats opened ⅛@¼c higher at 42⅜c and sold at 42⅛@42¼c. Local receipts were 123 cars.

The provisions market was quiet and prices were steady. The market was a trifle soft immediately after the opening because of a 5c decline in the price of live hogs. Later prices became steady on a fair demand by packers. May pork opened 5c lower at $16.50. Lard was down 2½c at $9.72½. Ribs were 5c lower at $9.02½.

Close: Wheat, May, 76¾c; July, 77¼c. Corn, May, 47⅛@47⅜c; July, 46¼c. Oats, May, 42⅛@42¼c; July, 37⅝@37⅞c. Pork, May, $16.35; July, $16.47½. Lard, May, $9.62½; July, $9.62½. Ribs, May, $8.92½@8.95; July, $9.05. Rye, cash, 67c. Barley, cash, 57@65c. Flax, clover and timothy, nothing doing. Cash wheat, No. 2 red, 75½c; No. 3 red, 73@75c; No. 2 hard, 74@77c; No. 3 hard, 66@75½c; No. 1 northern, 83@86½c; No. 2 northern, 80@85c; No. 3 spring, 76@82c. Corn, No. 2, nothing doing; No. 3, 42¾@43¼c. Oats, No. 2, 41½c; No. 3, 41¼c.

Grain Gossip.

Logan & Bryan to Paine, Webber & Co.: Wheat appears to have lost all its friends. There was no more disposition to buy around low point today than there was at best point Monday. What little help the bull side had from reasonably small Argentine shipments and a firm Liverpool cable was quickly lost when Minneapolis showed receipts of 471 cars and Duluth 116. New York houses repeated the story of durum wheat stocks exhausted to meet foreign demands and Canadian mills claim to have sold all their flour output to the far East and are making no contracts with United Kingdom or the continent. The Modern Miller seems bearish at first glance, but there is a big "if" in regard to the brown wheat plant over Ohio, Indiana and Illinois. It certainly looks a little critical. It is an oversold market, but acts like dead weight for the present.

Corn—There was no selling of corn by the recognized bull houses. The soft weather is certainly a bull feature.

lars, 53½c. Government bonds, steady; railroad bonds, heavy.

Copper Gossip.

Boston to Paine, Webber & Co.: The action of Franklin and Atlantic certainly justified our advice of last night, both stocks opening strong, but sold off immediately. All the rest of the stocks on the list held strong all day, with no special feature. The declaration of a $10 dividend by Wolverine is considered a disappointment. We see nothing at present to bull the market on, and would take profits on all strong spots. There is a revival of interest in Raven, and it is rumored that the company will acquire valuable ground from the Amalgamated so that they can get entrance to their mine.

• • •

Boston to Gay & Sturgis: We understand that Calumet & Hecla has again entered the market and has sold copper this week at 26 cents a pound. Heretofore this price has been obtained only for small lots of lake copper for prompt shipment.

Lake producers report a good demand for their product and some sales have been consummated, although they have disposed of but little above 25½ cents a pound.

Three or four of the lectrolytic producers, who have been out of the market for some months, are expected to open their books to regular customers within the next ten days for commitments through May at 25¾ cents a pound.

There is again a large inquiry for April, May and June delivery from European buyers, and some of the leading producers report that at 25⅛ cents for Electrolytic for three months they could make large sales if they could spare the copper.

European consumers have been out of the market as buyers lately and if this means that they are about to enter the market again, it is of considerable importance.

Midway Horse Market.

Minnesota Transfer, St. Paul, March 1. —Barrett & Zimmerman's report: Market continues good. There is an unusual demand for good fancy drivers and saddlers, which indicates that the automobile craze is not affecting the horse-loving public. Dealers hope that the present heavy snow will not hinder the present heavy movement of horses. Dealers have received a number of choice consignments during the day.

BILL FOR PERMANENT TAX COMMISSION

(Continued from page 1.)

no grain whatever and but two to six pounds of dust per car. A joint committee from both houses will draft an answer to the resolution from the North Dakota legislature criticising Minnesota grain methods, and it may be a hot one.

• • •

Representative Dalzell offered three bills this morning affecting sleeping car companies. One prohibits them from charging for an upper berth more than 75 per cent of the rate for a lower; another requires sleeping car companies, as well as railroads to furnish safes for rkeeping the valuable of passengers; and the third prohibits anybody from tipping employes of sleeping car companies, railroads and street car lines.

• • •

The house binding twine committee reported a new bill providing for the sale of binding twine outside the state to meet the harvester trust, also that dealers may charge an advance of 1½ cents above cost when twine is sold on time. Now they are only allowed a margin of 1 cent. Representative Spooner wanted the bill passed under suspension of the rules but Representative Dalzell said that, while he favored the bill, he was going to vote for no more bills until he knew what they were about. He was going to vote his own judgment, and not that of another, and as a substitute for Spooner's motion the bill was placed at the head of general orders for consideration Tuesday.

• • •

The following bills were offered: Representative Brady, providing that no wages shall be subject to garnishment unless they were earned in the state and the debt contracted in the state; Representative Timberlake, providing that the eyes and ears of all public school pupils shall be examined and parents notified if there is anything wrong; Representative Spencer, requiring all road taxes to be paid in cash; Representative Saari, requiring registers of deeds to record instruments relating to the selection of public lands by railroads, also relating to condemnation proceedings and easements; Senator Putnam, allowing the state to receive bequests and gifts; Senator Farrington, punishing use of deception, false advertisements or force in procuring men to work in any department of labor in the state; Senator Sundberg, making the governor a member of the state forestry board; passed under suspension of rules; Senator Vall, allowing extension of an additional year's time to cut timber on state permits when proof is given that the parties could not get their timber out within the life of the permit; Senator Schaller, allowing employes to sue employers' liability companies directly for personal injury damages; Senator Cashman, allowing cities to appoint inspectors of gas, electric light, heat and water meters. Senate adjourned to Monday evening at 8, and the house to Monday evening at 7:30.

STILLMAN H. BINGHAM.

IN PRAISE OF SAVORY BACON.

What could have been better than our supper, cooked in the open air and eaten by the fire-light. True, we had no plates—they had been forgotten—but we never mourned for them. We made a shift to get along with the tops of some emptied tin cans and the cover of a kettle, and from these rude platters (quite as serviceable as the porcelain or Limoges or Sevres), we consumed our toast, and our boiled potatoes with butter, and our trout prudently brought from Horseshoe lake, and, best of all, our bacon.

Do you remember what Charles Lamb says about roast pig? How he falls into an ecstacy of laudation, spelling the very name with small capitals, as if the lower case were too mean for such a delicacy, and breaking away from the cheap encomiums of the vulgar tongue to hail it in sonorous Latin as princeps obsoniorum! There is some truth in his compliments, no doubt; but they are wasteful, excessive, imprudent. For if all this praise is to be lavished on plain, fresh, immature, roast pig, what adjectives shall we find to do justice to that riper, richer, more subtle and sustaining viand, broiled bacon? On roast pig a man cannot work; often he cannot sleep, if he has partaken of it immoderately. But bacon "brings to its sweetness no satiety." It strengthens the arm while it satisfies the palate. Crisp, juicy, savory; delicately salt as the breeze that blows from the sea; faintly pungent as the blue smoke of incense wafted from a clean wood fire; aromatic, appetizing, nourishing, a stimulant to the hunger which it appeases, 'tis the matured bloom and consummation of the mild little pig, spared by foresight for a nobler fate than juvenile roasting, and brought by art and man's device to a perfection surpassing nature. All the problems of the woodland cookery are best solved by the baconian method. And when we say of one escaping great disaster that he has "saved his bacon," we say that the physical basis and the quintessential comfort of his life are still untouched and secure. —Henry van Dyke, in Scribners.

Of course, a store ad. may be a "pulling" one, but if it is not placed in The Herald, before enough of the right kind of people, "what's the use?"

A chance to save some money on something you are compelled to buy is news—don't you think?

STOCKS ARE IRREGULAR

But There Was a Substantial Recovery From Early Losses.

The Pressure Seemed to Lose Force on the Decline.

New York, March 1.—Stocks came under pressure at the beginning of business in the stock market. Declines were generally small and there was a mixture of gains, mostly in the industrials. Missouri Pacific fell 1¼, Reading 1⅛, Great Northern preferred 1 and Canadian Pacific and Rock Island preferred ¾. Central Leather preferred rose nearly a point.

Animated dealings on rising prices in the copper stocks imparted to the firmness in the general list, and there was a rise after the opening in which earlier losses were practically made up. A subsequent attack on Union Pacific and Reading, which depressed them 1 and 1¾ points respectively, induced renewed selling in other quarters, and the market fell back to the opening level. Western stocks generally were weaker than the average. Northern Pacific fell 1⅛ and Northwestern 1½. During the progress of the buying movement Amaconda was lifted 2½, Tennessee Coal and Iron 2, Consolidated Gas 2¼, Minneapolis, St. Paul & Sault Ste. Marie 4⅜, the preferred 1, Wabash preferred 1¾ and Republic Steel preferred 1.

Prices fell to a new low level, the weakness of Reading being of large sentiment. The stock fell 3½, Great Northern preferred and Northern Pacific 2½, Northwestern 3, Anaconda 4, Union Pacific 2, Canadian Pacific, Rock Island preferred, Chesapeake & Ohio and Delaware & Hudson 1½, and the majority of other most active stocks a point or more. Bonds were heavy.

Operations on the short side of the market were successful in making further inroads of prices, but the stocks that bore the brunt of the morning selling did not yield much more. New factors in the situation were felt, and Southern Pacific, which gave way 2¼, was more liberally offered, Louisville & Nashville losing 1½. Shortly before 1 o'clock there was a general rally, reaching about a point in St. Paul, Reading, Union Pacific and Smelting, Colorado & Southern first preferred sagged 2¾ and American Ice Securities 5.

The rally which began at the close of the previous hour continued until the day's losses had been completely restored or reduced to small fractions. Business was about on the same scale on the advance as on the early decline.

The market closed irregular and dull. The recovery extended further in spite of the rise in call money rates and the prospects of a poor bank statement tomorrow. Reading rose a substantial fraction over last night, the second preferred and Wisconsin Central preferred 2, Anaconda 1⅜, Virginia Carolina Chemical, 1½, United States Realty and Pacific Mail and a number of active leaders a small fraction. Lackawanna sold at a decline of 5 points. Reading reacted a point with some effect on the general list.

Quotations furnished by Wisconsin Grain & Stock company, St. Louis Hotel building:

The total sales were 1,132,900 shares.

Stock Gossip.

Logan & Bryan to Paine, Webber & Co.: Market is closing in good shape, showing a substantial recovery from its early dip. Pressure seemed to lose force on the decline and traders were quick to note the strong undertone and buying demand placed just under the market. As we said yesterday, a further rally is not unreasonable. The bears have been badly whipsawed today. The short interest is still largely extended.

• • •

Walker Bros. to Paine, Webber & Co.: There is a considerable short interest in the market, especially in Reading, which causes market to move rapidly upward. We see no signs of a permanent upturn to the market, as at present no apparent buying power has developed outside of short covering.

The Cotton Market.

New York, March 1.—The cotton market opened steady at an advance of 2 to 8 points and during the middle of the morning was steady at a net advance of about 5 to 8 points on the active months.

Cotton, spot closed steady; middling uplands, $11.25; middling gulf, $11.50; sales, 14,814 bales. Futures closed steady. Closing bids: March, $9.62; April, $9.70; May, 9.87; June, $9.82; July, $9.86; August, $9.89; September, $9.90; October, $10.10; December, $10.17; January, $10.30.

Chicago Live Stock.

Chicago, March 1.—Cattle—Etimated receipts, 1,500; market, steady; beeves, $4.15@6.85; cows and heifers, $1.60@5.25; stockers and feeders, $2.55@4.85; Texans, $2.75@4.75; calves, $6.00@7.50. Hogs—Estimated receipts, 24,000; market, steady; mixed and butchers, $6.80@7.02½; good heavy, $6.97½@7.05; rough heavy, $6.80@6.90; light, $6.80@7.00; pigs, $6.15@6.75; bulk of sales, $6.92½@7.00. Sheep—Estimated receipts, 800; market, strong; sheep, $3.50@6.00; lambs, $5.50@7.55.

New York Money.

New York, March 1.—Close: Money on call, strong, 5¼@6 per cent; ruling rates, 6 per cent; closing bid, 5½ per cent; offered at 6 per cent. Time loans, slightly firmer; sixty days, 5¾ per cent; ninety days, 5¼@5¾ per cent. Prime mercantile paper, 5¾@6 per cent. Sterling exchange, easier, with actual business in bankers' bills at $4.84.00@4.84.05 for demand, and at $4.80.35@4.80.40 for sixty-day bills; posted rates, $4.81¼ and $4.85½; commercial bills, $4.80¼@¾. MANSFIELD COPPER!

Do you know that the demand for COPPER exceeds the supply? That the demand for COPPER is constantly growing? That the greatest fortunes of today are being made in COPPER investments? That COPPER Stocks are safe and sure? That of the seven largest dividend-paying mines in America today, six are COPPER mines? That in proportion to capital invested, the COPPER mines of America paid greater dividends last year than any large business enterprise—with the exception of Standard Oil?

THOS. W. LAWSON	H. H. ROGERS	SENATOR CLARK	JOHN D. ROCKEFELLER	CECIL RHODES	MARSHALL FIELD
Says: "Copper stocks offer the biggest opportunity for money-making in the world today."	Says: "Lawson, we have verified your conclusions as to the value of Copper stocks as an investment."	Says nothing but draws dividends at the rate of over $46,000 per week from one Copper mine, the United Verde.	Puts millions into Amalgamated and other Copper stocks, and is now said to be the richest man in the world.	the Mining King, said: "It is not an uncommon thing for a good mining stock to pay its holders a thousand for every dollar they invested."	the Merchant Prince, paid a few hundred dollars for a block of mining stock, and later received $600,000 for his interest in the mine.

THE WORLD'S GREATEST FINANCIERS HAVE SEEN THE POSSIBILITIES OF COPPER; THEY ARE POURING THEIR MILLIONS INTO COPPER STOCKS; THEY ARE PILING UP THEIR DOLLARS MOUNTAIN HIGH WITH DIVIDENDS FROM COPPER MINES; GOLD AND SILVER NO LONGER INTEREST THEM—FOR COPPER IS KING! THE MANSFIELD MINE IS YOUR OPPORTUNITY TO SECURE AN INTEREST IN COPPER AND TO SHARE IN ITS IMMENSE DIVIDENDS.

From Experts Who Have Examined the Property.

The following are extracts from reports recently received and now on file. The full correspondence will be shown to anyone interested. This testimony comes from men of reputation and standing, who would certainly under no circumstances allow the use of their names for the endorsement of any questionable project.

Mr. P. J. McIntyre, a mining engineer of thirty years' experience, and thoroughly familiar with the best properties in the West, says: "A man who buys stock in the Mansfield Company at less than the par value of its shares is making an investment for himself such as he is rarely given opportunity to make. No expert or mining man of any knowledge or standing can examine your property and fail to make a similar report."

Mr. Thomas Hughes, Consulting Mining Engineer of Tucson, Arizona, says: "The work has been well done and reflects great credit on the management. My faith in the richness of the ore bodies in the Mansfield Gulch is greater than ever before, after my last visit (January 14th, 1907). The Mansfield Copper Mine is in the center of the great Copper zone, passing through Southern Arizona from the Southwest to Northwest. All that is necessary to make the Mansfield a good paying mine is a little time and good judgment in your future development work."

Mr. S. B. Bailey of Nogales, Ariz., a practical mining man of many years' experience, and widely and favorably known throughout Southeastern Arizona, says: "You have one of the best and largest silver-copper propositions in the Southwest, and I fully believe that in the very near future the fact will be evidenced by the production of ore in large paying quantities. In Mr. Richmond and his foremen you have secured a set of ideal and capable mining men."

Mr. A. B. Richmond, E. M., recognized as one of the ablest mining engineers in the Southwest, says: "I am convinced from personal observation and from numerous assays that your property will prove beyond a doubt the very center of the best camp in the whole Southwestern section of the United States."

Mr. Con O'Keefe, mining engineer and expert, and County Treasurer of Santa Cruz County, Arizona, says: "I am thoroughly familiar with the property owned by your Company. The same identical conditions exist as in the Butte Mines in Anaconda, Montana. You will get ore by the millions of tons in the ground now owned by your Company."

Mr. E. C. Stickney, M. E., of Phoenix, Ariz., one of the oldest and best known mining engineers and experts in the West, and a man of forty years' practical mining experience, says: "The Mansfield has as good claims as I have seen to put money in. The foundation is laid to produce untold wealth, providing they raise the cash necessary for development."

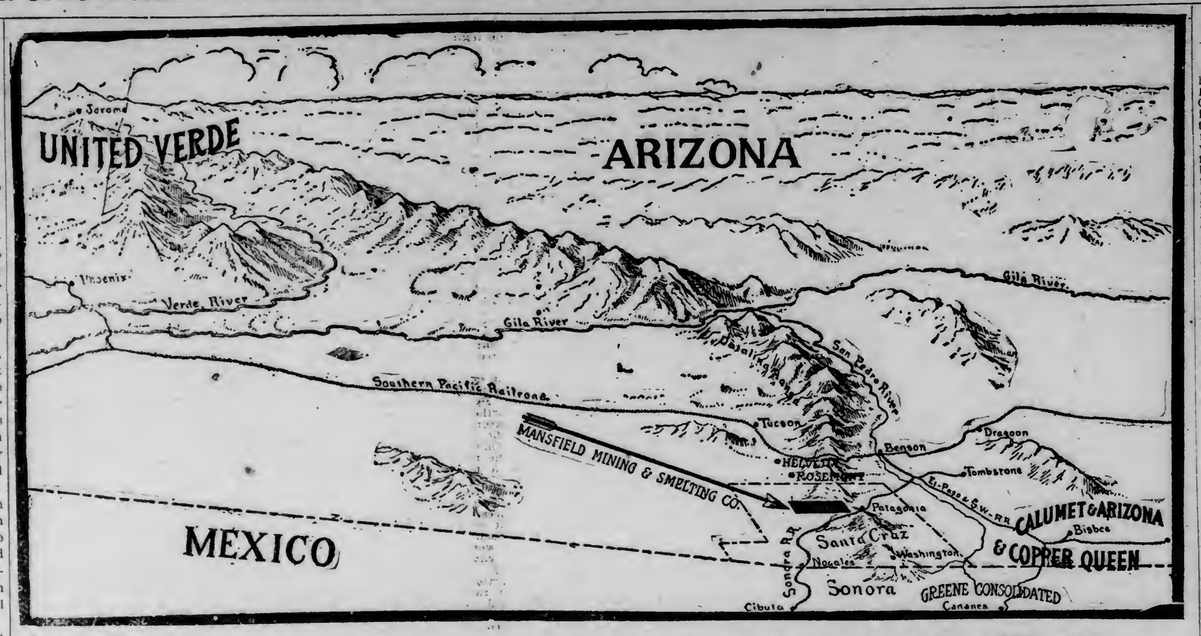
Mr. A. G. Porter of Steubenville, Ohio, says: "I am just returning from the Mansfield after a stay of nearly a month, and will state that to the best of my ability I made an examination of the property in the interest of my friends and neighbors who sent me, and for the purpose of judging the safety and value of their investments. My judgment in the matter is that the Mansfield is a thoroughly meritorious property and will develop into one of the greatest Copper mine of the Southwest. In proof of my belief and judgment in this matter, I am increasing my personal holdings to the limit of my ability to buy."

The "United States Investor" of Boston, in its issue of December 29, says: "Under the care and management of the gentlemen named, this enterprise is in good hands, and the work laid out for prosecution will be well and thoroughly performed."

The "Daily Mining Record" of Denver says: "Reports from practical engineers and other experts state that the Mansfield group is in the very center of what will become one of the richest camps in the Southwestern part of the United States."

Visit the Mansfield Property at Our Expense.

The Mansfield Company will gladly pay the expense of a trip to the property to any investor contemplating the purchase of $1,000 worth of stock or more. All those who have accepted this offer are now enthusiastic stockholders; and the same will be true of you, if you will visit the property in person.



Mansfield Located in the Richest Copper Belt in the World.

The Mansfield property is located in the famous Arizona-Sonora Copper Belt, Santa Cruz County, Arizona, eight miles from Patagonia, on the Sonora Railway. The property comprises twenty full claims, or 400 acres. The croppings of the veins where they are cut by gulches vary in width from twelve to FORTY feet, showing high assays, and so deposited as to require the minimum of expense in production of the refined product. Experts state that these surface outcrops indicate enormous bodies of Copper Ore, increasing with depth, and that the mineral veins of this region all converge toward the Mansfield. In the small area embraced within a circle of sixty miles radius from the Mansfield are located a larger number of smelters and great producing Copper mines than in any equal area in the world. The Aho Mine, the Anaconda-Arizona, the Calumet and Arizona, the Copper Queen, the Greene Consolidated, the Mowery, the Tombstone Consolidated—these and other great Copper producers have made fortunes for thousands of stockholders, besides placing Santa Cruz County in the front rank as a rich and profitable mining region.

In view of these facts, and the amazing record of all the great mines of the district, there is abundant ground for the expectation that the Mansfield will soon be known and named among the best of the great Copper producers which are now adding their millions to the world's wealth.

MANSFIELD COPPER.

Its Wonderful Richness Absolutely Demonstrated By Assays.

The assays from the ore of the Mansfield property furnish the most conclusive evidence that in these claims we have the making of one of the world's great Copper Mines. The assays prove the presence of amazingly rich Copper ores, with high values in gold and silver; while the surface indications with each new step in the progress of development work furnish additional evidence that these great veins reach down and enlarge to enormous proportions with increasing richness beneath the surface.

The following assay certificate represents the wonderful richness of Mansfield Copper, Gold and Silver.

J. H. MORELAND, MINING ENGINEER.
Mine Examinations and Reports.
14 West Missouri Avenue, Kansas City, Mo.
Aug. 3d, 1906.

CERTIFICATE of ASSAY for
Mr. R. E. Bruner, Pres.,
Mansfield Mining and Smelting Company.

Sample No.	Gold oz. per ton	Silver oz. per ton	Copper per cent	Value per ton
1	0.10	51.6	15.4	$90.98
2	0.06	23.2	8.2	45.80
4	0.04	32.1	7.7	49.38
5	trace	5.7	4.4	19.54
6	0.12	42.4	17.7	93.68
7	0.10	38.8	19.4	96.93
9	0.06	28.8	11.5	61.32

These figures may be regarded as absolutely reliable, coming as they do from the Official Government Assayer for the United States Custom House, at Kansas City. The original certificate shows other samples running as high as 20 per cent and over, but these of course are much higher than the average, and have therefore been omitted.

Many of the world's greatest Copper mines have made the bulk of their profits from low-grade ores, often averaging as low as 3 per cent. The Butte district has paid over $100,000,000 in dividends by mining 4 per cent Copper.

DEVELOPMENT AND ORE PRODUCTION AT THE MANSFIELD MINE.

The Mansfield mine is no longer a prospect—the production stage has now been reached and the ore is being raised and laid upon the dumps. Development is well advanced in every direction. Cuts or openings have been made on every claim; wagon roads and buildings are being constructed with all the speed that three shifts of expert miners can command.

One of these shafts is down over 100 feet, is massively timbered, and is equipped with hoist, head frame and 60-horsepower boiler. At the 150-foot level the first cross-cut has been driven, penetrating the immense 6,500-foot true fissure vein which traverses the Mansfield property. This cross-cut is working in good ore, which is now being raised, and unlimited quantities will soon be blocked out and ready to be mined. Cross-cuts will be driven at each 100-foot level below the first in such a way as to penetrate the same great vein. A second shaft is also going down rapidly and its equipment is now ready to be installed.

The Company now has in view the purchase of a 640-acre tract located 2½ miles from Patagonia on the Sonora branch of the Southern Pacific Railway. On this will be installed a 500-ton smelter and 500-ton concentrator, to be connected with the mine by an aerial tramway operated largely by gravity. The cost of hauling, freight, and labor will thus be reduced to the minimum. On the same tract a townsite is to be laid out, with an extensive line of stores, miners' quarters, boarding houses, etc., all of which will soon be a source of large revenues and enormous profits to the Company and its stockholders.

In view of these facts, it is evident that the investor is now offered an opportunity standing entirely outside of the prospect class and based upon an already assured success.

FINANCIAL BACKING OF THE MANSFIELD NOW ASSURED.

The Mansfield now numbers upon its lists over three thousand stockholders, many of them large and successful investors holding many thousands of shares of stock after the most searching investigation of its merits. The funds thus far secured for development purposes now amount to about $350,000, thus fully assuring the success of the enterprise from a financial standpoint. The present limited allotment of shares is being rapidly taken up and is likely to be oversubscribed within a very few days. Were it not for the possibility of a much larger and quicker success by means of still larger funds than already secured, not another share would be offered for sale at any price.

WHY WE LOOK FOR BIG DIVIDENDS.

We look for big dividends from the Mansfield for precisely the same reason that we expect to see the Greene Consolidated or any other proven property pay big dividends for years to come.

Basing our calculations simply upon facts and figures—the enormous deposits of high-grade Copper-Silver ore which have been proven beyond a doubt to underlie our great property, low cost of production and the large margin of profit per ton, together with the additional profits to be realized from the company's stores, rentals of miners' cottages, etc., we feel fully justified in looking for large dividends at a very early date.

COPPER MINING

The Most Profitable of All Industries.

The world's millionaires are taking their huge fortunes from Copper mines. Rockefeller, Rogers, Schwab, Heinze, Senator Clark, and scores of others have invested in Copper—because they are absolutely certain of its value—and now the people are following their lead. Thousands everywhere are drawing lucrative dividends from Copper mines. Millions of dollars are being distributed. Here are a few figures—they tell the story and show the huge earning power of only a few of the leading Copper mines, which distributed the sums named among their stockholders during 1906:

Amalgamated	$10,716,153
Boston & Montana	7,200,000
Calumet & Hecla	7,000,000
Anaconda	4,050,000
United Copper Company	3,150,000
Calumet & Arizona	2,600,000
United Verde	2,475,000
Greene Consolidated	1,881,200
Arizona	1,656,385
Utah Consolidated	1,500,000
Wolverine	1,500,000
Quincy	1,375,000

This list might be added to indefinitely. The stockholders of these companies are numbered by the tens of thousands. Are you one of the fortunate shareholders? Have you considered the SAFETY, the PERMANENCY and the ENORMOUS PROFITS of an investment in a young and vigorous Copper mine of proven value with its career before it?

PROFITS IN COPPER STOCKS.

Not only do Copper stocks yield their owners steady and lucrative dividends, but they also show a constant appreciation in value. This is due to well-recognized conditions in the industrial world, which are bound to continue for years to come. There can be little question but that there is now impending a general investment and speculative movement in Copper mining securities which will exceed anything ever heretofore seen. This movement is likely to enrich thousands—tens of thousands of people; but only those who have the foresight to invest now will receive the full benefit of this great speculative advance. The supply of Copper is lagging far behind the demand—the producing mines have contracted for the sale of every available pound for months and months ahead, and as their profits and dividends increase, the price of their shares is bound to move upward. This is but the record of the past repeating itself in the present.

$100 invested in Greene Consolidated increased to $4,000.

$100 invested in Republic increased to $4,000.

$100 invested in Wolverine increased to $5,800.

$100 invested in Copper Queen increased to $8,000.

$100 invested in United Verde increased to $20,000.

$100 invested in Calumet & Hecla increased to $50,000.

Experts declare that the Mansfield shows every promise of ranking with the best of these great properties. Its stock is already moving rapidly towards par. Can you afford to let this great opportunity pass?

ARIZONA LEADS THE WORLD IN THE RICHNESS OF COPPER DEPOSITS.

So rapid has been the progress of the copper production in Arizona during the past few years that it is now the very richest and the second largest producer in the world.

The Mansfield Mine is located in the very heart of the Southern Arizona Copper fields. From this district comes the world's richest production of high-grade Copper. Arizona has surpassed Michigan as a copper-producing state, and is rapidly drawing ahead of Montana. The average percentage in copper ores in Michigan is less than 2 per cent, in Montana less than 3 per cent, but in Arizona the average exceeds 6 per cent. In Santa Cruz County are being opened up what are destined to be the world's greatest copper properties, and no section of the country is attracting more attention from investors than this wonderfully rich section of the banner copper state.

Mansfield Stock Now Only 30c a Share---Par Value $1.00.

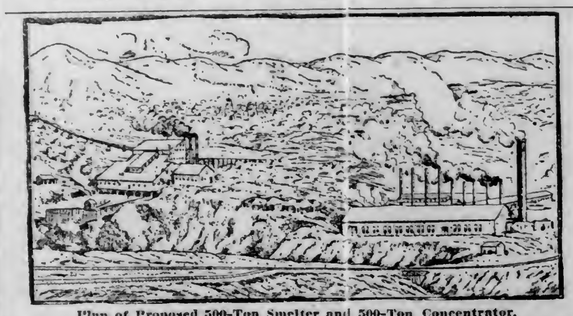
Development work is now going on so rapidly that the present price of 30 cents per share is entirely too low to represent its real value. In the very near future it is safe to say that Mansfield stock will be recognized as a splendid investment at any price under par. This stock is bound to advance, and those who are wise will secure it now while the opportunity is still open at the ground-floor price. When the price is 75 cents or $1 a share this stock will be in greater demand than ever; but those who secure it now will make that profit themselves instead of paying it to others.

This Stock Positively Will Be Withdrawn From the Market on March 25th.

Resolution adopted at the meeting of Board of Directors of Mansfield Mining and Smelting Company, February 22nd, 1907:

"In view of the fact that in the opinion of the Board of Directors sufficient money will be derived from the sales of stock now offered at thirty cents per share, together with what has been derived from stock already sold, to place the property in such shape that it will be producing a revenue, and thereby obviate the necessity of selling more treasury stock, therefore be it resolved, that on March 25th, 1907, all treasury stock of the Mansfield Mining and Smelting Company shall be withdrawn from the market."

I hereby certify that the above is a true copy of resolution adopted by Board of Directors of Mansfield Mining and Smelting Company, February 22nd, 1907. (Signed) A. C. SWEET, Secretary.



Plan of Proposed 500-Ton Smelter and 500-Ton Concentrator.

Our Smelter and Concentrator are to be located upon the Sonora Branch of the Southern Pacific Railway, six miles from the mine. The aerial tramway for carrying the ores to the smelter will be operated largely by gravity. By concentrating our own ores, freight charges will be reduced ten-fold.

SAFETY, PERMANENCY, PROFIT.

The tremendous earning power of the Copper industry furnishes new surprises each passing month. The business of supplying the civilized nations of the world with Copper is the most profitable of all industries.

During 1906 the dividends paid by the Copper mines of the United States amounted to over $500,000,000. This princely sum is being scattered all over the country; and those who have had the wisdom to invest in a good Copper Stock require no argument to prove to them that Copper is a safe and money-making industry of enormous earning power.

All Moneys Used For Development.

Under oath, the officers of the Mansfield Mining and Smelting Company have pledged themselves that no salaries are to be paid any officer or director of this company, except to the General Manager, until such time as the mine is on a dividend-paying basis. No part of any revenue derived by the company from the sale of Treasury Stock is to be used for any other purpose than for the development or extension of the Company.

How to Size Up a Mining Investment.

Mining is a safe and legitimate industry, and when conducted on business principles it is the most profitable of all industries. The money lost by investors in mining stocks might usually be saved by means of a little investigation—the sort of inquiry that any sane man would make before putting his money into any other kind of enterprise.

The requisites of a successful mining enterprise are six:

1. Ore; 2. Transportation facilities; 3. Water; 4. Timber; 5. Honest and Capable Management; 6. Money for Development Work.

If these conditions are all present, it follows that the enterprise will succeed. These conditions can be ascertained by investigation, and the successful investors are those who make searching inquiry and satisfy themselves on all these matters.

Investigate the Mansfield on every one of these points; and the more thoroughly you investigate the more fully you will become convinced that we have all the essential requirements for the making of a great and enduring Copper mine—one that will stand in the front rank of the famous producers.

Not One Cent of Debt.

We own, without one penny of indebtedness, bonded or otherwise, 400 acres of mineral ground, rich in COPPER-silver ore, where every proper judicious development has proven a winner. If you get in with us now and purchase a considerable block of stock, we firmly believe it will make you independent for life. "We are mine makers, not stock jobbers."

You Can Buy Stock For Cash or Payments.

By our special payment plan of 10 per cent down and 10 per cent monthly, investors are enabled to secure a large reservation and have the satisfaction of seeing it perhaps double or treble in value even before their payments are completed. This affords all the speculative advantage of a large investment without the attendant risk.

Stock Now Only 30 Cents a Share—Par Value $1.00.

$ 3 down and	$ 3 monthly for 9 months	buys	100 shares, par value $ 100.
$ 9 down and	$ 9 monthly for 9 months	buys	300 shares, par value $ 300.
$ 15 down and	$ 15 monthly for 9 months	buys	500 shares, par value $ 500.
$ 45 down and	$ 45 monthly for 9 months	buys	1500 shares, par value $1500.
$120 down and	$120 monthly for 9 months	buys	4000 shares, par value $4000.

Stock fully paid and non-assessable. Certificates issued at any time upon request for amount of stock paid for, even if payments are discontinued.

As price advances, your whole reservation receives the benefit, though you will continue payments at the present price of 30 cents per share.

MY PERSONAL GUARANTEE TO INVESTORS

To prove my faith in the Mansfield, I make the following offer: I will forfeit $1,000 to any individual who will prove a single misstatement in this advertisement concerning the management of the Mansfield Company or the property they represent. I will even do more than this. Send me your order and first remittance of 10 per cent at once, subject to withdrawal within 30 days, if your investigation fails to satisfy you in every particular. Then visit the property or investigate it in any way you wish. I will, moreover, personally guarantee to sell your holdings for you if for any reason at the end of a year you desire to sell, for I am convinced that Mansfield stock is going up, and that it will soon command many times its present price. As to my personal responsibility, I refer by special permission to the Bankers' Trust Co., Kansas City, Mo.

As this allotment is likely to be largely oversubscribed, I cannot too strongly urge every reader of this paper to act AT ONCE.

Address all communications and make all remittances payable to

RAYMOND P. MAY, Fiscal Agent,

Mansfield Mining and Smelting Co.

Suite 710 Century Building. KANSAS CITY, MO.

OFFICERS OF THE MANSFIELD COPPER COMPANY ARE MINING EXPERTS AND SUCCESSFUL BUSINESS MEN.

The officers of this Company are men of integrity and business ability. As executive business men and mining experts, they are particularly qualified to handle this proposition to the best possible advantage, and the stockholders are assured of the most conservative and conscientious management. Ask any banking institution in Kansas City for an expression regarding their standing as business men; ask any commercial agency for a detailed report on any or all of our officers. They are men who value their reputation above everything else, and are more than willing for the investing public to obtain all information possible.

OFFICERS.

STEEL PLANT WILL BE IN DULUTH, W. J. OLCOTT SAYS TO THE TAX COMMITTEE

Not Mere Pig Iron Factory But for Finished Product.

Policy of Expansion Will be Pursued by Steel Company.

Reasons Why Tonnage Tax on Mines Would be Unjust.

(From a Staff Correspondent.)

St. Paul, March 2.—(Special to The Herald.)—The hearing of the special joint committee to investigate the taxation of iron mines, yesterday afternoon, brought out some very interesting facts and arguments.

The principal witness was W. J. Olcott, vice president of the Oliver Iron Mining company, who gave the committee a large line of information about the costs and methods of mining in Minnesota, and who explained more in detail the project of establishing a steel manufacturing plant at Duluth.

He condemned the tonnage tax idea, though voicing the willingness of the iron interests to stand any reasonable increase in taxation.

He especially condemned the plan

DEATH AT CASS LAKE

Of Miss Gertrude Yates, a Popular High School Teacher.

Cass Lake, Minn., March 2.—(Special to The Herald.)—Miss Gertrude Yates, one of Cass Lake's most prominent and valuable school teachers, passed away at 10 o'clock yesterday morning.

Miss Yates was taken to her bed about four weeks ago after a hemorhage attack and since then her condition grew more serious until all hopes were given up for her recovery.

The deceased, who was 27 years of age, has for the past two years been a valuable member of the Cass Lake high school faculty. She is survived by her father and mother, both residents of Cass Lake, and a brother in Idaho. The remains were taken to Mankota for interment this morning.

UNDERTAKER GIVES LIFE.

Prick of Embalming Needle Restores Child, Thought Dead.

Norristown, Pa., March 2.—Given up for dead and left in the hands of an undertaker by the sorrowing parents, the first prick of the embalming needle revealed that life still remained in the apparently dead body of one of the two twin children of Mr. and Mrs. Nicholas Persigne of Landsdale. The undertaker hurriedly began efforts at resuscitation, and soon was rewarded by seeing the child's eyes open. He informed the grief stricken parents of what had happened, a doctor's services were secured and the child was restored to consciousness. Then the crepe, already on the door, was removed and the house of mourning was transformed into a place of rejoicing. The child is now apparently on the road to recovery.

BAD STORM IN SOUTH

Mississippi and Louisiana Experience Very Severe Weather.

Torrential Rains and Cyclonic Winds Do Great Damage.

New Orleans, March 2.—Southern Mississippi and Louisiana have for two days experienced the worst storm of the winter, the disturbance manifesting itself in torrential rains, electric displays and cyclonic winds. At least one death was caused by the storm in Mississippi and thousands of dollars' worth of damage has been done.

Philadelphia, Miss., reports a tornado which damaged small buildings. At Meredian, Miss., more than five inches of rain fell, making Souwashe creek a river half mile wide. At McNeil, Miss., many bridges were washed away and in the vicinity of Laurel planting has been temporally suspended.

Of the railroads, the Mobile, Jackson & Kansas City appears to have suffered worst, having nine washouts. In Louisiana, creeks and bayous are overflowed, while the Mississippi river levee already soft from the exceptionally high river, have received a dangerous soaking. Today with colder weather the storm has abated.

STEAMSHIP IS WRECKED

The Corona Strikes on Jetty Off Eureka, Cal.

Passengers Are Taken Off But Boat is Total Loss.

Eureka, Cal., March 2.—The steamer Corona, Capt. Boyd, considered to be the best boat in the Pacific Coast Steamship company's service, between this city and San Francisco, lies straddling the north jetty on the Humboldt bar, a hopeless wreck. The boat, with nearly 100 passengers aboard, struck at 10:10 o'clock yesterday, as Capt. Boyd was attempting, in the teeth of a stinging wind and a terrific bar flood, to drive her into port.

The passengers rushed into the social hall. Women were hysterical and men were palsied with fear, but reassuring words from the crew and some of the passengers brought calm. Thereafter, the passengers assembled upon the hurricane deck, where they remained until the rescue work was undertaken this afternoon.

Soon after the ship struck, a boat in charge of Quartermaster Gunn was lowered. It contained three of the crew and three steerage passengers. This boat capsized at once in the boiling surf and Herricksen, a Swede, was drowned.

Gunn and the others succeeded in reaching shore, the life saving crew, under Capt. Hennig, having gone to their assistance. A second boat was put off. Badly battered and leaking like a sieve, this boat reached shore. Meanwhile T. F. Sothern, night saloon watchman, formerly a marine in the United States navy, stripped to the waist and attempted to carry a line ashore. The line parted, before he had gone far and he was picked up by the life savers. Several attempts were made to shoot a line aboard, but each time the line fell far short. Finally the life savers made a gallant struggle, reaching the side of the Corona and picking up the line. It was not until 4:50 that Capt. Hennig and his men worked effectively. The passengers were brought to this city. Nearly all had been drenched and some were suffering greatly from the cold, exposure and nervous shocks.

TILLMAN WANTS ALL THE PAPERS

Pertaining to the Bid of Oliver for Building Canal.

Washington, March 2.—Senator Tillman introduced today a resolution, calling upon the president for all the papers relating to the recent stuation of the question of having the Panama canal built by contract and in support of the resolution, said that Mr. Oliver had compiled with all the requirements and that his bid had been rejected after a delay of a month or more. He expressed dissatisfaction with the course of the canal management and said that his suspicion led him to believe that the intention had been to compel Mr. Oliver "to let in some of the competitors who were too greedy on the first bid."

TERRIFIC COLLISION

Between Two Trains Smashes Locomotives Like Egg Shells.

Four Killed and a Score Are Injured More or Less.

Waterbury, Conn., March 2.—With an impact of sufficient force to crush the ponderous locomotives together like paper, twist and bend them and topple them from the track down an embankment and into a ditch beside the track, two passenger trains, a regular and a special met in a head-on collision early today on the Naugatuck division of the New York, Haven & Hartford railroad at Platt's Mills, about a mile and a half below this city, resulting in the death of four men, and the serious wounding of two more, and the lesser injuries of over a score of others. The dead were the crews of the two engines. The special was made up of an engine and one coach in which were a party of about sixty-five members of Company F, Second regiment, Connecticut national guard, knows as the Grays, and Governor Woodruff and members of his staff. The governor escaped injury. They had been in attendance at a ban-

(Continued on page 11, first column.)

CITY MAY SEIZE WATER SYSTEM

San Francisco Would Secure Plant Without Court Proceedings.

San Francisco, March 2. — The city, through the board of supervisors, will at once take steps to secure, without proceedings, the entire plant of the Spring Valley Water company. City Attorney William F. Burke yesterday forwarded to the supervisors an opinion in which he stated that it was the duty of the board to immediately seize the water system. Acting Mayor Gallagher says that the board of supervisors will at once grant the city attorney full authority and provide him with all the necessary funds to inaugurate without delay, whatever proceedings he, as the city's legal representative, may deem proper to be taken in the matter. Burke states that no procedure of court is necessary to complete the forfeiture of the plant, but he is not prepared to say whether the police force will be used in taking possession of the water system. Not only will the Spring Valley company's property in the county of San Francisco be seized, but its holdings in every county where the plant extends will be confiscated.

HARRIMAN CRITICISES THE UNFAIR METHODS OF THE ADMINISTRATION

CHANCELLOR VON BUELOW, Who Is Endeavoring to Form a Government Majority in the Reichstag Without the Aid of the Clerical Centrists

Reform Agitation Shows Animosity Against Successful Men.

Co-operation Instead of Antagonism Would Bring Results.

Believes Spirit of "Fair Play" Will Prevail in Time.

Washington, March 2.—E. H. Harriman, who is in Washington for a few days, accompanied by his family, in discussing the recent investigation by the interstate commerce commission in New York, today said:

"There was not a single point brought out in the inquiry. It was simply a rehash of matter that was given the animosity that exists today against men and corporations that have made a success. The interstate commerce commission could produce far better results if the members would try to cooperate with the business interests of the country instead of antagonizing them. In view of the unfair methods of the administration, as carried out by the interstate commerce commission, there is no incentive for a man to be successful, but I am sure that in the end the American spirit of 'fair play' will prevail. That is more to the purpose than a 'square deal.' We may have a 'square deal' but no unfair play. There seems to be a tendency among all unsuccessful people to assail those who are successful.

"All the so called charges made at the recent hearing in New York are fully covered in the application in October, 1900, for listin the Chicago & Alton railway securities in the New York stock exchange and every point brought out by the interstate commerce commissioners the other day were given publicity at that time."

President Harriman also pointed out that the Chicago & Alton listing circular issued in 1900 referred to the payment of the 30 per cent dividend upon the preferred stock and common stock. "When this point was brought out at the New York hearing," he said, "the interstate commerce commissioners thought they were developing facts when, as a matter of fact, the whole thing is ancient history."

PANIC IN TROLLEY CAR.

New York, March 2.—Six persons were injured, two seriously, yesterday in a rush to escape from a Brooklyn trolley car when the motor box blew out and set fire to the rear platform. The passengers fought to escape the burning car and when the front door, the only means of exit became choked, many persons sprang through the heavy glass windows. Some of them were badly cut and bruised.

BREACH IS WIDENING

Between the French Government and Catholic Party.

Practically Certain That a Long Contest is Ahead.

Berlin, March 2.—The first week's debate in the new reichstag widened the breach between the government and the Catholic party, with the result that it is tolerably certain that a long contest is ahead. Chancellor Von Buelow is endeavoring to form a government majority in the reichstag without the aid of the Clerical Centrists, who are determined to embarrass the government in order to reassert their former paramount position and thus compel the chancellor to form a working arrangement with

(Continued on page 11, second column.)

DEMOCRATIC SENATORS PROPOSE TO TALK SHIP SUBSIDY BILL TO DEATH

MRS. MARY BAKER EDDY, Head of the Christian Scientists. Her Relatives Charge That Her Associates Have Taken Unfair Advantage of Her and Ask for the Appointment of a Receiver.

Understanding is Reached After a Conference of Leaders.

Senator Carmack Will Take an Active Part in Movement.

Minority Think They Can Easily Defeat House Measure.

Washington, March 2.—What practically amounts to an agreement to "talk the ship subsidy bill to death," was reached by Democratic senators today. The understanding was the result of a conference on the floor of the senate between the leaders of the minority and Representative John Sharp Williams and Representative Swagar Sherley, leaders of the minority in the house, who were opposed to the passage of the measure by the house yesterday.

Senator Carmack is one of the senators disposed to take an active part in a movement to prevent the senate accepting the amendments to the bill made by the house. When the senate convened today, he moved about among his colleagues looking for support in a stand he proposed to take against the measure. Evidently he received great encouragement, for he announced a little later: "The senate will not concur in the amendments if I can get one or two men to help me, and I think I have them now." He was asked if he intended to speak at length against the measure. He replied that if it became necessary he was inclined to take up quite a little of the senate's time. The statement was accompanied with a confident smile that indicated that he had little doubt of the result.

The chairman of the Democratic senatorial caucus, Mr. Blackburn, gave notice to the Republican leaders that the Democrats would not permit the ship subsidy bill to pass the senate before adjournment. Speaking of the matter afterward he said that if necessary, the Democratic senators would talk until the gavel should fall at 12 o'clock Monday.

UNLAWFUL DIVERSION

Of Mrs. Eddy's Property by Associates is Alleged

In Suit Brought by Her Relatives Asking Receiver.

Concord, N. H., March 2.—Developments regarding the bill in equity to secure an accounting of the financial affairs of Mrs. Mary Baker Eddy, head of the Christian Science organization, which was filed in the Merrimac county superior court yesterday, are awaited with great interest today. Leaders of the Christian Scientists apparently were surprised at the bill, which was filed by George W. Glover of Lead, S. D., only son of Mrs. Eddy by her first husband; Miss Mary Baker Glover, Mr. Glover's daughter, and George W. Baker of Bangor, Me., Mrs. Eddy's nephew. The defendants named are Calvin A. Frye, Irving C. Tomlinson, Herman S. Hering and Lewis C. Strang of this city; Alfred Furlow, Ira O. Knapp, William B. Johnson and Joseph Armstrong of Boston; Edward A. Kimball of Chicago and Stephen A. Chace of Fall River, Mass., all of whom hold positions as directors or trustees in the Christian Science church.

The petition affirms that Mrs. Eddy is incapacitated, through infirmities incident to old age, to "manage her

(Continued on page 11, first column.)

SENATOR FRYE SAYS DAM TWICE

Staid Old Member From Maine Startles His Colleagues.

Washington, March 2.—Senator Frye of Maine startled the senate today. He was on his feet making a report from his committee on commerce on several minor bills, a duty he performs frequently, and which as a rule attracts little interest or attention. Suddenly raising his voice, Mr. Frye exclaimed: "If I can get immediate consideration for that dam bill, I will promise the senate not to report another dam bill." Amid laughter, the bill was passed and a dam will be built across certain shoals in the Savannah river.

WINNIPEG BROKER RAIDED.

George W. Wood and Five Employes Placed Under Arrest.

Winnipeg, March 2.—In a raid by the local police on the offices of the Canadian Stock & Grain company yesterday afternoon, George W. Wood, president of that concern, and five of his employes were arrested and locked up charged with theft from J. J. Carrick, a real estate agent of Port Arthur, Ont., of $1,000 margin put up by Corrick on 100 shares of Cananea copper stock.

Carrick says he bought the stock throught the Port Arthur branch of the company at $26 a share, that he was wiped out at $17 and his money taken when, as a matter of fact, the stock never declined, but instead, steadily advanced until it was worth $35 a share.

Wood was formerly prominent in the Twin City grain trade, where as manager of the Edwards-Wood company he came into conflict with the Minneapolis chamber of commerce. He is now out on bail of $3,000. The action is brought by the crown at the instance of Carrick.

MARRIED MAN IS BRAVER.

Experience in the Boer War Related in House of Commons.

London, March. 2.—In the debate on the new army measure in the house of commons, Major Seely, who had a command during the Boer war, said it was the general experience that married soldiers were more corageous than the unmarried ones. A similar condition, he said developed in the Russo-Japanese war.

TO ALLEGE INSANITY

As Defense for Strother Brothers in Shooting Bywaters.

Expert to Try and Convince Jury of Mental Derangement.

Culpepper, Va., March 2.—The trial of James and Philip Strother, charged with the killing of William F. Bywaters, their brother-in-law, will move rapidly toward its conclusion after the expert testimony of Dr. Charles Clark, the alienist, is heard today relative to his opinion of the minds of the Strother brothers on the night of the tragedy.

Dr. Clark, who is connected with the government asylum for the insane at Washington, will probably occupy most of the day. His testimony, which is regarded as being of vital importance to the defense, is expected by that side to develop that both the Strother brothers suffered mental derangement on the night they killed William F. Bywaters. While this is admitted to be a strong point in favor of the defense, it brought out beyond a reasonable doubt, the prosecution claims, that it has enough rebuttal evidence to prove the argument untenable.

With the completion of Dr. Clark's examination, the prosecution will put on several witnesses to rebut several statements made on the stand by the Strother brothers that Bywaters had no intention of marrying their sister, Viola, prior to the time they declare they forced him to do so. It is thought probable that B. F. Bywaters, father of the dead man, will take the stand in rebuttal.

DILATORY MOTIONS

To Put Off Vote on Subsidy Bill Are Defeated.

Senate Finally Agrees to Take Up Matter at 5 O'Clock.

Washington, March 2.—The ship subsidy bill as it passed the house was laid before the senate at 1:30 o'clock today, when Senator Gallinger moved to concur in the house amendments. He was met with a motion by Senator Burkett to substitute the Burkett resolution for an inquiry into the practices of the railroad companies under the railroad rate law. Senator Spooner suggested the postponement of the time for consideration until 4 o'clock today. Senator Carmack moved as a substitute for that motion that the bill be taken up tomorrow morning and the yeas and nays were ordered on that motion.

Senator Carmack's motion to postpone the ship subsidy until tomorrow morning was defeated 23 to 37. A motion by Mr. Rayner to postpone until 8 o'clock tonight met with a similar fate.

Another motion by Mr. Carmack to postpone until 6 o'clock was defeated, and it was quickly followed by a motion by Mr. Culberson to postpone until 5:30 today. It was evident at this time that the Democratic senators were engaged in a determined filibuster to make good the statement of Senator Blackburn that the bill could not be voted on before adjournment.

After several other motions to fix the time for consideration had been voted down, Senator Spooner withdrew his motion to name 4 o'clock, saying that he had only made it in the interests of expedition of business. When Seator Gallinger again attempted to secure a vote on his motion to concur in the house amendment, Senator Dubois promptly moved to take a recess until 7 o'clock tonight, but that motion was also voted down.

After the defeat of other dilatory motions, a general agreement was reached that the subsidy bill should be taken up for consideration at 5 o'clock today, the house bill to be printed in the meantime.

Attention! Odd Fellows

All members and visiting brothers are requested to attend the lecture at the Lyceum theater, Sunday afternoon, by Dr. Ora Gray. Meet at Odd Fellows' hall, 18 Lake aveaue north, at 2:15 p. m. Lecture free, for men only. Good music.

OPERATIONS HAVE DOUBLED

According to the monthly report of Building Inspector Kelley, building operations in Duluth during February were more than double those of last February. Last year the total building in the city during the month, as figured from the permits entered was $32,570, while in February of this year permits aggregating $75,720 were issued by the officer.

February is usually a dull month, but this year has proved an exception to the rule. The total includes a permit for $20,000 for a hotel on lower Lake avenue to be constructed by the Lenschold Investment company, and a $9,000 permit for an apartment building, granted to John Jenswold, Jr. These are the largest of the permits for the month, but several fine residences are to be constructed in the near future.

CITY BRIEFS

Returns From East.

Miss Cargill, buyer for Freimuth's millinery department, returned yesterday from New York and Chicago. She was accompanied by Miss Lehman, one of the well-known milliners of the East, who will be associated with Miss Cargill.

Many Were Rejected.

Out of a total of 102 men who applied for enlistment at the local army recruiting office during February, twenty-one were accepted. The others were rejected because of physical or mental deficiencies. Of the number who were enlisted nineteen entered the army with the stipulation that they be sent to the Philippines immediately, the two exceptions being Sergeant Boyce and Private Swedborg, both of whom have seen service before and who will be connected with the local recruiting office.

Sunshine Club.

The Sunshine club at Proctor was entertained Wednesday afternoon by Mrs. P. C. Mitchell. The card favors were won by Mrs. B. Simkin and Mrs. F. Whelan and the guest prize was presented Mrs Hillyer. Those present were Mesdames Peyton, Whelan, Burke, Brown, Grimes, Carlton, Simkin, Renaud, Willmott, Hillyer, Knight, Briggs, Wambacher, McCullah and the Misses Burke and Chinoweth. The club will be entertained next Thursday by Mrs. George Carlton.

To Meet Monday.

There will be a meeting of the Duluth Ministerial association next Monday at 10:30 a. m. in the Y. M. C. A. building. The topic for the meeting will be "The Pastoral Work," and the speaker will be R A. Reed.

Few Get Claims.

On account of the stringency of the president's recent land order, only three final certificates for stone and timber claims were issued at the land office last month. During January fifty-two were issued. There were nine homestead entries during February. There are a large number of hearings set for March and many proofs will be taken as the additional clerk will be able to assist in this work.

To Deport Alien.

United States Immigrant Inspector William H. Dean and Deputy S. L. Pierce left for Boston today with an alien, Alarik Hallsten, an insane Finlander, who is to be deported to his native country. This is the man who created a disturbance in the jail by trying to live the simple life, beginning by piling all his clothes in the center of the floor and setting fire to them.

Birthday Party.

Mrs. S. S. Altschul entertained yesterday afternoon in honor of her daughter Stella's seventh birthday. A number of Miss Altschul's girl friends were present and the afternoon was spent in playing games and listening to recitations by those present, were: Mazie Miller, Beatrice Miller, Erma Conrad, Lillian Preston, Esther Gumberg, Susan Pastorette, Catherine Clowe, Stella St. Germain, Stella Archer, Leona Landolt, Reginla Harrington.

PERSONALS

Frank E. Fleischmann has returned from New York, where he went to purchase goods for the housefurnishings department of Freimuth's store.

E. A. Silberstein, who has been in the East for four weeks making the spring purchases for the Silberstein & Bondy company, is expected here tomorrow.

Mrs. B. Silberstein, who was called to Detroit four weeks ago by the death of her mother, will return tomorrow.

Miss Meining has returned from the East.

Mrs. Charles F. Hector left today for a visit at Massena, N. Y.

Duncan Brown left today for Seattle, Wash., where he will reside in the future.

S. W. Helr left today for a two weeks' trip to Seattle and other Western points.

C. T. Fitzsimmons has returned from a trip through the South.

F. W. Nichols of Houghton, Mich., is a guest at the Spalding.

G. B. Taylor of Iron River, Wis., is a guest at the St. Louis.

P R. Vail of Virginia, Minn., is registered at the St. Louis.

W. J. O'Connor of Bovey, Minn., is a guest at the Lenox.

R. W. Freeman of Hibbing, Minn., is registered at the St. Louis.

COMMISSION IS TO BE CREATED

Washington, March 2.—(Special to The Herald.)—The house committee on rivers and harbors today made a favorable report on a bill which provides for the creation of a commission of nine members, whose duty shall be to visit the various great river and harbor projects to investigate the needs, at each particular point and report their findings to congress on or before Jan. 1 next.

This commission is to be composed of three members of the house to be selected by the speaker, three members of the senate to be named by the vice president, and three men to be chosen by the president. Those selected by the president are to receive such compensation for their services as he may deem adequate. The bill carries an appropriation of $20,000 to cover traveling and other expenses.

Considerable attention will be given to the great lakes, it being the plan to start from Buffalo and visit all points through the chain of lakes, winding up at Duluth. It is thought very likely that Congressman Burton, chairman of the rivers and harbors committee, and author of the bill, will be named chairman of this proposed commission.

PROSPECTS ARE NOT BRIGHT

Prospects for early developments in the Wisconsin Central situation are rather dark, according to the latest reports from headquarters, and it looks as if the Wisconsin Central officials are ready to wait a long time before coming into Duluth under the conditions which the city council has laid down for it.

Lane Macgregor has just returned from a trip to Milwaukee to see the officials in regard to a building which was condemned for railroad purposes and upon which the lease had expired. Mr. Macgregor was anxious to find out for what period of time he could lease the building again and was told by one of the officials that they "weren't coming into Duluth until that council up there came to its senses."

Of late there has been a leaning toward compromise on the part of several members of the council, and one of the aldermen, who does not care to be quoted on the subject as yet, has pointed out that for the next five years it would be impossible to get signers for a petition to pave West Superior street, whether the railroad came in or not, and that by the expiration of five years' time there will, in all probability, be a state law providing for the assessment of railroads for improvements abutting their property.

Alderman Wilson, the leader of the opposition to compromise, is out of town at present, and on his return may whip his forces back into line again. What action the newly organized council will take in the matter is not certain.

MAY DISMISS TWO CRUISERS

St. Paul, March 2.—(Special to The Herald.)—A regular meeting of the state timber board was held in the office of Governor Johnson today, and rumor had it that, as a resolution, the board will ask for the resignations of two timber cruisers, T. S. Finney and A. L. Bacheller. It is alleged by some that the board is much incensed at the action of the cruisers in going before committees of the legislature and testifying as to the sale of certain timber lands.

The cruisers testified before a joint committee of the house and senate, Thursday evening, appointed to investigate the state's rights relative to the pine and timber lands. Mr. Bachellor stated that one section of timber near Bemidji, in Cass county, had been disposed of for $200, and was worth ten times that much.

Under cross-examination Mr. Bacheller said that the particular section near Bemidji had been brought to the attention of the state timber board, which had sent three cruisers to investigate how much timber was on the land and whether all that was cut had been paid for.

The cruisers made a hasty examination, Mr. Bacheller said, and reported to the board that all of the timber that had been cut had been paid for by the lumber concern, which, it is said, bought the timber. Upon this report the state timber board decided not to prosecute the firm.

The cruiser said that he then went to the office of the surveyor general of logs, and that he found that 500,000 feet of timber had been cut. He reported this to the special counsel in the attorney general's office.

Mr. Bacheller said further that when he made his report nothing had been done in the matter of prosecuting the lumber company.

None of the members of the timber board, Governor Johnson, Attorney General Young and State Auditor Iverson would commit themselves as to what the timber board discussed today.

Governor Johnson said that Bacheller and Finney still had twenty cases or so to look after for the state, and that they would be allowed to follow up these cases.

IMPULSIVE INSANITY

Seized Strother Brothers on Night of the Tragedy.

Expert Testifies as to Mental Condition of Defendants.

Culpepper, Va., March 2.—The tedium of the Strother trial was forgotten this morning in the interest which attached to the appearance of Dr. Charles Clark, whose presence here is to develop for the defense all that may come out of the new plea that the Strother brothers were seized with uncontrollable emotional insanity on the night of the shooting.

"In my opinion," said Dr. Clark, slowly, as Attorney Moore for the defense, ceased reading the hypothetical question, "the act was an irresistible impulse, and it can also be designated scientifically as impulsive insanity, the result of a highly emotional state brought on by many insults to which the accused had been subjected."

"Doctor," asked Mr. Moore, "is there any right test as to the existence of mental derangement or mental insanity?"

"No, sir."

"Is the condition of mental derangement preceded by any one cause or set of causes, or are the causes numerous?"

"The causes are numerous."

"What are the principal causes of mental derangement?"

"Stress, usually."

"There may be a variety of things—a great variety—causing stress," replied the witness.

"May the condition of mental derangement occur without prior disease?"

"In my opinion it can."

"Is there any fixed period of duration for the condition of mental derangements which occurs in the human system?"

"No."

The witness was then turned over to the prosecutor.

Capt. Micajah Wood asked Dr. Clark: "Wherein do you draw the distinction between what you call impulsive insanity and rage and anger, such as any man might have borne in his bosom?"

"I framed my opinion in this case on the hypothetical question, and I believe it can be logically put into two separate acts. The first when they have received information at various times of wrongdoing on the part of the deceased ano the information accumulated. As I understand they had a consultation met and considered, waited and determined finally to tell this young man he must marry their sister or they would kill him. Between the execution of the act to the time they made their decision there was an interval. During that interval the mental process was one of peace, as is evideneed by the fact that they congratulated him and took his hand and kissed their sister. And there the mental process ended. The new process was due entirely to a sudden impulse. The emotions they had labored under as a result of the insults were dormant in them and became aroused again. I think the emotional condition overwhelmed the intellectual process and that the act was not committed under full volition of power."

The witness said he thought that from the time the deceased made a sudden break to get out of the room—from that time on until the end of the crime—there was mental derangement.

At the conclusion of Dr. Clark's testimony, the defense rested its case, reserving the right to call other witnesses if deemed necessary.

The state then called Dr. W. F. Drewry of Petersburg, to rebut Dr. Clark's testimony.

Mr. Keith read the same hypothetical question propounded to Dr. Clark.

"What mental condition, in your opinion, doctor, would result from that condition, as you see it?" asked Mr. Keith.

"Violent anger," he replied.

"Were these men, in your opinion, insane?" asked Mr. Keith.

"No," he replied. "I don't think they were insane."

Attorney Lee for the defense, then took up the questioning, asking Dr. Drewry, "Is the organism of a Virginia gentleman's mind as sensitive as that of any other human being you ever came in contact with?"

"I think so."

The succeeding questions were mainly about the different degrees of mental derangement, and Judge Harrison declared a recess until 2 o'clock.

St. Paul Live Stock.

St. Paul, March 2.—Cattle—Receipts, 225; steady; no change in prices. Hogs—Receipts, 2,600; steady; range $6.65@6.85; bulk $6.70@6.80. Sheep—Receipts, none; steady and unchanged.

A Poor White Prodigy

By Mabell Shippie Clarke Pelton.

(Copyright, 1907, by Joseph B. Bowles.)

Billy Kimsey was the only member of his family who ever finished what he undertook. Joe Kimsey, his father, was esteemed even by his friends "low-down, no-account, and trifling." Mrs. Kimsey had so much to do, that she did nothing thoroughly.

When his father wanted a job well done he gave it into Billy's hands. When his mother delegated responsibility to anyone, it was to Billy.

When he was 12 Billy heard of an industrial school recently opened on a farm about thirty miles from his home. Now a school possessed no great charm for Billy; he had an acquaintance as casual as possible with the one that doled out the three R's to the children of the settlement; but the news spread among the coves that if you went to the new school you would learn how to make "right smart" of money. And money is as rare as roc's eggs in the North Carolina mountains.

Billy confided his aspirations to Lucy, the sister nearest him in age, and his especial friend.

"I 'low I'll go there a little bit," he said, "and learn how they do hit, and then I'll come back and learn you-all."

A few days later Marla Kimsey kissed her son "Good-bye" across the baby kicking in her lap; the boys shouted an indifferent "So long," and Lucy went with him "down the road a piece" as he started on his long tramp.

At the end of nine days he walked into the house as the family was sharing the contents of the evening saucepan of stewed fruit, and demanded his portion.

"For the Lord's sake!" exclaimed Maria in consternation at his unexpected appearance; and all the others crowded about, spoon in hand, with jeering or welcome, according to their several dispositions.

"Did they lick you awful?" whispered tender-hearted Lucy, slipping her hand into his and drawing him to a soap-box that she had turned over to serve as a resting-place for his tired body.

"Lick me? No ma'am!" returned Billy indignantly.

"Then why did you come back, honey?" asked his mother.

"Too young," replied Billy, blowing lustily on his apple-sauce. "Mr. McDowell—he's the man at the school—he's grand. I liked him. He told me they's just beginning the school, and they ain't got room for no more'n a few, so they's only taking 'em fourteen and up."

"Then, as far as I can see, all you-all's got outen your trip is a pair of sore feet," remarked Joe, cutting the tobacco for his pipe.

"I ain't sorry I went," persisted Billy. I'm going back when I'm 14."

"Sho, Billy, you'll forget all about hit by then," said Maria.

"I won't forget," insisted Billy, wagging his head. "Mr. McDowell, he kind o' said I was to come back, and I don't take no dare. I'm going. He's got the best carpenter shop I ever see, and he says I can learn to be a carpenter. He done showed me everything there. They's 18 boys."

"Did you like 'em?"

"Not much. I licked one of 'em because he laughed at my pants."

"What about your pants?" asked Maria indignantly.

"Nothing, only the other fellers' wasn't so stringy on the ends. I'm going to work and get some clothes before I go back."

The earning of even a small amount of money is a serious enterprise for a man in the North Carolina mountains, where commerce still rests on a basis of barter, and labor is paid in kind. For a boy of Billy's age it meant the undertaking of a task so hard as to be almost impossible of accomplishment.

The Kimsey cabin was a couple of miles from the nearest postoffice. Moreyville, with its few clustering houses. The railroad track ran through Joe's farm, and was Billy's usual path to the village, where he went almost every day.

On his way home from Moreyville he used to fill his pockets with pieces of coal that had fallen from the passing coal trains, as an offering to his mother and it was while he was balancing himself blithely on one of the rails one day that he was smitten with an idea. He would collect all the coal he could, and try to sell it in the settlement. He was going to the hamlet at the time, and he laid the scheme at once before the postmaster and the blacksmith, and each of them placed with him an order for a bushel at 20 cents "per." He provided himself with a "crocus sack," and began his accumulation on his homeward trip.

Of course the coal belongen to the company and not to Billy; but it never was gathered from the roadbed, and the boy took what was practically thrown away by its owner. The new business proved to fill a need in a community where coal is almost unknown, because, when the cost of transportation is added to the original price, it becomes much too dear and "good for human nature's daily food."

Every day Billy walked the track, now in one direction, now in the other. Early in the winter the supplies for the stations were sent South, and the trains multiplied. It was a fortunate increase for the young merchant, for just then he had more orders than he could fill. The postoffice and the smithy were regular customers. So was the doctor's office, and almost every family in the settlement took an occasional bushel.

As trade increased Billy pressed into his service the willing Lucy, only too pleased to be allowed to help. Even with her aid he found difficulty in moving his stock, so big and so heavy were the bags, and so far apart were the customers. Some sort of relief became imperative, and Billy hit upon the plan of employing "Loosh." The dog had been trained to draw the baby in a soap box, and he might as well be made commercially useful.

The device proved satisfactory to the young pickers, who could achieve a third sack with its aid; but Loosh did not seem so pleased with the arrangement. He sat down between the shafts and lolled out his tongue and looked bored, or took a nap on the right of way while awaiting the completion of his load. Still he was a model of professional propriety for quite a week. Then a cotton-tail happened inadvertently to hop out from the bushes right under the dog's nose. Canine flesh could not stand that, and away went rabbit, dog and cart in wildest confusion, while lumps of coal and torn bits of sacking flew into the air.

The runaway was truly a misfortune, for it came at a time when there was business pressure. They were behind in filling orders, and Billy definitely had promised three bushels by 6 o'clock that afternoon. So carefully had they scoured the track that the supply was becoming scarce, and every bagful meant more walking and longer "toting." It was the worst day on which such an accident could have occurred.

A coal train was due at the siding in a half-hour, and the children hurried along the rails as fast as their burdens would permit. They hid their sacks in the bushes and squatted on the embankment while Billy explained a plan to his sister.

As the locomotive drew on to the track just under the bank, Lucy concealed herself behind a tree and Billy yelled a cheerful "Hi, you old slab of soap grease!" to the engineer, tossing a piece of sod into the cab with his greeting.

The man looked out angrily, to be met by an out-thrust tongue and a pair of insulting heels.

He retorted promptly, but his originality did not approach the boy's, and Billy saw with delight that his rage was becoming rapidly of a kind that required other than vocal expression. The acclivity was too slippery to be scaled safely by a grown man, so he had no fear of physical injury, but sat securely aloft hurling gibes that at last brought the result expected. The infuriated engineer climbed into the tender, seized a piece of coal and flung it at his tomentor. Billy was in ecstasy and increased his efforts. The fireman joined the engineer, and together they directed their ammunition against the derisive figure above them. The brakeman added to the fusillade, while Billy danced excitedly, oblivious that an occasional shot reached its mark.

Indeer Billy's oratorical efforts were so well rewarded that he was able to deliver his goods as he had promised, although he had to make two trips to carry his burden.

Billy was touched by Lucy's devotion.

"I tell you what, sister," he offered magnificently one day, "you must go to the school, too. They's girls there, and they takes girls when they's 12, because they ain't so many of 'em, and they learns 'em to sew awful nice and to make light bread. You and me'll go together."

"Oh, Billy!" Lucy's pigtail quivered excitedly, and in her nervousness she lengthened a slit already torn in her brief skirt. "Oh, Billy, do you reckon I even could get to go? Do you reckon we ever could get money enough? Do you reckon paw 'n maw would let me? Do you 'low the man would take me?"

She poured out her questions until Billy found himself astonished at her emotion, and swept away by it.

"Course you can get to go. I'll fix it with dad," he said grandly. "Maybe hit won't be so soon as if I went alone, but we'll go together;" and Lucy never suspected the disappointment with which his mental eye saw the Birney school carpenter shop withdraw still farther into the future.

During the second winter the demand for coal increased so much that Billy arranged with some boys about four miles down the road to cover a couple of miles of track on each side of their father's farms.

Now it seemed almost sure that both he and Lucy would be able to go to Birney Creek in the autumn. They came to this conclusion after carefully counting their hoard for the hundredth time, in the light of a letter received from Mr. McDowell. Assisted by the postmaster, Billy had addressed a laborious series of inquiries to the principal of the school, and his reply had been most gratifying.

Then came a delightful month, when all that Billy earned was clear gain, and when Lucy helped her mother make the clothes for which they had worked so hard.

"Of course," she said to Billy, "of course, I'll sew right smart better than this next year, but I'll hem your pant legs now, anyway."

At last the sun rose on a brilliant September morning when Lucy, a sturdy little figure in blue calico, the crook of her stubby pigtail lifting the cape of her new sunbonnet, packed their clothes and their food into the two baskets that Billy had made for the purpose. And Billy, a far different boy from the ragged and disciplined urchin who had started on the same expedition two years before, slung them on his back.

"Come on, Lucy," he cried. "Good-by, maw, goodby, paw. You remember I done told you I wouldn't take no dare."

The Light That's Bright

¶ Electric light is pre-eminently the light of happy content. It dispels gloom, dinginess and discouragement. Light homes make light hearts.

¶ Electric light is practical light—a light that is at once clean, convenient and economical. At the prevailing rates for current on meter basis it is well within the means of all, and when used sensibly—economically—electric light is as cheap as it is good.

RECEPTION FOR WILLIAM J. BRYAN

Duluth Citizens May Meet Nebraskan at Commercial Club.

All Duluth citizens who desire to meet William Jennings Bryan, "The Great Commoner," during his lecture visit to this city, will be enabled to do so next Tuesday afternoon at a public reception to be tendered the silver-tongued orator from Nebraska at the Duluth Commercial club rooms, from 3 to 4 o'clock.

Mr. Bryan, who is to lecture at the Methodist church, Tuesday evening, on the topic, "The Old World and Its Ways," under the auspices of the Star Lecture course, will arrive in the city about noon.

Following the usual custom when prominent men of public affairs are in the city, the Commercial club management has arranged for a public reception to Mr. Bryan, and it is expected that a very large number of citizens, irrespective of political faith or creed, will take advantage of the opportunity offered of meeting and greeting Mr. Bryan.

The demand for seats for Mr. Bryan's lecture has been heavy but it was announced this noon that there are still many available.

MEDICINE KILLS BABE.

Albert Lea, Minn., March 2.—The 3-year-old daughter of Mr. and Mrs. Charles Keuthe of Pickerel Lake accidentally got hold of some medicine prepared for her mother and ate part of it and died in great agony before antidotes could be administered. The parents are frantic with grief.

THE MONTHLY POLICE REPORT

Arrests During February 276, Of Which 115 Were Drunks.

During the month of February just passed, 276 persons were arrested in Duluth. This is forty-two more than were arrested during the four weeks last year, but the police say that the increase is no more than the average for every month, and is due to the growth of the city rather than an increase in its crime.

Of this number 115 were plain drunks, 110 males and five females. Four second offense drunks were arraigned, one man was up for the third time on the charge, and two were found guilty of fourth offense drunkenness.

Fifteen persons were arraigned as drunk and disorderly and fourteen were charged with assault, one being second degree.

One forger was bound over to the grand jury. There were three arrests for grand larceny and eight for petty larceny, and two saloonkeepers were find for keeping open on election day. One fine was imposed for permitting minors to gamble. Seven dairymen were arrested for violating the state dairy law, eight vags were brought in during the month, and there were two non-support cases.

Four of those arrested were held to the grand jury and one was sent to St. Cloud.

Of this total, sixty-five males and five females were committed to the county jail; ninety males and twenty females paid fines, and forty persons forfeited bail.

THOUGH BLIND, HE TELLS OF MRS. NORTON'S KISS.

New Haven, March 2.—In the divorce case of Edwin Kenneth Norton against Norton (Josephine Birney), a blind man swore he heard Mrs. Norton kissing George Jenkins, one of the thirty-seven co-respondents in the case. George Washington was the name of the witness. He is a half-breed Indian. He said he occupied a room adjoining that of Mrs. Norton. He testified that he twice heard noises like those of kisses from Jenkins' room, and that he recognized the voices of Mrs. Norton and Jenkins.

"I heard footsteps in the room," said the blind witness. "I heard Mrs. Norton and Jenkins talking. Mrs. Norton said she often had good times with college men and that her husband, 'Ken,' had never objected to her going around with them. Then I heard a kiss and then I heard Mrs. Norton say, 'You like me, Jenk?' I then heard another kiss and heard Mrs. Norton say, 'Jenk, you are a perfect gentleman, and some day I'll introduce you to 'Ken,' and he'll like you, I know.'"

The testimony of Washington was admitted under the remarkable theory that a blind man's hearing is so acute that he can distinguish voices and sounds in such a manner as to render his testimony equivalent to that of an eyewitness.

Electric Motor to Supplant Steam.

Will the electric motor supplant the locomotive is the question now being asked among railroad experts, and from the many successful demonstrations of the former it seems that electricity is going to be the motive power of the future. During the past 53 years there have been so many successful demonstrations of the power of Hostetter's Stomach Bitters in cases of stomach, liver and bowel troubles that it is now universally acknowledged to be the best of its class. Is your appetite poor, sleep restless, nerves unstrung or bowels constipated, then the best thing that you can do is to commence taking the Bitters at once. It will correct these ailments, also cure dyspepsia, indigestion, costiveness, sour risings, heartburn, colds, grippe, female ills and malaria. Your druggist will supply you with the genuine, which we guarantee absolutely pure.

ROBBERY ON BOWERY

Daring Thief Takes $500 From Safe in Metropolitan Saloon.

Act Was Committed During the Rush of Evening's Business.

About 9 o'clock last evening, while the rush of the evening's business was on, a daring thief robbed the safe in Lawrence's Metropolitan saloon at 614 West Superior street of $500 in gold and bills.

The safe had been left open and when Bartender Pelky was working overtime to get the line at the bar supplied with thirst cures, a man asked him if he might use the telephone standing on the safe in an adjoining room. The bartender, of course, granted permission and went on filling orders.

He says that he thought at one time he heard money clink in the next room but the crowd was so thick that he could not go and see, and as the safe was usually closed he did not think of the money coming from it.

At about 2 o'clock, however, when the saloon had been closed, and the money was taken from the till to be deposited in the safe, it was discovered that gold and bills, aggergating $500 were missing. While there was, of course an opportunity for the safe to have been rifled by someone else, the police and the saloon people feel confident that the man who wanted to telephone was the thief.

His name is known to the police, but no arrest has been made as yet.

JOHN Z. WHITE

At STEINWAY HALL,
Monday, Mar. 4, 8:15 P. M.

Under the auspices of the Emerson Lyceum club. Admission, 50 cents. Subject, "Ownership of Public Utilities."

JILTED, WANTS HER MONEY BACK

Woman Who Paid Fiance's Expenses in Dental College.

Baltimore, Mr., March 2.—Dr. Henry A. Cherry, a dentist at 1111 East Baltimore street, was called to the witness stand in the court of common pleas to explain to the jury and Judge Harlan why Rose Soladar of Newark, N. J., his jilted sweetheart and one-time affianced bride, should not recover $400 which she claims to have lent him while he was a student in the dental department of the University of Maryland.

According to Miss Soladar's testimony, Dr. Cherry educated himself partly at her expense, as she loved him, and thought that he loved her, but he jilted her and married another.

Dr. Cherry admitted that he got the money from Miss Soladar, only he says it was $340 instead of $400. He declared that it was spent in a good cause. He also admitted that he was engaged to marry Miss Soladar, but asserts that she became disgusted with him because he was not as successful in his examinations as she thought he should be, and consequently practically jilted him.

One of the most interesting features of the proceedings was a stock of love letters, some of them of touching quality, alleged to have been written by Dr. Cherry to Miss Soladar at the time she was under the impression that he was going to eventually make her his wife. These were read at various stages of the trial by Miss Soladar's attorney, William Colton.

Of the spectators in the courtroom, none was more deeply interested in the proceedings that the present Mrs. Cherry, the woman whom Dr. Cherry took as his bride after, as it is alleged, he broke his troth with Miss Soladar. When the love letters of the doctor to Miss Soladar were read she looked very solemn and also rather thoughtful. Miss Soladar also has a breach of promise suit pending against Dr. Cherry.

CLERK WINS A RICH BRIDE.

Former St. Paul Railroad Employe Weds Wealthy St. Joseph Girl.

St. Joseph, Mo., March 2.—Miss Bernice Wyeth, reputed to be the richest girl of this city, and Alexander Ramsey Furness, a railroad clerk, who formerly lived in St. Paul, Minn., were married here Thursday night. Miss Wyeth's wealth is estimated at from $2,000,000 to $3,000,000. Mr. Furness came here a few months ago and obtained a position in the offices of the Chicago Great Western.

WEST DULUTH

MEASURE IS ENDORSED

Commercial Club Favors Legislation Concerning Justice Court.

Members Express Gratification Over Prospect of Steel Plant.

Members of the West Duluth Commercial club decided last evening, at the regular meeting of the club, to endorse the bill now before the state legislature, giving the West Duluth justice of the peace the same power as other justices outside of the city. The question had come up at a meeting several weeks ago, but no definite action was taken.

There was considerable discussion among the members before it was decided that the bill should be endorsed, but it was finally decided that it would be of great benefit to West Duluth if it should be passed. Under the present law a justice in a city where there is a municipal court has practically no power, but the new law will give them the same power as outside justices.

A resolution was passed by the club expressing the elation which the citizens of this end of the town feel over the report that a steel plant will be established here. Another resolution was introduced demanding the legislature to institute a recount throughout the state.

County Attorney John H. Norton gave an interesting address before the meeting, as did also Charles A. Russell, who told of the great possibilities for West Duluth in the establishment of the steel plant here. He told of what would probably follow in the wake of the steel plant if it is brought here.

The meeting was unusually well attended and new members to the number of twenty-five were added to the roll.

ARE TOO FREQUENT.

City Attorney Says Saloon Rows Must be Stopped.

Though a long, deep gash, reaching from one shoulder around to the waist line on the other side, gave very striking evidence that he had gotten the worst of the scrap, Lid Komasa, yesterday, got forty days in the county jail, at hard labor for precipitating a "rough house" in Thomas Natlak's saloon on the last pay day of the Zenith Furnace company.

Komosa, according to the evidence, knocked an Austrian down beside the bar, and then he and his friend, Charles Kruchke, had to defend themselves against the united onslaught of several other Austrians in the place. In going out, windows and furniture were indiscriminately smashed, and some one in the melee got in a chance to slash Komasa wickedly with a knife.

The need for some radical action in regard to the drunken sprees which have been indulged in of late in the Second street district in West Duluth has been becoming more and more evident during the past few months, as the debauches become more frequent, and knives are coming into use more and more freely.

City Attorney McKeon has figured out the sprees almost invariably occur when the men cash their checks at the saloons on pay day, and is trying to arrange some way in which the checks can be made payable only at the bank. What success this scheme will have is yet to be determined.

CARNIVAL AT RINK.

Curling Club is Planning Big Affair for Next Week.

A masquerade and fancy dress carnival has been announced by the members of the Western Curling club to be given at the rink next Friday evening. Curlers and skaters from Duluth, the West end and Superior, and possibly from Proctor will be present and great preparations are being made for the event. A special program of music will be given.

The rink skipped by Deatherage was victorious in the Commercial club trophy contest, over a rink skipped by Hoag. The score was 6 to 12. The games tonight will be played between rinks skipped by Zauft against Ashley, and Method against Filiatrault.

The line-up at the trophy contest was as follows:

J. Johnson,	Larson,
Keene,	Buckley,
Lowrie,	Graham,
Hoag, skip, 6.	Deatherage, skip, 12

MEETING OF W. C. T. U.

Interesting Address On "Patriotism" by Rev. J. W. Powell.

There was a large attendance of the members of the West Duluth W. C. T. U. at the meeting which was held last evening at the home of Dr. and Mrs. C. R. Keyes, 705 North Fifty-seventh avenue west. The address on "Patriotism," by Rev. John W. Powell, Jr., was the principal number on the program and was most interesting and instructive.

The musical program consisted of solos by Roy Prytz and songs by a quartet, composed of Mrs. David Adams, Mrs. George Jewell and D. Glover, accompanied by Miss Kennedy. There were recitations given by Mrs. G. E. Budd and Miss Effie Brotherton.

West Duluth Churches.

At the Holy Apostle's Episcopal church Sunday school will meet at noon and there will be evening prayer and a sermon by the pastor, Rev. Roderick J. Mooney, at 7:30. The sermon subject will be "The Call of the Cross." The musical program is as follows:

Processional, "Onward, Christian"
Psalter ..... Turner
Magnificat ..... Kettle
Nunc Dimittis ..... Stainer
Hymn, "In the Hour of Trial"..Dykes
Soprano solo, "The Lost Chord"... ..... Sullivan
Miss Lauretta Rietz.
Orison, "Now the Day Is Over"... ..... Barnby
Recessional, "O, Help Us, Lord."
Organist, Miss Elizabeth Morton; choir leader, Miss Ethelyn Abbott.

* * *

At the Third Swedish Baptist church, Fifty-ninth avenue west and Ramsey street, morning service will be held at 11 o'clock and evening service will be held at 7:30 o'clock, both in charge of Charles Eklund. The pulpit will be occupied by Prof. J. O. Backlund o fthe Bethel academy of Minneapolis, at both services. Sunday school will meet at 9:45 o'clock in the morning and Young People's society at 6 o'clock in the afternoon. Following is the musical program for the evening service:

Organ prelude, "Prelodio".....Rink
Anthem, "The Weary Pilgrim".Skoog
Choir.
Soprano solo, "Shepherd Divine, I Come" ..... Jerome
Miss Minnie Nelson.
Offertory, "Andantino"...Scharwenka
Duett, "Where Will You Spend Eternity" ..... Pickett
Messrs. Gustave Silverness and W. A. Anderson.
Postlude.
W. A. Anderson, organist and choir director.

* * *

At the Asbury M. E. church, Sixtieth avenue west and Raleigh street, the morning service will be begin at 10:30 and the evening service at 7:30. Rev. D. D. Fetters of Barnum will preach at both services. Sunday school will meet at 1:45 and Epworth league at 6:45.

* * *

At St. Stephen's German Lutheran church, corner of Raleigh street and Sixty-seventh avenue west, services will be held Sunday. A Lenten sermon will be delivered by Rev. H. C. Hintz, the pastor.

* * *

At the Wesminster Presbyterian church, services will be held at 10:30 a. m. Rev. W. J. Lowrie will preach on "Christ, the Comforter." Sunday school will meet at 12 o'clock and Christian Endeavor at 6:30 p. m.

West Duluth Briefs.

Mr. and Mrs. Beatty, who have been residing at Virginia for several months, have returned to West Duluth.

Rev. and Mrs. Herman Heinz, 213 Fifty-seventh avenue west, are the parents of a daughter born last night.

George Guyer, who resides at Main street and Fifty-fourth avenue west, has returned from Two Harbors where he has been working for several weeks.

R. J. Hamilton left for St. Paul last night to attend a state lodge meeting.

Charles Strand of New Duluth spent the day in West Duluth transacting business.

The tickets for the annual banquet of the Commercial club have been issued, and are being distributed today.

Joseph A. Mowry, special agent for the German American Fire Insurance company, arrived in West Duluth yesterday and adjusted the fire loss of Joseph Gauthier's house on Oneota street. The fire occurred Thursday.

Watch and jewelry repairing. Hurst.

William Ross, who has been attending the Elk Rapids university, has taken a position as assistant purchasing agent for the Zenith Furnace company.

Henry Bentson has been awarded the contract to do the masonry and tile work in the Hotel McKay repairs this spring.

While at work in the Northern Pacific yards yesterday morning, Clement Clementson injured his foot quite badly.

Rev. Thomas Hawkes of Biwabik, who has just returned from a visit to St. James, Minn., and the Twin Cities, is visiting at the home of Rev. Grice, Raleigh street and Sixteenth avenue west.

On account of a slight illness, Rev. H. W. Johnson will not be able to preach at the Plymouth Congregational church tomorrow. The pulpit will probably be filled by a resident of Duluth.

A meeting of the Nonpariel club of the Congregational church was held last evening at the home of Ray Kindy of Fiftieth avenue west. Games, readings and music formed the entertainment for the evening.

Commencing a week from tomorrow services of the Swedish National church will be held at 4 o'clock every Sunday at the Holy Apostles' church and Rev. Karl Regnall will preach. The services will be conducted in the Swedish tongue.

The West Duluth Hibernians will go to Duluth to meet the state officers of the order at a joint meeting to be held at Cathedral hall tomorrow afternoon.

FIND SKELETON CHAINED TO CELL IN A PALACE.

St. Petersburg, March 2.—The newspapers here state that workmen who were engaged in renovating the so-called Engineers' Palace, constructed by Emperor Paul, discovered a secret door and a stairway leading to a cell in the basement, where they found a skeleton chained to the wall.

History does not offer any explanation of the presence of the skeleton in the cell.

This palace, in which Emperor Paul was assassinated, is a mysterious building containing a number of secret passages, constructed by the emperor. There is one leading underground to the Fontanka Canal, where, according to tradition, a boat was kept in readiness for the emperor to escape to the fortress on the opposite bank of the Neva.

"HAPPY" MIGHT SING "HE'S A COUSIN OF MINE."

Winsted, March 2.—John Hooligan of Tolland who was sentenced to "ninety days" for drunkenness, arrived at the Tolland county jail all alone; handed the mittimus to the jailer, and was assigned to a cell.

Officer Nagel had started for the jail with Hooligan in a sleigh, but when they had struggled through snow drifts for half an hour, the horse was too exhausted to go further, and Nagel handed the papers to the prisoner with the injunction to go ahead afoot and commit himself, which he did.

Always the Same

Calumet Baking Powder

The only high grade Baking Powder sold at a moderate price.

DO YOU GET UP WITH A LAME BACK?

Have You Rheumatism, Kidney, Liver or Bladder Trouble?

To Prove What Swamp-Root, the Great Kidney, Liver and Bladder Remedy, Will Do For YOU, All Our Readers May Have a Sample Bottle Sent Free by Mail.

Pain or dull ache in the back is unmistakable evidence of kidney trouble. It is Nature's timely warning to show you that the track of health is not clear.

If these danger signals are unheeded more serious results are often sure to follow; Bright's disease, which is the worst form of kidney trouble, may steal upon you.

The mild and immediate effect of Swamp-Root, the great kidney and bladder remedy, is soon realized. It stands the highest, because its remarkable curative power has been proven in thousands of the most distressing cases. If you need a medicine, you should have the best. A thorough trial will convince any one.

LAME BACK.

Lame back is only one of many symptoms of kidney trouble. Other symptoms showing that you need Swamp-Root are, being obliged to pass water often during the day and to get up many times during the night, inability to hold your urine, smarting or irritation in passing, brick-dust or sediment in the urine, catarrh of the bladder, uric acid, occasional headache, dizziness, poor digestion, sleeplessness, nervousness, sometimes the heart acts badly, rheumatism, bloating, irritability, wornout feeling, lack of ambition, loss of flesh, sallow complexion.

If your water, when allowed to remain undisturbed in a glass or bottle for twenty-four hours, forms a sediment or settling, or has a cloudy appearance, it is also evidence that your kidneys and bladder need immediate attention.

In taking Swamp-Root you afford natural help to Nature, for Swamp-Root is the most perfect healer and gentle aid to the kidneys that has yet been discovered.

If you are already convinced that Swamp-Root is what you need, you can purchase the regular fifty-cent and one-dollar size bottles at drug stores everywhere. Don't make any mistake, but remember the name, Swamp-Root, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

EDITORIAL NOTE.—In order to prove the wonderful merits of Swamp-Root you may have a sample bottle and a book of valuable information, both sent absolutely free by mail. The book contains many of the thousands upon thousands of testimonial letters received from men and women who found Swamp-Root to be just the remedy they needed. The value and success of Swamp-Root are so well known that our readers are advised to send for a sample bottle. In sending your address to Dr. Kilmer & Co., Binghamton, N. Y., be sure to say you read this generous offer in the Duluth "Daily Herald." The genuineness of this offer is guaranteed.

ICE PACKED IN THE CANAL

Jam Prevents Diver From Working on Park Point Mains.

While the gas mains across the canal have been repaired, and the Park Pointers are again enjoying the privileges of the city's gas supply, the repairing of the water mains is a somewhat indefinite proposition just at present.

When the strong wind blew in off the lake last Monday, and piled all the loose ice up in this end of the lake, the ice drove into the canal with such force that it is now piled in clear to the bottom, forming a solid mass of ice between the piers and making repair work impossible.

It was by the narrowest margin that Diver Wanless got his scow out of the way of the inrushing ice and prevented its being ground to pieces in the jam. Mr. Wanless says that he he has about two days' work on the water mains yet to do before they can be put in use, and he will recommence work as soon as the ice goes out, which it is expected to do at any time now if a northwest wind does not arise.

RABBI'S BODY TO SCIENCE.

Dr. Hirsch Says He Would be Useful After Death.

Chicago, March 2.—In the interests of science and humanity, Dr. Emil G. Hirsch, the noted Jewish divine, acting president of the state board of charities, has offered to bequeath his body to any medical institution of standing that might wish to use it after death for purposes of physiological or pathological research.

At Springfield today the offer came in the progress of a hearing on the question of the clinics at the state asylums for the insane before the house committee on appropriations.

"All good requires sacrifice," Dr. Hirsch said. "Doctors would not be able to treat typhoid if they had not had clinics years ago. So with the insane at present. For the benefit of the people in general we ask the chance to give physicians instructions. It is all for humanity.

"Why, I shall will my body willingly to any institution that wishes to use it after my death, if it would be of service, knowing that in so doing I shall do something of use even after death.

"How can the medical world advance without studying disease under such advantageous conditions as appear just after death? And if science is halted how can mankind hope for alleviation of its maladies and diseases?"

Neglected Colds Threaten Life.

(From the Chicago Tribune.)

"'Don't trifle with a cold,' is good advice for prudent men and women. It may be vital in the case of a child. Proper food, good ventilation, and dry, warm clothing are the proper safeguards against colds. If they are maintained through the changeable weather of autumn, winter and spring, the chances of a surprise from ordinary colds will be slight. But the ordinary light cold will become severe if neglected, and a well established ripe cold is to the germs of diphtheria what honey is to the bee. The greatest menace to child life at this season of the year is the neglected cold." Whether it is a child or adult, the cold slight or severe, the very best treatment that can be adopted it to give Chamberlain's Cough Remedy. It is safe and sure. The greatest popularity and immense sale of this preparation has been attained by its remarkable cures of this ailment. A cold never results in pneumonia when it is given. For sale by all druggists.

SEEKS LOVER IN VAIN.

Pretty French Girl Attempts Suicide and Becomes Insane.

Winnipeg, Man., March 2.—Demented through her inability to find her lover, whom she had followed from France, Lucille Nicolay, a pretty little Parisian, aged 19, attempted to end her troubles at St. Boniface hospital by jumping from the veranda of the third floor.

When about to take the leap one of the nurses grabbed her and her screams brought assistance from several doctors, and Miss Nicolay was dispatched to an insane asylum. She arrived in Winnipeg about a year ago to search for her lover, who had come to the Canadian Northwest to make a home for her, but her small supply of money soon dwindled to nothing and she was forced to work, but her love affairs prayed on her mind to such an extent that friends had her sent to the hospital. She was to have been discharged yesterday as cured, and this seems to have worried her, for shortly after she jumped from her bed and with a wild scream, dashed to the veranda.

The Family Physician

The best medicines in the world cannot take the place of the family physician. Consult him early when taken ill. If the trouble is with your throat, bronchial tubes, or lungs, ask him about taking Ayer's Cherry Pectoral. Do as he says.

We have no secrets! We publish J. C. Ayer Co., the formulas of all our preparations. Lowell, Mass.

The House After It Had Once Been Defeated.

Only Lines to South America Are Affected by Measure.

Washington, March 2.—It has been years since the house was the scene of so royal a battle between the two great parties as it witnessed there yesterday over the ship subsidy bill. The bill was passed, but not until after it had been once defeated, and this fact in itself shows how close the alignment was. When the first vote disclosed a majority against the measure, the Democrats and their Republican allies made the house ring with their cheers. There were several roll calls before the final favorable result was obtained. The vote on the Littauer substitute was defeated on the first vote, yeas 154, nays 161.

The Democrats could not retain the lead, however, for on a vote to lay on the table, a motion to reconsider, the opponents of the ship subsidy were defeated 156 to 159, and the vote to reconsider the first vote was adopted, 164 to 154.

Then there were other votes, but immediately after the first ballot desertion began, and a final vote to pass the bill as amended, the work done by the Republican leaders during the height of the battle, was made manifest. The bill was passed 155 to 144. The Republicans voted with the Democrats in opposition: Burton, Ohio.; Campbell, Kan.; Chapman, Ill.; Cooper, Wis.; Darragh, Mich.; Davidson, Wis.; Davis, Minn.; Fordney, Mich.; Foster, Vt.; Fulkerson, Mo.; Gilhams, Ind.; Graff, Ill.; Gronna, N. D.; Hamilton, Mich.; Hinshaw, Neb.; Holliday, Ind.; Jenkins, Wis.; Kinkaid, Neb.; Knopf, Ill.; C. B. Landis, Ind.; Fred Landis, Ind.; Lawrence, Mass.; Lowden, Ill.; McCarthy, Neb.; McGavin, Ill.; McKinney, Ill.; Mann, Ill.; Marshall, N. D.; Miller, Kan.; Mouser, Ohio; Murdock, Kan.; Nelson, Wis.; Perkins, N. Y.; Stafford, Wis.; Steenerson, Minn.; Stevens, Minn.; Volstead, Minn.; Webber, Ohio; Weems, Ohio; Wilson, Ill.; Woodyard, W. Va.

Fifty-two Republicans voted with the Democrats on the first roll call. On the vote of Mr. Williams to lay the motion to reconsider on the table, fifty Republicans voted with the Democrats. On the vote to adopt the substitute, there were forty-three Republican "insurgents," and on its final passage there were forty-one.

Only four steamship lines are to be subsidized under the measure, and all of these are to sail for South American ports. One of the lines is to be from the Atlantic coast to Brazil; a second from the Atlantic coast to Argentina, and a third between the Gulf of Mexico and Brazil. The fourth line is to be from the Pacific coast to the isthmus of Panama, Peru and Chile.

The annual subsidy for each of these lines is to be $300,000 for a monthly mail service, or $600,000 for a fortnightly service, excepting the Argentine line, which is to have $400,000 for a monthly service, or $800,000 for a fortnightly service. No American cities are named as the ports from which any of the lines are to start, and the bill is so worded that the steamers can touch at any number of ports in the United States.

It is provided in the bill that all the vessels profiting by this subvention for carrying mail must have a speed of not less than 16 knots, and it has been repeatedly stated on the floor of the house that no ships now engaged in the South American trade can make any such speed.

Combine good housekeeping with good citizenship, use Hunt's Perfect Baking Powder—not made by a trust.

OBJECTS TO "OH FUDGE."

Wife Seeks to Restrain Husband From Using Such Expression.

Cleveland, Ohio, March 2.—Katherine O. Graff was before Judge Keeles asking him to restrain her husband from saying, "Oh, fudge," and other silly thing in her presence.

"Yes, we have lived in the same house since the filing of my divorce petition, one week ago, and we eat at the same table, but we are both silent," she said.

"I filed a divorce petition several years ago, but withdrew it. Our present trouble dates back several months, and we haven't spoken during that time. The children commented at the dinner table about the divorce petition, and my husband said: 'Oh, fudge.'"

Judge Keeler refused her the order, on the ground that a man can't be restrained from saying silly things in his own home.

A SPECIALIST

Of Twenty Years' Experience, Not Only Treating, But Curing His Patients.

DR. REA

Diseases of Men, Diseases of Women, Chronic Diseases, Nervous Diseases And Organic Diseases.

Next regular professional visit to Duluth at Spalding Hotel.

SATURDAY, MARCH 9,

From 9 a. m. until 8 p. m.

One day only—returning every month.

All curable medical and surgical diseases. Eye, Ear, Nose and Throat, Lung Diseases, Early Consumption, Bronchitis, Bronchial Catarrh, Constitutional Catarrh, Nasal Catarrh, Dyspepsia, Sick Headache, Stomach and Bowel Troubles, Appendicitis, Rheumatism, Neuralgia, Sciatica, Bright's Disease, Diabetes, Kidney, Liver, Bladder Troubles, Prostatic and Female Diseases, Dizziness, Nervousness, Indigestion, Obesity, Interrupted Nutrition, Slow Growth in Children, and all wasting diseases in adults. Many cases of Deafness, Ringing in the Ears, Loss of Eyesight, Cataract, Cross Eyes, etc., that have been improperly treated can be easily restored. Deformities, Club Feet, Curvature of the Spine, Disease of the Brain, Paralysis, Epilepsy, Heart Disease, Dropsy, Swelling of the Limbs, Stricture, Open Sores, Pain in the Bones, Granular Enlargements and all long-standing diseases properly treated. Young, middle-aged and old, single or married men, and all who suffer from lost manhood, nervous debility, spermotarrhoea, seminal losses, sexual decay, failing memory, stunted development, lack of energy, impoverished blood, pimples, impediments to marriage, blood and skin diseases, Syphilis, Eruptions, Hair Falling, Swellings, Sore Throat, Ulcers, Weak Back, Burning Urine, Passing Urine too often, Gonorrhoea, Gleet, Stricture, receive searching treatment, prompt relief and cure for life.

CANCERS, TUMORS, GOITRE, FISTULA, PILES,

Varicocele, Rupture and enlarged glands treated and cured without pain and without loss of blood. This is one of his own discoveries, and is really one of the most scientific and certain sure cures of the nineteenth century. No incurable cases taken. Consultation to those interested $1.00.

LABOR

CARPENTERS ARE STRONG

Have One of Biggest and Most Progressive Unions.

J. H. Baker Has Been Member More Than Twenty Years.

UNION MEETINGS.

Tonight—Bakers and Confectioners at Kalamazo hall; Boilermakers at Axa hall; Brewery workers at Kalamazoo hall.

Sunday—Typographical at Labor World hall; Theatrical Stage employes at Lyceum theater; Switchmen at Sloan hall.

Monday—Building Trades Structural Alliance at Labor World hall; Barbers at Labor World hall; Stone Masons at Axa hall; Tug Firemen at Axa hall.

Tuesday—Carpenters at Rowley hall; Musicans at Kalamazoo hall; Painters, Decorators and Paperhangers at Kalamazoo hall.

Wednesday—Tailors at Axa hall; Marine Engineers at Lyceum; Cigar Makers at Labor World hall; Steamfitters' Helpers at Labor World hall.

Thursday—Steam Engineers at Axa hall; Electrical Workers at Labor World hall; Stationary Engineers at Axa hall.

Friday—Leatherworkers at Labor World hall; Iron Moulders at Sloan hall; Bricklayers at Axa hall; Ship Carpenters at Sloan hall.

Among the first unions, which were organized in Duluth shortly after the formation of the American Federation of Labor in the middle eighties, was the local Brotherhood of Carpenters. At the very start, the organization was a strong one, and except during one or two strike periods, it has continued to be one of the strongest unions in the city.

The first organization meeting was held by the Duluth carpenters sometime in February in 1886, but the exact date is not known. At this meeting officers for the new union were chosen and they held their positions for about a year when another election was held. None of the local labor people can now remember the names of these first officers.

J. H. Baker, who was one of the first advocates of union labor in Duluth, has been a member of the Carpenters' union ever since 1887 and has held about every position in the union. Mr. Baker is probably one of the oldest union carpenters in the country, as he has been a member continuously since 1856. He was one of the first delegates to the trades assembly when it was organized and has held this position ever since and is at present a delegate.

During the panic, fifteen years ago, Mr. Baker was president of the trades assembly, and for some time was compelled to pay practically all the bills incidental to the organization from his own income. There was no money in the treasury and Mr. Baker preferred to pay the bills himself rather than see them run on. The Carpenters' union has had a continuous membership in the trades assembly and also with the Building Trades Structural alliance.

The union has had few strikes of any importance since its organization. The first one occurred in 1890, just when the union had attained the progressive membership numbering over 600 members. The carpenters wanted the eight-hour day, but their employers would not consent to give it to them, and the strike was the result. In this first strike the carpenters lost out, and for some time the union was broken up by the failure. It was reorganized later on however, and has ever since been stronger than ever, although the membership has never been greater than it was at the beginning of the first strike.

The second strike took place about five years ago and the eight-hour rule was again the issue. This time the union gave notice to the contractors two or three months before the new scale was to go into effect and when the time came the employers refused to give in and locked out the union men. Over 500 men were involved and the struggle lasted several months. Toward the end of a few weeks, however, the contractors began hiring a few union men on the quiet and acceded to their demands for the shorter work day and in this way the union carpenters finally won their strike.

Financially the carpenters' union has and is at the present time about the strongest labor organization in the city. Bills have been paid promptly and it has always taken an active part in the Labor day preparations. Officers of the two central labor bodies have often been chosen from the delegates sent up by the carpenters' local and a carpenter, John Lowe, is president of the structural alliance at the present time.

The officers of the Duluth Carpenters' union at present are as follows: President, G. W. Burgher; vice president, Paul Bolz; recording secretary, James Fencil; treasurer, Edward Erickson; financial secretary, J. G. Mork. Everything points to an unusually successful year during 1907 for the members of this union.

Fat People

I WILL SEND YOU A TRIAL TREATMENT FREE.

I can reduce your weight **3 to 5 Pounds a Week** and turn ill health into robust health, mental sluggishness into activity, and relieve that feeling of fullness and oppression by producing healthy digestion and assimilation. No distasteful dieting or starvation, no exercising, no nauseating drugs or sickening pills that ruin the stomach. I am a regular **practising physician** and a specialist in the successful reduction of superfluous fat. My new and scientifically perfected method strengthens the heart and enables you to breathe easily, and quickly removes double-chin, large stomach and fat alps. Prominent physicians advise their patients to take my treatment, and **leading doctors themselves are my patients. I absolutely guarantee satisfaction** in every case. Write today for free trial treatment. I will also send you free my new book on Obesity. It will give you detailed outline of my treatment; it will be sent you free. Address **HENRY C. BRADFORD, M. D., 66 BRADFORD BUILDING, 20 EAST 22D ST., NEW YORK CITY.**

APPEALS TO LOCALS.

State Federation Asks Unions to Support Initiative and Referendum.

Secretary W. E. McEwen of the Minnesota State Federation of Labor, has just sent out an urgent appeal to all labor organizations in the state to support the initiative and referendum bill, which is now before the state legislature. The state federation has been supporting this measure for some time and now asks the assistance of the local unions.

The bill seems to be in danger of being cast into oblivion by the legislature and the state federation wishes the local unions to do all in their power to keep it alive by sending resolutions to the representatives and senators from their own districts.

In the appeal, which is signed by Secretary McEwen, it is claimed that the bill was about to be voted into indefinite postponement had it not been for the efforts of some of the labor people in St. Paul.

ASSESSMENT AGAIN REDUCED

Secretary of Typographical Union Receives Word From International.

Secretary A. Murphy of the Typographical union received notice yesterday from the executive council of the International union, that commencing with the week of March 3, the strike assessment would be only 2 per cent of all money earned by the members. After a thorough canvass of the eight-hour situation as now existing, the council reached the conclusion that another reduction in the assessment was possible.

This is evidence that the great struggle of the printers for the eight-hour rule is practically won, and the members of the local union are greatly pleased to hear that another reduction in the assessment has been ordered. This is the fourth cut that has been made from the original 10 per cent since last October. The local union No. 136 has stood by the executive council loyally, as have practically all the other unions in the country.

Typos to Hold Meeting.

Duluth Typographical union will hold its regular meeting tomorrow afternoon in Labor World hall. As there are many matter of importance, which will be brought up, the meeting will be an interesting one, and a large attendance of the members is expected.

Elect New Treasurer.

The Duluth Allied Printing Trades council, at a recent meeting, elected Edward Hughes of the Typographical union as secretary-treasurer of that organization. A new set of union labels is being distributed by the council to the union offices of the city.

Walter Eastman Married.

An announcement has just been made in Duluth that Walter R. Eastman of the Typographical union, who left this city last fall for Southern points, was married last summer to Miss Emma Funk of Superior. The wedding was kept quiet until very recently when it was learned by some of the young couple's friends. Mr. Eastman was an operator at the Herald office.

Clerks Have New President.

Emil Borth, who has for some time been a prominent member of the local union of retail clerks, was recently elected by his union, as president, to succeed E. Sauer, who has decided to open up a gents' furnishing shop and shoe store in the West end.

Goes to St. Louis.

Henry McLean has accepted a position with the Hammond Packing company at St. Louis. He will have charge of the cooler room of the big plant of the company and will work under R. A. Peers, formerly of this city. Mr. McLean left for St. Louis Thursday evening.

SECULAR SHOTS AT PULPIT.

Cleveland Plain Dealer: The Rochester clergyman who announces that hades is full of people who use tobacco would appear to have an unusual familiarity with that unsavory resort.

Chicago Chronicle: It is not at all surprising that a New York preacher who resigned a denominational charge some few weeks ago because he was "hampered in his preaching by an influential section of his congregation" should now be found writing lurid accounts of the Thaw trial for a sensational newspaper. Whenever a preacher begins to develop a fine sensitiveness with respect to his individual freedom it is usually safe to look for him in a more lucrative job in the immediate future.

New York Commerical: A New York clergyman publicly expounds the doctrine that the mere active membership in a church does not relieve a man of the necessity of plentifully insuring others as to his integrity and financial responsibility. The preacher pointed out the fact that quite recently we have had instances of gigantic rogues serving the devil in the livery of a saint. Some of the more sophisticated of us worldly people have long ago given up the notion that we ought to deposit our money in the hands of a banker simply because he appears at church every Sunday in a long coat and, with serious face, passes the collection plate. It is remarkable that that idea is still held by a few pious persons.

It penetrates and cleanses the minutest crevices of the teeth. It permeates the gums and the lining of the mouth. It is healthful. It is the only thing to use if you have a real genuine interest in your teeth.

The friend of the teeth is SOZODONT.

MUSIC AND THE DRAMA

TONIGHT'S ATTRACTIONS.

LYCEUM—"The Millionaire Detective."
METROPOLITAN—Burlesque.
BIJOU—Vaudeville.

PLAY MAKES GOOD.

Lyceum Audience Pleased With Production of "The Millionaire Detective."

The Millionaire Detective, a man of mystery, Robert Rose, a Wall street broker, Sir Robert Bancroft, a clubman.....Howard Hall
Lester Rand, of Rand, Levy & Co., brokers ..... William Stuart
Moses Levy .....Fred Pierson
Charles Sharp, of the 400, a young broker ..... Frank G. Raymond
Samuel Morrison, president of the Gotham National bank..Joseph Weber
Dr. Sedwick, a wronged husband..... Lawrence Belgard
Perkins, private secretary to Robert Rose ..... Charles Hartley
Eddie, a stenographer .....George Ovey
Rands, office boy .....Thomas Brown
James, the butler .....Charles Hartley
Blindy, an escaped convict..... Charles Williams
Jordan, a plain clothes man..J. Wakefield
Alice Morrison, the banker's daughter ..... Anna Hollinger
Mrs. Sedgwick, Queen of Frenzied Finance ..... Barbara Douglas
Mary Sharp, Charlie's sister..... Viola Vanderhoof

Howard Hall and a capable company presented "The Millionaire Detective" at the Lyceum last evening. The production, one of Charles E. Blaney's, is called a comedy drama, but it verges strongly on the melodrama. It made good with the audience last evening, however, whatever its classification, and will be repeated at the Lyceum again tonight.

The story of the play is an interesting one, and in places the plot gives rise to some exciting situations. Through the efforts of the detective, matters are straightened out satisfactorily, and justice rules and virtue triumphs in the end. Mr. Hall is a tall young man who took the part of the detective. As Robert Rose and Sir Robert Bancroft he made a good impression.

Mr. Howard's support was satisfactory. George Ovey brought many laughs as Eddie, the stenographer, and Anna Hollinger was attractive as the banker's daughter. Barbara Douglas was sufficiently brazen as Mrs. Sedgwick, queen of frenzied finance. William Stuart, Fred Pierson, Frank Raymond and Joe Weber gave a good account of themselves, and Louise Horner pleased the audience in the capacity of the maid.

WILL FIGHT THE CASHMAN BILL

Duluth Delegation Opposing Measure Will Visit St. Paul.

Duluth jobbers are much interested in the Cashman railroad tariff bill, which will be given a public hearing before the proper legislative committee in St. Paul next week, and a delegation from Duluth will be present at the hearing, to argue against the passage of the bill. The measure provides that railroads shall charge on the same basis for long and short hauls.

"Duluth and Minneapolis will practically be destroyed as jobbing centers if the bill is passed," said Representative N. F. Hugo, who is in the city to confer with his constituents relative to the matter. "The measure places wholesalers and retailers on the same basis, greatly to the disadvantage of the former. Not only that, but it will be a great benefit to Chicago jobbers, who are always trying to cut into the Northwest territory.

"Duluth and Minneapolis are fully alive to the dangers of the situation. The local Jobbers' association will send a number of its strongest members to the capitol next week, where they will work in conjunction with the Duluth Commercial club and the Twin City wholesalers. I cannot say what the chances are of passing the bill until after the hearing, but the business men of this part of the state should do what they can to stop it."

BLONDES FOR WATTERSON.

Does Not Fancy Spanish Brunettes Who Are Using Titian Dye.

Louisville, March 2.—Feeling secure from attack by dark dressed beauties of the Blue Grass state while he is enjoying the balmy atmosphere of faraway Spain, Col. Henry Watterson, in a letter published in the Courier-Journal, softly whispers to his readers that he prefers the blond type to the brunette when it comes to female pulchritude. He says, writing from Cadiz:

"It was Byron's magnificent apostrophe more than anything else which brought us to Cadiz. Of sights there is nothing to see here except a very beautiful little old city, all marble, white, peeping out of embroideries of orange and olive at the ships that come in from Tangiers and Gibraltar, and sometimes from Marseilles and Liverpool.

"The town itself is rather sleepy. The things that inspired the great English bard are no longer visible to the naked eye, if ever they existed outside of the poet's fancy.

"I must confess that the Andalusian type was never fetching to me. I much prefer the dizzy blondes. But don't you tell anybody. Indeed, the Spanish girls are beginning to affect brickdust, so that dyestuffs of the Titian variety have gone up in the market the last few years.

"Howbeit the streets of Cadiz, on a Sunday afternoon are filled with comely, well dressed women, while of 'dark eyed hourls,' half hid by black lace veils, there were a plenty."

Cure for Drunkenness

Orrine Treatment is to be Used at Home Without Publicity, or Loss of Time from Business.

Thousands of persons who really want to quit the use of whiskey or beer, realize that they cannot do so without medical help, yet they can not afford the time or perhaps the money to go to a sanitarium. Happily a new cure for drunkenness has been discovered which is to be taken at home and costs less than the average drinker will spend in a day for drink.

In using Orrine there is absolutely no publicity, as the remedy is sold by the leading druggists in nearly every city and town, or it can be sent by mail. Sure relief is positive when Orrine is used. So uniformly successful is this treatment that in every box is a registered guarantee which entitles you to a refund of your money if Orrine fails to effect a cure.

Orrine is in two forms, No. 1, a secret remedy, absolutely tasteless and odorless which can be given in food or drink without the patient's knowledge; No. 2, in pill form for those who wish to be cured. The price of either form is $1 a box. Send to the Orrine Co., Washington, D. C., for free booklet and consultation blanks.

The desire for liquor is soon destroyed after Orrine treatment is commenced, and before long the patient is freed from the terrible drink craving, and the drink will not be missed.

Orrine is for sale by F. W. Kugler & Co., 108 W. Superior St., Duluth.

ADDITIONAL SOCIETY NEWS

A pleasant surprise party was given Tuesday evening in honor of George Mack of 225 Eleventh avenue west. The affair was in honor of the host's fifteenth birthday, and those present were: Misses—Ella Clausen, Annie Olson, Mabel Guyette, Lillian Laskey, Edith Mack, Rosa Manella, Mamie Larson, Nellie Nelson, Annie Gunderson, Edla Olson, Chrissie Manella, Alma Johnson, Agnes Nelson, Ella Nelson and Esther Mack, and Masters Earl Server, Herbert McMeekin, Glen Goldsmith, David Burg, Ernest Ruden, George Olson, Charles West, Joe Manella, Francis Manella, George Brenton, George Gunderson, Victor Wilson and Stanley Laskey.

AT MINNESOTA UNIVERSITY

Need of More Money for Work of the Institution.

Minneapolis, March 2.—(Special to The Herald.)—The action of the Minnesota Alumni association in printing and distributing pamphlets, showing the exact financial relation between the state and the university, has met so far with excellent success. The board of regents have met, at the request of the association, and have requested larger appropriations from the legislature. The special needs of the university are—increased salaries for professors and an enlargement of the campus. There seems to be a general approval of the action of the regents throughout the state, as indicated by the press and the letters received by E. B. Johnson, secretary of the association, very few of which express disfavor. The legislature will probably take no action on the bill until the middle of March. The matter is now in committee, and will probably come before the solons in the omnibus appropriation bill, as has been the custom in the past.

• • •

Rivalry and contests between sophomores and freshmen have been expressed more than ever of late. A sophomore girl seizing the freshman constitution, the first of the week, ran to the library rotunda and threw it with all her power over the postoffice boxes into the office of the Minnesota Daily. Immediately the gallant freshman president scaled the walls of the postoffice and dropped down on the other side, but the constitution had disappeared. It had been passed out through a faculty box, the freshman thought, and had to give up the chase. The next day there came a challenge to the sophomores, offering to fight for the constitution. Promptly the sophomores declined, saying that they had the constitution and didn't need to fight. The freshmen still bewail the loss of their manuscript.

The freshmen are trying to even up their score now against the sophomores, and made one point. A sophomore stepped into a telephone booth the other night and had just removed the receiver, when a sharp click told him that he was locked in, by a freshman, he knew.

And then he discovered that the phone was out of order and he could not summon help. And so there he stayed under lock and key for two hours while a young lady whom he was to take to a party that night, nervously walked the floor at home and waited in vain.

• • •

University treasurer reports $128,512 collected this year as fees from the students. The amount exceeds that collected any preceeding year, and $8,000 still remains to be paid by law students at the beginning of the third term.

Indoor track work has been progressing vigorously during the past two weeks and excellent results in the spring are expected by Dr. Williams.

Minnesota gymnasuim squad will attend the intercollegiate meet at Chicago this spring. The team is training hard and will be in excellent shape to give a few pointers to some of the other institutions.

Six candidates for the Pillsbury oratorical contest have been chosen and the final contest will come off Monday March 11.

The university Y. W. C. A. celebrated its fifteenth anniversary Wednesday evening in the new woman's building. About 225 attended the banquet and toasts were given by the present officers and secretaries of former years.

A new steam turbine, the first machine in the Northwest, has been installed in the engineering department. The rotors are of finest construction, capable of a speed of 12,000 revolutions per minute or 400 miles per hour.

About twenty-two students from Duluth attended a meeting of the Duluth club held Monday evening at the Kappa Sigma chapter house.

Candidates galore are in the field for election to the '09 Gopher board. Electioneering among the sophomores is hot, and the race promises to be most exciting. There are already over forty in the field and more are expected next week. The choice of members for the gopher board is recognized as being one of the most important actions of any class, for the Gopher is the monument by which each class is remembered.

That's all. 'Nuf said, when you say that Hollister's Rocky Mountain Tea is the greatest family remedy on earth. It does you good going and coming. 35 cents, Tea or Tablets. Ask your druggist.

BRUTAL FATHER FINED.

Drove Young Son, Stripped of Clothing, Out Into Fierce Storm.

Fairmont, W. V., March 2.—At Lumberport, a miner, John Halcove, stripped his little boy of his clothing and drove him from home in the face of a fierce storm. The boy was almost frozen to death before he was found by a family, near his home.

Humane society officers here were notified and arrested the father. The boy stated on the witness stand he had been treated in a similar manner on former occasions. A heavy fine was imposed upon the father, who was also placed under bond to treat his family in a proper manner.

MAKERS OF ARROW COLLARS

THE TIME THE PLACE THE MEN

"Spend your time in nothing which you know must be repented of. . . . . In nothing in which you could not review with a quiet conscience on your dying bed; in nothing in which you might not safely and properly be found doing if death should surprise you in the act."—Baxter.

What is worth doing, is worth doing WELL; and what is WORTH doing well can be BEST done when opportunity permits. TODAY is yours—tomorrow is not.

Yavapai County, Arizona—the land of magnificent realities, where the rich deposits of copper and gold have made many of the world's greatest mines (United Verde, Congress and many others). It is here the properties of the Arizona Copper-Gold Mines Company are located and being developed into what is believed will soon become one of the most profitable group of mines in the entire State.

CHICAGO, ILL., March 2, 1907.

For several months I have been negotiating for a Copper property. With the possible exception of Thomas W. Lawson of Boston, I believe more mining properties are offered me to finance than are offered any other individual or firm in the United States. Like Mr. Lawson, I can have my pick, and, like that illustrious fighter for fair play, I have found it difficult to obtain anything that in all respects met with my requirements. After several months' endeavor, coupled with great expense, and with the assistance of some of the most reliable mining Engineers and Metallurgists, I have selected a property located about 15 miles east of Humboldt, Arizona, in Yavapai County, about 7 miles south of the great United Verde Mines owned by Senator Clark and which latter property has a reputed profit of one million dollars a month.

The properties include 17 valuable claims 600 feet by 1,500 feet, a mill site, the absolute control of the water, all of which embraces an area of 357 acres. The properties are owned by the Arizona Copper-Gold Mines Company, formerly the Arizona Gold Lode Mines Company, and the properties are developed to the point where there is no longer any question as to their mineral value or their productive ability.

There is a good equipment in the way of hoists, tracks, boilers, pumps and all other necessary machinery, the same having met the requirements during the proving period of these properties. The Company does not have one cent of indebtedness and is officered and managed by men of the highest reputation for integrity and ability in the entire country. There is apparently no element in the enterprise but what reflects directly to the advantage of all who desire a safe investment where substantial dividends can be confidently expected at an early date and where the speculative value of the stock is great. The price at which I will offer the first block of Treasury stock to the public is about one-third or one-quarter the price that I believe the same block of stock will be worth within the next four months. Six months at the outside should see these properties being operated upon a large scale, with the return average profit ranging between $500 to $1,500 per day.

The reports of mining engineers, attorneys and specialists who have investigated these properties for me are such as leave no doubts in my mind that these properties can be made to rank with the largest producers of both Copper and Gold of the entire State of Arizona, if not with any State in the Union.

Read carefully the following descriptions and comments and forward to me immediately your subscription for such a block of this stock as you may care to own. The price at which the first 100,000 shares will be sold is 30 cents per share cash, or 35 cents per share if you pay for it in six monthly installments. You may not care to pay $1,000.00 per share for Calumet and Hecla with a par value of $25.00 and you may not care to pay $198.00 per share for Calumet and Arizona with a par value of $10.00 per share. You would have been glad of the opportunity to buy either of these and many other valuable Coppper stocks if at their inception you could have conceived their ultimate value, but at their inception there were hundreds of skeptics who passed up their opportunities, not even having the courage to investigate the representations made for these excellent properties.

If you fail to investigate the merits of the Arizona Copper-Gold Mines Company and its properties, you will probably be in the same boat in the course of time as the man who passed up some of the other good things. It is "up to you," but I would respectfully suggest you investigate it AT ONCE.

140 Dearborn St., Chicago, Ill.

History.

The copper and gold deposits of Arizona are, as a rule, peculiar in their formation, in so far as the gold ores lie at or near the surface, and underneath the oxidized ore, heavily impregnated with gold, lie the sulphide ores heavily impregnated with copper.

The properties of the Arizona Copper-Gold Mines Company were originally secured and operated as gold mines purely, but during the process of development work and proving the properties for their gold values, several shafts were sunk and tunnels driven at depths varying from nearly 200 to 400 feet, and, as in other sections of the district, with depth the operators began to run into copper sulphides with indications suggesting the existence of enormous beds of exceedingly high-grade copper ore, assays from these ores showing some results as high as forty per cent, or eight hundred pounds of copper to the ton. Such values, however, are unusual and seldom prevail anywhere. A percentage value of 3 per cent or 4 per cent is, at the present price of the metal, an excellent average and one upon which very profitable operations can be conducted. The average copper results from the Arizona Copper-Gold Mines Company will apparently exceed 5 per cent, while the gold values, as shown by most exhaustive sampling throughout the various drifts, tunnels, open cuts and shafts with which these properties are punctured, will average about $27.00 a ton.

The Value of Properties Owned by Arizona Copper-Gold Mines Company.

These properties include 17 full claims, covering an era of 357 acres. The names of the claims are Redcloud, Washburn, Leghorn, Little Johnnie, O. K., Royal, Gold Lode, Independence, Pittsburg, New York, Todd King, Bugler, Anaconda, Tapper, True Vein, Standard, Prize and Prize Mill Site.

The ore veins on all these claims are what is known as the true fissures. They dip into the granite at an angle of about 45 degrees from the horizon and increase in width from 2 to 3 feet on the surface to over 6 feet at a depth of 368 feet, which is the bottom of the Leghorn shaft. The oxidized ores, heavily-impregnated with free gold, extend to an approximate depth of 200 feet. Below this the copper sulphides show up in large quantities.

The development work on these vast properties aggregates about 5,000 feet of shafts, tunnels, cuts, drifts, levels, etc., practically all in ore and ready for immediate mining and milling.

Five of these claims are timber claims and insure the Company of ample timber for both fuel, if they continue to use wood, and for all necessary mining purposes for all time. It is the intention of the Company to substitue oil for wood as fuel.

Improvements.

These consist of every necessary building for housing the supertendent and men, assay office, power house, stables, corrals and all else necessary to the comfort and convenience of the Company's employes; a thoroughly modern ten-stamp mill, equipped with two five-stamp batteries (Gates Iron Works); three Frue Vanners, an 80 h. p. boiler and an 80 h. p. Corliss engine, together with crusher, automatic feeders and all other necessary appliances.

This mill can treat 50 tons of ore per day coming from the various mines belonging to the Company. The mill will be but slightly enlarged, owing to the close proximity to the copper ores which have to be shipped to the smelter at Humboldt, 16 miles away, so that with slight alteration the present mill on the property, it is thought, will answer the requirements that may be made upon it in connection with the gold-bearing ore.

At each of the various mines that have been operated there is a complete equipment of hoisting machinery, boiler, etc.

Ore Blocked Out Ready For Mining and Milling.

There is visible and capable of meaeasurement a sufficient tonnage of ore, in the various shafts and levels, to approximate over $200,000,000. It is estimated that the ore blocked out ready for mining and milling represents but a small percentage of the total gold ores available for this purpose. This does not include the vast possibilities in the matter of copper production, but refers exclusively to the surface or oxidized ores.

Newspaper Views of Copper.

From Chicago Eve. Post, Feb. 29, 1907.

THE COPPER SITUATION.

In their copper letter today Logan & Bryan say:

"That consumption of copper is running almost neck and neck with production is quite evident by the price of metal. Copper mines cannot be developed in a day, a week or a year. Development takes time, money and an abundance of patience; therefore holders of copper stocks returning handsome dividends need have no fear of their income being impaired right away by opening up of new properties.

"The electrical field alone offers immense possibilities in way of consumption. In a great measure it is still in its infancy and the way the demand for the metal has increased this year from this source alone has been an eye-opener for the skeptics and prophets of theory, 'the advance will kill the demand' and 'some other metal will be used instead of copper.' This latter has been tried, but without success. It has been clearly proven by thorough experiments and tests that copper is the only true conductor of electric current. Electricity for lighting, heating, motive and factory power is coming into universal use. Where in the stock market can dividends paid by copper mines be duplicated?

"Last week the Copper Range sold 1,-600,000 lbs. of copper at 25c a pound for June delivery. The cost of production a pound to this company, mining, milling, labor, etc., is about 8c. This is a fair illustration of what the producing mine is doing today. Now, what are they doing for stockholders in way of dividends? Copper Range puts $2 quarterly, and gossip says the next dividend will be at the same rate. Calumet & Arizona pays $5 quarterly; North Butte, $2 quarterly; Mohawk, $4 semi-annually; Osceola, $6 semi-annually; Quincy, $4.50 quarterly; Utah, $3 semi-annually; Wolverine, $9 semi-annually; Butte Coalition, 50c quarterly; Shannon, 50c quarterly."

From Chicago Journal, Feb. 27, 1907.

Whether or not investors see merit in copper stocks can be readily determined by comparing the action of the Boston market with the New York list. Coppers, with but one exception, have been singularly free from manipulation. The metal situation in itself has been incentive enough to start activity and promote strength in various groups of copper stocks.

Consumers are unable to supply their wants in full at better than three to four months' delivery, notwithstanding mines are being worked twenty-four hours a day. The reported refusal of 25½ cents per pound for 400,000 pounds of lake copper for May and June delivery lends color to this belief.

• • •

From London comes the information that the price of copper metal will advance sharply during the coming month. The bears have been caught heavily short of forward delivery copper and predictions are that before April the price will be raised at least $50 a ton.

From Chicago Daily News, Feb. 27, 1907.

Logan & Bryan: "The years 1906 and 1907 will go down in history as the most successful in the copper industry, not only as to price obtained for metal, but the richness of ore taken from lowest levels yet reached in the big producers has added immeasurably to the confidence of investors. Calumet & Hecla and Tamarack in the Lake Superior district, most of the Butte mines in Montana, and Calumet & Arizona and Copper Queen in Arizona all show increasing richness at depth. There is a tendency on the part of some of the producing companies to add to their present territory by taking over adjoining properties, notably the case of Calumet & Hecla, in acquiring ownership of Osceola. The spirit of consolidation, enlargement of mining territory, is on. The breaking up of winter is expected to find unprecedented activity in the mining world. Manufacturers of mining machinery are months behind in their deliveries. There is no evidence of a tendency to halt; the demand for the metal does not permit of such a thought."

Officers and Directors of the Arizona Copper Gold Mines Company:

R. H. Burmister, President; of the firm of R. H. Burmister & Sons, Wholesale Merchants, Prescott, Arizona.
Chas. McKinney, Secretary; President State Normal School, Milwaukee, Wisconsin.
M. B. Hazeltine, Treasurer; Cashier Bank of Arizona, Prescott, Ariz.
C. N. Smith, Director; Retired Life Insur. Agent, Milwaukee, Wis.
J. E. Wildish, Director; Attorney, Milwaukee, Wisconsin.
Dr. J. W. Powell, Director; Practicing Physician, Rosendale, Wis.
Geo. C. Duffie, Director; Ex-President Ripon College, Ripon, Wis.
P. G. Norris, Director; Lawyer, Prescott, Arizona.
M. V. Jones, Director; Capitalist, Picketts, Wisconsin.

Why The Public is Offered This Stock.

While endeavoring to find a copper property that would justify any investor's money, I learn of the possibilities of these properties. I found that the men who control them were conservative, conscientious, capable and careful men, who had not gone beyond the circle of their own acquaintances to ask assistance in developing and equipping these vast properties.

My representatives, anxious to secure such a property as I describe, represented to them the advantage of having sufficient capital raised quickly and practically in a lump with which to supply some necessary features that were lacking, such as power drills, ore teams and wagons in sufficient number, oil tanks for the storage of oil (thus effecting a great economy in the item of fuel) and the supplying of such necessary machinery facilities as the increasing copper production might make expedient, and for any and all other purposes that would figure in economical management and, by the use of all necessary facilities, immediately supplied, put the properties on a profit-earning basis of the largest possible magnitude of which they are capable.

The arguments of my representatives prevailed, with the result that I am permitted to offer the general public a block of this stock at a ridiculous low figure and one that will very promptly advance.

Of the amount of stock to be sold, 100,000 shares is now offered, in blocks of not less than 100 shares, at 30 cents per share cash, or 35 cents per share to those who prefer to buy on six monthly installments.

Estimated Profit to Stockholders.

The authorized capital stock of the Arizona Copper-Gold Mines Company is 1,500,000 shares of a par value of $1.00 each. There are in the treasury for sale 700,000 shares.

There has been spent on the property today a little more than $70,000 cash, provided by the various officers and directors and their personal friends, who by their initial risk and investment have brought these properties to a point where their estimated value may be reckoned into the millions. It is believed by the engineers, as well as the officers and directors, that within 90 days after the beginning of operations up to the present capacity of the mill facilities, the Company can earn net from $500.00 to $1,000.00 per day.

On this basis the present block of stock, costing at the rate of 30 cents per share cash, would net the investor from 30 to 60 per cent annually on his money invested, or from 10 to 20 per cent on the par value of the stock. This would give the stock a value of between $2.00 and $3.00 per share. While this is not a certainty, it is a possibility and one that the officers and directors of this Company will endeavor to have realized at the earliest possible moment. Their own funds are involved in the enterprise and they are just as anxious to make dividends as you are anxious to receive substantial interest for the use of your money.

There is no element of this enterprise but what will bear closest investigation on the part of any one who is fair enough to himself to be willing to investigate any bona fide proposition involving an investment of his funds and presented by men of ability and of reputation above reproach.

According to Jeremy Collier, "every one has a fair turn to be as great as he pleases." This applies in the manner of investments as in the matter of fame. We do ourselves an injustice if we are unfaithful to the degree that we do not take advantage of the legitimate opportunities that come within our notice and which can serve us to our profitable advantage provided we give them proper consideration.

PIERCE UNDERWOOD,
Financial Agent,
Arizona Copper-Gold Mines Co.,
140 Dearborn St.,
Chicago Ill.

CUT OUT AND MAIL TODAY.

D. H.—2.

.....1907.

Pierce Underwood,
140 Dearborn Street,
Chicago, Ill.

Dear Sir: I hereby agree to subscribe for ..... Shares of the Treasury Stock of the Arizona Copper-Gold Mines Company, Prescott, Arizona, and agree to pay you ..... per share (30c per share if your remittance pays your subscription in full, or 35c per share if you pay in six month installments). I enclose herewith my remittance for.....

Please acknowledge receipt.

Yours truly,

Name .....
Address .....
Town ..... State.....

NOTE—No subscription for less than 100 shares will be accepted. This stock is fully paid and non-assessable.

Unless you are careless about your future income you will buy this stock at once.

REMEMBER—This Company can succeed without your money better than you can profit without its stock. Investigate, if you don't care to take my word for it, and you will find out what I did after I spent large sums of money to make sure that you can't find a better investment in the mining world.

DEFECTIVE PAGE

SERVICES FOR SUNDAY IN DULUTH CHURCHES

Dr. Ora S. Gray, of Amherst, Mass., Will Address Y. M. C. A. Meeting on "Four Famous Fools."

Rev. E. S. Lindblad of St. Paul, State Baptist Sunday School Missionary, to Preach in West End.

Dr. Ora S. Gray of Amherst, Mass., will address the men of Duluth at the Y. M. C. A meeting at the Lyceum theater tomorrow afternoon. He has chosen for his subject "Four Famous Fools." W. I. Prince will preside over the meeting and there will be music by the orchestra and a vocal solo by Miss Frances Woodbridge.

• • •

At Pilgrim Congregational church Rev Alexander Milne, the pastor, will preach in the morning on "The True Staff of Life" and in the evening on "The Beatitude For the Peacemakers." Following is the musical program:

MORNING

Organ—Andante.....Guilmant.
Response.....Tours
Duet—"The Lord is My Light".....
.....Dudley Buck
Miss Woodbridge and Mr. Martin.
Solo—A Ballad of Trees and the Master".....Chadwick
Mr. Gearhart.
Postlude—March.....Beethoven

EVENING.

Organ—Serenade.....Braga
Dust—"Rise, Salem, Rise".....Brackett
Mr. Martin and Mr. Gearhart.
Solo—"Hold Thou My Hand".....Briggs
Miss Woodbridge.
Postlude.....Buck

The choir consists of Miss Frances Woodbridge, soprano, Mrs James Walsh, alto; J. L. Martin, tenor; H. G. Gearhart, bass; Miss Carlotta L. Simonds, organist.

• • •

Services at St. Paul's Episcopal church, Rev. A. W. Ryan, rector; Rev. R. S. Reid, assistant, will be as follows: 8 a. m., holy communion, 10 a. m., Sunday school. 11 a. m., holy communion and sermon on "The Transfiguration," 7:30 p. m., evening prayer and sermon. Lenton program for this week: Monday, Wednesday and Saturday at 5 p. m.; Tuesday and Friday at 8 p. m.; Thursday, holy communion at 10 a. m. Following is the musical program for tomorrow's services:

MORNING.

Processional—"We Sing the Praise"
Introit (solo)—"O Lord, Correct Me".....Handel
Charles Appelmgen.
Communion service (from service book.)
Hymn—"Christian, Dost Thou See Them?"
Solo—"Come Ye Blessed".....Gaul
Mary Syer Bradshaw.
Anthem—"Lord of Our Life".....Field
Recessional—"Glory Be to Jesus".....

EVENING.

Hg mw mw mw mwamwamwamwww
Processional—"We Sing the Praise"
Canticles.....Chanted
Hymn—"With Broken Heart".....
Anthem—"O Saving Victim".....Cantuance
Charles Appelmgen and Choir.
Orison—"Softly Now the Light of Day".....
Recessional—"Glory Be to Jesus".....

A. P. W Custance, organist and choir master.

• • •

At the First M. E. church, the pastor, M. S. Rice, will preach in the morning on "The Greater Vision" and in the evening on "Man's Kingship."

• • •

At the First Presbyterian church, Third avenue east and Second street, Rev. N. L. Upham will preach at both services. At the morning service at 10:30, the theme will be St. John's Pending of Christian Service—A. D. 97," and at the evening service, at 7:30, the theme will be "The Mind of Christ For Us."

• • •

Rev. H. K. Madsen will speak at the vesper service Sunday at 4 p. m. at the Y. W. C. A. Mr. Madsen has lately returned from Norway, and will talk about the religions of that country. Miss Gladys Olson will sing.

• • •

At the First Christian church, Fourth street and Fifth avenue west, Rev. Baxter Waters, the minister, will preach in the morning at 10:30 p. m. Miss Harding will sing. The theme for the evening sermon will be "Clarity." Miss Bong will sing in the evening. Sunday school meets at noon. Y. P. S. C. E. at 6:30 p. m.

• • •

At the First Church of Christ, Scientist, Ninth avenue east and First street, regular services will be held at 10:45 a. m., the subject being "Man." The regular Wednesday evening meeting will be held at 8 o'clock.

• • •

At Trinity Pro-Cathedral, Twentieth avenue east and Superior street, Rt. Rev. J. D. Morrison, D. D., bishop of Duluth; Rev. Arthur H. Wurtele, vicar, services for the third Sunday in Lent will be as follows: Holy communion at 8 a. m.; litany, sermon and holy communion at 11 a. m. The subject will be "The Incarnation" and the preacher, Rev. Arthur H. Wurtele. Sunday school and Bible class meet at 12:30; vesper service at 5 p. m., subject, "Divine and Human Wisdom." Daily Lenten service at 5 p. m.; men's meeting with an address by Bishop Morrison and a discussion will be held Tuesday evening at 8 p. m.

• • •

At the Endion Methodist church, First street and Nineteenth avenue east, the pastor, Rev. John Walker Powell, Jr., will preach at 10:30 a. m. on "The Higher Righteousness," the third sermon on "The Platform of Jesus;" and at 7:30 p. m. on "The Golden River," second in a series of "Lenten Messages." Mrs. Collins will sing.

• • •

At St. Luke's Episcopal church Nineteenth avenue west and First street, Sunday school meets at 10 a. m.; Holy communion and sermon at 11 a. m. The subject of the sermon is "The Call of the Cross." The music is as follows:

Processional—"Onward, Christian."
Kyria.....Gilbert
Gloria Tibi.....Anon
Hymn—"Christian, Dost Thou See Them."
Duett—"Angel".....Rubinstein
Miss Fanny Calverley and Miss Abbott.
Sursum Corda.....Ancient Plain Song
Sanctus.....Spohr
Benedictus.....Selby
Communion Hymn.....Sullivan
Agnus Dei.....Gilbert
Organ solo—"Nocturne".....Reinecke
Miss Pieno.
Nunc Dimittis.....Gregorian
Recessional—"O, Help Us, Lord."
Organist, Miss Eleanor Pineo; choir leader, Miss Ethelyn Abbott.

• • •

At Grace Methodist Episcopal church, Twenty-second avenue west and Third street, Rev. Joseph W. Robinson, pastor. There will be services at 10:30 a. m., and 7:30 p. m. The morning topic is "Youth of Famous Folks," and the evening topic, "Spiritual Concentration." Sunday school meets at 11:45 a. m., the Epworth League at 6:45 p. m. The music will be under the direction of Mrs. A. N. Hopkins.

• • •

At the First Norwegian Danish M. E. church, Twenty-first avenue west and Twenty-first street, Rev. H. K. Madsen will preach at 10:30 a. m., and 7:45 p. m. The choir will sing morning and evening. Sunday school meets at noon. The Epworth League meets at 7 p. m.

• • •

At the Glen Avon Presbyterian church, Woodland avenue and Lewis street, Rev. John Culbert Farles, pastor. Rev. J. T. Moody will preach morning and evening.

• • •

At the First Swedish Baptist church, Nineteenth avenue west and First street, the Sunday school will join in the morning service at 10:30 and will be addressed by Rev. E. S. Lindblad of St. Paul, Sunday school missionary for the state of Minesota. Evening service begins at 7:30 with sermon by the pastor, Rev. A. Edstam, followed by baptism and celebration of the Lord's supper. The Young People's society has its meeting at 5 in the afternoon.

• • •

At the Second Presbyterian church, Superior street, west of Fifteenth avenue, Rev. S. A. Jamieson will preach morning and evening. There will be sacrament of the Lord's supper in connection with the morning service. The society of Christian Endeavor meeting is at 6:45 p. m., leader, Boyd Gergan.

• • •

At the Central Baptist church, Twentieth avenue west and First street, Rev. J. Wilfrid Loughridge will preach at 10:30 a. m., on "Vision," and at 7:30 p. m., on "An Open Door." Young People's meeting is held at 6:30 p. m.

• • •

Services at St. John's Episcopal church, Lakeside, will be as follows: 10 a. m., Sunday school, W. E. Magner, superintendent; 11 a. m., morning prayer, holy communion and sermon; 5 p. m., evening prayer with sermon. Rev. A. R. Parker, priest in charge.

• • •

At the Lakeside Presbyterian church, Forty-fifth avenue east and McCulloch street, Rev. H. G. Sutherland will preach both morning and evening. The theme for the morning will be "The Origin, Completion and Ethics of the Atonement." Sunday school will convene at noon, and the Christian Endeavor will hold its monthly consecration service at 6:45 p. m. The subject for the evening service will be "A Full Reward."

• • •

At the Lester Park M. E. church, Rev. James A. Geer will preach at 10:30 a. m. on "Golden Words About Our Gold," and the choir will sing a selection entitled "Pilgrims." In the evening the pastor will take for his subject "A Train Load." The choir will sing a selection called "Jesus, the Very Thought of Thee." The Sabbath school will convene at 12 o'clock and the Epworth league service will be held at 6:30 with Diana Hanford as the leader.

• • •

At Park Point Mission, Sunday school and the Bible class will meet at 3 p. m. Cottage service with lecture at the residence of Mrs. Kingsley, 1327 Minnesota avenue, at 8 p. m. The subject is "The Message of the Chronicles" and the speaker, Rev. Arthur H. Wurtelle. The guild will meet on Tuesday afternoon at the residence of Mrs Cosford, on Twenty-eighth street.

• • •

At the Bethel Baptist church, Ninth avenue east and Third street, services will be held at 10:30 in the morning and 7:30 in the evening, conducted by the pastor, Rev. Hjalmar Henrickson. Sunday school will meet at noon. The Woman's Mission society will hold its monthly meeting at 4:30 in the afternoon.

• • •

At the Trinity Norwegian Lutheran church, Fourth avenue east andw Fifth church, Rev. M. Bjornsen, pastor, there will be services at 10:30 a. m. and 7:45 p. m. Sunday school at noon. The Y. P. S. will meet Wednesday evening at 8 o'clock, at the home of Miss G. Sherman, 924 East Sixth street.

• • •

At the First Norwegian Lutheran church, First avenue east and Third street, the pastor, Rev. J. H. Stenberg, will preach in the morning on "The Authority of Christ," and in the evening in English on "The Good Choice." The Sunday school meets at noon, the topic for the Bible class being "Abraham Pleading for Sodom."

• • •

At Betherda Norwegian Lutheran church, Sixth avenue east and Fifth street, the pastor, Rev. Theodore J. Austad, will conduct regular services at 10:30 a. m., and at 7:45 p. m. Norwegian Sunday school meets at 9 a. m.; English Sunday school at noon.

• • •

At St. Paul's German Evangelical church (German Evangelical synod of North America), Tenth avenue east and Third street, Rev. G. G. Bizer, the pastor, will hold the regular services at 10:30 a. m. and 7:30 p. m. Sunday school meets at 9:30 a. m.

• • •

At the Star of Hope Mission, a meeting will be held at 3 p. m. The regular evening service will begin at 7:45 p. m., when A. R. Merritt will be the speaker. Misses Vennie and Mary Pavcett will sing Monday. The young people of Asbury Methodist church will conduct the service. Rev. Thomas Grace will speak.

• • •

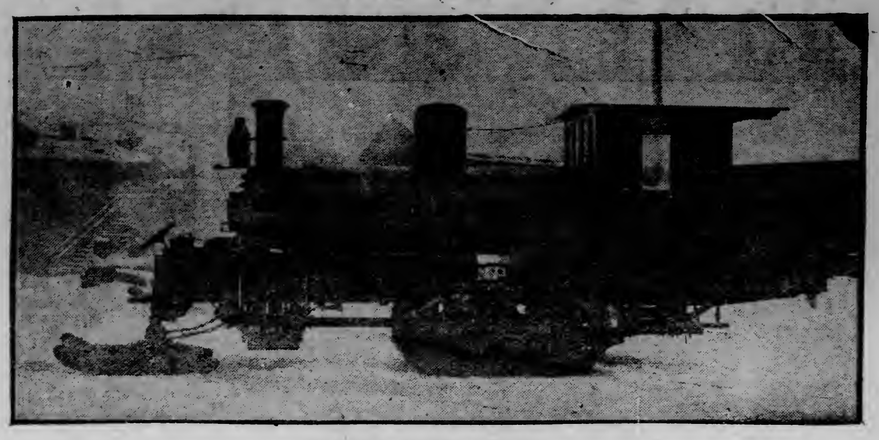
At the African Methodist church, services will be held at 11 a. m. and 8 p. m. In the evening Rev. S. B. Moore's topic will be "The Need of the Church for Men and the Men for Church." A class meeting is held at noon, Sunday school at 2 p. m. and song service at 7:30 p. m.

• • •

At Zion Afro-American Baptist church, Kalamazoo hall, there will be services at 8:30 p. m., when the pastor, Rev. G. A. Oglesby, will preach. A special musical program has been prepared.

O. S. GRAY,
Who Will Epeak to Men at the Lyceum Tomorrow Afternoon.

QUEER LOGGING ENGINE DOES THE WORK OF MANY TEAMS IN WOODS



UNIQUE LOGGING ENGINE.
In Use by Contractors in Northern Minnesota.

This is the age of invnetion. Proof of this fact is to be found in the woods of Northern Minnesota, as well as in the Metropolitan centers of the East. Herewith is shown a photographic reproduction of a time and labor saver that has proven and is proving of great value to certain Minnesota logging concerns.

The queer looking object pictured hasn't any special name. It really is a locomotive, designed to operate on an ordinary road instead of on rails, and is used for hauling loads of logs through the woods. The particular locomotive pictured here is owned by the Beltrami Cedar & Land company, with headquarters at Blackduck. It was shown in Duluth this week by J. R. Stewart, who is connected with the company. Ross & Ross of Kelliher have a similar engine, and are using it to good purpose in the woods about Kelliher.

As is shown, the engine has wheels behind and sled runners in front. It is driven by a sprocket wheel and roller chain attachment, and is guided by a pilot, who sits where the cowcatcher of the ordinary locomotive is. There is a cold position on a winter morning, but the pilot is well prepared with fur coat, mittens, etc. The plan is to have the steering gear placed in the cab next winter, to afford a warmer position for the pilot.

The crew of the logging train consists of an engineer, a fireman, a guide or pilot, and a conductor. It is the duty of the conductor to see that his train of sleds are properly hooked together.

The locomotive pictured here draws six immense loads of poles and one of posts at the same time progressing at a speed of five miles an hour and going up and down hill with ease. It makes three round trips a day over its regular run, which measures eight miles in length. This means a total distance traveled of forty-eight miles in one day, which is more than any workteam could accomplish. It is figured that one engine of this kind will do the work of fifteen to twenty four-horse teams.

The thing burns 3,100 pounds of coal a day, and carries twenty tons of fuel along with it. Stations for taking on water are provided about every three miles. It takes five minutes to "tank up." An extra water tank is provided for emergencies.

During the summer time the runners are taken off the locomotive and it is used for a hoisting engine, or else is placed on car wheels and used for switching purposes on the railroad.

"SEEING DULUTH" FROM A NOVEL POINT OF VIEW

Unknown Guide Conducts Patrons on An Interesting Tour.

Budding Humorist Writes Entertainingly to the Herald.

Some Duluthian with a rather facile pen has sent to The Herald office a literary concoction which he calls "Seeing Duluth," with the request that it be published if it is "worth while." He modestly sidesteps all credit ab a budding humorist, by neglecting to sign his name.

Some of the local "hits" are timely and others are base slanders, but they are given as sent in:

"This way, please, if you 'intend taking the 'Seeing Duluth' trip. All it costs you is $1 or two shares of Western Mount stock. The stock may not be worth 5 cents now, but we will accept it and tip our broker to boost it tomorrow. Every one ready? All right, we're off.

"That large building you see in the heart of the Bowery is the Lenox hotel. It was such a success that before the roof was all on they had to commence pulling it off, so that more stories could be added.

"This block, ladies and gentlemen, is the famous Bowery. It is such a beauty spot that the citizens cannot mar the scenery by tearing the buildings down. Each time there is a fire on the Bowery the firemen, while trying to put it out, pray that they cannot. We might mention, also, that one of the aldermen would give about five years of his life if he could have the Bowery given the No. 23. He is a hotel man.

"This large handsome building is the Spalding hotel. It is said that the land on which it stands was once sold for a keg of amber colored fluid and $1. You can verify this fact by finding the author of the story.

"This, ladies and gentlemen, is the Commercial club. Here it is that the electric lines which radiate (?) from Duluth to all points on the ranges were first talked of and built.

"The street we are traversing is called Superior street. It is fifteen miles long and has three chapters or periods.

"The periods or names are Grand avenue, Cambridge street and Superior street. It is supposed that the boomers wished to have as many names as possible to put in their prospectus and gave the street as many names as it could stand.

"That gentleman we are just passing is a mushroom millionaire. He once gave a man 10 cents to buy a ticket to Superior for which the fellow gave him a bunch of papers. Lately this gentleman sold this paper as copper stock shares and will no doubt live happy ever after.

"This building we are now passing is the News Tribune office. It is known as the place where our great mysteries originate. If you have time one of you gentlemen please go in and ask them the story of the 'Christmas tree,' or the 'baby in the morgue.'

"That little speck on the hill there is the courthouse." It was used by Father DuLuth as a camping place when he first came up here, but he later built a camp of his own, as the building had a leaky roof and had been condemned by the Indians as dangerous.

"The building is now used as a sparring room for the county commissioners. Here it is that the county roads are built and the bills for the same afterwards investigated.

"That object which is hardly moving, is one of the Duluth-Superior Rapid Transit company's cars. It is the oldest thing in Duluth except the courthouse. The car is near three score and ten. It will be sent over to a place called Superior after it is used on this side of the bay eighty years.

"Returning eastward we will take in the Aerial bridge. This is more famous than the Bridge of Sighs and is what made Duluth famous. The council sat up nights trying to tell the people that it was a goo dthing for the city and after the city folks went to sleep it was built. It had several cases of cold feet and at times refused to move, but is now delivering the goods.

"That piece of land which stretches far out to the South is the famous Minnesota Point. It will go down in history as having caused more trouble than any other piece of land on the map except the stockyards in Chicago. For two moons the people of Duluth and Superior had hysterics as to whether there should be three ditches or but two cut through the point.

"It was finally decided to wait until more land had accumulated so that a ditch could be dug for every boat and a few for the people who might want one in after years for drainage canals.

"That road running along the hillside is the famous boulevard. In the summer, when it is warm in the business portion of the city, the people go up to this boulevard where it is permissible at all times of the year to wear an overcoat and fur cap. Between the business portion of the city and this same boulevard all degrees of temperature are found and thus the most fastidious can be suited as regards weather.

"Those houses on the steppes up there are where the cliff dwellers reside. All people who live up there work at banks as it takes several hours to go to and from their homes. It thus becomes necessary for them to have positions where but four hours' work a day is required.

"That building which is being built on that corner is for the Y. M. C. A. The money was secured from the people of this city during the summer. You can readily understand that it was necessary to collect it then as all money in the winter time is spent for coal. It was a great piece of forethought on the part of the management and the party who suggested collecting at the time of the year mentioned is to be made an honorary member of the club with privilege of free bath at least once a year.

"This is all for this time. Please step lively now as others are willing to give us more copper stock for a ride. However, I wish to inform you that the stock you gave me for this trip went up during our ride and is now worth $10 a share. All out."

BUILDING IS PLANNED

School Board May Erect Home for Manual Training Classes.

The Plan is Very Favorably Received by the Members.

Practically the only important matter that came before the board of education last evening, except the regular routine business was a proposition to erect a manual training building for the high school on lots owned by the board on the southwest corner of Lake avenue and Third street.

It is proposed to erect a plain structure there at a cost of $20,000, which shall house the manual training classes and permit them to accomplish better results than where they were located in the main building. The noise of the planes and so forth annoy the other classes and the plan to erect a separte building has been brewing for some time.

The members of the board who were present at last evening's session seemed very favorably disposed toward the new building, but in order not to act hastily in the matter and to secure more information regarding it, the scheme was referred to the committee on buildings and grounds.

This body will look into the cost, which as estimated last evening, will be something like $20,000, and will report at the next meeting of the board. If the structure is erected, the plain walls can be put up, it is figured, for $15,000, and the finishing will be done by the students, as a part of their manual training work.

The school board owns the lots upon which it is proposed to locate the new building, and the plans of the structure as such as to provide for enlargements when that becomes necessary. It will probably be two stories high, and a department of domestic science may be housed on the second floor.

Supt. Denfeld is very favorable toward the plan, and in his monthly report to the board strongly recommended it.

A part of the plan for the new building is to have it accommodate, as well, the eighth grade students of the Washington, Nettleton, Jackson, Emerson, Jefferson and Franklin schools. Manual training departments are proving successful in the Lakeside, Irving, Washburn, Lowell and Madison schools.

The enrollment in the public schools of Duluth for the month which ended Feb. 8, was 11,577, a gain of 289 over the same month a year ago. The average daily attendance has been 9,-839.55, an increase of 785.55 over the same month last year.

DID JOHN D. LOSE CASH?

Ought to be Worth Billion, Says News Bureau.

Boston, March 2.—The Boston News Bureau says: "The apparently official statement for John D. Rockefeller that he owns only 20 per cent of Standard Oil, that he is worth less than $300,000,000 and that his income could not exceed $20,000,000 in his most prosperous year raises the natural inquiry as to what has become of Mr. Rockefeller's money. It is well known that he has been at times a heavy speculator, and it is generally known that this plan does not pay.

"We know that Mr. Rockefeller ought to be worth more than $1,000,000,000 at the present time if statements made by his own family a few years ago as to the amount of his wealth had any basis of truth.

"Mr. Rockefeller has not given away enough money to reduce his fortune to $200,000,000, and the question naturally arises as to where he lost his money. He publicly announced that he did not originally invest in Amalgamated.

"Then where did he lose it?"

If you are a sufferer from Nervous or Pelvic derangements see our physician without delay. You may consult us Free of charge.

Long established. Permanently located in Duluth, and with ample resources to make good our claims.

We Offer All Afflicted Men

The safest, surest and most modern scientific treatment of chronic venereal diseases. Our success in curing permanently these maladies that wreck manhood is attested by our enormous practice. Men come from every section of the Northwest to receive our advice and assistance. We offer you the services of a physician without a peer in private diseases—a physician who sees and treats hundreds of cases every month—a physician who knows at sight every condition of the chronic maladies peculiar to the male sex—in short, we offer you the services of

AN EMINENT SPECIALIST

IN PELVIC DISORDERS OF MEN.

Established in Duluth Since 1899.
The Northwest's Most Successful and Reliable
SPECIALIST IN DISEASES OF MEN.

Urethral Obstructions.

It matters not how long you have suffered from urethral obstruction or how many different doctors have disappointed you, we will guarantee that our treatment will make you as well as before you were troubled with the disease. Our treatment dissolves the obstruction, leaving the urinary passage entirely free from obstruction, and irritation. It also relieves any sympathetic disturbance in the bladder or kidneys.

Male Weakness.

This disease of the functions by no means indicates general nervous decline, but is a direct result of inflammation, enlargement or excessive sensitiveness of the prostate gland brought on by early dissipation or resulting from some improperly treated contracted disorder. These conditions cannot always be removed by internal medicines, alone, and any tonic system of treatment that stimulates activity of the functions can but result in aggravation of the real ailment. This is a scientific truth that we have ascertained by careful study and observation in hundreds of cases, and is the truth upon which our own original system of treatment is based. We treat mainly by local methods, and our success in curing even those cases that others have failed to even temporarily relieve with their tonics is conclusive evidence that our method affords the only possible means of a complete and radical cure.

We Cure Permanently
VARICOCELE,
HYDROCELE,
PROSTATITIS,
GONORRHOEA,
STRICTURE,
LOST MANHOOD,
NERVOUS DEBILITY,
KIDNEY AND BLADDER
TROUBLES.

Kidney Complaints.

Kidney diseases affect a large number, although many are in ignorance of their trouble and attribute their unwell condition to some other cause. Male excesses, alcoholic liquors, severe sickness, which weaken the kidneys, often produce kidney diseases, and the usual symptoms are highly colored urine, with strong odor, sediment in urine, frequent urination or irregular, chilly and feverish spells, worn-out feeling, puffiness under the eyes or swellings. Our long study and extensive practice in the treatment of all forms of Kidney Diseases have familiarized us to the extent that we have attained skill which insures successful treatment in all cases that are not incurable. We determine the condition of the kidneys by a scientific analysis of urine and the many severe kidney troubles we have cured by our systematic course of treatment, after being given up as incurable by other physicians, gives us such confidence in our method as to assure every case we accept a permanent cure.

Specific Blood Poison.

The most hideous of all venereal diseases can no longer be classed as incurable. The idea that the limit of medical aid is to keep the disease dormant by persistently dosing the system with mineral poisons is as incorrect as many other ancient theories to which many of the profession cling. Our cure is thorough and permanent, and every symptom of the disease vanishes forever.

STEEL PLANT IN DULUTH

(Continued from page 1.)

of rebating taxes on iron manufactured in the state, saying that the Steel company does not want it, that if manufacturing cannot be done in the state without such stimulation it ought not to be done at all.

The other witnesses were Mayor M. B. Cullum of Duluth, who spoke from a Duluth standpoint, and told about the proposed steel plant; C. H. Munger, manager for Pickands, Mather & Co., who spoke from the standpoint of an independent operator; Richard T. Grant of Duluth, who told about the Cuyuna iron range, and the effect a tonnage tax would have upon its developments; Alfred Merritt of Duluth and County Auditor Halden of Duluth.

Mayor Cullum Examined.

The first witness was Mayor Cullum, who said that Duluth had been to a large extent confounded with other interests, and therefore he wanted to speak from a purely Duluth viewpoint. Duluth is paying a quarter of the running expenses of St. Louis county, which is a large and only partially developed county, with little farming or other interests, and with a large amount of idle land owned by the state and the nation. It is hard enough now for Duluth to bear its share of keeping the county going, under these circumstances, without putting an additional burden upon her. The railroad gross earnings tax takes away from taxation in Duluth $10,000,000 of her property, and if the iron taxes were lost, Duluth would have to pay three-fifths of the county expense, and her tax rate would be raised 4½ mills. Duluth is developing manufacturing interests and transportation facilities, and needs encouragement, not opposition. The city was there before the iron mines were developed, and should be considered separately from them. It cannot be classed as opposing a fair tax on the iron mines.

Six or seven months ago, before tax matters were discussed, a committee of Duluth citizens was formed to push the location of a steel plant in the city. Railroad discrimination was partly responsible for early failures along this line, but conditions are much better now, so this committee was requested by officials of the Steel company to furnish information about the possible market for the product of such a plant. The Minnesota officers of the company were interested in this matter, because they are all large owners of property in the city. The figures being furnished, the Steel company has decided to take the step, and there is every assurance that it will manufacture iron in the state, which is the most important thing that could happen to Minnesota.

"You feel that you have been discriminated against by the railroads?" asked F. B. Wright of the committee, who conducted the examination.

"That has been the general impression. We have always felt that because of the lake route near by, railroads preferred to favor localities where they would get an all-rail haul on their commodities."

"Probably part of the cause of the failure of early attempts at iron manufacturing was the absence of a market," suggested Mr. Wright. "I presume that is changed now."

"Yes, conditions have greatly improved with the development of the country, as the growth of Duluth's jobbing business has shown."

Mr. Olcott Is Heard.

Mr. Olcott was the next witness, and his testimony manifestly made a good impression on the members of the committee. He freely gave all the information called for, and promised later, if the Steel company did not object—and he did not believe it would—to furnish the committee further information about the extent of the ore in the ground now owned by it.

He said that the Oliver company operates about forty-eight mines, thirty or thirty-five of which are in Minnesota, and the others in Michigan and Wisconsin. The lake freight rate is lower from the other ranges than from the Minnesota ranges, and the Wisconsin and Michigan ores grade better, because they are better furnace ores, though not necessarily higher in iron. This difference is due to the fine character of the Mesaba ores, much ore being lost in flue dust in the furnace. The best Mesaba ore runs about 63 per cent, but the grade in every mine is different, and every mine has different grades. In the first few years of the Mesaba range, nothing under 63 per cent could be sold, but as business increased and the steel market developed, it became possible to use lower grades. Now ore at 58 or 59 per cent is used, but in shipping it, ore as low as 55 per cent, is mixed with it.

The Oliver company sells its ore to the Steel company, of which it is a subsidiary corporation, but operated separately. The price of ore is fixed by the buyers and sellers, but is not arbitrarily fixed. The Steel company buys from others, perhaps a million tons or so a year. The Oliver company sells it ores to the Steel company at the regular market rates, because some of its leases are on a sliding scale, based on the market price of ore, and the company must not lower the prices itself and thus injure the fee-owners. The Steel company has maintained the price of ore higher than it was before the company was formed, when mining was intermittent and the miners not steadily employed.

The Oliver company last year shipped 62 per cent of the Minnesota production, but only 52 per cent of the entire Lake Superior output. Large independent operators are the Republic Iron & Steel company, the Mahoning Ore company, Pickands-Mather & Co., Jones & Laughlin, besides many others. The price of Mesaba ores was $4 for bessemer and $3.50 for non-bessemer ores last year. But in getting at values it would not be fair to take last year's prices, because the markets fluctuate. It would be necessary to take the prices for at least a ten-year period, to allow for periods of low prices. The Steel company averaged on its bessemer sales last year $3.50 a ton and on its non-bessemers $3. In the early days ore was sold at $1.92 a ton and at $2.15 a ton, both at a loss. Some of this ore is being delivered yet, and Mr. Olcott believed that these low prices made the broad steel market that has followed. In fixing values, it must be remembered that every seven or eight years there is a depression in the iron industry, when the product is curtailed and the price goes down. Judging from his experience of twenty-two years, he did not believe the average profit would be over 45 or 50 cents a ton.

The Cost of Development.

Questioned as to costs of development, Mr. Olcott said that it depended upon the size of the ore body, upon whether it is underground or open pit, and the tonnage that is expected. As an example, he mentioned the Monroe-Tenner mine near Hibbing, on which up to Dec. 31, 1906, $1,500,000 had been spent in development, and in 1905, only 71,866 tons were shipped. The mine is partly open pit, partly underground. It was necessary to strip ninety-five feet of surface, and to overcome the problem of caring for large bodies of water, even to the extent of lowering nearby lake levels, from which the water came. The ore is low grade, 58½ to 59 per cent, with .075 of phosphorus. At the Gilbert, near Eveleth, where there is about 4,000,000 tons, it will be necessary to sink $800,000 before production begins. At the McKinley it will cost $275,000 to get 1,500,000 to 2,000,000 tons.

In the Canisteo district, at the west end of the Mesaba, a new feature has arisen. The ore is all low grade and sandy, and has to be washed and concentrated. To get a ton of ore it is necessary to mine two tons, and the cost is doubled. There will be spent in all, $4,000,000 on the railroad and for development, and no shipments have been made, though next year possibly 300,000 tons will be shipped. No one can tell how it will work out, for only a few trial experiments have been made, and it will probably be a year before the best way of handling it is determined upon. There is a large tonnage of low grade ore, besides large bodies that cannot be marketed now, but will have to be mined and stockpiled to get at the ore that can be sold. The ore is expected to have a value beyond its grade because of its structure, which will obviate some of the waste that follows the use of other Mesabe ores.

Incidentally Mr. Olcott said that at Coleraine, in this district, the Steel company is constructing a model town, building homes for its men, paving the streets, supplying water and sewers, and providing every comfort possible.

He said that the Steel company paid 2 to 10 cents per ton in the ground for much of its ores. He explained how it is possible to pay about three times as much on a royalty basis, because in buying a large body of ore outright, interest on the cost of the property will eat up the difference. Ore in the ground at 10 cents is about the same as a 30-cent royalty.

The average profit of the Steel company last year was about 75 cents a ton. The cost of getting the ore to market, on the average, he figured as follows: Cost of mining, outside of royalty, 70 cents; royalty, average, 26 cents; rail freight, 80 cents; lake freight, 75 cents; marine insurance, 1 cent; depreciation on plant and mine, 20 cents; taxes, 5 cents; interest, 2 cents; total, $2.79 at the Cleveland docks.

Mr. Wright went into the ore freight rates, and asked how the 80-cent rate compared with those in other states. Mr. Olcott said it was about the same per ton per mile.

"A reduction in the freight rate would not affect particularly," said Mr. Olcott, "but it would affect the state. It would cut the gross earnings taxes correspondingly. Neither would it affect independent shippers, because the cut would be met in the price of the ore, and the only people benefitted would be the Eastern smelters."

In reply to a question by Mr. Wells of the committee, Mr. Olcott said that the independent operators are a small factor, but they are all satisfied with the rates, because the Steel company has maintained the price of ore, which benefits them.

Further, he said that the average haul is about eighty miles, but as there is practically no back haul, it really means 160 miles, while the roads in other states, charging about as much, are able to carry freight on the return trip, and thus increase their earnings. Besides, the road operates only seven months of the year, so far as ore-carrying is concerned, and it has to mix the ores. Sometimes a train switches about to take ore from a dozen or fifteen different mines, which is something that is not necessary in other states. The ore docks cost vast amounts, and their average life is only eleven years. The railroad owns them, but charges no dockage.

There is an enormous tonnage of low grade ores in Minnesota, and it is important that they should go to the market. If a severe tax were imposed, it would work against the production of poor ores, as it costs as much to get them as it does rich ores. About half the Mesaba tonnage is Bessemer, and one-half non-Bessemer.

"Should ore freights be higher than other rates?" asked Mr. Wells.

"Under all the circumstances that I have suggested, I think they should."

Steel Plant at Duluth.

As to the steel plant at Duluth, Mr. Olcott said that the local officers of the Oliver Iron Mining company have been working to that end for two or three years. Long before the legislature met, information as to the market in the West and other matters was forwarded to New York, and by urging the importance and desirability of manufacturing iron in Minnesota, they have induced the finance committee to adopt a resolution that a plant should be built in Duluth, if it can be shown that it will be reasonably profitable. The investigating committee is expected to arrive in Duluth very shortly, and Mr. Olcott said he hoped everything possible would be done to encourage the plant.

A local paper had stated, in a dispatch from Duluth, that Superior might be considered, and Mr. Olcott said that this was not true; that if a plant is established it will be in Duluth.

The nature of the plant, he said, would depend upon what the committee finds can best be made and sold here, but it will be a finished product, and not a mere pig iron factory, as a member of the committee had suggested.

"We shall not stop there," said Mr. Olcott. "We shall expand, and we want the help of everybody in Minnesota to make it a success."

"Will the location of a plant at Duluth help use the low-grade ores?" asked Mr. Wright.

"That's just the point. It will reduce the haul on them, and enable us to compete with Alabama, with its poor ores."

Speaking of by-products, Mr. Olcott said he did not see why gas, a by-product of the smelter, should not be piped to the Twin Cities."

Mr. Wells wanted to know what the witness thought about a tonnage tax, with a rebate proviso, if the ore is manufactured here, and Mr. Olcott said he did not believe in the plan at all. If the business is not warranted without that inducement, it should not be established. The Steel company does not want any rebates.

"On the tax question," said Mr. Olcott, "we are always anxious to pay our full share of taxes. We believe, however, that they should be levied on the same basis as they are on other interests and in other sections. We do not see why St. Louis county should be singled out to be treated differently from the rest. It would be as fair to put a specific tax on wheat or lumber. It is contrary to right and justice, for everything should be taxed according to its value. If the state hasn't had its share of taxes, it is its own fault; the state board should have raised the assessments, and it is not our fault if they have not. We shall not object to a raise now.

"There is a wrong impression out about ore values. Mr. Hill has helped create it by saying ore is worth $1 in the ground. We have bought lots at 2 to 10 cents, and our average royalty it 26 cents. No outsider could afford to pay as much as 75 cents, and I don't think the average royalty among the independent operatos is 20 cents."

"How long will the Mesabe range last?" asked Mr. Wells.

"It will outlive any other range in the world that I know anything about; it will stand mining for sixty or seventy years."

Low Grade Ores.

Mr. Miller of the committee asked about the low grade ores outside St. Louis county, in Cook county and on the Cuyuna range. Mr. Olcott said there were large amounts of such ore, but it is low grade, and it will be some time before it will come into the market. The tonnage tax, he said, would prevent opening up low grade propositions so long as high grade ore can be found.

He said that it would be a physical impossibility to grade the tonnage tax, because there is so many different grades and so many mixtures that it would be impossible to keep track of it. In answer to Representative Thayer, he admitted that it would be possible for the state to establish labratories for assays as the steel company has done, if it wanted to spend so much money, but it would cost $100,000.

"Would a tonnage tax shut the mines down?" asked Representative Bicknell.

"No," said Mr. Olcott promptly. "I am not here to make any such misrepresentation as that. But the system is not right, and if you want more taxes you should get it by raising the valuations."

C. H. Munger said that his company operated mines in Minnesota, Michigan and Wisconsin, and it cost to mine from 85 cents to $1.25, with an average of $1.10, that the ores brought an average of $3.30 in Cleveland last year. His company experienced no trouble in getting a fair price for its ore, and he thought it would be lower if the business were split up among small dealers.

In response to questions by Mr. Miller, the witness said that his company had explored the Cuyuna range, but had quit a year ago. The ore is all low grade, the best but 51 per cent in iron and some running as low as 35 per cent. The deposits are apparently large. The tonnage tax would delay the development of this range, and it would tend to close down poor mines.

Alfred Merritt was called, and during his testimony he intimated that the range interests squeezed out little fellows, and that there had been rebating on freight rates. Pinned down for more definite information about this, he said that one time, before the Steel company was formed, he was to have been a witness in a case brought against the Oliver company by a man who had been seeking lower freight rates, and he was informed that the litigant had wired that he had what he wanted, and that the suit was off. After Mr. Merritt was through, Mr. Olcott stated that he knew about this personally, and that what the man referred to wanted was a lease of the Mountain Iron mine, which he got. Further, Mr. Olcott added that there had been no rebating in favor of anybody.

Mr. Merritt said that he was interested in Minnesota mines only in a small way, as owner of five-twenty-fourths of a mine, the Steel company owning the rest. The mine is not being operated.

Asked if ore was worth in the market now as much as it would be without the Steel company, he said it was. It is to the Steel company's interests to keep the price up so that competing furnace men have to pay as much as possible. Asked if this did not benefit the independent iron operator, he admitted that it did.

The Cuyuna Range.

Richard F. Grant of Duluth told of a magnetic survey he had made of the Cuyuna range, and said that he found that it extended through Carlton, Aitkin, Crow Wing, Morrison, Todd and possibly Cass counties. The ore is low grade. Wherever explorations have been made the magnetic survey has been vindicated. The tonnage is undoubtedly enormous. On one property in the Rabbit lake district there is probably a 50,000,000-ton body, and on another a drill hole is 800 foot in ore. The possible tonnage is colossal.

A tonnage tax would kill this district. The very suggestion of the idea by the legislature has deterred development, and if a tonnage tax is adopted, no matter how small, operators will have to take their losses and pull out.

County Auditor Halden testified that the present assessed valuation of the St. Louis county mines is $70,000,000, and the tax is about 5 cents a ton on the output, of which the state is getting this year $195,000. If the valuation were increased to $200,000,000, he said in response to a question, the state would get $595,000 on the present rate. Asked at what he would value the mines, he said that if he were making the valuation now he would not put it less than $225,000,000 or $250,000,000. The iron industry has developed so rapidly that taxing officials might go to bed after making a valuation thinking that they had done a good thing, and wake up next morning to find that they had not.

Entitled to Same Treatment.

As to the tax question, he said that St. Louis county is entitled to the same treatment as other counties, and that it should have the same proportion of the taxes raised therein as other counties get in taxes they raise. It has been stated that when the mines are exhausted there will be nothing but holes in the ground. Who would bear the burden then but St. Louis county? The rest of the state will certainly not tax itself for her benefit. St. Louis county spent $200,000 in roads last year, and will spend $300,000 to $400,000 next year if all goes well. This is done to let the farmer get his products to market. Some people do not imagine that there are any farmers in St. Louis county, but there are only seventeen counties in the state out of eighty-three that have more.

The committee adjourned subject to the call of the chairman. For the present at least its hearing are concluded.

• • •

Besides the witnesses, Joseph B. Cotton, H. H. Myers and Wilson G. Crosby of Duluth were present. Messrs. Olcott and Munger were handed subpoenas after they had finished, inviting them to appear last night before the joint committee to investigate state rights in iron and timber lands, to tell about the conditions of state iron lands in Northern Minnesota.

• • •

It begins to look as though some effective reply may be made by the Minnesota legislature to the reflections made in the resolution from the North Dakota legislature, relating to the Minnesota grain business.

As stated yesterday, the sub-committee of the house committee on grain and warehouses, which went to Minneapolis to investigate the charge that farmers were being robbed by the suction draft which cleans the dust out of grain in elevators, found that it is a very proper and beneficial institution, and that not a single farmer is robbed of a single kernel of grain by it.

A committee has been appointed to frame a reply to the North Dakota resolution, and it will show the source of the discontent, incidentally, perhaps, giving specific information about Homer T. Fowler, of Superior and the business of the Superior board of trade.

• • •

A Big Day's Work.

The house, which has been neglecting general orders for a week, made up for it yesterday afternoon by advancing forty-one bills to the calendar, a day's work that is almost record-breaking. Among the bills advanced were the following:

By Representative Allen—Prohibiting the making of false statements to secure credit.

By Representative Tighe—Requiring lobbyists to register, and to report their expenditures in detail.

By Representative Tighe—Making railroads liable for the contents of sample trunks just as they are for other baggage.

By Representative Ricknell—Providing a penalty on gross earnings taxes not paid when due.

By the St. Louis county delegation—Creating county boards of education to provide educational facilities for unorganized territory.

By Representative Jefferson—Allowing officers, directors and stockholders to administer oaths and take acknowledgements of instruments in which their corporation is interested.

By Representative Spencer—Providing for the appointement of a coutny weighmaster.

By Representative Brown—Prohibiting pawnbrokers from receiving pledges from minors.

By Representative F. T. White—Restoring to full citizenship convicts who have served their sentences.

By Representative Webb—Allowing counties having more than 40 per cent of wild land to appropriate $500 for state fair exhibits.

By Representative Libby—Prohibiting false stamping of gold and silver articles.

By Representative Lobeck—Prohibiting anybody for inducing a boy under 18 to enter a house of evil repute, or arranging a meeting between such a boy and a dissolute female.

By Representative J. A. Gates—Prohibiting fraud and deception in the manufacture of ice cream.

By Representative Vollmer—Providing against fraud or deception in issuing receipts or certificates for grain, hay and straw weighed.

By Representative Vollmer—Authorizing the railroad commission to make warehousemen keep their houses opened.

And the following life insurance reform measures: Prohibiting the use of life insurance funds for political purposes; relating to the provision of life insurance policies; making insurance solicitors the agent of the company, not of the insured; prohibiting misrepresentations by life insurance companies; prohibiting discrimination by life insurance companies; prohibiting the issuance on non-participating policies; regulating life insurance disbursements; prohibiting corporations from acting as its insurance agents.

By Representative Morse—Authorizing the counties to participate in the semi-centennial which is to be given on the state fair grounds next year—perhaps.

STILLMAN H. BINGHAM.

ABOUT CLOCKS.

New York Sun: "It is curious," remarked a married woman the other day, "how simple the great mysteries of life are once they are solved. We have a number of the usual style of eight-day clocks in our house to keep those in the bedroom from striking; but I could never discover which side to wind to keep it quiet at night. I dropped into a clock store one day and asked the young man behind the counter. He seemed very much astonished at the question, but an old man who was repairing watches in the corner looked up and told me that the right hand key was the going part in most clocks, but that if I would watch the hands when I put the pressure on the key they would move slightly backward if I was about to wind the going part. If I was about to wind the striking part the hands would remain perfectly still."

DOCTOR HAS A "PRESS AGENT."

New York Sun: Huddled up in one corner near the radiator, the book agent saw a man who was fairly sneezing his head off.

"Seem to have a bad cold," ventured the agent.

"Awful," sneezed the sufferer.

"Got a doctor?" asked the agent.

"No," said the other man.

"Better get one," the agent advised. "If you have no regular physician I can give you the name of a man who cures colds like magic."

He gave the doctor's address and offered to stop and send him around. That night the book agent reviewed his day's work.

"Nary a book sold," he said, "but I discovered four patients for that jay doctor around the corner, and he'll give me half of his day's fees. He owes nine-tenths of his practice to me. He didn't have a patient when I met him. I volunteered to keep my eye open for sick people while in pursuit of the elusive book trade, and when I found one who was a stranger in town and had no regular doctor, to try to work him in. I succeeded so often that he now has a decent practice, and I earn more off my commissions from him than through my regular business."

A Form of Food Already Digested

Duffy's Pure Malt Whiskey

A tonic-stimulant which keeps the old young and the young strong. It is invaluable for over-worked men, delicate women and sickly children. It cures consumption. Beware of Cheap imitations and substitutes. They are dangerous. Guard against refilled bottles. Duffy's Pure Malt Whiskey is sold by all druggists, grocers and dealers, or direct, at $1.00 a bottle. Doctor's advice and illustrated medical booklet sent free. Duffy Malt Whiskey Co., Rochester, N. Y.

Facts About Why Coffee Does Its Peculiar Work.

Tanin (or Tanic Acid) is an astringent, used for gargles in sore throat and similar conditions; it is not poisonous although it is not a fit substance to take into the stomach as it done when you drink coffee or tea that has boiled too long.

It is a serious error to say that Tanin is the cause of the coffee habit with its long train of ails. It is the alkaloid, Caffeine, which causes the trouble, it being quickly dissolved out in making hot coffee, while it takes longer boiling to dissolve out the Tanin.

Caffeine, like cocaine, morphine, etc., is a drug and should never be used except as prescribed by a physician.

Like all such drugs, small amounts seem to delude one into the belief that they are beneficial, while their continued use, in gradually increased amounts, is destructive to mind and body.

A prominent physician and teacher in a medical university says:

"Coffee intoxication is a disease which is probably more common than is generally supposed, the profession not being alive to its symptoms, as it has not as yet penetrated into the medical text books on different diseases."

The action of "Caffeine," however, is well described in a prominent work on drugs, as follows:—"It causes poisonous symptoms, ringing in the ears, tremor of the hands, headache, flashes, vertigo, insomnia, mental confusion, weakness of vision and hearing, palpitation of the heart, rapid pulse, irregular heart action, a sense of oppression in the chest," and other symptoms.

The physician referred to above says further:—"The most pronounced and tenacious symptom of coffee intoxication is tremor (one of the above symptoms of caffeine poisoning) of the hands and limbs. Continuous headaches, with intermittent attacks of great severity; hallucinations, mostly occurring at night, ringing in the ears, sometimes taking form of definite words, but usually as buzzing or bells; troubles of vision occur, pupils dilated, eyes easily fatigued; vertigo occurs, often of great severity, mostly due to digestive troubles; insomnia is present in acute cases. Digestive disturbances are a marked symptom of coffee poisoning; at times there is a definite pyrosis (heart burn.) The loss of appetite and digestive disturbances produce emaciation, the complexion pale, often yellow; the pallor of the face, the bright eye, the nervous look and dilated pupil give a picture of the disease—coffee habit."

By comparing these symptoms described by one physician, with the action of Caffeine as described by another, the reader can get at the facts as to what coffee does, and what it is in coffee that does it. It's principally Caffeine, rather than Tanin.

It is an easy matter to leave off coffee drinking and get rid of a lot of misery, mental depression, headaches, sleeplessness, indigestion, nervousness and so on, by using well-made Postum.

But Postum requires boiling—15 to 30 minutes won't hurt, as it contains neither Tanin nor Caffeine, and by thorough boiling you get all the food value and a delicious flavor not obtainable by simply letting it "come to a boil" as in making ordinary coffee.

Don't try to like Postum unless it's made right, according to directions, and don't cheat yourself of the full value of its food elements, by insufficient boiling.

There's no secret about Postum—no drugs to apologize for or avoid—it is made of wholesome field grains, but the experience and skill in making it is partly what accounts for its enormous sales, and the consequent good it has accomplished to thousands of families, who have found by personal experience, that "There's a Reason" for

The Largest Circulation in Duluth

TO SUBSCRIBERS:

It is important when desiring the address of your paper changed to give both old and new addresses.

WATCH REALTY MOVE UP!

With the practically assured advent of a great steel plant of the United States Steel corporation and its invariably attendant large industries, that are on the very verge of realization, thousands of skilled workmen and their families will be added to the population of Duluth.

For all of these, homes must be provided and these homes must be more than the ordinary crowded tenements of the large cities, because the families are above the average of the working masses. Most of those living in the East demand separate houses and lots and many of them have their own garden-plots. To provide for the needs of this great increase in population, more and larger stores will also be an imperative necessity.

The result cannot but be a greatly increased but eminently healthy demand for business property and residence lots alike. This will mean not a boom—a thing to be decried above all—but a strong and steady advance in values that will be by no means the least factor in the making of a Greater Duluth.

With the initiation of work on the anticipated steel plant, the employes, who will have to come from other points, will seek for lots on which to build their own houses. This will create an instant demand in the residence sections, especially in the West end where prices are particularly low and where the coming employes will locate so as to be within convenient distance of the great works which almost surely will locate in that section. The inevitable result will be a steady upward trend of prices, notably in the western part of the city.

The merchants already here will have to enlarge their stores and will be compelled to secure additional ground. The new concerns that will surely follow the coming of the steel plant and its attendant industries will have to have store space. These combined demands will make for higher prices for business real estate.

To supply fresh vegetables and dairy products to the largely increased population, suburban truck and dairy farms will come into demand, and all about Duluth will be found places to cater to the needs of the new citizens. This will bring tracts in St. Louis county directly tributary to Duluth up from their present inordinately low values to the prices prevalent about other cities, at present from four to ten times as great.

Real estate prices of all kinds in this city at the present time are extremely moderate. Indeed, quotations in many cities of from 12,000 to 25,000 population are as high or even higher. In every place of Duluth's class, both business and residence property find ready sales, sometimes at double the amount asked here. This speaks well for the conservatism of investors but it is neither justifiable nor natural and it is bound to change—and that very shortly.

With the Greater Duluth looming up big and strong and substantial, real estate in this city is today the very choicest form of investment, whether for homes or for business, and those who are fortunate enough to secure lots will inevitably profit well-nigh incalculably in the very near future.

THE WORLD'S Y. M. C. A.

The beginning of actual work on the new Duluth Y. M. C. A. building on which about $175,000 will be expended and the constant work being done by the local organization for the betterment of young men and boys make the order of added vital interest to the people of this city, the vast majority of whom have no real knowledge of the origin and grand extent of the association.

Founded in the office of a London merchant in 1844 with only a handful of members and not transplanted to the New World until 1851 when a feeble branch was started in Boston, it has grown with phenomenal speed in its less than sixty-three years of life until now it has no less than 8,332 branches scattered all over the world, with reading and lecture rooms, gymnasiums and other adjuncts for healthful and innocent recreation as constituent parts of each.

In the United States, there were, Jan. 1 last, 1,868 associations with a total membership of 405,789. Of these associations, 552 occupy buildings of their own valued at $30,857,430 while 555 have libraries in which are an aggregate of 580,774 volumes. Last year there were 36,293 young men studying in evening classes while 153,473 were building up their bodies and carrying out the old precept "mens sana in sano corpore."

In the commercial cities of Japan, China and Korea, the Y. M. C. A. has taken a vigorous hold and its places are patronized by ever increasing thousands of eager orientals. In some European nations, on the contrary, great difficulties and, in some cases, well-nigh insuperable obstacles have been encountered. This is especially true of Greece and Roumania, in each of which there is only one branch; of Bulgaria where there are three; of Turkey with only six; of Spain with five; of Russia with nine in spite of the personal approval of the czar; of Italy with thirty; and of Hungary with thirty-two.

In Germany, on the other side, the Y. M. C. A. has been growing apace year by year until at the close of 1906, there were 2,011 branches with 111,000 members and such men as Count Bernstoff, imperial counsellor, and Baron von Rothkirche leading patrons. France has gained 50 per cent in membership in six years and the order is steadily gaining in popularity. Norway has 405 associations with 18,000 members; Sweden, 115 branches with 7,300 members and Prince Bernadotte, son of the king, as the national president; Switzerland, 476 branches and 8,500 members; Austria, 120 associations; Denmark, 270; and Holland, 349. The men back of these associations in Europe are all of the higher classes.

From these few facts, it will be seen what a world-power for the uplifting of young men the Y. M. C. A. has become. Duluth may well feel high pride that its association will soon be housed in a building of its own worthy of itself and worthy of its home city.

DREAM OF FREE STREET CARS.

Mayor Tom L. Johnson of Cleveland, ordinarily a keen, sharp, shrewd business man—his keenness has made him a multi-millionaire—has had a dream of free street car service for the people of the cities of America. The dream is utopian and he, above all realizes that it is, for he says that "Eventually"—not now, nor even next year—he wants to see "street cars as free to the passengers as the air they breathe."

Mr. Johnson's scheme, howeber, has one radical defect that mars it irretrievably. Street cars cannot be made for nothing nor can they be run for nothing. Not to figure on the cost of the power and the expenses of wear and tear and renewal of old coaches, there are all of the employes—power plant men, motormen, conductors and others absolutely necessary—all of whom must be paid, for they cannot, even if they would, give their services free.

If there be no income from passengers, the money for the absolute necessities must come from some other source. There is only one other source and that is the taxpayers. To those who pay no taxes, this would be ideal. But how will Mr. Johnson placate those whose properties—and the bulk of these are people in moderate circumstances—would be forced to bear the large increase in taxation?

In a utopian state of society, free water, free food, free clothing and free light—all necessities—would precede free street cars—a semi-luxury. Mr. Johnson does not refer to these in connection with his dream. Does he propose to give these the go-by or will he include them also in the full fruition of his "eventuality?"

POLITICIAN, BUT MODEL SON.

Whatever may be the shortcomings politically of Postmaster Fred A. Busse of Chicago, Republican nominee for mayor of Chicago—and his party opponents agree that they are neither few nor light—he has won a high place for himself on the honor roll of sons who revere their mothers—a nobler honor than any political preferment.

When Mr. Busse lay sorely battered in an Eastern hospital after the disastrous Pennsylvania railroad wreck in which he was badly injured, he refused to take any of the remedies prescribed by the physicians and offered by his nurses, saying firmly: "I have never taken any medicine except what my mother has fixed up for me. Wait until tomorrow. My mother will be here tomorrow and if she says I ought to take these medicines, I'll do so."

When the aged mother, a typical German "hausfrau" of the better class, arrived, the injured man, after giving her such tender greetings as moved the hearts of all within sight and hearing, referred the medicine question to her with implicit confidence in her ability to decide exactly right. She decreed that her "boy" did not need the remedies and the physicians acquiesced. Indeed, the old lady's very presence proved more effective than any drug that could possibly have been used and his convalescence was almost immediate.

In these ultra-modern days when everything old-fashioned, except furniture is shoved into the attic and the "loving care of the tender mother" is banished to give place to "scientific treatment," it stirs the hearts, especially of middle-aged men and women, to hear of such implicit confidence in "mother" by a man of Mr. Busse's standing in the business and political world.

All hats off to Fred A. Busse, the model son, and to his dear old mother, too!

GETTING AND SPENDING.

Money-madness may, as the moralists charge, afflict the vast majority of the people of America but that madness is not wholly confined to the getting of money. On the contrary, very nearly half in most cases, more than half in others, of the madness is devoted to odd eagerness to spend that money as fast as it is made. The consequence is that, while Americans are the marvels of the world because of the facility with which they acquire riches, they are equally the marvels because of the rapid, the extravagant pace at which they are living.

A miser, in the ordinary acceptation of the word, is almost unknown among those conspicuous as money makers. Russell Sage was practically the only one of the kind on Wall street. Rockefeller has his magnificent and costly places at Pocatonico, N. Y., and at Lakewood, N. J., and his costly homes in Cleveland and New York and on them he spends each year what would have been considered the fortune of a life-time when he was a young man and, beside that, he has given away over $70,000,000 in public bequests. Carnegie has his New York palace and his immensely costly Skibo castle in Scotland and his public bequests have exceeded those of Rockefeller. Harriman has the costliest of homes and all kinds of luxuries and so has Gould, while Morgan has spent several ordinary fortunes on his art collections.

Other men, who work "fit to kill themselves" six days in the week, do so apparently mainly that they may have costly automobiles, fine houses and all sorts of pleasures, that their wives and daughters may have the costliest attire and the most expensive jewels and that all of them may enjoy extended trips to Europe or California or other places worth seeing. Not one of them but would scorn hoarding up their gold and bonds and gloating over their savings.

Pessimists to the contrary notwithstanding, the strenuous life seems to agree with the men of today. Instead of looking worn and battered from stress of work, they are fat and healthy, they laugh, they enjoy every meal and they actually make sport of making money and more sport of spending it. The best part of it all, too, is that the men of the world were never so generous and big-hearted as they are today. No cry of distress goes unheeded and no deserving person in need makes even an impersonal appeal in vain. Disasters are followed by relief in millions.

The business men of today may plead guilty to mad desires to get money by any hook and crook but they may also plead in extenuation that they do not get the money from miserly motives but, having secured it, they put it to all conceivable kinds of liberal uses. All of which shows that, after all, this old world is growing steadily better.

ELDORADO FOR FARMERS.

To the farmers of New England and Northern New York who expect to take advantage of the homeseekers' excursions that will be started by the railroads this month, Northern Minnesota ought to offer ideal conditions as the Eldorado for which they are seeking. And it will be the fault either of themselves or of the railroads that penetrate that region if there shall not be a goodly settlement there this spring.

The farm lands of Northern Minnesota are open to purchase, acre for acre, at considerably lower prices than are similar lands in any other portion of the West. They challenge comparison in every essential with even the best irrigated sections of the favored valleys of Wyoming, Colorado, New Mexico and Texas. They have a shorter haul to market than do those valleys. They are capable of such productiveness as to make the crops of one year equal those of five years in New England.

The climate of Northern Minnesota is not one whit more severe than that of Northern New York or New England, if, indeed, it is even as severe, taking the average temperature of the year. The forests ought to offer no radical objections for the farmers of the extreme Northwest have intimate knowledge of the value of timbered lands and they or their ancestors have had as arduous tasks in clearing tracts as they would have to undertake in this new region.

Many of the farmers of New England and New York are conversant also with the dairy business. If they should learn that the finest, heaviest clover grown anywhere in America may be produced on Northern Minnesota farms and that the richest and best of premium-priced butter would follow the initiation of dairies, there is little question but that they would be attracted to this section in preference to any other.

The lack of proper advertising may prevent these homeseekers from coming to Northern Minnesota this year but their successors are bound to learn the facts about the preeminent advantages of this section sooner or later. When they do, the lands will be taken with a rush that will put in the shade the openings of Indian reservations in the West or the crowding into Manitoba.

TAFT AND CANAL ENGINEERS.

"Father, don't you think that, if you had spent more time, when you were a boy, building forts and digging tunnels and things like that, you might not be having such a hard time now, especially digging that big ditch?" was the pert but pat reply of the 9-year-old son of Secretary of War Taft when his parent undertook to correct him for his low standing at school.

If, as the ancient saw says, "Children and fools speak true," may not the ingenuous rebuke of the youthful Taft serve to explain the troubles of Panama canal digging that have resulted in the successive resignations within the last two years of Chief Engineer Wallace, Chairman Shonts and finally Chief Engineer Stevens?

Certain it is that it is being openly charged in Washington that the three retirements were the direct result of interference by Secretary Taft and were not due, as common opinion has had it, to the machinations of designing transcontinental railroad magnates who hoped thereby to hamper and delay the construction of the canal to their own freight-carrying profit.

There is no question that grave friction preceded the resignation of Mr. Wallace, for the ensuing quarrel and Mr. Taft's heated rebuke made that plain. Messrs. Shonts and Stevens have so far kept "their mouths buttoned up," but it is at least remarkable that both should resign just after President Roosevelt had extolled them to the skies in his Panama message.

What would be more natural than that these men, masters of engineering, should have felt just as did Mr. Taft's son that "if he had spent more time building forts and digging tunnels and such things" he would not have been interfering with their legitimate work, the exact requirements of which they understood far better than could any lawyer secretary?

The army engineers, now put in charge, are more used to civilian intermeddling because of their experiences with congress and the heads of the war department and it is to be hoped that they will prove more enduring than their predecessors. Meantime, how will the government be able to defend itself if William J. Oliver, Jr., whose bid was rejected so cavalierly shall decide to sue the United States for his fruitless expense and trouble?

THE PASSING SHOW.

"Pittsburg of the Northwest!" How is that for a new title for Duluth? It can wear it if all the people work for it as one man.

* * *

Wisconsin proposes now to have a new capitol modeled after Minnesota's. It is high time, too, for the present state house would not be acepted as a free gift even by Arizona.

* * *

California may have bent the knee as to the Japanese school question before Roosevelt's "big stick," but it has broken out in a new place and is bound to make trouble yet.

* * *

Kansas will get only 2-cent mileage books. The state senate that is credited with being under railroad domination voted down the full 2-cent proposition. Now hear the Kansans howl!

* * *

The Baltimore & Ohio railroad has made a most unenviable record for wrecks in the last six months. It should find out at once who or what is the hoodoo and get rid of it in short order.

* * *

The Commercial club and the business men generally must be ready to meet the United States Steel corporation's experts with such a battery of solid facts that they will surrender at discretion.

The Saving of Money

by the use of Royal Baking Powder is considerable. Royal is economical, because it possesses more leavening power and goes further.

HOTEL GOSSIP.

E. J. Philpots of Philadelphia, Pa., who is a guest at the Spalding, spent several years in Central America, and is pretty well versed on conditions existing there. He says the jokesmith has good foundation for his jokes on the easy manner in which revolutions are started down there, and that they occur with great regularity, and with little reason.

"There has been quite a lot in the papers lately about two little Republics down there going to war," he said. "Little bickers of this kind between two republics are no unusual thing. Neither of the Republics in this case has a population as large as that of Chicago, and after a few public officials are unseated, and Honduras and Nicaragua say all the bitter things they can of each other, the feeling of unrest will disappear, and the few soldiers now bearing arms will go back with their pay owing them, and resume their agricultural pursuits.

"Most of the natives down there are either Indian, negro, or a mixture of one or the other of these with Spanish. The white men are comparatively few in number, and in most cases the government is run by them. They get gradual control, fill the offices with their own men, and then run things to suit themselves until the people become tired. Then somebody assassinates the president, the government houses are raided, and a lot of rum and tobacco consumed, a few shots are exchanged, some blood shed, several buildings burned, and then they become tired of rebellion and go back to farming.

"That has been the history of Honduras since Cortez started the fighting there early in the Sixteenth century, and there been periodic internal and external upheavals. Each one of these smaller republics goes about with a chip on its shoulder most of the time, and when it's knocked off, war follows. It would be violating an ancient and time-honored custom not to fight if an opportunity to do it arose when the weather was not too hot. There hasn't been a scrap in either Honduras or Nicaragua for some years, and they are beginning to feel the need of excitement there.

"Almost anybody can get a political job down there if he has the initiation fee, but no outsider wants to mix up in politics unless he has farming implements or rifles to sell. Then, too, if he isn't in it for the money he gets out of it, he wants to have the cash in his hands when he delivers the goods, for if he doesn't, there may be a new president in office when he wakes up in the morning.

"The average reported fight is not of much more importance than a strike in the United States, and take my word for it, there are not nearly so many people killed in it as there are in one of your monthly steamship or railroad accidents. Particularly will this hold true of the present trouble in Central America. In Honduras the natives are taking a great interest in agriculture, and the crops are promising this season, so much so, in fact, that the government forces are sadly depleted. Tobacco has been successfully marketed by them lately, and the craze for wealth is even becoming rife among the lower classes of Indians."

* * *

"The reason so few moose are seen in captivity in the parks and circuses of the country is not because they are naturally too wild to be domesticated, but because they usually do not live long in captivity," said J. C. Peterson of St. Paul at the Lenox. "My father was for many years a settler in Northern Minnesota, and at different times in his experience he had three moose on his homestead, which recognized him as their master.

"All of the animals were captured when they were very young, and in each instance it took them only a few days to become apparently attached to father and his small farm. For two or three weeks he would keep them fenced in, and then would allow them to roam around at will. They would be gone for two or three hours, or perhaps half a day at a time, but always came back all right. By allowing them the run of the premises this way, they met practically the same conditions as if they were wild in the forest, and therefore, were always in good health, but the moment any of them were shipped to the city, a change was noticeable.

"Two of the animals were sold to city park associations at different times, and in each instance the moose finally died. They seemed willing enough to remain in the parks, but conditions were not such as they were used to, and from the first it was to be seen that they were failing in health. A moose can stand all sorts of hardships in the woods, but when he is in captivity, lack of exercise, or lack of proper food, or lack of something else, puts him on the down grade, and, as a rule, he passes in his checks in a few weeks, or a few months at the outside.

"One of the animals my father owned was a handsome bull, and he was trained to harness. The animal could pull a good-sized load, and travel through the woods with a sleigh behind him at a very lively clip. This third moose was one day shot by a hunter, near the house. So all three animals met with an untimely fate, which goes to prove, I suppose, that man should not monkey with the plans of Nature."

THE WEATHER.

Just a touch of crispness in the air made this morning an ideal one for early spring. There were few signs of the predicted brisk northerly winds and the promised about zero temperature did not make its appearance. The sun rose bright and strong, but clouds formed later and light snow fell, but the temperature was mild. Taken all in all, it was, however, as nearly an ideal Saturday for week-end shopping as any one could desire and the downtown streets were crowded during the late morning and the afternoon. If this weather shall keep up over tomorrow—and the weather clerk says it will—all of the churches ought to be nearly as crowded as on Easter. Last night's lowest temperature was 12 degs. and yesterday's highest was 26 degs. The weather man promises some cloudiness but no decided change in temperature tomorrow.

The sun set at 5:54 o'clock this afternoon and will rise at 6:41 o'clock tomorrow morning, set at 5:56 tomorrow afternoon and rise at 6:42 Monday morning. Tomorrow will have 11 hours 12 minutes of sunlight, a gain of seven minutes over Friday.

A year ago today was pleasantly Hoblike with a high wind but a mild temperature.

Says Mr. Richardson of conditions: "The storm is apparently central this morning over Lake Huron. Its easterly movement from the Upper Mississippi valley caused light to heavy snow or rain from that section eastward to the Atlantic coast during Friday or last night. The Kansas high pressure has moved its center to the gulf states, attended by much colder weather throughout the Mississippi valley. Pressures have risen in the plateau region and temperatures are somewhat lower here. The slight depression central Friday morning over Alberta has moved to Saskatchewan and has caused warmer weather over the Rocky mountains and eastern slopes. Indications favor partly cloudy skies in this locality tonight and Sunday and no very great temperature changes are probable in the meantime."

Following were last night's lowest temperatures, as recorded by the weather bureau:

Abilene	40	Medicine Hat	6
Asheville	42	Memphis	42
Atlanta	44	Miles City	28
Battleford	—12	Milwaukee	32
Bismarck	—6	Minnedosa	—6
Boston	28	Modena	36
Buffalo	34	Montgomery	48
Cairo	36	Moorhead	4
Calgary	12	New Orleans	54
Charleston	56	New York	30
Chicago	24	Norfolk	42
Cincinnati	32	Northfield	22
Concordia	26	North Platte	20
Davenport	20	Oklahoma	38
Denver	42	Omaha	24
Detroit	30	Phoenix	40
Devils Lake	—12	Pierro	14
Dodge	32	Pittsburg	36
Duluth	12	Port Arthur	14
El Paso	34	Portland, Or.	36
Escanaba	22	Qu'Appelle	6
Galveston	52	Rapid City	20
Grand Haven	26	St. Louis	30
Green Bay	22	St. Paul	4

Department of Agriculture, Weather Bureau, Duluth, March 2.—Local forecast for twenty-four hours ending at 7 p. m. Sunday: Duluth, Superior and vicinity, including the Mesaba and Vermilion Iron ranges: Partly cloudy tonight and Sunday. No decided change in temperature. Westerly winds.

H. W. RICHARDSON,
Local Forecaster.

Chicago, March 2.—Forecasts until 7 p. m. Sunday: Wisconsin, Minnesota, North and South Dakota: Fair tonight and Sunday. Not much change in temperature.

Reflections of a Bachelor.

New York Press: The most fun in going to Europe is that most of your friends can't.

The one thing that a woman can't understand about a man is the way he will throw away money on useful things.

One of the meanest things about having money is the way everybody worries for fear you will keep on having it.

If a girl drops her glove and a man picks it up for her she tells how he made it happen so he could try to flirt with her.

When you hear a man bawling at the top of the lungs he will try to tell you afterward that he was listening to a political argument.

Pointed Paragraphs.

Chicago News: Dead men tell no tales, but the anecdotes their friends tell about them more than make up for it.

The recording angel doubtless has to keep a special set of books in which to record secrets women do not keep.

Think twice before you speak; and if you think three times the chances are you will not think it necessary to speak at all.

When a young widow begins to take the advice of a man seriously it's a sure sign that she is willing to let him fill the shoes of the late lamented.

The One Shadow.

The green world will be smilin'
Its best to heaven above,
And the lilies and the violets
Will dream sweet dreams of love.
The wind will blow the blossoms—
Make music in its flight;
It's only man that's mournin'—
A shadow in the light!

—F. L. STANTON in Atlanta Constitution.

SATURDAY NIGHT TALK

A Reasonable Creed.

THE SIX ARTICLES SUMMARIZED.

For six weeks we have been building a modest creed. Our great desire has been to make it reasonable and real, brief yet comprehensive and consistent with the usual knowledge of modern times. Let us today take a look at the structure as a whole. What have we declared to be our faith?

First. We believe in God, the source of all things, visible and invisible, the maker of the universe, pervading every part thereof, yet transcendent above it, creator and giver of life. Father of all men made in his own image. We believe in an omnipotent, loving, just and merciful God.

Second. We believe in Jesus Christ, the one Supreme Mediator of the life of God to man, the one perfect character of history, the link between God and man, the constant revealer through His spirit of the mind and will of God, the Savior of all who trust Him, the ideal, the example and judge of conduct for every age. We believe that the personal life of Jesus did not end with His death on the cross, but has been and will be through the ages an unspent and incalculable force for righteousness.

Third. We believe in salvation from sin, that though men are now compounds of good and evil, and though they inherit downward tendencies and add momentum to these tendencies through their own perverse action, they can nevertheless, with divine and human help available, shake off the domination of evil and establish themselves in ways of decency and honor. We believe that no man need be lost, that every man may be saved, but that sin, unless resisted inevitably corrodes and finally destroys the human spirit.

Fourth. We believe in the providential ordering of human affairs, that not one life is overlooked by God, that every event that befalls it, is graciously ordered that the life of the world under the government of God moves on to happy and holy issues, that the hand that made the universe has never been and never will be withdrawn from its control and guidance.

Fifth. We believe in the life of love, that no one has a right to live unto himself, that an outgo of interest and affection should constantly touch with blessing the home, the neighborhood, the community, the nation, the world. We believe that the way of love and kindness which Jesus marked out and which he followed is the only possible way of life for all time and that if it is forgotten or disesteemed, society will disintegrate and in time decay.

Sixth. We believe in the final triumph of good and in the elimination of evil, that men will not always bite and devour one another, that nations will not always stand in hostile array. We believe that the sure outcome of processes now at work will be a kingdom in which good shall have completely triumphed over evil and into which shall be gathered those of every age and clime whose faces have been set toward God.

These six points of our reasonable creed may differ in phraseology and in some underlying conceptions from the famous five points of Calvinism, but we dare to hope that the substance of eternal truth is in them. I should be glad to hear from my readers how this creed appeals to them.

THE PARSON.

FLASHES OF FUN.

Washington Star: "Why do you allow yourself to be posted at your club?"

"Well," answered the easy going youth, "it's a large club and a swell one, and no one would know I was a member of it unless I got posted now and then."

Cleveland Leader: "What's the difference between a good laureate and other poets?"

"A poor laureate gets paid."

Harper's Weekly: "Dad," inquired Freddy, "what is a 'figure of speech?'"

"Where's your mother?" asked "Dad," cautiously.

"She's downstairs," answered the boy.

"Well, then," began "Dad," "a figure of speech, my son, is a woman."

Cleveland Plain Dealer: "Excuse me," impulsively exclaimed the bold, bad man, "but you certainly have a trim little waist, Miss Veeness."

"Yes," replied the young lady, with peculiar emphasis, "there's no getting around that, Mr. Freschley."

Philadelphia Press: "Senator, what do you think ought to be done to save the country from the coming financial panic."

"Avoid the croakers. Good day."

New York Sun: Knicker—Roosevelt considers the gold coins inartistic.

Bocker—Probably the poor artist who designed them never saw one.

Philadelphia Ledger: "We must have less discord," said the baton.

"Fiddlesticks," exclaimed the violins; "you're stringing us."

"Discord? In a horn!" ventured the brass.

With a gluilty air the wood wind rustled the leaves, only the flute was too much put out to make a sound.

"Well, that beats us," remarked the drums, observing that harmony had been restored.

Both Phones—Old, 1010; New, 1855-D

BIJOU

J. S. MAITLAND, Mgr.

MATINEE TOMORROW, 2:45 P. M.

TOMORROW—Howard Bros., celebrated banjoists; the Risleys, sensational and daring acrobats; George Lavender, funniest of all comedians; Coleman and Mexis, champion rifle experts; Isadore Silver, pictured melodies; Reformation, a story of a wayward son. Matinee daily.

TWENTY YEARS AGO.

Taken From the Columns of The Herald of This Date, 1887.

***Articles of incorporation of the American District Telegraph Company of Duluth have been filed by William F. Adams, James C. Haynes and Samuel H. Chase, all of Minneapolis. The capital stock is $60,000.

***At a meeting of the gymnasium members of the Y. M. C. A. last evening, George J. Gruber was elected chairman and Raymond Moore secretary. The instruction fee of the charter members was put at $5 a year, and Messrs. Noyes and Patten and Prof. Cole were appointed a committee to prepare a constitution and by-laws.

***Governor McGill has approved the bill fixing the school boundaries of Duluth.

***The following real estate transfers have been recorded:

The Western Land association to R. C. Sloan, lots 339, 341, block 124, Second division, $1,200.

Gray & Edwards to John Nelson, lot 181, block 67, Second division, $2,000.

R. M. Hunter to S. Clark, lot 6, block 93, Endion, $350.

D. A. Strickler to A. F. Rudolph, lot 28, 30 and 32, block 118, Third division, $1,850.

Belle L. Marble to O. N. Hoyt, lots and 19, block 37, Portland, $2,200.

W. W. Spalding to E. R. Magie, lot 82, block 75, Third division, $900.

A. T. Davis to Emma H. Fish, lots 1, 2 and 3, block 93, Endion, $1,200.

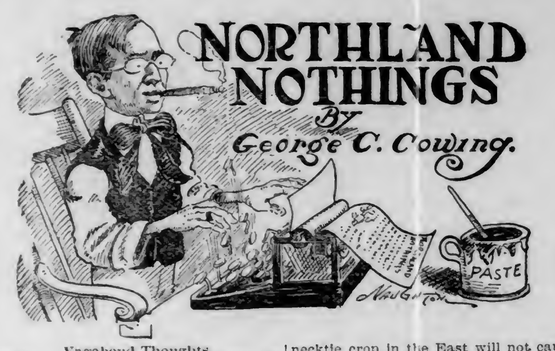
V. Smith to J. J. Costello, undivided ½ lot 1, 20 feet lot 2, block 5, Portland, $3,000.

Donald McKenzie to L. E. Reid, lot 142 and south half lot 144, Third division, $1,400.

***March came in like a lamb, and if the adage holds good look out for squalls at the close of the month.

***William Crail has taken the position of superintendent of the gas and water company, formerly held by William Geggie. He will also retain his connection with the firm of Moffat, Hodgkins & Clark and superintend the work now being done in the city.

***The examination for the position of inspector of hulls was concluded this afternoon, and the candidates for inspector of boilers are now hard at work. There were three on the start, but Alexander Crawford of this city dropped out, and now A. H. Bryan of Stillwater and M. F. Chalk of Duluth are continuing the contest. For inspector of hulls the candidates were Capt. Monroe, Capt. J. W. Miller, F. J. Little and Capt. John Monahan of Duluth; E. L. Seavey of Taylor's Falls, J. S. Irish of Moorhead, and Capt. Maloney of Grand Forks.



Vagabond Thoughts.

When an actor is unsuccessful, he opens a school of dramatic art.

If every man followed the ambitions of his childhood, this world would be pretty full of Indian fighters and detectives.

Wonder if Harry Thaw will go into vaudeville if he is acquitted.

The more uncomfortable a gown makes a woman, the more fashionable it is.

If there are no bargain sales or Saturday matinees in heaven, women must be pretty discontented there.

A bird in the hand makes the heart grow fonder.

Favorite Plays.

"THE ROAD TO YESTERDAY"—The Northern Pacific to Superior.

"THE STRAIGHT ROAD"—One that some bank cashiers and insurance presidents fail to take.

"PETER PAN"—The name of popular shirt waists, corsets, etc.

"THE MAN ON THE BOX"—The person who, according to our genial contemporary, the News Tribune, accompanied a Christmas tree to the bottom of Lake Superior.

"THE HAM TREE"—A Swift play, thut the're Armour. "The Jungle" for instance. Those are very bad gags.

"RED FEATHER"—Something that's in Duluth's cap because a steel plant is going to be built here.

Fashion Hints.

Rubber hose should be worn while the snow lasts. Also during May and June.

Young men of the colleg brand will wear hats this season, instead of the creations they have been crowning themselves with for the past two years. It is said that some of this year's crop really looks like hats. Anyway, they are calling them that.

It has not been fully decided whether the athletic girl or the one that stays in the shade and harbors a Madame Yale complexion will be the most popular this season. Indications are that genuine chorus girls will be in good demand.

Dealers say that the shortage of the necktie crop in the East will not cause a bulge in prices here and that ties of all kinds will be plentiful in the local market. Prime Minnesota grown ties, very fancy, are already being freely offered.

The Elevator Boy.

The elevator boy is from 14 to 65 years of age and he probably has more ups and downs in life than anyone else. (We use this joke with apologies to the author, Rameses I.)

You get in his car and he starts it up before your person has completely transferred itself from the solid floor to that of the lift. And he very much dislikes to let you off again. Usually, he carries you beyond your floor.

If you complain to him, when he growls, that you called out your floor to him in plenty of time, he will give you a lok of contempt that makes you feel very much humiliated. You dislike being so rebuked before the other passengers.

But you must not say anything cross to the elevator boy. If you do, he won't stop his car for you at all, when you want to get on, and if he can't lick you himself, he'll call in the janitor and they'll both accomplish it.

Do not pity the elevator boy. He does not need it. Pity yourself.

We once pitied an elevator lad of some thirty-five summers because he had to stand on his feet all day and push the lever back and forth. Afterwards, we learned that he made $10,000 on North Butte, and that his wife was spending the winter in California.

This, in view of the fact that we were suffering from a ready money famine, made us very angry and we resolved never to pity anyone again, except ourselves.

Found.

Certificate for copper shares. Owner may have the same by calling and identifying at the store where they have everything in the line of music, talking machines, phonographs and records. Zenith Music Co., 6 East Superior street. Fred G. Bradbury, proprietor.

Easy Terms at the Cash Price

$28.60

With Six 10 inch Records

Limited Special Offer

New Columbia Graphophone (type BN) and Complete Outfit—$28.60; including your choice of six 10-inch Columbia Disc Records

This handsome new Graphophone has a large quartered oak Cabinet, a noiseless Motor that can be wound while running, and a beautifully decorated flower Horn—black or red. It is equipped with the same patent aluminum Tone-Arm and the same Reproducer that have made the Graphophone famous for mellow resonance and sweetness of tone.

The six records are regular 10-inch Columbia disc records,—beyond comparison for pureness of tone, faithful reproduction and absence of foreign noise.

That's the outfit that costs you $28.60—and is sold under *our written guarantee* which accompanies each machine. Come in and let us *show* you.

18 Third Avenue West, Duluth.

NEWS OF THE WEEK AT CENTRAL HIGH SCHOOL

Students Honor the Memory of Henry Wadsworth Longfellow.

Boys Protest at Being Barred From Basketball Games.

As last Wednesday was the centenary of the birth of Henry Wadsworth Longfellow the day was celebrated at the high school by a short but interesting program.

Principal Smith spoke briefly, dealing with the poetry of Longfellow and speaking of his characted. He said that Longfellow is better known and loved by the English than any other American poet ever has been, and that he is the only American to be given a place in Westminster Abbey.

Mr. Smith then read one of Longfellow's best known poems, entitled "The Children," and followed this with "The Children's Hour." In the latter, he said, we might imagine the poet talking to his own children.

At the close of Mr. Smith's speech the choir sang one of Longfellow's compositions set to music, entitled, "Sail on, Our Ship of State."

Myrna Presnel read a paper on Longfellow, the man and poet. She mentioned Milton's remark, that in order to be a poet a man's life must be a poem, and she said that Longfellow's life was one long, sweet song. Many of his poems are set to music in England, she said, where his poetry was greatly appreciated.

Richard Hodgeson spoke of Longfellow's life at Cambridge, telling of the work which he did there.

The program was closed by another composition of Longfellow's, entitled "The Curfew," which was sung by the choir.

Sophomore Meeting.

A rather uneventful meeting was held by the members of the sophomore class last Wednesday. In the absence of the secretary, the president read the minutes of the preceding meeting. As the secretary, Bess Whipple, is ill, she has resigned her position. Esther Coffin was elected as her successor.

The treasurer reported that he has collected $8.70 during the last month, which, with the $44.95 that was in the treasury, leaves a balance of $53.65. There have been no expenses during the month. The payment of class dues was better last month than usual, he said, but there are still a few delinquents who have not paid up except for the first two or three months . These are the ones that the treasurer is after, and unless they pay up soon some plan will be adopted for rounding them up, as the class will need the money for the hop.

The president said that the class party will probably be given early in April, although the date has not been set. He was given the power to appoint a committee to make arrangements for the affair.

The sophomore Zenith board has met and decided on the prizes for the best contrbutions. For the best story a prize of $2.50 will be awarded; for the best frontispiece, $2.50; for the best poem, $1, and for the best tailpiece, 50 cents.

The president urged everyone who has any talent to contribute to the Zenith and help bring the sophomore's part up to the high standard of the rest of the book.

As the seniors and juniors have already elected their baseball and track captains, the sophomores decided that it was about time to follow suit. Earl Cummings was unanimously chosen to captain the baseball team, and David Duncan was elected captain of the track team. The president spoke of the poor showing which the class mado in track athletics last year, and said he would like to see more interest taken in it this year, in order that the class may at least beat the freshmen.

The announcement was made that all those who wish to secure class pins can do so by handing in their names to Elizabeth Olcott, chairman of the pin committee.

Honor Pupils Named.

On Monday morning Principal Smith sprung a surprise on the students after reading the regular monthly scholarship roll, by announcing the list of senior honor pupils.

The five members of the class who received the highest averages in the order in which they rank is as follows: Helen McKinlay, Edith Miller, Lydia Johnson, Siebel Harris and Edward Cole. The following students received honorable mention, with averages varying according to the position in the list: Jessie Johnson, Helen Potter, Frank Boerner, Lucile Bradley and Gertrude Hoopes. Harriet Stryker, Winnifred Mahon and Annie Hugo share the honor for eleventh place as they all have the same average.

The custom of having an honor roll is as old as the school and formerly the successful contestants were allowed to represent the class at the commencement exercises. However, it was decided several years ago that this plan was not conducive to the best kind of a program as the students who received the best marks were not apt to be the ones who were the best speakers. This custom was therefore abolished, and the representatives of the class are now chosen strictly by literary and elecutionary merit. There is therefore no benefit derived from being on the list except the honor connected with it.

Boys Are Barred.

In the basketball league the seniors are in the lead and seem to have very little trouble in besting their opponents. In the games which have been played so far they have defeated the juniors by a score of 12 to 6 and scored 7 against the sophomores' 0. Both contests were very fast considering that this is the first year that the game has been played here.

The boys of the school are disappointed at being barred from the contests, as they had hoped to get some pointers from the feminine style of play. The girls are admitted to the games between the boys, and the latter argue that a fair exchange is no robbery. If an admission of 15 cents were charged the girls could soon take in enough money to pay for their suits.

A challenge was received this week by the senior girls for a game with the alumni of the Blaine high school of Superior. The Duluth girls were anxious to accept the challenge as they would like to stack up against some outside team just to see what kind of a showing they could make, but they are not allowed to engage in contests with any outside school. For this reason the challenge was not accepted. There are several games yet to be played in the high school series and the girls are practising steadily.

Schillerbund Meets.

The Schillerbund held an interesting meeting last Thursday and a good program was given. "Fraulein" Pearl Hector, who has held the office of secretary since the society was formed, has resigned her position. "Fraulein" Hibbing was chosen to succeed her. The work of keeping the minutes in German is quite difficult and it is planned to change secretaries occasionally in order that the work may not fall all on one person.

Frank Boerner, the treasurer of the club, also tendered his resignation, as he did not have any time which he could devote to collecting the dues. "Herr" Ringsred was elected to take his place in keeping charge of the club's money.

The program was opened by a talk in German by "Fraulein" Stahlbush on the "Life of Wagner," the great German composer. A song entitled "Gebade" was well rendered by "Fraulein" Matteson.

Marie Hibbing gave an interesting talk on Wagner's work, dealing with the life of this famous man and speaking of the prominent place which his work commands in the musical world.

The subject of "Wagner's Last Works" was treated in an entertaining manner by "Fraulein" Nelson. Miriam Levine played a piano solo entitled "Fraulings Rauschung" in a pleasing manner. "Fraulein" Mary Orveck talked interestingly on the Bavarian city of Bayreuth. The program was closed by a speech on Tannhauser by "Herr" Toben.

Agassiz Club.

A meeting of the Agassiz club was held last Monday with a better attendance than usual. The president was authorized to appoint a committee of three to write up the report of the society for the Zenith. The report will deal with the work of the society and the part which it plays in the school life. Every society of the school has a write-up in the book and the members of the Agassiz club have begun the preparation of their's early.

Pearl Hanson read an interesting paper on the whale. She spoke of its peculiar habits and life in the northern seas, also telling of the uses which are made of its blubber and the whalebone which is extracted from its mouth.

The hunting of the whale, she said, used to be and, in some places still, is an important industry. The whalebone commands a very high price, as it is an extremely useful commodity.

The next meeting of the society will be held a week from Monday.

High School Notes.

Work on the Senior play is progressing rapidly. The first and second acts have been pretty thoroughly mastered, and the last act is now being learned. Rehearsals have been held every night this week, lasting about an hour and a half. After the entire play has been committed by the principals, the minor characters will be assigned their parts.

* * *

Mr. Smith has announced that all who failed to pass in the first semester's work will be given an opportunity to make it up during the Easter vacation when examinations will be held.

* * *

A small fox terrier created quite a sensation in chapel Monday morning by standing on the balcony railing and grinning delightedly at the students.

* * *

It was planned to hold the Freshman-Sophomore hockey game today, but as no rink could be secured, the contest was postponed. It will be held some time next week.

* * *

The Freshman and Sophomore basketball teams have decided not to play off the tie for the last place in the league. The honors for the booby prize will be divided.

* * *

There will be no more vacation until Easter and Mr. Smith has urged every one to buckle down and make up for lost time.

* * *

Some of the budding tragedians of the senior class gave a presentation of one of the scenes from Hamlet in the English classes this week. The parts were well delivered and considerable dramatic ability was displayed by some of the boys.

To Owners of Bad Breath

Foul Odor of Indigestion, Smoking, Eating or Drinking Stopped at Once With Stuart's Charcoal Lozenges.

Trial Package to Prove It Sent Free.

Bilious breathers, onion eaters, indigestion victims, cabbage consumers, smokers, drinkers and those with gas on the stomach are in a class all by themselves, distinguished by a powerful bad breath.

They all breathe, and as they breathe, the whiff out odor which makes those standing near turn their heads away in disgust. The pitiable part of it is that these victims do not realize what a sickening thing a bad, offensive breath is to others.

Charcoal is a wonderful absorber of gases and odors. It absorbs 100 times its own volume of gas.

Stuart's Charcoal Lozenges will put a stop to your bad, offensive breath, and to your belchings, whatever the cause or source, because the charcoal quickly absorbs all noxious, unnatural odors and gases.

If you suffer from indigestion and belch gas as a result, Stuart's Charcoal Lozenges will absorb all the gas and make you stop belching.

If on getting up in the morning you have such a bad, bilious breath, that you can almost smell it yourself, Stuart's Charcoal Lozenges will get rid of it for you quickly.

If you have been smoking or chewing, or have been eating onions or other odorous things, Stuart's Charcoal Lozenges will make your breath pure and sweet.

Charcoal is also the best laxative known. You can take a whole boxful and no harm will result. It is a wonderfully easy regulator.

And then, too, it filters your blood—every particle of poison and impurity in your blood is destroyed, and you begin to notice the difference in your face first thing—your clear complexion.

Stuart's Charcoal Lozenges are made from pure willow charcoal, and just a little honey is put in to make them palatable, but not too sweet.

They will work wonders in your stomach, and make you feel fine and fresh. Your blood and breath will be purified. You will feel clean inside.

We want to prove all this to you, so just send for a free sample today. Then after you get it and use it, you will go to your druggist and get a 25c box of these Stuart's Charcoal Lozenges.

Send us your name and address today and we will at once send you by mail a sample package free. Address F. A. Stuart Co., 93 Stuart Bldg., Marshall, Mich.

BRIEF TELEGRAMS.

George W. Vanderbilt of New York and Mrs. Marshall Field of Chicago have purchased residence property in Washington. The property is located at New Hampshire avenue and Seventhteenth street, northwest, and it is announced that Mr. Vanderbilt and Mrs. Field will erect stately mansions on the property during the present year.

Joseph Leiter, owner of the town of Zeigler, Ill., and the coal mines at that place, Friday night, was found guilty of allowing his mines to be inspected by a person not having a certificate of competency. The jury was out more than twenty-four hours. The case grew out of an explosion in one of Leiter's mines, killing fifty-seven miners.

Robert Lee Killian, former member of the St. Louis detective bureau, who was shot Wednesday night during a feud fight in a saloon, died Friday. George Williams, another former city detective, is under arrest charged with the shooting.

The Black Hills foundry at Deadwood, S. D., having contracts for all the iron work of the Great Belle Fourche government irrigation project, burned Thursday night, with a total loss. It is believed all the patterns for the irrigation works were destroyed, but the managers are not sure.

The dead body of M. F. McCluskey, a prominent business man of Edinburgh, Christian county, Ill., was found in a rooming house in Springfield, Friday. It was the end of a spree of two days' duration, which had followed on his trip to this city. He had taken chloroform and carbolic acid.

James Cruthon, an artist, 27 years of age, whose home is in Washington, D. C., where he had a studio on Twentieth street, near Florida avenue, committed suicide at the home of his brother-in-law, H. C. Clark, in West One Hundred and Fortyninth street, in New York, Friday night. Crython shot himself in the head.

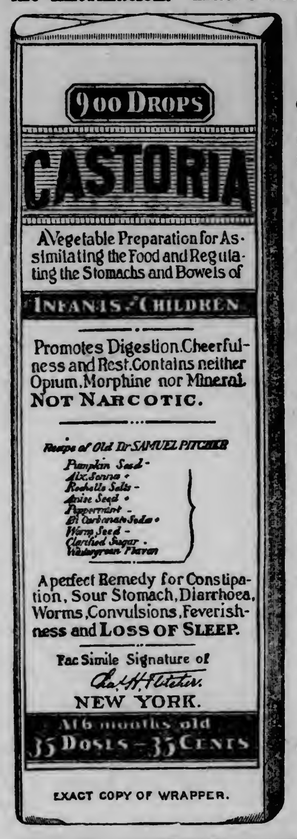
Rheumatic Pains Relieved.

B. F. Crocker, Esq., now 84 years of age, and for twenty years Justice of the Peace at Martinsburg, Iowa, says: "I am terribly afflicted with sciatic rheumatism in my left arm and right hip. I have used three bottles of Chamberlain's Pain Balm and it did me lots of good." For sale by all druggists.

You like to find a bargain—and if you have one to offer you may be sure that the "want ads" readers" of The Herald will soon seek you out.

Physicians Recommend Castoria

CASTORIA has met with pronounced favor on the part of physicians, pharmaceutical societies and medical authorities. It is used by physicians with results most gratifying. The extended use of Castoria is unquestionably the result of three facts: *First*—The indisputable evidence that it is harmless: *Second*—That it not only allays stomach pains and quiets the nerves, but assimilates the food: *Third*—It is an agreeable and perfect substitute for Castor Oil. It is absolutely safe. It does not contain any Opium, Morphine, or other narcotic and does not stupefy. It is unlike Soothing Syrups, Bateman's Drops, Godfrey's Cordial, etc. This is a good deal for a Medical Journal to say. Our duty, however, is to expose danger and record the means of advancing health. The day for poisoning innocent children through greed or ignorance ought to end. To our knowledge, Castoria is a remedy which produces composure and health, by regulating the system—not by stupefying it—and our readers are entitled to the information.—*Hall's Journal of Health.*



900 DROPS
CASTORIA
A Vegetable Preparation for Assimilating the Food and Regulating the Stomachs and Bowels of
INFANTS & CHILDREN
Promotes Digestion, Cheerfulness and Rest. Contains neither Opium, Morphine nor Mineral.
NOT NARCOTIC.
Recipe of Old Dr SAMUEL PITCHER
A perfect Remedy for Constipation, Sour Stomach, Diarrhoea, Worms, Convulsions, Feverishness and LOSS OF SLEEP.
Fac Simile Signature of
NEW YORK.
At 6 months old
35 DOSES – 35 CENTS
EXACT COPY OF WRAPPER.

Letters from Prominent Physicians addressed to Chas. H. Fletcher.

Dr. B. Halstead Scott, of Chicago, Ills., says: "I have prescribed your Castoria often for infants during my practice, and find it very satisfactory."

Dr. William Belmont, of Cleveland, Ohio, says: "Your Castoria stands first in its class. In my thirty years of practice I can say I never have found anything that so filled the place."

Dr. J. H. Taft, of Brooklyn, N. Y., says: "I have used your Castoria and found it an excellent remedy in my household and private practice for many years. The formula is excellent."

Dr. R. J. Hamlen, of Detroit, Mich., says: "I prescribe your Castoria extensively, as I have never found anything to equal it for children's troubles. I am aware that there are imitations in the field, but I always see that my patients get Fletcher's."

Dr. Wm. J. McCrann, of Omaha, Neb., says: "As the father of thirteen children I certainly know something about your great medicine, and aside from my own family experience I have in my years of practice found Castoria a popular and efficient remedy in almost every home."

Dr. J. R. Clausen, of Philadelphia, Pa., says: "The name that your Castoria has made for itself in the tens of thousands of homes blessed by the presence of children, scarcely needs to be supplemented by the endorsement of the medical profession, but I, for one, most heartily endorse it and believe it an excellent remedy."

Dr. R. M. Ward, of Kansas City, Mo., says: "Physicians generally do not prescribe proprietary preparations, but in the case of Castoria my experience, like that of many other physicians, has taught me to make an exception. I prescribe your Castoria in my practice because I have found it to be a thoroughly reliable remedy for children's complaints. Any physician who has raised a family, as I have, will join me in heartiest recommendation of Castoria."

GENUINE **CASTORIA** ALWAYS

Bears the Signature of

Chas. H. Fletcher.

The Kind You Have Always Bought

In Use For Over 30 Years.

THE CENTAUR COMPANY, 77 MURRAY STREET, NEW YORK CITY.

CITY AS IT APPEARED THIRTY-SIX YEARS AGO

DULUTH IN 1870.

S. W. Combs, manager of "The Little Duchess" company, who is familiarly spoken of as the "globe trotter," knew of Duluth long before 99 per cent of its present residents had taken up their homes here. Mr. Combs was in the city this week, and had with him a photograph, which proved of great interest to his friends, showing, as it does, how the Zenith City looked nearly forty years ago.

William A. Combs, his brother, lived here when the town was a mere landing place. He was engaged in the leather business in the city from 1871 to 1878, and his only regret now is that he did not buy up a little real estate then and remain here until the present day. His profits would have been much greater than would come from a life time of work in the leather business. W. A. Combs is now a resident of Boonton, N. J.

It is hard to associate the Duluth of today with this photograph of thirty-six years ago, when Duluth consisted of a few log houses, a tent or two and Indian tepees of the kind pictured.

Advice to mothers: Don't let your children waste away. They can be strong, healthy and vigorous with Hollister's Rocky Mountain Tea. It's a swift winged messenger of health. 35 cents, Tea or Tablets. Ask your druggist.

OLD people need *Scott's Emulsion* because age has enfeebled their blood, worn out their tissues, diminished their nerve power and impaired their general health.

Scott's Emulsion enriches the blood, renews the tissues, restores nerve power and builds up the general health. It enables old people to throw off colds, coughs, rheumatism and all winter diseases.

Scott's Emulsion makes thin babies fat, pale children rosy, delicate mothers strong. It is the most nourishing food in the world.

ALL DRUGGISTS; 50c. AND $1.00.

WEATHER FOR FEBRUARY

Month Was Few Degrees Colder Than the Average.

The mean temperature for the month of February, according to the monthly meteorological summary, compiled by the local weather bureau, was 2 degs. lower than the average for this month during the past thirty-seven years. The average for the past has been 13.2 degs. above while the February just past had an average of 11 degs.

The highest temperature during the past month was 44 degs. on Feb. 15. The lowest temperature occurred on Feb. 3, when the mercury dropped as low as 28 degs. below. The coldest February during the past thirty-seven years was that of 1875, when the mean temperature was 2 degs. below. The absolute maximum for the month in thirty-seven years was 58 above, while the absolute minimum was 36 below.

February had a total precipitation of .71 of an inch and total snowfall of 7.5 inches. The greatest precipitation in twenty-four hours was .30 on Feb. 28. There were 13.8 inches of snow on the ground at the end of the month.

The prevailing winds were from the northwest and the total movement during the month was 10,959 miles, the average hourly velocity being 16.3 miles. The maximum velocity for five minutes was 54 miles an hour from the Northwest on Feb. 13. There were twelve clear days, nine partly cloudy and seven cloudy.

Chamberlain's Cough Remedy Is Both Agreeable and Effective.

Chamberlain's Cough Remedy has no superior for coughs, colds and croup, and the fact that it is pleasant to take and contains nothing in any way injurious has made it a favorite with mothers. Mr. W. S. Pelham, a merchant of Kirksville, Iowa, says: "For more than twenty years Chamberlain's Cough Remedy has been my leading remedy for all throat troubles. It is especially successful in cases of croup. Children like it and my customers who have used it will not take any other." For sale by all druggists.

PLANT NOT FOR SALE

Eastern Capitalists Would Like To Buy City's Gas Plant.

Department Awards Several Contracts for Extension Materials.

Representing Eastern clients of reputed large capital, a St. Paul attorney has written President H. H. Phelps of the board of water and light commissioners of the city of Duluth, inquiring if the city's gas system is for sale, and, if so, what price the municipality held the system to be worth. The attorney stated that he had understood that the city was desirous of selling its plant.

President Phelps submitted the communication, together with his answer, to the board at its last meeting. In the answer he states emphatically that the system is not for sale for "love or money," that the citizens of Duluth are well plased with the operations of the water and gas system and that municipal ownership, from the reduced cost of water and gas and the large earnings after the reduction, have demonstrated beyond any doubt the success of the venture.

The sale of the water and gas bonds has placed the department in a position to make some of the big extensions and some other minor extensions of water and gas mains the coming season and the board of water and light commissioners are already making numerous contracts with the manufacturing company for the large quantity of supplies that will be needed.

Three bids were sumbitted for furnishing the iron pipe that will be needed, which order approximates 2,400 tons. Two concerns, the American Car & Foundry company and the United States Cast Iron & Foundry company submitted bids nearly the same in amount, the bids being $89,612 and $86,-991, respectively. The latter bid was accepted and the United States Cast Iron & Foundry company was awarded the contract. The third bid was that of R. D. Wood & Co. of Philadelphia, and approximated $95,000.

The amount of the contract for the iron pipe is about 20 per cent higher than the department could have bought the same supply of mains for last year. The pipe could have been bought at a great saving to the city then, but the bonds had not been disposed of and the department did not have the money available.

Under the contract the United States Cast Iron & Foundry company is to furnish half the pipe by July 1, three-fourths of it by Aug. 1, and all of it by Sept. 1. The terms insure the delivery of the pipe in time to make the required extensions before the freeze-up next winter.

In the matter of valves, the department received ten bids, the contract being awarded to the lowest bidder, the Roe Stevens Manufacturing company of Detroit, on the following basis: 4-inch valves, $4.70; 6-inch, $12; 8-inch, $18; 10-inch, $24.25; 12-inch, $35.50. These prices are quoted on gas pipe valves. The water pipe valves will cost about 10 per cent less, the manufacturing concern agreeing to furnish all the valves at the price given, that the city may require.

F. J. Thompson's foundry of this city was awarded the contract for the special castings, on the basis of three cents per pound.

J. B. Crow & Sons of Chicago have the contract for the valve boxes, on the basis of $4.68 each. The contract for the fire hydrants was awarded to R. D. Wood & Co., on their bid of $39.75 per hydrant.

The contract for the season's supply of galvanized iron pipe was awarded to the Crane-Ordway company on its bid of $767.15. The same firm was awarded the contract for the fittings, at $279.96; the lead pipe, at $7.38 cents per pound; the solder at 23.62 cents per pound.

ALCOHOL BILL

Passes the Senate After Cutting Out Provision for Inspector.

Washington, March 2.—The denatured alcohol bill passed the senate yesterday by a vote of 65 to 1. Senator Pettus of Alabama casting the negative vote. The action was taken after the committee amendment requiring the presence of a government storekeeper whenever alcohol is being manufactured had been defeated by a vote of 47 to 16. The bill as passed contains one amendment placed in it by the senate, that permitting rum to be denatured, and consequently the measure must be returned to the house for action. The bill is intended to make it possible for farmers to establish stills of limited capacity for the manufacture of alcohol to be denatured.

Conference reports on the agricultural sundry civil, naval and postoffice appropriation bills were agreed to.

A bill was passed granting a pension of $50 a month to the widow of the late Gen. Joseph R. Hawley.

AWARDED JUDGMENT.

Court Decides in Favor of Anton Lien in Injury Case.

Judge Page Morris in the United States district court yesterday awarded Anton Lien $3,500 for injuries received while working on the steamer C. W. Watson on the afternoon of Aug. 22, 1904. The suit was known as Anton Lien, libelant, against the steamer C. W. Watson, libelee. John Jenswold, Jr., conducted the case for Lien, who sued for a total of $16,820.

It was claimed by Lien that he was employed by the captain of the vessel as a coal heaver to assist in unloading the boat at the docks of the Northwestern Fuel company. While standing directly beneath one of the hatches directing his attention to unloading the buckets, some heavy oak timbers and a large jackscrew struck him on the back from above and injured him seriously.

Lien maintained that his injuries were due to the negligence of the crew, who should not have handled the timbers without giving due warning, as they were supposed to know that he was at work in the hold.

DIE FROM INJURIES

Engineer and Fireman of Switch Engine Pass Away.

Were Terribly Scalded and Injured Internally in the Wreck.

As a result of injuries received in the wreck in the Northern Pacific yards yesterday morning, Morris Spearin, the fireman on the switch engine, and Ole Bergstrom, the engineer, died yesterday afternoon at St. Luke's hospital, where they were taken after the wreck.

Spearin was the son of Mr. and Mrs. Spearin of 917 East Seventh street, his father being a well-known drayman here. The boy suffered a compound fracture of one leg, and besides being terribly scalded by escaping steam, was internally injured.

The funeral services will be held from the family residence, tomorrow afternoon, at 2 o'clock, Rev. Baxter Waters of the Christian church conducting the services.

Bergstrom died half an hour after his youthful partner, from internal injuries and the terrible scalding he received. His home is at Moose Lake, and his remains will be forwarded there today.

DUN'S WEEKLY TRADE REVIEW

Buyers Are Placing Liberal Orders at Leading Centers.

New York, March 2.—R. G. Dun & Co.'s Weekly Review of Trade, says: Jobbing trade in dry goods and millinery for spring distribution continues the most active commercial feature, more large attendance of country buyers placing liberal orders at the leading centers, and it is the exception when transactions are not equal to those of a year ago, while substantial gains are often recorded.

Leading industries have orders covering full production many months in advance, steel mills falling further behind with deliveries, because of new business greater than the daily rate of output.

The only adverse feature in the outlook is the discussion of wage scales that usually appear about this period, but no excessive struggle is imminent.

Collections improve, but are still slow on some sections on account of high money rates, which are not materially affected by the liquidation of stocks nor the progress of legislation for relief.

Steadiness is the dominant feature of the markets for iron and steel. Some disposition is noted on the part of pig iron consumers to insist on concessions but as most furnaces need no new business before July and some are sold up to the last quarter of the year, prices are firmly held and few contracts are placed. Quotations are therefore nominal, representing the appearance at which sales could be effected or were last made. Mills producing finished steel shapes or partially manufactured forms make no progress in overtaking orders, new contracts coming forward at about the daily rate of production, and in many cases, the complaints of consumers indicate that deliveries are falling further behind. Some foreign business is secured but much has been lost because of the oversold condition of this market. More advances in the price of cotton goods at primary markets testify to the inability of the mills to handle the business in sight and the urgency of demand from second hand that were not prepared for the needs of distributors. The slight rise in cost of raw material had no bearing on the situation, no attention having been paid to that factor for some time past. Progress is slow in woolens, most buyers in the men's wear market having returned home, after placing initial orders that do not establish a definite position. Little bulk business is noted although some sellers claim to see the direction that will be taken beyond duplicate orders. Dress goods fabrics are now fairly opened, and cutters take more interest in new lines although orders are still placed cautiously; new business at New England footwear factories is chiefly limited to supplementary orders from Eastern jobbers for late spring and early summer delivery. Small contracts for fall goods appear occasionally, but it is still somewhat early for activity in this department. Supplies of sole eather increase and manufacturers are more disposed to await lower prices, many still holding stocks secured in December. Upper stock is active, most grades are firm, the only exception being glazed kid. Packer branded hides sell freely at steady prices, but native skins are weak and neglected, declines being quoted on some grades. European and South American markets are firm but imported hides attract little attention in the local market.

"There's a Reason"

FINDING LARGEST DIAMOND.

American Magazine: A solitary man was walking across the veldt, intending to climb down into "No. 3 workings." This was Capt. Frederick Wells, the mine manager. For a moment he stood on the brink looking down at the tangled chaos of earth heaps, crisscrossed with trolley tracks and steel trucks, like children's toys. The man was listless and tired, for it had been a burning day in a country where water is most precious. Wells took off his hat and began the descent of the bank. He went down sidewise, and when less than half way, his eye suddenly caught a glassy gleam from a large stone three parts embedded in the soil. To lay hands upon it and wrench it from the matrix was the work of a moment.

And when he had done this, the man's judgment told him he held in his hand the greatest diamond the world ever saw or probably will ever see again—a colossal crystal of 3,024¾ carats—1.37 pounds avoirdupois! Like a man in a dream, Wells squatted down precariously on the steep, loose bank and wondered whether, after all, it was but a fantastic dream, born of much zeal as manager and a steady succession of large finds.

This record stone was not, as might be supposed, sent to Europe in a ship of its own. So prosaic is the civilized commerce of today that this vast treasure was merely sealed up in a tin box, registered as a "postal packet" and sent through the mails as though it were worthless geological specimen! It was received at the London office of the Premier Diamond Mining company, Ltd., and measures were taken at once to insure it for about half its approximate value—say $2,500,000.

NEWS FROM THE NORMAL

Manual Training Classes Hold a Very Successful Exhibit.

The Winter Term of Study Will Close Next Week.

The work accomplished in the manual training and art departments of the normal was displayed to the public on Friday, the exhibit hours being from 2 to 4 in the afternoon.

In the art room and the studio, which are on the third floor of the building, were artistically arranged the wood work, basketry, leather and art work. The walls were hung with red burlap, and this formed a splendid background for the panels of still life, in colors, in black and white, all over designs, conventionalized tile and flower designs, designs for rugs, for bookcovers and the stencil work. The classes have done excellent work in casts, in the charcoal and in pencil.

The stencilling was taken up here for the first time during the last term, and beautiful designs have been worked out by means of water colors and dyes on burlap, canvas and other firm fabrics.

A great variety of designs have been applied in the manual training woodwork. Plate racks, book racks, shelves, magazine holders, letter holders, pin trays, boxes and tabourettes form the exhibit of larger models. The smaller-sized models include pictures of frames, small shelves, whiskbroom holders, match holders, necktie racks, blotter-tops and other small articles. The models are stained in mahogany, light and dark greens and all shades of brown, and are very rich in appearance.

The baskets, which have been made since Christmas, form an interesting display. The different weaves and borders have been worked out successfully in the rattan and raffia. Dyes have been used in the baskets, and a variety in color combinations has been obtained. About sixty baskets were on exhibit, and others will be completed before the term ends. The list includes dainty flower baskets Japanese hanging baskets, waste baskets and many different shapes of work baskets.

Ferns and trailing green hung about the rooms in basket holders. During the hours Miss Marguerite Mitchell had charge of the music. Misses Maggard, Roberts, Dunning and Ray assisted in playing. Punch and wafers were served during the afternoon.

Miss Helen Bainbridge is the instructor of the manual training and art departments, and the work reflects great credit on her ability. Miss Bainbridge is a graduate of the University of Chicago, and has studied at Pratt institute and abroad, and has had charge of these departments in the normal school for the past two years.

Next week closes the winter term of instruction at the normal. Examinations take place Thursday and Friday, and then a vacation of ten days will be enjoyed by the students. Many of those who live out of Duluth will spend their vacation at home.

• • •

Wednesday the one-hundredth anniversary of the birth of Henry Wadsworth Longfellow, was celebrated by loyal Americans. The pupils of the Fifth and Sixth grades of the Model school have been studying Longfellow and reading, of late, of the tribute being paid him in the East. On Wednesday they gave a program consisting of papers and recitations from Longfellow.

The Glee club held a large meeting Friday afternoon.

If you are selling enough goods—then your advertising in The Herald is sufficient.

ONCE TOO OFTEN.

New York Press: There is a man-about-town here, one of the best fellows in the whole universe, who has so much money that he doesn't need to borrow, but loves to elevate some less fortunate acquaintances to the dignity of lenders when they meet in public resorts.

This man is a liberal spender, but not by any means a prodigal son. On the grand rounds he may run across scores of familiars in bar or cafe, hotel, club or theater, and it is his habit to turn to George or Bill or Jack, and say: "By the way, old chap, do I owe you anything?" The fellows just introduced to poor Jack or George or Bill see a flash of yellow backs, and hear Jack or George or Bill say hastily: "What? Not a cent, not a cent, old boy." The other night in the Hotel —— our man-about-town, who, like Barney Barnato, would "buy a friend a drink, but not lend him a dollar," had the usual crowd of sycophants about him, and, turning suddenly to Jack, said: "By the way, old chap, do I owe you anything?" "You do, you do," responded Jack. "I'd like to have that fifty I lent you last month." The host nearly fainted, but rather than show the white feather, handed over the $50.

Moose Beer and the Pure Food Law

There has been no clash between the manufacturers of Moose Beer and the pure food law. While the new law affects nearly every producer of food or drink, it does not affect this brewery because **Moose Beer** is and always was absolutely pure.

Extreme care is used in arriving at the limit of cleanliness in the brewing process. The materials used are the purest and best obtainable and are blended into a beer mild beyond criticism and rich beyond comparison.

Why not give our beer a trial?

UNLAWFUL DIVERSION

(Continued from page 1.)

affairs and protect her property with prudence and discretion against undue influence, fraud of others, or to take charge of and manage the present legal proceedings;" and that Mrs. Eddy lives "under the charge and in the custody of Defendants Frye and Strang, and that very few persons are allowed to see her, except for a few minutes."

Mr. Glover further claims that in the last twenty-five years his letters to his mother have never had a direct reply from her, and from other matters relating to his attempt at correspondence, Mr. Glover, states the petition, "believes that Mrs. Eddy is surrounded by designing persons who are using her and her condition for their own selfish ends."

The petition then sets forth the "extensive and valuable" real and personal property of Mrs. Eddy and alleges that the defendants and others "manage the same solely, according to their own will and pleasure."

In dealing with the revenue accruing to Mrs. Eddy from her writings, journals, the Massachusetts methaphysical college for teaching the pathology of spirit power or science of metaphysical healing, the plaintiffs set forth that probably several million dollars was netted to the leader of the cult.

The petition alleges that "there is abundant reason to believe that the defendants and their associates have wrongfully converted to their own private uses, or otherwise misappropriated or unlawfully diverted large sums of money and large amounts of property of the said Mary B. G. Eddy. These plaintiffs claim that the defendants should now be adjudged to have been trustees thereof and should be compelled to give an account thereof and make restitution thereof."

In closing, the plaintiffs pray that the defendants "be enjoined during the pendency of the present suit in equity, not to interfere with or undertake to manage or control any business or property of Mrs. Eddy or to do any act whatever in her name or behalf, under any pretext or under any power of attorney, and, that a receiver or receivers be appointed to take possession of all the property of the said Mary B. G. Eddy now in the hands or under the control of the defendants, and to manage all her business affairs; and to make such ultimate disposition of all her estate as this court may hereafter decide to be wise and prudent."

TERRIFIC COLLISION

(Continued from page 1.)

quet given in their honor in this city by Company A, of the same regiment, and were on their way home at the time of the accident. The train left Waterbury at 12:45, and, as the regular train was then late, orders were given the special, it is understood, to run to Hillside Crossing, there take the siding and wait until the regular went by. The special, however, is said to have run beyond that point and so met the regular at Platt's Mills.

The tenders of the locomotives did not leave the rails but were hurled backwards into the coaches behind them. Almost all of the occupants of the special coach received some hurt. The baggage car of the regular was telescoped.

The most seriously injured of the passengers are: Fred C. Russell of New Haven, a private in Company F, and C. V. Champlin, musician, also of New Haven. Both received internal hurts. In addition Russell is bruised about the head, ears and nose and one eye is injured. Champlin had his elbow fractured, head and face cut and minor cuts and bruises about the body.

Waterbury, Conn., March 2.—By order of Coroner Mix, it is understood, warrants are being prepared for the arrest of Conductor George Eaton of New Haven, who was in charge of the special train of the New Haven Grays last night, and for Engineer William E. Fisher of the special. It was supposed that Fisher was killed, but as the wreckage is being cleared away no trace of his body is found and belief is growing that he jumped from the engine cab and fled. His name, however, remains in the list of dead as made up.

BREACH IS WIDENING

(Continued from page 1.)

them. The debates indicated a growing intensity of political feeling, which is extending to social relations. The members of the Center party at a caucus resolved not to leave their cards at the chancellor's residence, as has been customary, nor to attend his parliamentary reception. To accentuate their personal opposition they have left cards at the houses of all the other ministers and are attending the latter's evening receptions. Many of the higher clergy disapproved of the decisions of the Center party before the elections, but under the circumstances, in order to preserve intact the powerful church party, they are closing up their ranks and consolidating in support of it. The impression of experienced observers is that Germany is likely to have a period of lively internal politics, which may even lead to another dissolution of the reichstag, after the reassembling of that body next fall, as the government, having barely defeated the Socialists, may desire another general election and seek to reduce the parliamentary representation of the Center party.

LODGE NOTES

Attends State Meeting.

F. A. Noble will represent Alpha Council No. 1, Modern Samaritans, at the session of the Minnesota Fraternal Beneficiary association to be held at St. Paul tonight. Business of importance will be transacted and a resolution, which is of especial interest to all fraternal societies, will be acted upon. Mr. Noble was chosen to attend the meeting at the session of the Alpha council, which was held Thursday night. Seven candidates were initiated into the order.

Regular Meeting Tuesday.

The regular annual conclave of Duluth Commandery, No. 18, K. T., will be held at the Masonic temple, on Tuesday, March 5, at 7:30. General business will be transacted and the reports of officers will be heard. Officers for the ensuing year will be chosen.

A. O. H. Meeting.

A joint meeting of the three local divisions of the A. O. H. will be held tomorrow afternoon in the Cathedral hall.

National Vice President Regan of the order and State President Kenny will be here to address the members of the order in this city. This being the first visit of the executive officers, there will be a large attendance of the members. The order in this state and particularly in Duluth is progressing wonderfully and matters of general interest to the members will be discussed at the meeting tomorrow.

The West Duluth and Eveleth divisions will be represented by large delegations at this joint meeting as all the members have been anxious to meet the newly elected officers. Minnesota has the honor of holding the second national office of the order.

IT CAN'T BE HELPED.

LUNDBERG PIANO CO.
221 West Superior Street.

NEW SITE IS SECURED

Y. W. C. A. Purchases Corner Lot on West Second Street.

Active Campaign for Funds Will be Begun April 1.

The home of the Duluth Young Women's Christian association will be situated at Second avenue west and Second street, the property at that location having been secured for the purpose. The deal was closed last evening and the association will plan an immediate campaign for funds and the erection of the building.

The property secured comprises seventy-five feet on the southwest corner of West Second street and 140 on Second avenue west. It is described as lot 34, West Second street and the east half of lot 36 West Second street, Duluth proper, First division. The consideration was $34,000 and the former owners were E. R. Jefferson of this city and Sally D. Thomas of Wilkesbarre, Pa. The deal was transacted through the Stryker, Manley & Buck agency.

The location is a most favorable one for the association building. A down town site was essential in order to accommodate the large number of business women who lunch at the association rooms and a site any further removed from the business center could not be considered. The new Y. M. C. A. building is located one block west of this property.

The plans for the active campaign for raising the funds have not yet been definitely decided upon. It is probable that the active work will not be begun until about April 1, when committees of business men and older women of the association and one of the younger members will become actively interested. It is thought that $150,000 will be asked for to cover the expense of building. The lease on the present quarters of the association at 102-104 West Superior street, will expire in May, 1908, and it is hoped that the new building may be in condition to be occupy at that time. The advisory board of the association consists of Messrs. J. L. Washburn, Watson S. Moore, W. C. Agnew, F. E. House, G. H. Claypool, A. W. Frick, J. A. Stephenson, W. A. McGonagle and W. I. Prince. The members who are in the city were entertained at the association rooms this noon by the president, Mrs. W. C. Agnew, and first vice president, Mrs. J. D. Titcomb, and the general secretary, Mrs. Wesley Feetham. Plans for the building campaign were informally discussed.

The Young Women's Christian association was organized in Duluth in April, 1902, and the work has so grown that the present rooms are entirely inadequate for the work demanded of the association. The present membership is 915.

The directors of the association are, Mrs. W. C. Agnew, president; and Mrs. J. D. Titcomb, Mrs. L. W. Kline, Mrs. W. S. Bishop Mrs. Brewer Matlocks, Mrs. W. A. McGonagle, Mrs. C. H. Merritt, Miss L. L. Graves, Mrs. R. S. Manley, Miss L. Ella Roe, Mrs. W. H. Cole, Mrs. F. C. Bowman, Mrs. J. A. Watterworth, Mrs. Robert Smith, Mrs. W. M. Hubbard, Mrs. E. A. Gooch, Mrs. W. C. Sherwood, and Mrs. G. H. Claypool.

MINNEAPOLIS CONFERENCE

Decides to Appoint Superintendent for the Canadian Missions.

Minneapolis, March 2.—(Special to The Herald.)—At yesterday's session of the Minneapolis conference of the Evangelical Lutheran Augustana synod, the devotional exercises were led by Rev. C. A. Carlstedt of Ashland, Wis.

With regard to the mission work in Canada the executive committee proposed that the conference appoint a general superintendent to take charge of the mission work on this extensive field.

Dr. Norelius, the president of the synod, made a motion to petition the synod to take charge of the mission work in Canada. This moalon was very strongly opposed, especially on the ground that the conference has organized this work and prosecuted the same for a number of years with evident success.

The mission board of the conference is, therefore, more competent to take care of this work than the mission board of the synod. The motion was, therefore, voted down by a great majority. After a very interesting discussion the conference unanimously decided to appoint a superintendent for the mission work in Canada.

As honorary members were elected: Andrew Nelson, Litchfield, Minn.; Dr. G. H. Trebert, Minneapolis, Minn.; Dr. P. M. Lindberg, Omaha, Neb.; Rev. A. Jackson, Joliet, Ill.; Dr. S. P. A. Lindahl, editor of Augustana, Rock Island, Ill.

A petition was received from the Big Stone district asking that the conference do something to strengthen the Ministerial "pension fund" within the synod. The matter was referred to a committee consisting of the following members: Revs. A. P. Monten of Wheaton; J. H. Nelson of Cambridge, L. G. Almen of St. Peter O. Linnell of Grove City and F. A. Berg of Duluth.

The Central District presented a petition asking that the Minnesota Conference be divided into three conferences, one comprising the southern, another the central, and the third the northern part of the state of Minnesota. The reasons given for this petition were as follows:

First, the territory of the conference is so extensive that the mission work of the conference cannot be prosecuted with so much success under present conditions as could be done if the conference were divided into smaller conferences.

Second, the conference has become so large that it is too expensive to hold its conventions.

The subject of this petition in the conference was, however, very weak and when it came to a vote it was almost unanimously decided, that the conference is of the opinion that there is no reason why the conference should be divided.

Rev. C. T. Olesan of Duluth closed the session with prayer.

At the afternoon session, the Pacific district petitioned to be divided into two districts by a line running from north to south between Litchfield and Darwin, Minn. The conference granted this petition.

The report of the conference presented during the past year, the conference has expended the following sums:

Educational Institutions—Augustana College and Theological Seminary, Rock Island, $5,125.56; Gustavus Adolphus College, St. Peter, Minn., $7,628.79; Minnesota College, Minneapolis, Minn., $1,611.63; Northwestern College, Fergus Falls, Minn., $1,256.31.

Missions—Synodical Home Missions, $2,591.01; Foreign Missions, $3,759.61; Conference Home Missions, $16,631.52.

Other charitable purposes, $4,839.26; cash on hand, $2,841.75; liabilities, $12,-059.35; assets, $8,915.44; net liabilities, $4,-043.91.

HAPPENINGS IN THE DAKOTAS

Mrs. Cramer Had Long Considered Killing Her Husband.

NORTH DAKOTA.

Fargo—In the Cramer murder trial yesterday, on direct examination, Mrs. Laura Cramer, widow of the dead man, testified that because of the brutality of her husband she had for a long time considered the question of killing him, if he continued his attacks. The more she thought of the matter, she determined she would be unable herself to do the shooting.

The day that Cramer returned from working in the country and began a family row, she realized that the time had arrived for his extermination, and decided that if he attacked her she would have her son shoot him. When Cramer started up the stairway to the second floor, occupied by her and the boy, she commanded the boy to shoot. Her orders were obeyed and her husband fell dead on the stairway, cursing her with his last breath.

Both she and her son were afraid to step over the body, and she let the boy down to the ground from the second floor with a skirt, and later descended on a ladder brought by neighbors summoned by the boy.

The state rested Thursday afternoon, and Mrs. Cramer was placed on the stand, telling the story of her married life. Yesterday she testified directly as to the commission of the crime, giving all details of the tragedy. The cross-examination was begun just before the noon adjournment and continued all the afternoon. The prosecution attempted to show that Mrs. Cramer was of mean disposition and shared with her victim the responsibility for twenty years of marital discord.

Linton—The report of thirty-two persons freezing between Linton and Bismarck, as published in the Aberdeen American and other South Dakota papers, is without any foundation. There has not been a death or case of actual suffering on the Missouri slope this winter. Fuel and other supplies ran low at one time, but the settlers were more scared than hurt. The weather is fine and all trains are running on schedule time.

Underwood—Willie, the 3-year-old son of John Hammock of Wiprud, is dead at the hospital here as the result of burns received from his clothing catching on fire.

Grand Forks—A dispatch from Chicago tells of the marriage there of C. H. Rickerd and Mrs. Ida M. Cooley, both of Grand Forks. They were the principals recently in divorce suits. Following a sensational scene at the Cooley home, when the husband returned home unexpectedly, Cooley secured a divorce. A few weeks later Mrs. Rickerd secured a divorce at Bonners Ferry, Idaho, where she had gone some time before the scandal. Rickerd is secreaary of the Grand Forks Lumber company. Both were prominent in society.

Wilton—Apparently the gang of horse-thieves which last year caused heavy losses to ranchmen in this vicinity proposes to continue their operations this spring.

Word has been received here that a bunch of horses belonging to M. Spangenberg, which were being pasaured on the Bishop farm between here and Bismarck, have disappeared. The fence was cut and the trial showed that the animals had been driven southward. They were followed for some distance, and one horse, an old one, which could not keep up with the others, was recovered some miles down the trial.

The operations of the gang of rustlers lasa year were very successful and no trace of the members was ever discovered.

Salem—In the past two weeks over $500 worth of dogs have been poisoned. Most of the dogs were hounds owned by young men who purchased them for rabbit-chasing. Besides the hounds, valuable bird dogs have also been killed. It is thought strychnine was used.

SETTLES HOPES OF SUPERIOR

Rumor Started by Morning Paper is Branded as False.

"There is no truth in the report that such a plant may be located in Superior if brought West" is the statement credited to W. J. Olcott by telegraphic dispatches from St. Paul, telling of the hearing before the tax committee.

This statement simply confirms the belief that Duluth people have held since the announcement was first made. All of the other interests of the company are in Duluth and in Minnesota, and Superior was never seriously considered outside of the morning paper and the Superior Telegram.

The News-Tribune apparently stirred up trouble for itself on both sides of the bay by the conflicting accounts published yesterday. Duluth people could see nothing but the report on the Superior page that the plant might go to Superior, and Superior people could see nothing but the headlines on the front page, telling of the steel plant for Duluth.

The Superior Telegram followed up the cue and had the plant located in Superior last evening. The paper also contained an editorial, which purported to prove that Superior had the only available site for the plant.

Ely

Ely, Minn., Mrch 2.—(Special to The Herald.)—The high school dramatic entertainment given at the Auditorium Friday evening for the benefit of the high school band was a great success. The house was jammed to the doors with an anxious crowd. The performance was a revelation to the people of Ely, who had not suspected such talent in their town. The play, "Under the Laurels," with C. L. Newberry in the leading role, was one of love and romance. Miss Edith Trezona did good work in the character of Rose. Mr. Holland played the part of an ardent lover like an experienced hand. Miss Knutson and Mr. Elsenach and Miss Frisk and John Hodge did excellent work in the comedy role. Miss Frances White, the charming widow with her black-bordered handkerchief, and Sidney Jenkins as Bob Button, with his smile that wouldn't come off, completely won the appreciative audience. Wagner's orchestra furnished the music. Frank Wagner, as leader of his new orchestra, was in a fine feather, and the music was a credit to our city.

Mrs. R. Walker entertained the Snowshoe club last evening. A very nice lunch was served and a pleasant time was reported by all.

A. D. Cummings of Duluth spent a few days this week in Ely on business.

W. H. Cole of Duluth was an Ely visitor the first part of the week.

James L. Matthews left last Tuesday for his old home at Stillwater on a two weeks' vacation.

M. Wienzier left last Monday to attend the funeral of his father, who died suddenly at St. Boniface, last Sunday.

Mrs. A. S. James returned Friday evening from a two weeks' visit at Rochester, Minn.

Frank Degan, who has been spending the winter with his parents at Detroit, Mich., returned last evening. He will remain here a few days visiting with friends. He will return here in the spring and resume his position with the Duluth & Iron Range road.

City Attorney J. W. Osborne, who was married last week to Miss De Long of Superior, returned Tuesday accompanied by his bride. They will occupy the Goldsworthy residence, where they will be at home to their hosts of friends.

Mrs. W. B. Goldsworthy has removed to Two Harbors, where she will make her future home.

THIS COPPER MINE

Will Ship at Once

Let me prove to you why an investment in this mine at 25 cents a share should make you a sure fortune. No speculation—no guesswork—but an absolutely positive assurance of success. Read my reasons and judge for yourself.

J. C. KERNOHAN.

HERE IS A PLAIN STATEMENT OF FACTS:

YES—I said "PROVE" to you, and I mean just exactly that!

Because I am in a position to offer convincing proof for every statement that I make.

I ask no one to invest a single dollar in this enterprise unless thoroughly satisfied that the property is rich in high grade copper values and the management competent and honest.

The time to investigate is BEFORE—not after—investing your money. There is really no excuse for a loss in "coppers," because you can always determine in advance whether a copper stock be good or bad.

This is because of the nature of copper mining.

When copper is once found if the veins are true contact veins the supply is practically inexhaustible.

Therefore, all that is necessary for you to do is be sure of the actual physical facts and sincerity and good faith of the men back of the enterprise.

And that is just what I want you to know all about in this investment that I offer you.

Then decide for yourself whether or not this is the greatest chance ever offered you to make a fortune.

Our Holdings.

The properties of the British-American Copper Mines and Smelter Co. consist of 12 full lode mining claims—640 acres—located in the Golden division of the famous East Kootenay Mining District, Province of British Columbia.

Title is direct from the Government to the Company. There is no bonded indebtedness. Claims are free and unincumbered.

There is no question as to the extreme richness of the copper deopsits in this group.

Actual developments on these claims prove three immense contact veins—16, 40 and 150 feet wide by 3½ miles long, of high grade chalcopyrite ore—the most productive ore of copper found in all the famous copper camps of the world.

Developments.

On the 16-foot vein, 1,000 feet of tunnel has been contracted for that will block out, ready for mining, $10,575,000.00 worth of high grade copper ore.

This vein has been thoroughly sampled and assayed, giving the high average for the entire vein of 6½ to 7 per cent copper.

The average ore of the vein at the present price is worth $30.55 per ton, and a production of 200 tons per day will easily be possible.

Work on this 16-foot vein will be actively pushed with a view of shipping at least 100 tons per day as soon as the wagon road, which we are building in connection with the Government, is completed to the Columbia River and Kootenay Central Railroad.

Some of Our Neighbors.

Our holdings are right in the heart of the richest copper district in the world, which has produced some big dividend payers.

The nearest to us of these famous mines is the Granby, and while the Granby is fully developed and has ten years the start of us, I am not willing to concede that that property is any greater than ours.

In fact, I am perfectly safe in saying that ours is a greater property at a smaller stage of development.

About ten years ago the owners of the Granby mine were doing just what I am doing today, namely, advising the investors of this country to come in with them and share in the profits which they knew were sure to accrue once the mine was thoroughly opened up.

The Granby stock at that time was being offered for less than $1.00 per share. It is now actually selling at $140.00 per share.

The Company is paying dividends of 24 per cent annually, on a capitalization of $15,000,000.00, on ore that averages less than 2 per cent copper.

Our Company, with a capitalization of $5,000,000.00, and an inexhaustible body of copper ore, assaying 7 per cent on an average, should pay back enormous dividends to the fortunate holders of stock. That is plain, isn't it?

To Begin Shipping at Once.

Our problem is simple. There are no physical difficulties of any magnitude ahead of us—nothing to prevent our beginning the shipment of ore in the immediate future.

There are thousands of tons of rich copper ore lying in the creek bottoms, part of a landslide that occurred probably hundreds of years ago.

It is my purpose to gather up this ore, which runs from $35 to $50 a ton, and ship it to the smelters at once, so that we can be earning money while the tunnel work is going forward.

Honest and Capable Management.

The following are the officers and directors of the company:

President—CHARLES H. TUCKER, Cleveland, O., Pres. Masonic Temple Association, formerly Gen. Agt. Great Northern Steamship Company.

Vice President—J. C. KERNOHAN, Cleveland, O., of J. C. Kernohan Co.

Treasurer—C. H. TAYLOR, Cleveland, O., Attorney at Law, Secretary Gillette Manufacturing Co.

Secretary—THOMAS G. SELLECK, Cleveland, O., Public Accountant.

Managing Director and Engineer in Charge—E. AUGUST BRADLEY, E. M., Revelstoke, B. C., Mining Engineer of international reputation.

Directors—C. H. Lane, William Cowan, Alexander McRae, C. A. Warren, M. M. Cleaveland, Thomas G. Selleck, Charles H. Tucker, E. August Bradley, C. H. Taylor, J. C. Kernohan.

Consulting Engineer — FRANCIS J. PECK.

No officials or directors except the engineers receive salary.

Shares Now 25c—Par $1.

This copper mine should earn millions. The 640 acres of property is there, the high grade ore is there, copper, the metal, is in wonderfully great demand, at the highest price on record, and the world's supply is far short of industrial needs. Buying now at 25c, with the conditions as they are and will be in the future, you cannot fail to make not only a safe investment but one that will undoubtedly return you an enormous percentage on your money in the way of dividends. Every indication points to par for this stock by August 1st, with every reasonable prospect that it will be worth at least $3.00 within one year from today.

Act! Take advantage of this opportunity. Delay means the loss of a great big money making chance.

TO WED GERMAN OFFICER.

Accepts Offer of Man She Has Known Fourteen Years.

Philadelphia, March 2.—Mrs. Mina Ross Turnbull, prominent in Philadelphia society and divorced from Frederick Turnbull, a wealthy chemist, only three months ago, has announced that she is going to marry Maj. Hans von Bulow, who, she says is a friend of Emperor Wilhelm and is now employed drilling the army of the Argentine republic.

Mrs. Turnbull's announcement created as much interest as did Turnbull's marriage two weeks after his divorce to a Reading woman.

The marriage will take place in Buenos Ayres. Maj. von Bulow sent his proposal of marriage by letter from Spain, when he heard of Mrs. Turnbull's divorce. A few of Mrs. Turnbull's friends knew of her fourteen years' acquaintance with the German officer. Mrs. Turnbull and her son Dale are in France, visiting her sister, whose husband is also a German army officer.

In a letter to a friend in this city Mrs. Turnbull says she will sail for Argentina March 7 and that her wedding will take place soon after her arrival. She also tells some interesting things about her future husband's family and history.

His properties, she says, are in Mecklenburg and Pomerania, where he has castles scattered about.

ACRES OF DIAMONDS

Under Feet of Duluthians.

So said Russell H. Conwell in his lecture here on January 9th. He repeated the prophecy recently made at a dinner given by Andrew Carnegie "that ultimately large plants of the Steel corporation would be located in Duluth." Now has come the official announcement that, at last, the prophecy is to be fulfilled.

A wonderful opportunity is now open to Duluthians to buy, at very low prices, property sure to double and treble in value very soon. A certain choice double-business corner can be bought today for $8,000. Five lots in the heart of West Duluth for $1,250—remember what the erection of a plant will mean to West Duluth! A cozy little home in West Duluth for only $1,400. A full 50 foot lot in heart of city, with good eight-room house, for $5,000 (lot alone worth at least $4,200 today). Mr. Conwell said: "Show me the men in your city who own property and I will show you the best people in your city. It is a man's duty to get rich. But you say, 'I can't get rich in Duluth.' You can get rich in Duluth as well as any place on earth." What's the use of saying that ten or twenty years ago the opportunities were greater in Duluth? The opportunities are greater today than they ever were. If you are wise enough to be interested in such bargains as the few mentioned above, the firm of T. W. Wahl & Co., 240 Exchange building, will be glad to give you full particulars. They will also tell you about other bargains in investments, homes and building lots from West Duluth to Lakeside. Call in at once. Next month may be too late.

TO CLOSE AN ESTATE

$500 all cash, will buy 48 lots in West Duluth; all taxes paid; abstract furnished; title perfect.

$350 will buy 3 large lots, Hunter's Park, First Division. A bargain.

$150 will buy a corner lot, near Bryant school, West end.

Money to Loan.

BIG STIR IN REALTY DUE TO STEEL PLANT REPORT

Announcement of Probable Establishment of New Industry Here is Likely to Stiffen the Prices on Real Estate—Much Inquiry Already.

The announcement that the United States Steel corporation will send an investigating committee of engineers here with a view of determining the practicability of establishing a large steel plant in Duluth, has caused a tremenduous stir in real estate circles. The real estate men declare the establishment of a plant as proposed for Duluth will result in the greatest stiffening of real estate prices that the city has witnessed for years, that the operation of a big plant means a large increase in population, and the increased population will result in a stronger demand for property. It is confidently predicted that the prices of Duluth real estate will show an immediate advance and that the coming season will witness the liveliest market that the city has had for many years past. The real estate brokers claim that the increased value of property will not affect one part of the city alone, but that all resident sections or districts will share in the results in proportion to their locations. Owners of acreage are especially jubilant over the turn of affairs and a number of them have signified their intention of taking their property off the market until further developments show them just what the situation is likely to be. One local realty firm that deals largely in acreage property up the St. Louis river, claims that since the announcement of the steel corporation's plans they have had fully twenty-five inquiries per day for acreage in the river district. The real estate men are not predicting boom times. They claim that such conditions will not be repeated in Duluth, but that there will be a marked advance in realty prices along all lines and that the advance will be warranted by conditions that will insure a maintenance of the higher prices

• • •

One of the largest of recent sales of Superior street property was closed this week when A. C. Weiss and George W. Buck acquired the St. James hotel property on the upper side of the street, between Second and Third avenues west, for $64,000. The property was sold by James B. Maltby, a prominent wholesale grocer in the East, who bought it about eleven years ago for $52,000. The hotel building was erected many years ago and of itself is not considered of any considerable value, but the site, with a frontage of fifty feet on Superior street, in the business center of the city, is regarded as a good investment even at the advanced figure just paid for it. The sale was made through the office of Stryker, Manley & Buck. The property is described as lot 39, West Superior street First division.

• • •

Negotiations are under way for the sale of two centrally located First street properties, one on the corner and the other a business property about the middle of a block. The negotiations have not yet reached a stage where the parties interested care to give their deal any publicity, but it is understood that the figures under consideration are quite large and the trades, if consummated, will be important ones. It is also understood that one of the properties is being purchased for improvement on a large scale.

• • •

The same real estate firm has closed the following sales during the week: A double house property at 320 and 322 East Third street, from Thomas Bowers to Anna Barnard, for $7,500; a residence property at 4711 Grand avenue east, from Jub Potter to M. Caplan, for $2,250.

• • •

N. J. Upham & Co. report a good week of inquiry, with the following sales closed: The southeast corner of Superior street and Nineteenth avenue east, from Julius C. Schenck to W. J. O'Connor, for $2,750; a lot on the upper side of Superior street, between Twenty-eighth and Twenty-ninth avenues east, from J. O. Smith to Judge W. L. Windom, for $625; a lot on Eleventh avenue west and Fifth street, from A. J. Upham to Albert Erickson, for $400.

• • •

Joseph Rich has sold his residence property on Mesaba avenue, between Fourth and Fifth avenues west, to Eugene Fiskett, for $4,100. The property is described as the east half of lot 60, block 51, Third division.

• • •

F. W. Gustafson has purchased from the Midland company a house and lot on South street, near Sixteenth avenue east, for $1,060. The property is known as the west half of lot 12, block 19, Endion.

• • •

Gertrude Budd has sold J. D. Molitor a residence property on the upper side of Huntington street, near Fifty-ninth avenue west, for $1,600. The property is described as lots 2 and 3, block 28, West Duluth, Fifth division.

• • •

A. Terryberry, the architect, has purchased from George W. Smith a residence property on Cody street, near Fifty-eighth avenue west, for $1,100. The property is known as part of lot 16, block 166, Fifth division of West Duluth.

• • •

James Pearson has purchased from Mary E. Whalen for $2,300 a residence property at the northeast corner of First street and Eighteen avenue east. The lot is located in block 70, Second division, Myers' rearrangement of the block.

• • •

The transfer was recorded this week of the residence property on the lower side of Third street, between First and Second avenues west, from H. M. Bradley to the First Methodist church of Duluth. The consideration was $5,000.

• • •

A. J. Wagner has sold a residence property at the southeast corner of First street and Twenty-third avenue west to John Bergholm for $3,100. The property is described as part of lots 368 and 366, block 111, Second division.

• • •

E. J. Cokefair has sold to R. S. Gaylord, the northwest corner of Superior street and Twenty-fifth avenue east, for $3,500. The property comprises lots 15 and 16, Harrison's division.

• • •

John Wiekstrom has sold to Albert Sikora for $1,570 a residence property on the lower side of Seventh street, near Twenty-fifth avenue west.

• • •

A. Heglund has sold his residence property at 616 West Third street to Frank Mucilll, for $6,200.

• • •

Following is a resume of the transfer record of the county for the month of February:

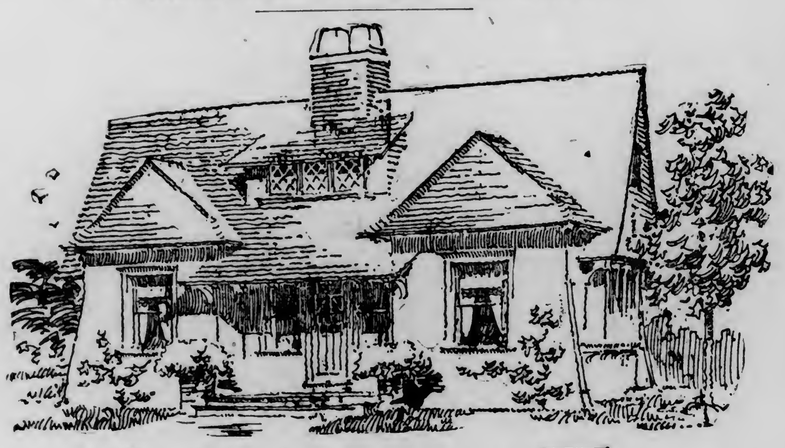
A BEAUTIFUL HOUSE FOR $1,915.



This cottage is of a very pleasing and unique design. It has a very artistic exterior, and is very well planned. From the front porch you enter the reception hall which adjoins a good-sized, convenient dining-room. The pantry is reached from either the dining-room or kitchen. The flower room is a charming addition to this house.

There are two bed-rooms and bath between them. All rooms are well-lighted and ventilated. The back porch is very desirable.

At a small additional cost, the upper floor could be made into two nice rooms.

Below is given itemized cost of construction:—

Excavation	$90	Mill work	300	Brickwork	75
Stonework	100	Hardware	85	Plumbing, etc	150
Carpenter work	325	Lumber	350	Heating	75
Plastering	150	Painting and Glazing	175	Range	40
					$1,915

NEW TELEPHONE SYSTEM IN USE

Eveleth Changes From Old Form to New in a Second.

Eveleth, Minn., March 2.—(Special to The Herald.)—The Mesaba Telephone company last night changed to its new and modern telephone system. The change from the old system was accomplished in a second's time by moving an electric switch. The company now uses a No. 9 common battery switch board, with 300 lines attached. Everything is very much up to date, and on an equal basis with the methods employed by the telephone companies in the large cities of the country.

In some respects the range company is ahead of the majority of the city operators. One improvement is in the switch board, which is so arranged that the telephone girls find it absolutely impossible to listen to conversations being held over lines in their charge, insuring strict privacy. A 38-volt storage battery is being used instead of the 24-volt in use with most city systems, giving better transmission.

To outside points cables under the ground are used almost entirely in place of wires strung on poles, so that storms will not affect the service. New telephones are to be put in residences in place of old ones now in use. The force of telephone girls is to be increased from three to five.

INSISTS ON BEING BILKED

Off to Spain with $5,000 to Spend on Castle Game.

New York, March 2.—The French liner La Provence has sailed with $5,000 of "easy" money from Chicago, bound for Spain. Detectives tried in vain to open the eyes of the gullible youth who is taking it over.

The detectives learned from the cable agent that the youth had bitten on the old moss-grown game of a rich nobleman in prison, who was willing to give half his estate to the person who would advance enough money to get him out of prison.

"Say, don't you know that is an old bunko game?" they asked the youth.

"It isn't anything of the sort," said the Chicagoan. "This nobleman is in prison in Grenada, Spain, and it only takes $5,000 to get him out. He has a castle and vast estates, and I get half of his wealth when he is freed. I've got the money with me and I'm going through with the deal."

JILTED, SUES TO SHOW SEX.

Rich Young Woman's Action Merely Attempt to Show Man's Perfidy.

Chicago, March 2.—That girls may be warned not to place unwarranted confidence in the promises of men, Miss Cora Williams of Sedalia, Mo., worth a half million in her own name, has brought suit against Robert B. Stout, 1902 Garfield avenue, for $25,000 damages for alleged breach of promise to marry.

This is the cause for the suit, according to Miss Williams' attorneys, who say she does not want the money, as she is amply provided for. She merely wants to furnish an example of the faithlessness of the opposite sex.

AWOKE WHEN ROOF FELL.

Chippewa Falls, Wis., March 2.—Homer Hinton and wife and three children had a narrow escape from being burned to death at Holcombe Thursday night. They were aroused by the sound of the roof falling, and when the home was almost enveloped in fire. Hinton threw his children out of the window and he and his wife escaped after them.

FRED SCHACHT DYING.

Minneapolis, March 2.—A telegram from Seattle received yesterday states that Dr. Fred Schacht, formerly a star tackle on the Minnesota football team, is dying of Bright's disease in a hospital there. Dr. Schacht was known all over the Northwest as "Germany." His home was in Elizabeth, Minn., and he practiced at Fergus Falls for a short time after graduating and then went West.

IS ROBBED IN A HOTEL

Woman Taken by St. Paul Policeman to Disreputable Hotel.

Hinckley Woman Lost All Her Money While Asleep.

Minneapolis, March 2.—Alone and unprotected upon the streets of St. Paul, Mrs. Ernest Stephan, the wife of a prominent physician of Hinckley, Minn., was directed by a man wearing the uniform of the St. Paul police force to a hotel of sinister reputation, where she was robbed of $47 while she slept Thursday morning. The night porter of one of the leading hotels of St. Paul informed her, earlier in the night, that "every room is taken" and declined to assist her in any way, either in communicating with her husband in Minneapolis or in directing her way to a reputable hotel.

Upon appeal being made to them yesterday by Dr. Stephan, the St. Paul police sent a detective with him to the hotel where Mrs. Stephan was robbed. The detective accused the proprietor of running a questionable place where a man had been robbed of $100 while he slept, and he demanded Mrs. Stephan's money. This the proprietor refused to make good, and Mrs. Stephan will begin suit at once.

Mrs. Stephan left Hinckley, Wednesday to visit her husband, who is a convalescent in a Minneapolis hospital. Her train was late and she arrived in St. Paul at 10 p. m., instead of 7 p. m. She telephoned to her husband, but through some misunderstanding he thought she was in the Minneapolis Union station. She waited for him until midnight, then asked the man at the information desk in the station to direct her to a good hotel and to send a porter with her to carry her suitcase. He volunteered to perform this service himself, and escorted her safely to one of the leading St. Paul hotels.

Here, according to her own story, Mrs. Stephan waited some time in the women's reception room. At length a porter approached her and asked her what she wanted. Her request for a room was met with the statement that the legislature was in session and that every room in the house had been taken by 9 p. m. She then asked if she might not have assistance in telephoning her husband or in finding a room at another hotel. She was told by the porter that they were too busy to bother with such matters.

Out on the street went Mrs. Stephan, thoroughly disheartened at this rebuff, and determined to make her way back to the station and spend the night there. On the way she saw a man in the uniform of a policeman, and asked that he direct her to a respectable hotel where she could spend the night. He took her to a hotel, which, he said, was largely patronized by women. Asking for a key to her room, Mrs. Stephan was told by the clerk that she might lock the door by throwing the catch, which prevented the knob of the door being turned.

"I was frightened," said Mrs. Stephan yesterday. "The transom would not close. I latched the door and shoved the only chair in the room between it and the head of my bed. I lay down on the bed in my clothes with my purse beneath my head. When I awoke the chair was moved and my purse lay beside me, empty. Even the letters in it were gone. I could not find the clerk when I went down stairs, but he did get my husband on the 'phone and he came over.

The hotel in which Mrs. Stephan was robbed is known to the St. Paul police as a questionable place.

TO INDICT SCHOOL "TRUST."

Companies and Individuals Will be Accused According to Rumor.

Chicago, March 2.—Between fifteen and twenty firms engaged in the manufacture of school and church furniture and desks, and as many individuals, are to be indicted by the federal grand jury, according to a report circulated just prior to adjournment to March 12 of the federal inquisitors.

Indictments, it is said, will be returned when the jury reconvenes and will specify violations of the Sherman anti-trust act, the plan of government being to prosecute both corporations and individuals. The law provides a fine of $5,000 or imprisonment for a year for each offense.

JOKER'S VICTIM IS DYING.

Man Awakened by Red Hot Coals Poured in Trousers Leg.

St. Louis, March 2.—By way of a joke, a friend poured red hot coals down Joseph Schindele's trousers leg while he slept and now it is probable that the joke will cost Shindele's life.

Schindele is president of the Anti-Lid club and fell asleep while playing poker with some of the members on the night of Feb. 17. To wake him up some one of the members took a shovelful of live coal from the stove and dropped it down his trouser leg. Then they took Schindele to the hospital.

Several days later blood poisoning set in, and Shindele's condition became critical. The police have been keeping tab on the joker. It is said Schindele cannot live.

WINONA WEDDING IS OFF.

Unusual Announcement Made by Parents of Miss Gregory.

Winona, Minn., March 2.—Cards have been issued by Mr. and Mrs. Edward Gregory reading: "The marriage of Miss Isabell M. Gregory to Swift Tarbell has been postponed indefinitely." The wedding was to have taken place this week. Miss Gregory is a popular young lady of charming social attainments, highly thought of in this city, her home. The young man is a resident of the East.

ORDER FOR HEARING PROOF OF FOREIGN WILL.

State of Minnesota, County of St. Louis, ss.

In Probate Court, Special Term, Feb. 28, 1907.

In the Matter of the Estate of Eliza F. Phelps, Deceased:

Whereas, Certain writings purporting to be duly authenticated copies of the Last Will and Testament of Eliza F. Phelps, late of the County of Santa Barbara, California, deceased, and the Probate thereof in the Superior Court of Santa Barbara County, have been delivered to this Court;

And Whereas, Edward A. Gilbert has filed therewith a petition, representing (among other things, that said Eliza F. Phelps lately died in said County of St. Louis, Minn., and that the said petitioner is one of the executors named in the said last will, and praying that the said instrument may be admitted to probate, and that letters testamentary be to Edward A. Gilbert and Jesse I. Phelps issued thereon.

It Is Ordered, That the proofs of said instrument, and the said petition, be heard before this Court at the Probate Office in said County, on Monday, the 25th day of March, A. D. 1907, at ten o'clock in the forenoon, when all persons interested may appear for or contest the probate of said instrument;

And it is Further Ordered, That notice of the time and place of said hearing be given to all persons interested, by publishing this order once in each week for three successive weeks prior to said day of hearing, in the Duluth Evening Herald, a daily newspaper printed and published at Duluth, in said County, and that a copy of this order be served upon the County Treasurer of St. Louis County not less than ten days prior to said day of hearing.

Dated at Duluth, Minnesota, this 28th day of February, A. D. 1907.

By the Court,
J. B. MIDDLECOFF,
Judge of Probate.

(Seal, Probate Court, St. Louis County, Minnesota.)

Duluth Evening Herald, March 2, 9 and 16, 1907.

STREET CARS.
NOTICE TO THE PUBLIC.

This company operates a street railway line in the city of Duluth between Third avenue east and the end of Rice's Point, and another street railway line in the city of Superior between Twenty-first street and the end of Connor's Point. These lines are separated by the waters of St. Louis Bay, and are operated as two distinct and separate lines.

The fare for a continuous ride in one direction between any two points on either one of these lines is 5c.

The public is hereby notified that this company does not, by undertaking to carry any passenger, or by accepting fare for such carriage, assume any responsibility beyond that of carrying such passenger safely between points on the above mentioned lines.

This company is not responsible for close connections, nor safe transportation, between the above mentioned lines by any ferryboat or other means of transportation. While the employes of this company have been instructed to keep themselves posted and give upon request all the information they can as to the probability of connections being made with other transportation lines, the company has no better means of foreseeing unexpected interruptions in the service of such lines nor of telling how long such interruptions will continue, than the public has, and therefore cannot be responsible for notice of such interruptions.

WHEAT HAS BIG SLUMP

The Prices Go Off Both at Home and Abroad.

Flax Closes Weaker After Fairly Active Session in Duluth.

Duluth Board of Trade, March 2.—A heavy selling pressure and lower cables sent wheat off in the American markets today, and the closing prices were considerably lower than yesterday's. The receipts were not so large as a year ago, but the foreign markets went off and the estimates of the world's shipments are liberal. The shipments for the week are estimated at 11,200,000 bus. Liverpool closed ½d lower, Paris ¾c to 1c higher, Berlin ⅞c lower and Budapest ⅛c lower.

The May option closed ⅞-¾c lower in Duluth, ⅞-⅞c in Chicago, ⅞c in Minneapolis and New York, ⅞-1c in St. Louis and Kansas City.

May corn closed ⅜-½c lower in Chicago and was ⅜d to ½d lower in Liverpool. May oats closed ⅜-½c in Chicago.

Car receipts at Duluth were 76 against 25 last year, and at Minneapolis 155 against 198 last year, making a total for the Northwest of 231 against 223 last year. Chicago received 23 against 3 last year. Winnipeg received 194 against 122 last year.

Clearances of wheat and flour aggregated 275,000 bus.

Clearances of corn were 491,000 bus.

Wheat was active in the Duluth market throughout the session. May wheat opened unchanged at 79⅝c, declined to 78¾c by 10:30, rallied to 79⅝c by 11:14 and closed at 78⅜-¾, a loss of ⅝-¾c from yesterday. July wheat opened ⅛c lower at 80c and declined by the close to 79¼c, a loss of ⅞c from yesterday. September wheat was inactive and closed ⅝c lower at 77¾c.

Durum wheat closed ½c lower and cash spring wheat was selling at May price.

Flax was active in the local market. May flax opened ½c lower at $1.21½, advanced to $1.21⅝, declined to $1.21, rallied to $1.21¼-⅜ and closed at $1.21¼, a loss of ½c from yesterday. July flax opened ⅛c lower at $1.22, declined to $1.21⅜ and closed at $1.21⅜, a loss of ¼c from yesterday. October flax opened unchanged at $1.18½ and closed at that price.

The coarse grains were unchanged.

Following were the closing prices:

Wheat—No. 1 hard on track, 79¾c. To arrive: No. 1 northern, 78¾c; No. 2 northern, 76¾c. On track: No. 1 northern, 78¾c; No. 2 northern, 76¾c; May, 78¾-⅞c; July, 79¼c; September, 77¾c; May durum, No. 1, 71c; No. 2, 67c; durum on track, No. 1, 71c; No. 2, 67c. Flax to arrive, $1.20; flax on track, $1.20; May, $1.21; July, $1.21⅜; October, $1.18½. Oats to arrive, 38c; March, 37¾c.

THE CHICAGO MARKET.

Wheat Opens Weak in Spite of Small Receipts From Northwest.

Chicago, March 2.—The wheat market today opened weak despite the fact that cables were steady and Northwestern receipts small. A strong disposition to realize profits, on the part of pit traders completely offset the bullish influences. May wheat opened unchanged to ⅛c higher at 76⅜c to 76⅝c and declined to 76⅛c. Minneapolis, Duluth and Chicago reported receipts of 354 cars against 727 cars last week and 326 cars one year ago.

The market was weak all day on free selling by pit traders. The low point for May was 75¾c. The close was weak with May off ⅜@⅞c at 75⅞@76c.

The corn market was weak on free selling by receiving houses and provisions interests. The weakness of Liverpool cables also depressed prices. May corn opened a shade to ⅛@¼c lower at 47⅛c to 47¼c and sold at 46⅞@47c. Local receipts were 374 cars with one of contract grade.

Prices continued to sag throughout the session. The low point for May was 46¾c. The close was weak with May ½c lower at 46⅜@⅞c.

The oats market was easy. Selling was general and the demand was not urgent. May oats opened a shade lower to a shade higher at 42¾ to 42¼c, and sold down to 42c. Local receipts were 130 cars.

The provisions market was easier on lively selling by pit traders. May pork opened 5c lower at $16.30. Lard was unchanged to 2½c lower at $9.60 to $9.62½. Ribs were 2½@5c lower at $8.50.

Close Wheat, May, 75⅞@76c; July, 76⅞c. No. 2, nothing doing; No. 3, 42¼@43¼c. Oats, No. 2, 41c; No. 3, 40½@43¾c.

WEAKNESS IN STOCKS

Liquidation Still Went on and the Close Was Lower.

Bank Statement Better Than Expected and Caused Rallies.

New York, March 2.—Stocks opened at lower prices than last night, the depression originating, apparently, in London, where prices were lower before the opening here. Union Pacific, Northern Pacific, Canadian Pacific, Reading, Pennsylvania and American Smelting fell a point or more. Anaconda 2 and St. Paul, Southern Pacific, Kansas & Texas and American Car large fractions.

A brief pause in the selling did not develope any buying orders of consequence and the pressure was renewed. The special points of weakness as for some time past were a few stocks, which in turn gradually influenced the whole list. Northern Pacific dropped 3⅛c, Brooklyn Transit, 2; Interborough-Metropolitan stocks, 2⅝, and St. Paul, Sugar, Lead and Amalgamated Copper dropped 1 and and the preferred and American Express, 2. American Ice Securities moved up a point and Pacific Mail, 1⅝.

The market closed unsettled and generally weak. There were considerable further declines followed by sharp rallies after the appearance of the bank statement and then by renewed weakness. Great Northern preferred fell an extreme 3¾, Northern Pacific, 5; Northwestern, 3½; Interborough-Metropolitan, 3¼; the preferred, 4; Union Pacific, Southern Pacific, Toledo, St. Louis & Western preferred, Great Northern ore certificates and Smelting, 1½; Missouri Pacific and New York Central, 1⅝ and others a point. The rally carried Reading a fraction over last night. That stock, the Hill stocks and Interborough-Metropolitan were conspicuous again in an abrupt reaction.

Quotations furnished by Wisconsin Grain & Stock company, St. Louis Hotel building:

Stock Gossip.

Logan & Bryan to Paine, Webber & Co.: Market closed generally lower, notwithstanding the bank statement was better than expected. Wall street professes to believe that the Aldrich bill will pass before congress adjourns today, but the action of the market would indicate they could see but few crumbs of comfort from its passage. Wall street is the bluest spot in the universe today. Investigations, followed by startling revelations, borrowing by corporations, strike rumors, etc., and an apathetic public all combine to make Wall street miserable. While we do not feel rampantly bullish on stocks, we nevertheless feel this country is not going to the everlasting bowwows today or tomorrow. These investigations are going to work for good. The sore spots uncovered have been allowed to spread and the evils resulting from this spreading seem hard to stamp out. It is all discouraging, we will admit, but the public are prone to forget these things just as soon as the sun shines a little.

• • •

Walker Bros. to Paine, Webber & Co.: The market today was very irregular and the liquidation still going on. The bad feature was the selling of the Hill stocks and the break in International Mercantile. These stocks were sold heavily and looked like long stock. There was apparently no one to support the market and it had to take care of itself. For next week we expect about the same sort of market. We cannot expect to see any advance in prices.

Midway Horse Market.

Minnesota Transfer, St. Paul, March 2.—Barrett & Zimmerman's report: Demand for horses has been steady all during the week. Over 800 head of horses changed hands. Most of them being shipped to Dakota, Montana and Washington, also Canada. Mr. Thurston from Helena, Mont., being the heaviest buyer, shipping four carloads. Receipts were heavy. The spring trade has opened with a rush and dealers anticipate a heavy horse movement from now on.

Chicago Live Stock.

Chicago, March 2.—Cattle: Receipts, 200; market steady; beeves, $4.10@6.15; stockers and feeders, $2.60@4.90; cows and heifers, $1.65@5.25; Texans, $3.75@4.75; calves, $6.0 @7.50. Hogs: Receipts, 12,000; steady; mixed and butchers, $6.80@7.05; good heavy, $6.97½@7.05; rough heavy, $6.80@6.90; light, $6.80@7.00; pigs, $6.15@6.75; bulk of sales, $6.90@7.00. Sheep: Estimated receipts, 1,500; market strong; sheep, $3.75@5.60; lambs, $4.75@7.65.

THE PRODUCE MARKET.

The following prices, with the exception of those on hay, feed and meats, are the official quotations of the Duluth Produce exchange and shippers can rely upon them as being correct. The list is corrected daily by the secretary, and it shows accurately the market conditions up to 12 o'clock on the date of issue. The weekly market letter, published on Fridays, is not an official statement of the exchange, but the information is gathered personally from the different dealers:

Calumet & Sonora	28	30

Denn-Arizona is on the up-turn again and the mining stock is hard to buy today. Bids of $15 do not seem to bring it out at all.

The Denn stock took a big fall, but there must have been something back of it, for the condition of the mine was altogether too good. They now have a big mine and will soon be shipping high grade ore to the smelters. Denn and Shattuck are big ones, and later on stock must sell much higher.

The strike at Bisbee is not interfering much and soon they will have plenty of men. Mr. Crosby's case is settled and this may have caused a little trouble with the stock. There is no good reason why Denn-Arizona stock should have dropped from $100 a share. Buy Denn for a big advance.

Butte & Superior is strong and we have reports from Butte today to the effect that it will be a big mine. The silver taken from the mine brings big money and it is estimated that the ore shown up could be sold for enough to pay for the mine at present selling price of stock.

Butte & Superior will be another such mine as the North Butte. Wait and see.

Calumet & Sonora is strong at $30 and very little stock is offered for sale. Three shafts are in ore at the present time. This mine will be a bummer as a money-maker for stockholders.

The condition of the market has been very bad for the last few days, but then, this always comes. The price of stocks must go up and down, first one way and then the other, but the stocks handled by Duluth brokers are good stocks and will have their high prices later on.

National weakened with the balance of the list, but the change will come some of these days and if you are not on, it will not be very easy to get on at these prices. "Buy when stocks are low and sell when they are high."

Copper Gossip.

Boston to Paine, Webber & Co.: Today was the dullest market we have had for many months. There was no change worthy of mention in the whole list and transactions were few and far between. The high priced dividend payers seem to be getting a little soft. Quincy, Wolverine, Tamarack and Osceola showing slight recessions with no demand.

The Cotton Market.

New York, March 2.—The cotton market opened barely steady at an advance of three points to a decline of 1 point, near months being relatively steady as a result of better cables than due, while considerable selling developed during the call as a result of bearish week-end figures. Trading was pretty active at first and there was quite a good deal of realizing under which the active months sould off to a net loss of aboue 3@5 points, but coverings steadied the market during the middle of the morning and prices recovered a point or two of their loss.

Cotton, futures closed steady. Closing bids: March, $9.61; April, 9.69; May, 9.76; June, 9.80; July, 9.84; August, 9.88; September, 9.89; October, 10.11; December, 10.18; January, 10.35. Spot, closed steady; middling uplands, 11.25; middling gulf, 11.50. Sales none.

Bank Statement.

New York, March 2.—The statement of clearing house banks for the week shows the banks hold $3,858,650 more than the legal reserve required. This is a decrease of $450,925, as compared with last week. The statement follows:

Loans, $1,079,185,600, decrease $4,274,800; deposits $1,034,431,800, decrease $6,569,900; circulation $52,787,200, decrease $217,300; legal tenders $74,401,400, decrease $1,017,600; specie $189,065,200, decrease $,080,600; reserve $263,466,600, decrease $2,098,400; reserve required $259,607,950, decrease $1,647,475; surplus $3,858,650, decrease $450,925; excess U. S. deposits $7,446,855, decrease $451,850.

New York Money.

New York, March 2.—Close: Money on call nominal. Time loans strong; 60 days 5¾@6 per cent; 90 days 5¾ per cent; 6 months 5½@5¾. Prime mercantile paper, 6¾@6. Sterling exchange steady with actual business in bankers' bills at $4.84.65@4.84.70 for demand and at $4.80.40@4.80.50 for 60 day bills; posted rates $4.81½ and $4.85½; commercial bills $4.80¼@4. Bar silver 60¾c. Mexican dollars 53¼c; Government bonds, steady; railroad bonds, easy.

$30,000 SILVER

To the CARLOAD from this Cobalt Mine

Extract from Engineer's Letter In Charge of Development —Destined to Be One of the Richest Mines In Cobalt.

WILLIAM WALLINGFORD
EXPERT MINER AND CONTRACTOR
VALUATOR OF MINING PROPERTIES

COBALT, ONT., February 20, 1907

MESSRS. CONE BROTHERS,
Financial Agents,
Cobalt Portage Mines, Ltd.,
First National Bank Bldg., Chicago.

Dear Sirs:—

I beg to report as follows on the Cobalt Portage Mines Ltd. Property:—

We have now ten men working on the property eight hours per day and are paying them at the rate of $2.75 per day.

I HAVE DEVELOPED AND INSPECTED MOST OF THE GOOD PROPERTIES IN THIS DISTRICT, AND I CAN ASSURE YOU THAT THERE IS NO PROPERTY IN THE DISTRICT WITH THE SAME SHOWING FOR THE AMOUNT OF WORK THAT HAS BEEN DONE UPON IT AS THE COBALT PORTAGE MINES PROPERTY.

THERE IS NO QUESTION TO-DAY ABOUT THE COBALT PORTAGE MINES PROPERTY DEVELOPING INTO A MINE OF GREAT VALUE, AND I CONFIDENTLY BELIEVE THAT BY THE FIRST OF APRIL NEXT I WILL BE ABLE TO SHIP SEVERAL CARLOADS OF ORE RUNNING FROM $20,000 TO $30,000 TO THE CARLOAD.

Yours sincerely,
WM. WALLINGFORD.

NOTE—Mr. Wm. Wallingford was recommended to Mr. Standly, President Cobalt Portage Mines, Ltd., by Mr. F. H. Marsh, Manager Imperial Bank of Canada at Cobalt. He is recognized as the most practical mine developer in the whole Cobalt district. Full copy of this most important report on the mine free upon application.

BUY NOW AT THE LOW PRICE

When the returns from the smelter are secured Cobalt Portage Mines, Ltd., stock will be hard to secure at any figures less than $200 per share if at all. This is your opportunity to make handsome profits. When dividends are started they will be both large and permanent.

The Cobalt Portage Mines, Ltd.

INCORPORATED UNDER THE LAWS OF THE PROVINCE OF ONTARIO, CANADA. AUTHORIZED CPAITAL, $1,000,000. $1.00 PER SHARE PAR VALUE. FULLY PAID, NON-ASSESSABLE. 400,000 SHARES IN TREASURY.

The Cobalt Portage Mining Co., Ltd., is a property comprising TWENTY FULL ACRES—three native producing silver veins—which is located in Coleman Township, Cobalt, Ontario, Canada. Coleman Township is where all the large producing mines are located. This property has for its neighbors many of the great producers which are making Cobalt famous. All the requirements of the Ontario government have been met. Charter and letters patent have been granted. INVESTORS ARE PROTECTED IN THE FULLEST SENSE by the passing of Canadian government inspection and incorporation in Ontario.

The company is officered by an able body of men, all of whom are prominent men of affairs in Canada and this country.

STOCK NOW 50c PER SHARE

We are now offering a limited amount of the fully paid and non-assessable stock of this company at 50c per share, which is an extremely low price for the stock of a Cobalt silver mining company that has passed government inspection and is incorporated under the strict mining laws of the Province of Ontario.

NOTICE OF ADVANCE

This stock will advance 20 per cent within a few days, as the allotment at 50 cents per share is nearly all subscribed.

Stock can be bought for cash or on one-quarter first payment and the balance in three equal monthly installments, but we strongly advise you to

TELEGRAPH YOUR ORDER

AND LET REMITTANCE FOLLOW PROMPTLY.

A MICHIGAN TRAGEDY.

Unconscious Man Left on Track and Killed by Train.

Menominee, Mich., March 2.—Fleeing from men with whom he had become engaged in a saloo nbrawl, William Flynn of Escanaba, met death beneath the wheels of a train at Hermansville, Thursday night. After the fight, Flynn ran from his assailants towards the station. His assailants followed and, knocking him unconscious, left his body lying on the track where it was struck by one of the passenger trains a short time afterwards. Flynn was intelligent, of good family, about 20 years old, and unmarried. His assailants escaped. Sheriff Erditz and posse are on the trail of the murderers.

PANIC AT A WAKE.

Candle Set Fire to Casket and Threatened Body.

Milwaukee, Wis., March 2.—While a wake was in progress Thursday night in a room where lay the body of Mrs. Vincent Lewandowski, surrounded by wreaths and other funeral decorations, one of the candles at the head of the coffin was overturned and, falling among some of the inflammable fixtures about the casket, turned the chamber of death into a blazing furnace.

So sudden was the burst of flame that the mourners who filled the room were thrown into a panic and rushed for the street without attempting to extinguish the fire or to save the body from cremation.

Some of the cooler ones, however, soon regained their composure and managed to get the coffin out of the room before the flames had damaged it to any great extent.

ATE $20 WORTH OF LACE.

Man Thought He Had Cabbage, and Prepared a Delicious Salad.

Winsted, Conn., March 2.—Returning home at midnight and laboring under the stress of heavy weather, a Woodbury man asked his wife where she had put the cold cabbage.

"On the second shelf in the pantry," she replied.

The husband found the "cabbage," got the oil, mustard and vinegar, cut up the "cabbage," dressed it to his taste and ate it all.

In the morning the wife noticed the cabbage where she had put it and innocently asked: "Dear George, why didn't you eat the cabbage?"

"I did," he responded.

On further investigation George's wife discovered that a bowl which contained lace valued at $20, which she had put in starch, was missing.

DROPPED DEAD.

Echo, Minn., March 2.—S. S. Drake dropped dead in the door of his harness shop Thursday evening. He formerly resided at Redwood Falls and was a member of the Masonic lodge of that town.

FARMER KILLED.

Fergus Falls, Minn., March 2.—Jens B. Hagen, a farmer who lived near Clitheral, was struck by a west-bound freight train while returning home Thursday night, and died about midnight. He leaves a large family. This was the second fatality of the kind on this division in a week.

Itch cured in 30 minutes by Woolford's Sanitary Lotion. Never fails. Sold by all druggists.

PRICES ARE ADVANCING

First Street Property is Sold for $550 Front Foot.

Western Debenture and Realty Company Buys 100 Foot Property.

W. C. Sherwood & Co. have sold for J. C. & R. M. Hunter a property with 100-foot frontage on First street, just west of the Board of Trade building, to the Western Debenture & Realty company of St. Paul, represented by E. D Field & Co. of this city.

The sale is said to include the old Board of Trade livery barn property with 75-foot frontage and the 25-foot vacant lot adjoining on the west side. The price paid is understood to be $550 per front foot, which is the highest price yet paid for unimproved First street property in the locality mentioned. The property is located close to the business center of the city and the owners of other property along the same street are confident that it will not be long before First street locations in the heart of the business district will be selling for $800 to $1,000 a front foot. The current selling prices of First street property indicates that there has been an advance of about $50 per front foot over those of last year, based on property transfers in the same locality.

The sale above mentioned is one of the two deals to which The Herald makes reference in the real estate department of this issue.

COURT MAKES NEW CITIZENS

First Batch in District Court Under New Law.

The first batch of new citizens to be given second papers by the district court, under the new naturalization laws, appeared before Judge Cant this morning. The law requires that ninety days must elapse from the time the application for the second papers is made before the applicant can appear before the court for examination for citizenship papers.

Five applicants appeared before the court this morning, and four were, after a rigid examination, required under the new law, granted their papers. One man was refused citizenship papers as his examination disclosed that he had not resided continuously one year in Minnesota. He resided in this state for a time, removed to California, and then came back to live, his residence in Minnesota not being continuous for one year, although he had, altogether, resided in the state more than the required time.

There are quite a number of other applications on files with the clerk of the district court and it it is expected that the applicants will appear before the court for examination from time to time, as the ninety day-period for waiting expires. Under the law each applicant is required to bring two witnesses with him, no matter if he resides at some distant point in the county.

Those who were granted full citizenship papers this morning were: Oskar Martin Carlson, Gust Hyalmar Edblom, Charles John Johnson and August Nyquist.

Paid All Losses.

The 54th annual statement of the Phenix Insurance Company of Brooklyn, N. Y., recently published, deserves the attention of all who are interested in fire insurance matters. It shows that after all of the San Francisco losses are paid the net surplus of the company is $1,666,823.87, while the surplus to policy-holders, taking in the cash capital, is $3,166,823.87.

BAGS THREE FOOTPADS.

Young Guardsman at Sioux City is Born Fighter.

Sioux City, Iowa, March 2.—Held up by three footpads, John C. Newman, aged 20 years, a militiaman returning from drill with his company, turned, despite the fact that a highwayman's pistol was pressing the back of his head, and pulling a revolver, put the gang to flight. Pursuing them and shooting as he ran, he chased them into a corner, captured all three and turned them over to a policeman.

POLICYHOLDERS DEFEATED.

Preliminary Report Shows Administration Victory in New York Life.

New York, March 2.—The $35-a-day inspectors of election of the New York Life Insurance company sent a "preliminary" report to State Superintendent of Insurance Kelsey today. These figures, which are not final, however, indicate a victory by a heavy plurality for the administration ticket at the recent election.

Summarized the figures are as follows:

	Good.	Bad.	Chal-lenged.
Administration	85,437	11,921	17,348
International policy-holders' committee.	35,900	6,098	79,646
Split tickets	2,972	4,079	3,924

The total vote cast was 407,711, of which the policyholders' candidates received 121,644 and the administration candidates 273,307.

NOTED WOMEN DISAPPEARS.

Mrs. Arthur Behenna, Famous Painter, Mysteriously Lost in Montreal.

Montreal, March 2.—Mrs. Arthur Behenna, member of the Royal society, painter and novelist, and friend of William T. Stead, whose home is in the south of France, arrived here last Friday at 6:45 p. m. Since then nothing has been heard of her. The disappearance is one of the most mysterious the city has ever known. The mission of Mrs. Behenna in Montreal was to exhibit her art, including the portrait of Lady Evelyn Gray, for which the governor general's daughter had been sitting for some time. All the pictures except Lady Evelyn have arrived.

WILL NEED ALL PENSION OFFICES

Senate Will Not Agree to the House Measure.

Washington, March 2.—By a roll call vote of 62 to 1, the senate today instructed its conferees on the pension appropriation bill to insist on retaining the eighteen pension agencies located throughout the country. The house abolished seventeen of these agencies, retaining only the one at Washington. This action was characterized in the senate as "without rhyme or reason," and a desire to centralize all power in Washington. Senators McCumber, Cullom, Heyburn, Hopkins, Curtis, Long, Scott, Beveridge, Hansbrough, Allison, Frye, Carmack, Gallinger and Lodge, each spoke in support of retaining all the agencies. The reason of the house was said to be one of economy, but the senators contended that the change proposed would result in a decidedly more expensive system.

Mr. Scott said he had been informed by the commissioner of pensions that there had been 100,000 applications for pensions under the service pension law enacted at this session of congress, and concluded that these applications would soon increase the work of pension agents as to render it difficult to perform all of it in one office.

"I am opposed to this everlasting concentration in Washington of everything," asserted Mr. Foraker.

Chamberlain's Cough Remedy a Favorite.

"We prefer Chamberlain's Cough Remedy to any other for our children," says Mr. L. J. Woodbury of Twining, Mich. "It has also done the work for us in hard colds and croup, and we take pleasure in recommending it." For sale by all drugists.

CARRIERS RESPONSIBLE

For Lives of Passengers In Spite of Pass Agreement.

Nashville, Tenn., March 2.—The supreme court today decided a case deciding the question as to whether common carriers had lawful right to place on passes a condition that the passenger accepting such a pass should ride at his own risk. The point came up in the case of Former Chief of Detectives Marshall of Nashville, who died as the result of injuries received from alighting from a street car. Marshall was riding on a pass on which there were the usual conditions.

The court held that the common carrier could not absolve itself for responsibility for gross negligence.

MURDERED ON COAST.

Frank Lamp, Son of Sleepy Eye Man Is Murdered.

Sleepy Eye, Minn., March 2.—Word has been received here that Frank Lamp, son of Lars Lamp, was murdered in Olympia, Wash. No details are given and it is not known how the terrible deed came about. Mr. Lamp was married and had four children. He was a man of excellent character and habits and his friends are at a loss to account for any trouble that he might have been concerned in. As he was well-to-do, it is thought that robbery may have been the object of his murderers.

NO CARGOES

Cause Eastern Steamers to Cut Out Two Sailings.

St. John, N. B., March 2.—Because of freight blockades in the Canadian West, cargoes are light here and the Donaldson line of steamers have cut out two March sailings. The steamer Parthenia, now due from Glasgow, and the Lakonia, which will sail from Glasgow today, will discharge here, but will go to Baltimore and Newport for return cargoes. Canadian Pacific railway officials declare that the blockade is being broken and freight will be on hand in ample quantities soon.

The Philosophy of Piano Buying!

RAILROADS

QUESTION IS IN DOUBT

Unions May and May Not Agree on Arbitration.

Railroad Men Will Strike Unless Compromise is Reached.

Local railroad employes are much in doubt as to whether their unions will accept the arbitration proposition offered by the railroad managers in Chicago this week as a means to avert a strike in the event of an unfavorable vote by the trainmen and conductors on the terms offered by the railroads.

Whether this plan will be ultimately accepted, none of the local leaders among the conductors and trainmen will venture a positive opinion. It is declared to be practically certain, however, that the wage proposition of the railroads will not be accepted by the men, and that the strike vote will be carried by a large majority, unless the arbitration plan is adopted.

Through an understanding reached when the negotiations opened, the men on one system cannot accept a settlement until the quetsions involved are disposed of satisfactorily to the men on the forty-two systems which took part in the conference.

The managers are said to feel that they have offered concessions which would really prove oppressive to some of the railroads. The understanding is, that when negotiations were broken off, it was for the purpose of submitting the offer of the roads to the men to learn their sentiments. This is admitted by the labor organizations, but the ballot provides that a rejection of the proposition of the railroads means a strike unless the managers agree to the modified demands for a 12 per cent increase in wages and a nine-hour day.

The increase offered the men in the freight service was a flat 10 per cent, while on work trains and mixed trains the increase offered in some instances was as high as 18 per cent. What the exact increase offered by the managers amounts to is a question that must be computed by the different roads, as the same conditions do not apply on all systems. In a general way, as announced in The Herald yesterday, the managers aimed to give conductors in the passenger service $10 a month advance, baggagemen $6 a month, and brakemen and flagmen $5, with overtime to be allowed on the basis of fifteen miles an hour, at the rate of 35 cents an hour for conductors and 20 cents an hour for other trainmen.

Will Build to the Soo.

Newberry, Mich., March 2.—General Manager Hanna of the Mackenzie & Mann system, is authority for the statement that the Canadian Northern railway will tap Sault Ste. Marie in the not distant future. The road is looking for a connection between Sudbury and Port Arthur, and has decided to sweep around towards the Soo, believing that the traffic in sight is worth going after.

BRYAN

The date of the William Jennings Bryan lecture at the First M. E. church, is Tuesday, March 5. Star Lecture course series.

NEPHEW'S MAIL NOT DELIVERED

To Mrs. Eddy as It Was Against Rules of House.

Bangor, Maine, March 2.—George W. Baker, one of the petitioners in the bill of equity filed to secure an accounting of the financial affair of Mrs. Mary Baker G. Eddy, head of the Christian Science church, in regard to the action, said today:

"This action has been brought about to ascertain whether Mrs. Eddy is a free agent or whether she is coerced by those around her. I have an idea that she is in the hands of her assistants and that is what we are going to find out.

"I am her nephew, the only one she has got, and I haven't been able to get a letter from her directly for over fifteen years although I have written to her several times. One of her secretaries wrote to me once and said it was a rule of the house that no mail would be delivered to Mrs. Eddy except that referring to her great work, other mail going into the office.

"I am no heir at all of Mrs. Eddy, as long as her son lives, and I have no pecuniary interest in the suit and expect no real benefit one way or the other. I have had my suspicions for quite a while, but they came to a head last year when I found that I could not possibly get a word from her."

Mr. Baker told the reporter that the matter of bringing the suit had been under consideration for about a year. He said he was not a Christian Scientist.

LOST LOVER AND MONEY.

Oshkosh Maiden Sues County Official for Breach of Promise.

Oshkosh, Wis., March 2.—W. J. Foulkes, who two months ago assumed the office of district attorney of Winnebago county, has been made the defendant in a $5,000 breach of promise suit, with an additional claim for $830, money alleged to have been loaned him by the plaintiff, Mrs. Sarah Kendall, a widow employed as cashier at the local agency of a New York life insurance company.

Mrs. Kendall says that Foulkes, after a promise of marriage had been exacted, borrowed money for the purpose of carrying on his canvass, and that after election he threw her over for another woman and refused to reimburse her for the money loaned.

LOST A FOOT.

Cannon Falls, Minn., March 2.—Homer King of Dennison, had his foot cut off by a circular saw and has been taken to a hospital at Northfield.

MINER KILLED.

Calumet, Mich., March 2.—John Jackman, aged 30, was killed Thursday by falling rock at the fifty-eighth level of No. 4 shaft of the Calumet & Hecla mine.

THE POLICE COURT GRIST

W. F. Wilson, Discharged Wednesday From Stillwater, Up for Drunk.

Lumberjacks Appearing in Large Numbers in Municipal Court.

After an enforced absence of five years William F. Wilson, again appeared in the municipal court this morning with the grist. Wilson was discharged from Stillwater, where he has been serving a five-year charge for a robbery at Carlton, on Feb. 27 headed straight for Duluth, and was so badly tanked by last evening that he was brought into the central station.

He was given the alternative of a $3 fine or three days in the county jail, and he announced that both for financial reasons and on account of a desire to sober up and reform permanently, he would accept the jail sentence.

Wilson has a cork leg as the result of an accident on one of the range roads as a result of which he lost his limb and was awarded $8,000 damages for his injury. As far as can be learned every cent of the $8,000 went for drink and dissipation, and the Carlton robbery followed soon after the money was gone.

* * *

One of the unfailing signs that spring is not far distant is the appearance in flocks of "lumberjacks" in the police court and they have become very numerous during the last week. From ten to a dozen prisoners have been fined the usual $3 and costs for drunkenness on almost every day for a week past and the majority of them pay their fines and depart, only to be back on the Bowery with the boys again in half an hour.

The perfect specimen of the species is usually possessed of a "turkey" if he has not deposited the valued sack somewhere in the course of his rambles while acquiring the jag, and about all their wordly goods are usually placed in charge of the department in the odd shaped sack.

BUSSE NOMINATED

As the Republican Candidate for Mayor of Chicago.

Chicago, March 2.—At the Republican City convention today the following nominations were made without opposition:

For mayor, Frederick A. Busse; city treasurer, Edward C. Young; city clerk, John R. McCabe.

The platform is based largely upon the traction proposition.

CHAMPION OF WORLD.

George Towns Wins the Sculling Race With Durnan.

Sydney, N. S. W., March 2.—George Towns, the Australian sculler, today defeated Edward Durnan of Canada by three lengths for the sculling championhip of the world. The race took place on the Napean river and was for $2,500 a side.

Towns, who was the favorite, won the toss for position. At the quarter-mile post Durnan led by half a legth, but Towns quickly overhauled him and was half a length ahead in front at the half mile. When the two-mile post was reached, Towns was three lengths ahead and he maintained his lead until the end of the race.

Sunday Concert.

Following is the program for the Third Regiment band concert at the armory tomorrow afternoon:

Valse de Concert—"Blue Danube"....
....Strauss
"Star Spangled Banner."

TELLER FITZGERALD WANTED FOR ASSAULT.

Chicago, March 2.—A warrant charging George W. Fitzgerald, the teller of the sub-treasury from whose cage the $173,000 disappeared, with assault was sworn out today. Fitzgerald yesterday attacked a newspaper man whom he declared had threatened his wife and the warrant was the result. Fitzgerald could not be found by the police early today, but later he telephoned that he would appear to give himself up.

WORKMAN STRIKES DYNAMITE WITH PICK.

Chicago, March 2.—While a gang of laborers were working in a sewer at Eighty-first street and Escanaba avenue today, one of them accidentally struck a stick of dynamite with a pick he was using. A terrible explosion followed, fatally wounding Joseph Norter and Peter Hallersa, and seriously wounding several others.

FOGGY IN NEW YORK.

New York, March 2.—There is a thick fog today over the bay and along the coast, which prevents vessels making port. Among the steamers due here today are the following: Lucania, from Liverpool; Ethopia, from Glasgow, Kaiser Wilhelm der Grosse, from Genoa; Prinzess Irene, from Naples; Rhein, from Bremen.

DOCTOR HAS PLAGUE.

Cronstadt, March 2.—Dr. Schreiber of the Second Siberian regiment, who has been experimenting with living organisms in connection with researches for the causes of the plague, has contracted the disease, and has been isolated in the fort where he carried on his work.

MYSTERY DEEPENS.

Brunswick, Ga., March 2.—Official inquiry into the murder of Lillian Davenport, the actress, and A. S. Brown, a bartender, Wednesday night, has only deepened the mystery. The coroner's jury rendered a verdict last night that the two came to their deaths from bullets fired by some unknown party. R. L. Davenport, husband of the actress, who was held as a suspect, has been released.

STRIKE AT PORTSMOUTH, OHIO.

Portsmouth, Ohio, March 2.—The street railway strike situation is becoming more serious. Strike sympathizers burned a street car on Damarin Hill, just east of the city, during the night. No cars are being operated today, and the situation has grown so serious that the company officials threaten to ask for the militia in case the city authorities fail to give ample protection.

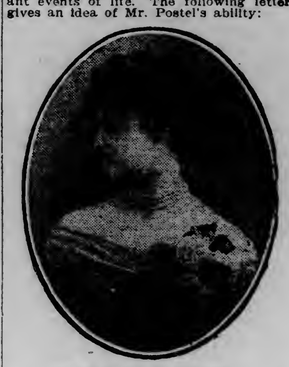
STRANGE PREDICTIONS

Planetary Professor Foretells Events and Quickly Reads the Lives of People, Though Thousands of Miles Away.

Sends Letters to the Rich and Poor Alike, in Which He Advises Them About Business, Marriage, Speculation, Loves Affairs, Wealth, Etc.

Offers Free Readings to All Who Write and Send Date of Birth.

In his office in New York city, surrounded by charts and dials of strange design, Prof. Albert H. Postel studies daily over the lives of men and women who have written him for advice on affairs of business, love, speculation, travel, marriage, health and the important events of life. The following letter gives an idea of Mr. Postel's ability:



MISS EFFA M. TRYON.

Prof. Postel:

Dear Sir—You are certainly the most wonderful astrologer living. Every one of your predictions came true. I consider that you not only saved me from an awful death, but prevented the loss of hundreds of dollars. I trust that many people will profit by your advice. Sincerely,

MISS EFFA M. TRYON.

The accuracy of recent predictions made by this eminent Astrologer has caused many of his friends to believe that he possesses a supernatural power, but he modestly asserts that his predictions are due alone to a scientific understanding of natural laws. The many thankful letters Prof. Postel has received from people who have benefited by his advice furnish ample proof that he is sincere in his work and has a kindly feeling toward humanity.

Readers of this paper can obtain a reading free of charge by addressing a letter to Prof. Postel, Dept. 310, No. 126 West Thirty-fourth street, New York. Simply say you wish a reading of your life, stating your birth date, sex and whether married or single. If you wish to do so, you may inclose 10 cents (silver or stamps) to pay postage and clerical work; however, the reading will be promptly sent, whether you inclose the 10 cents or not.

ONE MORE SKI TOURNAMENT

Final Event Will Have Contests for Younger Riders.

One more tournament before the snow goes! It was thought when the last event was held a week ago that it would certainly wind up the season for the winter of 1906-07, but the fall of snow of the last few days has encouraged the Ski club to make one more effort to entertain the crowds with the great sport, and incidentally to enrich their treasury with the big expense of next year's national in view.

The tournament a week from tomorrow will differ from the various ones in that there will be classes for amateurs as well as for the professional riders, and bumps are being constructed for the different classes of jumpers, on smaller scales than the big one now in use.

In fact, the main purpose of the tournament is to give a chance to the large numbers of ambitious boys who have acquired great proficiency in the sport, but are not quite equal to entering the professional ranks.

Local professionals will be on the hill, however, and will contest for valuable prizes, so that those desiring to witness the big spectacular jumping will have an opportunity to do so.

Boys wishing to enter are requested to file their names at the club meeting to be held next Friday evening at the rooms of the Builders' Exchange in the Lyceum building.

CASSATT'S STATION STORY.

The late President A. J. Cassatt of the Pennsylvania Railroad told at a luncheon at the Philadelphia Country club, a railroad story.

"A Western broker," he said moved from the city into the country. He moved far out, and, since the railroad was small and the train service poor, he traveled to and from town by carriage or automobile exclusively.

"Deciding after a time to keep chickens, he ordered a patent chicken coop, and on the day it was expected set out in a dray to fetch it home from the freight office.

"He reached the railroad station, which he had never seen before, after an hour's drive. No one was in sight, but there was his chicken coop, and, with his man's help, he soon had it on the dray and set off homeward again.

"A hundred yards or so down the road he met a chap in a blue uniform, with the title 'Station Master' in gold letters on his blue cap.

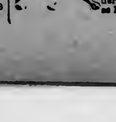
"'Hey, there' exclaimed the chap, excitedly, 'what the dickens have you got on that dray?'

"'My new chicken coop,' the broken answered calmly.

"'Chicken coop be hanged!' shouted the station master. 'That's Mudby Junction station.'"

BETTER THAN SPANKING.

Spanking does not cure children of bed wetting. If it did there would be few children that would do it. There is a constitutional cause for this. Mrs. M. Summers, Box 426, Notre Dame, Ind., will send her home treatment to any mother. She asks no money. Write her to-day if your children trouble you in this way. Don't blame the child. The chances are it can't help it.



TO WOMEN MANGAN PILLS are safe and absolutely reliable. Price $2.00. Safety Capsules, price $2.00. Pasteur's Syringe and Tablets, price $5.00. Sent in plain package on receipt of price. Address Mrs. Julia A. Saunders, care of EDMOND MEDICINE CO., 20 Fifth Avenue, Chicago, Ill.

THE HERALD WANT AD. COLUMNS SHOW THE DAILY PROBLEMS OF DULUTH IN COURSE OF SOLUTION.

WANTED—A POSITION AS COOK IN lumber woods by lady with experience, also has son who can help inside or out. Address with wages. Emma Bird, Beaverton, Mich.

WANTED—SEWING; SHIRT WAISTS and shirt waist suits. 6 East Fourth street, upstairs.

WANTED — BY COMPETENT YOUNG lady a position to teach child three evenings each week. If your children are behind in their classes; why not give them private lessons? Best of references. J. 70, Herald.

WANTED SEWING — AT 601 EAST Third street by experienced dress maker; waists and suits; suits $5 and up.

WANTED — POSITION BY YOUNG lady as bookkeeper; business college graduate. Address, W. 57, Herald.

YOUNG WOMAN MUST HAVE EMployment at once. Office work preferred. Address Z. 27, Herald.

WANTED—BY WOMAN, WORK BY the day. Z. 33, Herald.

YOUNG GIRL WANTS LIGHT HOUSEwork, so can go home nights. Call New 'phone 2094-A.

WANTED—BY EXPERIENCED DRESSmaker, work by the day. 221½ West Fourth street.

WANTED—SEWING AT HOME OR OUT by the day. 2217 West Fourth street.

WANTED—POSITION AS DISHWASHer in restaurant. 300 St. Croix avenue.

YOUNG LADY WITH EXPERIENCE as cashier wishes position. Can furnish references. Address Z. 24, Herald.

WASHING AND IRONING TO TAKE home. Z. 20, Herald.

SITUATION WANTER BY A YOUNG lady as office assistant or saleslady. Has had some experience. Address Miss Carlson, 2119 West Seventh street.

WOMAN WOULD LIKE TO GO OUT washing by day. Call 1205 West Michigan street.

AN AMERICAN WOMAN OF MIDDLE age would like position in a good family as housekeeper. Would like a place where she can be her own mistress. Address D. 89, Herald.

FOR SALE—HOUSES.

FOR SALE—FIVE-ROOM HOUSE AND lot, with stone foundation, sewer, water, bath and electric light; pretty location, near Lincoln Park; a bargain at $2,250; ten-room house and lot all modern conveniences; good location in West end; also many other bargains in houses and lots. B. E. Wellberg, 309 Twenty-sixth avenue west.

FOR SALE—EIGHT-ROOM HOUSE AND lot 60 by 140; water and sewer. Twenty-second avenue west and Superior street, $4,500. Call at 2117 West Sixth street.

$1,500 WILL BUY A NICE FIVE-ROOM house, part hardwood floor, electric light. 820 East Tenth street.

FOR SALE — MODERN NINE-ROOM house in East end. Inquire 1001 East Second street.

FOR SALE—COTTAGE, $1,300; $300 CASH, balance on monthly payments. Call at 120 West Ninth street.

TENTS AND AWNINGS.

POIRIER & CO., 103 East Superior street.

MILLINERY.

M. A. COX, 330 EAST FOURTH STREET

ARCHITECT.

FRANK L. YOUNG & CO., 201 Pal. Bldg.

OLD GOLD BOUGHT.

E. E. Esterly, manufacturing jeweler, Spalding hotel, 423 West Superior street.

One Cent a Word Each Insertion—No Advertisement Less Than 15 Cents.

FOR RENT—ROOMS.

FOR RENT—THREE ROOMS NICELY furnished, for light housekeeping. 327 Eighth avenue west.

FOR RENT—THREE-ROOM STEAM heated flat. Enquire 315 West Fourth street.

FOR RENT—FOUR UNFURNISHED OR furnished rooms. Everything complete for housekeeping. 1121 West Michigan street.

FOR RENT — ROOM, ALL MODERN conveniences; suitable for one or two gentlemen. 207 West Third street.

FOR RENT — NICELY FURNISHED room for young man; every convenience. 15 East Fourth street. Old 'phone 1949-K.

FOR RENT — NICELY FURNISHED room; modern conveniences. 316 East Second street.

LARGE FURNISHED FRONT ROOM for rent. 210 East Second street.

FOR RENT — HANDSOMELY FURnished room; on street car line; for single man or woman; heat; light; bath; telephones; etc. 225 Forty-second avenue east and Cambridge street.

FOR RENT—THREE-ROOM BASEment. Water and toilet. 726 East Third street.

FOR RENT—TWO ROOMS FURNISHed for light housekeeping; central; no children. 420 First avenue west.

TO LET—ONE UNFURNISHED ROOM for light housekeeping. 316 West Second street.

FOR RENT—SUITE OF FURNISHED front rooms, over 125 East Superior street.

FOR RENT—ONE LARGE, MODERN, well-heated front room; two closets, both 'phones. 105 Eighth avenue west.

FOR RENT — LARGE FURNISHED front room with privilege of kichen and use of 'phone, 1219-Y. 210 East Second street.

FOR RENT—SUITE OF ROOMS IN McDonald block. Call at 205 McDonald Block.

FOR RENT—NEWLY FURNISHED room, steam heat, bath, gas and use of telephone. 321 West First, flat 8.

WANTED— EXPERIENCED MAKERS at No. 3, West Superior street.

FURNISHED FRONT ROOM, GAS, bath and 'phone service. Suitable for two gentlemen. $8 per month. 217 East Fourth street.

FURNISHED ROOM, STEAM HEAT, with board. Also table board by the week. The Richmond, 222 West Second street.

FOR RENT—FURNISHED ROOM IN East end, for gentleman; easy walking distance; all conveniences. Address Z. 37, Herald.

FOR RENT—FOUR ROOMS. CALL AT 527 West Superior street.

FOR RENT—FOUR ROOMS. 813 WEST Fourth street. No children.

SATURDAY, MARCH 2, 1907.

MINNESOTA HISTORICAL SOCIETY

AT THE LAKE COPPER MINES

Discovery of Baltic Lode in Ontonagon County Means Much---Believed New Era Has Been Opened By the Disclosures.

Houghton, Mich., March 2.—The possibilities for big mines in Ontonagon county on the Baltic formation, are being freely discussed in mining circles. The discovery of the Baltic lode on the Lake property is regarded as the most valuable and far reaching development in the history of the Ontonagon field, and the exploration of the vein by means of a shaft will be watched with a great deal of interest. As soon as the snow goes off, the Lake has planned to start work upon it. The overburden is not thick and the ledge should be reached in a short time after operations are started. The drill cores show the lode to be highly mineralized and from forty to fifty feet in width.

This formation also crosses the Indiana, Toltec, Adventure, Mass, Evergreen, Michigan, Victoria and others. The Victoria has started a shaft some distance to the south of the main working shaft on what is thought to be this formation.

Frank Morgenroth of Greenland says that he has conclusively traced the Baltic lode from Portage Lake to the Ontonagon river. It outcrops frequently, and, while it wavers some in places, it follows almost a direct southwest course.

Mr. Morgenroth said: "This south range strike extends through Ontonagon county and carries copper to the grass roots. It outcrops on the Evergreen property in 50-38, carrying copper to the surface; the Mass, the Indiana, the Toltec and others have the strike; the Adventure can tap it with a perpendicular shaft, and so on through the county. Houghton county has good paying mines on the south range, among these being the Champion, Baltic and Trimountain. The Twin lake country in Houghton also shows good indications of this same formation.

"Supt. Pryor of the Lake was subjected to much criticism while conducting drill operations at the point where the Baltic lode was tapped. There were many who contended that there was no possibility of finding anything of value in that locality. Well, you know what the result has been.

"Ontonagon county is yet unexplored. No mining has ever been done northeast of the Ontonagon river. What mining has been done in this county has been carried on under the old system of the early '50s, if system it can be called. All attention has been directed to the center range of the copper belt. This center range extends into Houghton county, and has been opened to some extent, but has failed to give one dividend paying mine.

"It is the south and the north ranges which are being successfully mined over there. Ontonagon county has both just as clearly defined as they are in Houghton. We have a long strike in the north range, as well as the south, with leads carrying coarse copper to the surface. Houghton county has dividend paying mines on this north range. It has never been given any attention here.

"Ontonagon county's mineral resources have been unjustly condemned. This has been due to skepticism in a measure and to the fact, in my opinion, that operations have been conducted on the center range, instead of the north or south. It is unaccountable to me that our mining men have failed to grasp this simple problem. The discovery at the Lake, or old Bolt, is going to open the eyes of the copper world to this county, and I predict that this south range formation is going to receive a lot of attention from now on."

* * *

The annual report of the Franklin will soon be issued. Without going into details, it may be said that the actual report for 1906 will make a much better showing than the unauthorized statement.

The output of the Franklin mine for last week was over ninety-six tons, practically the best week in the company's history, and the returns for the full month of February will probably be record-breaking in spite of the fact that it is a short month.

* * *

The Hancock Consolidated Mining company has made arrangements to ship its rock to the Isle Royale mill for treatment. The spur from the Mineral Range tracks to the Hancock property has just been completed, and a shipment of Mineral Range cars has been ordered to the property. The Hancock is said to be ready to ship, and with arrangements made with the Isle Royale company to stamp its rock, Hancock will shortly become a small producer.

* * *

John D. Cuddihy has authorized the statement that neither John D. Ryan, Mr. Ryan's associates nor the Amal-

(Continued on page 12, 2nd sec., 2nd col.)

BISBEE OUTPUT IS NORMAL

Smelters Could be Continued Twelve Months Without Mining a Pound of Ore---The Calumet and Arizona is Shipping More That at Any Time in Its History.

Bisbee, Ariz., March 2.—The local situation at the close of the present week finds operations continuing practically as before, with the exception of the Spray shaft of the Copper Queen company, which is idle and closed down while repairs are under way. Many miners have been laid off, others have quit, and others have been discharged during the past ten days. A conservative estimate for the number of men out of work in the district is twelve hundred. The great majority of these men have left the camp, not less than 800 leaving for other camps in Nevada, Montana, Idaho and Mexico.

The cutting down of the force has not been confined to any particular mining company. The Denn-Arizona, Shattuck-Arizona and Calumet & Arizona and Copper Queen have taken the same action. There is a storage of fuel and timbers at some of the properties, but the continuation of giving men their time from day to day is plainly carrying out the policy of the companies against the encroachment of the organizers of the Western Federation, who are here.

Production is normal in the mines at Bisbee and the production of copper at the smelters at Douglas has not been interferred with. The Calumet & Arizona is shipping more ore to the smelters than at any time in its history and the production is being increased from the Superior & Pittsburg properties. While the Copper Queen is shipping less ore, owing to the close down at the Spray, the big storage bins at Douglas are being drawn upon and the average daily production continues as usual. It is stated on good authority that the Douglas smelters could be continued for twelve months if not a pound of ore was mined at Bisbee. Since the closing down of the Spray shaft the shipment of the old slag dump has been resumed, about 200 tons daily being sent to the smelter. Also in the event of an emergency, the shipments of ores from Nacozari to the Douglas smelter can be materially drawn upon. Likewise the ore from Morenci and Globe could be depended upon to keep the big smelters going at Douglas. Notwithstanding the fact that the production of ores from the Bisbee mines might be seriously curtailed such a condition would not be likely to shut down the Copper Queen smelters at Douglas. The Calumet & Arizona company is not so well fixed for continuing smelter operations. While there are immense ore bodies blocked out in the Calumet & Arizona and Superior & Pittsburg properties there is very little ore reserve carried at the smelters and any interference with production of ore from this end would soon cause the shutting down to the Douglas smelters.

While the Spray is shut down as a producer a large force of mechanics are at work removing the big engine, tearing out the old foundation and straightening up the shaft from the surface to a depth of 100 feet. The big steel frame also needs attention as some of the main members were badly twisted by the settling of the ground underneath. Work of removing the old foundation was completed last week. The new foundation will be put in as quickly as possible and the big engine reset, at which time it is expected that the repairs to the big shaft will have been completed and the Spray be ready to resume operations. Just how long it will take to accomplish the work cannot be definitely settled, but it will be at least five weeks if not longer. The shortage of timbers continues and the Copper Queen is depending principally upon the Czar, Gardner and Lowell for its present output. The Holbrook shaft will shortly be used for the hoisting of ore. Ore bins are now under construction and should be ready for use within the next week or ten days.

Work of connecting the Gardner and Sacramento shafts of the Copper Queen company has commenced. Connections will be made on the fourth, sixth and eighth levels. Work has already been commenced from the Gardner end. It is the ultimate plan to have all the ore from the several Copper Queen shafts hoisted at the Sacramento. As soon as the connections are made between the Sacramento and the Gardner all the shafts will then be in connection and the ore will be hauled from the Sacramento by means of an underground trolley system. Machinery and material for the new powerhouse are already on the way.

* * *

There is great activity at the present time in the Bunker Hill district, located north of Mammoth. The Calumet & Arizona is working twenty-five men on the Copper Giant group of claims. The drill is down 1,000 feet, in good ore. On another claim the shaft is down 150 feet, all in ore. The tunnel on the big reef of ore on the Copper Giant is likewise in ore. Ore has been found in all of the developments of the Calumet & Arizona. An adjoining group of mines is likewise being developed, with results similar to those at the Copper Giant camp. The Copper Giant camp is located twelve miles north of Mammoth with a good rond within two miles of the camp, which requires but two miles of traffic over a rugged canyon, which will be opened at once. The Copper Creek mine, which adjoins the Calumet & Arizona group, employes forty-five men. Two shafts are going down, and a tunnel is being driven. Drifts in the shaft are being run on ore bodies. The Copper Creek camp is a perfect hive of industry. Good ore is being taken out of both haft in large quantities. The tunnel, which it is expected will strike the ore body within 100 feet, is being worked night and day. The apex of the vein above the face of the tunnel will be about 500 feet. Shipments of ore will probably be made from the Copper Creek during this month.

* * *

E. P. Hackett of Milwaukee, treasurer and a director of the Twin Buttes Mining and Smelting company, and Edward T. Davis of Philadelphia, who is also a director and large stockholder in the company, are in Tucson and will remain until after the special meeting of the stockholders of the company. This meeting has been called for March 4.

Messrs. Hackett and Davis are interested in the Cross ranch as well as in the Twin Buttes mines and railroad and

(Continued on page 12, 2nd sec., 2nd col.)

COBALT CAMP IS EXTENDING

Valuable Finds on Temiskaming and Other Properties---Survey of Railroad Has Been Completed---Slab of Native Silver Found.

Cobalt, Ont., March 2.—The extension of the Cobalt camp to the east is gradually receiving confirmation under the development work going on at many of the properties. The discovery of valuable ore on the Temiskaming, which assayed as high at 7,000 ounces of silver to the ton, was the first real discovery in the district, and this was followed by a find at the junction of the Beaver and Temiskaming claim. At the Rochester claim, which is in close proximity to the two above named properties, native silver embedded in calcite was found during blasting operations in an open cut. These recent discoveries have given a much firmer undertone to all the properties in the Geroux and Kerr Lake districts.

The survey of the Temiskaming & Northern Ontario railway has been completed, and contracts have been awarded for the construction of a mines branch to the southeast of Cobalt. It will diverge fro mthe main line near the Silver Queen mine, and will serve the McKinley-Darragh, Silver Leaf, Silver Bar, University, Foster, Jacobs and Drummond properties more particularly. So far it is only contemplated to carry it as far as Kerr lake, but probably before the steel has been laid, there will be an urgent call for an extension. It will materially assist in the development of Cobalt by placing cars right at the doors of many large shipping properties, thus saving a heavy ore haul on sleigh or wagon. The branch will be about five miles in length.

Not since the big strike on a blind vein at Temiskaming mine a month ago, it is declared, has the Cobalt camp been so excited as it was on the announcement of a find at the Red Rock. Development at the main shaft of this property disclosed a veritable slab of native silver. Samples of the ore are now on exhibition at the camp, and interest is again centered in Bucktownship, where the Red Rock is situated. The Red Rock adjoins the Green-Meehan, which has shipped ore to the value of $80,000 to the car.

The Cobalt Lake Mining company has filed its defense in the suit brought against it by the Florence Mining company. The defense sets forth that the property in question was withdrawn from prospecting by special order in council, and points out that the government has advertised widely its intention of selling the property under Cobalt. It is stated that the Florence company stood by and allowed the Cobalt Lake company to pay the government $108,500 as a 10 per cent deposit on the property.

Mining engineers in from the Cobalt Lake company's working bring rich looking specimens of ore with them as corroborative evidence of the genuineness of the recent strike on the shore of the lake. The vein, which is believed to be undoubtedly the McKinley-Daragh vein, runs diagonally across the company's right-of-way to the shore, a distance of forty feet. The same vein is being worked across the lake on Nipissing property. In all, the Cobalt people have so far located seven veins around the shore

(Continued on page 12, 2nd sec., 5th col.)

RECENT ORE FINDS AT BUTTE

Especially Big Ones Made in Berlin Claim of the North Butte and the Neversweat of the Anaconda—Great Northern Claims Are Under Right of Way.

Butte, Mont., March 2.—At least three very important strikes were made in the Butte district during the past two weeks, one in the Berlin claim of the North Butte company and another in the Neversweat of the Anaconda company being especially big. In driving a north crosscut from the 1,600-foot level of the Jessie mine through the Gem, Croesus and Snowball to the Berlin claim a vein 28 feet wide was penetrated. The entire vein is of good ore and fully half of it copper glance that assays 40 per cent copper. The company has given out no information relative to the strike, and the exact location of the vein is not exactly known, but is supposed to be within the Berlin claim. The company is also engaged in sinking a shaft on the Berlin and it has reached a depth of 500 feet. The depth of the strike is between 1,800 and 1,900 feet.

In the Neversweat mine the Anaconda company has cut the big Anaconda vein in the south 2,400-foot cross-cut, which is more than 100 feet deeper than the 2,400 level of the Anaconda mine. The ore body is of about the same width as it is in the Anaconda mine and of about the same richness. The vein is about fifty feet wide and for a width of forty feet carries copper glance, assaying in value from 30 to 60 per cent copper. Only two men are working on the ore in the cross-cut and all the ore taken out is sacked and the product is shipped to the smelter. With the big vein opened in the Anaconda and Neversweat there is no doubt that it will also be found in the St. Lawrence, one of the Anaconda mines east of the Anaconda and Neversweat, and in the Parrot company's ground to the west. The Parrot is not yet deep enough to get the rich body of ore in the vein opened by the Anaconda company, but the management believes that it is but a question of depth when it will be found.

The East Butte Copper Mining company has started three cross-cuts, one north from shaft No. 11 at the 400-foot level to connect with a cross-cut started south from the 400 of the No. 1 shaft. It is expected that the connection will be made about two months. Another crosscut is being driven south from the 600 of No. 1 shaft and one north from that point. There are twenty-one known veins in the East Butte ground, all of which will be intersected by the cross-cuts between the two main shafts. There was some apprehension as to the quality of the ore that would be found at a depth of 600 feet, because there has been much talk about an imaginary iron capping that would be found at and above that point. The south cross-cut at the 600 has cut one vein about 80 feet from the shaft and the vein was found wider than at the 400 and fully as rich. About four feet of it in the cross-cut is first-class ore, assaying 8 per cent copper and better. The remainder of the fourteen-foot vein is made up of concentrating ore.

The Coalition company has cut into a body of high grade copper ore in the Minnie Healey mine 100 feet deeper than at any point at which the vein has yet been worked. While sinking a winze in the western portion of the mine to a depth of 1,300 feet the ore body was encountered and some cross-cutting on it has been done. It has been sufficiently explored to give pretty good assurance that the ore body is extensive. It all assays better than 8 per cent copper.

A strip 30 feet wide and less than 80 feet long on the right-of-way of the Great Northern railroad, which crosses a corner of the Symons claim, is claimed by the company, which claims ownership of all mineral rights under its right-of-way. The claim is disputed by all property owners and mining companies. Recently the South Butte Mining company was organized to take over all the Great Northern mineral rights and a few days ago the South Butte company brought suit in district court against several former lessees in the Symons ground, demanding $225,000 damages as the value of the ore mined out of the 30-foot strip above a depth of 150 feet. Because the East Butte company does not recognize the right of the Great Northern to the mineral under its right-of-way the mining company has been made a party defendant. The South Butte company has several suits pending in the district court in which the question of its right to the mineral under the Great Northern right-of-way will be tested.

The Davis-Daly Estates Copper company has completed its title to all the mining property and other real estate which was purchased from the A. J. Davis estate heirs when the company was organized and paid $1,398,100 to perfect the title. Before the organization of the Davi-Daly company a suit for a partition of the Davis estate was instituted in the district court by Maxmillian H. Schultze, who acquired an interest by assignment from one of the heirs, but the partition suit was not made until last week. By an evidently harmonious understanding with the Amalgamated and North Butte interests, the North Butte purchased the West Gem mine and the Gem millsite, two of the Davis properties, which lie among the North Butte group of mines. The North Butte paid $250,000 for the Gem and $50,000 for the millsite. The remainder of the Davis properties were sold to the F. A. Heinze for the Davis-Daly company, paying the following prices for them: Baltic lode claim, $200,000; Blue Jay, $25,000; Broker, $100,000; Carlotta, $100,000; Centerville, $100,000; Great Republic, $50,000; Hawkeye, $75,000; Mt. Moriah, $125,000; New Era, $150,000; Hibernia, $125,000; twenty-four city lots, $23,100; eighty acres of ranch land south of the city, for a possible smelter site, $25,000. Mr. Heinze holds sufficiently high to prevent any of the property being purchased by outsiders.

The North Butte Extension Copper Mining company, recently organized by G. A. Kenny, Thomas Cruse, Thomas W. Van Brunt and associates of New York, has three or four claims located on the extension of the Blackrock vein. The Blackrock has not been opened to any greater depth than 300 feet and has yielded only silver ore. The Butte and Superior company is sinking the Blackrock shaft deeper and is now nearly 600 feet

(Continued on page 12, 2nd sec., 4th col.)

CRIPPLE CREEK DISTRICT

British American Leasing Declares Fifth Consecutive Monthly Dividend to Its Four Stockholders--- Good Results From Vindicator's Experimental Mill.

Colorado Springs, March 2.—The British American Leasing has declared its fifth consecutive monthly dividend to its four stockholders. The amount is $3,000. The total disbursements to date aggregate $12,500. The company operates on the Dante, Cripple Creek.

The Marquette Gold Mining & Milling company, operating near Salina, Colo., has contracted to extend tunnel No. 1, 500 feet on the Sussex vein, making 1,255 feet total. The company has now good assay returns from various parts of the properties.

The Coloroda State Investment company is shipping several cars of $30 and $60 ore weekly from its Alleen and Modoc claims, Cripple Creek.

The Sharp-Bell lease on the Accident mine, Cripple Creek, is yielding $100 ore in carload shipments. The ore is coming from the 300-foot level.

The Pharmacist Leasing company, Cripple Creek, having attained 950 feet depth, is cutting a station and will drift to east and west boundary lines. The Pharmacist was the first dividend earner of the camp, having disbursed $85,000 in 1892. It is located on Bull Hill.

The Granite company is shipping 3,000 tons of $40 ore monthly.

The Gold Sovereign mine, Cripple Creek, is shipping 1,700 tons of $27 ore monthly. Most of this is on company account.

The Bull Hill Mining company is shipping 2,000 tons of ore monthly from its lease o nthe Cresson mine, Cripple Creek. The average value is about $20 a ton.

The Omaha Mining & Leasing company is doing considerable development work on the Norfolk fraction, Ironclad Hill, Cripple Creek. The shaft is being sunk to 500 feet.

The Alax Mining & Milling company contemplates erecting a cyanide mill on its Cripple Creeek properties.

A tubular cyanide mill of 100 to 250 tons daily capacity is planned by A. D. Franks, locator and owner of 100 acres of mineralized land in Four Mile creek, Cripple Creek, where ore worth $5 to $8.60 is being mined.

The United States Reduction & Refining, whose sixth annual meeting was held in New York last week, is capitalized for $6,000,000 common and $4,000,000 preferred stock. Its plants at Colorado City and Florence, Colo., treat Cripple Creek, Utah, Arizona, Old and New Mexico ore and have a capacity daily of 600,000 tons. During the fiscal year, ending Aug. 31, 1906, $236,748 in dividends on preferred stock was paid. The annual gold bullion output approximates $9,000,000.

A. A. Rollenstone of Denver has been appointed receiver for the Economic Gold Extraction company on complaint of the International Trust company, trustee. The petition states that $10,000 worth of lead and copper bullion and gold extraction is in the ashes and dirt on site. The mill was burned Jan. 30, at $592,000 loss. It was located at Canyon City, Colo.

The first fortnight's cleanup of the Wishbone cyanide mill on Spring creek, Cripple Creek district, resulted in $4,800. Ore treated averaged $6.90 per ton. The management has contracted for 10,000 tons of dump rock, and will also ship from leased ground on Carbonate Hill.

The Mayflower Gold Mining & Milling company will remodel the old Alleghany mill, recently purchased, on the W. A. Taylor estate, and will modernize it with a capacity of twenty stamps. A tramway, two miles in length, will connect the mine and will.

The Vindicator's experimental low grade mill returned $6,000 in the cleanup for two weeks' run. The company is pleased with the process and plans erecting a 200-ton mill at Cripple Creek.

The Elkton Consolidated Gold Mining & Milling company has declared a dividend of 1 cent regular and an extra of ½ cent, or $37,500 total, payable in February. This is the result of two months of output.

The number of miners now working in Cripple Creek approximates 6,000.

IN EASTERN OREGON FIELD

Work in Copper Belt East of Baker City Very Brisk All Winter---Active Work in the Gold Belt.

Baker City, Or., March 2.—Mining in the Eastern Oregon field has been active during the winter which is now closing, and which has been very mild, with so far less than the average snowfall in the mountains. Work in the copper belt lying twenty-five miles east of Baker City has been especially brisk and from Snake river northward fifty miles to the Indiana mine, bordering on Union county, men have been busy doing underground work, prospectors have been locating new claims and a number of new companies have been incorporated.

The Indiana mine has now blocked out some 250,000 tons of ore that will average in copper and gold $10 to the ton. The company proposes this summer to erect its own smelting plant, unless a railroad is built to the camp that will enable it to ship ores at a profit. Individual stockholders of the Indiana have incorporated four or five smaller companies for the purpose of developing adjacent properties.

The North American Mining company, five or six miles south of the Indiana, is operating the Burkemont copper properties, which have been developed by shafts 300 or 400 feet deep, and by cross cut tunnels, and by tunnels on the ledges. This property was bonded ten days ago to a New York syndicate for $1,500,000 by Manager D. W. C. Nelson.

The Copper Butte property, further south on the belt, and the Sanger mine, the Sovereign, Poorman group and Cox property, are all busy with development work and making substantial showings; while Manager J. K. Ronig was also operating the old Virtue mine, a gold property in East Eagle, some six miles from Sanger, or about thirty miles east of Baker City. This hydro-electrical power plant will supply all these properties with cheap power.

On the south end of the belt, on Snake river, the big Iron Dyke mine is getting very busy, and already has 500,000 tons of ore blocked out for shipment over the line which Harriman is building down from Huntington, on the Oregon side of Snake river, on its way to Lewiston, Idaho. In this camp, also, are the McDougal and other rich copper properties, and two or three new towns are springing up at Homestead and Ballard's Landing.

West of Baker City the gold belt is lively, active work going on in the Elkhorn by Manager Edward I. Field, with a large force of men on the 400 level, and the old Red Boy, which is being revived by the Olive Lake hydro-electric plant, just completed; the Bonanza and the regular producers—the North Pole, Columbia, and E. & E. Many new prospects along this belt in the Greenhorn, Granite, Bounre and Cable Cove camps are being developed.

To the south in the Durkee and Gold Hill camps considerable work has been done and preparations are making for dredging in the spring. Placer mining has already commenced in Stice's Gulch, just west of the city, where $2,000 in nuggets have already been taken.

LAKE SUPERIOR IRON MINES

New Shaft at the Colby Mine at Bessemer Expected to Go Into Commission Soon---Corrigan, McKinney & Co.'s Success in Making Discredited Iron Propositions Profitable.

Ironwood, Mich., March 2.—(Special to The Herald.)—The fact that the Chicago & Northwestern railroad is extending a spur track to the new location is evidence that it will not be long now before the new shaft goes into commission at Corrigan, McKinney & Co.'s Colby mine at Bessemer, Gogebic range. This shaft, which is steel lined and four compartments in size, has been put down at a point 600 feet east of the old one, in consequence of the discovery of a new body of ore some time ago 400 feet east of the footwall. It is a north deposit not previously known to exist at that point until a crosscut ran into it from the ninth level. The present active shaft, sunk vertically, is down to a depth of about 1,200 feet; it is 5 by 14 feet inside of timbers, and it has three compartments. The ore bodies here, into which levels 1,200 feet have been run, are of goodly size and apparently are ample for a substantial production for years to come. The ore is won by the back-stoping and subbing method. The ground is supported by timbers 10 by 10 inches in dimensions, and something like a thousand pieces are used annually.

The Colby lies at the southwest edge of the city of Bessemer, and in area it comprises 160 acres of land. What is now the Tilden mine of the Steel corporation formerly was the eastern end of the Colby, and was detached from it at the beginning of 1891. The Colby is a producer both of Bessemer and non-Bessemer ore. The fee is owned by a company consisting mainly of residents of the Michigan Copper country and Detroit, but the property has been operated by a variety of concerns since its opening in 1884 by the Penokee & Gogebic Development company. Not only was the Colby the first producing mine of the Gogebic range, but it was the pioneer steam shovel proposition, and when Joseph Sellwood began taking out its ore by that means the news created decided pessimism on the two older ranges, the Marquette and the Menominee, and the operators there were apprehensive lest they be forced out of business. However, the Gogebic is not a steam shovel range—in fact, more recent developments have indicated that its ore measures probably lie materially deeper than elsewhere in the Lake Superior region—and the Colby happened to be the exception proving the rule. Three seasons of steam shovel work elapsed, and then it became necessary to resort to underground operations, as in the older districts.

When the Tilden was divorced from the Colby in 1893, the latter was considered almost worthless and was discarded for that reason. There were known to be ome depoits of ore remaining, but the steam shovels naturally had made deep gashes and the mine was in very poor condition for reopening. The lease was surrendered by the Penokee & Gogebic Development company in 1890. Corrigan, McKinney & Co. took over the property in 1896, and succeeded in getting it in better condition than seemed possible at the time. They managed to get 153,000 tons of ore out of the property in 1898, but the following year the output fell to 103,000 tons, and in 1900 only 32,500 tons were produced, while in each of the two following years the production had dwindled to 23,000 tons. The formation at the Colby is very similar to that found at the Ironwood mines, with north and south veins separated by a wedge of cap rock, and exploration at depth with diamond drills has revealed the probable existence of the secondary, tertiary and other ore deposits, the same as at the Norrie and other properties to the west. The mine is credited with a total production of about two and one-quarter million tons, but considerable of this was taken from what has for some years been the Tilden. The Colby will produce much heavier in the future.

This Cleveland concern of Corrigan, McKinney & Co. seems to have a faculty of converting dicredited iron propositions into profitable enterprises. The Colby, discarded as valueless, was picked up, and later, in the Crystal Falls field of the Menominee range, the old Dunn mine was acquired in 1899; afterward the Armenia, with its workings caved in, was taken over, and last season the old Fairbanks property—which was the first to be opened in the district, but which had never attained rank as a shipper beyond forwarding 8,500 tons—was added to the Corrigan-McKinney group. Since then the Dunn has become a fine mine again, the Armenia is developing satisfactorily and the Fairbanks gives promise of being an excellent proposition. The latter mine adjoins the same company's Crystal Falls mine, which has been a good producer for a number of years past.

The Dunn was pretty well worked out when Corrigan, McKinney & Co. stepped in, and it has yielded handsomely for both operators and fee owners. It made its first shipment in 1887. The mine was first in the hands of Ferdinand Schlesinger, once the uncrowned king of the ore trade, before Carnegie and Rockefeller entered the business. It was lost by him at the time of his failure in 1893, but he regained it three years later. However, the mine failed to reach the expectations based on its record of former years, and it was robbed of pillars and floors in 1897 and 1898, collapsing completely in the latter year. The Dunn was so badly caved when the present operators acquired it that it was necessary to sink a new shaft to a depth of 760 feet to reach the ore body. This shaft is 6 by 18 feet in di-

(Continued on page 12, 2nd sec., 3rd col.)

MINING IN THE BLACK HILLS

Good Progress on Ground of Minnesota Mines Company---The Homestake to Sink Ellison Shaft to 1,700-Foot Level.

Deadwood, S. D., March 2.—Good progress is being made on the ground of the Minnesota Mines company in the Garden City district, near this place. The 200-ton cyanide mill is nearly enclosed and will soon be ready for the machinery which is ready to ship. The tank capacity will be sufficient so that the milling capacity can easily be increased to 300 tons a day when it is desired. The process will be the wet crushing, and the slimes will be treated by decantation. Electric power will be employed. In the mine work is being prosecuted with the intent of having a sufficiency of ore opened up before the mill is put in running order. The main shaft has reached a depth of 150 feet, and will be continued to the 200-foot level. Drafts run at the 100-foot level, cut two large verticals, 38 and 54 feet in width, and of cyaniding ore assaying from $2.80 to $7 a ton. Assays as high as $16.50 have been received, but it is safe to say that a general average of between $4 and $5 a ton can be maintained. At the 200-foot level drifts will be run to open up these ore bodies more thoroughly, and a sufficient supply of milling ore is thus assured. The company owns 150 acres of land in one of the best districts in the Northern hills, and financially is in the best condition. The property adjoins that of the famous Penobscot mine, better known as the Maitland.

Lead, S. D., March 2.—The Homestake Mining company has announced its intention of sinking the Ellison shaft this year to the 1,700 or possibly the 1,750-foot level. At the last annual report, compiling the record of the company up to June, 1906, the deepest workings which had been attained were the 1,550, and 150 feet of this land had been sunk during the preceding year. Not only the Ellison but also the Old Abe and the Golden Star will be sunk to this depth so that they may all be connected in the lowest workings. By this arrangement a great amount of ore will be opened up, probably enough to increase the ore in sight by a quantity sufficient to last for ten years. The plan of the company is, in addition to treating 4,500 tons of ore a day as has been their custom to do a great amount of development work during the ensuing year which will place the ore reserve on a still firmer footing.

ELY AS A COPPER PRODUCER

Expects to Become Butte's Chief Rival Within Two Years---Most Ore Bodies Low Grade Copper Sulphides and Oxides.

Ely, Nev., March 2.—Within twelve months Ely will become a steady producer of copper in large quantities. Yerington, in the Mason Valley range, in the western part of the state, is developing into a big copper camp. Tonopah and Goldfield are almost daily extending their proved mineral areas. Bull Frog, Rhyolite, Fairview, Rosebud, Nevada Hills and the Seven Throughs country are on the boom. Within two years Ely will have a population of 15,000, and will probably become Butte's chief rival as a copper producing center.

For the most part Ely ore bodies are low grade copper sulphides and oxides. The extent of this zone of enrichment is enormous, and the deposits are remarkable for their uniformity. One of the interesting developments of the Ely camp is the cutting of a shaft of the Wedge, one of the Cumberland-Ely group. This shaft is now down over 100 feet, and a station has been cut at the lower level for the purpose of drifting on the ore body. Although this lens is lower grade than the ore body of the Veteran mine, which belongs to the same group, there is every present indication that the Wedge will develop a large showing as it is opened up. Several churn drills are being installed on various parts of the Cumberland-Ely for the purpose of proving up some of the undeveloped territory.

The crushing plant which is being installed at the Star Pointer shaft of the Nevada Consolidated, will prove of great advantage in handling the ores from the Ruth and Star Pointer workings. These two mines are being connected by a working tunnel some 3,500 feet in extent. The Nevada Northern railway, which is being continued through Robinson canon to the leading mines, will carry the product of the crushers directly to the smelting plant fourteen miles below the town.

The Cumberland-Ely and Nevada Consolidated mines are developed to a point where they show at present over 100,000,000 tons of ore blocked out. The erection of a smelting plant which will cost more than $5,000,000 has been begun. As soon as the plant is ready for operation, the larger mines of the district will be in position to furnish all the tonnage it can handle.

The Butte and Ely, the Witch, the McDonald Ely, the Federal Ely and several other of the smaller properties of the district are being developed along very satisfactory lines. There are good showings of ore in all the workings and every hundred feet of development makes it increasingly possible that the ore zone of the district is practically continuous. Work at the Giroux is progressing along the conservative lines mapped out by the management, and in all of its working shafts good ore shoots have been encountered. While the Giroux has not the high grade ore to be found in some of the Cumberland-Ely mines nor the extensive development of the Nevada Consolidated, it is considered one of the first three properties in the Ely district. The concentrating plant of the Giroux is nearing completion and will very probably be in operation next fall.

Considerable development work is projected for some of the properties

(Continued on page 12, 2nd sec., 5th col.)

SOCIETY

Such an exodus of Duluth's fashionable people during the late winter and early spring has not been the fate of Duluth for many years. There are of course quite a number of people still remaining in town but it would seem that everybody but those with scruples against paying railroad fare in place of traveling on a pass, have left the clear crisp brightness of the North for the penetrating dampness of the West, or the warmth of the South or the luxury of Italians skies or the brilliance of Parisian life or the romance of Nassau or the delights of Hot Springs. Those who have not planned a several weeks' trip have arranged for an interruption in the too, too quiet and peaceful simplicity of Lenten life and are taking little jaunts East.

Bridge has let up slightly on its despotic sway and the numerous little gatherings which were anticipated have not materialized. Some perfect "fiends" at bridge announced at the beginning of the Lenten season that they would renounce the game for forty days, and the shock was so great that the others have not recovered sufficiently to plan a table or two.

Lingerie waists in the making and embroidered things of course, are being industriously stitched upon, but as for social diversion, there is dittle.

• • •

A delightful reception was given Wednesday afternoon at the home of Mrs. C. A. Duncan at which Mrs. Alexander Milne was the guest of honor. The affair was planned by the ladies of the Pilgrim Congregational church and nearly seventy-five guests were present. During the afternoon a musical program was presented by Mrs. E. F. Burg and Miss Ruth Rogers.

In the dining room Mrs. Ward Ames presided, and assisting were Mrs. Carroll Graff, Mrs. John Christie, Jr., and Miss Leora Fenton. Decorations of yellow tulips were used, and the afternoon was most delightful one.

• • •

The ice carnival of last week was so delightful a success that the Curling club members have decided to hold another such affair before the close of the season. Saturday evening, March 16, the members of the club and their families are invited to come to the rink in costume to take part in the second mask carnival of the season. Only those in costume will be allowed on the ice, and the details of the affair will be as well looked after as was the first. The planning of costumes is demanding much of the time and attention of the interested members.

• • •

Mrs. J. C. Cox was pleasantly surprised Monday afternoon at her home at West Duluth, the affair being in honor of the birthday anniversary of Mrs. Cox. Cards were the amusement of the afternoon and the favors were won by Mrs. Amelia Stewart and Mrs. William Murnian. Those present were:

Mesdames—
William Murnian, L. LaCasse, A. Stewart, M. Wardell, S. Fitzner, E. Wheaton, L. Harker, A. Franke, H. Krueger, J. M. Foster, C. W. Peterson, H. McGuirk, C. J. Hector, M. Guild, J. A. McCuen, Emma Bradley, S. Kriz, J. Gelineau, M. Schneider, J. Fischer, M. Ryan, B. Whittsitt, W. A. Putnam, C. H. Sting, William Rock, D. Milner, B. K. Walker, Laura Fix.

• • •

A delightful informal party was enjoyed Thursday evening at the home of Fred Jensen of 207 East Sixth street. Music and games made the evening an enjoyable one. Those present were:

Messrs. and Mesdames—
Michael Lanigan, Stanley Langstroth, John Jensen,

Misses—
Gertrude Manke, Clara Beier, Minnie Wendlandt, Emma Rohbein, Hertha Heinurich, Elizabeth McLeaf, Grace Spangenberger, Margaret Jacobs of Superior, Ida Wendlandt, Irene Seifert, Flora McLean, Stella Beier, Margaret Peters of Superior, Clara Moser, Margaret Jensen, Dorothy Spangenberger.

Messrs—
Manke, Herbert Beier, Jantzen of Superior, C. Behing, H. Fleer, C. Oestreich of Superior, L. Wendlandt, H. Oestreich of Superior, A. Fleer, E. Wendlandt, John Amundson, Fred Jacobs, Henry Jantzen of Superior, John Jensen, A. Sullivan, Peter Michaud.

• • •

Mr. and Mrs. Cheseborough of this city, Mrs. Mabel E. Robinson of Detroit and Miss Jane Jennings of Connecticut, formed a party that sailed Monday of this week from New York for a trip abroad. They will spend the spring and summer in Europe.

• • •

Miss Irene Whiting left during the week for a visit at Chicago, where she is the guest of Miss Elizabeth Gilbert.

• • •

Mr. and Mrs. Carroll Graff had as their guest during the week Miss Ethel Wentworth, formerly of this city.

• • •

Mr. and Mrs. Gibson L. Douglas, Jr., of East First street, returned during the week from a trip to New York.

• • •

During the week the engagement of Miss Nellie Westaway, daughter of Mr. and Mrs. Philip Westaway, and Robert T. F. Smith of Havre, Mont., was announced. The wedding will take place in the early spring.

• • •

Mrs. A. G. Holstrom, who was the guest of Mrs. J. M. Smith of 1517 East Superior street, returned the first of the week to her home at St. Paul.

• • •

Mrs. Haines, who was the guest of her nieces, the Misses Ely, of Fourteenth avenue east, returned the first of the week to her home at St. Paul.

• • •

Mrs. W. B. Whiton has as her guest her sister, Miss Nelson, of Stillwater.

• • •

Mr. and Mrs. E. H. Pugh returned during the week from a three-weeks' Southern trip.

• • •

Mr. and Mrs. Arthur T. Sayler returned during the week from Philadelphia, where they were married last week. They will be at home in this city.

• • •

The members of the Palestine assembly will entertain at the second in a series of dancing parties Tuesday evening of next week. The affair will be given at the ball room of the Masonic temple.

• • •

Mr. and Mrs. Harry Armstrong of East Fourth street left the first of the week for a ten days' trip to Chicago and Detroit.

• • •

Mrs. Henry Turrish and daughter, Miss Marie Turrish, left during the week for a trip to Florida.

• • •

Mr. and Mrs. M. J. McMartin returned the first of the week from their wedding trip to Chicago. They are at home at 5921 London Road.

• • •

Miss Vida Barrager, who was the guest of her sister, Mrs. Parker Paine, has returned to her home in New York.

• • •

Miss Harriet Shannon returned to Biwabik the first of the week after a few days' visit in the city.

• • •

Mr. and Mrs. W. F. O'Connel entertained at cards Monday evening at their home at the Osborne flats at the West end. Cinch was played at four tables, and the favors were won by Miss DuSell and Mrs. B. K. Walker, and the men's favors were won by Charles Hale and George C. Cowing.

• • •

An organization of the alumni of the Adams' grade school was formed Tuesday evening at a meeting of the graduates which was held at the home of Miss Myrtel Craig. At the meeting Oscar Helam presided, and seventy-five members present were most enthusiastic over the project. A constitution will be drawn up to be presented at the next meeting, by Neil Beaton. Clarence Rankin and Miss Myrtle Craig. The next meeting of the association will be held Tuesday evening of next week at the Adams school, and the election of officers will take place at that time.

• • •

Miss Margaret O'Neill was pleasantly surprised last Saturday evening at her home, 515 Second avenue east. The guests were:

Mesdames—
O'Neil, Teaks, Griffin, McNichol.

Misses—
Margaret O'Neil, Ida Baker, Erna Proech, Clara Stark, Jenna Sponnick, Laura Parker, Lizzie Dunlop, Anna Scholtz, Maude McNicol.

Messrs—

• • •

Mr. and Mrs. H. M. Peyton and Miss Alice Peyton left last Sunday for a three months' trip to Hot Springs, Ark., and the South.

• • •

Mr. and Mrs. F. A. Brewer are at Belleair, Florida for a few weeks.

• • •

Mr. and Mrs. George W. Buck left during the week for a month's visit at St. Augustine, Fla.

• • •

Mrs. Clinton Markell and Miss Markell left yesterday afternoon for a three months' trip in the South and East.

• • •

Mr. and Mrs. W. J. Olcott returned the first of the week from a short trip to New York.

• • •

Mrs. A. D. Thomson is visiting in Montreal for a few weeks.

• • •

Mr. and Mrs. J. B. Cotton returned during the week from a two weeks' visit in New York.

• • •

Mrs. Clinton Markell was hostess at luncheon last Saturday at her home, 325 East Second street. Jonquils were the table decorations and covers were laid for ten guests.

• • •

Mr. and Mrs. W. B. Silvey were hosts at dinner Thursday evening at the Spalding. Yellow jonquils and ferns formed a charming table decoration, and covers were laid for the following guests:

Messrs. and Mesdames—
E. P. Towne, William Dalrymple, D. G. Cutler, Morton Miller, H. T. Abbott.

Misses—
Markell, A. W. Taussig, White, Herbert Spencer.

• • •

Mrs. A. J. Beatty of Virginia is the guest of Mr. and Mrs. Dash of West Duluth.

• • •

Miss Blanche Getlell of Two Harbors was the guest during the week of her cousin, Miss Adelaide Hormann, of West Duluth.

• • •

Miss Minnie Watson of West Duluth returned during the week from a week's visit at Minneapolis.

• • •

Mrs. L. O. Ferguson, who was the guest of relatives at West Duluth, returned the first of the week to her home at St. Paul.

• • •

Mrs. Theresa Brophy, who has been the guest of Mr. and Mrs. Schuler of West Duluth for several weeks, left Thursday for the Twin Cities, where she will visit relatives before returning to her home at Fargo.

• • •

Mr. and Mrs. Charles Silger of West Duluth had as their guest during the week Fred Lindquist of Minneapolis.

• • •

Miss Bertha Haley of West Duluth returned during the week from a two-weeks' visit with her parents at Nashua, Ont.

• • •

Mr. and Mrs. Charles O. Applehagen of West Duluth returned during the week from a short visit at Chicago.

• • •

Mr. and Mrs. Abramson and daughter of West Duluth returned the first of the week from a two-weeks' visit at St. Paul.

• • •

Mrs. Fred Williams of West Duluth left Monday evening for a few days' visit with friends at Minneapolis.

• • •

Miss Alma Forsell was pleasantly surprised Friday afternoon at her home on East Fourth street. Games and music were the amusements of the afternoon, and the guests were:

Misses—
Alma Forsell, Bernice Rhodes, Hulda Soderbom, Rena Hector, Annis Sheehan, Salda Farrod.

Masters—
George Dremen, Everett Jesson, Almer Dahl, Charles Farrod, Victor McKenzie, Ray Drennen, John Drennen, Roy Lonegren.

• • •

Edward Nelson was the guest of honor at a surprise party last Saturday evening. The affair was given at the Swedish Bethany Lutheran church at Twenty-third avenue west and Third street, of which Mr. Nelson has been a deacon and trustee for several years. An address was given by Rev. Carl G. Olson, pastor of the church and a large number of guests were present.

• • •

Mr. and Mrs. Samuel Shields, who were the guests of friends at West Duluth, left the first of the week for their home at Hamilton, Ohio.

• • •

Mrs. John Erickson of Ross, Minn., is the guest of friends at West Duluth.

• • •

Mrs. Peter Kelley and son of the West end left during the week for a visit at St. Paul.

• • •

The wedding of Miss Anna Marion Sher and David Weinberg took place Tuesday at the old Masonic Temple. The service was read at 5 o'clock by Rabbi Teplitz. The bride was attended by Miss Ida Sher and Miss Rose Kaner and the groomsmen were Harry Weinberg and Frank Sher. The bride wore a dainty gown of white and carried bride's roses. The bridesmaids also wore white gowns and carried American beauty roses. After the ceremony a wedding supper was served and was followed by a large reception.

Among the out of town guests were: Mr. and Mrs. Shapiro, Miss Milevitz, D. Simon and E. Cohen of Eveleth; Mr. Liebermann of Grand Rapids; Mr. and Mrs. Sher of Ashland; J. Lewis and Mrs. B. Caren of Chisholm; Mr. and Mrs. M. M. Sher, Miss Cohen, Barney Cohen, I. Cohen and J. Cohen of Superior; Misses Bloom, Aarenson and Hurvits of St. Paul; C. Marcus of Fargo, N. D.; Mr. Harris of Chicago and Miss Jennie Markus of New York city.

• • •

Mrs. E. S. Olson of 426 Twenty-second avenue west entertained informally last Saturday afternoon at her home. The affair was in honor of the birth anniversary of the hostess and she was assisted by Mrs. E. O. Reppe. Those present were:

Mesdames—
Victor Juten, C. W. Lindstrom, L. Bjorn, A. Aronson, L. E. Melander, John Wallin, John Burke, O. B. Johnson, G. Carlson.

• • •

The members of the Women's Relief Corps were pleasantly entertained yesterday afternoon by Mrs. A. M. Gearhart at her home, 118 East Third street. Some interesting guessing games were the amusements of the afternoon and the favors were won by Mrs. J. T. Armstead, Mrs. F. E. Rankin and Mrs. Anderson. Twenty-five guests were present.

• • •

The members of the Women's Relief Corps will entertain at cards Tuesday afternoon of next week at their hall in the Rowley building. The hostesses for the afternoon will be Mrs. Rachael Ross, Mrs. W. M. Smith, Mrs. C. Rest, Mrs. C. Clark, Mrs. Lucken, Mrs. G. W. Gild and Mrs. J. W. Preston.

• • •

Mr. and Mrs. George W. Cooke entertained informally Tuesday evening at their home at Arnold in honor of their neice, Miss Ethel Carroll of Riverside park. Those present were:

Mr. and Mrs. E. B. Locke.

Misses—
Messrs—
Julia Nelson, Elfrieda Sandstedt, Melvina Parrell, Mollie Carlson, Rosa Ostby, Rosa Mishnerte, Ingvald Olsen, Irvin Frantz, Allen Carlson, Emil Farrell.

• • •

Miss Myrtle Glover entertained at a bundle shower Monday evening at her home at West Duluth in honor of Miss Annette Burns, who is to be one of the spring brides.

• • •

Mrs. Victor Frederickson, Mrs. Dennis Johnson and Miss Freda Lindberg entertained Thursday evening in honor of Miss Johnson who will leave soon for her home at Chicago.

• • •

Miss Ellen Skilund was pleasantly surprised Tuesday evening at her home, 413 North Twenty-first avenue west. The guests were in costume and a delightful evening was enjoyed.

• • •

Miss Lindgren of West Duluth, has returned from a trip to Chicago and New York.

• • •

Mr. and Mrs. Julius Benson of West Duluth, will leave soon for the West, where they will make their home.

• • •

Miss Myrtle Bushe of Carlton, is the guest of friends at West Duluth.

• • •

Mr. and Mrs. A. E. Gardner have returned from a three months' wedding trip in Southern California. They are the guest of Mrs. Gardner's parents, Mr. and Mrs. J. Ide of West Duluth, before leaving for Brandon, Can., where they will be at home.

• • •

Miss Mazel McFarlane entertained at a sleighride Thursday evening, the drive to Lester Park being enjoyed. The guests were:

Misses—
Adalia Oppel, Lottie McFarlane, Alice Pickthorn, Nellie Rooney, Elizabeth McFarlane, Goldy Martell, Eva Lewis, Annie Hoffman, Ellen Anderson, Dolleha McFarlane.

Messrs—
B. Schwieger, Frank Schweiger, Herman Haukins, Olsson, Sidney Erickson, Nelson, Fred Hoffman, George Lewis, Charles Lewis, D. Mc Farlane, Beatty, Herman Oppel, Albert Salvoy.

• • •

Mr. and Mrs. L. Fox issued invitations during the week for the wedding of their daughter, Miss Jennie Fox and Charles Harris, which will take place Sunday afternoon, March 17, at the old Masonic temple. The service will be read at 5 o'clock.

• • •

Mr. and Mrs. C. D. Jacobs returned during the week from St. Paul, where they were married Wednesday. They will be at home at 14 First avenue west.

CLUBS AND MUSICAL.

Club Calendar.

Monday: Twentieth Century club reception.
Y. W. C. A. Bible class.
Tuesday: Travel class of Twentieth Century club.
Musical lecture at Unitarian church.
Bishop's club.
Lester Park Literary club.
Wednesday: Art History classes.
Thursday: Morning Shakespeare class, and annual meeting of literature department of Twentieth Century club.
Saturday: Saturday club.

Art Lecture.

An interesting talk was given last evening at the club room of the library by Mrs. Robert Morris Seymour, who took as her subject "Democratic Art." The lecture was the last in the series arranged by the evening department of the Twentieth Century club. The lecture was of especial interest to a large number of club women because of the efforts of the Women's Council to further the work of the arts and crafts in Duluth and the vicinity. The development of the arts and crafts movement from the first meeting of the Democratic Art society in England in 1888 was spoken of and the work now carried on in various parts of this country was mentioned. The effect of this bringing of art to the people has resulted in a better appreciation of art as one of the fundamental things in the development of power and a constant increase of beauty in material things. Mrs. Seymour spoke especially of the value of art work that is carried on in the Duluth public school and hoped that the work in Duluth may result in the production of some sort of entirely characteristic handicraft.

Some interesting specimens of metal and woodwork and basketry were shown, some of it the work done at the Duluth normal school and two brass lanterns, the work of a Duluth student at the Ipswich summer school.

Club Social.

The spring reception, at which the members of the Lester Park Literary club entertained last evening at the home of Mr. and Mrs. W. J. Stevenson, was largely attended and was a most enjoyable affair. The rooms were prettily decorated in the flowers suggestive of spring, hyacinths and jonquils being used. Receiving with the host and hostess were Mrs. J. H. Norton and Rev. Gear and assisting about the parlors were Mrs. R. P. Boyington and Mrs. George McComber. In the dining room Mrs. Nelson presided and assisting were Mrs. L. A. Pong, Mrs. M. J. Luby and the Misses Dodge and May Oster.

An informal musical program added to the pleasure of the evening.

Club Reception.

One of the delightful club affairs of the spring will be the regular March social of the Twentieth Century club which will be held Monday afternoon at the home of Mrs. Henry C. Marshall of 2301 East Fifth street. During Mrs. Marshall's absence in Europe Mr. and Mrs. George S. Richards are at home at the Marshall residences. The afternoon will be in charge of the music and social committee of which Mrs. A. M. Gow and Mrs. Richards are chairmen. An exceptionally delightful afternoon is promised. "Folk music" will be the subject of the progress. A paper on the history of this early form will be read by Mrs. A. M. Gow, and musical interpretations will be given by Mrs. Percy Gough, Mrs. C. P. Craig, Mrs. Harry Strong and George Suttel. There will also be a reading by Prof. Lambert of the high school faculty. Following the program an informal reception will be held. The members of the club are cordially invited to be present.

Bishop's Club.

The regular meeting of the Bishop's club will be held Tuesday evening at the club rooms on West Fourth street, with Mrs. H. S. Ely as leader. The Bible lesson will be read by Mrs. C. Twohy and current events will be in charge of Miss Rose O'Brion. A paper on "The Inquisition Period in Spanish History," will be read by the leader and Bishop McGolrick will speak on the church of that period. During the evening there will be a piano solo by Robert H. Ely, a vocal solo from "Carmen" by Mrs. Leo Ball, and a reading by Mrs. W. A. Kaake.

Last Meeting of Year.

The last meeting of the year of the Morning Shakespeare class of the Twentieth Century club will be held Thursday morning of next week at the club room of the library. There will be readings by Miss Wylie, Miss Shesgren and Mrs. Mary Nelson to be followed by the annual meeting of the class. The annual meeting of the classes of the literature department of the club will also be held Thursday morning after the regular meeting and the officers of the department elected for the next club year. The literature department includes the Morning Shakespeare and Browning classes and the Literature class.

Liebling to Be Heard Here.

One of the interesting musical events of the spring will be a piano recital in April by Emil Liebling of Chicago. This interesting pianist, composer and lecturer will be heard with pleasure by a Duluth audience. Theodore Fossum, a pupil of Liebling is arranging for his appearance here. The date of the recital has not been announced.

In Original Company.

With the widespread discussion which the production of the Richard Strauss "Salome" has caused, as produced in New York, many Duluthians will be interested in knowing that in the original production of the opera in Berlin Mrs. Ottile Metzger Frortzheim, a sister of Otto Metzger of this city, was seen. Mrs. Frortzheim is a singer of the imperial opera of Berlin, and may visit this city during the summer of this year, the guest of her brother, who is well known in musical circles.

In the great original production of the opera in the German city it was the musical sensation of the year. The opinions on the opera differed widely, but it was not discontinued because of the scruples of the audiences or directors.

Lester Park Club.

The Lester Park Literary club will meet Tuesday afternoon of next week with Mrs. M. J. Luby of 625 Oneida street. The leader for the afternoon will be Mrs. W. S. Albertson, and the subject for study will be "Representative American Sculptors." In response to roll call quotations from John Ruskin will be given.

Travel Class.

The first regular meeting of the Travel Class of the Twentieth Century club for March will be held Tuesday afternoon at the club rooms of the library. The cruise of the Orient, which has been the study of this class, will be continued, and papers on "A Tourist in Cairo," "Alexandria" and "Early Traffic of the Mediterranean" will be read by Mrs. L. A. Larson and Mrs. J. E. Goodman. Any one interested in the program is invited to attend the meeting.

Lecture on "Tolstoi."

Rev. John W. Powell, Jr., will deliver a lecture on "Tolstoi" Wednesday evening, March 13, at the lecture rooms of the First Methodist church. The lecture will be given under the auspices of the Twentieth Century club.

BRIGHT AMERICAN GIRL WRITES OF TRIP ABROAD

Tells Interesting Story of Impressions of Old World.

Miss Adelaide Whiteside of Superior writes most interestingly of a recent trip abroad, and the impressions of the Old World upon a bright American girl will be of interest to many of her friends in this city and in Superior:

"I think one's impressions of a large, modern, foreign city, as with London, Paris or Berlin, is apt to be disappointing, for a person naturally has formed the idea of something quite different; not so modern, not so many familiar sights and customs. When you step out of the 'boat train' at Euston or Waterloo stations, you quite expect to find everyone, even the porters and cabbies, in some strange, unusual costume of other times.

"Of course you do not express such an idea, even to yourself, but over and beyond the natural interest and curiosity lies a vague sense of disappointment. This quickly fades, however, and when one is in the cab, driving to the hotel, there suddenly comes the most pleasant sensation—'Why, how natural! How like American cities!' Amid foreign people and customs, this feeling is, for a time, most comforting. We are glad that our first vague ideas of antiquity were not realized.

"I shall never forget the night I first entered Amsterdam! We had a dull, grey crossing from Queensboro; a hurried, perplexing rush after reaching Flushing, and when at last we were settled in our clean, comfortable little compartment in the train, en route to Amsterdam, it was too dark to see the windmills outside, which, with the avenues of tall, slim trees I knew from Hobbema, Cuyp, Terborg, etc., must be there.

"I was tired, disappointed and half sick, and slept most of the way, and when I found myself standing on the station platform, in the chill night air of Amsterdam, it was some minutes before I could quite realize it. It was very late, and there was a little difficulty in finding a cab, but finally we were rattling over the cobblestones and across viaducts of dear, quaint, old Amsterdam. I kept tight hold of my companion's arm all the way to the hotel, and neither of us spoke. She had seen it all before, but she sympathized with my very real pleasure, and knew that I did not wish to talk. It was all so truly wonderful to me—to be actually driving through Amsterdam—and everything was just as old and odd and quaint as I had imagined and longed for.

"And next morning—the reader can picture my delight when I rose and stood by the window, and looking across the canal saw, and indeed heard, two sturdy, starched, clean Dutch women beating a rug on the sidewalk, in front of a house! The rug did not lie on the walk—each woman held an end in one hand, and shook with the other hand. It was the one little thing needed to cap the climax of my joy. I had so often heard of the fierce war on dust and dirt in Holland, and now I could actually hear the women beating that rug, clear across the canal. They worked for dear life, and looked so very busy, so important—beating a rug out on the front walk—that I laughed aloud and woke my companion.

"And the following days! The visits to the stately old Rijiks museum, in which the night watch is accorded the place of honor; the modern gallery, the Delft shop, the drives through Amsterdam and the park. There was not one discordant note, for it was too early in the season for tourists, so we had, in a way, dear old Amsterdam to ourselves. And I shall never forget how, on our return to the hotel each night, I tried to find dust on the mantle, the window sill, etc., because I was assured I never would find dust in a Dutch hotel, and sure enough, there was never so much as a tiny speck.

"I am glad to say that we left Amsterdam in the day time, so that, from the window of our train compartment, I saw the windmills, avenues of trees and tulip beds galore. Truly my Holland! Not one thing had been otherwise than I had pictured it, and I had a deep sense of gratitude to those sturdy, stolid, unchanging Dutchmen who had kept the 'atmosphere' of their country as I had learned it long ago.

"We were bound for Antwerp! Another old dream of mine about to be realized. My companion had an important engagement in Brussels for the next day, so our plan was to send our luggage on through to Brussels and stop off at Antwerp, so we might visit the cathedral, where I wanted to see, not only that wonderful edifice itself, but Rubens' 'Descent from the Cross.' I felt that I must see these, at any rate, and if we did not come to Antwerp again, the gallery might be passed by—but not the Cathedral and the great picture.

"As our train slowly entered Antwerp, I was almost faint from excitement. I could not keep quiet, but went from one side of the train to the other, looking out of each window in turn, trying to locate the cathedral spire. 'Can you see it? Where is it? Oh, do try to find it for me,' I would eagerly inquire of my companion. She was very sympathetic, and very good natured, and, I believe, caught my enthusiasm. It had been several years since she had been in Antwerp, consequently she had forgotten much, but we finally located what we thought to be the cathedral spire—then my eyes never left it till the train went around a curve which lost us our spire.

"If we should not be in time before the cathedral closes for the day, I thought, but would not allow myself to utter such disastrous doubt.

"It was all very confusing when we alighted from the train at the busy station, and as neither of us spoke intelligent French, I, at least, was quite bewildered when the many excitable little station porters gathered about us asking, 'Grand baggage, madame?'

"How pleasant and friendly, how wonderfully beautifully tall and clean and protective, how comfortable looked the big porter from the Hotel St. Antoine and when he came up to us with that cordial smile of welcome which only a Continental porter can bestow on two bewildered, forlorn, Americans, and said to my companion, 'Will madame go to the Hotel Antoine? Has madame any large luggage?'

"He took us under his ample protection—dear man!—and put us into the hotel bus, and right away, out of our relief, our spirits soared high again, and I realized that here I was at Antwerp at last, and in a short time might be standing before the wonderful 'Descent from the Cross.'

"But, alas! the head porter of the hotel told us that the Cathedral always closed at 4 o'clock, and it was then twenty minutes past the time—too late even to see the gallery properly. We were hungry, so the head waiter took us back to a little court, at the rear, where we could sit out in the air, at one of the many little tables circling the court all around the sides of the building. My friend looked around at the flowers and palms, the easy little tables, the cool, paved court, and exclaimed:

"'Well, I wish we had decided to spend Sunday here! We will go over to Brussels tonight, and come back again tomorrow, have lunch here, see the Cathedral, gallery and all—so there, now! I will just put off that engagement. I had forgotten this delightful hotel, and this delightful town, and you shan't miss so much pleasure, and I'll enjoy it all over again.'

"I leaned over the table and squeezed her hand. At that moment I thought her, next to our big, clean porter, the most delightful soul I had ever known. You see, she was older than I, had been abroad before, and was, by common consent, director of our travels. There are trains running nearly every hour between Brussels and Antwerp, so the plan she suggested was easy of accomplishment. But, let me say, that before we left Antwerp that evening, we had walked all around and around the Cathedral, silently adoring it.

"Next morning, 10 o'clock, found us again in Antwerp, and as it was a fine, warm, sunshiny day, we decided to walk up to the hotel. It being Sunday, my surprise can be imagined when we found all the shops open, and the people gally dressed, happy, laughing people—shopping as on week days. This, it seems is customary in Belgium. We had more the impression of its being a holiday than Sunday, for people wore an extra festive air, hurdy-gurdys were doing duty on every corner; street singers in quaint, fanciful dress, were in time with the hurdy-gurdys, and everywhere flowers were being bought and sold in great quantities. The dignified old hotel porter at the hotel informed us that it was a 'fete day'—some Catholic feast day—and he also told us that there would be an extra service at the Cathedral, very solemn and impressive, and an especially fine choir that day.

"Well, very solemn and impressive I found it, kneeling on a priedieu in the old cathedral, and directly facing Reubens' masterpiece. All through the beautiful service I looked at that wonderful, realistic figure of the dead Christ, being, oh so gently and reverently lowered from the cross into the loving arms beneath, and the magnificent melody thrilled through the cathedral in waves of golden harmony, tender, glorious!

"I came out into the sunshine again, deeply, solemnly, profoundly happy. That was the real experience of my life, and nothing before or since produced such a striking and lasting impression.

"We went back to Brussels, but Brussels was spoiled for me. Though a beautiful city, it looked too new. Of course I enjoyed our drive through the Bois de la Cambre, which I think is even more beautiful than the famous Bois de Bologne; but as to the city itself—the quaint charm of Antwerp was over me, and is yet. We went to Paris, were very gay, went to the opera, drove in the Bois, dined under the trees at d'Armenonville, breakfasted on the veranda of the Jardin d'Acclimatation, supped at Maxim's, went to Les Ambassadens, Marignys, came home under the trees and stars in the Champs Elysees, stopping at the Taverne Royale for a bottle of wine, had our 'Sole a la Marguery' at that famous restaurant, lunched at funny little places in the Latin quarter, went to fetes in the Bois, lived over her life with Marie Antoinette at Versailles, fed the carp at Fontainbleau, drove through the magnificent forest there, saluted Napoleon at Les Invalides, dropped some flowers for Abelard and Heloise at Peres les Chaises, dreamed in the Tuileries, went through the wonderful Louvre, had our 'aperitif' sitting out on the sidewalk in front of a cafe, bought gloves and hats in the Rue de la Paix, saw the exquisite paintings and statues in the Luxembourg, recalled our friendship with Corot and Millet at Barbizon—in short, had a typical Paris visit, but I looked back to the Sunday in the cathedral at Antwerp."

ORIGINAL SALOME PRODUTION.
Sister of Otto Metzger Seen at Right Shoulder of Leader.

Do Not Crowd the Season.

The first warm days of spring bring with them a desire to get out and enjoy the exhilirating air and sunshine. Children that have been housed up all winter are brought out and you wonder where they all come from. The heavy winter clothing is thrown aside and many shed their flannels. Then a cold wave comes and people say that grip is epidemic. Colds at this season are even more dangerous than in midwinter, there is much danger of pneumonia. Take Chamberlain's Cough Remedy, however, and you will have nothing to fear. It always cures, and we have never known a cold to result in pneumonia when it was used. It is pleasant and safe to take. Children like it. For sale by all druggists.

ONE FROM LEW DOCKSTADER.

New York Mail: In his dressing room at the New York theater, Lew Dockstader swore to the truth of this tale of the road:

"The failure of two freight trains to pass on a single track, last month, resulted in a smashup which made my minstrels lose a night, and remain tied up for hours at a little water tank town in Indiana.

"To beguile the tedium of a delay, they attended a matinee of a two-day popular-price repertoire company at the Academy of Music, across from the depot.

"A hand-painted poster in front of the place announced, 'The Grave Burst; or, the Ghost's Piteous Tale of Horror.' The minstrels, who seldom get to see a show, were all anxious to know what it could be like. To our amazement we found ourselves witnessing a much-mutilated version of 'Hamlet,' butchered by a cast cut to five.

"The manager, an unlettered, but courteous and cordial person, came in to exchange professional greetings, after the first act, and I ventured to inquire why he had altered the title.

"'Well, you see, it's this way,' he whispered confidentially, 'we can't afford to pay royalties, and, since all this row about play pirates, I don't mean to take no chances on infringement of copyright.'"

It is Sea Food Time at

The Spalding AND Hotel Superior Cafes

Excellent a la carte service at reasonable prices.

Smart Parisian Wrap.

The stunning new style afternoon or carriage coat that has found so much favor in Paris will probably be popular here this spring, for the model is made on simple but graceful lines that are becoming alike to both slender and stout women.

Such a garment as this illustration, taken from La Coquet, would be particularly effective if made of a light colored material and trimmed with medallions of braid or cord and tassels.

Loosely made as this cloak is, it is especially well adapted for evening wear, because it will fit easily over elaborate gowns, and will not muss or disarrange delicate flounces, ruffles, etc.

The sleeve falling over the elbow and away from the lower part of the arm give an unusual appearance to the wrap and heighten the simplicity of the lines on which the garment is fashioned.

As to a lining for this coat, any light colored silk will be pretty and in harmony.

Smart Striped Coats For Spring.

MANNISH SPRING COAT. FROM THE "QUEENS"

The new spring coats have remarkably full skirts and smart, tight-fitting sleeves that give a mannish appearance that will make them particular favorites with young college women and those who go in for motoring, golf and other outdoor sports.

The skirt is on graceful lines, though it is exceptionally wide, and the Talma fashioned sleeves have large armholes that are comfortable and convenient for wear over sheer evening frocks, or elaborate afternoon gowns. Such a coat, in plain cloth of striped or checked design, is stunning.

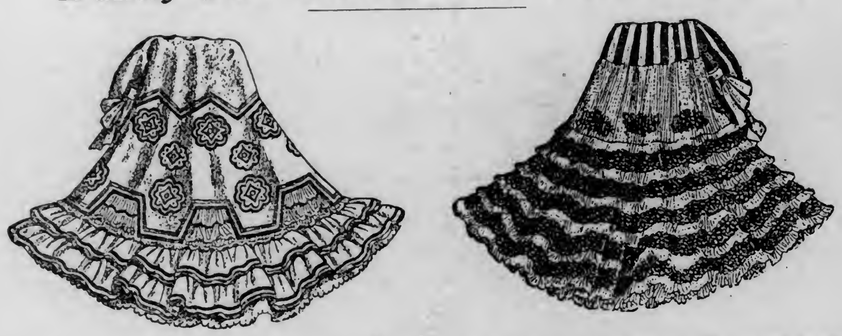
Smart Velvet Princess Gown.

This stunning modified princess model in black velvet makes a most effective reception or carriage gown, and to the average slender woman will be becoming, because of the graceful lines of both skirt and waist. With the exception of a panel that drops from the bodice down the front of the skirt, the latter is absolutely plain, and being of velvet, is decidedly rich looking.

The bodice is almost severe, for it fits close to the body, being plain in the back, and is brought down in a "V" shape from the shoulders to the top of the corsage, where it is fastened with a large gold or silver buckle. Fashioned in this way the frock may be worn with a lace collar and plastron, or with the neck bare.

As a finish to the "V" an edging of lace with four or five small buttons may be used. The sleeves—elbow length—are full puffs with a narrow band of velvet that fits closely around the arm. A ruffle of lace attached to this band gives a pretty touch. Illustration from La Coquet.

Dainty Silk Underskirts for Street Use.



Underskirts for spring wear will be more elaborate than those that have been so popular during the winter season, and because of the lingerie, lace and embroidery trimmings, will doubtless be quite as much in favor for use with afternoon frocks, and with evening gowns.

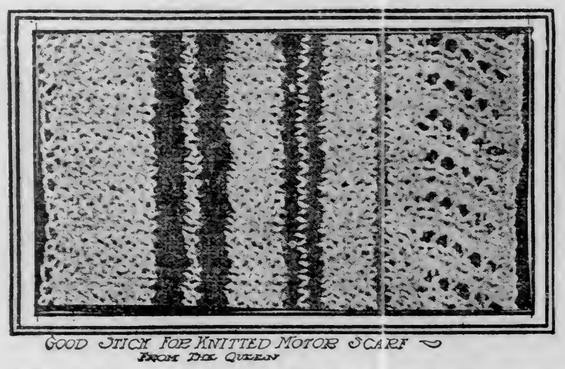
Like the models that are now generally worn, because they fit the figure closely and give to the outside skirt the proper set, these 1907 designs are plain and fit snugly around the waist and over the hips. There is no ornamentation on these pattern petticoats above the line of the knees, but below that point they are almost too fussy, decorated, as most of them are with narrow ruffles of lace edged with velvet or ribbon, or trimmed with motifs of lace set on medallion-like at artistic intervals.

Small ruchings of chiffon are also effectively used and add materially to the fluffiness of even an elaborately decorated skirt.

In this illustration, taken from L'Art de la Mode, one petticoat is of striped silk and plain to the knee line. Below the knees there is a lace border put on plain, and on it are medallions—flower-like—in black net. At the bottom edge of this border there are a series of six ruchings of black silk that alternate with plain bands of white silk, making a strikingly pretty underskirt for street or house wear.

The other model shown is also tight-fitting and plain to the knees, with the lower portion effectively trimmed with embroidered motifs of conventionalized roses placed on an imitation flounce, that silk that is given a fancy finish by an edging of ribbon or velvet stitched in points at the top and in squares at the bottom. Between these squares there are chiffon flounces, and beneath these two narrow dust ruffles of silk.

Silk or Wool Comfortable.



GOOD STICH FOR KNITTED MOTOR SCARF FROM DIX QUEEN

The following directions for the now almost indispensable motor scarf (or comfortable for use in a bedroom) may be worked out either in silk, lustrine thread or soft wool. One is shown entirely worked; of the others only small sections are illustrated, but these are sufficient to show the pattern of the stitches.

Motor Scarf in Knitting.

Materials—Six to seven ounces of Shetland wool and a pair of long steel knitting needles, No. 11. If silk is preferred, about seven ounces would be required and a pair of long steel needles, Nos. 14 or 15, and enough stitches should be cast on for one or two more stripes. Lustrine knitting thread would work out about the same. In wool cast on 122 stitches; knit four rows plain. Now begin the pattern, which consists of four rows, each beginning and ending with four plain knit stitches. First row of pattern—knit four plain, make one by putting the wool over the needle, knit two together, repeat six times more, knit six plain and repeat throughout the row, ending wit hfour plain. Second row—four plain, purl to within four stitches of the end, four plain. Third row—four plain, knit two together, make one by putting the wool over the needle, repeat six times more, knit six plain and repeat, ending with four plain. Fourth row—as second. This makes a scarf fourteen inches wide, in wool, and more stripes may be added, twenty stitches being cast on for each. Finish each end with a fringe made as follows: Cut the wool into six or eight-inch lengths, double each length and draw it through the edge of the muffler, into one stitch, and draw the ends of the strand through the loop thus made and secure them firmly. When a strand has been worked in this manner into each stitch all along, knot the ends together in groups of four, as you would knot the ends of a towel.

Crochet Scarf.

A crochet scarf is very quickly worked and most effective. The same materials are required as for the knitted scarf above, but a fine bone or ivory crochet hook will be substituted for the knitting needles. As no two workers crochet alike, it is best for each worker to experiment by working a few rows with different hooks, to see which suits her working, but always, of course, a fine hook must be used.

Make a chain measuring fifteen inches across and work on it in rows. The stitch is a loose variety of double crochet. Put the silk over the hook, then take up one chain and draw the silk through; silk over the hook again and draw through all three stitches on the needle. Work three stitches in this manner on 3 chain; in the fourth chain work three stitches, then three into the 3 chain following (one stitch into each); miss 1 chain and repeat from *, miss 1 chain and again repeat, continuing to the end of the row. Turn with 3 chain and miss the first stitch; work one on each of the next three, taking up the back loops only, three into the next stitch, then three into the next three (one stitch in each), miss 2 and repeat the last row throughout.

A Knitted Scarf With Striped Ends.

Materials as for the first knitted scarf, with one ounce of the color. Cast on 129 stitches in white and work twenty rows, each row beginning with two plain, two purl, continuing thus throughout and ending with one plain. Then join the color and work one plain row. Then three ribbing rows. Join the white again and work one plain row, one ribbing row. With color, one plain row, three ribbing rows. With white, one plain row, sixteen ribbing rows. With color, one plain and one ribbing row. With white, one plain row; with color, one plain and one ribbing row. White, one plain row, twelve ribbing rows. Color, one plain row; white, one plain and eight ribbing rows. This finishes the end. Then begin the pattern of scarf in white as follows: Four plain stitches at each end, always. Make one, knit two together, knit one, repeat throughout, except the four end stitches. Second row—four plain, purl throughout, to within four of the end, knit these four plain. At the other end reverse the striping, beginning with eight ribbing rows and working backward to the beginning of the directions.

Fur Motor Coats, Leather Lined, Best for Warmth.

By A. T. ASHMORE.

There are not many persons sufficiently keen about automobiling to indulge in it at this time of year, but those few who do enjoy the sport because they are sufficiently wrapped up to withstand the cold. Beyond a certain point it is practically impossible to keep out a fierce wind, but it is worth while to reach that point by enveloping oneself in multitudinous leather and fur garments. Fur is the best non-conductor of cold and leather comes next, so that leather cloaks lined with fur make excellent motor wrap for midwinter. A heavy fur coat is generally warmer than anything else, but even such a garment depends a great deal upon its interlining for warmth, and leather now lines many of the motor wraps.

Any winter cloak may be purchased now for little or nothing, in comparison with the original price, and for automobiling warm wraps will be necessary for some while after cold weather clothing has been discarded, so there is no use of trying to "get along" for the rest of the season with outer garments that are not sufficiently warm. Next to fur coats the imported motor cloaks are the best investment for the sport. These have been carried even further in France than in this country, and we must get from Paris the most serviceable hints in the details of automobile dress.

The shaggy bear and ponyskin coats are excellent for automobiling and just now are astonishingly inexpensive. It is well to put a little cap in the cuff and, bound with elastic, this will keep out any wind that might possibly sift through the fur at the wrist. The wide, long fur collars that can be turned up over the ears, if necessary, are really better for automobiling than narrow stoles that fit closer about the throat but do not cover so much of the neck. A bearskin cloak is necessarily very heavy, but all the same the longer it is the better, and many reach to within a few inches of the ground.

A fur wrap should really be large enough to fit over another cloth jacket and then there will be no difficulty in wearing a light sweater underneath the short wrap. In theory, it may seem absurd to wear so many outer coverings at one time, but practice proves that it is all well worth while and the more coats worn the more keen will be the enjoyment of the motorist.

In spite of having to bundle up to such an extent it is not necessary for a motor costume to be so hideously unbecoming as many people think, for the long leather cloaks are cut with some reference to the figure, and the hat—upon which so much always depends—should be of a becoming shape. Indeed, the litle motor toques in fur are most attractive, and even the ear tabs, which can be used or tied up over the hat, are by no means unattractive. On this style of headgear the desired number of veils fit comfortably, but the shape of the present small bonnet requires less outside help to remain fastened on firmly than any models yet discovered. There is generally a wide fur collar to the coat, and this often reaches up to the hat in back, so that a silk hood may be dispensed with.

The gloves and fur-lined boots are of primary importance, for if the hands or feet are once allowed to become cold all pleasure is gone. Fur or fur-lined gauntlets are the best or else Angora woolen mitts may be used over a pair of heavy and lose kid gloves. Carriage boots lined with fleece or fur, worn over comfortably loose slippers, will serve the purpose if one does not care to purchase regular automobile boots, but these shoes must fasten well about the ankles and should come up fairly high on the leg.

GERMS AS HIRED MEN.

The farmer emptied a white powder into a pail of water, and added thereto a tiny wad of cotton.

"I'm getting ready to vaccinate my land for the spring," he said. "This is the virus. The government gives me the virus for nothing, and the vaccination increases my crops from 50 to 300 per cent."

Stirring the fluid, he went on:

"Dr. G. T. Moore, of the Department of Agriculture, is the inventor of soil vaccination. Thanks to him, you can fertilize for 4 cents as much soil as $40 worth of nitrate would cover.

"You see, the thing that fertilizes soil is nitrogen. Well, there is a lot of nitrogen in the air—seven-tenths of the air is nitrogen. And Dr. Moore has bred a germ, a little living germ, that all its life long works like a Rockefeller at extracting this nitrogen from the air and storing it in the soil around it.

"This germ is what I vaccinate my land with. This germ, put in my soil, toils day and night—a fine little hired man. To it the air, the free air we breath, is a perfect guano bed, and from that guano bed I draw all the profits.

"And the result? Well, a potato field yielded 50 per cent more potatoes after vaccination; an oat field yielded 300 per cent more oats; a wheat field yielded 52 per cent more wheat; a rye field yielded 400 per cent more rye."

Suspender and Bib Frocks To Be Worn by Small Girls.

By ELIZABETH LEE.

The one-piece style of frock is as popular as ever this year, and the new models for spring wear in soft woolen goods as well as school frocks in wash materials are largely on this order. The smaller girls will adopt the Russian and Norfolk styles, the elder ones leaning toward the Empire and princess fashions.

Suspender or bib frocks belong to girls of all ages, and certainly they are the most practical and convenient models ever brought out, as a short length will often answer for a frock of this description that could not possibly be used in any other way, and again changing the guimpe as often as needed is a decided advantage when the wearer is quite youthful.

A smart little school dress for a girl of 10 is of brilliantine, with small white polka dots on a navy blue ground. It is cut with a quadruple box pleat back and front, supported by a short yoke cut into small square tabs on the outer edge, groups of small smoked pearl buttons holding down the tabs, the sleeves bishops, pleated at the wrist to form cuffs, finished with a band buttoned around the arm. The belt is of very dark red kid and the collar of white linen turned down, with a tie of soft black satin. Few children's style could surpass this for smartness and practicability, especially at the price.

A modified princess gown becoming to the average girl of 15 or older is fashioned from henrietta, and is laid in three very deep side pleats from the shoulders, both back and front, tapering as they reach the waist where they are stitched only for the short space of about five inches, two above and three below the waist line. Under the arm the fit is quite smooth by means of the seam there. The skirt is absolutely untrimmed, the deep side pleats suggesting a kilted skirt. A small pointed yoke of pintucked bronze glace silk is added, held in with a band of ecru lace threaded with pale green velvet, although a strip of colored embroidery may be substituted if there is such a remnant on hand.

The sleeves are bishop, ending with silk cuffs. This style of frock would suit almost any figure, whether slender or plump, so that those of either type who admire the princess but hesitate to adopt it might like to make the attempt with this model.

Few plain skirts are seen this season, so that a good plan of bringing last year's full circular up to date would be to form box pleats, beginning with nothing just below the line of the hips and increasing the tucks as they descend, ending about knee length, when they are allowed to flare. If the width of the skirt is insufficient for this treatment, then form inverted box pleats down center front, the back and over hips respectively, and the result will be distinctly modish.

Girls who like to embroider will find the daintiest materials and prettiest designs in the stores just now. The yokes for nightdresses that slip over the head are so fine and sheer, while the work is as simple as possible, just running vines and a button-holed edge. The nightdress proper, too, means very little work, as it is gathered full and added to the yoke, Empire fashion. Quite fine lawn stamped for a hat may be bought as low as 25 cents. corset covers, chemise tops, waists and parasol covers being proportionately more. A parasol cover stamped in a very pretty design on a good quality of linen in some of the shops is marked at 75 cents, while a really fine handkerchief linen waist costs only $1.25.

The new ribbons for hat trimmings are wonderfully soft and lustrous and the droopy brimmed hats are arranged with stiff ruchings (gathered as tightly as possible) of two colors, placed on the hat of a third color. For instance, a dark though glossy green ribbon and one of periwinkle blue might trim effectively a hat of gray, the ruching set around the crown and finished under a stiff bow on the left side.

MANY GLASS "GEMS" SOLD.

Warnings are being sent out by importers of precious stones to wholesale and retail jewelers to beware of glass imitations of rubies, emeralds and sapphires that have been sold in large quantities in the last week or two to dealers by a French vender who designated the articles as reconstructed stones. It is said some of the imitations have already been sold under the same name to holiday buyers, says the New York Herald.

Importers regard the sale of glass imitations for reconstructed stones as a fraud as great as the sale of reconstructed stones as natural gems.

This Frenchman obtained from retail jewelers prices fully one hundred times as high as he would have got if they had known they were buying glass. He sold his glass imitations in other cities of this country before offering them in Maiden lane, which he did several days ago. The imitation was discerned in a lapidary house, and to entrap the vender he was told that a large order would be given to him if he would give a written guarantee that the stones were reconstructed. This he refused to do. Other dealers were notified, and the man packed up his stock and sailed for Paris.

Importers regard the sale of glass imitendency on the part of unscrupulous dealers to use words such as "reconstructed," "synthetic" and "scientific" to get high prices for cheap imitations. The distinctions between the natural, artificial and imitation stones are defined by law in France, and men in the wholesale district have begun an agitation to bring about similarly clear ideas in this country.

Authorities in Maiden lane say rubies are the only precious stones that are produced artificially for the market. M. D. Rothschild, who has written works on precious stones, say few if any reconstructed rubies—meaning stones made of small natural stones—are now made, and that they have been superseded by a finer imitation, the "scientific" ruby, produced of aluminum and chromium mixed in a crucible. The "synthetic" ruby differs from the "scientific" chiefly in crystallizing in true ruby form, but it is seldom made, because the process is costly.

WINTER MILLINERY

ENTIRE SABLE SKINS ARE CLEVERLY USED.

WHITE VELVET WHITE PLUMES AND ERMINE.

SABLE TAILS TRIM PALE BLUE FELT

A MOTOR CAP IN BEAVER

The Fetching Fur Hat Leads—The Velvet Hat is Much Beplumed—Sable and Mink Toques—Beguins in Ermine *and* Chinchilla—Furs and the Milliner.

While those models that were imported earlier in the season showed a fine disregard for the fact that they were intended for winter wear, their later successors impress this fact emphatically upon all beholders.

She who would be considered modish in milliinery today must show some touch of fur, however slight it may be, upon her hat; and when the chapeau is altogether of fur—some costly pelt for preference—then the extreme of the fashion is reached and represented.

The all-saving art of the furrier finds, perhaps, its best expression where the hats of the season are concerned. It does seem rather more than a trifle extravagant to employ whole sable and entire ermine skins for millinery purposes; but when one calls to mind the fact that those expensive little pelts are employed whole, that the skin is not cut into in any way whatsoever, and that its ultimate destiny in the scheme of things fashionable is not affected in the least by its present uses, then there does seem to be some method, commendable method, in the apparent madness of extravagance after all.

One thing must be marked at the start; and that is, that cheap or poor pelts find no acceptance whatsoever at the milliner's hands. If there is any place where a poor or cheap pelt is seen to the uttermost disadvantage, it is upon a hat; for there it is posed in all its nakedness and imperfections to the gaze of a critical public. There are no charitable folds and tucks and revers to hide its shortcomings. It is seen for what it is and there is no hiding it. Where furs are concerned, the old adage anent "The best of its kind, or none at all," applies with peculiar force to the season's fashionable hats; and the vain effort that some women make to keep up with the extreme style, in spite of the fact that their purse is of slender capacity, would better be abandoned altogether, when furs of the first quality cannot be indulged in.

As for the imitation furs, those dyed and blended monstrosities which deceive nobody but the ignorant, they would better be forgotten altogether and the money which they cost be devoted to better things.

Small and close-fitting shapes are mostly favored when the chapeau is to be altogether of fur. The toque and the turban that, approach the torpedo and the Spanish shapes, respectively, are mostly in evidence, with the addition of a rosette or chou of velvet, the animal head or a paradise or ostrich plume for trimming, as the case may be.

Where the chapeau is not altogether of fur there is evident a vast liking for furry trimmings. A band of sable or ermine is far and away the smartest just now, and velvet flowers are in big vogue. One sees dahlias, morning-glories, pansies, loose petaled roses and orchids in several tones of color adorning expensive examples of the milliner's art; and the best of those combine mousseline de soie with the velvet to a delightful extent.

White and pale tinted felts are in high esteem, and there is assuredly a dressy appearance to even the least expensive or elaborate of these that must undoubtedly commend them to the fastidious, as those furs and furry trimmings take on an added attractiveness, and rather large shapes are to be preferred to small ones.

Sometime ago this scribe hinted that the Charlotte Corday shape, which had such a brief run a couple of seasons ago, would surely be revived this year; and some of the most fetching effects in millinery follow this historical shape. With the trend of shape running from back to front—or vice versa—and with the sides of the hat drawn close to the head, this Charlotte Corday chapeau is one of the best and most universally becoming of the recent models.

Little perky sailor shapes, too, are much liked for the younger section of society, and one sees those developed in many of the short-haired furs. Sealskin, mole, caracul and chinchilla are used for those, and yards upon yards of malinette go to their trimming.

There is a great deal of uncut velvet used this year in smart millinery, a fabric that, except for its mourning uses, has been but little heard of for sometime past. There is a quiet elegance about this expensive goods that will appeal to those of conservative tastes.

Moire silk, and moire velvet, too, are making themselves felt in the scheme of things; and real laces, handsome buckles, and even large buttons, are relied upon to help out the extreme of elaboration that is approved of so highly.

The beguin is the latest aspirant for fashionable favor in Paris. This is about the smallest type of toque that has ever presented itself, and really seems more like an apology for a hat rather than an actual hat itself. Originally introduced as a theater toque, it has taken such a hold upon the affections of the elegantes that it has obtruded itself everywhere, until now one sees it almost as much worn with a short morning tailor-made as with the most elaborate evening toilette.

In its most attractive presentation the beguin is composed of a tiny crown in fur or velvet, this presenting a puffy, crushed appearance, the material being lightly and loosely tacked to the crown foundation beneath. There is a scant apology for a brim or rim around this, upon which there is no end of elaboration lavished, and the needed note of character is supplied in a plume—ostrich, marabout or paradise—that stands boldly upright on the left side, and gives height and smartness to what would otherwise be a very flat affair, indeed.

So far there have not appeared any of those huge cartwheel affairs that have passed for picture hats in the times gone by. All of what the milliner terms large hats are decidedly moderate dimensions, compared with some that have been shown in other seasons; and the exaggerated effects in coiffure that were wont to accompany such chapeaux are luckily also things of the past.

Some extremely pretty hats are on view in which the crown is covered altogether with roses of delicate tint, albeit many of them are of colorings that nature does not present. They usually match the brim in hue, and the flowers are deftly veiled with a single thickness of white or tinted malinette, a device that adds much to the beauty of the chapeau, and aids also in keeping the delicate blossoms fresh and dainty, since the malinette is an altogether waterproof affair and guaranteed to withstand fog and dampness admirably, and so forms an adequate protection for the flowers.

Flowers and foliage in tinsel effects are finding quite a following, and some of the prettiest chapeaux show those in combination with velvet ribbon rosettes.

Huge Napoleon rosettes, too, are made from cloth of gold and cloth of silver (or tissu d'or and tissu d'argent, as they are more correctly termed abroad). For the center of those some of the cleverest milliners are taking big beaded buttons, wooden molds covered with the beading that is characteristic of our native Indian work, and which make for a really stunning effect when well selected. They are not by any means cheap, those big buttons; for the beading has all to be done by hand, and that is a slow and expensive process nowadays, when the expenditure of time means the expenditure of money likewise, and that in a goodly quantity, too.

A whirling dervish of Constantinople is famous throughout Turkey as the possessor of the most wonderful wig in the world. With a beard stained a fiery red he wears a flame-colored conical hat, from beneath which flows multicolored masses of wavy hair which once belonged to his wives. The proud possessor of the wig boasts that he wears upon his head the locks of no fewer than seven ladies, each of whom for a few short years called him "husband."

The Hat *and* the Hair.

Some Remarks Anent the One *and* the Other—*The* Successful Chapeau *and* the Becoming Coiffure—Burnished Locks—Their Attainment *and* Their Keeping.

One cannot very well take up the consideration of the winter's millinery without at the same time giving some little attention to the question of coiffure and chevelure as well.

In seasons past the milliner has been vexed to produce chapeaux that would consort equally well with widely varying types of coiffure; and the woman who dressed her locks after the demure Madonna manner found it well-nigh impossible to find a hat in ready-to-wear stock to meet her needs. Some few small toques and turbans she might light upon if she were lucky, but as for anything in a dress hat, well, that had to be specially designed for the wearer, the milliner was wont to declare with a long-drawn sigh.

She was having her troubles just then, the milliner, and a frown on her brow instantly made its appearance when a woman with her hair parted in the center presented herself as a would-be purchaser of one or more hats.

However, the matter has settled itself in the new shapes, as it was bound to do sooner or later. One can find a chapeau to set well on any sort, size or shade of chevelure, and since that is so easy, the woman who prides herself on being well dressed may well save that task to the milliner and devote herself to the care and cultivation of her own burnished locks.

"Tis the hair, and not the hat, that makes a woman look beautiful," announces a French authority upon female beauty. One can have many hats, but the chevelure that nature grants must last one throughout a lifetime. Its care then becomes second only to that of the skin and complexion, and well merits far more time and attention than are often bestowed upon it.

The average woman seems more afraid of fresh air than anything else, where her hair is concerned. The traditional hundred strokes of the hairbrush at bed time is more often honored in the omission than in the commission; and the closely coiled coiffure of the day is succeeded by a tight braid at night, so that the scalp and the length of the hair get but little chance for an airing, and seldom or never at all get a chance for a full sunning.

A celebrated Parisian capillurgist recommends his clients to wear the hair in the house and garden "en jeune fille," that is in one or two braids, loosely plaited and hanging down the back for their full length, a ribbon bow tieing them at the bottom. This permits the air to reach both the scalp and the hair at once, and so makes for a far more healthy condition of both.

One old lady, a daughter of the Southland by birth, rejoices in a luxuriant head of hair, snow white, and well below her knees, although she has long passed the biblical limit of three score and ten. Her numerous grandchildren have all of them scanty hair, and grandma is frequently consulted as to the whys and wherefores of this lack of hirsute adornment on the part of her descendants.

"It is all just a little care, dears," she tells them. "Just a little care and attention now and again, but the secret is that I keep everlastingly at it; that's all!" she added smiling.

"You all of you remember the stories I have told you of Aunt Arminda, my old mammy. Well, if there were any secrets of the toilette that she did not know I rather reckon they were hardly worth knowing at all. When I was given into her arms, a little tiny, wee baby, she used to declare that she began to cultivate my hair and complexion right away. Anyhow, I had long curls when I was four years old, but I never could get any of my own girls' hair to grow just like that. However, when I went away to boarding school Mammy Arminda made me promise that I would make 100 strokes of the hairbrush each side of the parting every night, having first rubbed the entire scalp well with the finger tips for a full five minutes by the clock, and after the brushing to fan the whole head and the length of the hair with a palm leaf fan for another five minutes.

"Then I had to take an old silk handkerchief of my father's and rub the scalp and the hair with this thoroughly, this being to give the burnished appearance to the hair that the novelists of those days were so fond of describing. Somehow or other there was supposed to be some especial efficacy in a handkerchief upon which soap or blueing had not been used; so a new one was always included in my outfit after each vacation. Then after all of this I had to shake the hair out thoroughly, and finally slip on a little China silk night cap, just like the big dusting caps of today, which slipped on with an elastic band in the casing all around, and kept my long hair from tangling and snarling on the pillow. It took me a half hour every night to attend to my hair, and it takes me that time still. But I think it pays, my dears; I think it pays."

The finest shops in a Chinese city are those devoted to the sale of coffins.

The last surviving Mayflower passenger was Mary Allerton, daughter of John Allerton. She died in 1600. A sister of hers was named Remember. She died several years prior to Mary's demise.

There are more theaters in proportion to its population in Italy than anywhere else in the world.

Eight churches have stood on the site of St. Paul's Cathedral, London. The first one was built in the year 223.

Did You Know

That where a bodkin is not handy a safety pin makes an admirable substitute? Catch the tape or ribbon that is to be run through on the pin, fasten it in the usual fashion and then use the blunt end of the safety pin to carry the ribbon through the casing or beading. This is far ahead of the usual makeshift of a bent and twisted hairpin, the pointed ends of which are always catching in the material while in transit through the casing, and a large safety pin is usually at hand, at least almost as frequently as a hairpin is.

That alcohol is far better for cleaning purposes, where one's clothes are concerned, than ammonia? For cleaning hats, alcohol and water, equal parts, applied with a stiff brush, will restore the finish to felt, if the article is dried by shaking vigorously in the sunlight. Spots on cloth or silk dresses, too, yield more readily to alcohol than to ammonia or benzine, and there is no danger of the streaked and ringed appearance that so often is the result of an attempt to cleanse such at home.

That the best tailors are using velveteen and braid bindings upon the edge of walking skirts? The late models are quite an appreciable bit longer than were those of the early autumn, and the fine broadcloths are preserved daintily and neatly by this device at the edge. It should be applied by hand, and with but a rare suggestion of the velveteen showing below the edge.

That pheasant plumage is very much to the front in current fashions? Charming sets are shown by prominent milliners in which this iridescent brown plumage is used for a small turban, a neckpiece and a muff. The two latter items are cleverly combined with brown velvet, brown chiffon and ecru lace, with much brown velvet ribbon interspersed in the design.

An Unknown Tree Discovered.

A remarkable tree of unknown variety has been discovered near the Mexican border. The leaves resemble in size and shape the fig leaf, but they are of a vivid purple color and the under side of the leaf is thickly covered with stiff hairs which stand out fully half an inch. These hairs are sharp and thornlike, and are apt to cause poisoning if they penetrate the human skin. The blossoms are as peculiar as the branches and leaves. They are of rusty red color and are about two inches in diameter. The most peculiar feature of the plant, however, remains to be told. Whenever one approaches the plant or when the wind agitates the branches of the tree the flowers give off an abundance of heavy and sickening perfume. The perfume has a curious effect on animals, a few inhalations of the odor producing semiconsciousness.

Mushroom Shapes in Favor—*The* New Boa-tipped Plume—Sable Tails Trim Pale Blue Felt—Fetching Motor Cap in Beaver.

Mushroom shapes are highly favored in both felt and velvet, and in the smart model that owes its inspiration to a Parisian atelier both the mushroom shape and tint are employed to its development. The material is a soft and fine French felt, the color being that indefinite and indeterminate tint that characterizes the under side of the mushroom, a peculiar brown with a fleshy cast through it. Velvet of exactly the same shade is used in a flat band to bind the edge and to cover the crescent-shaped bandeau that is tucked into the headsize all around, its steepest point being in the center of the back, and narrowing to almost nothing at all in the front. At the back this is filled in with a ruffling of malinette that matches the chapeau to a marvel. In front a group of little sable heads are posed, a long scarf of the costly fur wending its way around the side of the hat, while this is balanced at the other side with a long plume of mushroom tint that retains the plume shape until it reaches the edge of the brim, and then becomes a curly boa shape, acting as a pendant to the feather on top.

Sable Tails Trim Pale Blue Felt.

There is a very decided reaction in favor of the soft French felt chapeau rather than the stiff pressed felt shapes that obtained last year. Some of these former, however, find a little wire, milliner's wire, of course, be it understood, quite an assistance in maintaining the elected curves and undulations, but there must not be a hint of any set stiffness to the result, if it is to hold a place in the fashion procession this winter. Such is the effect produced in the pretty model that is pictured on this page. The soft felt is in a clear and rather cold pale blue, the coldness of tint relieved by the trimming of fur that is deftly applied. This fur trimming is altogether of little sable tails sewed to a ribbon band, and so cunningly arranged that instead of falling in a straight fringe effect a curved and convoluted effect is gained. Between the spaces made by the tails loops of pale blue liberty ribbon peep forth, making for a soft and pretty appearance. Right in the center of the front is posed a rose of mousseline and velvet, tones of tan and a smoky brown being used, this giving a decided touch of color harmony that blends the pale blue felt and the deep brown of the fur delightfully.

A Motor Cap in Beaver.

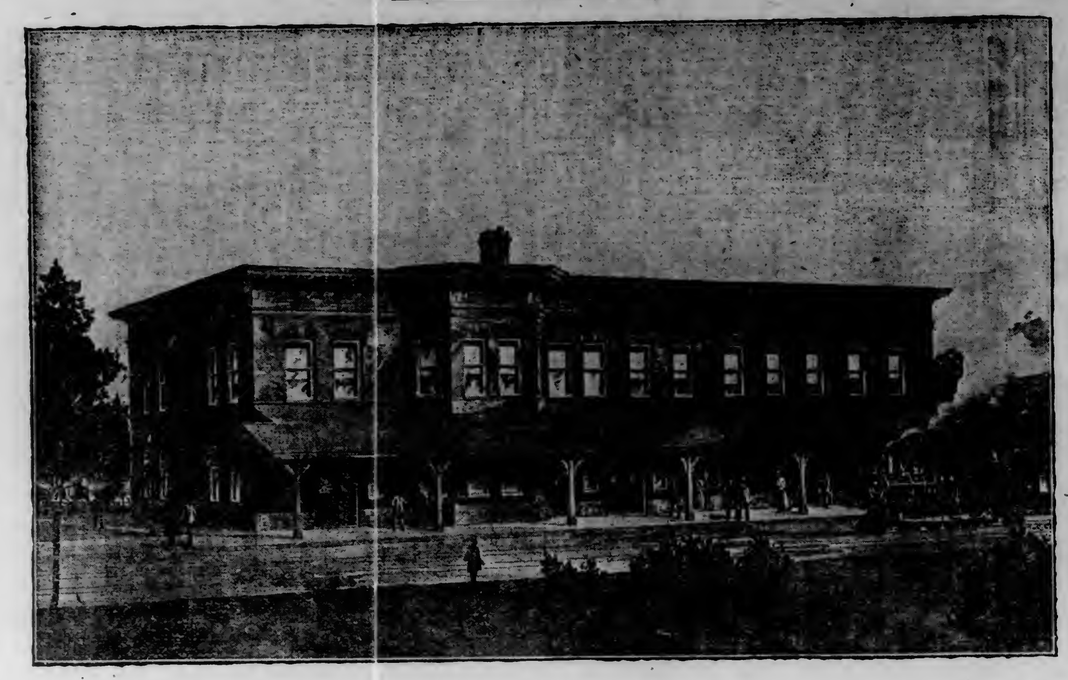
In the search for novelty that is the secret and foundation of fashion—fashion and fashions that are eternally changing—the furrier has turned once more with a favorable glance to beaver, and to the somewhat rarer and scarcer otter. The thick and dense fur of the beaver tones in delightfully with both the fashion for smooth surface and with the color card, since the beaver shade is one that is highly modish in cloth and velvet—to say nothing of velveteens and corduroys—that are worn by the fashionables this season. The large crown of the flat Tam-o'Shanter order that one sees on so many of the imported millinery models is used for this piece of motor headgear, the brim taking the approved visor form that distinguishes such apparel from that intended merely for street purposes. A little touch of trimming is attempted to relieve the flatness of the fur, this taking the form of rosettes of pale blue velvet, shading on the turquoise tints, tucked in between the crown and the brim on the left side and running up on the crown towards the back. A curled coque plume in brown serves to harmonize the contrasting tints of fur and velvet nicely, and adds a feminine touch to the somewhat masculine shape of the model.

White Velvet, White Plumes and Ermine.

There is absolutely no prospect that white will be replaced in fashionable favor by any other color, whether for furs, millinery or gowns. Of course, it argues a liberal dress allowance and an indifference to cleaners' bills when one follows the fad for white clothing the year around. But in wintertime it really seems more dressy, more luxurious than ever; and the combination of white cloth, white furs and white velvet is one that many of the wealthy debutantes of the present season are carrying out, and in every section of the wardrobe, too.

Just what Paris elects to wear in this effective combination is cleverly set forth in the charming hat and coat, of which but a glimpse of the latter is afforded in the picture. The chapeau is a clever combination of the sailor and Charlotte Corday shapes, and is altogether in white paon velvet, this finish being far more approved for millinery purposes than is the chiffon velvet that is so modish in other departments of dress. Soft, loose and easy is the manner in which the velvet folds are handled, the three plumes starting from the left side well towards the back and falling over the brim that is lifted by a cache-peigne to give it that projecting line at this point, which is one of the approved items in the new millinery modes.

NEW PASSENGER DEPOT AT TWO HARBORS WILL BE HANDSOME AND COMMODIOUS STRUCTURE



PROPOSED NEW DEPOT AT TWO HARBORS.

Preliminary work for the erection of the new passenger station for the Duluth & Iron Range road, at Two Harbors, is already under way. McLeod & Smith, who have the contract for the erection of the structure, expect to have it ready for occupancy by the first of August.

As shown by the picture, it will be a handsome station, embracing all modern conveniences, and being a substantial addition to Two Harbors' list of important buildings.

Brick and stone will be used in its construction. It will be two stories high, and on the ground floor will be one of the most complete and comfortable suites of waiting rooms, etc., to be found in a depot of the kind anywhere in the country.

There will be waiting rooms for both ladies and gentlemen, and handsomely appointed lavatories for both sexes. On the ground floor will be located a commodious ticket office, baggage and express rooms.

On the second floor, the train dispatchers and other workers in the employ of the railroad company will have their stations. Two Harbors is a very important station in the business of the Duluth & Iron Range, and a large number of men are in its employ there at all times.

THE MARCH MAGAZINES

In the March number of McClure's the Christian Science Serial easily holds first place. It deals in detail with the Quimby controversy that has waged for twenty-five years between Christian Scientists and the followers of the New Thought movement—also called Mental Healers. A mass of documentary evidence of the arguments of both sides is presented in the shape of facsimile letters, affidavits and the like. The inauguration of Lincoln, the epidemic of compromise that infected the country and the breaking out of the Civil war are dramatically described in the Carl Schurz Reminiscences. Waldemar Kaempffert tells "What We Know About Mars" in a lucid article that describes the marvels without recourse to the technical verbiage of science. "The Diary of an Amateur Waitress," by Maud Younger, gives us the worker's point of view on an industrial problem. The fiction of McClure's is especially fine, with eight strong stories.

• • •

The American Magazine for March includes a new play, "The Goal," by Henry Arthur Jones. Throughout the play, made joyful by his presence, there walks a great man of the world, 75 years old, who, on the day he died, preserved love of life, high respect for himself and enthusiasm for larger achievement. When he died he died standing. Miss Tarbell, whose history of the tariff is one of the features of this notable periodical, relates in the present number the story of the tariff under Grant, Blaine, "Sunset" Cox, Horace Greeley, "Pig-iron" Kelley and Garfield are among the men introduced. Josephine Daskam Bacon's article on the servant problem is entitled, "We and Our Neighbors." Stanley Johnson describes "Athletics Among the Blind." Joseph Jacobs records the biography of the Mean or Middle American. The Interpreter presents what is really a graphic character study of President Roosevelt.

• • •

Wasn't it Rabelais who said, "An inch of joy surmounts of grief a span, because to laugh is proper to the man?" At any rate, whoever said it the sentiment has been indorsed by people of all classes. That the editors of the Popular believe in it thoroughly is evidenced in the March issue, just published, which contains at least four stories overrunning with laughter. "Slinky Bill," by Martin A. Flavin, is a very amusing history of an affair that began in an act of kindness and ended in sulfurous language. "A Deal in Horse-Flesh," by George C. Jenks, is a very funny tale of a suburbanite and a bay gelding. "The Infernal Feminine," by B. M. Bower, tells in irresistible fashion how certain susceptible cowboys lost their heads over a very startling beauty. Then there is "The Lady of Luzon," by George Bronson-Howard, one of the best things the Popular has printed. It has to do with an unassuming fellow, cursed with the name of Plantagenet Hock, who was forced to be a hero. It's a capital story, and well worth reading.

• • •

There are about twenty numbers in all in the People's Magazine for March, an all-fiction publication of 162 pages. One complete novel and a great number of well-selected short stories make up this generous bulk of fiction. John H. Whitson is the author of the novel which opens the magazine, and among the writers of the short stories are Newton A. Fuessle, Rodrigues Ottolengui, Julia L. Sabin, Brand Whitlock, Richard Marsh and others.

• • •

The March Century is a garden number, covering a wide and varied range of outdoor interests—Charleston gardens, Persian gardens, workingmen's gardens, flower arrangement in Japan, and a review by a Dutch expert of Luther Burbank's work in scientific horticulture. The Luther Burbank review, from the pen of Hugo de Vries, professor of plant anatomy and physiology in the University of Amsterdam, is the article of most scientific value in the magazine. It brings to American readers a new, suggestive and authoritative presentation of Mr. Burbank's claims and achievements. All the charm of Charleston's gardens—probably the loveliest gardens in this country—is in Miss Frances Duncan's article, and there are delightful illustrations by Anna Whelan Betts, including two full pages in color. In a different vein, and also touching a subject of far-reaching interest, is William H. Tolman's account of "Workingmen's Gardens in France," one of the most encouraging movements of the day. Detroit, New York, Philadelphia and other American cities are developing similar aims; but France has carried the work far beyond the point of an experiment; and the story is full of vital interest. Bertram Grosvenor Goodhue's description of Persian gardens is embellished with many reproductions of the author's drawings; and in Miss Zaida Ben-Yusuf's paper on "The Honorable Flowers of Japan" there are many pictures illustrating the Japanese methods of arranging cut flowers.

• • •

"Shall We Tax Wealth?" is the title given to an unusually interesting feature of the current number of Smith's Magazine. It consists of a symposium on the much discussed topic of the income tax, and contains opinions from such widely divergent personalities as Joseph Leiter, the millionaire, Hudson Maxim, the scientist, and Governor Folk, the reformer. It is of unusual interest for the insight it gives us into the personal views of many of our prominent statesmen, financiers, and thinkers, and is of decided value as the best possible gage of public opinion on this question. Besides this the magazine contains a number of splendid short stories and articles by such writers as Holman F. Day, Charles Battell Loomis, Elmore Elliott Peake, Tom Masson, Anne O'Hagan, Wallace Irwin, Lillian Bell, and Charles Garvice. It is profusely illustrated, having a set of sixteen pictures of stage beauties and another set of eight full page pictures of cats which are sure to interest every one.

• • •

Ainslee's Magazine for March is one of the best numbers this entertaining magazine has ever published. It contains a novelette, a serial, eight short stories, essays, poems, and critical reviews of new plays and books—more genuine entertainment than can be secured anywhere else at the price. The principal feature is the continued story, "Her Son," by Horace A. Vachell. This is a story which grows in interest with every page, and promises to be all that has been claimed for it. Next in importance is Dorothea Deakin's novelette "The Wishing-ring." This is a tale of extraordinary charm and interest, one of the sort which, after reading, makes one feel that life is more than worth living. Roy Norton has a story with a Western setting, called "Nodswoma." It has a child interest which gives it a somewhat pathetic turn, and should not fail to make its appeal to women readers. L. Frank Tooker contributes his share of humor to the number in his down East tale, called "The Shiner."

• • •

A very strong and tragic story by Edgar White, entitled "Husband, Wife and Lover," leads the March issue of 10 Story Book just out. This story is full of fire and red blood, and is a typical 10 Story Book story. In a lighter vein, J. A. Tiffany contributes "In the Wrong Pew," and Mrs. Denis E. Cooper "How Bobson Got His," both of them delightful skits along the lines of light humor. "A Magdalen of Paris" by Helen R. Ruggles is a story of the Latin quarter and has all the atmosphere of that famous colony. The strongest story in this magazine from a literary standpoint, is "The Bottle in the Sea," by Frank H. Meloon.

• • •

March Lippincott's Magazine breathes a foretaste of summer in its leading feature, the complete novelette. "The smuggler" is its title, and the author, Ella Middleton Tybout, has already to her credit several successful full-grown novels, notably "The Wife of the Secretary of State." This newest story does not deal with smugglers and pirates of the past, but with the modern manner of getting jewels into our fair land without asking Uncle Sam's consent. The characters are mightily convincing in their various roles; and her rapid-acting plot makes the most indifferent reader "sit up" until he has devoured the last word.

Ellis Parker Butler has never written anything funnier than "Pat Cronin and the Foretellin' Lady." It beats the record of "Pigs is Pigs." A more serious story, of subtlety and originality, is "The Convict Strain," by Edith Robinson. An amusing episode in the domestic life of the newly married is "The Accomplished Mrs. Thompson," by Norva Richardson.

• • •

An uncommon collection of uncommonly good stories, in addition to a powerful and absorbing novelette entitled "A Flight From Love," make the March number of Young's Magazine entertaining reading for the lover of sprightly fiction. This is the second issue of Young's in its enlarged form and its presentation of twenty-two short pieces of bright up-to-date fiction in addition to the leading novelette is a notable achievement in the realms of the magazine world.

Brilliant, sparkling love stories, realistic sketches of the "submerged tenth;" a thrilling detective tale; strong, powerful translations from continental writers that stir the heart and mind; gay, humorous sketches of Broadway life; stories of every phase of life, fiction to suit every mood are characteristic of the number. Among the best are "A Blighted Rose," the tale of a girl who climbs from the beer-halls of Coney Island to a niche in Gotham society as the wife of its most sensational millionaire and the leading beauty of the day. In "The Wife" from the Russian of Anton Cheklov, a woman of the "rag and a bone and a hank of hair" type is ruthlessly analyzed. The writer, probing beneath the outer surface for a soul, finds nothing there. The story is powerful in its realism.

• • •

The National Magazine for March has another article on the Jamestown exposition, and also contains an appreciation by William Hemstreet, of Anthony Comstock, who is perhaps the least understood and most abused of any great reformer of the age.

The "Home of Longfellow," by Mary H. Northend, "Natural Beauties of Utah," by W. C. Jenkins, and "On the Site of White City," are strong articles that appear in this number.

The "Morning Maids" is one of the best illustrated articles to be found in any of the March magazines. The National has a large number of first-class stories, and will prove to be a number interesting and instructive to all members of the family.

• • •

The March Wood Craft has instructive and well illustrated essays on wood preservation, woodworking machinery, saws, the manufacture of glue, the inventions of a woodworker, loose-pulley troubles on woodworking machinery, the physics of wood and water with special reference to misleading records of the engineering tests of wood weight and strength —intricate lathe work, etc. Cabinetmaker and patternmaker are well supplied with miscellaneous technical reading. There are several papers dealing particularly with veneers from the respective standpoints of user and maker.

• • •

Howard Pyle's painting of "Pendennis and the Major at St. James Street," in his series of illustrations of Thackeray's characters, forms the frontispiece in color of the March number of Harper's Magazine. It is followed by Commander Peary's concluding article on his recent trip to the arctic, on which he distanced all previous explorers, and reached a point nearer the north pole than has ever before been attained. His descriptions of their daily adventures in those grim regions of ice and barrenness are very vivid. They hewed their way through fields of ice blocks "varying in size from a paving-stone to the dome of the capitol." In striking contrast to this experience is the story of a tropical cruise on the Gulf Coast of Florida, by A. W. Dimock, with photographs in tint. Dr. Woods Hutchinson writes very instructively on "Exercise and its Dangers," showing to what extent exercise benefits or injures the health. An article or Oriental charm is contributed by Charles Edward Russell, the well-known journalist, traveler, and poet, describing the wonderful abandoned Eastern city of Fatehpur Sikri, which was once the rich capital of the potentate Akbar the Great, and now stands deserted, but still beautiful.

• • •

Transatlantic Tales for March contains, in addition to a score of unusual short stories, a complete drama of the Russian Revolution, "On the Eve," by Dr. Leopold Kampf. As the publication and stage production of this tremendous arraignment of present conditions in the oppressed land of the czar were suppressed by the governments of Europe, the author turned to America, where he has not only found a publisher in Transatlantic Tales, but has arranged for the play's production in a New York theater within the next few months. Upton Sinclaire, author of "The Jungle," says of it: "I read it with intense interest; it is right out of the heart of the furnace. So far as my reading goes, it is the best thing which the present crisis has brought out in Russia."

• • •

Arthur Stringer, whose work in recent years has grown in strength and importance, is the author of the novel which opens the March number of The Smart Set. It is a love story of absorbing interest, entitled "Creeping Rails," depicting the passion of a wealthy woman for a musician, who, in the end, proves worthy of her love. Mr. Stringer has done no better piece of work and this story will win him added admirers.

John G. Nelhardt, a new writer, whose name is becoming known to magazine readers, is the author of a very short but powerful story, entitled "Mignon." "The Bashful Elder," by Grace MacGowan Cooke, is a delightful humorous story of rural life; Seumas MacManus contributes another of his inimitable Irish tales, "For His Town's Sake;" and Van Tassel Sutphen, a modern love story. Other writers of short fiction are Yorke Stevenson, Harriet Gaylord, Cecil Carlisle Pangman, Edward Clark Marsh, Walter E. Grogan and May Harris.

• • •

In the Outer's Book for February, Eben E. Rexford discourses delightfully on the pleasures of memory dwelling during the busy winter months on last summer's trip to the wilds. Craig S. Thoms describing the things a hunter sees besides game talks most entertainingly of "The Winter Woods," telling of the secrets laid bare by the dropping of the leaves. Taking an Oregon woman's work as her text, Anne Shannon Monroe shows what a woman can do on a farm, and Len D. Whittemore, in another article, relates the story of the farfamed Salton Sea. Howard James, a new writer with a forceful style, discusses Grover Cleveland's latest book and handles the ex-president without gloves.

• • •

The March Reader Magazine contains a debate between William Jennings Bryan and Senator Albert Beveridge. The subject discussed is the problem of state's rights as opposed to nationality, revivified by the current topics of federal ownership of public utilities and federal regulation of state matters. The debate opens the series on The Problems of the People, to be debated by Bryan and Beveridge for fifteen months, or until the opening of the next presidential campaign. Mr. Bryan is to be the spokesman for the democratic party and expound its beliefs on the issues of the day, while Mr. Beveridge is tacitly understood to be the mouthpiece of the administration while answering for republicanism. James Whitcomb Riley contributes a poem, "Rabbit Huntin'," charmingly illustrated by Will Vawter. Other verse is by Benj. F. Parker and Louise Ayres Garnett. There are four stories, interesting as the Reader always offers: The Hydromaniacs, a political story, by Francis Lynde; Afar from Elsinore's, a laughable tale of schoolboy life, by John T. McIntyre; We Women, addressed to women with ambitions, by Alice Woods Ullman, and The Last Moment a powerful sketch of life on the Great Lakes, by J. Olivier Curwood.

• • •

Its illustrations are again a distinguishing feature of The World Today for March. The elephants of Siam and the earthquakes at Kingston furnish occasion for several of these, and there is also a picturesque article by Broughton Brandenburg, who was in the stricken city at the time. The big snowstorms in the Northwest, and the shortage of coal and food supply material for a graphic story by H. D. Frankel, entitled "The Railroads' Fight With Snow." "The Block System and Railway Accidents," by Day Allan Willey, is a particularly timely article because of the numerous railroad accidents during the past month.

"Private Secretaries of the Mighty" is the title of a racy sketch by Willard French of Messrs. Loeb, Weaver, Carpenter and Busbey, private secretries, respectively, of President Roosevelt, Postmaster General Cortelyou, Secretary Taft and Speaker Joe Cannon. Other biographical sketches are "From Saddle to Senate," by Sheffield Cowdrick; "A Business Man's Triumph in Scholarship," by Frank Maloy Anderson, and "Vicomte Georges d' Avenel," by Alvan F. Sanborn.

• • •

The Popular Science Monthly for March contains the following articles: "A Defense of Pragmatism," by Prof. William James; "The Century Plant and Some Other Plants of the Dry Country," by Prof. William Trelease; "Notes on the Development of Telephone Service," by Fred DeLand; "Denatured Alcohol," by Prof. S. Lawrence Bigelow; "Spelling Reform and the Conservation of Energy," by Prof. W. Le Conte Stevens; "Fritz Schaudinn; "The Value of Science," by M. H. Poincare; "The Smithsonian Institution and its Secretary;" "The Report of the President of the Carnegie Institution;" "Mr. Rockefeller's Gift to the Board of Education."

• • •

In striking parallels are two articles in the Housekeeper for March, the first telling of the life of the Doukhobors on the Canadian plains, by Aubrey Fullerton; and the second, a revelation of the hidden life of the Shakers, by "Sister Marcia." The illustrations are particularly good photographs. "Paul, Shy Man," by L. M. Montgomery, and "Virginia's Serial," by Dorothea Deakin, are the leading fiction stories. "The Influence of Flowers," by Marian Bonsall, is the sixth of a series of Japanese articles. It is exceptionally interesting, as it is filled with clever anecdotes, for which Miss Bonsall's writing is so well known. "Duff Daggett," by Owen Kildare, continues the absorbing life of his newsboy hero. The practical departments are especially helpful for the spring. Elizabeth W. Morrison tells of new ways of preparing sea foods, and S. A. Hamilton and Mrs. George L. Bork write authoritatively on flowers and poultry, respectively.

• • •

The Engineering Magazine for March opens with a paper on "Personnel—a Vital Factor in Naval Efficiency," by W. McFarland, late first assistant to the engineer-in-chief of the United States navy. It is an introduction to the following article on the United States Naval Academy as an Engineering School, by Commander Walter F. Worthington, U. S. N., and the discussion is of peculiar present importance on account of the great activity in battleship construction apparent among all the great powers, and the bearing which the officering and manning of these vessels has upon their actual fighting strength. The illustrations give a splendid idea of the scope and practicality of the Annapolis training.

• • •

The recent sudden death of Josiah Flynt Willard lends peculiar interest to the March number of Success Magazine, in which his autobiography, "My Life—So Far," is now running as a serial, over his pen name of "Josiah Flynt." The preceding portions of this narrative have been characterized as the most daring voluntary revelation of failure and lost illusions ever penned. In the present installment the writer tells of his study at the University of Berlin and his acquaintance with Ibsen, Tolstoi and the great German thinkers. Tolstoi he characterizes as a quiet, simple old gentleman, whose wife was the active manager of affairs in his home, apparently caring much for him as a man, but not as the leader of a cult. He emphatically denies all insinuations that the Russian would-be reformer is a fakir of any sort.

The house of special representatives at Washington—what proportion of the general public knows anything of this additional branch of the national legislature, this "Legislative Annex of the Special Interests?" Under the heading, "The Third House," Gilson Gardner describes the large and active body of lobbyists in Washington, how they are recruited, how they work, the famous entertainments they give, the magnificent "Lobbyist's Heaven," erected by "Nat" McKay for the use of congressmen, and the dinner of the $2,500 tablecloth.

• • •

The March 2 magazine number of Charities and the Commons contains several important and well-illustrated articles on the problems that are facing Russia today. Nicolas A. Shishkoff, the "unofficial Russian famine ambassador," who came to America for aid, has written "Famine in Russia," in which he tells a story of the dire need of his people. A personal sketch of "Gregory Gershuni, Schoolmaster-Terrorist," is contributed by Paul U. Kellogg, descriptive of the thrilling escape of Gershuni from a Siberian prison.

The principal features of the March number of the Review of Reviews are a survey of the work of the interior department under Secretary Hitchcock, by Max West; an elaborately illustrated forecast of the Jamestown exposition, by Plummer F. Jones; a study of the public coal land situation in the West, apropos of President Roosevelt's recent action; a presentation of some of the reasons "Why We Need the Immigrant," with many illustrative charts and diagrams, based on data gathered by the government, by William S. Rossiter; and articles on "The Municipal Ownership of Street Railways in Germany," by Edward T. Heyn, "German Experiments with the Land Tax," by William C. Dreher, and "Why Not Savings Bank Life Insurance for Wage Earners?" by Louis D. Brandeis.

• • •

Among the leading articles in the Technical World Magazine for March are: "Dwarfs Niagara's Power," by W. G. Fitz-Gerald; "Builder's Song Poem," by Charlton Lawrence Edholm; "For of Such is the Kingdom of Heaven," by Dewey Sheldon Beebe; "How Jackson Saved the Eskimo," by Edward B. Clark; "Rediscovered Texas," by Forrest Crissely; "Weird Monsters of the Sea," by Lilliam E. Zeh; "Wireless Control of Mechanisms," by Dr. Alfred Gradenwitz; "Water Wheel Saves Big Farm," by James Coke Mills.

• • •

In the March Delineator, Ida M. Tarbell discusses "Women's Place in the World." Mrs. Osborn's letters is the first of a unique series of articles on dress by American foremost creator of clothes for fashionable women. Lilian Bell writes on the subject of "The Laudable Dishonesty of Women," Dr. Emelyn L. Coolidge gives wholesome advice to mothers in advocacy of the more sensible care of babies. Then there are the usual departments devoted to fashions, the children, the kitchen, etc.

• • • •

In the March number of the Woman's Home Companion Felix Adler tells why we should have a uniform divorce law—and proves his point. Edward Everett Hale advises the American clubwomen to take an interest in correctional and charitable institutions. Anna Steese Richardson describes several of the many extraordinary instances where millions have been thrown into the quicksand of social extravangances. Bertha Damaris Knobe tells what the Chicago Women's club has done for Chicago—a surprising story. Josephine Daskam Bacon contributes the first installment of a humorous serial on "the crime of the century"—why servants won't serve.

• • •

The current issue of Harper's Weekly is one which is distinguished by a number of articles of timely and peculiar interest. The leading article, "Japan's Preference for Peace with America," by William Inglis, special correspondent for Harper's Weekly in Japan, sets forth that regret rather than anger is what the mikado's people feel over the San Francisco incident, and that their friendship for the United States is heavier in the scale than their pride over the alliance with Great Britain. Gen. Theodore A. Bingham, police commissioner of the city of New York, is the author of an article calling attention to the reasons why legislation is necessary for the effective administration of the department, and what undesirable conditions should at once be changed. There is an interesting contribution upon "The Longfellow Centenary," by Caroline Ticknor, which is illustrated with a number of valuable photographs, including one of a fragment of a Longfellow letter illustrated by the poet himself.

• • •

The boys of America will surely say that the March American Boy is the best ever. The stories are as varied as boys' hobbies, and every one is good, clean, and intensely interesting. Further chapters of the serials by Stratemeyer, Alger, Shute, Sprague, and Tomlinson are given which will increase the reader's interest in the various characters. A new serial by Edward S. Ellis, entitled "Off the Reservation," dealing with the notorious Apache chief Geronimo, starts in this number and will prove a winner with the boys. The shorter stories include: "A Hot Twenty Minutes," telling of a thrilling naval battle during the Civil war; "The Codfish," a fine story of trawling on the Grand Banks; "Bray's Kid," showing how the innocence and purity of a child can soften the roughest of men; "A Race with a Moose," tells how one of these big deer towed a boat with a little girl far out into a lake; "Dave of the Dauntless," a story of the dangers attending the capture of seals in the Far North.

RAILWAY TRAVEL IN AUSTRALIA

By C. ARTHUR WILLIAMS.

When a new arrival in Australia announces his intention of making a journey he is saluted by a sort of paraphrase of Punch's advice to those about to marry. Instead of saying "Don't," his friends all say "Don't go by rail."

My first experience with the Australian government railway took place in New South Wales, where the system is in better working order than elsewhere, and it was a journey from Sydney to Springwood—forty-seven miles. A freight train—they call them goods trains in Australia—stuck in the tunnel ahead of us, though it had left the last station three-quarters of an hour before we arrived. We had taken the 5:37 train and were due at 6:55. We arrived at 7:30—two hours and thirteen minutes for the trip of no greater distance than is traversed by thousands of commuters every day from New York. The line is double tracked all the way up from Sydney, and ours was a through train. An American road would hardly contain a tunnel grade so steep as to stall even the heaviest of freight trains, especially on a suburban line with a heavy passenger traffic, and an American despatcher would hardly send out a freight train drawn by a locomotive which might not be able to pull it up the grade, directly ahead of a fast passenger train.

The rate for first-class tickets is nearly 5 cents per mile, for second class more than 3 cents. When I suggested traveling second class my friends told me that I would be crazy to do so, and when I tried it I realized that they were right. Yet, in spite of these high fares, the government much of the time fails to pay 3½ per cent on its investment. It is thrifty, though, for first-class passengers are entitled to only 112 pounds of baggage carried free, while holders of regular second class tickets pay excess on everything over eighty-four pounds.

My business in Sydney ended on Saturday, and it would have been convenient to leave for Melbourne that night. But this was impossible, since there is no Saturday night train south between the two cities, and but one train a day each way during the week. As the Saturday half holiday is generally observed throughout New South Wales and Victoria the traveler between the capitals of the two states must loose that half day and all the next because of the way in which the government railway schedule is arranged. He can leave Sydney on Friday night, but will reach his destination too late for business on Saturday. If he takes the dilemma by the other horn he must lose the day and a half in Sydney, take the Sunday night train and reach Melbourne about 1 o'clock Monday afternoon. There is a Saturday train from Melbourne to Sydney, but none on Sunday. And bear in mind that this service is between the two principal cities of Australia, each with a population of more than 500,000, and only 576 miles apart.

The season was midwinter, being early in August, and there was no provision whatever for heating the sleeping car. In Australian sleeping cars the men are herded off in one end of the car, and the women in the other, with a screen across the aisle between. Even man and wife cannot have a section, but are separated perhaps by the entire length of the car. The berth curtains fasten only at the top, and everybody who passes down the narrow aisle pulls them along with him, letting in the light and disturbing the occupant. It was midnight when this sort of thing ceased and sleep was possible. At 6 o'clock in the morning it commenced again, and a few minutes after the curtains were pulled entirely back and everybody was told to get up. Before I was fully dressed the train ran into the station at Albury, on the boundary between New South Wales and Victoria. Those who were not so nearly prepared for disembarkation as I was, spoke and acted as if they were not happy.

But why all this haste and pother? Merely because the gauge of the New South Wales railway system is 4 feet 8½ inches, and that of the Victoria roads is 5 feet 3 inches, and trains cannot be run through. Hence passengers are hauled out at 6 o'clock of midwinter mornings in an unheated car.

The breakfast in the restaurant was the worst meal I ever ate in a railway station, which is strong language. There is but one dining-car in the whole of Australia.

It was as cold in the Victoria train as it had been on the New South Wales sleeper. It was a smoking compartment, this, and brass cones, sunk point downward through holes in the floor of the car, had been provided by a thrifty government to serve as cuspidors. The wind came through them unchecked, of course.

And all this on the crack train between the two principal cities of Australia!

Paper Decorations For Silver Wedding.

By EMMA PADDOCK TELFORD.

Dear Mrs. Tedford: I take The Herald regularly each evening and would like to ask your advice regarding my silver anniversary. Will you kindly publish in your paper, as soon as convenient, what house and table decorations would be appropriate; what could be given as a souvenir of the occasion, and ot what time during the evening the souvenirs should be presented to the guests?

I would greatly appreciate any suggestions you may make.

SILVER ANNIVERSARY.

Decorate your dining room with evergreen, silver flags, silver paper flowers, silver paper butterflies and plenty of silver tinsel cord. Have the table set with as much silver as posible. In the center, place a huge wedding cake, which you can make at home, but have decorated at the caterer's, if you are not proficent in ornamental frosting. Around this arrange four antique silver candlesticks. Running from the ceiling to each candlestick have cords of green and tinsel. The base of the cake may be interwined with smilax. On top of the cake you may have a silver crown with twenty-five tiny silver stars. If the table is good, dispense with any table cloth, but use plenty of silver paper doilies. Table cloths and napkins of paper with silver tracings can be purchased at any of the large paper shops or department stores. If flowers are used, ivory white chrysanthemums, mixed with gray green foliage, are best, but a few flowers will suffice.

In serving the frozen punch and salads or patties use the ramekin shaped silver paper cases. The souvenirs may consist of square silver paper covered boxes containing each a slice of bride's or silver cake; or small silver articles each suited to the recipent; or, as noted lately, little sterling after dinner coffee spoons engraved with pictures of the aerial bridge or the high school building or other Duluth views.

Hungarian Chicken.

Dear Mrs. Telford:

Will you kindly publish a recipe for making the real Hungarian paprika chicken. F. S.

Put a heaping tablespoonful of olive oil or good pork dripping in a close covered stew pan, and when hot add two large onions sliced lengthwise in thin strips. As soon as colored slightly, put in a teaspoonful paprika; mix thoroughly and brown. Have a chicken ready, cut in neat joints, salt and pepper, lay in the pan and brown well, turning often. When every piece is browned (and it will require close attention), add stock or water to nearly cover and simmer gently until tender. Just before serving take out the meat and lay on a hot platter, arranging symmetrically. Add to the gravy in the pan one-half cup or more thick sour cream and let it come to a scald, but do not boil. Pour this over the chicken and serve hot.

Bisque of Tomato.

Dear Mrs. Telford:

Will you kindly publish recipes for the following dishes: Bisque of tomato, cream of tomato soup, fried scalloped oysters, lemon pie?

Thanking you sincerely for past favors, which I have tried with great success. MRS. E. H.

Stew a pint of tomatoes until soft enough to strain readily. Meantime cook a quart of milk in a double boiler and when scalding, thicken with a tablespoonful butter. Boil about ten minutes, stirring until smooth and creamy, then add salt, pepper and more butter to season. Add to the tomatoes that have been strained a pinch of soda, turn tomatos and cream into the same saucepan, stir well, take from the fire and serve hot with croutons.

Cream of Tomato Soup.

Add to a pint of stewed or canned tomatoes a pint of water, a slice of onion and a stalk of celery, a level teaspoonful salt and sprinkling of pepper. Bring to a scald and cook for twenty minutes. Thicken with a rounded tablespoonful butter creamed with two tablespoonspoonfuls flour, and cook, stirring all the time until smooth and thickened. Strain and serve with tiny squares of crisped bread.

THE POWER OF MAN.

New York Press: Have you an idea of what is meant by the physical power of man? Ask the officials of the English prisons, where convicts are required to operate the treadmill. Estimate how many pounds are lifted an hour by the alleged sportsman who shoots pigeons with a seven-pound gun. Give a woodsman a five-pound ax on a ten-day job in the Adirondacks and reckon the number o ftimes he raises that weight every eight hours. What of the busy typewriter, capacity 100 words a minute? Each hand weighs a pound (speaking of man now, not the dainty little flippers of womankind, and counting each word at an average of four letters we can figure out a movement of 400 times a minute, 24,000 times an hour, and 192,000 times in a working day of eight hours, which is to say he lifts 192,000 pounds with both hands in a day of eight hours.

DISCREET BUT UNWISE.

Harper's Weekly: There is a Chicago lawyer, who, his colleagues aver, has a positive genius for malaprops suggestion to his witnesses on the stand.

Recently this lawyer was counsel in a suit for divorce, wherein he was examining a woman who had taken the stand in behalf of the plaintiff.

"Now, madam," began the attorney, who is always saying the wrong thing, "repeat the slanderous statements made by the defendant on this occasion."

"Oh, they are unfit for any respectable person to hear!" gasped the witness.

"Then madam," said the attorney coaxingly, "suppose you just whisper them to his honor, the judge."

PLAYS and PLAYERS of the WEEK

BIJOU. REFINED VAUDEVILLE. | THE LYCEUM DRAMA. | METROPOLITAN. BURLESQUE.

AT THE LYCEUM

Exceptionally Strong List of Attractions For Next Week, With Blanche Walsh in "The Straight Road;" "The Red Feather," and "The Ham Tree."

Blanche Walsh, who has created a furore this season in Clyde Fitch's "The Straight Road," first sprang into theatrical prominence as the beautiful young actress whose work in Bronson Howard's "Aristocracy," promised great things for her future. Those promises have been fulfilled and today she is without question the greatest exponent of tragic emotional roles on the American stage. Shortly after the "Aristocracy" engagement she was selected for the role of Trilby in the famous production of the play by that name. At the end of the remarkable run of the piece in this country, Miss Walsh, together with the rest of the notable cast, went to Australia, where her personal success was so great that the following year she was selected for Nat Goodwin's leading woman during his Australian tour.

Then came her appearance in Fanny Davenport's productions of the Sardou dramas, in which her great beauty, combined with her remarkable emotional and tragic powers, made her a most alluring and convincing Cleopatra, Fedora and Gismonda. After several ventures that did not provide suitable roles for the best display of her constantly developing powers, she signed a contract with Messrs. Wagenhals & Kemper, the enterprising young managers who sprang from the ranks of actors into a foremost place among great producers, almost in a day. Since then success and Blanche Walsh have travelled the flower-strewn path of prosperity, hand in hand.

Miss Walsh's first appearance under her new management was in "The Daughter of Hamilcar," a gorgeous spectacle founded on Flaubert's great classic, "Salambo." In the middle of a successful tour, when Miss Walsh with a company of fifty prominent players and three carloads of scenery was making her way across the continent, came an offer from Oscar Hammerstein, who had secured the American rights to the great European sensation "Resurrection," to have her create the role of Maslova in New York. Her managers saw at once the value of such an opportunity and unhesitatingly sent a production that had cost them many thousands of dollars to the store-house, brought company and star East and began rehearsals for the Tolstoy play. Our theater-goers know the result. Miss Walsh made the success of her career as Maslova and played the part for over two years, presenting it to crowded houses in almost every large city in this country and Canada.

Then she was given another opportunity to prove her versatility. Clyde Fitch was commissioned to write a modern society drama for the actress of classic roles. "The Woman in the Case" was the result. It was produced at the Herald Square Theater in New York. "The Woman in the Case" became famous in a night and stayed at the Herald square four months.

The present season has been devoted to "The Woman in the Case" and the "Kreutzer Sonata," Gordin's terrific drama, in which Miss Walsh made a tremendous impression. Both these plays, however, have been dropped for the present, for Miss Walsh considers that she has the role of her life in the new Fitch play. She will be at the Lyceum Monday and Tuesday.

"THE HAM TREE."

Famous Minstrel Team Now Starring in Musical Vaudeville.

James McIntyre, of the famous minstrel team of McIntyre and Heath, who are the stars of Klaw & Erlanger's notably successful production, "The Ham Tree," to be presented in this city at the Lyceum Friday and Saturday of next week, with a Saturday matinee, recently gave a writer of the stage on a New York paper a most interesting story in reference to the career of himself and partner.

"We joined forces in 1874," said Mr. McIntyre, "and have worked together ever since. This, I think, is a record in the theatrical world. Some people think that Mr. Heath and myself earn our money easily, but once we had to work overtime for it with a few extra hours thrown in. In the old days we did not figure the length of our working time on the stage by minutes, as it is the custom today. We were with a minstrel show and the things we had to do would make an actor of this generation gasp. We appeared as end men in the first part and contributed a few dances. Then Mr. Heath would do a Dutch turn, after which we presented a negro act, something like the one we are doing now. Next we appeared in white face as a song-and-dance team, and finished up by taking parts in a little drama. Whenever we got a chance appeared at private entertainments for which we received the munificent reward of $2. Our joint weekly salary at that time was $20.

"We made our first important hit in Chicago, where we introduced buck and wing dancing. Nothing was known then of genuine negro dancing. We were a long time in the South and we made a study of the real dance steps of the Southern negro. After we introduced them for the first time in Chicago, they struck the public fancy and we jumped into favor and our salary went up from $20 to $100 a week. In '76 we introduced our buck and wing dancing in New York at Tony Pastor's. Our dance was a novelty and a change from the jigs, clogs and reels of the old time minstrel men, such as Bridge, Wambold, Barnard and Backuc. Then we gradually dropped dancing and took up the comedy side of stage work.

"Our success in negro character impersonation is undoubtedly due to the fact that we use the pure Southern dialect. We had years of schooling in the South before we ever thought of going on the stage. Every day we came in connection with the Southern darkey and enjoyed studying his characteristics, manners and dialect. We have several coon dialects, all distinctly different, as anyone knows, who is familiar with Southern negroes, so you see, it is not difficult to figure out why we last longer than the average black face actor, who may have no more intimate knowledge of Southern negroes than their ways and he has learned from the comic papers. Our old act, 'The Georgia Minstrels,' has undoubtedly survived hundreds of other negro turns because of our fidelity to the real negro type. This skit has been incorporated in 'The Ham Tree.' How well it goes, I leave it to the public to judge."

The judgment of the public is shown by the great hit this attraction made at the New York theater in New York and also in Philadelphia, Boston Pittsburg and Chicago, and undoubtedly substantiates Mr. McIntyre's explanation of their success on the stage for over thirty years. They present actual characters in their work and the public is quick to recognize artistic ability in stage impersonation. The coming engagement of "The Ham Tree" in this city is one of the most important of the current season.

RED FEATHER

Will Play Return Engagement Here With Strong Company.

While the current season at the Lyceum theater has been pleasantly punctuated with musical plays, and a notable season of grand opera, there have been very few comic operas. The coming of "Red Feather," on Wednesday of next week, for one performance, should excite a lively interest among local lovers of really good music as a setting for a romantic play, to which jingling and witty lyrics have been plentifully added. It is nearly two years since "Red Feather" was offered in Duluth, and at that time it was not only most cordially received, but was pronounced quite the best thing of the sort seen here in many a day. It was elaborately and tastefully mounted, and attracted large audiences. It will be remembered that this opera is the joint work of three men. Chas. Klein, who wrote the book, has since added to his fame as the author of "The Lion and the Mouse" and "The Music Master," two of the most successful plays now before the public. Charles Emerson Cook, a worthy protege of the ubiquitous Belasco, has contributed the lyrics, and has since distinguished himself for having written the lyrics for "Happyland," the new opera, in which De Wolf Hopper has apparently come to his own. The music of "Red Feather" is by Reginald DeKoven, composer of the immortal "Robin Hood," and who has added immeasurably to his laurels by this and his later score of "Happyland."

This season the big company presenting "Red Feather" is headed by Miss Cheridah Simpson, who has been drafted from the forces of Henry W. Savage for the rather difficult dual role, which is the leading one of the opera. Miss Simpson is happily gifted by nature for the portrayal of such a vital and complex character. She is possessed of a soprano voice of great brilliancy, sweetness and power. Her experience as the creator of some of the best leading parts in later-day comic operas and musical comedies, notably "King Dodo" and "Woodland," should prove her ability.

The supporting company appears to have been selected with great care and discrimination. W. J. McCarthy, a clever dialect comedian, will be seen as the funny little Baron Strauss; Richard Karl, a buffo basso, who has no superiors, will be seen as Col. Maypatrick; Lyman Wheeler, a handsome and manly tenor, will be the Capt. Trevors, and A. B. MacGahan, a baritone with a glorious voice, will appear as the crown prince. The female contingent appears to be especially strong. Miss Lucy Monroe, a dainty and attractive comedienne, is cast for the little French milliner, Mlle. Fifine, and the specialty which she introduces in the second act is one of the big hits of the performance.

The same magnificent costumes, scenery and accessories that marked this opera as one of the most magnificently equipped ever seen, is promised.

AT THE METROPOLITAN

"The Thoroughbreds" Will Appear in Burlesque and Specialties During the Coming Week.

Astronomy as a fad is not apt to appeal with particular strength to the masses, but star gazing, that is far from being prosaic, and of the kind that affords diversion from the monotonous business life, or the increasing grind of every day life can be indulged in at the Metropolitan tomorrow afternoon and all next week when the constellation known as Frank B. Carr's Thoroughbreds, will commence their engagement.

A corps of clever comedians and a chorus of clever girls, graceful in pose and gesture, and radiant in gowns, which no one but an expert in Fashion's could describe, and two acts of wholesome comedy, tend to keep their auditors interested from start to finish.

There will be matinees, besides tomorrow, on Tuesday and Thursday (ladies' day), and Saturday.

AT THE BIJOU

Mysterious Caesar Will Present a Clever Illusion Act Next Week---Cook and Rothert, European Eccentric Comedians, Head the Vaudeville Bill.

Commencing with the Monday matinee one of the very best programs of vaudeville features will be seen at the Bijou.

The bill is headed by Cook and Miss Rothert, a duo of artists, who have toured every country where vaudeville is seen. Miss Rothert is one of the few artists who played the city of Paris for one year, becoming a great favorite. She was feted by nobility, and is said to be the possessor of more rare jewels than any other artist in vaudeville. The act presented by Cook and Miss Rothert is an eccentric comedy act, in which singing, bright comedy, and novelties are featured. The wardrobe and settings of the act are fine, while the ability of these clever people speaks for itself.

Trask and Gladden, singers and eccentric comedians and dancers, will offer an original act of their own. They are styled the "Fashion Plates of Vaudeville."

Bessie Babb, baritone comedienne, will be the principle singing attraction for the week, rendering several selections, in a rich baritone voice.

A comedy sketch of unusual merit will be offered by Sousa and Sloan, entitled "The Trickster," which is brimful of bright comedy and singing numbers, said to be very good.

As a special attraction and extra feature for the week, the mysterious Caesar and company will appear in one of the most mystifying acts of magic and illusions ever seen on any stage. Caesar features his own version of "The Trunk Substitute," which keeps the audience mystified from start to finish.

Isadore Silver will render "Bonnie Jean," one of the prettiest illustrated songs ever sung at the Bijou.

The moving pictures for the week will be a feature in themselves, showing "The Photograph Gallery." The opening scene shows the interior of the studio, the proprietor and his assistant who is more intent on mischief than on his duties. From the start of the pictures to the finish, the audience is kept in roars of laughter. Another picture will be shown entitled, "By the Sad Sea Waves."

Matinees are given daily at 2:45, and and evening performances at 8 and 9:30. Seats may be ordered by either phone for evening shows. A special school children's matinee will be held Saturday afternoon at 2:30. Performances will be given Sunday afternoon and night.

GOSSIP OF THE RIALTO

Richard Mansfield's Production of "Peer Gynt" and a Discussion of the Poetic Drama---Walker Whiteside and the Shuberts.

New York, March 2.—Mansfield's production of "Peer Gynt" at the New Amsterdam is the most vivid event of a dramatic season which must already be ranked as about the richest in a decade. Meeting Mr. Mansfield last autumn I was struck with the hold the character had taken on his imagination—he fairly bubbled over with its rollicking humors—and breaking a lifelong rule I attended his last dress rehearsal here. It was a stormy and protracted occasion, but it convinced me that in "Peer Gynt" this versatile and powerful genius has found a far greater range and scope than any other one piece has ever afforded him—a conviction that has been strengthen by the enormous success of the piece on the road. But for the present the play's the thing.

Who is this Peer, then, and whence does he come to us? Much misty nonsense has been written about him of late by scribes who have mystic symbols. And all along an authoritative account, clear and brief, has been at hand in Ibsen's own letters, published here by Fox, Duffield & Co. shortly before the master's death. Symbols? When the play was published, in 1867, the leading Scandinavian critic, Clemens Peterson, started the groundhog business through using it to deny the work any value as poetry. For what he saw wrong, as for what he failed to see, Ibsen rose into a towering passion. "He says the Strange Passenger is Symbolical of Terror," he writes to his friend and rival Bjornson. "Supposing that I had been about to be executed, and that such an explanation would have saved my life, it would never have occurred to me. I never thought of such a thing. I stuck in the scene on a mere caprice. • • • Why, proceeding in this manner, I will undertake to turn your works and those of every other poet into allegories from beginning to end • • • And tell me now, is Peer Gynt himself not a personality, complete and individual?"

Some ulterior meaning, of course, he does possess, else he could not interest us as he does. The mind and soul of the man Ibsen went into all he wrote. "Everything I have ever created as a poet," he set down in 1870 in a biographical sketch furnished to Peter Hansen, "has had its origin in a frame of mind, a situation in life. I never wrote because I had, as they say, 'found a good subject.'" Again: "Everything I have written," he says, "has the closest possible connection with what I have lived through, even if it has not been my own personal experience." Heine made little songs out of great heartaches; Ibsen made plays out of furious races.

"During the time I was writing 'Brand' I had on my desk a glass with a scorpion in it. From time to time the little animal was ill. Then I used to give it a piece of soft fruit, upon which it fell furiously and emptied its poison into it—after which it was well again. Does not something of the same kind happen with us poets? The laws of nature regulate the spiritual world also. After 'Brand' came 'Peer Gynt,' as though of itself."

As applied to the prose plays the simile is one of the most perfectly descriptive the world has ever known. With regard to these two poetic dramas a somewhat less ugly, if more banal, figure is permissible. "Brand" and "Peer Gynt" are twin stars, one green with tragic melancholy and one crimson with full-blooded comedy, which were struck out of the midnight sun by the same explosive eruption and which together give forth its true white light—the light of militant individualism.

"Brand," then, is the tragedy of Ibsenian Individualism, "Peer Gynt" its comedy. Bernard Shaw, apostle of the prose Ibsen, characteristically maintains that Brand, like the "Pillars of Society," is the villainous protagonist of idealism. The English translator of the play has, it seems to me, said a truer word. To him Brand was projected as the hero of individualism, but ended by being something else. The mind of Ibsen, he pointed out, was not remarkable for philosophic grasp. According to his own confession, he seldom or never read philosophy; he remarked with characteristic satire that

MISS JOSEPHINE BROWN.

John Stuart Mill was no doubt speaking the truth when he said that the better part of his work was due to his wife. To him individualism was a passion that led him into a position of which he could give no clear account. Something of the kind he himself confessed. One could not think out a thought to the end, he said, without coming upon self-contradiction. As a character Brand is magnificently "individual and complete." As the exponent of a philosophy of life, his end forgets his beginning. His heroic individualism led him into heroic crime. To some men the result might have been a qualifying thought, a more searching process of the mind. To Ibsen it was a qualifying mood embodied in a qualifying character—Peer Gynt.

Philosophically the individualism of Peer differs from that of Brand only in that it seeks the exaltation of the personal self instead of the exaltation of an idea. As Ibsen put it in a letter to Edmund Goose, Peer is Brand's antithesis. His desire is to be not a saint but a kaiser. At a later period Ibsen executed a precisely similar intellectual sidestep, though the fact has not, as far as I am aware, been pointed out. The irresponsive protagonist of womanly individualism in the spirit, Nora, was followed by the protagonist individualism in the material social world, "Hedda Gabler." Then the mind that regarded the structure of society, the splendid pageant of history, as one great shipwreck made Hedda a figure of false and sordid tragedy. To Ibsen's earlier and happier mood Peer's ambition appealed as grotesquely comic. In short, "Peer Gynt" is a travesty of "Brand." Somehow and somewhere the high tragedy of individualism had gone wrong. Let's see how it will help matters to show its low comedy! Make the visionary seer a visionary liar. Make the unscrupulous saint an unscrupulous sinner. Make the austere and forbidding priest a rollicking devil of a good fellow.

Both plays are in a sense autobiographic. "Brand is myself in my best moments—just as certainly as it is certain that by self-analysis I brought to life many of Peer Gynt's qualities." Ibsen's father, like Peer's, was a man of means, who had ruined himself and his family by dispensing prodigal hospitality. "I had the circumstances and memories of my own childhood before me when I described the life in the house of 'Rich John Gynt.'" "For Ase my own mother—with necessary exaggerations—served as a model." It is altogether likely that Peer's boisterously affectionate and amiably irreverent treatment of her was autobiographic. Ibsen certainly had Peer's violence of language and perhaps also Peer's lack of violence in deed.

In his poverty-stricken youth the narrow conventions of a small Norwegian town goaded him to such wild excesses that, like Peer, he became a social outcast. The mountain scenery of the play, the folklife and folklore, were doubtless also remembered from his childhood.

Some of the more prominent incidents, however, as well as the names of the hero—a real person then still remembered—were taken from Asbjornson's book of Norwegian fairy tales; while in modeling the whole Ibsen used the freest and most spontaneous invention. His comparatively brief prose plays required on an average two years to write. "Brand," very rapidly written considering its great length, was published on March 15, 1866. Already "Peer Gynt" had taken form in his mind, and by the middle of October in the following year its five long acts of rhymed verse were completed. To the American public Ibsen is known only as

(Continued on page 7, 2nd sec., 1st col.)

COOK AND ROTHERT
At the Bijou Next Week.

METROPOLITAN
FUN—MUSIC—VAUDEVILLE. 'PHONES: OLD, 969-L; NEW, 1720-D.

GOSSIP OF RIALTO

(Continued from page 6, second section.)

the exponent of grim and uncompromisingly ugly realism. He sacrificed all thought of beauty, as William Archer has remarked, to achieve his unexampled strength. It was what he had threatened. But at this time the blood of a poet ran in his veins.

As Rudolph Lothar tells us, "Peer Gynt" was first conceived as an epic. Ibsen's genius being for character it was inevitable that it should have taken on the dramatic form. But it was not intended for the stage, as he explicitly tells us, and as is evident in its length and multiplicity of brief scenes. Unlike the classical German dramatists, Ibsen had the fine artistic sense at once for the capabilities and the limitations of his medium. Lacking the true dramatic conflict of wills, and any consistently developed story, it has quite as much the nature of an epic as a drama.

But epic or drama, what an exuberance of humor and care-free satire, of vigorous life action and color.

All his life he has sought to realize himself by gratifying his appetites and his love of magnificence, and all his life he has sunk lower into insignificance. One woman, Solveig, remains true to him, the Gretchen in this Scandinavian "Faust." It has generally been said that her sacrificial love saves Peer from annihilation. Bernard Shaw impugns this motion to Peer, and finds in it only the last and greatest of his illusions. Ibsen leaves the question in doubt, though it seems more likely that he still believed with Goethe:

Das Ewig-Weibliche
Zieht uns hinan.

And would have said so more clearly if he had foreseen the interpretation of his Irish exponent.

When the play was published party strife was running high in Scandinavia. Peer was taken, and not without warrant, as a satire on the scatterbrain vanity and weakwilled Norwegian aspiration for national independence. Petersen, who belonged to the National party, attacked it on the ground that it was long-winded, with a philosophy that no one can understand, and as poetry offended the established academic canons. Brandes shared these views in general, though admitting that the play had some great beauties. "Ibsen's poem is neither beautiful nor true. Contempt for humanity and self-hatred make a bad foundation on which to build a poetic work. What an unlovely and distorting view of life this is! What acrid pleasure can a poet find in thus sullying human nature! This kind of endeavor must some day reach the end of its tether."

As for the philosophy, it has already been indicated that Ibsen himself never quite understood what he was driving at. Yet the general nature and tendency of Peer's musings are deliciously, laughably evident, and even more deliciously characteristic of the man. As for the poetry, Ibsen defended himself, in letters to Bjornson and Brandes, with consummate critical acumen, and with transcendent vivacity and boldness. Academic conventions were naught to him.

Today, after only 40 years, the poetic value of "Peer Gynt" is acknowledged throughout the world. Bernard Shaw ranks it as the greatest comedy of modern times, and here he will probably not be disputed.

Its career on the stage has been intermittent. In 1874 Ibsen wrote Edward Grieg, proposing that he compose music to accompany it. His idea was to "adapt" it "as a musical drama." Peer's monologues were to be "treated melodramatically, or in part as a recitative." It is, of course, the German art of speaking to the accompaniment of chords which he refers to as melodrama. The wedding scene is to be treated as a ballet and elaborated over what it is in the book. The fourth act is to be suppressed, and in its place Grieg is to compose "a great musical tone picture, suggesting Peer Gynt's wandering all over the world; American, English and French airs might occur as alternating and disappearing motives." Fortunately better counsels prevailed as regards many of Ibsen's specifications. The adaptation was recorded by Josephson, director of the Christiania theater.

It was first performed with Grieg's music at the Christiania theater Feb. 24, 1876, after a delay of two years. There had been opposition. "Would 'Peer Gynt' ever have been produced if Josephson had not put it on the stage by main force?" Nine years had elapsed since the book was published. Ten years later, in 1886, it was played in Copenhagen, in 1896 it had its third production in Paris, at "L'Oeuvre."

Mr. Mansfield's production follows precedent by coming at the interval of a full decade. How closely his stage version adheres to that of Ibsen and Josephson I have no means of knowing. It is reduced to about half the length of the original, and at that has to begin at 7:45 in order to end before midnight. But it contains about all of Peer's character and story, while the underlying philosophy is almost as clear as in the complete version. William Archer's advice to read the book first for the life and fun there is in it before tackling the philosophy holds good here. The playgoer will do well to avoid Mr. Mansfield's acting version, which has been put on sale, and read the entire text after seeing the play as projected on the stage.

Walter Whiteside and the Shuberts are now in communication, and it is said that as a result the actor may soon be added to the stars that shine in the Shubert's firmament. Mr. Whiteside's present vehicle for his dramatic abilities is "The Magic Melody," a play which seems to have caught its inspirations from the telling points of not only "The Music Master," but "The Lion and the Mouse." It is this play in which Mr. Whiteside will probably be seen here, with several other plays in his repertoire, and perhaps "Hamlet."

• • •

Making her farewell to America for this season in the same house she opened to vaudeville last October, Mrs. Langtry last week presented in Keith & Proctor's Fifth Avenue theater her one-act tragic play, "Nightfall and the Light."

• • •

Miss Josephine Brown, who was formerly with Miss Lillian Russell in "Lady Teazle," and afterward with Joe Weber's company, is appearing at Keith & Proctor's Fifth Avenue theater, New York.

• • •

An interesting and successful revival in New York last week was Kate Claxton in "The Two Orphans," at the Lincoln Square theater. Large and applauding audiences welcomed her back to her own, as it were. The cast was an adequate one and the play seemed to have lost none of its strength which made it famous when originally presented many seasons ago.

• • •

"The Rose of Alhambra," in which Agnes Cain Brown is the prima donna, concludes its stay in New York with the end of the present week, and again takes to the road.

• • •

Jefferson de Angelis finished his limited engagement in "The Girl and the Governor" at the Manhattan theater on Saturday last and immediately began a long tour which will take him clear across the continent and carry his season into early summer. "The Girl and the Governor" will be the first of the new comic operas to be heard in San Francisco since the shake of nearly a year ago.

• • •

Cutting will be of decided help to "The Tatooed Man," the comic opera in two acts in which Frank Daniels made his appearance at the Criterion theater. There is plenty of humor in the show, and Victor Herbert has some tuneful and striking music—he always does—but the libretto wanders around a great deal before it hits the places that tell.

Once upon a time Harry B. Smith wrote our librettos and we were glad. But in this instance Mr. Smith has gone into collaboration with a man named A. N. C. Fowler, and the consequence is a comic opera plot that, without trying to call it low down, is very much like a worm—you could cut it out at any point and there would be as much life to the part as there would be to the whole. For the smashing, good, waste-no-time comic opera plot, "The Red Mill" of Mr. Blossom still is at the top. "The Tatooed Man" goes back a little too much to first principles (Harry B. Smith might have made that joke himself)—they were all there—the four comic men who were not comic, Fatima, the discarded one, etc.

Mr. Daniels furnished the fun of the evening with the assistance of Miss May Vokes, who did the discarded, anxious-to-marry female act more than well. He was Omar Khayman, Jr., the pet of the shah of Persia, and a foe to temperance. He is temporarily in charge of the kingdom and is about to undertake a couple of executions (how about that one, Harry B.?), when he discovers that the condemned men bear a mark that indicates that he and they have been born under the same star and will die the same day. The first act has about ten lines referring to this plot and the second act about six.

The production is quite sumptuous, and a prettier lot of chorus girls is not to seen in New York. The company, however, is not a strong one. William P. Carleton, Miss Vokes and Sallie Fisher helped a lot; the rest were rather heavy.

There were times in the course of the evening when a very energetic person standing in the wings gave the performance the character of a public rehearsal. He would walk out, almost to the footlights and do a pantomime that indicated he was very much in authority, and apparently struck terror in the hearts of the chorus. Sometimes he wore his coat and sometimes he appeared in his shirt sleeves. When he was not holding forth, Julian Mitchell made graceful though frantic gestures. And we must not forget the electrician, who now and then would occasionally blow down the dumbwaiter for another ton of coal.

It was a peek behind the scenes for which we were very grateful.

It will be the music and Mr. Daniel's personality, however, and not this side show, that will make "The Tattooed Man" a go.

• • •

Eleanor Robson will revive "Merely Mary Ann" for a series of mid-week matinee performances during her run of "Salomy Jane" in New York.

• • •

E. M. Holland is to make a venture in vaudeville in a sketch being written for him.

• • •

Charles Frohman has secured the English rights to "Brewster's Millions," and will produce the play in London this spring. It will be altered so that the scenes are laid in England, with the principal characters Englishmen.

• • •

Florence Roberts will present d'Annunzio's "Gioconda" at special matinee performances in New York this spring in connection with Guerrera's "Maria Rosa." Miss Roberts first played it in San Francisco four years ago.

• • •

Andrew Mack, the comedian, composer and signer of sweet Irish ditties is to make another visit to the Antipodes, this time under the direction of W. M. Wilkinson. Of the American star who have visited Australia Mr. Mack's success on the occasion of his visit there a year ago was perhaps the most notable. The Australians took a great liking to the young comedian and his reception in Sydney and in Melbourne was very enthusiastic. During his coming visit he will make a more prolonged tour remaining in Australia thirty weeks if not longer. Mr. Mack's present company will be taken over intact.

• • •

Interest in the great fair to be given at the Metropolitan Opera house, New York, May 6 to 11, in aid of the Actors' Fund, is attaining national growth. Contributions and suggestions are being received from all over America. The fair will be the most colossal event of its kind ever attempted, and will appeal not merely to New Yorkers, but to thousands of out-of-town visitors.

The triumph of Miss Francis Starr in "the Rose of the Rancho," the new Belasco-Tully drama which is crowding the Belasco theater to its doors at every performance, is still the talk of the town. Never has the success of an individual artist, hitherto comparatively unknown, been more emphatic or genuine. It is not the sudden outburst of a clever young girl who has merely had the right opportunity, but the substantial, enduring, unqualified triumph which always is the reward of definite and deserving genius. Under the sure but gentle guidance of Mr. Belasco, Miss Starr has been brought to that point of excellence in her art which places her at once among the most applauded artists, and carries the frame of her fine achievement to every household through the country. Her personality and work seem to appeal with particular earnestness to the ladies; for, while every night at the Belasco sees the house entirely sold out, the rush at the matinees has been so tremendous for the past four weeks that it has been necessary to close the doors long before 2 o'clock and refuse the further sale of tickets.

• • •

Since November, 1906, when it became generally known that Robert Edeson was to relinquish the now famous De Mille play, "Strongheart," at the end of the present season owing to the great mental strain occasioned by three seasons' continuous playing of the same role, some nineteen actors and nearly as many managers have sent in bids to Henry B. Harris for the purchase or use of this successful play. "Strongheart," however, is neither "for sale" nor "to let" as Mr. Edeson's manager intends keeping it as one of a repertoire of plays for his star.

• • •

Geoffrey C. Stein, who plays the role of Thompson in "The Man of the Hour," has arranged to give a series of matinees of Gerhardt Hauptmann's so-called sacred play, "Hannele." When "Hannele" was given in this country some fifteen years ago it was quickly taken off owing to the great storm of disapproval which it aroused. Mr. Stein will continue in the cast of "The Man of the Hour."

• • •

"Way Down East" has returned to Boston for its tenth annual engagement, and there is joy in the hearts of the thousands of old friends of this perennial success who wait for "Way Down East" as the proverbial small boy waits for the circus. Brady and Grismer have already made fortunes out of this wonderfully productive play, which bids fair to run for a score or more years. They have two companies, which constantly tour the United States, often presenting the Parker play several times a season in the same towns.

The most enterprising chorus girl in the world has been discovered at the New York Hippodrome. She is Miss Mildred Bernhardt—commonly called "Sarah" Bernhardt—and in addition to appearing twice a day at the Hippodrome, she has opened a restaurant across the street from that institution, and serves two meals a day to over 150 chorus girls and men employed at the Hippodrome. Miss Bernhardt's restaurant is located in the basement of No. 135 West Forty-fourth street, and caters exclusively to employes of the Hippodrome. Outsiders who try to eat there are very likely to be told by Miss Bernhardt herself that all tables are reserved. She has all she can do to feed the Hippodrome girls and chorus men, and her restaurant is so popular that any afternoon after a matinee a line of from thirty to fifty chorus girls can be seen in front of her restaurant waiting an opportunity to get places at the tables.

Miss Bernhardt opened her restaurant two weeks ago, and at the conclusion of her first week's business she figured that her profits amounted to $71.89. Her salary as a chorus girl is only $18 a week, but she will not resign from the Hippodrome to run the restaurant.

"I get all my trade from the Hippodrome," she said, "and if I resigned, the girls would not patronize me. Besides, I can easily earn my salary as a chorus girl without letting my work interfere with my restaurant business."

"The Road to Yesterday" continues to enjoy an abundant prosperity at the Lew Fields Herald Square theater, where it is now in its ninth week. Minnie Dupree has made many successes on the New York stage, but she never appeared to such admirable advantage as in this novel play.

De Wolf Hopper is developing into the star theater debuter for the Shuberts. He is soon to open two important theaters, in March. The first will occur on March 11, when he will be the premier attraction of the New Dixieland theater at Jacksonville, Fla., and on March 30 he will open the new Mary Anderson theater, Louisville, Ky.

• • •

The approaching engagement of Ermete Novelli, the famous Italian actor, under Shubert management has brought forth one interesting fact. The editor of one of the important Italian newspapers in New York states that there now reside on Manhattan Island a greater number of the sons of the peninsula than in any city of Italy save Naples. In New York alone there are published three daily Italian newspapers and four weeklies. Signor Novelli is now playing in Mexico with his company and will be seen for the first time in America on Monday, March 4, at the Majestic theater in Boston. He will appear in New York a fortnight later at the Lyric theater.

• • •

Charles J. Ross, who is appearing in "The Social Whirl," lately let fall these pearls of wisdom to a reporter of the Kansas City Star: "I've made by bed; I must sleep in it. I've tried to be funny all of my life—that is, all of my life that I have spent on the stage. I've got to keep on trying to be funny. Do you think the public would take me seriously if I tried to do something substantial? Not on your life. They'd want to laugh where the business was most tragic. And why? Simply because for years and years they have seen me do this burlesque stuff. They think I'm steeped in travesty, and I couldn't rid them of the desire to laugh at me for years and years."

• • •

James T. Powers in "The Blue Moon," with Clara Palmer, Ethel Jackson, La Petite Adelaide and the original English Pony Ballet, is drawing crowded houses in every city visited.

• • •

Rida Johnson Young has proved two things: that a woman can write a successful play; also, that an actress can write one. With this double handicap, two hits in one year—"Brown of Harvard" and "Glorious Betsy." So away with moss-covered axioms.

• • •

George Cohan's former success, "The Governor's Son," is to be given in the provinces of England, with John Ford in the Cohan role. It will start out next month and may be given a London hearing.

• • •

Henry Miller will take "The Great Divine" to Washington for one performance on March 4. Earlier in the season, before the play had begun its phenomenal run in New York, Washington had pronounced it a bad play.

• • •

Harrison Grey Fiske has signed contracts with Percy Mackaye for a new play which is intended for the use of Bertha Kalich. The work is a poetic tragedy, offering in form, however, from Mr. Mackaye's "Jeanne d'Arc," which Mr. Sothern and Miss Marlowe are appearing in this season. According to the agreement the play for Mme. Kalich is to be completed by the first day of May, and Mr. Mackaye has gone to his country place in New Hampshire to devote himself to the task. Mme. Kalich has already won distinction as a tragedienne on the English speaking stage in "Monna Vanna," but in Mr. Mackaye's play she will have a role that offers even greater scope for her powers.

CHERIDAH SIMPSON.

PANTOMIME PLAYS IN AMERICA

By MLLE. DAZIE.

New York, March 2.—"Let's go to the Panto."

This phrase, so familiar abroad, is never heard in America, for the very good reason that pantomime has not thrived here, and because this very distinctive department of the theater has never established a vogue in New York.

Still, I am convinced that under proper conditions here, with the popular taste so well developed for the best in music and the arts, we will sooner or later accept and like pantomime. It is

"Dazie" Le Domino Rouge.
PHOTO BY WHITE.

a fascinating form of acting, which I believe, when once accepted and appreciated by Americans, will enjoy more than ordinary success.

I mean, of course, if it is done well and before a class of people who would enjoy fine opera, a good bit of sculpturing or a fine study in oil. That is the should be judged, and if it ever receives that consideration it is sure to succeed.

Every discerning playgoer realizes the important part pantomime plays in the work of such artists as Rejane, Navimova and Duse. Why not go a step further and allow descriptive music to take the place of words while the artist is telling a mute story in pantomime to fill the eye and enlist the mind.

A dramatic writer recently remarked that Americans are less demonstrative in their speech than other nations; that we inherit in a marked degree the conservative manner of the Puritans, and that in consequence the intricate code of gesticulation would never interest us.

At the same time Mr. Karno's comedians have had a splendid success here. I was discussing the question quite recently with that admirable pantominist, Billie Reeves, who is of the opinion that Americans do enjoy this class of entertainment when the story is so easily followed that words are unnecessary. As an example, he thinks that if the Karno company had opened in any other sketch than "The English Music Hall" they would have failed. In that sketch the character of the entertainment is so well understood and the humor of it so entirely in common with local conditions that it was screamingly ludicrous to our audiences.

But is it not pantomime of the music halls that supplies the most diverting amusement abroad. It is the fascinating beauty of "Pantaloon" or "The Scapegrace," which Miss Pauline Chase is making popular at Mr. Frohman's London theaters; the more poetic dance-stories which Guerrato and Otero have made so interesting, or the subtle art of Mlle. Gense or Mlle. Artois, which intellectual Americans are sure to find a delightful pastime if presented here.

Here is a striking example of pantomime presented before the wrong audience. One of the finest story-dances ever done in France or Italy, originally called "La Mere," was brought here under the title of "The Burglar and the Dancer" and executed by Miss Lalla Thurgate—who had been secunda ballarina at the London Alhambra—with utter failure. It played one wee kat the Twenty-third Street Theater, but could get no further booking. This pantomime contains one of the most dramatic situations ever constructed; it has a melodramatic tinge and affords the dancer fine opportunities. These would seem to be the most desirable qualities for New York vaudeville theaters. But it failed to please, and, what was more disastrous, it failed to attract.

At the same time I am firmly convinced that pantomime has the same chance of success here that it has realized in London.

I do not think any country in the world is so anxious to encourage novelty and newness in its amusement world, and if pantomime is once presented here under the proper auspices, with the right material and with the artistic touch it requires, I predict for it a distinct vogue and a permanent institution in America.

SCHNITZLER AND PSEUDO-REALISTS

By GEORGE HENRY PAYNE.

It is gradually becoming a recognized fact that no one is so narrow minded as the professionally liberal. Whether it is the rabid impressionists, who denies merit to all forms of painting except those that are admittedly under the influence of Monet and Manet, or whether it is the preacher who understands nothing not born of Huxley and Tyndall, one is always able to recognize in the extreme iconoclast, the very inverse of what he is supposed to hold true; truth in any form is desirable, no matter in what manner it may be expressed.

Some years back it was a very bitter fight to have one's admiration for Ibsen, Maeterlinck or Hauptmann not regarded as a form of eccentricity. Now these strange beings are accepted—and even popularized—and along their wake comes a horde of new beings who are just as "good as they are" from the popular "literary" point of view and who are accepted in the same indiscriminating way that their masters were rejected a century ago. New York has been slow in getting one of these masterlets, and the presentation of "The Reckoning" at the Berkeley Lyceum this week gave one a very good idea of what may pass from realistic drama if one is to be hypnotized by mere names.

Germany has made much of Schnitzler, and Germany, being Germany, can do so, but for the rest of the world Schnitzler has no message, and it is sad to be obliged to use the cant phrase. "The Reckoning" is not without some slight merits, but it is so hopelessly Teutonic, both in its construction and its sentiment, that one didn't need to have a mistress remove a cake from her lover's room to mark its geographical origin.

The theme, like almost all themes, for that matter, would have made an interesting play if written by an interesting man. The gay young dog, who is called on suddenly to fight a duel with the wronged husband and then realizes how happier he might have had had he the mental capacity to be content in the love of a humble girl who worships him—that might be a very broad and humble subject, if the gay young dog were made human. But Schnitzler's Fritz was as human as a linotype machine; he ground out the lines that moved the play toward the end, but not one of which revealed any heart, liver, kidneys or any of those interesting tokens of real life. Some of the lines were pretty, but they were unmistakably "lines"—the dramatist's lines that tell a story, but not the natural speech of living people unconsciously denoting character.

The mere fact that most of the dialogue was flat may seem a sufficient indication of realism, but one needs only to reread a single page of Ibsen, or of Pinero, for that matter, to see what the author was aiming at and what he failed to do.

It is in Schnitzler's "Gefartin" (The Departed), that one finds the idea that is the main dramatic situation in Mr. Pinero's "His House in Order." The English dramatist, I believe, has said that he was unacquainted with Schnitzler, but the two are startlingly alike. What a difference in a treatment, though!

When the curtain goes up a room is shown from which a coffin has just been removed. The husband has been separated from his wife for years. A woman appears and asks of the widower to look in his wife's writing desk and give her the letters that her husband had written to the dead woman. The widower finds them and they are proof of the wife's guilt. He drives the visitor from the house, locks up the death chamber and departs for another part of the country to be forgotten and to forget his grief in work.

No matter to whom the idea belongs, how incontestably superior is the play of Mr. Pinero!

ARTHUR SCHNITZLER.
FROM THE ILLUSTRIERTE ZEITUNG.

DR. HOAG.

Dr. Hoag will be in Superior, Wis., at Hotel Superior, Wednesday, March 13, 1907; office hours from 1 p. m. to 9 p. m., and also Thursday, March 14; office hours from 9 a. m. to 9 p. m.; and in Ashland at the Commercial house, Friday, March 15, 1907, where he can be consulted privately and free of charge.

THE SUCCESSFUL CHICAGO SPECIALIST.

Cures all affections of the Nose, Throat, Lungs, Stomach, Liver, Kidneys and Bladder, together with all Nervous derangements, and this reflex action upon the system; all affections of the Brain and Spinal Cord, Blood Impurities and taints, Skin Diseases, Rectal Diseases, Stubborn, unyielding cases of long standing, chronic in nature which refuse to yield to all other methods of treatment.

DISEASES OF MEN.

Those secret ailments, peculiar to the sex, including Varicocele, Hydrocele, Nervous Debility, Errors of Youth, and their baneful results, Infectious Diseases and all Blood Taints and Skin Eruptions of every nature he cures in less time than by any other treatment.

CONSULTATION FREE.

Address for home treatment, Dr. Chas. A. Hoag, 6362 Minerva Ave., Chicago, Ill.

PRACTICAL STUDENTS OF NATURE'S MYSTERIES

Their Work Has Brought About the Material Progress Which Makes the World of To-day So Different from the World of Yesterday---This Places Them Alongside the Rulers, the Soldiers, the Statesmen and the Captains of Industry---Luther Burbank, the Plant Wizard, as a Scientific Topliner---Great Corps of Farmers' Sons, Turned Scientists, Who Are Working Along Similar Lines---Thirteen Fine New Fruits.

By Dexter Marshall.

(Copyright, 1907, by Dexter Marshall.)

Nowadays the eye of the world is turned as constantly and with expectation as keen toward the practical scientist, the man who spends his life prying into the mysteries of nature, as it is toward the statesman, the captain of industry, the explorer or the warrior. There's a good reason for this. It is to these inquisitive seekers after nature's secrets that practically all the material progress which differentiates the world of the twentieth from the world of the fifteenth century is due.

But for some one like Watt, who discovered the unsuspected power of the vapor of water, there would be no steam engine. But for some one like Morse there would be no telegraph. But for some one like Edison the telegraph would still be in its infancy, and we might now be dependant upon kerosene lamps for light; to mention only a few of those whose discoveries have brought about the general and amazing transformation.

Ever since the days of Watt, whose engine was ready for use 142 years ago, some individual practical scientist, although not always the one who deserved it most, has been the object of more special interest on the part of the world at large than any of his fellows. For the last two or three years Luther Burbank, the Plant Wizard of Santa Rosa, Cal., has been the scientific topliner of the whole world.

Whether he is entitled to the supereminence he has reached or not, it is certain that his investigations have added millions to the nation's wealth, if only the potato which he produced, when nothing but a boy is considered. It was introduced just when many older varieties had begun to fail, and its extraordinary productiveness has proved the salvation of many farmers.

Ever since his "endowment" for a limited term of years by the Washington Carnegie institute, and the publicity which it brought to him, Burbank's visitors have been so numerous that his work has been interfered with, and he has had to post his place with "no admittance" signs. At the same time he has been exploited in the newspapers and the periodicals of the entire civilized world as have few other scientists in history, perhaps, except Edison in his early days and the Curies in the years immediately following their discovery or radium.

Great and beneficial as Burbank's discoveries have been, and will be in the future—most of them are still so new that the ultimate benefit may as yet be guessed at only—they are bound to be overshadowed ultimately by the work of the corps of practical scientists who are constantly kept busy all over this country, and in many other parts of the world, under the direction of the department of agriculture. Few of these men have secured personal fame, none of them can become rich at their calling, since the salaries paid are not large, but the value of their operations to the country cannot be overestimated.

It cannot be estimated at all with any degree of accuracy, but it has amounted already to many millions more than it has cost, and, being cumulative, must increase enormously in the future. Like Burbank, most of them were farmer boys, whose attention was originally turned to the secrets of nature, because, being in the country, they were living close to nature, and it was natural for them to study plants and bugs and animals.

Not all of them are engaged, as Burbank is, in finding out how to improve the quality of the food and other useful plants. Some devote themselves to improving the strains of domestic animals, others to the fertilizing of the soil, and so on; those who are striving to produce new varieties of plants work sometimes in close cooperation with those who are fighting the destructive insects and the diseases which attack the plants.

Saving America's Cotton.

This is particularly true with regard to the cotton plant. For years two great divisions of the department, the bureau of plant industry and the bureau of entomology, have been putting up a desperate fight against an insignificant looking insect, originating in Central America. Its ravages, unchecked, would undoubtedly have reduced the American cotton crop enormously, and perhaps have wiped it out completely, thus ruining thousands of cotton planters, and taking away from millions of toilers in the fields and factories their means of making a living.

You have read of this insect as the cotton boll weevil. It was first encountered in the United States in 1892, when it crossed the Rio Grande from Mexico at Brownsville, Tex. Nobody saw its crossing, nobody knows exactly when or how the crossing was accomplished. It is supposed, however, that the weevil came in cotton brought across by Mexicans to be ginned.

That was fifteen years ago. The unwelcom invader has been traveling north and east ever since, at an average rate of forty-five miles a year. It has invaded nearly the whole of Texas and has crossed Arkansas and entered Oklahoma to the north. Eastward it has begun to occupy the plantations of Louisiana. It has already damaged the cotton growing industry beyond computation.

The first thing done to check the weevil's work was to forbid the bringing of any more raw cotton into the country from Mexico. The next thing was to set the government bugologists upon the weevil's trail. They were told to find out how it might be kept down exterminated, if possible.

It was found that the winters in the United States, even in the Far South, killing off so large a proportion of the hibernatling weevils that there are not enough of them to do much damage any year until late in the season. Thus the early maturing variety of cotton suffer much less from the bug's ravages than those which mature later. The bureau of plant industry experts were, therefore, directed to find or produce an early cotton.

Both bureaus set to work with all possible energy. The plant expert was sent to Central America after an early cotton. He was unable to find such a thing, since it doesn't exist there. He did find the apparent home of the weevil, and he found something else which was highly interesting and apparently important. His find was the great red enemy of the weevil, which is known as the Guatemalean ant. This ant eats weevils alive; it doesn't eat much else besides, and in Guatemala and other parts of Central American countries it keeps the weevils down so that the crop doesn's suffer unduly.

Obviously it would be a good thing to bring the Guatamalean ant to the United States. This was done, and at first the ant did good work here, devouring the weevil with the same avidity as at home. Later it was found that the climate of Texas, Arkansas and Oklahoma was too dry for the ant, which shriveled up and died. It can stand hot weather if it is damp, but heat and dryness combined wipe it out, and indeed the combination is too much for the weevil itself. Besides the winters in the United States killed off the ants, and few of them are now left in this country.

This ant was naturally accorded much attention in the newspapers; sometimes wisely, sometimes otherwise. In Washington they still tell, and chuckle as they tell it, how one newspaper asked for pictures showing: First, the hosts of weevils advancing to destroy a field of cotton; second, the hosts of Guatemalan ants waiting to destroy the weevils, and third, the battle royal between the opposing hosts of ants and the weevils.

At the present time the two bureaus are developing ways to kill the weevil and to make the cotton mature earlier. Both bureaus have great work. They have found out how to handle the weevil pretty well in the three comparatively dry states which it has so far invaded. It is now about due in the much moisture state of Louisana. When it gets into the tall, rank cotton that grows in the wet soil and damp climate of the lower Mississippi valley it may be that the bug will have to be attacked from entirely new angles.

The two men now in charge of the field work against the weevil are W. D. Hunter who is devoted to the study of insects that attack crops in the Southern country, and Dr. Hebert T. Webber, who conducts a far more elaborate system of systematic plant breeding than Luther Burbank's. Hunter is an attache of the Entomological bureau, Dr. L. O. Howard chief; Webber is on the staff of the bureau of plant industry, Dr. B. T. Galloway chief. They have many assistants, scattered over several states, and they work under the general direction of their respective chiefs. Still, these two young men may properly receive much personal credit for what they have already done, and there is great hope that their work will finally result in practical control of the weevil.

Earlier Cotton Now Assured.

Since no cotton maturing in a short enough time after planting to render it practically safe from the weevil's ravages could be found in Central America Dr. Webber's energies have been devoted to producing what may be termed a new "short term" cotton by working along the lines adopted by Burbank, though, of course, not originated by him. Cotton that would mature in a few more than a hundred days would fill the bill very well in the dry cotton country, because it takes considerably more than that time after spring opens for the weevil to become numerous enough to be greatly harmful.

The fact that such varieties of cotton were grown in the United States was cause for hope, early in the fight, that the weevil might ultimately be defeated. That nearly every "early" cotton yielded meagrely and unsatisfactorily was the other side of the story.

It was believed that, in time, a satisfactory early cotton could be grown, however, and both Dr. Galloway and Dr. Webber are confident that the problem is now well along toward solution.

Dr. Webber's work in producing the desired short term cotton that shall produce well has been carried on with the greatest patience and according to a carefully thought out plan. This plan includes the maintenance of a large number of experiment stations in the cotton belt, mostly outside the weevil infested districts. Considering the amount of work done, it has been carried on at very reasonable cost.

Each station is located upon the land of some planter, selected pointly by the planter of the vicinity and Dr. Webber. He makes the condition that the soil and climate shall be fairly normal, but askes the planters to select one of their number whom they all consider a responsible, careful man. The planter chosen, a proper patch of ground is selected and planted with seed selected by Dr. Webber. Often this seed is the result of crossing an early, poor yielding cotton with a late cotton of heavy yield.

It is cultivated at the expense of the planter. If the yield is better than the average of the plantation's cotton fields the planter benefits by it; if less, the government stands the loss; such losses have seldom had to be borne.

When the cotton is ginned only the seed of plants that are both early and of heavy yield is saved for planting the next year. Sometimes not more than 1 per cent is saved. Next year this seed is planted and the process of selection is repeated from year to year until the entire yield is up to a certain standard. When enough seed of this standard is produced it is distributed among the planters and if it continues to yield well and mature early it becomes popular.

Dr. Webber tells of an early "defoliate" cotton—that is, a cotton whose stalk bears few leaves—produced in that way that matures by August 15, long before the weevil is ready to do its deadliest work. The "defoliate" late variety, which was crossed with an early cotton to get this result, did not mature until some time in October. Thus a gain of nearly two months of precious time, sure to be worth millions to the planters when enough seed of the new variety has been produced to allow of general distribution, may eventually be made.

Dr. Galloway, the chief of the bureau, tells of a new early cotton named the Triumph, developed on a cotton breeding labratory near Waco, Tex., which matures ten days earlier than the variety hitherto grown in that part of the state. This cotton is produced naturally. In other words, it was a sport, but, luckily, a sport which was noticed and developed. Ten days may not seem like a long time, but the gain of more than a week in the race with the destructive weevil is bound eventually to be worth millions. The seed is ready for distribution this season, while the variety described by Dr. Webber is not. The latter has not even been named as yet.

The breeding of plants carried on by the department is not confined to cotton, nor to the South. There are ten tobacco breeding labratories in the states of Connecticut, Kentucky, Tennessee, Ohio, Florida and Virginia; twenty-one for cotton in South Corolina, Georgia Florida, Alabama, Mississippi, Louisiana, Texas, Oklahoma. Tennesee and Arkansas; twenty-three for corn in Connecticut, Maine Maryland, South Carolina, Florida, Ohio, Tennesee and Texas; five for arid plants in the so-called desert regions, one for pineapples in Florida; three for oats and potatoes, Prof. R. L. Bennett has been closely associated with Dr. Webber in his cotton work.

Dr. Webber has also sought nature's secrets quite successfully in the production of citrus fruits. By crossing oranges, lemons, grape fruit and other fruits of that general class he has produced thousands of varieties, most of them of no value, but thirteen new and valuable varieties have been found and named.

The best of these, a hybrid got by crossing the tangerine orange with the grape fruit, is known as the Tangelo. It is larger than the tangerine, but smaller than the grapo fruit, with a flavor approaching that of the latter, but with the loose skin of the "glove" oranges. It is too early as yet for this fruit to have come into general cultivation, but it will be a feature of the market when it is ready.

There is one great and important difference between the work of Burbank and that of the department plant-breeding labratories. Burbank's labratory is located in an exceptionally favorable spot, both as to climate and soil. His plants receive expert care while being developed, all the laborers of the Burbank place being specially trained for their work. Plants and fruits developed under such conditions and with such care may prove altogether unfitted to the conditions they must encounter when distributed among the planters and farmers.

The department's labratories, on the other hand, are scattered over the country. No two are alike in soil or climate. Some are in places where the rainfall is heavy; others in regions of comparative drought. Although directions for the planting of the seed and the cultivation of the plants are issued by the department experts, the actual planting and cultivation are carried on by such laborers as are employed regularly on the farm or plantation where the work is done.

It may be that Burbank attains the more brilliant results, apparently, but when a new variety has been thoroughly developed by the department it is pretty sure to stand the practical test of actual cultivation which is the main thing.

Fighting the Weevil Direct.

The Guatemalan ant, which eats weevils, is not a parasite enemy—that is, one which lays its eggs in the weevil's larvae, which then produce the parasite and not the matured weevil—but a predacious enemy.

There are in Central America, however, certain parasites which destroy weevils by the million, and there was some hope that they might be made valuable in the United States. That hope proved groundless, but a curious thing happened a few years ago when the cotton fields of Texas developed their own cotton boll weevil parasites, in the shape of two varietes of flies, called chalcids by the scientists.

This was altogether unexpected and altogether welcome. The flies are minute creatures, not more than one-tenth as large as the weevils. In some way the female chalcids, which from the beginning have been in the habit of laying their eggs in the larvae of the so called strawberry weevil, have found out that the cotton boll variety is much the better hatching place for the chalcid eggs. The mother flies didn't discover this all at once, but gradually here and there all over the weevil infested districts of Texas.

When Hunter and his men who are fighting the weevil direct learned about the chalcid's discovery, steps were taken forthwith to extend the habit of nesting in boll weevils. This can be done in one way only. When the chalcid flies of any given locality develop a tendency to shift from the larvae of the strawberry weevil, the fact is at once apparent from the decrease of the weevils.

When this fact is communicated to Hunter's men they collect as many of the chalcid flies as possible, in the proper localities, and distribute them in other localities where the flies have not learned the advantages of the weevils' larvae as nesting places. The successful transportion of such a colony of "educated" chalcids to a location where the chalcids are not so knowing is sometimes productive of satisfactory results the same season, since the chalcid flies propogate quite as rapidly as the weevils, which is remarkable. Mr. Hunter estimates that a female weevil that lives through an entire season, as some kept under observation have been known to do, produces 1,334,000 individual weevils.

Once a chalcid egg is deposited within the body of a weevil larvae it is certain that the latter will never develop. As soon as the egg of the fly hatches out, the grub begins at once to feed upon the substances of the body with which it is surrounded, and of course, the weevil larva never develops, but dies. Undoubtedly the transformation of the chalcid fly of this country into a parasite of the weevil will ultimately prove one of the most important agencies for the keeping of the bug in check, quite as effective, in fact, as the relative severity of the winters. The great dryness of the summer climate in parts of this country is also beginning to tell on the weevil. It seems to need humidity almost as much as its enemy, the Guatemalan ant. Dead and dried up weevils are often found by the thousands among the cotton bolls of Oklahoma in unusually dry seasons.

There is encouragement also in the fact that the planters have learned that they can keep the weevil down very closely by uprooting and burning all the plants after the bolls have been gathered. This is somewhat expensive, to be sure, but the increased yield of the next's crop is many times more than enough to offset the expense.

Mr. Hunter devotes the entire season, from cotton planting to picking time, each year to practical work in the weevil infested districts. Several stations for the study of the weevil and its ways have been established, all located upon plantations owned and operated by planters of responsibility, generally selected by their neighbors. A patch of cotton land is separated from the main plantation for treatment, according to Hunter's directions. It is screened in carefully to insure proper conditions. The planter is guranteed against loss, and the services of Mr. Hunter, or an assistant, are furnished free, but the planter pays the expense of seed and cultivation. If the course adopted by Mr. Hunter results in a smaller yield upon the experimental patch than upon the remaining cotton land on the plantation, the government makes good the deficit. This happens sometimes, but not often.

The department does not confine its insect fighting to the cotton boll weevil by any means. It has farm-bred, college-trained scientists who are constantly watching and combating the cinch bugs, the various moths and all the others which are as dangerous to the crops of the North as the weevil is to the South's greatest crop.

San Jose Scale—Locusts.

Dr. L. O. Howard, the head of the entomological bureau, and C. L. Marlatt, next in command, are both devoted to the practical side of insect study. It was Marlatt who traveled through a large portion of the Orient to find a parasite that would destroy or keep in check the so-called San Jose scale that has done such enormous damage in the twenty-four years since it was introduced in California by James Lick on some ornamental plants imported from the Orient.

Marlatt found no native parasite, but his achievement was one of the most brilliant of its sort ever recorded, nevertheless. He found a "predacious" ladybird—a neat footed bug, much like the American ladybird, but black, and carrying two red spots—which, in the part of China surrounding Pekin, its home, feeds on the scale as the mahogany ant feeds on the boll weevil in Central America.

The story of the importation of a large number of these bugs, only a single pair of which survived the voyage, has been told, and so has the story of Marlatt's travels in search of a scale destroyer. They were largely undertaken as a labor of love, the government paying only about one-seventh of his expenses, and for some time after the Asiatic ladybirds had been established here they did great work. Neither in Asia nor America, however, can they ever exterminate the scale, since, if the scale is exterminated or kept below a certain limit, the ladybirds die also, as it is their sole food.

It was found some time ago that a spray of lime, sulphur and salt wash is worse than the ladybird for the scale, and the use of the wash has reduced the scale to such numbers that the ladybirds have probably starved to death; at all events, although the pair brought here in 1902 multiplied many fold, in many parts of the country, a few of their descendants are now to be seen in the United States.

Mr. Marlatt, like most of the agricultural department scientists, was born on a farm and became interested in insects as a farmer's boy. He lived in Kansas when young, and has witnessed two or three of the devastating grasshopper visitations there. He knows as much about the grasshopper and all other locusts as any man alive. His monograph on the periodical cicada, issued as a bulletin by the department, is the final authority upon that insect.

Although known as the seventeen-year locusts in parts of the country where it appears every seventeen years, it is the thirteen-year locust in other parts where its period is fourteen years shorter. In a general way the seventeen-year locust affects the Northern states, the thirteen-year variety the Southern, though there are seventeen-year locusts as far south as Northern Georgia—they follow the high ground of the Allegheny mountains—and the thirteen-year locusts as far north as Southern Iowa. There are few of either sort west of Missouri and practically none in parts of the country where pine forests have ever grown.

Despite their periodicity locusts of this variety make their appearance in some parts of the country every year. They are divided into broods and Mr. Marlatt has looked up the period of every one. There were seventeen-year locusts last year in a dozen states—Massachusetts being the most easterly, Georgia the most southerly and Illinois the most westerly. This year the greatest brood ever observed is due in thirteen states. It is of the thirteen-year period and the states it will infest include some of the states visited by the seventeen-year brood of 1906, Indiana, Kentucky, Tennessee and Georgia being among them.

The coming of the broods in future years has been worked out in the Marlatt bulletin till 1914.

LUTHER BURBANK.

TO SAVE ALLIGATORS.

National Government Intervenes for Al most Extinct Saurian.

A century ago the waters and lands now in the possession of the United States government were the habitat of the world's biggest fish, animals and reptiles, says the Los Angeles Times. The buffalo was monarch of animals that roamed the plains, the sead was worth more money than any denizen of the deep, and the ferocious alligator ruled in the swamps of the South. The day of their native supremacy is gone, and now they would actually suffer final extermination but for the protecting hand of Uncle Sam.

It is only in late years that sentiment has grown up in favor of the alligator. That unwieldy, ugly creature was once regarded as a foe to the public order, and his complete extermination at a stroke would have seemed the best thing that could happen, but the commercial uses to which the tough alligator hide can be put have made a new sentiment, and soon national legislation will be invoked to restrict indiscriminate killing of the swamp kings.

Not sentimentalism alone argues for protection of the last survivors of Uncle Sam's lower giants. The buffalo had to go from the plains in order to make way for man, but he should have been driven into herds and preserved in numbers. The killing of the seal to get the skins is a laudable and proper use of the animal, provided the killing is done with such system that the race of seals be not exterminated. So with the alligator. Take the lives of as many as are needed for the purpose of commerce, but do it according to foresighted wisdom.

The alligator is nearly wiped out, but the big saurian multiplies quickly and in great numbers, so that with only reasonable protection he would soon flourish again.

Not so long ago the swamps, rivers and bayous of Florida and other Southern states abounded with the creatures. Formerly they got as far north as Georgia, but now they are only found on the southern coast line of the extreme Southern states. They are still numerous in the Everglades, for the reason that it is hard to get at them there.

An early explorer says he found alligators so plentiful in Florida that once at a point where the St. John's river is half a mile wide they were packed so closely that had they kept still he could have crossed the river on their scaly backs.

At first it was for the amusement of the hunter that the alligator fell. It was esteemed great sport to sail down a river and shoot the saurians, leaving their bodies where they fell and making no attempt to sell the hides.

Later, as Florida began to settle, the alligators were killed off for the protection of the people. The reptiles had preying tendencies that made them a constant nuisance. Ordinarily they subsist on fish, but when hungry they do not hesitate to come inland and steal whatever comes within reach of their huge tails, a blow from which means the death of lambs, pigs and even small calves and colts.

Every time the 'gator attempted inroads a posse would be formed, and a trail of alligator carcases would be the outcome of a ten days' hunt.

It was not, however, until the saurian developed commercial possibilities that the real devastation began. Trunks, traveling bags, purses and all kinds of leather novelties could be made from alligator hide. The traffic took such sudden bounds that in a short time Florida was sending North about 200,000 skins annually.

The favorite method of hunting was to go out at night and blind the reptiles with a strong light from a lantern strapped to the head of a hunter. Thus equipped, he could get within a few feet and use his heavy revolver or short gun with deadly effect. At the present time, despite the decimination, there are still enough alligators to make the business of hunting them a profitable one to hundreds of Indians and whites.

In addition to the sale of skins there is a demand for baby 'gators, which are stuffed and sold.

Although the alligator is a great swimmer, he gets around on land but slowly. Yet they have been found fifteen miles inland. They can live out of water for an indefinite period as long as they can get plenty to drink.

DON'T DO IT.

Lake Crystal Union: A minister's wife in Mankato, it is said, was busily engaged in mending clothes when a neighbor called for a friendly chat. After a few minutes talk the caller remarked as she inspected a basket of miscellaneous buttons of all kinds: "Why that's one like my husband had on his last winter's suit." "Indeed," said the minister's wife with a smile. "Well all those buttons were found in the contribution box and I thought I might as well use them. What—must you go? Well, good-bye, come again soon."

How that poor woman must have suffered for a few months for her husband's meanness. Don't drop buttons in the contribution basket. They will turn up against you in the day of judgment.

SKY PILOT AND THE LUMBERJACKS

How the Gospel is Carried to the Lumber Camps.

Work of the Logging Camp Mission of Minnesota.

Neighboring Towns Are Greatest Enemy of Sky Pilot's Work.

By JOHN T. BRABNER SMITH, of Akeley, Minn.

John Wesley preached as he stood on a grave stone for a pulpit, and my companion, Sky Pilot Date, used the grindstone in the men's quarters for his reading desk and to rest the books and Bible where he preached. Sky Pilot Ward and the writer were more fortunate. At one camp we had a long table made of pine boards which was used by the men for writing and reading purposes, at other camps, a barrel neatly covered with a potato sack or a soap box acted as pulpit. In most of the twenty camps in Minnesota, the preacher stands throughout the whole service without having any place for Bible or song books. One preacher held the books, while the other preached the gospel. As a general rule the Sky Pilot is alone and finds it convenient to put the song book into his pocket while he preaches and to put the Bible away while he sings.

Visit to the Camps.

After waiting two hours for the logging train at the depot, the engine's big light appeared and a number of lumberjacks made a mad rush for the caboose. Dressed in a long fur coat, with cap and high boots, and carrying a camera, I entered the caboose to find it comfortably filled with men of various nationalities. Each man had a ticket in his cap, which told the number of the logging camp to which he was going. We were soon going rapidly north toward the vast northern pineries. Several times I caught the side of the caboose in fear we were going over as we bumped along over some uneven road, then up and down the grade, around short curves, past lakes, and into the still and majestic forest. How peculiar and fascinating it was and ever is. The solitude and wildness, the trees lifting their heads loftily to the sky defying the wind and the ravages of nature, only to fall a prey to the genius of man.

As the train pushed into the wilderness of trees, nature spoke of man's littleness, and yet he was pushing onward to subdue it with the sweat of his brow.

"You'll have to get down and into the caboose," suddenly said an imperative voice to me, "when the boss comes around." But the good conductor did not tear me from my exalted position at the look-out of the caboose, when he took up the permits to ride on the train from the men. The superintendent of logging had given me a yearly permit with the injunction to "go oft into the woods to see the boys; they will be glad to hear a preacher."

At every camp, which were numbered, the conductor put off the men, who were consigned to their respective camps.

My traveling companion had been in the logging business for many years, and had gone through many terrible experiences. He walked with some difficulty, the result of one of the accidents on the logging train the previous year, when his leg was broken in a wreck, which occurred in the depth of winter. He bespoke for the Sky Pilot a warm and friendly welcome at the camps and made my journey pleasant and also made it possible with the hel of the conductor, for me to arrive at the camp just after the time announced for the preaching service. With much difficulty the engine pushed the cars laden with logs up a huge hill and around a very peculiar curve. We were about twenty-five miles from town, and without waiting for supper, being two hours late, I went to the entrance of a long wooden building, covered with tar paper, from which I could faintly hear the sweet refrain of a hymn. It was dark and cold without and the snow was almost two feet deep in the woods, but as I opened the door, the lights dazzled my eyes and the heat came rushing into my face, as there came forth the words:

"It came to my heart when all tattered by sin,
I sat in the prison of doubt;
Like an angel of old the glad story came in
And led me triumphantly out."

The story that never grows old
Tho over and over 'tis told;
The story so dear bringing heaven so near,
Sweet story that never grows old."

And the Story came swiftly into my mind and it never was so dear to me as that night, with the one exception when it became the guiding star in my life's pilgrimage.

"Sing her again, boys; sing her with a will, never mind the preacher," said a tall, thin man standing in the middle of the large camp. The song though was weakened in volume, and I felt the gaze of 125 men fixed on me as I took off my outer garments, which were many.

With a little encouragement the men sang cheerily, "Tell Me the Old, Old Story," and began to recover their timidness caused by a stranger in the camp.

Sky Pilot Ward then read from the gospel of the Love of God in sending His Son into the world to redeem it from sin.

"Give the boys the best sermon you have, pastor, and not any 'clap trap,'" said my friend in charge of the logging train.

If ever the writer preached with a direct purpose, it was that night from the text: "The Lord Reigneth, Let the earth Rejoice."

In spite of all that the men had said of politic, monetary, and other powers, the Lord and the Lord alone reigns. We tried to prove it by the history of nations, of special individuals of prominence, an in the individual experience. Then in the punishment of sin and rewards of virtue, citing nations and individuals, and finishing the sermons by showing that "The Lord Reigneth" even in the darkest hour in the world's history, and in the death of Christ on the Cross. Never shall I forget those eager, searching, questioning eyes from the men around me in the bunks, above and beyond me, as they sat on the side or lay in their sleeping places on their chests with their heads lifted to listen. I had preached the same sermon to what is considered a fairly representative church on the Sunday evening, but these men evidently understood and appreciated it just as well as my other regular congregation.

Can I describe that scene as we sung "Jesus, Lover of my Soul?" We were in the men's quarters in which they sleep and spend their time on Sunday and evenings and holidays. It was about 125 feet long and forty feet wide, very roomy and airy. Around the sides were three ties of beds or bunks in which the men slept at night or rested or wrote letters before bedtime or Sundays. The bunk was four feet wide and about six feet long with hay at the bottom and heavy woolen blankets for covering. In each bunk were two men, thus six men were accommodated in the three bunks erected over each other.

In the center of the camp were two large stoves made of heavy sheet iron, six feet long. Near there were long planks forming a table, 4 by 16, for writing purposes, on which had been papers and magazines. This table we used as reading desk. It being night, the men hung up their woolen socks and pants to dry, and as some men wore two and three pairs, the socks drying over head and around me as I preached must have been nearly 300 pairs. Mittens and other wearing apparel were also hung up to dry, they had been wet or frozen through the day. Rubbers and shoes also were hung high in the air to dry. The men sat at the edge of the bunks chiefly on the lower tier, but there were also a number who remained in their own bunks and leaned over us from above to listen as we sung.

This camp was in charge of the bull cook, who sweeps it out, makes the beds, allots the men their bunks and keeps the fires burning in the stove. He also gets up first in the morning, and takes the lunch into the woods, when the men are too far away to come home in the middle of the day. It is his lot, also, to cut wood and carry water for the cook, and he seems to be the butt of all the jokes and pranks of the men in camp. His work seems a thankless job, yet we found one of these men who loaned up his lamp and asked us specially to sing, "The Lily of the Valley," and he joined in the singing, though he was in bed resting, because he had to be out very early next morning. Evidently he had found "The Lily of the Valley and the Bright and Morning Star."

Immediately after the service, a man called out, "I found it," and Sky Pilot Ward explained that he had promised a New Testament and hymn book to the man who first found John iii, 16, he simply giving the text, the man finding where it was. The man got the book.

Just then another man came forward to claim the book. He had found the place of the text, and so Ward gave him a book. On the doors of the camp, and on its portals the Sky Pilot had tacked several large cardboards, on which were texts of scripture, and also the words, "When did you last write to mother?"

Text cards were also nailed to the office doors and the cook camp, and thus, underneath the words "Office," one read, "God so loved the world that He gave His only begotten Son that whosoever believeth in Him should not perish but have everlasting life."

The next day we visited in the camp with the men and spent some time in the office with the logger and the foreman and clerk. Late one night in the week the Sky Pilot had a very peculiar experience. It was after 9, and all lights had gone out in camp. We had walked four miles to a camp and preached, then after the meeting walked another four miles through the woods and deep snow to camp to find everybody in bed. We knocked at the office door and got inside to find two beds, in which were two men. Both men jumped up to give us the beds, and almost quarreled over which man should leave the building and go and sleep in the bunks. As the men talked I turned and saw on a little table some books. The Bible was uppermost, then "The Prayer that Teaches to Pray," by Dodds; "Sketches of Mexico," by Butler, and "Rushing to the Front," by Mardon, so I took courage and knew we were in good hands. Next morning my friend, a dealer, proved to be a Methodist, and he was glad he had given un unknown Methodist pastor a bed.

"I'm a churchman myself, a great churchman, but when I come out into the woods I come to work and not to be preached to," said one of the cooks to me one day. "We don't want to listen to a lot of claptrap from men who were once bad but are now reformed drunkards as if we were all gamblers and drinkers."

"This was in criticism of one of the Sky Pilots, who told the true history of his redemption from sin after being a lumberjack for six years himself. But that story of an awful life of shame appealed to others with a different result. I have heard the story told, with great humility, of how, after many years of sin and whisky drinking, until the man had no friends and could not even beg a drink of whisky, he had been led to Christ through the testimoney of a man speaking on the public streets.

"The Holy Ghost be on you and the work," said another man in the camps. This man was working in the camps to get money to help pay a mortgage on his farm, and he was delighted to meet us in the camps. While we preached he prayed.

Some of the lumberjacks look upon the preacher with holy reverence, as "a thing to be admired but of no special use to them."

Yet the Sky Pilot walks from ten to twenty miles through the woods, sometimes getting lost, to preach to these men. He preaches three times on Sunday at three different camps. He carries on his back a knapsack containing books and Bibles and papers, weighing nearly 100 pounds. He eats with them and sleeps in the office in the bunks with the clerk or the logger. The Sky Pilot with the writer walked twenty-five miles to the nearest town for mail and other comforts and lived in the vast forest away from home with all the privations of the lumbering life on a paltry pay and with little thanks. He did not see his family at Christmas or for several months.

In this vicinity we have eighteen camps; each man has from 85 to 125 men, a total of over 2,000 men in the woods north of town. These men work in the camps all the winter.

The camp consists of the office, in which the contractor or logger, the clerk, the foreman and the scaler sleep. It is the headquarters of the whole camp, and also a small store where the men can buy socks, mittens, rubbers, medicines, tobacco and snuff for money or to be charged to their account. The office is a wooden building divided into two—the sleeping and the busines part. The men sleep in bunks, of which there are six, generally in the back room. Men are paid off here and all business transactions made. It is also the mail and telephone office. The Sky Pilot makes this his home.

The cooking camp is a long wooden building with long tables, on which are the tin plates and cans and iron knives and forks for the lumberjacks and the office crew, both getting the same fare. There is one cook, a second cook, and two cookees and a bull cook. The cook is lord of all he surveys. At the end are two large steel ranges. Two barrels of water are connected with the ranges for boiling water. The cooks get $80 or more per month. This cook was a church member who has "only been home two days to see the family for over one year." He told me that for this camp of 125 men he used 100 pounds of flour each day, and 1,500 pounds of meat in the week. Potatoes for one week, 20 bushels; 300 pounds of granulated sugar each week. For each day, 34 gallons of tea, 17 gallons of coffee; 30 large pies, 1,200 cookies, 9 gallons of tomatoes, besides turnips, beets, cabbage, onions and beans. There were twenty different kinds of varieties of food on the camp table when we ate, and as good as we ever partook of in our lives. At this camp there were also two cows, the milk being used at the tables and by the cook in his work, and also 25 pigs being fattened for the table.

The cook had $90 monthly, the assistant $60 and the cookees $45. The lumberjacks got $35 monthly and board for the whole winter. The clerk received $45 and the scalers $90.

There was also a blacksmith's shop, and a large barn with 52 horses, three driving horses and two colts. Also a storehouse and other smaller buildings all in the hollow of the woods surrounded by large pine trees to keep off the winds and snow storms.

For these 2,000 men there are no church privileges for over six months in the woods, only as supplied by the Sky Pilots. The Logging Camp Mission of Minnesota is the only organized work in Minnesota, with one superintendent and six men. The work is interdenominational and has a paper, The Lumberjack, of eight pages. It is edited by a Presbyterian clergyman, but its special features are written by two men active in the work among the camps, Rev. F. Higgins, Presbyterian, of Bemidji, and L. C. Ward of Minneapolis. On this route there are two missionaries who have charge of forty square miles of territory with over 4,000 lumberjacks to look after, assisted by one or two other clergymen, who go occasionally into the woods for one or more services. The missionaries giving their whole time to the work. The camps are accessible to the Sky Pilot by the logging roads or tote roads. They walk from camp to camp and are sometimes thirty-five miles from their headquarters in some town, and at times they are twelve miles from the logging road. The preachers are Presbyterian, Methodist, Baptist, etc.

The St. Paul public library has this year given through the logging mission about three tons of excellent books for the camps. They are by the very best authors and of a recent date. They will be sent to the camps in boxes. Books and papers can be used, but the freight must be paid, as it costs too much for the logging mission to pay all charges. Last year this mission alone sent out fifteen tons of literature. Without the Sky Pilot these 4,000 men would practically be without religious instruction and good literature, in conditions not too favorable for spiritual growth.

Sky Pilot Ward, who accompanied me in my work among the camps, has been several years in the work and is an old lumberjack with a marvelous story of the power of Christ to save and keep. He stands six feet, four inches high, and is a typical lumberjack, knowing all the ins and outs of the camp life.

Sky Pilot Date has worked for years for the United Brethern church and he is doing the work in the camps north of Akeley with great acceptance, and has almost 2,000 men to preach to in his territory. He travels over thirty miles square from camp to camp. Rev. A. L. Richardson of Carlton is a Methodist, and Fred W. Davis of Minneapolis is a Baptist, both doing excellent service. Rev. F. Higgins of Bemidji, the superintendent, is an esteemed Presbyterian preacher, and has a large place in the hearts of the lumberjacks.

The stories told by these men have the ring of the New Testament, and several cases of genuine cases of conversion have taken place in the camps under the preaching of these lumberjack preachers. Camp life does not blunt all the human sympathies or the moral sense, for there are men in this vicinity whose lives are clean, and a credit to the Nazarene. One young man, in an official position in this city, works among the lumber camps and the men. He neither drinks, smokes, nor has any other bad habits, and the men of the roughest type love and honor Rodney who is a worthy member of a church.

Another logger of great experience has adopted a poor girl as his child and has shown in every possible manner that logging can be conducted by men with the finest of sensibilities and morals. The great lumbering concerns take a very vital interest in the work of the preachers in the camps. They give money and real moral support. The Red River Lumber company of Akeley gave a considerable sum to the mission workers. Recently it gave $200 for books for the public library and reading room here for the working men and lumberjacks as they pass through. T. B. Walker of Minneapolis and his son, Fletcher L. Walker, the heads of the large concern which owns the mills here, for which all the pine is cut, take a very active and sympathetic interest in the work among their men, both in the woods and in the vast mills here.

Superintendent Kline and Manager R. F. Pray are also well known for their deep and lasting interest in the betterment of the men in the woods, men of all creeds and nationalities, Germans, Norwegians, Americans, Swedes, Italians and other nationalities.

The officials of the company, and the loggers, clerks and foremen of the various camps were kind and helpful to me on my recent visit to the camps with the missionaries. The cooks vied with each other to make my visit pleasant and the lumberjacks were, without an exception, as courteous and as intelligent a set of men as we meet anywhere, with a very few exceptions.

To protect the men from human devourers is a problem. The Red River Lumber company owns the town site of Akeley and liquor is not sold in the town, the men cannot get it in camps, but in spite of these precautions, 'bootleggers' follow the camps and sell to the men whenever possible.

The greatest enemy to the Sky Pilot's work are the small towns on the verge of the great lumbering camps. These are ever waiting for their prey. Few of the men yield, but poor Whisky Bill passing through one of these towns was quickly relieved of his whole winter's wages. He put the money in the bank, but every few hours drew on the capital until it was entirely gone, and he, a wreck in mind and body. A few lumberjacks go through this experience every year of working in the woods to be robbed of their earnings every summer in the towns.

The majority of lumberjacks, however, are men with small farms on which they can make enough to live throughout the winter, so they go to the woods and work and with the money put improvements on the land in summer. Others are farmers with mortgages which they desire to pay off, others are men who work in the sawmills in summer and the woods in winter. Taken as a class, in spite of the six months' enforced exclusion from the home, they are bright, intelligent men, comparing favorably with any other set of working men.

In every camp the Sky Pilot finds men who have been through college, men seeking health among the pines from the best of families of the East. The logger, the foreman, the scaler, and the clerk, with the cook, are as brainy a class of men as can be found in any other sphere, and their enforced living for the six or seven months from society, and all spiritual influences, though it hurts somewhat the vitals of Christianity, does not hurt any more than some surroundings in the larger cities of our beloved country.

Women can live as safely and safer than in the cities in the very heart of the camp. At several camps I found the wives of some of the officials; it is also true that the baser sort of womankind can find her consorts, if so desired, in the camps, or living at a distance from the touch of the authority of the logging companies, who never fail to drive away all temptation to the men.

The Methodist Episcopal Ladies' Aid of Akeley has recently begun to fill a basket for every camp—the basket to contain a New Testament, needles, cotton, threads, bandages and salve and other necessary articles for the men in camp. The logging mission has prepared a large number of smaller comfort bags.

Comfort bags are being sent to the men from other sources, and the great heart of Christianity has not forgotten the lumberjack, and the Sky Pilot goes on his blessed work with encouragement in his lonely and tiresome efforts for the Master in the woods among the lumberjacks.

The lumberjack is a great lover of music, and is ever ready to sing or to listen to others sing or play. The favorite hymns are: "Jesus, Lover of My Soul," "Tell me the Old, Old Story," "Rock of Ages," "In the Sweet By and By," "Safe in the Arms of Jesus." They enjoy a solo, to be followed by a chorus, in which they can all join in singing. In the Bible nothing moves them so deeply as the story of the Crucifixion and the Resurrection of Christ. His parables and miracles take next place in their minds. They listen attentively and eagerly to the Bible readings, for which they show a profound respect and love.

It is Sunday morning in a logging camp, twenty-five miles from town. The men are busy inside the quarters reading their letters, writing letters, reading the papers and magazines, mending their socks, mitts, shoes and rubbers and clothing. Some are drying their clothing, others are outside washing their clothing, others are sharpening their axes or knives on the grindstone. A tall man walks into the camp; on his back is a knapsack, which he puts on the camp floor, and takes out a hymn book and a Bible. Other hymn books are given out, and the men begin to gather on the lower tiers of the bunks, some lean over the bunks and soon we hear the sweet and sacred strains floating into the cold atmosphere outside:

"There were ninety and nine that safely lay,
In the shelter of the fold,
But one was out on the hills away,
Far off from the gates of gold;
Away on the mountains, wild and bare,
Away from the tender Shepherd's care."

Then exultantly they raise their voices as they sing:

"Rejoice, for the Lord brings back His own."

Out into the woods, through the giant pines, up towards the throne of God, the music wafts its way, and in spite of the 25 degs. below zero, the human heart is warm as he thinks and as he hears the lumberjacks' song.

PENSION FUND IS INCREASED

The Pennsylvania Road Raises Annual Appropriation 35 Per Cent.

Philadelphia, March 2. — Having granted a 10 per cent increase in wages to its active employes the Pennsylvania railroad has just gone a step further and raised the annual appropriation of its pension fund for retired employes by 35 per cent—from $390,000 to $600,000 a year. This announcement contained in the annual report just completed by the pension department of the railroad.

According to this report nearly $500,000 in pension allowances was paid by the Pennsylvania railroad to its retired employes in 1906. The exact amount, $467,614.47, is the largest sum yet paid in any one year and exceeds that of 1905 by nearly $45,000.

There are now 1,940 men on the pension rolls of the company. In January, 1906, there were 1,810. During the year 200 men died, three-fourths of whom were over 70 years of age. This decrease was offset by the retirement of 331 men. Of this number 201 were in the 70 year class and 129 between the ages of 65 and 69.

Besides containing the announcement of the 35 per cent increase in the annual apropriation, the amount distributed in 1906 and the number of men now on the pension rolls, the report sets forth a complete statement of the operations of the pension department of the Pennsylvania railroad.

Since 1900 the pension department has distributed a total of $2,493,870.86, which gives an average for the seven years of $356,268.69. The number of employes retired and pensioned up to the present time is 3,031. In addition 1,090 men have died. The average age of employes at the time of retirement was 71 years and 3 months, with an average length of service of thirty-four years and two months.

Although the Pennsylvania railroad was not the first to inaugurate the pension system, its pension department has been so thoroughly well organized that it has come to be recognized by the other railroads as the model of such systems. Everything is done according to a well-defined plan and no one is ever overlooked. The company's purpose is to provide for old and faithful employes upon their becoming mentally or physically unfit after thirty years of activity. Employment in the company's service is generally accepted as of a permanent nature and viewing the matter in this light the company makes provision so that those who have given the best years of their life to its interest, can look forward to be taken care of in their old age.

ORDER FOR HEARING PROOF OF WILL—
State of Minnesota, County of St. Louis —ss.
In Probate Court, Special Term, February 21st, 1907.
In the Matter of the Estate of Anna Charlotte Williams, Deceased:
WHEREAS, An instrument in writing, purporting to be the Last Will and Testament of Anna Charlotte Williams, deceased, late of said County, has been delivered to this Court;
AND WHEREAS, Adolph A. Williams has filed therewith his petition, representing, among other things, that said Anna Charlotte Williams died in said County on the 14th day of January, 1907, testate, and that said petitioner is the executor named in said Last Will and Testament, and praying that the said instrument may be admitted to probate, and that letters testamentary be issued thereon to Adolph A. Williams.
IT IS ORDERED, That the proofs of said instrument, and the said petition, be heard before this Court, at the Probate Office in the City of Duluth in said County, on Monday, the 18th day of March, A. D. 1907, at ten o'clock in the forenoon, when all persons interested may appear for or contest the probate of said instrument;
AND IT IS FURTHER ORDERED, That notice of the time and place of said hearing be given to all persons interested, by publishing this order once in each week for three successive weeks prior to said day of hearing, in The Duluth Evening Herald, a daily newspaper printed and published at Duluth, in said County, and that a copy of this order be served upon the County Treasurer of St. Louis County not less than ten days prior to said day of hearing.
Dated at Duluth, Minnesota, this 21st day of February, A. D. 1907.
By the Court,
J. B. MIDDLECOFF,
Judge of Probate
(Seal, Probate Court, St. Louis Co., Minn.)
Duluth Evening Herald—Feb. 23, March 2-9, 1907.

NOTICE OF MORTGAGE FORECLOSURE SALE—
DEFAULT has been made in the conditions of a mortgage executed by Carl J. Foss and Sophia Foss, his wife, Mortgagors, to Scott-Graff Lumber Company, a corporation, Mortgagee, bearing date November 1st, 1906, and recorded in the office of the Register of Deeds of St. Louis County, Minnesota, on December 29th, 1906, in Book 199 of Mortgages, on page 516.
Said default consists in the non-payment of four installments of $200.00 each with interest thereon at 8 per cent per annum on a promissory note for $1,855.62, with interest at 8 per cent per annum, bearing date November 1st, 1906, payable to said Scott-Graff Lumber Company, one of which installments became due November 15th, 1906, another on December 15th, 1906, another on January 15th, 1907, and another on February 15th, 1907, which said note is secured by said mortgage.
By reason of such default, the power of sale contained in said mortgage has become operative, and no action or proceeding at law or otherwise has ever been instituted to recover the debt secured by said mortgage.
NOW, THEREFORE, in accordance with the provisions of said mortgage and because of said default, said Scott-Graff Lumber Company hereby elects to declare, and does hereby declare, the whole amount secured by said mortgage to be due and payable. The amount which is claimed to be due and is due on said mortgage at this date is $1,888.73.
The property described in said mortgage and thereby mortgaged is described as follows, to-wit: Lots thirty-one (31), and thirty-two (32), in Block forty-nine (49), Virginia, St. Louis County, Minnesota, according to the plat thereof on file and of record in the office of the Register of Deeds of said St. Louis County.
NOW, THEREFORE, notice is hereby given that by virtue of the power of sale contained in said mortgage, and pursuant to the statutes in such case made and provided, said mortgage will be foreclosed by a sale of the premises above described, which sale will be made at public auction to the highest bidder for cash, by the Sheriff of said St. Louis County, at the Front Door of the County Court House in the City of Duluth in said county on the 1st day of April, 1907, at ten o'clock in the forenoon of that day, to satisfy the amount then due on said mortgage and $50.00 attorney's fees, as stipulated in said mortgage, and the costs and disbursements allowed by law.
Dated February 16th, 1907.

NOTICE OF EXPIRATION OF REDEMPTION PERIOD.—
State of Minnesota, County of St. Louis. —ss.
To L. M. Childs:
Take notice, that the following described piece or parcel of land, situated in the County of St. Louis and State of Minnesota, to-wit: Lot number Sixteen (16), Trigg's Rearrangement of Block number Seventy-six (76), Duluth Proper, Third Division, according to the recorded plat thereof, was on the 6th day of May, A. D. 1901, bid in for the State for the sum of Six Dollars and Forty Cents, pursuant to a real estate tax judgment entered in the District Court in the said County of St. Louis on the 21st day of March, A. D. 1901, in proceedings to enforce payment of taxes delinquent upon real estate for the year 1899, for the said County of St. Louis, and was on the 16th day of July, A. D. 1902, assigned by the State of Minnesota for Seven Dollars and Thirty-six cents. That the amount required to redeem such lands from such assignment exclusive of the cost to accrue upon this notice is the said sum of Seven Dollars and Thirty-six cents, with interest thereon at the rate of one per cent per month from said 16th day of July, 1902, to the time of such redemption, and delinquent taxes, penalties and costs accruing subsequent to said assignment, with interest thereon to the time of such redemption.
That said delinquent taxes, penalties and costs for the year 1901 accruing subsequent to said assignment amounted to the sum of $6.89 on March 25th, 1903, and bears interest at the rate of one per cent per month from said March 25th, 1903, to the time of such redemption.
That said delinquent taxes, penalties and costs for the year 1902 accruing subsequent to said assignment amounted to the sum of $8.81 on May 3d, 1904, and bears interest at the rate of one per cent per month from said May 3d, 1904, to the time of such redemption.
That said delinquent taxes, penalties and costs for the year 1903, accruing subsequent to said assignment amounted to the sum of $7.77 on January 14th, 1905, and bears interest at the rate of one per cent per month from said January 14th, 1905, to the time of such redemption.
That said delinquent taxes, penalties and costs for the year 1905, accruing subsequent to said assignment amounted to the sum of $7.48 on the date hereof.
That said amount required to redeem calculated to the date of this notice is the sum of $50.44, and that the time within which said land can be redeemed from said assignment will expire sixty days after service of this notice and proof thereof has been filed in the office of the County Auditor in and for said St. Louis County, Minnesota, in manner prescribed by Section 37 of Chapter 6, General Laws of Minnesota for the year 1877 and amendments thereto.
Dated, Duluth, this 14th day of February, A. D. 1907.
O. HALDEN,
Auditor St. Louis County, Minn.
By L. A. MARVIN,
Deputy.
(Seal).

SPORTS OF THE WEEK.

PITTSBURG HAS CHANCE

To Land Pennant by Winning Three Straight From Houghton.

Duluth Counted On for International League Next Year.

STANDING OF THE CLUBS.

	W.	L.	F.	A.	Pct.
Portage Lake	12	7	86	81	632
Pittsburg	12	9	92	75	571
Canadian Soo	9	10	88	86	474
Calumet	7	10	60	75	412
American Soo	8	12	81	73	400

Houghton, Mich., March 2.—(Special to The Herald.)—Although the Portage Lake Hockey team defeated the fast Canadian Soo team at the Amphidrome in Houghton Thursday night, the Pittsburg team still has a chance to win the championship and the pennant. The Houghton team must win at least one game from the Eastern team and then one from Calumet, in which case Pittsburg and Portage Lake would tie for the championship, or else the Houghton team must take at least one game from the Smoky City aggregation and the two from Calumet to win. This is the way the fans expect the season to close, holding little hope for the defeating of the Pittsburg seven twice on the ice of the latter team.

Although Manager John T. McNamara has made a strong kick to President Fisher of the league, who resides at Calumet, against Referee Schooley of Pittsburg, the president has refused to send Referee Joe Stephen or any other official to the Eastern city to handle the Portage Lake games there. Every team which has visited Pittsburg yet this season has had a kick coming on the way Schooley refereed their games there, claiming that he robbed them and did everything possible to throw their games to the Easterners. If he should do this with the Portage Lake team it is hard to tell what would happen and it would most likely be a good thing, not only for the Portage Lakes, but for Schooley himself, if the president of the league could be prevailed upon to furnish an impartial ice official.

In any event the Portage Lakes can play their games in the East under protest.

Off for Pittsburg.

The Portage Lake team left this morning for Pittsburg, where the three games are to be played next week, Tuesday, Thursday and Saturday nights. This will end the season for the Pittsburg team and leave but two games for the Houghton seven to play, one at home and one at Calumet.

Following are a few "ifs": If Portage Lake loses two games to Pittsburg the Houghton team's standing then will be 500, having won 13 and lost 9 games. Pittsburg, winning 14 and losing 10 would have a standing of 583. If Portage Lake loses all three games it will have a standing of but 545, while Pittsburg will stand 625 and will hold the championship and pennant.

Therefore it can be seen that the Houghton team still will have to go some to land the coveted honor and there will be a real whirlwind ending to the season after all.

It is a foregone conclusion that the Houghton seven will defeat Calumet in the last two games of the season, considering the form the Houghton boys played in Thursday night, with but little difficulty. They will work hard to take their games at Pittsburg, however. Decorie, an old Calumet player goes East with Portage Lake as spare man.

It is expected that record-breaking crowds will witness the Portage Lake-Pittsburg games at the Duquesne Garden rink, an attendance of fully 5,000 being expected to take in each of the contests. Excitement among Pittsburg fans is at a high pitch.

A small bunch of Houghton fans, including Manager John T. McNamara of the team, left this morning with the eight players. The men taken East are: Goal, Regan; point, Fred Taylor; cover point, Barney Holden; center, Bruce Stuart; right wing, J. A. "Grindy" Forrester; left wing, Fred Lake; rover, "Goldie" Cochrane; spare, Ed Decorie.

Nothing has been heard lately of the proposed games to be played against the champion teams of the dominion for the world's championship. It is expected, however, that the Portage Lake team will tour the principal cities of Canada, should the championship again fall to the present champions.

Next Season Talk.

There are rumors and then more rumors and still they come, concerning the make-up of the league for next year. It is expected that Duluth will at least manage to get a team into the league, and in this case one will most likely be entered from Winnipeg. The Columbus deal is still in the air, and Cleveland and Toronto are still talked of, notwithstanding the efforts of the Canadian professional teams to land the last named town. Detroit and Chicago won't have teams for some years to come, in all probability, as it seems a hard matter to arouse sufficient interest in the game in these two cities to get the matter started among those who handle the coin. The Minneapolis-St. Paul project seems to have dropped, although it may be resurrected during the summer. Pittsburg will be kept in the league at all costs, it is stated, as it is in all probability the best paying hockey town on the map, not excluding even the big centers of population in Canada. Then, again, it is improbable that Pittsburg and Winnipeg will remain or get into the same league on account of the long jump between the two towns. Hockey can't be worked on the baseball system for some time yet, and for this reason the expenses during long trips would be exceedingly heavy in comparison with the receipts.

The Amateur Game.

The Houghton amateur team, known as the Houghton Juniors, will easily take the championship of the amateur league, which will mean the championship of the upper peninsula. It is not probable that a trip will be made to either of the two Soos this year, although the Houghton team has one coming for bringing the Canadian Soo Tagonas, an intermediate O. H. A. team, to Houghton last year, at which time the Houghton outfit defeated the visitors, and the latter defeated the Hancock team, champions of the district.

Great expectations are being worked up over the visit of the Duluth boys to Houghton, and excellent games are expected to result from their visit here. The Houghton boys confidently expect to defeat the visitors, even though the Copper country team was defeated in Duluth recently. They will trust not only to the largeness of the Houghton ice, however, but will work hard to trim their Minnesota friends legitimately, and it is understood that the Duluth boys have much the same confidence in themselves and expect to carry off the honors.

For Rheumatic Sufferers.

The quick relief from pain afforded by applying Chamberlain's Pain Balm makes it a favorite with sufferers from rheumatism, sciatica, lame back, lumbago, and deep seated and muscular pains. For sale by all druggists.

DENO PUTS UP TOUGH FIGHT

Milton Loses First Fall, But Wins Last Two.

"Kid" Deno looks like a comer at the wrestling game. He gave the "Little Wonder" all he could handle and then some, at the Met last night, taking the first fall in seven minutes and making Milton work eight and sixteen minutes respectively for the last two falls.

He was by far the toughest proposition that Milton has been up against since he broke into the limelight with an all-inclusive defy to local wrestlers, and while Deno's weight with the six-pound margin naturally helped some, the new arrival showed he knew enough about the wrestling game to have put up a great scrap at equal weights.

Deno's fall was secured on a head hold with a fierce grip, that five minutes of struggling could not break. Deno got the hold two minutes after they clinched and held it for five minutes before dropping his opponent's shoulder to the mat.

Milton used the same hold for his first fall, and after falling at a scissors, took the third in sixteen minutes on a half Nelson.

PUGILISM IN HOCKEY GAME

Rough Contest Won by Canadian Soo at Calumet.

Calumet, Mich., March 2.—Pugilism, rag chewing, tripping, slashing and very little scientific hockey contributed to Calumet's defeat at the hands of the Canadian Soo seven here last evening by a score of 8 to 6.

The first half ended with the score 5 to 2 for Calumet, but in the second half seventeen penalties were inflicted, and while Calumet men were doing time on the bench the Soo seven piled up score after score. Morrison and Taylor, opposing centers, were put out of the game for the whole of the last portion of the second half for indulging in a pugilistic session near Calumet's goal. Even the referee failed to escape the melee and the puck caught him in the jaw inflicting a bad cut.

After Morrison and Taylor were retired both teams let down on the scrap game to some extent, but both played very poor hockey and the brilliant forwards were sadly missed.

The line-up:

Calumet—	Position	Soo—
Nicholson	goal	Lehman
McDonald	point	(Capt.) Brown
Shields (Capt.)	cover	McRoble
Mallen	rover	Lalonde
Morrison	center	Taylor
Scott	right	Schafer
Bellefeuille	left	Marks

The "hundred-times-a-day-question"—how to make a little more money, will not down. But, to the store man, advertising in The Herald always figures in the answer.

FRESHMAN-SOPH HOCKEY GAME

But Little Interest Displayed in Annual Affair Next Week.

Although nothing definite has been arranged in regard to the contest, in all probability the annual freshman-sophomore hockey game will be pulled off some time next week, probably being played in the afternoon at the open rink at Forty-seventh avenue east. The curling rink will probably not be accessible for hockey purposes again, and the open rink was the next best thing.

This game in days of old was, in connection with the freshman skating party, which followed it, one of the principal social events of the school year, but of late years it has for some reason fallen off in popularity, and only a very mediocre interest has been taken in the contest.

No formal challenge has been issued by either side, but both classes have elected captains who have been doing the best they could to awaken some little interest among their classmates with some little success. Both teams, however, say that they are in readiness for the game at any time, and as the weather and good ice are uncertain after next week, it has been decided to play the contest as soon as possible.

Both teams have been working out to some extent on the East end rink, and while the lake was frozen over they held forth on the ice there for a time. Charles Arbogast is the freshman captain, while Davis Duncan has been selected to lead the '09 braves to victory.

INDOOR MEET AT ARMORY

Naval Militia and Y. M. C. A. Athletes Contest March 22.

An indoor athletic meet of unusual interest is scheduled for March 22, when the athletic sharks of the naval militia will go up against the athletes from the local Y. M. C. A. in the Armory.

While the Y. M. C. A. boys have, perhaps, put in a little more strenuous and steady training during the winter, the naval reserves boast some remarkably skilled athletes and the event will be hotly contested.

The events will comprise a 60-yard dash, a half-mile run, a one mile relay race, the running broad jump, the standing broad jump, the running high jump, light and heavyweight wrestling and an 18-foot rope climb.

The event will be free to spectators and there will be no prizes awarded.

Players Go South.

Philadelphia March 2.—There was a general exodus of baseball players from here for the Southern training grounds yesterday. The American league players left late yesterday for Marlin Springs Tex. The majority of the Philadelphia league men left last night for Savannah.

Lewis Knocked Out.

Fond du Lac Wis., March 1.—Jack Dougherty, a welterweight of Milwaukee, last night knocked out Ted Lewis of Trenton, N. J., in thirty seconds of the first round of an eight-round bout. The knockout was a right swing to the solar plexus.

Undergoes Operation.

Chicago, March 2.—Joseph Tinker, shortstop for the National Baseball club, underwent an operation for appendicitis yesterday at St. Anthony's hospital. The operation was entirely successful, but according to his physicians, Tinkers will not be able to play ball before May 1, and it may be some time later than that.

SITUATION UNCHANGED

Northern League Circuit Question Still in the Air.

Duluth Players Kicking for Raise and May be Dropped.

Aside from the rumored formation of a Dakota league to include Fargo and Grand Forks, the week has brought forth no new developments in the circuit proposition for the Northern-Copper Country league. Local fans take very little stock in the Dakota proposition, at least in regard to Fargo and Grand Forks, as both these places are good, live baseball towns and would not be content with the semi-professional teams, playing twice a week, which the little Dakota league could afford to support.

Both Fargo and Grand Forks have written Manager Kuehnow requesting details of the requirements necessary for admission to the league and prospects look especially good for the two towns breaking into the league again.

They would be gladly welcomed. Fargo has always been a paying town, and the fans have turned out with unfailing regularity and kept the gate receipts up to a sufficient amount to more than pay expenses, and while Grand Forks has fallen behind, the rest of the circuit is of the opinion that gross mismanagement was largely to blame for the deficit and that the Dakota town could easily be put on a paying basis for professional ball.

There has been some dissension in the ranks of the White Sox during the week. Several of the older players are kicking strenuously for a boost in salary and threatening desertion if it is not granted.

The $1,100 salary limit is too small to permit of a substantial boost for any one even if it was desired to give it, and much as it will be regretted some of the old stars who have gladdened the hearts of fans for years may have to go. Most of the youngsters signed are big, strapping fellows who would look more at home on the rush line of a 'varsity eleven than chasing the little white spheres over the Athletic park field.

Howard R. Backus, a pitcher from the ranks of the Toledo amateurs, is six feet two in his thinnest stockings and A. W. Zimmerman, who also has ambitions toward the pitcher's box, also goes over six feet. W. J. Collins, second baseman, is another big 200 pounder. With MacCormack and Sis Hopkins back in line it will be a bunch of giants that lines up at Madison next April.

Frank Maxwell Finishes His Work With Duluth Y. M. C. A.

He Leaves Many Warm Friends Among Amateur Athletes of City.

In spite of the marked success of the indoor meets of the past season, the close of the events brings with it a decided feeling of regret among all those who have been connected, even in the remotest way with the local Y. M. C. A. and it's work, for the series closes the active work of Physical Director Frank Maxwell, who during his stay here has made many friends among the men and boys with whom he has worked.

Maxwell has gotten right next to the men who have never before taken more than a passing interest in the Y. M. C. A. and its doings, and has held their interest and attention in their work there. His classes have been almost unwieldy in size, and every man of them is ready to testify to his ability and good fellowship.

But commercialism has fastened its clutches on him, and he has conceived the idea that there is more money in raising cattle on a ranch in the Alberta region than there is in raising muscles on a bunch of enthusiastic disciples in the Duluth gym, and it was with the greatest regret that the local officials were forced to accept Mr. Maxwell's resignation.

FRANK A. MAXWELL.

Thursday saw the completion of his work in the local gym, but he will remain in town until about March 11, arranging his affairs before leaving for the Northwest.

Invitations will be out tomorrow for a reception to be tendered Mr. and Mrs. Maxwell at the Y. M. C. A. next Wednesday evening, when the many friends of the couple will gather to bid a final adieu to the departing physical director and his wife.

While a number of applications for the position are under consideration by the executive committee of the association, no action has been taken as yet, and it is likely to be some time before a man is found capable of filling the shoes of the retiring director.

GIRL STRIKES IT RICH.

Los Angeles Herald: Men who make their fortunes in mining are plentiful, but a woman who has struck it rich in a day is not so common. Such a one is at the Alexandria in the person of Miss Simona Aguire.

When Los Angeles was little more than a Mexican pueblo, not so very many years ago, a little girl of Mexican parentage was born in an adobe hut. Until she was 10 years old she lived in Los Angeles, and since that time she has not been here until now. When she went away she went as Simona Aguire, a poor child whom the Catholic priest had christened that name.

She lived in various parts of the East until five years ago, when she went to Tonopah, Nev., and became a waitress. Working at nursing or waiting on table, she lived, respected by all the miners, with nothing more as her share of life's good things than what she could make with her hands. What she made she saved, and last year she grubstaked a young fellow named Savage. He went out into the Wonder country and there he struck a claim. That claim has been sold for $300,000, and Simona Aguire is the owner of a bank account of $150,000.

She owns her own touring car and came to Los Angeles in it with a party of friends.

From here Miss Aguire will go to Reno, Nev., and then back to Tonopah. She says that soon she is going to build a home in some part of California or Washington and only go to the mines at intervals.

PATTI'S BURNING ADMIRER.

London P. T. O.: Many stories of Mme. Patti are still going the rounds. Once in Italy a card was brought to her from a man whose name she did not know, but who was so very anxious to see her that she allowed him to be shown into her room. When the unknown came he proved to be a little old man who was quite red and speechless with nervousness. Suddenly Patti noticed smoke coming out of his coat, so without saying a word she seized a glass of water and threw it over him. It turned out that the old man had put his lighted cigar into his pocket when he entered the room and so had set fire to his coat. "Sir," said Mme. Patti, "I have had many admirers who professed themselves burning with admiration for me, but I have never before met one who went so far as to set himself on fire to prove it."

WHY TOAST IS WHOLESOME.

"Did you ever wonder why toast is always recommended for invalids?" said a chemist. "The reason is that toast is predigested bread."

"What makes fresh bread trying for invalids is the starch in it.

"Starch is very hard to digest. It needs a good stomach to take hold of the soggy starch in bread and change it to strengthening, stimulating dextrine.

"But when you cut bread thin and toast it brown, the fire itself changes the starch to dextrine. That, in fact, is what the brown color of toast indicates—that the starch is gone, and dextrine has taken its place. The stuff is predigested.

"So we feed our invalids on toast, a dish as thoroughly predigested as any of the most famous breakfast foods."

PICK OF THE AMATEURS

Winners in Y. M. C. A. Meets Are All Round Athletes.

Will Have Names Engraved in New Association Gymnasium.

The accompanying pictures represent the cream of amateur athletes at the Head of the Lakes. The series of three indoor meets held at the Y. M. C. A. gymnasium this winter has been a most exhaustive test of athletic prowess from start to finish, and the three winners are men, who, if they stick to athletics for a few years, are reasonably sure to develop into record-breakers.

Simon Forgette already has two world's records to his credit made in the second meet of the series Jan. 25 last, when he raised the mark for the running high jump from the spring-board from 7 feet 10 inches to 8 feet, and boosted the mark for the running high dive to 6 feet 10 inches.

Forgette and Olson are record-breaking men, two of the most perfectly developed fellows that I have ever seen," said Physical Director Maxwell, discussing the meet. "They will both be heard from as top notchers some day if they keep on. Forgette only commenced on gymnasium work this year and he has made wonderful progress."

SIMON FORGETE,
First Place, 49 Points.

Becker is characterized by Prof. Maxwell as the best ligatweight wrestler in the business at the Head of the Lakes. He certainly has a most enviable record. In the meet just completed he took both the lightweight and welter-weight wrestling matches, taking the lightweight from William Honighman and the welter-weight from A. W. Torrence, a much heavier man.

Becker went on in a practice bout with Martin Johnson, the heavyweight wrestler, and notwithstanding the great difference in their weights stayed with the fireman for fifteen minutes.

He has been offered handsome sums to break into professional wrestling circles here, and to appear at the Met, but in spite of the most tempting offers has stuck to the Y. M. C. A. and amateurism, being content to let his salary at the First National bank, where he handles coin in the daytime, suffice for an income.

ALBERT OLSON,
Who Took Second Place.

J. W. BECKER,
Crack Wrestler, Who Took Third Place.

Those winning firsts in the events will have their names engraved on the tablets in the new Y. M. C. A. building when complete. The list of those who will be so honored is as follows:

Shot put.....Clark Brook
Eighteen-foot rop climb..Sol Swerdloff
Running high jump.....Simon Forgette
Standing high jump....Simon Forgette
Fence vault.....Simon Forgette
Middleweight wrestling.George Oldham
Running high dive.....Simon Forgette
Running long dive.....Archie Brown
Swinging dip .....Albert Olson
Half mile run.....Albert Olson
Running high jump (springboard)....
.....Simon Forgette
Standing broad jump..Simon Forgette
Running broad jump...Simon Forgette
Three standing broad jumps.....
.....Simon Forgette
Pull up.....Albert Olson
Mile run.....Albert Olson
Heavyweight wrestling .....Bradley

The list of contestants and the number of points made is as follows: Simon Forgette, 49; Albert Olson, 38; J. W. Becker, 10; Forsythe, 9; George Oldham, Clark Brook, Archie Brown, Sol Swerdloff and William Honighman, 8; Frank Bradley, 5; Dr. Olson, George Oestreich, E. W. Torrance and George Johnson, 3.

Gotch Wins Easily.

Cincinnati, March 2.—Frank Gotch, champion wrestler of America last night won both of his matches. The agreement was that Gotch was to throw two men each inside of fifteen minutes. His first victim was Kiki, who terms himself the unknown Jap. Gotch landed him on his back in four minutes. The second man was Eddie Barr of Cincinnati, who succumbed in thirteen minutes of fast going.

BARBER SUPERSTITIONS.

Left-Handed Man May Throw Whole Shop Into Disorder.

Chicago Record-Herald "Superstitious? I should say yes.' They won't admit it to any one except members of the craft, but barbers are the most superstitious people in the world."

The man in charge of the second chair at one of the large hotel shops stropped his razor and loquaciously continued:

"You see that new man down at the end of the chair? He just came to work here this morning, and he'll have a nice large can tied to his coat tonight. Why? Because he's left-handed. If he remained here every barber in the shop would quit before the week was out.

"A left-handed barber is a hoodoo to any shop, and there's no getting away from it. You may think that's only a prejudice that barbers have for left-handed knights of the razor, but it's a well-grounded superstition, as old as the trade itself.

"We'd be apt to have all kinds of hard luck if that fellow stayed here any length of time. I once worked in a New York shop where there was a left-handed barber, and almost every day an accident would happen to some of the others. We told the proprietor where the trouble lay, but as he was not a barber he couldn't understand what difference it made whether a man shaved with his right or his left hand.

"One day a runaway horse plunged through the plate-glass window, and another day a mad dog ran into the shop, followed by a policeman, who killed the beast under the left-handed man's chair. Without any apparent reason, the hot-water faucets would get cold as ice, and the razors would refuse to work properly. Customers who for years had been in the habit of getting shaved three or four times a week stopped coming, and it was all due to that left-handed barber. During all the while he was there not one of us won a bet on policy, although the porter used to dream some of the best numbers I ever saw. This fellow I speak of had red hair, and that, of course, made it worse. We finally induced the boss to fire him, and just as soon as he was gone things began to get good again.

"Now, this fellow on the end, who drifted in this morning, looks to be a pretty good barber, but just as soon as the boss saw him strop a razor with his left 'mitt' it was all for Julius. In most shops, before a new man is hired, he is asked whether he is right or left-handed.

"Left-handed men who learn the trade get onto this after a while, and then they switch to the right hand—that is, if they can make good with the right. I'm scared to death that somebody is going to get killed around here before 3 o'clock tonight, when his 'nibs' will take off his coat and take it away with him.

"Another superstition among barbers is that they don't want to shave the first customer that comes in on Monday morning. That's a sure sign of poor business all week for the unlucky barber. Of course, somebody has got to shave the first man in, but you don't see the barbers rushing madly up to their chairs and beckoning to the customer. You'll see one of them go for a drink of water, another is too busy reading the sporting page to look up, and the others are all doing something that occupies their time. Whatever chair the customer climbs into the barber who runs it is hoodooed for the week.

"Another peculiarity about barbers is that one of the craft can tell a fellow-tradesman by shaving him, although he may never have seen the man before. The way a barber lies in a chair when he is getting shaved, and the way he unconsciously assists the man with the razor tips him off every time. He will turn his head from one side to the other in a different way than other men who are not barbers, and when the razor is on his neck he will raise his chin in a way that cannot be counterfeited. I never missed out on calling the turn on a barber in my life."

IF PA WAS RUNNIN' THINGS.

If pa was runnin' things you'd see some changes pretty quick;
The bills would not come in so fast and pay days would be thick;
He'd make the yellow journals all let up on Harry Thaw,
And stop their printin' pictures of his sister, wife and ma,
And if another Swettenham insulted us, 'n-jings,
We'd blow him into kingdom come, if pa was runnin' things.

We'd have the Panama Canal all finished by July,
And every trust would get upset—gee whiz, the fur would fly!
He'd use the big stick on the folks that try to steal our trade,
And make the Standard Oil give back the millions that it's made;
We'd lock up Leopold and all the other wicked kings,
And wipe off Russia from the map, if pa was runnin' things.

We'd throw the milkmen all in jail for spreadin' fever germs,
And when the rich were guilty they would get the longest terms;
Tom Platt would have to quit right off and never more be known,
And next time Canada sassed back we'd take it for our own;
The things we buy would all be cheap, pretty soon the wings
Would sprout on ma and me, I guess, if pa was runnin' things.

—Chicago Record-Herald.

ILLUSTRATED.

Harper's Weekly: A teacher in one of the primary schools of New York recently read to her pupils "The Old Oaken Bucket."

After explaining the song to them very carefully, she asked the class to copy the first stanza from the blackboard, where she had written it, and try to illustrate the verse by drawing in the same way a story as illustrated.

In a short time one little girl handed up her slate with several little dots between two lines, a circle, half a dozen dots and three buckets.

"I do not quite understand this, Malmy," said the teacher, kindly. "What is that circle?"

"Oh that's the well," Malmy replied.

"And why do you have three buckets?" again asked the teacher.

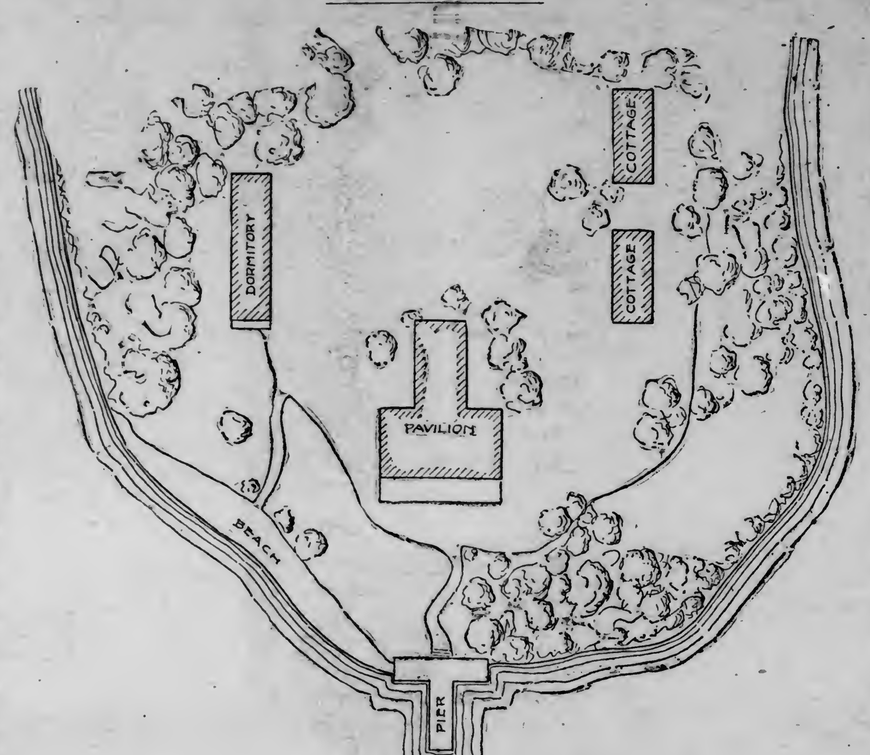
"One," answered the child, "is the oaken bucket, one is the iron-bound bucket and the other is the moss-covered bucket that hung in the well."

"But, Malmy, what are all these little dots for?"

"Why, those are the spots which my fancy knew," earnestly replied Malmy.

If you are selling enough goods—then your advertising in The Herald is sufficient.

BOAT CLUB WILL ESTABLISH A SUMMER RESORT AT SPIRIT LAKE



GROUND PLAN OF SPIRIT LAKE IMPROVEMENTS TO BE MADE BY BOAT CLUB.

One of the most attractive features of the Duluth Boat club will be the branch house which is to be constructed at Spirit lake this spring, and which will be ready for use by the time the warm weather arrives.

The plans of the club contemplate the establisment of a most attractive little resort on a picturesque part of the St. Louis river, within a very convenient distance of the city. The site selected is a high point of land on the Minnesota side of the river just above Spirit lake. It faces on the channel of the river and the steamers running to Fond du Lac and New Duluth will have no trouble making the dock which will be built.

Just behind the clubhouse is the railroad, and a flag station will be built so that the grounds can be reached by either train or boat. Launches and even canoes and rowboats will find it comparatively accessible, and it is not too long a walk from the end of the West Duluth car line.

The object is to make the place one where the members can spend an evening or a week end in a very comfortable and pleasant manner. It will be possible to go out to the branch on Saturday afternoon, and remain over Sunday catching the early morning train to the city Monday morning. It would also be not only possible but quite convenient for the members to continue their business duties in the city and spend their evenings at the boathouse all summer, coming in on the early morning train.

Two small cottages will be erected to begin with, and they will offer sleeping accommodations. There will also be a dining room where meals can be secured at a moderate cost, and every convenience will be offered for an outing of from a few hours to a week or a month's duration. The boathouse will be well supplied with canoes and rowboats and the river and Spirit lake offer a most attractive place for boating on the warm summer evenings.

The club has picked out a good bathing beach in the vicinity, and it will be cleared of stones and logs. The water in the river is warm and clean and the beach will be the best swimming place in the vicinity of the city.

The more the members think of the new plan the more enthusiastic they become. It offers so many possibilities for pleasant little informal outings and anything from that up to a prolonged camping expedition with means of reaching the city at any time desired.

It is bound to prove a most popular feature, and more cottages will doubtless be erected as the members appreciate its advantages, forming in time a little summer colony of the boatclub people.

THE SPORTING EDITOR'S SCRAPBOOK

Being a Collection of Odds and Ends of the Latest News and Comment of the Sporting World.

Intercollegiate Rowing.

Intercollegiate rowing is going to take a more prominent place in sporting circles during the coming season than it has for some time in the past, judging from the enthusiasm with which the sporting writers have been slinging the dope on the various crews. Most of this stuff which has been printed is empty wind, no more no less, but once in a while a little tabulated bunch of statistics that tells more than a column of dope, comes to light.

The following shows at a glance just how the various college crews compare in veteran material for the rowing season of 1907. The make-up of the crews here is precisely as they rowed at Poughkeepsie and New London last year. The men who have been lost by graduation or other causes are marked thus (*):

Corbett Will Back Schreck.

Corbett's assertion that he will back Schreck for $15,000 against Jeffries has been laughed at as an empty bluff by a large number of the sporting writers, but Gentleman Jim comes back at them with the following statement, quoted in the Buffalo Enquirer:

"I meant every word I said about Mike Schreck," quoth the king of the pompadour pugilists.

"I will back Mike Schreck against Jeffries with a $15,000 side bet. He is the one man who can lick the big fellow.

"I doubt if the alfalfa farmer can train off fifty pounds without losing a great deal of his vitality and strength.

"Schreck has been working wrong. He should do road work instead of wrestling in a gymnasium.

"During my summer vacation I shall take hold of the German and transform him into a world-beating pugilist. He is burly, willing, fast and two-handed, but he has been badly advised and handled."

Harry Corbett.

From San Francisco comes the following eulogy of Harry Corbett, king of sports and all-round good fellow, whose death recently left a vacant spot in the world of sports and a sore spot in the hearts of all his friends which will be hard to heal:

"San Francisco will never find another Harry Corbett, and the unique place he filled in the world of sports must remain unoccupied henceforth. All over the land and beyond it many men who counted him as a friend or enjoyed his ever-ready bounty are sorrowing and saying a word or two of kindness for 'the squarest of them all.'

"It is pleasant to think that he was one of those whose appreciation was not delayed until death had smoothed the way. Wherever he went in his forty-five years he made friends, and, what is better, held them. 'Harry Corbett is a friend of mine,' was a password to fellowship in the fraternity of sports. He exercised a paternal influence over 'the game,' for he was sponsor for the young ones and companion of the old ones.

"They used to call him the 'Western Al Smith,' for what Smith is to the metropolis he was to the coast. Now Smith has become 'Eastern Harry Corbett.' The place he ran for years at Powell and Ellis streets, until the fire swept it away with other landmarks, was the local headquarters for all affairs that revolve about the ring, and it is there that the stakes were placed and the odds were made. Most of the big fights for the past eighteen years were arranged there, and during that time Harry Corbett has held stakes of over $500,000, for which no bond except his word was ever required of him.

"One of the deepest mourners for Harry Corbett's passing will be Jim Jeffries, who was as close to him as anyone. The friendship started when Jim Corbett was giving Jeffries his first boxing lessons, and was cemented when Harry refereed the Jeffries-Ruhlin battle. Such absolute confidence had Jeffries in the bond between them that he offered to nominate Harry the referee in his last battle with Jim Corbett. For a long time there will be a veil of sadness over the sunny reaches of the champion's alfalfa meadows.

"Another close associate of Corbett's was 'Big Tim' Sullivan, the picturesque New York congressman. When Sullivan was out here not long ago, Corbett's place was the first he made for, the only one he reminded in and the last he left. Indeed, that was the way with all visiting sports, and if you wanted to catch an Easterner of that class, all you had to do was to drift around to Corbett's. There was a reason for this. The most 'down and out' sport never failed to find substantial comfort with Harry Corbett, and a constant stream of unostentatious little charities ran from his coin pocket.

"The most touching thing in Corbett's life was his love for his blind daughter, Hazel, from whom he was inseparable. She has been sightless from her birth, but her affliction only made her father more tender of her. The effect of his death on her was terrible, and the result is still in doubt. He has left an estate of about $50,000."

Negoes in Athletics.

That the "cullud brothah," hampered as he is by color lines, and racial prejudice, is at least the equal of his white rivals in the world of sports is the contention of a Detroit sporting writer:

"In the athletic world Joe Gans, a negro, stands out as a mighty marvel.

"Those only interested in the clearest of athletics, men who would not look at a prize fight, court this man's acquaintance because of his wonderful constitution. Physicians and physical directors who have examined him say he is one of the greatest athletics the world has ever known.

• • •

In Bobbie Marshall, Minnesota had a foot ball player who stood out as one of the best gridiron stars that ever lived. He, too, is a negro.

"Only the fact that the color line is drawn in baseball prevents the followers of that game from being startled by some wonderful playing. Wilson, the famed 'Black Rusie' of the Cuban Giants, had more speed, those who have watched him say, than any pitcher that ever lived.

"He had an underhand ball that has probably never been equalled.

"As a first baseman, too, he was a second Hal Chase.

"He was a tall, rangy southpaw. After Ned Hanlon watched him work he vowed that he would give $10,000 for him if he could paint him white.

"I have never seen a pitcher with such speed," is the opinion of Hughie Jennings.

"Wilson was the man who first made all the fielders go way back to the fence as though he were afraid of a home run, only to strike the batter out. He used to make them sit on the bench, too. It was from him that Rube Waddell got his idea.

• • •

"In the East John B. Taylor, a student at the University of Pennsylvania, is being picked as the man soon to be America's greatest middle distance runner. He is a negro. As a quarter-miler he probably has no equal.

"When Michigan goes East this spring the Wolverines will most likely go against this black wonder.

"Taylor is 24 years old, six feet tall and weighs 160 pounds.

"He has the lithe, tiger movement of Gans and is famed for his headwork. It is impossible to pocket him in a race and in the stretch he has a wonderful amount of speed to meet any challenge.

• • •

"Grant, their second baseman, was another wonder. He could bat and field like a Lajoie. Muggsy McGraw tried to get him into the game as an Indian, but the plan did not work.

"It is remarkable that the build of most of these mighty negroes is one not generally pictured by the public. Most of them were built on the lines of a thoroughbred racing horse, lithe and wiry. There are no knotty bunches of muscle. And practically all of them are known for their headwork."

Beell-Hackenschmidt.

From the Kansas City Star: A $5,000 purse has been offered by the M. A. C. for a Hackenschmidt-Beell match, and the deal's half closed. The "Wisconsin whirlwind" has accepted the terms. The match would be scheduled for the first of May, fifteen days prior to the Hackenschmidt-Gotch bout, sort of preliminary to the big event. If these two matches are landed in Kansas City they will bring hundreds of strangers here. Many of them would come for the Hack-Beell bout and remain for the real championship affair between the champion of the United States and the champion of the world.

Advantage in Size.

The able sporting editor of the Denver Post points out the natural advantages of a big battle in any line over a little man in a somewhat lengthy article, some extracts from which are as follows:

In pugilism purses are graduated according to the size of the men.

If a pair of bantams are a $5,000 attraction, featherweights are worth $10,000 a battle to the promoter. Lightweights leap to dazzling heights in the scramble for wealth. A good pair of 133-pounders sometimes get $25,000 for beating each other.

Welterweights are not good drawing cards. This country has not had a good middleweight engagement for several years.

Two good heavyweights will be paid more for pummeling each other than the smartest pair of feathers or lightweights.

From a scientific standpoint heavies put up a slow and uninteresting battle beside lighter weights.

Ring followers are attracted by the glamor of mere bulk. The world worships physical prowess ever more than it does mental alacrity.

The rabble will follow the footsteps of the giant every time. Not the mental giant—he is often a dwarf in body—but the physical giant.

There is an old saying that a good big man is always better than a good little man. It is strictly true. The trouble is good big men are rarely found.

If built of the right kind of stuff big ballplayers are better than little ballplayers. They have more smashing power with the bat and they can stand the wear and tear of the every day struggle better than the slim types like Harry Bay or the midgets like Mike Huggins.

The game's greatest ballplayers are always big ballplayers.

The best football players are big football players.

Origin of Curling.

Duluth has some veteran stone slingers, but it is doubtful if the oldest of them can of their own knowledge dispute the following statement from the St. Paul Daily News in regard to the origin of the game of the stone and broom:

It is difficult to ascertain exactly when the game of curling was invented, but it appears to have been a favorite pastime back to the middle ages. Of course Scotland was its home, and in the Macfarlane museum, Stirling, the most ancient specimens of curling stones are to be seen today. One of them bears the date 1511, a time anterior to the battle of Flodden, while another, although not certified in the same way has the appearance of being more ancient.

There is a tradition to the effect that James IV, the Scottish king at this time (1472-1513), was a curler, and that he presented a silver curling stone to be played for annually by the parishes in the Carse of Gowrie, as a token of his appreciation of the game.

Tipping Signals.

"Tipping off the catcher's signals is a mighty good thing—if you are not caught at it," said Arthur Irwin, in a recent fanning fest. "And it is not a new stunt of the diamond either. I remember away back in 1888 when the Boston club had purchased Mike Kelley and Johnnie Clarkson, for a fabulous price in those days, that we worked the game to perfection.

"I was playing with Philadelphia and Boston walloped us in the opening games on our home grounds. When we went to Boston we were after revenge. When the two stars walked out on the grounds a chorus of 10,000 got to their feet and paid boisterous respects to the new idols.

"I studied Clarkson's delivery for two innings and accidentally tumbled to his signals to the infield. His cue for a slow ball was to drop his left hand to his side, and the infielders then pulled around to the left of the diamond. When his right hand dropped it meant a fast ball, and the players shifted to the right.

"We worked Clarkson's signals in a hit and run game. When one of us got on first, he was instructed to run on a fast ball. This drew the second baseman to his base and our batsman was instructed to hit at the same time. The result in most instances was to drive a ball safely through between first and second.

"All of Boston's twirlers used Clarkson's signals and we worked the game until the end of the series, when Billy Nash got next to what we were doing and the signals were changed in a hurry."

Stood on His Head.

Here's a story that "Bob" Ganley likes to tell when the gabfest has waxed pretty warm, says an exchange:

"The Pittsburg team went on a barnstorming tour a few seasons ago and it was funny to us how the fans in the small towns would root for their teams to win, as if the fate of the universe were at stake.

"At Salem, Ohio, Honus Wagner had been hitting the ball all through the game as if he wanted to knock the cover off, and the crowd kept yelling. Finally one well-dressed fan yelled 'If you strike Wagner out, I'll stand on my head on home plate.'

"That caught the crowd and they went after the pitcher harder than ever to fan Honus. I don't know whether the pitcher did it or Honus deliberately struck out, but he went out on three strikes.

"That crowd simply had a fit. The man who had promised to stand on his head tried to sneak out of the grand stand, but was caught by some of his friends. When the inning was over they marched him down to the diamond and actually stood him on his head on the home plate. It was so ludicrous that even the old timers had to laugh."

An Official Yarn.

Lloyd Griscom, the new ambassador to Italy, tells of a baseball game he saw in Brazil. An Englishman was catcher for his nine and did fairly well until a new pitcher was put in. The twirler sent in a hot one. The Englishman failed to hold the ball, which hit him on the nose and knocked him senseless. When he recovered he asked feebly: "What was it?" The umpire answered: "It was a foul." "A fowl!" groaned the poor catcher, mistaking the word. "I thought it was a mule."

MAIDENS WHO DO WOOING.

Queer Belgian Village in Which Odd Custom Prevails.

New York American: There is at least one place in the world where, if a maiden dies unwed, it will certainly be her misfortune and not her fault, and that is the Belgian village of Ecaussines Lalaing, about a dozen miles as the crow flies from the historic field of Waterloo.

While other maids resignedly wait for lovers to come a-wooing, and "let concealment, like a worm i' the bud, feed on their damask cheeks," the girls of Ecaussines realize that their mission in life is to secure husbands, and that, if the men are backward in coming forward, it is their duty and prerogative to take the initiative and to coax or compel them to come to them.

For many a year these resolute spinsters have made their pilgrimages to a wayside shrine to pray for the husbands who are so coy in coming; but a couple of years ago they decided that in this particular matter works were probably more effective than faith, and they changed their plan of campaign. They determined to try the arts of bold advertisement; and with this view they arranged a banquet, to which, by widely circulated notices and press paragraphs, they invited all the coy bachelors in the district for many a mile around to their maiden village. Surely the men, however laggard in love, could not refuse the hand of beauty thus invitingly held out to them; and when they came, possibly their allurements of face and figure and tongue would secure many a captive! Nor were they wrong, as the sequel proved.

The hour fixed for the feast was 4 o'clock in the afternoon, and by 2 o'clock sixty maids of Ecaussines, decked in all their most seductive finery, were peeping coyly out of as many windows, and sixty virginal hearts were beating fast with anticipation.

Long before the hour fixed for the symposium the anxiously-awaited guests began to stream into the village. From every point of the compass they came and in every guise. Loutish farm-laborers arrived in their Sunday clothes; spick-and-span young farmers drove bravely up in their gigs; dapper assistants from the shops of Brussels, Mons, and many another neighboring town, trooped in in their gayest attire, sporting enormous bouquets and twirling their canes with the air of conquerors—until the "place" swarmed with potential husbands for the maids of Ecaussines.

At the crucial hour of 4, as if by a concerted signal, the sixty fair hostesses converged on the "place," and, with heads held high, marched through the ranks of their guests, as queens might march through the obsequious ranks of their subjects. Each maid then took her seat at one of the many flower-decked tables, leaving a suggestively vacant place at her side; and as if moved by one irresistible impulse, the waiting guests rushed to these empty seats, and almost in the twinkling of an eye every table was full. But, alas! those bidden to the feast far outnumbered the places provided for them; and hundreds were compelled to play the passive and disappointed role of lookers-on.

Then began the fun of the feast. To the sipping of coffee and the munching of cakes every Jack found his tongue loosened and began to make love to the adjacent Jill. Under the stimulating influence of flashing eyes and smiling lips the coyest and most awkward bachelor of them all was quickly converted into an eloquent and ardent wooer; and long before the feast came to an end fourteen of the guests had irrevocably lost their hearts.

ALL RED.

Philadelphia Record: A West Philadelphia youth was being taught the festive American game of poker the other night, and after the relative value of pairs, threes, flushes and straights had been explained to him, the play was started. After half an hour or so he surprised the others in the game by asking: "What is it when all the cards are of the same color?" "A flush," was the reply. "Then I'll bet $6," and, suiting the action to his words, he threw that amount into the pot. The others, frightened by the play, "wisely" laid down their two pairs and threes, which were held against the novice, and he scooped in the pot, laying face up on the table three hearts and two diamonds. Dismay and further explanations from his instructors naturally followed.

BURKE, PROMISING WITH BAT, GOES WITH GIANTS

FRANK BURKE.
PHOTO. STEARNS WILDERMUTH.

New York, March 2.—Lest they forget, baseball "fans" of the greater city are reminded that the Giants have under their wing one young player who may be a fine batter when he attains his baseball growth.

Frank Burke, after his purchase from the New Haven club last year, had little opportunity to play, but in the few games to which he was somewhat casually introduced at the Polo ground he displayed marked characteristics of a hard, free hitter, as well as one of the long distance kind for whom John James McGraw has a special fondness.

Burke will be one of the California party. He has wintered well among the Pennsylvania hills at Wilkesbarre, and the manager of the Giants has summoned him out West to grow up with the team this season and prove whether he is ripe for the major league harvest.

Burke has a few elementary "stunts" to slip into his cranium in regard to fielding, but it is an old axiom in baseball that a player may be taught to field, but never to bat.

Still there are some batters who have improved their worth hugely by learning to improve their style. Being the fortunate possessors of naturally keen eyesight, they were possessed of the best of elementary foundations.

IN THE CANANEA DISTRICT

Production Coming Along Well at the Various Mines and Development Work is Constantly Showing Up Better Things.

Cananea, Mex., March 2.—General conditions in Cananea could not well be more propitious than at the present time, for all concerned. Production is coming along well at the various mines while development in these in constantly showing better and better things.

The reduction works are operating to excellent advantage. General Superintendent Ricketts of Greene-Cananea is on the ground and working with his usual vigor in conjunction with his heads of departments to bring about realization of plans for betterments and increased outputs from both mines and reduction works, which have been in part wholly and in part tentatively decided upon. There is enthusiasm on all sides as to the immediate present and unbounded confidence that the future will dim the past and the present in achievements in the camp. In the district at large there is high enthusiasm, justified by the results of development work and prospecting underway.

Under current of great strength has been much in evidence the last week, exceeding any demonstration of this kind in several months. Every train has brought in mining experts and investors and the hotel lobbies have reflected in their life the undeniable fact that Cananea district is an attraction drawing attention from all over the continent. Properties in the district are in demand and investors do not hesitate to send competent and high priced men here to investigate offerings made. These men, without exception, admit the greatness of the camp and can only marvel at its immense scope. Nowhere else, they are free in declaring, has so short a period of work shown as much as Greene-Cananea properties have shown and no where is there such an extent of mineralized country being worked profitably with so shallow depth attained as prevails here. The camp is now a wonder and there are none who will venture the placing of a limitation on its growth and extension under the development which is steadily being pushed along in all directions.

Contracts held for the furnishing of coal, coke and lumber supplies are bringing in steady shipments of these primary necessities to the operation of the camp, while machinery and other supply deliveries are being made as fast as the manufacturers and the transportation lines can get them through. As a result of the enforcement of contracts for fuel and lumber supplies, the new yard on the south side of the mesa is getting on hand very satisfactory reserve stocks. The fact is a comfortable one for consideration at home, even though outsiders may have been pinched some in order that the Cananea contracts might be filled, as would appear from a shortage of fuel and lumber at Bisbee, which has been given as cause for curtailment of working forces there during the week. Improvements and new work throughout Cananea camp are going ahead vigorously on all sides and a great deal is being accomplished. Abundant labor is here at the present time to carry on all work.

IRON MINE FOUND IN ARIZONA

Richest Discovery of Iron Ore Ever Made in the Territory is Reported by E. Holden of Wickenburg.

Douglas, Ariz., March 2.—What promises to be one of the greatest discoveries of iron ore ever made in the Territory was brought to light when E. Holden of Wickenburg brought to that place some fine specimens of iron ore which he had found in a mountain about twenty-eight miles from Wickenburg, in the vicinity of the Bullard mine, and twelve miles from Eagle station.

Immediately after Holden had disclosed the location of his discovery there was a rush for the district, and some 100 location notices, in addition to the fifty-three locations made by Holden, were soon conspicuously posted on the mountain. Despite this Mr. Holden, who is a mining engineer of many years' experience, states that there are still many more claims to be had there. Speaking of the find, Mr. Holden said:

"It is surprising to me that this immense body of ore was not discovered before, as there was a trail leading directly across the very richest of the ore, which is as plain as day, and the croppings would almost talk to you.

"Myself and associates have located fifty-two claims, and there are as many more to be had. Our Alliance group consists of twenty-six claims, and the ledge can be traced for a distance of a mile and a half, and is fully 1,000 feet in width. There are 10,000,000 tons of ore in sight, all first class, the average of which is 68 to 75 per cent iron, carrying values in gold, copper and lead.

"Three thousand feet to the east of the Alliance group is the Black Diamond group, consisting of twenty-six claims, and the showing here is even larger than that of the Alliance, and is shown up more particularly in a cave about sixty feet deep, all in ore.

"On this group of claims there are at least 30,000,000 tons of ore, running equally as high in first-class ore as on the entire holdings.

"I have been besieged with telegrams from some of the most prominent mining people of the world in the last few days in regard to the property, and I expect some very substantial people here in the next five days to look over the property.

"Mr. Drake of the Santa Fe has assured me that a road will be built to the property at once.

"I fully expect that there will be 1,000 people rush to the new find within the next week, and there will be a regular scrap for holdings," many more to be had. Our Alliance

PLACER LANDS IN WYOMING

Cheyenne, Wyo., March 2.—Thousands of acres of placer lands along Douglas Creek, in Albany county, Wyo., have been taken up, and with the coming of spring a number of dredging companies will begin very active operations. The American Gold Placer Mining company is soon to install a very powerful dredge upon its placer lands, and in view of the recent investigations by Dr. David T. Day of the United States geological survey into the possibilities of extracting gold values from the black sands, some surprising developments may be looked for. According to the report of Dr. Day, the Douglas Creek placer lands show values of $750 to the ton in gold.

MINING IN WASHINGTON

Seattle, March 2.—Abner Giffen, owner of the Apex mine in King county, was in the city last week, and reports that his company is building a five-mile railway to connect with the Great Northern. The Apex is an arsenical iron mine whose ore runs from one to three ounces in gold to the ton. Mr. Giffen states that he shipped $70,000 worth of ore last year and got out three cars last month despite bad weather that averaged $2,000 a car. His railroad has two miles completed and is only waiting for the weather to moderate to be rushed to completion.

Work will be resumed at once on the compressor plant being put in on the Saranac mine in the Chesaw. Operations were suspended temporarily on account of bad weather. The shaft will be continued to the 250-foot level.

ALASKA MINING

Seattle, March 2.—Reports of heavy development among the mines of Knight's Island are brought here on both Elliott and Burnett bays. The sale of the Dago group last week is directing much attention to this island.

The claims comprising the Dago group of copper mines on night's Island, Southwestern Alaska, were disposed of Saturday for $100,000 to a group of Seattle men. The claims were staked last July and have since been worked by their owners, three Italians known as Peter Bruno, Johnny Frisco and George Domenico. William Egan engineered the sale and left yesterday to pay $6,500 as first payment to the owners. The purchasers have fifteen months to make up the balance, and it is believed by those familiar with the property that this amount can be taken out by that time.

Through J. L. Parker, former manager of the Brown-Alaska smelter at Hadley comes the report of the recent activity in the Hadley district. The Maple Bay claims and the Niblock, sixty miles south of Hadley, are being heavily worked by the smelter people, their owners. At Kharta Bay, the chief bornite center of Southeastern Alaska, a ledge eighty feet wide has been opened and work on others in the neighborhood is being rapidly forwarded. The Cyntru Copper company, operating at North Arm on Prince of Wales Island, has built a narrow gauge railroad to the water a mile and a half long and is shipping ore. The value of the ore in the neighborhood runs about 6 per cent copper.

AT THE LAKE COPPER MINES

(Continued from page 1, second section.)

gamated company are in any way concerned in securing an interest in or the control of the Osceola or any of the Bigelow properties, Mr. Cuddihy having received word to this effect from Mr. Ryan.

This is in keeping with a statement issued by General Manager Norman W. Haire of the Osceola in which he states there is absolutely no truth in the reports circulated that there has been danger of the Amalgamated getting posession of the Osceola.

The statement of Mr. Haire, corroborated by Mr. Ryan, should put an end to the rumors which have been afloat. General Manager Haire is very emphatic in his denial of the reports in question. He says in part:

"The Amalgamated company or anyone directly or indirectly connected with it have not a single share of Osceola and have not had any; that there has been no attempt made on the part of Amalgamated interests to acquire any interest in Osceola, and that it would be impossible for Amalgamated to obtain anything like a control of Osceola. They have not bought Osceola and are not buying it now, and do not intend to but it.

"The management of Osceola Consolidated needs no defense. Its report speaks for itself. In a very short time Osceola has been built up to be one of the substantial institutions of Houghton county, and this has been done in spite of the carping critics who have been endeavoring to bring the present management and especially the general manager, into disrepute. If the present general management had followed the advice of certain interested parties who assume to know all about Osceola affairs, the stock might have advanced to $300 a share, but it would have been bankrupt at the same time. The present management refuses to be coerced into making Osceola a football of the stock market. If properly managed, the stock will take care of itself. If managed for the purpose of creating periodical booms for the benefit of a few, it will result in ruin to the property."

BISBEE OUTPUT IS NORMAL

(Continued from page 1, second section.)

they will spend some time at the ranch property. They are developing this ranch on a large scale and will install an extensive irrigation system. The Canoa ranch is thirty-five miles south of Tucson along the Santa Cruz.

There is little doubt but that a proposition to make an additional stock issue for the Twin Buttes will be put before the stockholders at their meeting in March. All of the present stock issue has been subscribed and the company desires additional money to prosecute more rapidly its development work.

It is stated also that in the event of a stock issue a portion of the money raised will probably be invested in a smelter and in the extension of the other camps in the Twin Buttes district.

* * *

The shaft of the Arizona National has penetrated the ore body for a distance of twenty-one feet, the bottom of the shaft is in solid ore and the ore averages 6 per cent copper. The property is located in the Pinto creek district, sixteen miles out of Globe. Much attention has been drawn to this district of late because of the highly favorable reports recently made on several different properties in the district. A railroad is projected into this district from Globe, as well as a telephone line which will connect several mining properties with the city of Globe.

* * *

Old Dominion's fourteenth level sulphide strike has more than justified expectations. The width of ore at present, forty feet, has already exceeded expectation, and whether it will continue ten or twenty feet, or further, is problematical. One thing is certain, however—the Old Dominion sulphide vein on the fourteenth level is the largest high grade ore body yet opened in any copper mine in the Southwest. We might possibly except the Old Dominion west ore body, which has been partially opened on the eighth, ninth and tenth levels—sufficiently to indicate its great size and high quality.

There is a mistaken idea in Boston that the fourteenth level sulphide veins are a continuation at greater depth of the west ore body, as is assumed by George L. Walker of the Boston Commercial. This is erroneous. The two great leads are entirely separate and distinct, which makes the latest strike of all the more importance. Two such bodies as these establishes the Old Dominion as one of the greatest copper mines in the Southwest.

The sulphide ore body on the fourteenth level where opened by No. 2 crosscut is almost directly beneath the old Interloper shaft, destroyed by fire a year ago. Had a former management sunk that shaft 200 feet further—from the twelfth level—it would have penetrated the sulphide ore body, and the history of the Old Dominion company in all probability would have been very different.

The physical condition of the mine was never so good as it is at present. There has been steady improvement for months and the increase in the ore measures has been very gratifying. The amount of ore being hoisted daily is now larger than at any previous time and the grade of the ore is good. The output from the Continental and original Old Dominion claims is also increasing and the United Globe properties are supplying a considerable tonnage. Some idea of the present output of the mines may be gained from the statement that the stock pile at the smelter now contains about 10,000 tons of ore.

* * *

The recent strike of the Old Dominion mine has made Globe Consolidated a better investment now than any time in the past. There is no more calls on Globe Consolidated and the machinery is on the ground and drifting has been commenced on the 500 level of the Gem shaft.

* * *

There has been an important discovery nine miles west of Benson in the Little Rincon mountains, made by O. W. Banta. Samples of the ore was sent to the Douglas smelter and returns received last week which showed values ranging between $11 and $21 per ton.

The first of February Mr. Banta discovered four great ledges cropping out for a long distance on one of the Little Rincon mountains nine or ten miles northwest of Benson rising about 500 feet higher than the surrounding country, and in plain sight of the junction town. The outcropping of these ledges is composed principally of Azurite copper ore. He located six full claims across the mountain along which the ledges are exposed for thousands of feet, and brought home samples of the surface rock, but waited for smelter returns before making his discovery known to the public, as it seemed so remarkable to find still vacant those ledges of copper ore, none of which are less than four feet wide, and in plain sight. The ledges run northeast and southwest with granite wall on the southeast and porphyrated lime mixed with slate, on the northwest.

In the same vicinity John Thomas, an old-timer of Benson, made a discovery of copper last October, and did discovery work on the same mountain, where the ledges of ore on the Banta claims pass through, and he is now doing the annual assessment work for this year. The work shows a large ledge of copper ore which improves with increasing depth.

* * *

Improvements in the United Verde mine and smelter are a matter of constant occurrence. Not a month passes but witnesses the expenditure of many hundreds of dollars for betterments. The capacity of the smelter has lately been greatly increased, and the furnaces are also being enlarged. Already there are five 500-ton furnaces in the plant. The most urgent problem of the mine is how to handle the immense product. The amount of ore now blocked out is probably enough to last thirty or forty years. Mining operations throughout the whole Jerome Verde copper belt are not very active. A number of promising properties in the immediate neighborhood of the United Verde are being rapidly developed. The North Verde, the Verde Grand, the Cleopatra, and the Black Hills group of claims are making the most satisfactory progress, besides demonstrating beyond all question the very widespread extent of the sulphide ore beds underlying the United Verde property.

LAKE SUPERIOR IRON MINES

(Continued from page 1, second section.)

mensions, and it has three compartments. Substantial values have been developed, and there seems no reason to doubt that still another considerable footage will be taken from this old-time property.

The Armenia, formerly known as the Smith, also was operated by Ferdinand Schlesinger in the early days. There were no buildings or machinery on the ground when Corrigan, McKinney & Co. acquired control, while the "mine" consisted of a few old openings that were a detriment rather than an advantage, the shaft having fallen in several years previously. The ore is of low grade, rather high in silica, and it is soft and wet, making its removal a matter of some difficulty and requiring considerable ability to handle it to advantage. The produce is recovered by means of the caving system, which appears just the thing for the proposition. There are two shafts, each down in the neighborhood of 400 feet, and each 5 by 18 feet, with three compartments.

Over in the Iron River-Stambaugh districts of the Menominee range, the Waldron property, which Oglebay, Norton & Co. are developing in section 36-43-35, is showing up well. Diamond drilling is understood to have revealed the presence of considerable ore bodies, and with the intention of still further proving the deposit a shaft is being sunk. In section 7, same town and range, the Florence Iron company is exploring the Luba property, and has just installed a plant of machinery there. Machinery also has been erected at the McFarland property, in section 13 of 43-35, where the Buffalo & Susquehanna company is conducting exploratory work, and the tract will be given a thorough test. The ledge here is 100 feet down. A number of test pits have been sunk into the iron-bearing formation, and there are indications pointing to the existence of an ore body of considerable magnitude. State Senator Moriarty of Crystal Falls is interested in this property as one of the fee owners. Toledo furnace interests have taken an option on the Kinney property, and exploration has been started, with Capt. Isaac Williams of Crystal Falls in charge as superintendent.

The constant settling of the ground in the principal business portion of the city of Norway, Menominee range, the result of the mining operations at the Steel corporation's big Aragon property, appears ample justification for the assertion that an early exodus to the south side of the town is imminent. Only a few days ago the Aragon mine carpenter force was put at work to straighten up the buildings occupied by L. F. Springer, John Perkins & Son and A. J. De Roeck. It was found that the pillars in the De Roeck store were broken and were sliding. The center of the brick wall on the outside is bulged out. A rod 103 feet long has been run through the three buildings, with the expectation that it will hold the walls, for a time at least. The ground is gradually giving away under these buildings, however, and observance shows nearly every window on Main street to be out of its setting.

This same subsidence of surface is occurring at Iron Mountain, the Menominee range metropolis, where for a long time past the Chicago & Northwestern railroad has been forced to continual effort in maintaining its roadbed across the Steel corporation's Chapin mine pit, already a huge depression and gradually becoming larger as the ground is allowed to sink as the ore below is taken out. Innumerable train-loads of earth and gravel have been dumped into this big fill, still there is a noticeable sagging in the grade, and the work must be continued indefinitely, although recently the railroad company has made application to the city council for the privilege of constructing a transfer track to connect with the Chicago, Milwaukee & St. Paul line at the latter's depot on B street. The county and the municipality also have been put to considerable expense in similarly maintaining highways and streets, as has the Milwaukee railroad. The Chapin pit, oval-shaped, has attained a length approaching a mile, is nearly 1,000 feet wide at the surface at one point and between 100 and 200 feet deep. The greatest fill is 600 feet long. The company is mining vigorously at a depth of 900 feet below, and with the immense amount of ore still to be taken out, the filling is a work that will go on for many years to come. Work is in progress again at the Chapin's big new "C" Ludington shaft, which probably will be the greatest in the Lake Superior region. Operations here had to be suspended recently when an ice jam in the Menominee river resulted in putting the hydraulic works out of commission. The shaft, 10½ by 21 feet in dimensions, is something like 1,200 feet in depth, and it had partially filled with water.

What might easily have been a decidedly more serious blaze was narrowly averted recently at the changing house of the Cambria Steel company's West Vulcan mine. One of the miners had put his pipe into a pocket of his working clothes without knocking out the fire. The lining ignited from the pipe and the clothes were soon a mass of flames. Prompt action on the part of the dry tender and others in the building quelled the flames. There was no loss other than the destruction of the man's "digging" clothes. It quite often happens in the Lake Superior region that a mine "dry" is destroyed by fire, and in practically all cases the origin of the blazes is a mystery. Possibly the experience at the West Vulcan is timely as a solution of these mysteries. It was only two or three months ago that there was a veritable epidemic of fires resulting in the destruction of a number of miners' changing houses at properties in the iron country fields, at the west end of the Menominee, and recently the timbermen's "dry" at the Cambria Steel company's Republic mine, on the Marquette range, went up in smoke. The miners, themselves, are generally the principal losers from fires of this nature.

A contract for the erection of twenty-four ten-room double dwellings, also twenty-four sheds, one for each house, at the Smith mine in the Swanzey district, south of Negaunee, Marquette range, has been awarded by the Cleveland Cliffs Iron company. The contractors will begin work as soon as it is possible to get the material on the ground, and they have agreed to have all the structures completed by Aug. 1. When the Cleveland-Cliffs company called for bids on this work a few weeks ago it was announced that the dwellings were to be erected at the Austin mine location, but since then it has evidently been decided to increase the working force at the Smith, which is about a mile from the Austin. Operations at the Smith were resumed about a year ago and since that time the company has erected several new buildings, including engine house and blacksmith shop. Following the completion of the twenty-four double houses it will be possible to work a much larger force than will be employed early in the season. A number of dwelling houses also will be erected by the company at its Austin mine.

The coming season will find the Cleveland Cliffs company's railroad system in better condition to meet the traffic demands upon it. Two hundred ore cars and two additional locomotives have been ordered. The cars will be furnished by the Pressed Steel Car company of Pittsburg, and will be similar to those already in use. They will be of fifty tons capacity. Delivery is expected by April 1st. The locomotives are being manufactured by the Baldwin company. They will each weigh 165,000 pounds, or eighty-two tons, and whole they will be as fine locomotives of their size as are being built, they will not be the heaviest in use on the Cleveland Cliffs railroads, as there are now in service three engines each weighing 166 tons. The Cleveland Cliffs company now is producing a good output of ore at the Swanzey and Princeton locations, which are separate and distinct from the Ishpeming and Negaunee mines, served by the Lake Superior & Ishpeming road, one of the three lines of the system. The Marquette & Southeastern extended a spur to these properties last season, but it was so late when it was opened that it was not an appreciable factor in swelling the amount of ore handled. This season, however, the traffic from the Princeton and Austin will be an item of considerable importance.

In the Negaunee field of the Marquette range, the sinking of a new shaft has been started at the Breitung estate's Mary Charlotte property, a short distance north of the Chicago mine workings. Half a mile east of the Mary Charlotte, Benjamin Neely of Negaunee is exploring section 9 with a diamond drill. Not much has been given out concerning the developments at the Mary Charlotte, but it is known that ore bodies of considerable extent have been opened and there is no question that the mine will be one of the largest producers in the district. The property is making daily shipments to the Michigan Iron company's char-coal iron furnace at Manistique. From four to eight carloads are going forward each day. Ten more charcoal kilns are to be erected at the Manistique plant by the Burnell Chemical company, which will make a battery of ninety-four. Construction work will be started by the contractor April 1. At the Newberry (Luce county) furnace of the Michigan Iron company, there has just been installed a new electric plant which will furnish illumination for buildings and grounds.

James Gayley, Thomas Morrison, D. M. Clemson and D. C. Kerr of the executive staff of the United States Steel corporation, have been in the Lake Superior region latterly, and have had conferences at President Thomas F. Cole's Sylvanite lodge, near Watersmeet, Gogebic county, with the Michigan iron range general managers.

RECENT ORE FINDS AT BUTTE

(Continued from page 1, second section.)

down. At a depth of 800 feet the vein will be explored and there is little doubt among mining men that copper ore will be found. In the lower workings on the 300-foot level, some copper ore assaying as high as 3 per cent was found while lessees were working the property before the organization of the Butte and Superior. The Blackrock vein has been traced across the Overman, Black Crow, Assay and Occidental claims of the North Butte Extension company. The latter will in a short time begin sinking a shaft on the Black Crow, for which active preliminary work has been going on the last week. The North Butte Extension claims lie north and east of the Berlin group of claims of the North Butte company, from which fact it takes its name. The North Butte is sinking a shaft on the Berlin claim and is also driving a long adit to that ground from the Jessie mine, situated some distance to the south. Among those doing development work in the region are the Butte and Superior, Butte-Milwaukee, North Butte, Butte & companies. W. A. Clark is sinking a shaft on one of his claims adjoining the Blackrock. The Lewisohns are also putting down a shaft on the Granite Mountain, near the North Butte mines.

The north crosscut of the Butte Capper Exploration company in the Six O'Clock mine is now in about 600 feet and evidence is strong that a big ledge will be cut shortly. The crosscut has encountered a strong talc seam, highly mineralized. Good progress is alo being made in the crosscut which has been started south from the 1,600-foot station.

The shaft of the Little Mina mine has been equipped with machinery from the Parrot company and sinking has been resumed. The shaft is 800 feet deep and will be made 200 feet deeper, at which point the vein will be opened.

The organization of the Butte and Bradley Copper Mining company has been completed. It has 1,500,000 shares of $1 stock. The officers are: Thomas W. Bradley of Butte, president; T. J. McKenzie of Anaconda, vice president; E. E. Kenerk of Butte, treasurer. The directors are T. W. Bradley, G. B. Owen, George W. Irvin, T. J. McKenzie, S. Sindan, L. S. Schoolherr, John Lindsay, James G. Graham, J. R. Boarman, Aleck Vellman and Richard Bradley. For the purpose of development the company has placed 600,000 shares in the treasury and has offered 300,000 for sale. The property of the company consists of five claims situated a mile further north than the London, and the North Butte Extension property of the Butte and Bacorn, and in a district unexplored.

COBALT CAMP IS EXTENDING

(Continued from page 1, second section.)

of the lake, indicating that plenty of silver will be taken out of the lake's bed.

Two Larder lake claims reported to have been sold by E. G. Mayot of Grantford for $3,000. The latest finds about Larder lake are on a creek known as Victoria creek. This creek running into Grassy lake, has been formerly known as a small branch of the Blanche river, but since large deposits of mineral have been found on or near its banks, a distinctive name is now given to it. Heavy finds have recently been made in a number of places, namely, native silver, bismuth and native gold in a few places copper and galena, also a black quartz, whose properties are at present unknown to prospectors of that district, but which seems very rich in gold.

According to Dan O'Connor of Temagami, the reports regarding the new Lady Evelyn Lake silver district have been more than justified by results so far, and it is likely that the spring will see a big rush. Parties from Pittsburg, Cleveland and New York are awaiting for the ice to go.

It is said that United States capitalists will build a railroad up the Montreal river. The charter has been obtained and the railroad will run through the Edison claim, and it is expected will reach the Lake Evelyn twenty miles up the river. This railroad will run through the property of the Canadian Central mines.

A large slab of native silver has been found during development on the main shaft of the Red Rock.

The Giroux and Fair claims of the township of Burke have been purchased by Montreal capitalists for $50,000. It is understood that the properties will be merged and the flotation put on the Montreal market.

ELY AS A COPPER PRODUCER

(Continued from page 1, second section.)

lying to the west of the Veteran mine in what is now believed to be the extreme western boundary of the copper bearing zone of the district. Most of the claims beyond the Veteran are small in acreage, but combinations of interest may be effected this spring which will place them in stronger hands. One of the best showings in the extreme eastern section of the district, some ten miles distant from the Veteran, is that of the Hercules group, on which active development work will shortly be undertaken.

The Nevada Northern railway is congested with freight for the mines, the smelter and the merchants of Ely. Hundreds of cars of lumber and equipment are under orders, fuel is being brought in as rapidly as it can be obtained and food supplies are being rushed through in steadily increasing quantities. The fuel situation is improving and it now seems probable that within a month there will be sufficient stock on hand for all requirements.

ORDER TO EXAMINE ACCOUNTS, ETC.

State of Minnesota, County of St. Louis, —ss.

In Probate Court, Special Term, Feb. 15, 1907.

In the Matter of the Estate of Persis C. Thomas, Deceased:

On reading and filing the petition of Benjamin V. Lewis and John F. Lewis, executors of the estate of Persis C. Thomas, deceased, representing, among other things, that they have fully administered said estate, and praying that a time and place be fixed for examining, settling and allowing the final account of their administration, and for the assignment of the residue of said estate to the parties entitled thereto by law, and for the discharge of the executors and the sureties on their bond.

IT IS ORDERED, That said account be examined, and petition heard by this Court on Monday, the 11th day of March, A. D. 1907, at ten o'clock, A. M., at the Probate Office in the Court House in the City of Duluth in said County.

AND IT IS FURTHER ORDERED, That notice thereof be given to all persons interested, by publishing a copy of this order once in each week for three successive weeks prior to said day of hearing, in the Duluth Evening Herald, a daily newspaper printed and published at Duluth, in said County.

Dated at Duluth, Minn., the 15th day of February, A. D. 1907.

By the Court,

J. B. MIDDLECOFF,
Judge of Probate.

(Seal, Probate Court, St. Louis County, Minn.)
STEARNS & HUNTER,
Attorneys.
Duluth Evening Herald, Feb. 16 and 23; March 2, 1907.

SUMMONS IN APPLICATION FOR REGISTRATION OF LAND—

State of Minnesota, County of St. Louis —ss.

District Court, Eleventh Judicial District.

In the matter of the application of the Children's Home Society of Duluth, to register the title to the following described real estate situated in St. Louis County, Minnesota, namely: Lots numbered thirteen (13), fourteen (14), fifteen (15) and sixteen (16), in block numbered ninety-nine (99), in Endion Division of Duluth, according to the plat thereof on file and of record in the office of the register of deeds in and for St. Louis County, Minnesota,

Applicant,

vs.

M. D. Conte, Charles Chester, John D. Gill, the Western Land Association of Minnesota, and all other persons or parties unknown, claiming any right, title, estate, lien or interest in the real estate described in the application herein,

Defendants.

The State of Minnesota to the above named defendants:

You are hereby summoned and required to answer the application of the applicant in the above entitled proceeding and to file your answer to the said application in the office of the clerk of said court, in said county, within twenty (20) days after the service of this summons upon you, exclusive of the day of such service, and, if you fail to answer the said application within the time aforesaid, the applicant in this proceeding will apply to the court for the relief demanded therein.

Witness, J. P. Johnson, clerk of said court, and the seal thereof, at Duluth, in said county, this 15th day of February, A. D. 1907.

J. P. JOHNSON,
Clerk.

By V. A. DASH,
Deputy.

(Seal of Dist. Ct., St. Louis Co., Minn.)
DAVIS & HOLLISTER,
Attorneys for Applicant.
Duluth Evening Herald—Feb. 16-23, Mar. 2, 1907.

SUMMONS IN APPLICATION FOR REGISTRATION OF LAND—

State of Minnesota, County of St. Louis.—ss.

District Court, Eleventh Judicial District.

In the matter of the application of Bradford C. Church, to register the title to the following described real estate situated in St. Louis County, Minnesota, namely: The North East quarter of the South West quarter of the South East quarter (NE¼ of SW¼ of SE¼). The East half of the North West quarter of the South East quarter (E½ of NW¼ of SW¼ of SE¼). Sparta

Sparta, Minn., March 2.—(Special to The Herald.)—Superintendent Mitchell was looking over the Gilbert mine last week.

D. M. Maures is rejoicing over a 11 pound boy, which arrived Feb. 23.

The Iron Range road is building a bridge over the stripping tracks at the Gilbert mine.

James Fall of Eveleth, was trying to buy some real estate in Sparta Friday.

Postmaster R. R. Anderson was an Eveleth visitor Wednesday.

Carl Hendrickson and John Juten, business men of Sparta, are in Eveleth.

The copper craze is very mild compared with the mad rush for real estate in Sparta. The excitement is at fever heat here. Transfers are made nearly every day and prices are soaring high. Rents have increased all the way from 50 to 200 per cent and people from outside are flocking here in great numbers. Every building in Sparta is occupied or under lease and will be occupied as soon as stocks arrive. The Gilbert mine has commenced operations, and it is said they will work five steam shovels and eight locomotives this summer. There is a shortage of dwelling houses to accommodate the families that are moving here.

Brainerd

Brainerd, Minn., March 2.—(Special to The Herald.)—The Commercial club of Brainerd is going after one of the state training schools and going after it in earnest. A free site is promised within four miles of this city—in fact one location offered is within the city limits, and Senator Alderman is making a virgorous fight for the measure.

S. F. Fullerton, executive agent of the fish and game commission, was in the city Wednesday on his way home from investigation of the proposed site for a fish hatchery at Deerwood. Mr. Fullerton was entertained while here by the Brainerd Commerical club, which is doing much active work in behalf of the Deerwood site.

The death of Mrs. Elmore Waite, of Gull Lake, Thursday night was one of the saddest possible. She was the daughter of Parker Waite, formerly of this city and was married to Elmore Waite, who while of the same name was in no wise related to her, about thirteen months before her death. She attended school in Brainerd in her girlhood and afterwards taught in Cass county. She was beloved by all who knew her. The funeral occurred from the Methodist Episcopal church in this city Monday afternoon, the Episcopal service being read by Rev. Charles Fox Davis. Interment was in Evergreen cemetery. Mr. and Mrs. A. Waite, parents of Elmore Waite and Mr. and Mrs. C. L. Waite, all of Marathon, Iowa, were in the city over Sunday to attend the funeral.

A letter has been received here from Mrs. Maggie Brodens, Rehoboth, Mass., asking for information as to the whereabouts of her brother, John Marchard, whom she has not seen for thirty years. He is a lumberman and when last heard of was in the pine woods of Northern Minnesota.

Brainerd suffered for several days last week from a kerosene old famine. A tank car arrived Thursday morning and the grocers got busy and everyone had light that night.

At the dedicatory services of the First Baptist church in this city Sunday morning last there was over $1,000 subscribed to assist in paying for the buildings. The dedicatory sermon was preached by Rev. Dr. A. T. Fowler of Minneapolis, while Rev. E. R. Pope of the same city, preached in the evening.

A new social organization to be known as the Bohemian club was organized by ten young society men of the city Friday night. The officers are W. E. Fox, president; W. J. Miller, vice president; E. S. Koop, secretary; Dr. George W. Lausted, treasurer. The charter members are W. E. Fox, W. J. Miller, E. S. Koop, George W. Lausted, Charles Rice, William Grossman, Edward Murphy, W. E. Hill, W. H. Koop and R. G. Gemmell. The club has secured handsome rooms in the basement of the Walverman block which are being handsomely fitted up for their occupancy.

A. Ousdahl, chief engineer at the Northern Pacific shops went to St. Paul on business, last week.

Miss Jennie Horner, one of the popular teachers in the Brainerd schools spent Washington's birthday and the day following at her home in St. Cloud.

D. M. Clark and Attorney M. E. Ryan of the city attended the big meeting of the Knights of Columbus at St. Paul the last of the week.

J. L. Ross of St. Cloud, who was sent to Stillwater on his confession of embezzlement from the Kellogg-McKay Cameron company, victimized several Brainerd people on his last trip here. He had made the town for several years and was thought to be as square as his firm.

Misses Lulu Huseman and Ethel Quinn gave a pleasant party to their teacher, Miss Therpy, Thursday evening.

Miss Mabelle Grewsox entertained her fellow bachelor maids at a Washington party on the 22d. A cherry tree and hatchets were the prominent decorations of the tea table. A pleasant time was enjoyed.

Miss Eva Dean of Como, was in the city Friday and Saturday visiting at the home of her uncle, T. J. White. She was home on account of the Northern Pacific sanitarium. Mr. Eggleton died Sunday and the remains were taken to St. Paul for interment. Mr. Eggleton was forman of the upholstering department of the Northern Pacific coach shops at Como.

Miss Carrie Minich entertained her Sunday school class at dinner Friday evening. Those present were Messrs. Henry Ousdahl, Conrad Ousdahl, Henry Mills, Cleon White, Quinn Parker, Fred DuBois, Walter Fall, Arthur Cluston, Dean Wilson, Frank Bennett, George Mahood, Alger Anderson and James Alderman.

W. N. Holbrook of Neutral, was operated upon at St. Joseph's hospital Saturday for appendicitis. He is getting along nicely and a speedy recovery is expected.

S. B. Stearns, for several years in the employ of Bonness & Mowe, left the last of the week for Minneapolis. From there he goes to Oregon where he expects to locate.

Superintendent J. P. Anderson, of the Northern Pacific shops went to Duluth to spend Sunday, bringig back their daughter, who has been in Superior for some weeks because of the illness and death of their youngest daughter with scarclet fever.

Mrs. T. J. Tyler is visiting her daughter, Mrs. Simonitsch, at Jamestown, N. D.

The friends of Miss Edna Newgard gave her a very pleasant surprise Friday night.

Attorney Larson went to Minneapolis Monday to attend a meeting of the Minnesota conference of the Swedish Lutheran church, of which he is a member.

Miss Hildegarde Courtney returned to her school work in St. Paul Monday, after a brief visit at the home of her parents, Dr. and Mrs. Walter Courtney.

Miss Edith Clouston, who completed her work at St. Cloud normal in several months less than the allotted time, left Monday for Choklo, Minn., where she will teach school.

Rev. J. S. Oslund, now serving as a missionary in Idaho, has accepted a call to the pastorate of the Swedish Lutheran church in this city, and will assume the duties about the first of May.

M. C. Nachbar of Crookston visited old friends in the city over Sunday.

Mayor Wise has declared war on the saloons which permit minors to frequent them or which sell them liquor. Two arrests have been made this week, and others, it is said, will follow. The arrested parties have not yet had their hearings.

Emery J. Scott of Minneapolis was in the city this week looking after the probating of the estate of his father, the late Charles H. Scott, of which he is administrator.

Albert McLagnan of St. Paul was in the city over Sunday visiting his son, Albert McLagnan, who is in the Northern Pacific hospital suffering from a crushed ankle and other injuries received in a railway accident at Great Bend, N. D., last week.

Several Brainerd baseball stars will figure in the Jamestown, N. D., team this season. Pat Boyle will be captain and Jack and Jim Boyle, Baldy Murphy and Tommy Templeton, all of Brainerd, will be in the team.

Mr. and Mrs. W. H. Thampson, R. H. Carr and C. H. Killo of this city left St. Paul Wednesday evening for a month at

Woman's Nightmare

No woman's happiness can be complete without children; it is her nature to love and want them as much so as it is to love the beautiful and pure. The critical ordeal through which the expectant mother must pass, however, is so fraught with dread, pain, suffering and danger, that the very thought of it fills her with apprehension and horror. There is no necessity for the reproduction of life to be either painful or dangerous. The use of **Mother's Friend** so prepares the system for the coming event that it is safely passed without any danger. This great and wonderful remedy is always applied externally and has carried thousands of women through the trying crisis without suffering.

Mother's Friend

Send for free book containing information of priceless value to all expectant mothers.

The Bradfield Regulator Co., Atlanta, Ga.

Ancient Arms, 1469, of the Brewers Co., London

THE ART OF BREWING was brought to America by the first settlers of the Colonies, and the industry was generally fostered by Colonial legislation. One of the many examples of this is the act of 1789, passed by the legislature of Massachusetts: "Whereas the wholesome qualities of malt liquors greatly recommend them for general use, as an important means of preserving the health of the citizens of this commonwealth, and to prevent the pernicious effect of spiritous liquors; Therefore be it enacted, that all Brewhouses shall be exempt from taxes and duties of all kinds for a period of five years after the passage of this act."

We say: Most all Beers are wholesome, but ours is the most wholesome, and is brewed of choicest material, according to most modern and approved methods.

Fitger Brewing Co. Duluth Minn.

A Democratic county convention was held at A. W. Peterson's office Monday afternoon, and delegates were elected to the state convention at Flint.

Dr. J. R. Moore and party have been camping at Tamarack lake, where they tested the ability of his three wolf hounds, which recently arrived from Missouri. Several others went to Sans Souci Saturday.

J. Sullivan, a shift boss at the East Norrie mine, had his leg broken and received other injuries Saturday. As he and the captain were coming out of a drift to the mouth of the shaft, they saw the motor coming, and the drift being narrow, they had to crowd up to the logging. Mr. Sullivan was nearest the approaching car, and as it drew near it caught a loose piece of logging, hitting Mr. Sullivan and breaking his leg.

A miner at the Aurora A shaft also had a piece torn from his arm by a passing motor car on the same day. Amputation may result from the injury.

Robert McRae, a former resident of Ironwood but now of Seattle, Wash., is visiting his brother Dave.

L. E. Sherman, editor of the Bessemer Herald, has received word that he has been selected for the position of postmaster to succeed R. Bowden at Bessemer.

Nels Bloomquist, an employe of Lafayette mine at Benton, Wis., who has been visiting his family here, has returned.

Michael, who was summoned to Marinette by the death of his father, has returned.

The annual "derby" of the sleigh dogs of Ironwood was very exciting, though the weather was very chilly. A large crowd was in attendance and the races proved to be much faster than usual. Harland Wuetke won two straight heats, winning the first prize, a breach-loading rifle; Joseph Beudette received the second prize, a dog harness; James Archambeau, third prize, a sleigh; Edward Ryan, fourth prize, a pair of skis. The sport ended with a "penny shower" from the St. James' hotel and the club room windows, in which a large streetful of boys surged and pushed to obtain the "free copper."

H. Warwick has been granted leave from his position as English teacher in the high school, and is going to leave for Columbus, Ohio where he will follow business pursuits.

John Carr, a former Ironwood boy but who now holds down a position in the chemical laboratory at Hibbing, was visiting friends and relatives in the city during the week. He reports everything doing well on the range.

The remains of Anson A. Ferguson, who died suddenly at Hackley, Wis., were brought here Thursday, the funeral occurring Friday. Mr. Ferguson followed the occupation of millwright for years. He was born in New York state in 1841. He came West with his parents when a boy, the family settling in Wisconsin. In 1864 he enlisted in the First Minnesota heavy artillery, being mustered out of the service in October, 1865. He was a millwright for a number of years at Oshkosh, Colby and Wausau, coming to Ironwood several years ago. He assembled many of the planing mills and sawmills now operating in this section. Deceased was a member of Pleasanton post, G. A. R., and also of the Masonic order. Besides the widow, one son, E. C. Ferguson, a conductor on the Chicago & Northwestern railroad, survives him.

Barnum

Miss Margaret Graham returned Saturday from a couple of days' visit with Biwabik friends.

Otto, the 2-year-old son of Mr. and Mrs. William Hill, died Sunday afternoon after a prolonged illness, first with pneumonia and later diphtheria. The little fellow was taken sick early in the fall and has not left his room since. The strain has been a hard one on the parents and they have the sympathy of the entire community in the loss of their only son, he being survived by two sisters, Melville and Helen.

Mrs. William Wilson returned Saturday from Biwabik, where she went Friday to attend the Oddfellow dedication and dance.

B. C. Everett has advertised his farm on Lake Vermilion for rent. He will devote his time to local interests if he finds a tenant for the farm.

Miss Ida Odgers, formerly of Soudan, now a resident of Ely, visited at Soudan Friday and Saturday, a guest of Miss Cora St. Vincent.

William Coss was a Duluth visitor Tuesday and Wednesday.

About twenty couples of the "younger fry" enjoyed a dancing party at the opera house last night. Several of those present are just learning to dance, and a few of the "grown ups" were invited to assist the amateurs. The crowd was chaperoned by Mesdames Napier, Taylor, Porteus and McLaughlin. A jolly time was had by all who attended.

The Tower Lumber company's mill here was closed Tuesday because of a shortage of logs. Operations will probably not be resumed until navigation opens. Few of the employes will be inconvenienced by the shut-down, as employment will be furnished all who wish to go to the woods. The company is operating several logging camps in the near vicinity.

John Carrill returned Wednesday from Mount Pleasant, Mich., where he was called a week ago by news of the death of a brother.

LATEST NEWS OF THE NEIGHBORING TOWNS

engine wiper and watchman at this point.

Nels Eklund, who was compelled to abandon his studies at the state agricultural school and return home a short time ago, has been a severe sufferer from an affection of the ear since his home-coming.

John Bolin has accepted the position of night pumpman at the Great Northern's local station, vice Peter Westman.

L. W. Moffett and A. C. Holden were in the village last Friday making arrangements for a couple of crews to commence work here shortly on the new electric block system which the Great Northern is now putting in west from Superior. The former gentleman represents the company that has the patent for the system that is being put in, and also has charge of the crew doing the work. Mr. Moffett says that he has about fifty men at work at Carlton and that they will soon be transferred to this point. This electric block system is a new departure from those already in use on the roads in the East, and the Great Northern is the first road to have it put in. The system will be installed as far north as Arlberg, on the "high line," and as far west as Swan River on the main line, this spring.

William McLaughlin and family have moved to Superior.

About twenty friends and schoolmates honored Jesse Hall with a surprise party Tuesday evening. Refreshments were served and all report a very enjoyable time.

Mrs. James Harkness is enjoying a visit from her mother, Mrs. Holcombe of Duluth.

Mrs. J. E. Watts spent Wednesday and Thursday in Duluth.

A PAGE FOR THE BOYS & GIRLS

Hero Meets Hero.

THE CAT.

"I'm a fire-spitting Tom Cat;
So don't you come near me!
Don't think that I'm afraid of you,
Or that I'll climb a tree.

"I've seen a great, great many dogs
(To which you're just a candle
As compared to the great sun),
And each one I could handle.

"I'm known as that Great Fighting Tom,
So, I will say, take care
And do not come too close to me—
Or beware! Beware! Beware!"

THE DOG.

"You poor and frightened silly cat!
You'd better climb a tree,
Or I will let my temper loose
And then a sight you'll be.

"There's not a cat in all this town
Who doesn't fear my bark;
And when they know that I'm around
They keep themselves quite dark.

"I'm called the Big Cat Killer,
And there's blood within me eye.
So, if you'd live to catch a mouse,
Me you'd better not come nigh."

MAUD WALKER.

JOKELET

"Grandpa, what's the difference between rheumatism and gout?" asked Willie, who knew his grandfather was a sufferer from both these painful diseases.

"Well, sonny," answered grandpa, "you put your thumb in a vice and turn it till you can't bear the pain any longer and that's like rheumatism. Then give the vice a couple of extra turns and you'll get a faint inkling of what gout is."

And Willie knew his grandfather was suffering from gout that day.

When George Got Lost in the Desert.

BY WILLIAM WALLACE, JR.

George Franklyn had gone to visit his uncle and aunt, who lived in Southern California, not far from the great desert in whose very heart was spreading the Salton Sea.

When George left his home, in one of the Eastern states, the temperature there was below zero. It was in the month of February, and a heavy snow lay all over the ground. George was dressed for that sort of weather, and when he arrived at El Paso, Tex., en route to Southern California, he was obliged to put his overcoat out of sight, its very presence almost suffocating him. The next morning, on rising from his berth, he dispensed with some of his heavier garments when dressing, for he had now come into a salubrious climate where the Northerner sometimes finds even February too warm for comfort.

But George did not feel uncomfortable yet. The first suggestion of too much heat for comfort in winter clothing was at Yuma, Ariz., that interesting town that lies below sea level, and whose houses have double roofs to protect the inhabitants from the tropical sun which comes down so fiercely during nine months of the year. There he found a June day in winter, bright sun and soft, warm sands stretching all around. At Yuma the train crossed the Colorado River, that uncontrollable stream which has broken through its banks and is filling up the great Salton Desert basin, making of it a sea.

George left the train at Yuma and walked about the station, buying a string of beads from a Yuma Indian squaw, who, with a number of her tribe, was squatted on a blanket in front of the railway station offering her wares for sale.

In 10 minutes George was again on the train going westward through the Yuma Desert. As they sped along through sand and sand George became deeply impressed with the mystery and silence of the desert, and longed to go about in it. In the distance, both to the right and the left, were dim mountains, at times almost lost in the purple haze that denoted great distance. On top these mountains gleamed snow in the tropical sunshine, a problem George could not solve. "Why," he asked himself, "if the mountain tops are nearer to the burning sun than are the valleys, do they keep so cold?" But the question remained unanswered.

As they pushed on into the desert the heat became much greater. It made George think of an August day during a dronth in his own state. Then he fell to thinking how it was that very moment at his home. Doubtless a blizzard was in progress, snow blowing and piling everywhere in great drifts, while here was he, less than 2,000 miles from home, riding under a tropical sun through great wastes of sand and endless sand.

It was evening when George reached the little town where his uncle met him at the station. But his journey was not yet ended. He stayed with his uncle at a hotel that night, and early in the morning they set out for a 10-mile drive over dry, sandy roads. His uncle had a fruit ranch right on the edge of a desert, his orchards being fed by means of irrigation.

During the pleasant ride George expressed his wish to go into the desert to make some geological study. He was deeply interested in that science and wished very much to take advantage of this visit to the West to further his knowledge.

"I'll tell you what you may do," said his uncle, who was fond of his bright young nephew. "You may take a mule tomorrow and ride over beyond that low range of mountains. It's a good day's journey to go and return. You'll have to start before breakfast and eat a snack as you travel. Pathfinders never wait on meals, you know." And the indulgent uncle laughed merrily. "We'll make a regular Westerner of you before we let you return to civilization again."

"Nothing would suit me better," declared George. "Is the desert just beyond those mountains, uncle?"

"One desert is, yes," answered his uncle. "Truth is, there are so many deserts in this part of California that one is lost for names for them. The geological name for that desert is to be seen on some of the maps, but most of them ignore its existence since it belongs to a chain of greater ones. But it is about as treacherous a one as a man can lose his way in. And I'll advise you to follow my instructions to the letter or—you might never show up to have another meal with us."

"I'll follow your advice, then," laughed George. "I'm too fond of living to take great chances of losing my life. Aunt Mary may put my name in the pot for supper, for I'll not remain out all night. I like sleeping in a bed."

The next morning George was up before the sun and out with his uncle at the corral helping to feed the cattle and horses. Then Old Trusty, a mule used to the mountain road, was saddled for George to make his start to the desert. As he passed the kitchen door the Japanese cook was waiting for him. He held a small canvas bag tied with a cord so looped that it could be hung over the pommel of the saddle. This bag contained a goodly supply of food and drink.

Waving a farewell to his uncle and the cook—the other members of the family were not up yet—George struck off at a jog-trot toward the nearby mountains that walled the desert from view. After riding for half an hour he decided it was breakfast time, and untying the bag took out two thick slices of bread and butter and a liberal piece of cold beef. In the bag was a gallon-jug of water, from which George refreshed himself after his meal. "Not quite so full of flavor as coffee, but more wholesome," he said to himself as he corked the jug and dropped it again into the bag.

He had had full instructions from his uncle as to the route he was to follow. There was a wagon road all the way to the valley, that lay like a dried-up lake between two low mountain ranges, a valley that, from heat and lack of moisture, was a desert about 10 miles long and seven to eight wide. Old Trusty knew the trail and went ambling along through the pass between two walls of mountains, a pass that was full of vegetable life and picturesque rocks. Enough melted snow found its way into this little canyon to bring into life the vegetation that grew there. George dismounted and gathered some of the leaves from a palm tree still in its infancy. He also examined some of the rock formations and the soil. Then, getting into the saddle again, he went on towards the "mystery," as he called the desert. The sun shone from straight above his head when he entered the edge of the waste of sand to the east of the mountains. Drawing old Trusty to a halt, George sat breathless, looking about him. Within that area called the desert not one sign of life of any kind was visible. Sand, reflecting the heat—such heat as George had never before felt—was spread like a death pall over every inch of the ground that lay in that little secluded valley. One time it had been a small sea; centuries of heat had dried it up.

George's uncle had warned him against finding it almost impossible to walk in such a storm.

Then it was that a terrible fear seized George. He could not see any distance ahead of him and could open his eyes only for an instant at a time. He felt that they had turned in the wrong direction, but he thought it wiser to allow Old Trusty to take his way according to his animal instinct.

The heat was that of a furnace and George had frequent recourse to his jug of water. He had drunk about half of it when he decided that it was extremely cruel for him to take it all and not so much as dampen the burning nostrils of the patient old mule. Drawing in the rein he sprang to the ground, poured the remaining contents of the jug into his hat and put it under Old Trusty's nose. The suffering animal took the draught at one gulp, and opened his bloodshot eyes long enough to look his thanks to George.

After a long time—seeming much longer

He sat down in the shade of the mule and proceeded to eat.

advancing more than a quarter of a mile into the desert waste. But the trouble that followed was not due to George's disobedience to his uncle, but to the fact that there was no way of measuring distance on that flat, gleaming surface. George rode on and on into the trackless sand, leaving no tracks behind him. What he supposed to be about a quarter of a mile was, in fact, over a mile. Having gone that distance, he drew old Trusty's rein and dismounted. The mule was glad of the rest and stood with bowed head, sleeping. Being very warm and thirsty, George decided to refresh himself with some food and water. He sat down in the shade of the mule and proceeded to eat. Old Trusty did not seem to mind the heat or absence of water. George's uncle had said that he was like a camel—could go an indefinite time without water. He had been known to go two days without a drop and had suffered no bad results from it, either.

As George was preparing to mount again there came a sudden breeze across the desert. Then George saw a regular sandstorm in progress just across the valley. It was thickening and spreading rapidly—coming his way. He sprang into the saddle and gave old Trusty the reins, for his uncle had warned him of these desert squalls, as he termed the sandstorms.

But hardly had he got into the saddle when the wind—full of sand—was about him, making it impossible for him to hold his eyes open. It cut his face and neck and blinded old Trusty, who stopped, head down.

"On, on, Old Trusty," urged George, kicking the mule's sides. So, without opening his eyes Old Trusty went on, advancing more than a quarter of a mile to George than it really was—Old Trusty stumbled over some rocks and dead tree branches. Hope shot thru George's heart. He sprang from Old Trusty's back and examined the ground. Yes, they were at the edge of the desert. And now he could see ahead of him. The mountains rose close by. And there—directly in their path—was the road leading into the canyon thru which they had come at noonday.

"Dear Old Trusty!" said George, embracing the mule with a feeling of intense joy. "You, dear old fellow, brought me safe from the desert. I would have gone in an opposite direction had I followed my own ideas of the compass. But we'll not tarry here to congratulate ourselves. No telling what this mystery might take a notion to do. We will get on the other side of the mountain—it's healthier for us."

At the end of two hours George and Old Trusty emerged from the canyon, faces homeward set. In the distance they could see a tiny speck on the great level land, the ranch house of George's uncle. The sun was setting in their faces, and George, thirsty, hungry, exhausted from the heat and blowing sand, smiled wearily, but gladly:

"No more of the desert for me, Old Trusty. I don't know how you feel about it, but I guess you've no love for such an inferno. Come, can you limber up your legs a bit livelier and get us home in time for supper? I feel that I could drink a barrel of cold water and lie in a tub full of it all night. As for you, Trusty, I'm afraid you'll drink the well dry."

And Old Trusty said never a word in reply, but quickened his gait as if understanding the wishes of his young master.

FIND THE CHINAMAN.

Poor, poor washee-man,
Called Tank Ki,
From his laundry-house
Was doomed to fly.

White men are after
The yellow Chin-ee;
Clubbing very hard
Each one that they see.

LISA'S REWARD.

BY MAUD WALKER.

Lisa couldn't remember when she was taken to live with old Madame Blanchard. Sometimes in her dreams she beheld a sweet-faced woman, whose eyes were blue and tender. Lisa felt quite sure it was her mother, who had died when she was a baby. But what little she knew of that dear mother was learned from a little girl who lived in the same big, dirty tenement-house with her. This little girl, Pearl Anderson, was the child of a Swede tailor, who, with his wife, did piecework for a great wholesale clothing house. The Andersons lived across the hall from old Madame Blanchard, and Pearl often whispered the fact to Lisa that "her papa and mamma did not like the madame, saying she was not honest."

As the Blanchards and the Andersons had lived for five years in this tenement, the families had good opportunity to know a great deal about each other's affairs. Little Pearl often told Lisa during their stolen minutes of play in the dark hall that she had heard her mamma tell of one night long ago, when old Madame Blanchard had come in with a two-year-old baby girl, saying it was her dead son's orphan, and that she was going to raise it. Pearl would also confide to Lisa that her mamma said the baby was not a Blanchard, but a fair little thing with golden hair, very unlike the old hag who posed as her grandmother. And Pearl would then say: "An' you're the same little baby girl, Lisa. The bad ole woman is not your grandma at all. She's a wicked woman."

Lisa believed every word that Pearl told her, for the Andersons, though woefully poor, were good, industrious and honest folk, doing what they could to educate and rear their little daughter Pearl in the right way. Besides this proof of the story, old Madame Blanchard's cruel treatment of Lisa made the child feel that there was no blood link between them. How could an own grandmother treat her so?

Lisa was a veritable little beast of burden, carrying coal in a bucket up two flights of stairs and the ashes it made, down in the same way. She washed the dishes and helped to prepare the meals for the old woman, besides waiting on her at all hours of the night if she should be called from her pallet bed in the corner to do so.

But now, in her seventh year, her grandmother had begun a certain course with her which made the child recoil in horror. Each evening she was taken by the old woman to one of the busiest streets of the city and told to beg in pleading and tearful voice for money of the pedestrians. At first Lisa, ashamed to play the beggar, held back, and the old woman, catching her arm, pinched it till the child cried out with pain. "Beg of that fine gentleman that's coming—the tall one, with the shiner on his head," the old hag whispered hoarsely, pushing Lisa forward.

"Please, sir, give me a penny to buy some bread," said Lisa, in a pitiful little voice, full of coming tears, while her face was covered with a blush of shame. The "fine gentleman" paused, looked the child over and took a coin from his pocket, which he dropped into the cold little palm extended to receive it.

The instant the gentleman had passed on with the crowd old Madame Blanchard came from the dark doorway where she had hidden herself and jerked the money from the child's hand. "A quarter," she said, gloatingly, slipping the coin into her pocket. "Ah, it takes me to spot the givers and you to get it, my pretty little daughter. Now, there comes a gay young couple. Quick!—the man! See, them that's laughing and the girl with the white furs on? Quick!" And again Madame Blanchard drew within the shadow of the doorway, pushing Lisa forward.

"Please, sir, give me a penny——"

But the young couple did not hear the plaintive child's voice at their elbow nor see the pitiful face that looked up at them. Before Lisa's request for alms was finished they had passed on with the crowd, laughing and gay, knowing nothing but their own happiness.

"You little limp!" cried Madame Blanchard, jerking Lisa by the shoulder. "Why didn't you run along beside them and pluck at the lady's skirt? You lazy, worthless thing!"

The next and the next nights were the same. As soon as it was dark out went Madame Blanchard and her poor, suffering little slave-child to beg. During the days the old woman lay about her room eating, drinking and sleeping, while Lisa did what work there was to do. Once the old woman had called Lisa to her knees and in a threatening voice had warned her to keep secrecy. "If I find that you have breathed a single word to anyone of how we live or where we go in the evenings I'll beat you till you drop helpless in your tracks and shut you in the cellar with the rats for company. Do you mind?"

And so poor little Lisa had been afraid to say a word of her most unhappy life to Pearl or Pearl's kind-hearted parents, who sometimes invited Lisa in to have a bit of tea with them when old Madame Blanchard was away for an hour or so.

One evening old Madame Blanchard was ill, and as it was raining she decided to send Lisa out to beg alone, cautioning her to be careful in selecting her prey. "Choose only them as is dressed well and seems happy," she said. "Now go, and beg till you've got a dollar. Don't you dare to come home with less. The more you get the better you will sleep tonight and eat tomorrow. Do you mind?"

Lisa went to the corner where she usually stood, for nearby was a dark and deep doorway, where old Madame Blanchard could secrete herself as Lisa begged. As the rain was coming down steadily and Lisa was thinly clad, with only an old cape about her head and shoulders, she shivered with the cold and dampness. Few people except the poor laboring class were on the street tonight and vainly did Lisa extend her trembling hand for alms. A few took pity on the woe-begone little creature and now and then a penny was dropped into her outstretched palm. But when a great clock near the corner struck nine, Lisa, cold and exhausted, counted her money and found she had just 10 cents. Ninety cents to get yet! Lisa shuddered, for she knew it would be impossible to beg that much on a night like this. Indeed, it was very seldom that she got more than 50 cents of an evening, and rarely so much as a dollar. What should she do? She was cold, hungry and sick. The people on the street were getting fewer and fewer, all going to their homes as fast as they could. Pretty soon she would be alone except for the big policeman—whom she was taught to hide from by running round the corner—and an occasional pedestrian. If she went home without the sum required by old Madame Blanchard she would be beaten unmercifully. Then there was the cold cellar, where the tenants kept their coal and old rags, a cellar overrun with rats. In there she would have to go, too, if she failed to take home a dollar.

Sobs shook Lisa's poor, shivering little frame as she crept into the doorway to get shelter from the downpour. She was too young to know what to do. Running away from old Madame Blanchard had never occurred to her. She obeyed the old hag, who passed as her grandmother to the letter.

Once seated in the deepest and darkest corner of the doorway, Lisa closed her eyes from weariness. Frequent coughing fits overcame her, and she smothered the sound with her hands for fear the policeman, coming on his beat, might hear her and "run her in," as old Madame Blanchard had always told her he would do in the event of his catching her begging.

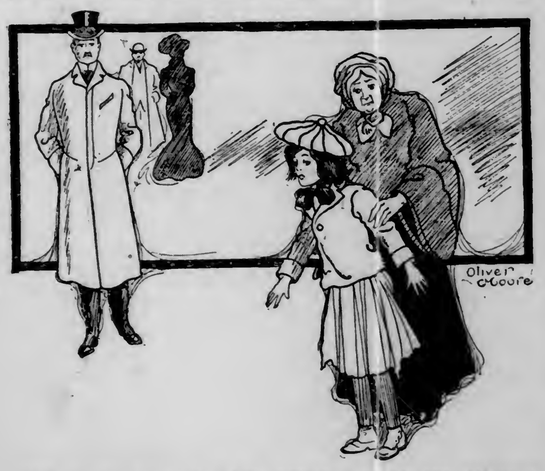
After a little while she felt more comfortable, huddled there in the corner, which began to feel warm. Her fits of coughing ceased and she felt quite happy. As she was smiling to herself, having forgotten old Madame Blanchard, she was conscious of someone near her. Looking up she beheld a beautiful woman with a sweet face full of tenderest love bending over her. Then warm arms embraced her and she found her golden head pillowed on a warm breast. Looking into the beautiful woman's eyes her heart fluttered, for they were the gentle blue eyes she always saw whenever she dreamed of her mother.

"Are you my mother?" Lisa whispered.

"Yes, dear," came the loving answer. "I've come to take you away from that wicked old woman to a beautiful home, where we shall forever be together, you and I. Now, my little one, rest on my breast and sleep, sleep, for we shall soon start on our journey. When you awake you will be at home, where all is happiness. Rest, my baby, rest."

The mother voice was whispered soft and soothingly in Lisa's ears. With her own little arms, blue with the bruises from old Madame Blanchard's beatings, around the dear mother's neck, her cheek nestled against the dear mother's breast, Lisa fell asleep.

When she awoke it was in Paradise. The slave-child of old Madame Blanchard was freed at last. She had come into her reward.



"Beg of that gentleman that's coming," the old hag whispered

ABRAHAM LINCOLN'S WAY.

The following story is told by one who ought to know about its authenticity, and who vouches for its truth:

"President Lincoln once wrote to General McClellan, when the latter was in command of the army. General McClellan, as is well known, conducted a waiting campaign, being so careful not to make any mistakes that he made very little headway. President Lincoln sent this brief but exceedingly pertinent note:

"'My Dear McClellan: If you don't want to use the army I should like to borrow it for a while. Yours respectfully, A. LINCOLN.'"

A RIDDLE.

Riddle come riddle, come ree:
What is it that is covered with eyes,
But which can never see?
(A street full of people.)

QUEENS OF ENGLAND

Jane Seymore, third wife of Henry VIII., has left in history a name covered with infamy. Openly she coquetted and flirted with the faithless Henry in the very eyes of her royal mistress, Anne Boleyn, defying her at her own court and causing a shameful scandal. In fact, she played the same role in the king's household that Anne herself had played when she schemed so dishonestly to usurp the good Queen Katherine of Arragon in the king's favors and on the throne. So that while we condemn Jane for her disloyalty to her queen and disloyalty to her own womanhood, we cannot find it within us to feel very deep sympathy for Anne, who had resorted to the most shameful means to become Henry's second wife. It seems that Anne's punishment was shaped out by her own hands, in that she set the example which Jane all too soon followed.

JANE SEYMOUR.

As she had sown, so did she resp.

The "fascinating and discreet Jane," as many biographers call her, knew Henry's selfishness and weaknesses, and did not hesitate to come between him and his wife. She knew that once Henry should become tired of a wife he would find the means of ridding himself and England's throne of her. So the wily Jane plotted to have some accusation brought against Anne which would free Henry of her. Divorce, death, even, was contemplated with deliberation.

But Henry did not need urging. Indeed, once he became enamored of Jane, he could not rest till he had made her his queen. All too readily did he listen to the scandalous lies Anne's numerous enemies whispered in his ear. The more terrible the accusation the easier would be the task of getting rid of the helpless accused.

Within 24 hours after the execution of Anne Boleyn the monster Henry was wedded to the shameless Jane Seymore. As some historians have said: "While Anne was making her last speech on the scaffold Jane was preparing for the evening's celebration of her marriage to the king. While the blade descended which severed Anne's small head from her slender body, the wedding feast was in preparation, at which Henry would preside with his third bride."

The bell in the tower tolled the news to Henry that he was free of Anne, and with happy gayety he cried to his grooms: "Let loose the hounds! To the chase! To the chase!" And with a number of his courtiers he rode at breakneck speed toward the castle in the country where Jane was preparing for and awaiting him.

Of the early life of Jane Seymore little is known. She is supposed to have accompanied Mary Tudor to France at the time of the latter's marriage with the French king. Like Anne Boleyn, she must have been a maid of honor at the French court for some years. But obscurity involves her life till Henry's fancy for her became noticeable.

She died at the birth of her son, who succeeded Henry VIII. to the throne or England as Edward VI. It is said of Jane that during the short period of her queenhood she lived in constant peril lest Anne's cruel fate overtake her. She was most obedient to Henry; humbled herself before his powerful friends lest they take offense at her dignity, and flattered and fawned through fear.

Perhaps there were times when Anne's face came to accuse her, or the blade that cut through her predecessor's little neck glistened before her haunted eyes. At any rate, her life was short and full of anticipated danger after she became Henry's queen.

MARY GRAHAM.

NONSENSE RHYME.

Once there was a little boylet
Who had got a brand new toylet.
But it was so mean and poor
Boylet threw it on the floor,
Saying, "You I will destroylet!"

M. W.

Polly *and* Tom.

Polly eight and Tommy ten,
Sister and brother, they
Go to school the whole week through,
Excepting Saturday.

On Saturday they help mamma
About the house, you know.
Tommy sweeps the steps and walks,
While Polly kneads the dough.

But soon as it is afternoon
And the dinner work is done
They go to visit some young friends
And have the mostest fun!

They play and play till almost dark,
Then home they go to tea,
With toys in their little arms
As happy as can be.

DULUTH EVENING HERALD.

16 PAGES

TWENTY-FOURTH YEAR. SPECIAL MAIL EDITION FOR: THURSDAY MORNING, MARCH 7, 1907. (ON TRAINS, FIVE CENTS.) TWO CENTS.

MINNESOTA HISTORICAL SOCIETY

COMMITTEE FROM HOUSE WILL COME TO DULUTH TO MEET STEEL EXPERTS

To Be Accompanied by Two Twin City Steel Men.

Final Obsequies on the Case Recount Bill Performed.

Senate Substitutes Its Provisions for House Fare Bill.

(From a Staff Correspondent.)

St. Paul, March 6.—(Special to The Herald.)—A committee from the Minnesota house of representatives, headed by Speaker Johnson, and accompanied by two Twin City steel manufacturers, will be in Duluth tomorrow to attend the meeting with the experts sent out by the United States Steel corporation to pass upon the establishment of a plant in Duluth for the manufacture of steel. Clarence B. Miller of Duluth this morning offered a resolution providing for such a committee from the house, and explained it briefly. The house adopted the resolution unanimously, and at the suggestion of the speaker, on motion of Representative Rachle, it was also provided that two Twin City steel makers should accompany the committee. The committee will consist of Representativees A. J. Rockne of Zumbrota, R. J. Wells of Breckenridge, Burdette Thayer of Spring Valley, and Swan Nelson of Minneapolis, besides the speaker. The Minneapolis manufacturer will be George M. Gillette and the St. Paul manufacturer has not yet been selected.

* * *

The final obsequies of the Case recount bill took place this morning, in order that the house might have a chance to vote on it, Representative Joseph Austin of Chisholm prepared a minority report of the election committee, signed by himself and Representative Brady, recommending it pass. The majority report was for indefinite postponement, and after W. L. Case of Cloquet had made an earnest plea for the bill, the house killed it.

* * *

The senate railroad committee this morning reported out for passage the house 2-cent fare bill, with an amendment. The amendment consisted of

NICHOLAS MURRAY BUTLER, President of Columbia University, Who Was Married in New York Tuesday Night, to Miss Kate LaMontagne.

CASE BILL IS KILLED

House Committee Opposed to Recount on Tax Amendments.

Hearing on County Option Measure Draws a Large Crowd.

(From a Staff Correspondent.)

St. Paul, March 6.—(Special to The Herald.)—The Case bill, providing for a recount of the vote on the amendments to the constitution, had just one lone friend in Ambrose Tighe's committee on taxes and tax laws yesterday afternoon.

The bill was killed, as had been expected, and there is no doubt that the house will adopt the report of the committee recommending that the measure be indefinitely postponed.

When the bill was taken up, Representative Wright of Minneapolis moved that it be indefinitely postponed.

Representative Opsahl of Bemidji seconded the motion.

Representative T. J. Brady of St. Paul moved as a substitute that the bill be recommended to pass. His motion did not receive a second, and Mr. Wright's motion went through. This settles all prospect of a recount of the

(Continued on page 11, fourth column.)

ONE KILLED AND ONE INJURED

By Blast at Gravel Pit Between Cloquet and Carlton.

Cloquet, Minn., March 6.—(Special to The Herald.)—At a gravel pit between Cloquet and Carlton on the Great Northern railroad, Charles Swenson was killed and Hans Peterson had a leg broken. They were blasting, and after loading a hole they went up too soon and were caught over the charge when it went off. No one seems to know Swenson, and most probably he will be buried by the county.

John Johnson, a Finlander, was found lying alongside the Great Northern tracks at Bravador by Pat Cavanaugh on Monday morning. He became drunk Sunday and laid out all night. He was brought to Cloquet and placed in the Cloquet hospital where it was found that his back was frozen. It is believed that his chances of recovery are good.

FOOTBALL IS "FIERCE"

And Not Suitable for Gentlemen to Play, Says President Eliot.

Boston, March 6.—President C. W. Eliot of Harvard university, in his annual report which will be presented to the board of overseers this week, maintains that football, despite new rules, remains an undesirable game for gentlemen to play or multitudes of people to witness. President Eliot declares that football is properly described by the adjective "fierce," and that no game in which theer is recklessness in causing or receiving bodily injuries is fit for college use. Bastketball and hockey are placed in the same class with football and President Eliot advises that intercollegiate contests in any one sport be limited to two games, all other games to be between teams made up at Harvard. He also decries the "excesses of cheering," which characterize present intercollegiate contests, as "absolutely unnatural."

NEW POSTMASTER.

Washington, March 6.—(Special to The Herald.)— Anna Mische has been appointed postmaster at Buckman, Morrison county, Minn., vice Joseph Schmolke, removed.

LUMBERMEN ARE IN ACCORD

With the President's Policy Respecting Forest Reserves.

Washington, March 6. — President Roosevelt was today assured that the lumbering interests of the West were in perfect accord with his policy respecting forest reserves and the handling of the public domain. This assurance was given by Victor Beckman, president of the Pacific Coast Lumbermen's association; K. L. DeFebaugu, editor of the American Lumberman of Chicago and F. B. Hubbard, a prominent lumber manufacturer of Centralia, Wash. They called on the president with Senators Ankney and Piles and Commissioner Ballinger of the general land office. President Roosevelt assured the delegation that his sole interest was that the people of the Rocky mountain and Pacific coast states be looked after in the handling of the public domain.

THE EDDY SUIT.

No Attempt Made to Secure Service on the Defendants.

Concord, N. H., March 6.—No attempt will be made today to secure service upon the defendants in the suit brought by "next friends" for an accounting of the property of Mrs. Mary Baker G. Eddy, the founder of the Christian Science faith. Nathaniel F. Martin, one of the counsel for the plaintiffs, went to Boston again today for a conference with William E. Chandler and other attorneys, and before leaving he said that service would not be made today.

WILL PREVENT THE JAPS FROM POACHING.

St. Petersburg, March 6.—In order to prevent the Japanese from poaching on the sparsely guarded Siberian Littoral during the fishing season, commencing in April, Russia has decided to send to the Pacific two small cruisers which are now in the Black sea. They will pass through the Dardenelles with their guns mounted under a private agreement with Turkey.

The treaty negotiations between Russia and Japan are still hanging fire.

NO WORD OF RUEF.

San Francisco, March 6.—No word had been received this morning as to the whereabouts of Abraham Ruef. Mayor Schmitz, indicted jointly with Ruef for extortion, will arrive in this city from the East some time before noon.

JEROME FINISHES THE CROSS-EXAMINATION OF ALIENIST, DR. WAGNER

WILL KNOW FATE SOON

Strother Brothers' Case Nearly Ready for the Jury.

Not Thought They Will Take Long to Decide Matter.

Culpepper, Va., March 6.—By late today the Strother brothers, James A. and Philip, charged with the murder of William F. Bywaters, their brother-in-law, will probably know their fate. It is not thought that the jury will be long reaching a verdict.

Attorney R. Walton Moore of Fairfax will address the jury in behalf of the defense. He will present the legal phases of the case necessary to support the plea of mental derangement at the time of the shooting, contending that the Strother brothers acted on a sudden, uncontrollable impulse, impelled by a sense of wrongs to their sister, Mrs. Viola Bywaters. John L. Lee will follow with the additional plea of justification as contained in the "unwritten law."

In the afternoon Capt. Micajah Woods will strike the final blow for the prosecution, with a legal argument intended to combat Attorney Moore's reasoning. Although Judge Harrison has placed no restrictions on the time consumed by the counsel, it is not thought that the three speeches will occupy more than six hours.

The two defendants still retain the remarkable composure that has characterized their attitude since their arrest, nearly three months ago. Philip, the younger, whose sudden illness yesterday threatened for a time to bring the trial to an abrupt halt, was considerably improved this morning, and no delay on this score is likely.

A PHILADELPHIA FIRE DOES $100,000 DAMAGE.

Philadelphia, March 6.—Fire which started in a six-story building in Filbert street today, caused damages of $500,000. Five firemen were severely injured by the collapse of a fire escape, on which they were standing fighting the flames. The concerns which suffered most are Stern & Co., manufacturers of shirt waists; the Standard Sewing Machine company, Supplee-Reeve-Whiting company, umbrella manufacturers, and Belknap, Johnson & Powell, umbrella manufacturers.

Final Questioning Takes Up the Theory of Intoxication.

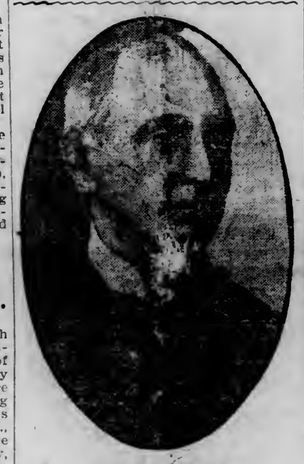
Witness Says There Was No Indication of Inebriety.

Mrs. William Thaw, Mother of Defendant, Next Witness.

New York, March 6.—The way was cleared this morning for taking the testimony of Mrs. William Thaw, at the trial of her son, Harry K. Thaw, for the murder of Stanford White. District Attorney Jerome concluded his long cross-examination of Dr. Charles G. Wagner of Binghamton, N. Y., one of the alienists for the defense, and after a few questions on redirect and recross-examination, the expert was finally excused, just before the luncheon recess was ordered. Thaw's counsel then stated that the defendant's mother would be called at the afternoon session.

Mr. Jerome today took a new tack in his cross-examination of Dr. Wagner, and asked if, in the acts sur-

(Continued on page 7, fourth column.)



WILL J. DAVIS, Former Manager of the Iroquois Theater, on Trial for Manslaughter.

FRENZIED CLERK STARTS OUT TO KILL THREE YOUNG WOMEN AND THEN HIMSELF

FRED ARGYLE.

BESSIE BUTCHART.

He Succeeds in Seriously Wounding Miss Bessie Butchart.

Turns Pistol on Wife at Short Range But Misses Her.

Fred Argyle, Would-be Murderer, Captured by the Police.

Fred M. Argyle last evening made a frenzied attempt to murder his wife and Miss Bessie Butchart as they were going to the Butchart home at 17 Fifty-eighth avenue east, and succeeded in putting a bullet into Miss Butchart's head, through the left temple, which severed the optic nerve and will render her left eye blind for life. Miss Butchart is lying in a critical condition at her home, but is not thought to be fatally injured.

Some of the most amazing circumstances surround the case. Argyle from his own confession deliberately planned the murder of his wife, her sister, and Miss Butchart, and this triple murder was to be followed by his own suicide.

Argyle was arrested this morning at his home in Flat 13, Twelfth avenue west, located in what is known as the Glen.

Dodged the Police.

Following the shooting he made straight for a car, and in spite of a rigorous search by the police of every westbound car, got through to his home, owing to the fact that he was not known to the officers. He says he was on a car when two officers searched it and managed to look unconcerned enough to escape notice.

The police went at once to his home and, finding the door locked, and feeling reasonably sure that he had not passed the station on a car, supposed he had not returned home yet and waited outside for the murderer's arrival. He was in the house all the time, but three officers waited patiently in the cold all night for him to get home after the long walk which they supposed he had taken from Fifty-eighth avenue.

When the squads changed this morning and Capt. Resche learned that no search of the house had been made, he ordered a search of the house, and, after gaining entrance through a window, Sargeant Gillon found the man, who, offered no resistance.

It was at first thought that Argyle's efforts were directed solely against his wife, but the letter addressed to Coroner McCuen convicts him of more

(Continued on page 7, third column.)

KILLED HIS CLOSE FRIEND

Because He Unexpectedly Found Him With His Wife.

Indianapolis, Ind., March 8.—Mrs. Fred Schwomeyer and William Gill, died today from bullet wounds inflicted by the woman's husband, who returned unexpectedly to his home at Ben Davis yesterday and found the two together. The two men have been close friends for years. Schwomeyer had started for Indianapolis, but missed his train and returned home. Looking through a window, he found his wife and Gill together. Thrusting his arm through the glass he began firing. Gill was shot five times and the woman once. They fled across fields to the homes of neighbors. Schwomeyer was found by officers pacing back and forth in front of his empty home, with a loaded shotgun, awaiting as he said, the possible return of Gill.

STREET CARS COLLIDE; TWO SERIOUSLY HURT.

Louisville, Ky., March 6.—Ten persons were injured, two of them seriously, in a collision between street cars at Shelby and Chestnut streets this morning. The seriously injured are: John W. Pfiffer and Henry Gukes.

The Shelby street car struck the Chestnut car squarely in the center breaking it almost in two.

SURPLUS IS ENORMOUS

Stockholders of Prudential Life Have Piled Up Millions.

Report of the Investigating Committee of New Jersey.

Trenton, N. J., March 6.—Many important recommendations for the regulation of life insurance companies in New Jersey are included in the report of the select committee of the senate, appointed last year to investigate the subject of life insurance in the state, which was made public today. In its recommendations the committee has drawn freely from the report of the committee of fifteen which was submitted at the conference on uniform insurance legislation last December. The committee of fifteen was appointed at a conference of governors, attorney generals, and insurance commissioners at Chicago, Feb. 1, 1906.

By far the greater part of the report is devoted to the Prudential Insurance Company of America, the largest of the four companies under investigation. Principal among the recommendation is one that a bill be enacted limiting the amount of capital stock which any life insurance company which may have to $2,000,000, and the dividends which may be added thereon from future earnings, so long as the company continues to conduct the participating life insurance business, to 10 per cent upon the stock; and providing that upon the dissolution of the company the stockholders of the company shall

(Continued on page 9, third column.)

CUBAN LABORERS REFUSE TO WORK

On Last Days of Week Unless There is Cock Fighting.

Washington, March 6.—One of the questions that probably will confront Secretary Taft upon his arrival in Cuba in the course of a few weeks, will be the propriety and policy of abrogating Governor General Wood's decree forbidding cock fighting in Cuba. An overwhelming majority of the Cubans themselves demand the right to fight their chickens as they have done for many years, even since the application of the Wood decree, though the sport has been necessarily conducted clandestinely. It was the arrest of a number of prominent Cubans, including at least one presidential candidate, for attending a cock fight, that brought on the crisis, and caused Governor Magoon to promise that he would consider the petitions that were presented urging the abrogation of the decree. Nearly all of the planters favor cock fighting for a novel occasion, according to those who have recently been in Cuba.

When the sport flourished, the Cuban laborers worked four days a week to support his family. Another's day's wage he set apart for the lottery and the last of the secular days he worked in order that he might secure funds to back his favorite cock in the pit. Now that the lottery and cock fighting have been stopped, the laborers and farm hands simply stop work for the last two days of the week, having no incentive to continue. This practice is said to have a really injurious effect upon the development of the island industry and to have considerably curtailed production.

Probably Secretary Taft will adopt the experiment of permitting cock fighting outside of Havana and the larger Cuban cities, just as he did in the Philippines, to the satisfaction of natives and their employers.

TO SUPPLANT THE NEGROES

Imported White Labor Will be Used on Louisiana Plantations.

Baton Rouge, La., March 6.—A plan which contemplates supplanting negro plantation laborers of Louisiana with state imported white immigrants from Europe was announced today by Charles Schuler, state commissioner of immigration and agriculture. This plan is an outgrowth both of the immigration station authorized for New Orleans by congress this week, and of the fact that labor is scarce.

The state proposes to enable the Louisiana planter to engage immigrant labor in advance, and with a fixed wage, without violating the contract labor law. By July 15 next every planter desiring such labor is to deposit $150 for every family he wishes, this sum to be a guarantee that he will repay the state for its expense in bringing over the immigrants. A state employe will then engage in Europe the required number of immigrants, and the state will pay their way to this country.

GREAT IMPROVEMENT

In Return of Letters From Dead Letter Office to Senders.

Washington, March 6.—Under the method of handling undelivered mail matter inaugurated in January by Fourth Assistant General De Graw, the division of dead letters is returning all letters to senders when they can be identified. Heretofore a considerable portion of the returnable letters could not be returned, owing to lack of facilities, but the report of the dead letter division for February shows the return of a full 100 per cent of mail of this character. In all, 1,050,303 pieces of undelivered mail were received at the division in February 1907, as compared with 894,136 pieces in February of last year. In 6,212 of the letters opened, money to the amount of $5,946.58 was found.

DIES ON TRAIN.

Chicago, March 6.—Mrs. Mary Byrnes of St. Louis, who, in company with her husband, was on the way from her home to Milwaukee, died suddenly on a Chicago, Milwaukee & St. Paul train today.

ONE OF THE MAJORITY.

'Twas a glorious night and two lovers sat upon the cliffside with the eternal ocean flowing at their feet with a calmness and placidity that was almost appalling. They were looking at the stars above, and he turned to his girl and said, tenderly:

"My darling, I don't understand what you can see in me to love me so."

She replied: "That's what everybody says."

The silence was greater than ever.

TENANTS IN FIRE SCARE

Small Blaze Causes Excitement in First National Bank Building.

Young Man Loses Head and Deserts Lady in Distress.

Fire caused about $500 damage and gave the tenants of the First National Bank building a scare this morning.

One of the elevator operators discovered smoke issuing from E. C. Kennedy's office on the fifth floor about 8:30. He got out of the car to make investigation and when he opened the door from whence the smoke came, he was forced to beat a hasty retreat, so fierce were the flames which filled the room and shot into the hall through the open door.

The alarm was sounded and the tenants rushed to the stairways and the elevators, which were kept running right along. Most of the people were calm and there were no accidents.

Miss Louise M. Hicks was in her father's office on the sixth floor when the alarm came, and in the office was a young law student, whose name could not be learned. He is reported to have lost his head or his courage so that he escaped down the fire escape, telling the frightened Miss Hicks that he would come back for her later.

Miss Hicks was taken from the sixth floor in safety—but not by the law student. The flames from the Kennedy office shot into the hall so fiercely that escape seemed partly shut off from the sixth floor. The halls were filled with smoke.

The firemen extinguished the blaze in a short time and it was seen that the damage was slight.

An official of the First National bank who made an examination of the premises immediately after the fire, said he thought that the fire had started from a lighted cigar or pipe in a half burned coat which was found in the room where the fire was. The garment was said to have been laid on a table there a short tome before by Mr. Kenedy, who was on the sixth floor and not in his office when the fire started.

The walls and ceiling in Kennedy's office were badly scorched, and some law books burned somewhat.

CITY BRIEFS

Woman Sues County.

Mrs. Alice Pierce, whose claim of $253 against the county for gravel alleged to have been taken from her property in section 4-50-15 to repair roads, was disallowed by the county board, has instituted suit to recover that amount. Mrs. Pierce claims that 850 cubic yards of earth were removed from her property between Jan. 1, 1903, and Dec. 1, 1906. The county recently had the ground measured by its surveyor, and there is a dispute as to the amount of gravel taken from Mrs. Pierce's land. It is claimed by the county that most of the gravel was taken from the right-of-way.

Many at Funeral.

The funeral of Robert Emmanuel Swanstrom, the 10-year-old son of Mr. and Mrs. A. F. Swanstrom of 15 North Twenty-first avenue west, was held yesterday afternoon at the residence of his grandfather, E. G. Swanstrom, 2118 West First street. The Swanstrom home was crowded with relatives and many friends of the family and of the little fellow, who was very popular with his playmates. He was named after his grandfathers, Robert Stewart and E. G. Swanstrom. Typhoid fever was the cause of death. Rev. R. J. Mooney, rector of St. Luke's Episcopal church, was in charge of the funeral services, and the remains were laid to rest in the vault at Forest Hill cemetery. There were many beautiful floral offerings.

Buyer Leaves.

Mr. Kris left last night for the Eastern markets to purchase spring stocks for the Duluth Consignment company.

Company Flies Articles.

Articles of incorporation of the Western corporation have been filed with the register of deeds by M. F. Bates, R. R. Briggs and H. H. Langley. The company is capitalized at $50,000.

Injured by Fall.

J. D. O'Connor, who resides at Second avenue west and Second street, fell on the sidewalk this morning and broke both bones of one of his legs just above the ankle. The fracture is quite a serious one. The injured man wa staken to St. Mary's hospital.

PERSONALS

Mrs. A. C. Farrer has gone to Brainerd for two or three weeks.

Senator E. B. Hawkins has returned from a two months' trip to Mexico and California in company with O. D. Kinney. Mr. Kinney, who is now enjoying good health, went East to his home at Athens, Pa.

T. J. Griffith, buyer of the Freimuth rug and drapery department, returned yesterday from New York.

Mr. and Mrs. C. H. Miles of Iron River, Wis., are guests at the St. Louis.

Mrs. C. Hobbs of Iron River, Wis., is a guest at the St. Louis.

Mr. and Mrs. C. E. Bortle of Virginia, Minn., are guests at the Lenox.

J. R. Stewart of Blackduck, Minn., is at the Lenox.

Another illustration of exceptional value giving—Finely Tailored, strapped back and front and fit beautifully, of excellent quality black broadcloth and tan covert—value $16.50, at $12.50.

PLANS FOR RECEPTION

Of the Steel Plant Experts Have Been Completed.

Committees from Several Public Bodies Will Meet Them.

Committees from the Commercial club, the Duluth Real Estate exchange, the West Duluth Commercial club, and the Minnesota legislature, will be ready tomorrow to meet the committee of experts of the United States Steel corporation who will come to the city to investigate the feasibility of establishing a steel plant here.

The committee from the Real Estate exchange is composed of N. J. Upham, chairman; W. M. Prindle, Whitney Wall, Henry Nolte, J. D. Stryker and W. B. Silvey.

These gentlemen will be prepared to furnish any statistics regarding real estate that are desired, and will give the experts the assurance that the prices of real estate, required for the use of the plant will be kept just as low as it is possible for the realty dealers of the city to make them.

The delegation from the legislature will also be here, headed by Speaker Johnson. The committee will be composed of Representatives A. J. Rockne of Zumbrota, R. J. Wells of Breckenridge, Burdette Thayer of Spring Valley and Swan Nelson, of Minneapolis.

The committee from the Commercial club will be composed of ten or twelve of the most prominent members, and the West Duluth Commercial club will also have a committee on hand.

The experts will arrive on the Omaha train from Chicago, and during the afternoon they will probably be in consultation with the local heads of the steel corporation.

Friday morning at 8 o'clock they will take a little exploration trip to the Great Northern Power company's plant at Thomson. The party, which will also include a few prominent Duluth men, who have been invited to attend, will leave the Union depot in a special train at 8 a. m., and return when the visitors have seen all they desire to see.

RUMORS OF A HARRIMAN DEAL

Securing Reading Stock Causes Sharp Rise in That Security.

New York, March 6.—An unverified report that heavy holdings of Reading & New Jersey Central stock has passed under Harriman control, which gained wide circulation today, resulted in a sharp upward turn in Reading this afternoon. According to the report the big block of stock which changed hands represented the H. C. Frick interest in the two companies.

The story could not be verified, but despite this the quotations of Reading were marked steadily upward as the rumors spread, reaching 125 at 1:30 o'clock, a clear gain of nearly 11 points from the low point of the day. Other stocks, which had been moving feverishly during the day, nearly all of them with a pronounced downward tendency, began to follow Reading toward the top. In the next fifteen minutes Reading declined to 122.

Philadelphia, March 6.—At the office of the Philadelphia & Reading, in this city, it was stated that the officials had heard of the rumor, but knew nothing of the passage of the company to Harriman control.

SHIP MAY BE ABANDONED

Impossible to Pursue Salvage Operations on the Dakota.

Yokohama, March 6.—The position of the wreck of the Great Northern liner Dakota, which ran ashore March 3, off the Mojima lighthouse, forty miles from Yokohama, is reported to be unchanged today. It is only possible to approach her in open boats, which makes it useless to attempt salvage operations. A strong west wind is blowing and the vessel is exposed to both winds and waves, which apparently must soon result in her total abandonment.

The passengers of the Dakota today adopted a resolution thanking the Japanese a resolution thanking the their hospitality.

It was at first reported that the Dakota's passengers lost all their effects by the wreck of the vessel, but it now appears that they succeeded in saving some hand baggage. The crew of the wrecked steamer was paid off and discharged today at the office of the American consul here. The representatives of the underwriters of the Dakota made another trip today to the scene of the disaster, taking several divers with them, who confirmed the previous reports that salvage operations were impossible owing to the severity of the wind and the roughness of the sea. A number of sacks of mail have been washed ashore.

COPPERS IN A RELAPSE

But the Market Has a Rally at the Close.

Prices Go Off Rapidly During First Half of Session.

Copper stocks had a sinking spell today, but rallied somewhat at the close, which was about unchanged from yesterday. North Butte opened at $107, advanced to $108, declined to $102 and closed at $107 bid and $107.75 asked. Amalgamated opened at $106.50, advanced to $107.25, declined to $103 and closed at $107 bid.

Anaconda opened at $269, advanced to $270.87½, declined to $265 and closed at $269.87½ bid. Butte Coalition opened at $33.50, advanced to $33.75, sold off to $31.75, and closed at $32.12½ bid and $32.50 asked. Calumet & Arizona opened at $179, declined to $174.50 and closed at $176 bid and $179 asked.

Greene-Cananea sold at $19.37½, declined to $18 and closed at $18.50 bid and $18.75 asked. Greene Consolidated opened at $27.25 bid and $27.75 asked, sold at $27.75, advanced to $27.87½, declined to $27 and closed at $28 bid and $28.50 asked. Cananea Central sold at $31 and $31.50 and closed at $31 bid and $32 asked.

Superior & Pittsburg was traded in at $25.25 and closed at $25.50 asked. Denn-Arizona sold at $65 and closed at $63 bid and $65 asked. Denn mining stock sold at $17 and closed at $17 bid. Reports from the mine are to the effect that the top of the drift on the 1,100-foot level is in rich ore, for eighteen feet.

Globe Consolidated sold at $17 and closed at $17 bid. A strike has been reported at the National property. The stock was traded in today at $1.12½ and closed at $1.12½ bid and $1.25 asked. Warren sold at $14 and closed at $13.75 bid. Copper Queen of Idaho sold at $1.62½ and $1.50 and closed at $1.50 bid and $1.75 asked. Cliff sold at $4 and $3.87½ and closed at $3.75 bid and $4 asked.

Keweenaw was inactive and closed at $10.50 bid. Hancock at $12.50 bid. Carman at $5 asked. Calumet & Sonora at $90 asked and Calumet & Montana at $2 bid and $2.50 asked. Black Mountain was inactive and closed at $7 bid.

PILES CURED IN 6 TO 14 DAYS.
PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c

THE CALUMET AND SONORA

Mining Company Adds Another Valuable Copper Mine to Holdings.

J. W. Norton, manager of the Calumet & Sonora Mining company, has just returned from Cananea, Mexico. To a Herald reporter Mr. Norton said:

"While in Cananea, I bought and closed on the Ronquillo mine. This mine with the "Duluth," and "San Antonio," "Buena Vista," and "San Juan" mines and the new properties north of the Greene-Cananea concentrator will make the acreage owned by the Calumet & Sonora Mining company more than 900. The original property consists of 183½ acres, so, you see, we now own more than four times the ground we did six months ago.

"The Underhill shaft is looking fine; struck native copper in it at the 35-foot level. When I left, the shaft was at the 65-foot level and the native copper was running stronger than it did at the 35-foot level. Heavy machinery has been installed on the Underhill, as this is one of the main hoists, Norton shaft the other. When the 100-foot level shall have been reached in the Underhill, tunneling will be begun running under the mountain on the east and toward the iron blowouts and strong copper formations on the east side of the San Antonio mine, also two other drifts, one north under the body of native copper, and the other directly south under large iron blowouts and strong copper indications. Mr. Fay asked me to sink another shaft on this formation, but I have concluded that it would be better to drift.

"Drifting has gone on at the Norton shaft, both at the 100 and the 175-ft. levels. The work is going forward at both shafts in a very satisfactory manner. Nearly all the ore shown up on these properties has been high grade, some assaying as high as 64.33 per cent copper. While in Kansas City, on my way home, I bought heavy machinery for the Norton shaft, and the machinery now in commission on the Norton will be transferred to the Catalina, one of the group of claims north of the Greene-Cananea concentrator. An assay of about the average ore from the Catalina went 50.7 per cent lead and copper, besides 11 2-5 oz. silver. The ore on these properties being close to the surface, heavy machinery will not be required.

"I had quite a surprise on February 22nd when H. W. Coffin and W. C. Winton paid me a visit, and it gave me pleasure to show them our properties and the great holdings of Greene-Cananea Copper company.

"Calumet & Sonora Mining company's properties are showing up great. The railroad to Cole shaft No. 1, which will cross the San Antonio mine, is being rushed and, without doubt, will pass our properties by July 1st. As previously stated, Calumet & Sonora Mining company will be shipping ore by the first day of July next."

GAMBLER'S MAGAZINE.

Tuesday Magazine: Driven to desperation by their heavy losses, gamblers have often sought by some coup either to repair their shattered fortunes or to bring down utter ruin upon themselves. One of the most curious instances of this kind comes from England of the Eighteenth century. A notorious gambler had been losing steadily in a game for high stakes with Lord Lorne. Exasperated by his continued ill fortune, he suddenly sprang up from the card table, seized a large and costly punch bowl and, balancing it above his head, called out to his opponent:

"For once I'll have a bet where I have an equal chance of winning! Odd or even for 15,000 guineas!"

"Odd!" replied the peer placidly, and the gambler hurled the magnificent bowl against the wall.

When they counted the pieces Lord Lorne had won.

MRS. THAW A WITNESS

Mother of Young Murderer Called by the Defense.

Breaks Down While Narrating Change in Her Son.

New York, March 6.—Mrs. William Thaw was the first witness called after the luncheon recess in the Thaw trial.

Mrs. Thaw said she noticed a change in her son when he came to Pittsburg in 1903. He was absent-minded and apparently had lost interest in life. Mrs. Thaw broke down and cried while narrating the change in her son, following his trip to Europe with Evelyn in 1903.

Mrs. Thaw, after recovering from her first breakdown, seemed about to cry again and could not proceed. Justice Fitzgerald relieved the situation by ordering all of her testimony up to that time read to the jury. It had been given in a voice too low for the jury to hear. In explaining his changed condition to her, Mrs. Thaw said Harry told her "the wickedest man in New York had ruined his life."

She told of Harry's breaking down in church with her in Pittsburg, saying awful things had come over him and, if it had not happened, Evelyn might have been with them.

Mrs. Thaw said that in the fall and winter of 1903 she was living in Pittsburg. Her son Harry came home, she said on the 16th or 17th of November, a day or two before his brother Josiah's wedding.

"During the time your son Harry was at home, did you notice anything unnatural about his condition?" asked Mr. Delmas.

"I certainly did," replied Mrs. Thaw.

"Will you please describe what took place?"

"That day when he first came to the door, there was a look of absent-mindedness on his face, a despairing look, it struck me at the time.

"He seemed to have lost interest in everything; his room was next to mine and I could hear smothered sobs. Sometimes when I was awake late at night I would see light under his door and often found him sitting up a 3 or 4 o'clock in the morning.

"He told me he could not sleep and there was no use going to bed. I am not of a prying disposition, but I asked him to tell me what the matter was. He said it was impossible to tell me his story."

TOMMY'S COMPLAINT.

Father's got the fresh-air craze, and mother's got it too,
And I don't know if I can stand this bloomin' winter through;
We haven't a furnace fire, 'cause father says as where
A fire is unhealthy, so we warm with his hot air.
He gets up early ev'ry morn' an' thaws out both the cats,
And then goes up in our spare room an' does some acrobats;
The winders are left up all night, an' in the mornin', gash!
I have ter crack the ice up in the pitcher when I wash.
An' mother too, she's just as bad, she walks from two till four,
And then comes back an' pills at somethin' hangin' on the door.
And then she takes a big, long breath—it's one o' her best tricks—
And doesn't breathe till she has counted up ter ninety-six.
We live on malted shavin's and shredded door mats, too,
An' I can't use my appetite—it's just as good as new.
An' so I'm goin' to grandma's house, where I can sleep and stuff
Till mother gets her lungs filled up an' pa gets air ernuff.

—Puck.

OUT IN IOWA

They Had Coffee Drinkers.

An Iowa lady shows that Postum Food Coffee has proved a great promoter of health. She says:

"During nearly all of my life till a year ago I used coffee daily, without knowing it kept me thin and feeling bad. I was induced to quit coffee and try Postum. I liked it from the first, and found that I felt better than I did while I was using the old kind of coffee. So I continued to use it.

"After a few weeks I began to realize that I was growing plumper and was pleased to find the other day I had gained 15 pounds in the twelve months. Postum gives me a splendid appetite, in fact I can eat and digest my food perfectly now.

"My husband has, all his life, been troubled with 'bold-hives' and has been quite a sufferer from catarrh in the head. He also quit coffee, and began to use Postum Food Coffee about a year ago, with manifest good results. His catarrh has vanished and he has not had an attack of 'bold-hives' for six months. My friends, noting the change in both of us say, 'Why, how well you look! Do you really suppose it is Postum that has made the change?' and I reply, 'Most emphatically I do, for it is the only change we have made in our mode of living.'

"My sister who used to suffer greatly from biliousness quit coffee and began to drink Postum Food Coffee 2 years ago. She never has billous attacks any more. Like my husband, my father has found that his catarrh has disappeared since he gave up coffee and began the use of Postum Food Coffee. He has also gained decidedly in flesh." Name given by Postum Co., Battle Creek, Mich. "There's a reason." Read the little book, "The Road to Wellville," in pkgs.

TOO LATE TO CLASSIFY

Harper Method Shampooing and care of the Scalp and Hair, at Miss Horrigan's.

I HEREBY WISH TO EXTEND THE thanks of my family and myself to all the friends who have assisted us recently, and also to the German-American Insurance Company of New York, George A. Mowry, its state agent, and Lucien A. Barnes, its West Duluth agent, for the remarkably prompt settlement of my fire loss. My house was burned last Thursday, and I have today received a draft for $1,149.83.

JOSEPH GAUTHIER.

THE ELECTION OF A SENATOR

To Succeed Spooner is Advised at Once by the Governor.

Madison, Wis., March 6.—Governor Davidson today transmitted to the legislature the resignation of Senator Spooner. The governor suggested that the election of a successor to Mr. Spooner proceed at once, and not after the vacancy actually exists, May 1.

The assembly by a standing vote adopted a resolution of tribute to Senator Spooner. Four Social Democrats and eight Republicans refrained from voting.

In the senatorial situation no new prospective candidates have arrived on the scene. Stephenson, the millionaire lumberman, so far is the only avowed candidate, but supporters of Congressman Esch are ready to decide as soon as the intentions of Former Speaker Lenroot have been learned. Mr. Lenroot is on his way to Madison and, if he decides not to be a candidate, Esch will be launched. The sentiment for Congressman Cooper is also gaining ground. Politicians are arriving in increasing numbers to take a hand in the senatorial fight.

LONG-WINDED TEXAS GROUCH.

San Francisco Call: With one devastating sentence of nearly 300 words, Representative Sheppard of Texas drives the stand patters back to their infamous hole, and if they don't pull the hole in after them, it will be because the flow of words from Texas blocks the way, just like this:

Swollen with the spoils of office, corpulent with the wine of power, distended with the dropsy of corruption, the Republican party drags its huge, inflated body across the halls of state helpless among the trophies of the past, before the problems of the present and the retributions of the future, while its coward lips wail out, "stand pat," "stand pat," "stand pat," although the pillage of the people never ceases; "stand pat," although the wealth of the republic is by a ruthless tariff law transferred from the millions who support to the masters who exploit it; "stand pat," although the Republican party refuses to lighten the tariff taxes which it first composed as a temporary burden in the years of war to double as a permanent tyranny in the years of peace; "stand pat," although the tariff law itself provides for a reduction of its charges; "stand pat," although the enormous rates incite the antagonism of the world and imperil our foreign trade; "stand pat," although McKinley pleaded from the doorstep of the grave for lower tariffs; "stand pat," although patriotic Republicans of Massachusetts, Iowa and all the country unite in the general prayer for less oppressive schedules; "stand pat," although our loftiest people, the very soul of the republic, the principle in the name of which our country was consecrated in the blood and tears of patriots, has been abandoned in Republican policies abroad; "stand pat," although the currency situation is black with impendent danger; "stand pat," although the expenditures of the public moneys have become a riotous dissipation, a wanton waste.

You are not paying tribute to a trust when you buy Hunt's Perfect Baking Powder. It is on the shelf of every grocer.

CHEAP THANKSGIVING DINNER.

Yvette Guilbert, the famous French actress, praised at a dinner in New York the festival of Thanksgiving, says the Los Angeles Times.

"It is a pleasant festival," she said. "I am sorry that in France we have no such day of gratitude for the year's harvest. It is a great day with you. You have novels, tales, anecdotes and poems based upon it.

"An actor this morning told me a Thanksgiving anecdote. He said that a penniless young man entered a cheap restaurant one Thanksgiving day, and said:

"'What do you charge for a plate of turkey?'

"'A quarter, sir,' the waiter answered.

"'Any charge for bread?'

"'No, sir.'

"'Or for gravy?'

"'No.'

"Then bring me a large plate of bread and gravy.'"

You are an exceptional person if you have "nothing to sell;" and an eccentric person if you think to sell to good advantage without using Herald want ads.

New Tailored Suits

$25 Values $19.50

We have just received a new shipment of beautifully tailored Panama Eton Suits in broken checks and novelty mixtures, with silk vest, collar and cuffs, braid trimmed and full pleated skirts. Full $25 values, for tomorrow, $19.50.

New Black Panama Skirts

$8.50 Values $6

This is a special value for Thursday, and is the best skirt for the money we have ever offered. Of black panama, full pleated, with two bands around bottom, natty, new and stylish. $6.00.

A Sale of Broken Lots

Suits that were $25 to $35 at $7.50; Coats that were $12.50 to $18.50 at $3.75; Skirts that were $10.50 to $16.50 at $5.00; Skirts that were $6.75 to $10.75 at $3.75.

From this winter's stock, of course, but every garment in good style and adapted for several months' wear ahead.

A Sale of Hand Bags

Values Run Like This:

$4.00 and $5.00 Bags $2.50.
$2.50 and $3.00 Bags $1.50.

We were fortunate enough to happen in on one of the leading manufacturers in leather goods when he was gathering together his odds and ends in frames and leathers and making them up into Bags at a price to dispose of them quickly. At first we could hardly believe out eyes. Included were leathers and frames that we had actually paid as high as $6 to $10 for in past seasons: Beautiful fancy calfs, moroccos, seals, granite effects and other novelties, and some of the frames of German silver. Beautifully lined in harmonizing silks and leathers. Tomorrow the $4 and $5 Bags go at $2.50; the $2.50 and $3.00 Bags at $1.50.

Silberstein & Bonds Company

STORIES OF SCOTCH JUDGES.

Lord Salvesen in an address at Edinburg recalled the old days when human life was held very cheap and judges frequently indulged in levity when life was at stake, says the Westminster Gazette.

On one occasion Sir Francis Bacon was "mightily importuned" by a malefactor to save his life. All appeals failed and the culprit at length pleaded for mercy on account of his kindred. "Your name," said he, "is Bacon and my name is Hog, and in all ages Hog and Bacon are so nearly kindred that they are not to be separated." "Aye, but," replied the judge, "you and I cannot be kindred except you be hanged, for Hog is not Bacon until it be well hanged."

Similar callousness was evinced by Scottish judges even as late as the eighteenth century. Lord Braxfield seemed to have taken a positive pleasure in obtaining convictions in cases and it was he who told an unfortunate culprit that he was a very clever fellow, but that he would be "nane the waur o' a hanging."

On another occasion, when this judge noticed a juryman who was a personal friend entering the court he exclaimed: "Come awa', Mister, come awa', and help me to hang a few o' they damned scoundrels."

In 1870 Lord Kaimes presided at the trial of a man named Matthew Hay, with whom he had been in the habit of playing at chess. He summed up against the prisoner and when he was convicted exclaimed. "That's checkmate to you, Matthew."

Tug Firemen and Linemen will meet at Kalamazoo hall, Friday, March 8th.

JAS. BRYANT, Sec.
WM. WILSON, Pres.

MIXED.

Los Angeles Times: Edwin Markham, at a dinner in New York, said of mixed metaphors:

"When I was teaching in Los Angeles, I used to read every week a little country paper whose editor's metaphors were an unfailing joy to me.

"Once, I remember, this editor wrote of a contemporary:

"'Thus the black lie, issuing from his base throat, becomes a boomerang in his hand, and, hoisting him by his own petard, leaves him a marked man for life.'

"He said in an article on home life:

"'The faithful watchdog or the good wife, standing at the door, welcomes the master home with honest bark.'

"Another time, on a more personal matter, he declared:

"'Our cow has been milked in the pasture for three mornings running before we got around to it. We know who the miscreant is, and if he does it again we will mention his name, let the chips fall where they will.'

"In an obituary of a farmer he wrote:

"'The race was run at last. Like a tired steed, he crossed the harbor bar, and, casting aside whip and spur, lay down upon that bourn from which no traveler returns.'"

We are exclusive Duluth agents for these convenient little folders—we think the best and strongest as well as the simplest of their kind on the market. The cuts show the folded, upright and reclining. The prices are from $7.50 up to $17.50.

ALL SOLD ON EASY PAYMENTS

RAILROADS

GOULD IS RE-ELECTED

Western Pacific Holds Its Annual Election of Officers.

New Mercantile Steamship Service With Japan is Proposed.

San Francisco, March 6.—The Western Pacific railroad held its annual election yesterday in this city. George J. Gould was re-elected a director, as were also E. T. Jeffrey, Edwin Hawley, L. H. Calef and S. W. McCutcheon, all of New York.

The other directors chosen are: W. J. Bartnett, J. Dalzell Brown, Virgil G. Bogue, H. M. McCartney, Warren Olney, J. E. Evans, W. J. Shotwell and Charles W. Slack, all of this city and vicinity.

E. T. Jeffrey was re-elected president; W. J. Bartnett, vice president and general attorney; Virgil G. Bogue, vice president and chief engineer; S. McCutcheon, chief counsel, with offices in New York; J. Dalzell Brown, treasurer; E. C. Lewis, assistant treasurer; C. M. Bradford, secretary, and L. R. Bush of New York, assistant secretary.

The company is now spending at the rate of $1,000,000 a month on construction work. It is hoped to have its main line from Salt Lake City to this city, a distance of 929 miles, completed in September, 1908.

A NEW SERVICE.

Japanese Steamship Company Trying to Make Deal With Railroad.

Seattle Wash., March 6.—S. Takenouchi, a representative of the Osaka Mercantile Steamship company, is in Seattle. A recommendation that the company establish a service between Osaka and one of the most important American Pacific ports is intimated by him.

Mr. Takenouchi has planned a conference with J. J. Hill of the Great Northern Railroad & Steamship company.

"I had intended meeting Mr. Hill before returning to Japan," he said, "but I am ill and may not have the opportunity to talk with him."

The true significance of this statement is regarded here to be found in the fact of the existing traffic rates between the Great Northern Railroad & Steamship company and the Japan Mail Steamship company. The latter company represents the Great Northern interests in the Orient, and is favored by the railroad company at this port in distributing cargoes originating here, or receiving of cargoes at Oriental ports for this port. The Osaka company appears anxious to enter the American Pacific coast trade, and is expected to make a joint traffic agreement either with the Great Northern or some other transcontinental line, if the same can be effected to the advantage of both interests.

KENNEDY GETS JOB.

Will Succeed Slade as Great Northern's General Superintendent.

H. A. Kennedy, assistant general superintendent of the Great Northern, has been appointed to succeed George T. Slade as general superintendent.

Mr. Kennedy will be succeeded by R. W. Bryan, who for many years has been the general manager of transportation. W. C. Watrous will succeed Mr. Bryan. Recently he has been connected with the Missouri Pacific at St. Louis. Mr. Kennedy has had wide experience, and is well fitted for his new position. He entered the service of the Great Northern in 1899, but had considerable railroad experience prior to that time.

PREPARE FOR STRIKE.

Believed Railroads Are Preparing for Trouble With Employes.

An advertisement appearing in the Twin City papers this week, asking for freight brakemen and yardmen for an Eastern road, to take the place of men on strike, is thought by many to indicate that Eastern roads have already begun to prepare against a possible strike, growing out of differences over the wage schedule, recently decided upon for forty-two different railroad systems.

No such advertisement has appeared in the Duluth papers, and nothing seems to be known locally concerning them. The advertisement may mean just what it says, and it may be a decoy to get a list of men fitted to work on any railroad in the country in case of a general strike.

MARCH TERM HAS OPENED

Both Court and Jury Face a Very Busy Period.

Grand Jury Will Take Action in Argyle's Case.

The March term of the district court opened at 10 o'clock this morning with Judge Ensign presiding over the calendar. There was a large attendance of attorneys at the call of the calendar, which resulted in only eleven cases being continued and six cases being stricken. Some of those stricken from the calendar have been settled.

The calendar had 141 cases noted for trial, and there were 124 left for trial after the calling of the actions by the court this morning. Several motions were noted by the court for continuances of cases, but as there are other cases that will probably be moved on the calendar, the length is likely to approximate 125 cases, exclusive of the criminal cases.

The grand jurors, sixteen in number, assembled at 11 o'clock and were charged by Judge Ensign. As sixteen grand jurors comprise a quorum, the court directed that five more persons be summoned to serve on the grand jury for the present term, as some of the number who assumed duty this morning, might not be able to attend every session.

The grand jury for this term has a large number of very important matters for its consideration and action. Besides three cases where murder is charged, the grand jury will also investigate and make a return regarding the shooting and attempted murder last evening by Fred Argyle. It is understood that the criminal calendar will be one of the longest on record for St. Louis county.

The petit jurors will not assemble for duty until next Monday, when the trial of the jury cases will begin.

On the March calendar there are a large number of the appeal cases from the awards in the condemnation proceedings instituted by the Wisconsin Central Railway company. Frank Crassweller, one of the attorneys for the company, gave notice this morning for the removal to the foot of the calendar of the appeal cases, also for the consolidation and framing of issues of several of them. The motion will be heard at the special term of court Saturday.

The case of Joseph Collyrod, as administrator against ButlerBros. was dismissed by stipulation, this morning, settlement having been effected by the payment of $2,500 by Butler Bros. to the administrator, in lieu of all claim for damages. The case was to have been tried this term.

Quite a large number of answers to cases noted for trial this term, were filed with the clerk of the district court this morning. Among these was the answer of Philip Helmick in the damage action brought to recover for the death of Pasquale Ruscetta, who was struck and killed by Mr. Helmick's automobile last December, while bearing a local Republican committee and a speaker, John F. Jacobson, to a political gathering at the Armory. Mr. Helmick claims that Ruscetta's death was due to his carelessness and negligence. It is alleged that the chauffeur was not running the car at a high rate of speed, and that he gave sufficient warning signals and did everything possible to avert the accident.

A stipulation has been filed for the dismissal of the case of Mat Nellmarka, by his guardian, Henry Nellmarka, against Oscar Bay.

MEMBERSHIP IS INCREASED

Successful Campaign Has Been Waged by Boys' Department.

The membership committee of the boys' department of the Y. M. C. A. will close the final week of the big canvass for new members tomorrow night after an unusually successful campaign which has been carried on during the past two weeks.

So far a large number of renewals have come in and twenty-five new members have been secured. By Thursday night it is expected that twenty-five more will be added as a large number of boys have promised the committees to come in by that time.

Up to date the Reds are still in the lead with sixty-one points and if they keep up this record they will sit down to a turkey dinner. The Yellows are following a close second and they hope to occupy the higher place and expect to make a good finish. The Blues are still in last place, but are hopeful even yet. The winning team will be given a turkey banquet, and the second a beef dinner, and the losing team a liver banquet.

The final arrangements for the entertainment to be given by the entertainment committee Friday evening have been completed and the affair promises to be a success. The committee members in charge of Arthur Dunning, William Chadwick and Robert Grimm have spared no effort to prepare a suitable program. The program is as follows:

Overture—Boys' Department orchestra.
Monologue—Seth Parker.
Horizontal Bar Work—Daniel Cole, Dr. Olson and Edward Mapp.
Specialty—Stanley Lamb.
Songs—Boys Department Glee club.
Cello Solo—Victor Levin.
Wrestling—William Honingman and Sol Swardloff.
Talking Comedians—Puff and Guff.
Selection—Boys' Department orchestra.
One Act Comedy—"The Widow's Proposal."

Your Blood

Needs purifying and your whole system renovating in the spring, as pimples, boils, eruptions, loss of appetite and that tired feeling annually prove.

Fines	$2.25

CROFFORD'S HOPE DASHED.

Ruling in Malpractice Case Is a Blow for Certain M. D.'S.

Des Moines, March 6.—The supreme court ruled yesterday adversely to Dr. Crofford of Lamoni, who is serving twenty-five years for performing a criminal operation upon Maude Stone, a 13-year-old girl. The court held that, even if the girl was a party to the conspiracy, yet if the defendant was concerned, he is guilty. This ruling is highly important and will strike terror into the hearts of doctors guilty of malpractice.

"Had dyspepsia or indigestion for years. No appetite, and what I did eat distressed me terribly. Burdock Blood Bitters cured me."—J. H. Walker, Sunbury, Ohio.

WIFE MAKES STRONG CHARGES

Mrs. Phoebe Quinlon Seeks Divorce From George W. Quinlon.

The complaints in two divorce actions for trial during the present term of the district court were filed with the clerk of the court this morning.

Mrs. Phoebe Quinlon, who seeks legal separation from George W. Quinlon, has a long story of abuse, cruel treatment and habitual drunkenness, and finally desertion, on the part of her husband. According to the complaint Mrs. Quinlon is 26 and her husband is 31 years of age. They were married in Duluth, March 29, 1900. One child which resulted from the union died some time ago.

Mrs. Quinlon claims that beginning with her marriage, and lasting up to July 20, 1905, when he deserted her, Quinlon was a habitual drunkard. She claims that he was continually abusive, and treated her cruelly, at one time flourishing a revolver and threatening to kill her.

It is further alleged by Mrs. Quinlon that when their child was laid out, Quinlon came home so drunk that he jostled the table on which the little corpse lay, and acted in a disgusting manner.

Mrs. Quinlon alleges that her husband became so abusive on one occasion she had him arrested, and he was confined in the county jail for a period of forty days.

The other complaint was filed in the action brought by Augusta Johnson against William S. Johnson, the grounds being desertion. They were married in Duluth, March 4, 1905. Mrs. Johnson is 48 and her husband 51 years of age.

A TROUBLED FATHER.

Harper's Weekly: In a certain mountain town in Kentucky the feeling began to grow that the "grocery saloon," where liquor was sold as commonly as vinegar and kerosene, must go, and when a customer came into the store to procure the precious liquid he was sometimes called upon to make an excuse or apology. There were some interesting excuses offered, and one in particular is told of a mountaineer who went into a store and, laying down his jug on the counter, said:

"Squire, I want a gallon of your best stuff; the baby is sick."

ANNE'S MARRIED NOW: TRY THIS.

Cloquet Independent: A young man who was visiting in Duluth last week found himself in a sad predicament when it came time to leave. When he called for a ticket at the station he found he was "broke." The ticket cost three dollars and he didn't have a copper. He thought a moment—then he said: "Well, agent, hold that ticket and I'll be back with the money in a minute." He went up the street to a pawn shop and pawned his watch chain for $1.50. Then he started to the depot and on the way met a friend to whom he sold the pawn ticket for $1.50. Calling at the ticket office he paid the $3, secured his ticket and went home happy. But who lost the money?

THE REQUITAL.

What shall I give you, woman, dear?
Kiss for your eyes, pearl for your ear—
Praise to requite you,
Toils to delight you,
Or trophies that shall leave your name
Canopied by outlasting fame?
Ah, no! much less—
Give me, O give me faithfulness!

Kindness I'll give—with sovran care
Harbor you like some temple fair,
With care that shields
Your way through fields
Flower-soft, and makes the wise of ages
Only your ministers and mages • • •
Nay, would you bless,
Give me, O give me faithfulness!

Take this instead—this throbbing rose
Passion, whose cloudy cups disclose
Core within core
Sea-and-moon lore
And the breath of lovers whose exchange
Of being and worship still is strange • • •
Fair, it is, yes • • •
But give, O give me faithfulness!
—Westminster Gazette.

THE WELL-DRESSED GIRL.

Philadelphia Bulletin: "What a sensible girl that is," mused the other girl, as she eyed the new comer at the next table.

The new comer had slipped off her long coat and was studying the menu card. It was discovered that she wore a short, perfect fitting skirt of black cloth, and a soft black China silk waist.

"Her waist," mused the first girl, "is serviceable and pretty, feminine and becoming, plain enough for business, yet nice enough to wear anywhere. Her collar is fastened to it, hooks in back, and fits perfectly, so there is no ugly jumble of pine, plain and fancy. Her white embroidered turnover is immaculate, and fastened by one very simple jeweled bar in back.

"She wears no white turnover cuffs, to soil and muss at her desk. How pretty and dainty is that very narrow edging of black lace at her wrists. It's quite an idea. It has a finished look, and yet is so serviceable. Her belt is absolutely plain and perfectly fitting.

"Her hair—isn't it lovely? And not an ornament in it, except that simple little shell barette. Her hat—how plain it is, yet not a bit mannish, because of that pretty becoming droop to the brim. No veils either, except a serviceable one of plain chiffon, plainly knotted in back, and turned up now over the hat.

"No cheap furs; no gaudy 'jeweled' hatpins; no rings nor beads; no sham lace or ornaments, and yet I never saw a prettier, more feminine looking girl, nor one more sensibly and softly attired, either for business or pleasure."

And the woman glanced around the room at the dozens of other working girls decked out in lace collars, pins, furs, dotted veils, half-soiled lingerie waists and marvelous pompadours and puffs, caught by many gilded combs.

"Wouldn't you think," she mused, "that a light would break in on them when they look at that girl?"

HOODOO NUMBERS.

New York Herald: Wilmington, Del., produced the champion thirteen story. Francis E. Davis, with thirteen letters in his name, was arrested by Patrolman Francis G. Green (ditto) at thirteen minutes past 10 on Jan. 13, the call going in from box No. 13. At thirteen minutes past 9 next day he was arraigned before Edwin R. Cochran (thirteen letters again) and his fine and costs totaled exactly $13.

Miss Margaret Schidu of Cleveland, on Aug. 23, sent invitations to twenty-three friends to attend her twenty-third birthday party, Sept. 23, at 23 East Twenty-third street. An orchestra of twenty-three pieces discoursed exactly twenty-three dances from behind twenty-three palms.

The other hoodoo digits came up twice in April, once when a Baltimore darky was arrested for stealing thirteen chickens; again at St. Louis, where a baseball "fan" fell dead of heart disease during the thirteenth inning of the St. Louis-Pittsburg game.

Los Angeles Times: Frederic Irland, stenographer of the house of representatives, at the convention at Atlantic City of the National Association of Stenographers, said, apropos of a rush course:

"I can't approve of this action because I am a foe to rashness. In handling the affairs of a great body of men I believe in prudence and carefulness. I am almost as prudent and careful as the weak-minded Scot of Peebles.

"This Scot, a silly look on his face, was skating near the famous iron bridge of Peebles on a winter day.

"Some young ladies wished to skate under the bridge, but they did not know whether the ice was safe or not. So, approaching the Scot, the youngest and prettiest of them said:

"'Saunders, would you mind just gliding under the bridge and back, so as to test the ice?'

"The half-witted Saunders took off his cap, and with a bow and a smile, he replied:

"'Na, na! If I am daft I ken manners. Leddies first.'"

Food Poisons.

90 Per Cent of All Diseases the Result of Undigested Putrefying Foods.

Men of affairs, women of society and children with active brains are too often sedentary in their habits, giving little time to exercise. To this evil is added that of high and irregular living—as a result, the stomach cannot stand the demands made upon it. The abused and overtaxed stomach does not properly do the work of digestion, food taken in ferments and the poison permeates the whole system. The body loses in weight and becomes a prey for the attack of whatever disease it may encounter.

Did it ever occur to you how busy that stomach of yours is? It only holds three pints, but in one year you force it to take in 2,400 pounds of material, digest it and prepare it for assimilation into the blood. No wonder it rebels when overworked. We crowd it with steaks and pastry, irritate its juices with spices and acids, and expect the stomach to do its work. It can't do it.

All over the inner layer of the stomach are glands which secrete the juices necessary to digestion. The entrance of food into the stomach is the signal for these glands to do their work. The more the food, and the more indigestible, the greater the demand upon them and upon the muscles of the wall adjoining.

Think of the tons of high-seasoned game, sweetmeats and appetizers crammed into this little four-ounce mill, and then wonder, if you will, why you are dizzy or nauseated or constipated. Don't blame your stomach or curse your fate that you should be born so unfortunate. Blame yourself and apply the remedy.

First, get a small package of Stuart's Dyspepsia Tablets, taking one after each meal and at bed time. They are not a medicine, but a digestive. Your stomach is worn out and needs help, not medicine. Stuart's Dyspepsia Tablets will do the work that the stomach fails to do. There's enough power in one grain of Stuart's Dyspepsia Tablets to digest 3,000 grains of ordinary food, so you needn't feel that anything you eat will remain in your stomach undigested.

Stuart's Dyspepsia Tablets will rout the poison because they remove the cause—food fermentation. They are nature's own cure for dyspepsia. The host of troubles dyspepsia is father of cannot be numbered, for a healthy stomach is the source of all health.

Seize your opportunity before worse conditions confront you. Send today for a free trial package of Stuart's Dyspepsia Tablets. They will bring your stomach relief. F. A. Stuart Co., 83 Stuart Bldg., Marshall, Mich.

TWINS EXPECTED IN SPAIN.

Dispute Over the Succession to the Throne is Likely.

Paris, March 6.—A dispatch to the Eclair from Madrid says that court circles there are agitated by reports that there are indications that the queen probably will present twins to the world.

If this were to occur it would raise interesting legal, medical and political questions, besides being unique in royal history. This would be especially the case should the twins be boys, or if girls, should they be the only children of the royal couple. Disputes, it is thought, would be certain.

The present Spanish law declares that the first born of twins is the older and therefore has the right of succession. The old Spanish rule reversed this order, and modern medical opinion, the Eclair says, supports the older law, which declares that the older child in the case of twins is the last to be born.

A SPECIALIST

Of Twenty Years' Experience, Not Only Treating, But Curing His Patients.

DR. REA

Diseases of Men, Diseases of Women, Chronic Diseases, Nervous Diseases And Organic Diseases.

Next regular professional visit to Duluth at Spalding Hotel,

SATURDAY, MARCH 9,

From 9 a. m. until 8 p. m.

One day only—returning every month.

All curable medical and surgical diseases, Eye, Ear, Nose and Throat, Lung Diseases, Early Consumption, Bronchitis, Bronchial Catarrh, Constitutional Catarrh, Nasal Catarrh, Dyspepsia, Sick Headache, Stomach and Bowel Troubles, Appendicitis, Rheumatism, Neuralgia, Sciatica, Bright's Disease, Diabetes, Kidney, Liver, Bladder Troubles, Prostatic and Female Diseases, Dizziness, Nervousness, Indigestion, Obesity, Interrupted Nutrition, Slow Growth in Children, and all wasting diseases in adults. Many cases of Deafness, Ringing in the Ears, Loss of Eyesight, Cataract, Cross Eyes, etc., that have been improperly treated can be easily restored. Deformities, Club Feet, Curvature of the Spine, Disease of the Brain, Paralysis, Epilepsy, Heart Disease, Dropsy, Swelling of the Limbs, Stricture, Open Sores, Pain in the Bones, Granular Enlargements and all long-standing diseases properly treated. WILL GIVE A MILLION

Former School Teacher to Donate Fortune for Art Gallery.

She Wants the Finest Place in New England.

Manchester, N. H., March 6.—Mrs. Hannah A. Currier, widow of Governor Moody Currier, is to give her entire fortune of $1,000,000 for the establishment of a gallery of art in this city at her death. The estate will be left with trustees named in the will she has already prepared.

With this large sum of money to be expended it is expected that the gallery will be the finest in New England and will compare favorably with the most extensive and elaborate in the United States.

Mrs. Currier is now nearly 80 years old, and, although in apparent good health, she has mapped out the plans that she intends shall be carried out after her decease.

The legal instrument, which specifies the names of the trustees, who are prominent business men of Manchester and who are directed to spend the Currier estate for the establishment and maintenance of the gallery of art, has been executed by her and is ready to be probated at her death.

Since its execution a few years ago, a change in the board of trustees was made necessary by the death of George Byron Chandler, president of the Amoskeag National bank. Mrs. Currier made a codicil in which she names another trustee in place of Mr. Chandler.

The family mansion, with its mementoes and treasures, occupying the 1¼ acre lot bounded by Myrtle, Ash, Orange and Beech streets, and first occupied by Governor Currier in 1869, and all the other assets of one of the most valuable estates in New Hampshire, will be devoted to the display and furtherance of art.

By the provisions of Mrs. Currier's will the trustees may use their judgment in the matter of the building. They are empowered to remodel or remove the residence and erect a new building, but her wishes are that the gallery be located on the site of the family homestead.

In disposing of the estate for such a purpose Mrs. Currier will be carrying out the wishes of her illustrious husband, expressed in a will executed by him some years before his death in 1888.

The estate at the time of Governor Currier's death was valued at $800,000, but by wise supervision and careful investment on the part of his widow, it is now estimated to be worth at least $1,000,000.

Governor Currier was a true type of the self-made man. Born of humble parents in the town of Boscawen, he gradually rose by his own endeavors to be one of the wealthiest men in Manchester and governor of the state in 1885-87.

He was graduated from Dartmouth college in 1824 with the honor of Greek orator and then located in Lowell, Mass., where he served as principal of the high school. He studied law at the close of school hours and was admitted to the New Hampshire bar.

Locating in Manchester, he practiced law for a short time, and becoming interested in financial enterprises, was instrumental in founding the Amoskeag National bank, of which he was president for many years.

He was a member of Governor Goodwin's council in 1859, and the following year continued in the official family of Governor Berry.

Governor Currier was regarded as New Hampshire's greatest scholar and poet, and his state papers are classics of official literature. Mrs Currier had his state papers, addresses and poems published recently in a handsome volume for distribution among the family friends.

Governor Currier's last poem, "Looking Back," written a few months prior to his death at the age of 92, is illustrative of the character and life of its author. He wrote:

"I have stood at the foot of the ladder,
Where labor and want have their home;
I have climbed up its toilsome pathway,
Unaided, unblest and alone.

"I have looked far up to its summit,
Have seen where the lights ever shine,
Have found though mortals are changing,
That life itself is divine."

Mrs. Currier was a teacher in the local public schools for some years previous to her marriage to Governor Currier in 1869, and is a woman of culture and refinement. She is also a devoted lover of art and her collection of paintings includes life-sized likenesses of herself and husband made by the noted Boston artist, Daniel J. Strain.

In speaking of the disposition of the estate, Mrs. Currier said to a Herald correspondent:

"I have taken due care that the wishes of my husband shall be carried out, and have prepared a will by which the entire estate, with the exception of a few small bequests, will be given for a gallery of art. My husband thought of various ways to dispose of the estate, but finally decided that to leave it for a gallery of art would be the most feasible and beneficial. The trustees I have named in my will are men of high standing in the community and will undoubtedly carry out all of its provisions."

COMPANY FILES BRIDGE PLANS

Northern Pacific Railroad Outlines Improvements to Government.

The Northern Pacific Railway company has filed with the United States engineering corps its plans for the general rebuilding of the old Northern Pacific Railroad bridge between Duluth and Superior. The improvements planned are extensive and the expense will be in the neighborhood of $500,000. The work will begin as soon as the plans are approved by the government engineers.

The plans contemplate the replacing of all the steel work by stronger and heavier frames. The approaches and the piers will also be strengthened and the two draws will be widened so that the larger boats will clear the bridge with few chances of striking.

It is claimed that the old bridge now in use is not strong enough to bear some of the heaviest engines now in use by railroad companies using the bridge. The new bridge will be built with a view of service by the heaviest engines and trains.

It is understood that one of the important features of the plans is a double track system across the bridge instead of the single track. As it is now with only one track across the bridge long delays are caused and several times collisions have been narrowly averted as two trains have approached the bridge at the same time.

SPRING APPAREL ARRIVING DAILY.

The Suits have never seemed so pretty, nor the styles so varied.

Hosts of semi-fitting effects, that miss all the bother of fitting for most people, vie with the dressy Etons. More severely Tailored Suits are plentiful and among these, the cutaway style seems to have earned first postion in Dame Fashion's favor.

Variety in materials only adds to the beauty of the showing—fancy imported woolens in plaids and mixtures, checks and indefinite stripes. A notable feature is that mixtures embracing shades of tan, brown and champagne tones predominate.

Trimmings are more dainty than ever before. Silk and Persian braids are evident in braided collars and cuffs, and novel little vested effects.

Skirts cut very full, are pleated and paneled, bias strapped, etc., until one wonders which is really most beautiful.

Prices appear in variety to meet every inclination—ranging from **$17.50 up.**

New Models in Spring Coats.

The best judgment of their "difference" and "exclusiveness" can only be based upon a careful inspection and comparison—but it's plainly evident when you look.

LONG, LOOSE BROADCLOTH COATS of rich, beautiful black—as low as **$12.50 and up.**

SHORT FITTED COATS—both coverts and broadcloths—show a delightful variety in strap trimmings and other details. Silk and satin lined garments—**$5.98 to $25.00.**

Unusual Panama Skirts $7.50.

It will be hard to find Skirts at $10.00 anywhere else to compare with these at **$7.50.** Why? One of our earliest purchases preceded by the closest margin-a sharp advance in materials. Bought a day later—we must have asked $10.00.

Chiffon Panamas in black, navy and brown—extra full width, perfectly tailored and fitted—cluster and box pleated. Also an assortment of handsome check worsteds—cluster pleated at sides, back and front. Rich tones of gray and brown. Worth $10.00—**$7.50 each.**

"Heatherbloom" Taffeta Petticoats.

These are genuine "Heatherbloom"—the goods that looks like silk—feels like silk—rustles like silk—but that outwears silk three times. Most women are happily familiar with their excellence.

Well, the new styles are here!

ONE AT $2.49—A full cut skirt with 15-inch tucked and shirred flounce—with dust ruffle of self material.

$2.98—Great ampleness in its extra full cut—with deep flounce, double ruffle, clustered pin-tucks, a dust ruffle of same material—finely tailored and finished.

Exquisite White Waists

Are designed for the most exacting uses—and for wear on many out-of-the-ordinary occasions. In fact, much of the charm of spring toilettes will be due largely to the exquisite touches which characterize waist styles.

Lingerie, silk, Japanese silk and lace nets—all in comprehensive variety and at prices which attract by reason of their littleness. "In—Out!"—that's the story in two words of their beauty and economy—**$1.25 up.**

$1 to $1.50 Underwear 59c.

All Broken Lots and Sample Pieces

In a "Clearance Sale"—for clearance only. For that reason we offer all counter samples, and broken size lots of regular $1, $1.25 and $1.50 garments at **59c each.**

There are Women's white and natural wool vests, high and low neck, long and short sleeves; lisle thread silk and lisle and fine cotton—same styles; also fine merino and natural wool drawers, and merino and Sea Island cotton Union Suits.

Children's Jersey ribbed Australian wool, camel hair and natural wool vests, pants and drawers.

All weights, suitable for all seasons — all styles and sizes— but not all sizes in any one style.

Regular Low Prices $1, $1.25 and $1.50—59c each

PANTON & WHITE COMPANY

THE BIG GLASS BLOCK STORE — WHERE QUALITY IS PARAMOUNT

For Baby! It's "Go-Cart" Time

What matter if it be a little cold, yet? Or if it appear a trifle early? Here's the point! The new 1907 models are just in—the line's complete—you get choice of a complete assortment.

"Whitney" Carts—The Best Carts Made

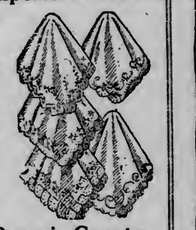
BEST! We know it—so does every user of a "Whitney." Stronger, better workmanship, superior in quality of materials used, more thoroughly modern, with more dash and style than its nearest competitor. This is not wanton boastfulness—it's plain, simple fact—evident in any and every fair comparison.

$6.25

A reclining, Folding Go-Cart, neat, compact, thoroughly reliable as to strength and durability; woven reed body, adjustable back and footboard; mattress cushions and parasol in assorted colors; 10-inch rubber tired wheels, patent anti-friction wheel fasteners—guaranteed. A splendid value at only **$6.25 each.**

50c Handkerchiefs 21c

In This Sale of an Importer's Stock.



And that's but one item from 8 splendid big lots—all just as good as that. There are Ladies' and Children's fine lawn and Swiss kerchiefs — balance of spring stock taken off an importer's hands. Usually, you pay just about double these prices—and have no such variety for selection. There are plain hemstitched and beautifully embroidered and scalloped styles.

Eight Lots—on the Bargain Counter

LOT 1—Plain hemstitched lawn — regularly 5c—each **3c**

LOT 2 — Colored border—hemstitched; 5c values, each **3c**

LOT 3—Lawn, hemstitched—embroidered corners—8c values **4c**

LOT 4—Lawn, hemstitched and lace trimmed, worth 10c **5c**

WOMEN'S $4.00 SHOES.
High-grade Vici Kid stock—with patent tips, hand turned soles, or medium heavy welted walking soles. Good range of sizes and widths—and regular $3.50 and $4.00 values. **Only $1.98 pair**

RUNAWAY FOUND DEAD.

Young Chicago Woman Who Figured in Sensational Elopement Asphyxiated.

Chicago, March 6.—Miss Olive Sells, well known in South side social circles, who eloped in an automobile to Milwaukee last fall and created comment by returning to Chicago a few days later without the man she was supposed to have married, has been found dead in her rooms, 2552 Prairie avenue, having been asphyxiated by gas. Whether the young women met death accidentally, committed suicide or was murdered still baffles the police. A diamond ring valued at $200, and other jewelry has mysteriously disappeared. A bracelet, a chain and locket and several other pieces of jewelry were turned over to the police by Grace Lake, who was arrested after the girl's death.

GIRL WAS A BOLD BANDIT.

ndiana Miss Rifled Cash Register, Companion "Covering" Merchant.

Elkhart, Ind., March 6.—Miss Hazel Eddy, aged 19, is under arrest here for participation in one of the boldest hold-ups ever perpetrated in this city.

Early Monday night Emory Labelle entered Bowner's meat market and was met by a man who presented a revolver and ordered him to stand still. A girl stepped from behind the counter, opened the cash register and took the contents. Then the pal backed out of the market and escaped.

Miss Eddy was arrested an hour later. Her companion, Thomas Dixon, whom Labelle recognized, escaped. Surrounding cities have been notified to arrest him.

HAS CRIMINAL RECORD.

La Crosse Man Who Has Been Arrested Thirty-Nine Times.

La Crosse, Wis., March 6.—Frank Birmingham, who has the longest criminal record at local police headquarters of any man whose name appears upon the books, is under arrest for the thirty-ninth time, charged with robbing Henry Sweeney, an old man, whose home is in Brownsville, Minn. Birmingham met Sweeney in a saloon, where he begged 10 cents, and from there followed the old man to the Milwaukee station, where he robbed him while he was purchasing a ticket.

Birmingham has served three terms in state's prison, and dozens of times in the county jail for larceny, drunkenness, assault and battery, robbing box cars, indecent exposure and vagrancy.

The winds of March have no terror to the user of De Witt's Carbolized Witch Hazel Salve. It quickly heals chapped and cracked skin. Good, too, for boils and burns and for piles. All druggists.

Stop Drinking!

Orrine Will Destroy All Desire For Whiskey or Beer.

A Michigan Druggist, H. G. Coleman, has made a thorough study of various cures for the liquor habit, and gives this as a result of his investigation: "Before taking the agency of Orrine, I went to considerable trouble to learn about it and become confident that it was a thoroughly honest preparation and put out by a reliable firm."

Write for free book on the cure of alcoholism to the Orrine Co., Washington, D. C. Mailed sealed. Orrine costs but $1 per box.

Orrine is sold by F. W. Kugler & Co., 106 West Superior street, Duluth.

SUES MARSHAL FOR $10,000

Pardeeville, Wis., Man Says Officer Shot Him Without Due Cause.

Portage, Wis., March 6.—Asserting that he was shot and seriously injured by Village Marshal William Davis of Pardeeville, Wis., on Feb. 24, James Daily of that village has sued the officer of $10,000 for alleged unwarranted injury. The marshal says that Daily resisted him when an attempt was made to arrest him for bolsterous conduct, and admits he shot at Daily.

SCANDINAVIAN SINGERS.

May Decide to Hold Their Next Saengerfest in Norway.

La Crosse, Wis., March 6.—The next saengerfest of the Northwestern Scandinavian Singers' association, which held its festival in La Crosse last year, may be held in Norway in 1908 if the plans of many of the members are carried out. Next June the convention of delegates from the societies that belong to the association will be held in Minneapolis or St. Paul. At this meeting the question of selecting the next saengerfest city will be settled. The city of Minneapolis is the strongest candidate after the festival.

STUNG BY HIS CONSCIENCE

Swore Falsely to Naturalization Papers Quarter Century Ago.

New York, March 6.—A tall, emaciated man walked into the office of United States Commissioner Shields Monday afternoon, and explained that he had come all the way from West Berkeley, Cal., to clear his conscience before his death, which he knew must be not far off.

It soon appeared that he swore falsely, years ago, to obtain citizenship papers. He was John Nelson, and a Norwegian by birth, he said. In 1881 he went before the commissioner, and, on the advice of a friend, swore that he came to this country when less than 18 years old, which was untrue, so as to be able to obtain full papers at once. The papers were granted, but he had not voted upon them in a long time.

Doctors lately told him he had not long to live, and he resolved to confess to Commissioner Shields rather than die a perjured man. Commissioner Shields' clerks verified Nelson's statements by the records, and the commissioner accepted the return of the man's papers.

Nelson then said he was ready to be arrested on a charge of perjury, but Commissioner Shields explained that the statute of limitations made him free. Nelson expressed to the commissioner his profound relief that he had cleared his conscience.

Your brain goes on a strike, when you overload your stomach; both need blood to do business with. Nutrition is what you want and comes by taking Hollister's Rocky Mountain Tea. 35 cents, Tea or Tablets. Ask your druggist.

WILL HOLD MEETING.

County Board's Monthly Session Will Occur Thursday.

The regular monthly meeting of the board of county commissioners will be held tomorrow morning at the courthouse. The committee meeting to go over the accumulated bills was held today.

Judging from the present indications, the board will not have much to dispose of outside the usual routine business. Very little new business has been filed with the auditor. Some of the tax matters heard by the board at a special meeting, a few days ago, are likely to be disposed of tomorrow.

How to Remain Young.

To continue young in health and strength, do as Mrs. N. P. Rowan, McDonough, Ga., did. She says: "Three bottles of Electric Bitters cured me of chronic liver and stomach trouble, complicated with such an unhealthy condition of the blood that my skin turned red as flannel. I am now practically twenty years younger than before I took Electric Bitters. I can now do all my work with ease and assist in my husband's store." Guaranteed at all drug stores. Price 50c.

CUPID DEFIES LOCKS.

Faribault, Minn., March 6.—Miss Tillit Fahmer and Edward Sorg were married in Dundas Monday. The bride's parents, thinking the young couple were about to elope, locked the girl in the house, and on their return found her gone. They immediately set a watch at each station, but the young man had hired a livery rig and driven to Dundas, where the ceremony was performed. The bridegroom formerly lived at Waterville.

TREMENDOUS OVATION IS TENDERED BRYAN

He Speaks to Audience That Packs Methodist Church.

Tells of His Famous Tour of the Old World.

An ovation such as a Duluth audience rarely vouchsafes to a speaker was tendered William Jennings Bryan at the First Methodist church last evening and the storm of applause which greeted his appearance on the platform was a good deal more enthusiastic than could have been required by courtesy.

For an hour and a half Mr. Bryan talked on the ways and customs of the old world, skimming lightly over the trip around the world and apparently touching at random upon a few interesting points, but he succeeded in investing what would, in the hands of an ordinary lecturer, be a dry and uninteresting geographical subject with more than ordinary interest, and in giving a splendid general idea of his conceptions of Oriental life, to his audience.

He is a thorough American, and his faith in America was very evidently strengthened by his observations in his trip around the world.

In introducing the "Great Democrat" Rev. M. S. Rice, said that nine years ago in Kansas he was a reporter on a paper when Mr. Bryan came to town, and, anxious to get some new opinions of the greath man from the crowd, he tackled a tramp on the outskirts of the audience for an opinion.

"Oh," said the tramp, "I class Bryan with all preachers and politicians as a sort of bloodsucker."

Mr. Bryan said in part:

"Ladies and gentlemen, I have been introduced in a good many ways, but this is a new one. It may, however, help me to explain one thing which I have heretofore explained in another way. I have in the past experienced considerable difficulty in keeping political and non-partisan speeches separate. I have been accused of putting politics in my religious speeches and mixing religion with my political speeches.

"Up to this time I have been accustomed to explain this by the fact that there isn't much difference between a good Democratic speech and a sermon.

"My introduction this evening has, however, led me to believe that there is another resemblance between me and a Methodist preacher.

"It has been easier for me to dodge politics in my speeches during the past two years than formerly, first because events are speaking so loudly on our side, and secondly because our great president has been setting forth my ideas so forcefully that there has been no need for me to talk about them. I consider it a very good sign when members of two political parties have to resort to a national committee to separate them.

"I believe I will be of more service to you this evening if I steer clear of politics and attempt to convey to you an impression of what we saw on our trip around the world. I realize that I cannot hope to convey to you our impressions, as I never had received a true conception of the old world from the lecture platform before I visited it. We did not start out with the purpose of viewing the wonders of nature, for we realized that God had dealt generously with the United States in this respect, and we visited the Yellowstone, Yosemite and the Colorado canon before starting on our trip abroad.

"But we realized that our country has no monopoly of the beauty spots of the world.

"We had heard that Damascus was the oldest city.

"The rivers of Europe have been overestimated. I had a lot of trouble with the river Tiber when I was studying Latin, and I got an overestimated idea of it. The Danube was not as blue as I thought it was—in fact, it was not blue at all. The Rhine is a splendid river, but is not greater than the Columbia, and I believe that when the banks of the Columbia are decked with homes and castles by the hand of man, it will be rated as high as the Rhine.

"We saw the lakes of Killarney, of Switzerland, and of Norway, but I believe that if some great poet will immortalize some of the beautiful lakes in this country, people will travel just as far to see them as they do to see the famous lakes of Europe.

"We spent one night in a Norway fjord, watching the midnight sun, and the spectacle of the great ball of fire sinking almost to the horizon and then without disappearing start on its upward course again, was weird in the extreme. After a few days in this latitude, we began to appreciate the blessings of darkness, and I am glad that we live in a country where night draws a curtain on the day's troubles and exertions.

"The three weeks we spent in the Holy Land were the most interesting of the trip. I am astonished at the few people who visit this most interesting of countries.

"Last year 90,000 people stopped at the shores of Egypt, but only 4,000 went to Jerusalem. Of these 4,000, less than 1,000 went to the lake of Galilee where the most wonderful of Christ's works were performed.

"The most sublime view of the trip was in the Hymalayas, and the spectacle of the sunrise, turning the mountain tops from pink to pearl, from pearl to white, and then chasing the shadows down the mountain side, made us feel as if in the very presence of Jehovah.

"We saw some wonderful ruins, a great temple in Java, buried centuries ago by the Mohammedans and only uncovered by accident about 100 years ago, which deserves to be classed with the pyramids, the temple of Balbeck in Syria, the oldest place in the world where the sun has been worshipped, and the altar of heaven, in China where the Emperor annually offers up sacrifices for his people.

"The more I saw of the religion and philosophy of Confucius the less I thought of him. I used to have a high opinion of his teachings but I have lost my respect for them. I believe that the ideals of Confucius have been the cause of the stagnation of the Chinese nation for 2,000 years. His much vaunted golden rule, 'Do not unto others as you would not have others do unto you' inspires a negative life of inactivity, and his whole philosophy tends to make life a stagnant pool instead of a flowing stream.

"The ideals established by Christ, so simple as to be within the reach of all, and yet so lofty as to keep the noblest ever straining upward, contrast strongly with the ideals of Confucius and I believe that our civilization and advancement is due to our faith in this higher ideal.

"The greatest question before Japan today is whether she will, after adopting our customs and civilization adopt our religion, or whether she will try to build a civilization without a religion.

"I saw the great temple of the Taj Mahal, built by an Indian prince at immense expense for his wife's memory, but when I saw the destitution and the dense ignorance around it I could not but think of how much better it would have been had he spent the money for the education of the women of his country.

"The food and drink which we found on our trip was awful, bottled water being all we dared to drink, and at one place we were reduced to eggs, toast, and poor coffee.

"I felt that when I got home I should steer straight for the well, and stay there until I had drank all I wanted, and then I would go out and take off my my hat to the hens, for the boiled egg is the one thing that you can get the world around that tastes as it does at home. It is the one thing that makes the whole world kin.

"The men of Japan are adopting our costumes, but the women have not as yet, and after twenty-two years of married life, hooking and unhooking, buttoning and unbuttoning the American dress I must say that I admire the good sense of the women of Japan.

"We saw royalty in its highest and its lowest types. The Sultan of Sulu was the lowest and our visit to him was unique. Datto Piang gave us an interesting salute with guns. He had been told to use his own discretion as to the number of shots and we counted them.

"When he reached twenty-one, the presidential salute, I began to think the Moros had more intelligence than they had been given credit for—but he didn't stop there. Then I began to figure on a second term. We counted forty-two. But he didn't stop there either. Then I thought he must be a convert to the third term idea, but he kept right on up to 100 and I couldn't figure out anything from that.

"From what I saw of the Filipinos, I have decided that to help them is the only reason we could have annexed them as they are too helpless and ignorant to make money from, or to exploit.

"I spent a half hour with the czar of Russia and liked the science of government. From the way he has acted since, I guess I did not make the impression I had hoped. The fact that I spent a half hour alone with his majesty, however, ought to disprove the charges of being an anarchist which have been brought against me, for the czar certainly knows an anarchist when he sees one.

"I never felt such a complete idiot as when I went through the empty ceremony of bowing to the king of Norway. Mrs. Bryan says the king smiled when I bowed. I can't swear to that, but I can tell you one thing, he will smile if I ever do it again.

"I am glad we don't have such things as court presentations in our country. I am glad that we don't have hereditary rulers. I am glad we can take a man from the ranks and put him in the highest position in the country and then drop him when we are through with him, even if we do sometimes drop him before we put him up.

"I found President Roosevelt spoken of in the highest terms throughout the world. His action as a peacemaker in the recent war between Russia and Japan is lauded everywhere. He, by that act, has raised our nation to a higher level than she could have ever gained by conquest, and the greatest credit is due him for it.

"My trip left me convinced that our nation leads the world in every respect. Our women are higher, and labor is more respected here than anywhere else on earth. And both of these classes deserve their condition here.

"Any young man should be ashamed to sponge on the world for a living and not give anything back to the world."

"I believe that the destiny of the United States is to impress the world, not by the immense quantity of its exports, but by the examples of perfect manhood which it sends into the world. Not by the products of its schools and factories, but by the products of its schools and colleges and its churches. If any American girl in this audience ever cherished an ambition to marry a foreigner, titled or untitled, I tell you that a good, clean, upright American will make a much better husband.

"The destiny of the United States is to impress the world with its splendid example, not by force or violence, but by an example of high living and perfect civilization, which must in the end draw all the nations to follow it."

ENTERTAINED BY T. T. HUDSON

Bryan Guest of Honor at National Committeeman's Home.

William Jennings Bryan was given an informal reception at the Commercial club yesterday afternoon, and following this was the guest of honor at a dinner at the home of National Committeeman T. T. Hudson. All the other guests were from out of town. Even the closest political friends of Mr. Hudson and Mr. Bryan in Duluth were not on hand.

Being in a private house, there was no opportunity for a large crowd, such as might have been expected at a hotel, and the men invited were only those who had traveled long distances in order to be able to be with the Nebraskan on the occasion of his lecture in Duluth. Their names are: T. J. Knox, Jackson, Minn.; H. L. Buek, Winona, Minn.; D. B. Evans, Tracey, Minn.; Frank Larabee, Minneapolis; L. M. Davis, Long Prairie, Minn.; James R. Bennett, Jr., St. Cloud; Charles E. Vasaly, Little Falls, Minn.; F. A. Pike, St. Paul. Bert Fesler of Duluth was not present, as was reported.

Mr. Bryan was greeted by a large crowd at the Commercial club reception. He finally became so tired standing and shaking hands that he settled himself comfortably in a big chair, and did his talking from there. He entertained the group gathered around with stories of his trip around the world, and a conversation on topics in general. There was little of the political in his talk. Prominent among those at the reception were: T. T. Hudson, C. O. Baldwin, Mayor M. B. Cullum, Bert Fesler and P. McDonnell.

STEPHENSON IS IN THE LEAD

Said to Have Practically Clear Field for Senatorship.

Milwaukee, March 6.—It was decided yesterday that the election by the legislature to fill the Spooner vacancy will be held March 26, leaving only three weeks for any contest.

But there will be no contest. Isaac Stephenson of Marinette, the millionaire banker, will be elected for the unexpired term. He wants no more than that.

Interviews with Charles F. Pfister and other leaders show that Stephenson has a clear track, and that the brunt of the fight will come when a full term election is held in two years. Stephenson was a congressman once. He alone has announced his candidacy for Spooner's seat. Others mentioned are withdrawing.

A report was current that La Follette would consent to the election of Stephenson, as he is under tremendous obligations to the millionaire lumberman.

A combination of La Follette and Stephenson forces would doubtless result in the election of the Marinette man. There are 103 Republicans in the legislature, seventy-two being sufficient to control the caucus to decide on the party candidate. La Follette is credited with controlling about twenty-five and Stephenson thirty.

If La Follette should throw his support to some other man, as for instance to former Speaker Lenroot of Superior, whom he tried to have nominated for governor last year, there would be the liveliest kind of a fight over the election and in that event, Lieut. Governor Connor, who is a multimillionaire, would be a formidable candidate.

AN ANSWER TO CRITICISM

On Administration of Forest Reserves Made by Pinchot.

Washington, March 6.—Just what is intended to be done in the administration of the national forests, which includes the 17,000,000 of acres recently added to this domain, was set forth yesterday by Gifford Pinchot, chief forester. The statement is in reality an answer to many points of criticism made in congress during the debate regarding forest reserves indulged in during the latter part of the session. It supplements the president's statement regarding his order creating the new reserves. The statement follows:

"National forests are created with the main object of using all their resources in the wisest way. Everything is for use, the timber, the range, the water, the land. Only those lands chiefly valuable for the production of timber or the protection of the water flow are included in the national forests. Little patches of agricultural land, small mountain meadows and very inconsiderable areas of open grazing land must necessarily fall within their boundaries. All such tracts where cultivation is possible are being classified and are passing into private ownership through the act of June 11, 1906, which is an extension of the homestead law, to the national forests.

"The miner is better off in a national forest than on the unreserved public domain. The mineral laws apply in precisely the same way. The prospector can explore and locate his claims without the slightest restriction.

"All timber and wood in the national forests is for use, and for prompt use. It is sold to the small men and to the big men. Everybody who needs timber to establish his home gets it free of charge when he asks for it. In the sale of timber there is no chance for monopoly, for the secretary of agriculture can sell as much or as little as he pleases to whomever he pleases and for whatever price he deems fair for the best interests of all the people. The government gets a fair return for its timber, whereas before, under the timber and stone law, it practically gave it away and in such manner that it was monopolized in vast tracts by corporate interests. And after it was cut off the land was burned over and became a non-productive waste.

"The range is used for the grazing of live stock. On those national forests created after March 1, 1907, there will be no interference with the grazing industry. Nor will any grazing fee be charged during this season on those national forests or additions thereto created after March 1, 1907. All stockmen who have regularly used the range will continue to do so without any interference from the forest service.

"The land within national forests is freely open to use as sites for hotels, mills, residences, and all other legitimate purposes. The greatest possible use of the land is desired. All kinds of improvements are not only permitted but are decidedly welcomed."

HOLDS DOWN A CLAIM AT 80.

Octogenarian of Madella Leaves for His Homestead West of Pierre.

Madella, Minn., March 6. Samuel P. Driggers of this town, who is 80 years of age, took a homestead in South Dakota, west of Pierre, last fall, and left yesterday with a carload of household furniture and provisions, to commence actual residence on his claim. The place is fifty miles west from Pierre and fifteen miles from the nearest railway station.

The old gentleman is hale and hearty, although spare in flesh, and walks as sprightly as a man 40 years of age. He never used liquor or tobacco.

Someone is making his or her debut as a Herald want advertiser today. And—the ad. may be worth finding and answering.

Largest Talking Machine Dealers in Duluth.

VICTOR Talking Machines!

And a complete assortment of Victor Records.

The entire Victor family is represented—from the smallest Victor Junior Gramophone at $10 to the fine Victor Victrola at $200.

Have you one of these delightful home entertainers in your home? If not, you certainly are missing an unlimited amount of enjoyment, for nothing you could buy will give you the variety of delightful entertainment the Victor affords.

We invite your attention to

4 of Our Special Victor Combinations

Our $19.20 Victor Combi'tion

This combination consists of Victor Junior Gramophone, with exhibition sound-box and one dozen 10-inch Records.

TERMS: $4.00 CASH, $4.00 A MONTH, OR $1.00 A WEEK.

Our $24.20 Victor Combi'tion

This combination consists of Victor Machine Z—an excellent little machine and a good reproducer, and one dozen Victor 10-inch Records.

TERMS: $5.00 CASH, $5.00 A MONTH, OR $1.00 A WEEK.

Our $29.20 Victor Combi'tion

Consists of Victor Machine No. 1, fine oak machine with taper arm—Japanned brass-trimmed horn and one dozen 10-inch Records.

TERMS: $5.00 CASH, $5.00 A MONTH, OR $1.00 A WEEK.

Our $37.20 Victor Combi'tion

Consisting of Victor Machine No. 2—solid oak case—black Japanned horn with brass bell. A smooth running, clear reprodncing machine with one dozen 10-inch Records.

TERMS: $6.00 CASH, $6.00 A MONTH, OR $1.25 A WEEK.

EDISON Phonographs

and a complete assortment of all Edison Records.

If you prefer the cylinder Machine, you, of course, want the best, then see to it that your Machine bears the Edison "trade-mark."

The Edison is a splendid machine and Edison Gold Mould Records are superior to all other cylinder Records.

We invite you to visit our Talking Machine Parlors and hear these machines.

Our $14.20 Edison Comb'tion

Consisting of Edison Gem Phonograph—and at its price is the best Phonograph on the market.

It is made of metal throughout and the Edison guarantee goes with it. This machine and one dozen Edison Gold Mould Records—$14.20.

TERMS: $4.00 CASH, $4.00 A MONTH, OR $1.00 A WEEK.

Our $28.20 Edison Comb'tion

Consisting of Edison Standard Phonograph—a fine quartered oak cased machine—plays four records with one winding—a first-class machine and a fine reproducer. This machine with flower horn, crane and one dozen Edison Gold Mould Records—$28.20.

TERMS: $5.00 CASH, $5.00 A MONTH, OR $1.00 A WEEK.

Our $38.20 Edison Comb'tion

Consisting of Edison Home Phonograph—an ideal phonograph for the home—fine oak cased machine—will play six records with one winding. This fine machine with flower horn, crane, reproducer and one dozen Edison Gold Mould Records—$38.20.

TERMS: $7.00 CASH, $5.00 A MONTH, OR $1.00 A WEEK.

Our $58.20 Edison Comb'tion

Consisting of Edison Triumph Phonograph—an excepionally fine machine—fine quartered case—plays fourteen records with one winding. This fine machine with reproducer, flower horn, crane and one dozen Edison Gold Mould Records—$58.20.

TERMS: $10.00 CASH, $6.00 A MONTH, OR $1.25 A WEEK.

THE CHANGE OF LIFE

Sensible Advice to Women from Mrs. Henry Lee, Mrs. Fred Certia and Mrs. Pinkham.

MRS HENRY LEE MRS. FRED CERTIA

Owing to modern methods of living not one woman in a thousand approaches this perfectly natural change without experiencing a train of very annoying and sometimes painful symptoms.

This is the most critical period of her whole existence and every woman who neglects the care of her health at this time invites disease and pain.

When her system is in a deranged condition or she is predisposed to apoplexy or congestion of any organ, the tendency is at this period likely to become active and with a host of nervous irritations make life a burden. At this time also cancers and tumors are more liable to form and begin their destructive work.

Such warning symptoms as sense of suffocation, hot flashes, headaches, backaches, melancholia, dread of impending evil, palpitation of the heart, irregularities, constipation and dizziness are promptly heeded by intelligent women who are approaching the period of life when this great change may be expected.

Mrs. Fred Certia, 1014 So. Lafayette Street, So. Bend, Ind., writes:

Dear Mrs. Pinkham:—

"Lydia E. Pinkham's Vegetable Compound is the ideal medicine for women who are passing through Change of Life. For several months I suffered from hot flashes, extreme nervousness, headache and sleeplessness. I had no appetite and could not sleep. I had made up my mind there was no help for me until I began to use Lydia E. Pinkham's Vegetable Compound, my bad symptoms ceased, and it brought me safely through the danger period, built up my system and I am in excellent health. I consider Lydia E. Pinkham's Vegetable Compound unsurpassed for women during this trying period of life."

Mrs. Henry Lee, 60 Winter Street, New Haven, Conn., writes:

Dear Mrs. Pinkham:—

"After suffering untold misery for three years during Change of Life I heard of Lydia E. Pinkham's Vegetable Compound. I wrote you of my condition, and began to take Lydia E. Pinkham's Vegetable Compound and followed your advice, and to-day I am well and happy. I can now walk anywhere and work as well as anyone, and for years previous I had tried but could not get around without help. I consider your medicine a sovereign balm for suffering women."

Women passing through this critical period should rely upon Lydia E. Pinkham's Vegetable Compound. If there is anything about your case you don't understand write to Mrs. Pinkham, Lynn, Mass., for advice. It is free and has guided thousands to health.

When a medicine has been successful in restoring to health, actually thousands of women, you cannot well say without trying it, "I do not believe it will help me." It is your duty to yourself and family to try Lydia E. Pinkham's Vegetable Compound.

REALTY MEN STAND PAT ON RAILROAD FRANCHISE

They Still Insist on Including the Assessment Clause.

Will Offer Steel Plant Experts Every Possible Assistance.

The Duluth Real Estate exchange will do everything in its power to assist the city council in adjusting the matter of franchising the Wisconsin Central railway, relative to entering Duluth, without waiving the matter of the street assessments, according to a resolution adopted at a meeting of the exchange held yesterday afternoon.

At this meeting it was also resolved that members of the Real Estate exchange as individuals, and the organization as a whole, assist the United States Steel corporation in every way possible in the location of a steel plant in the vicinity of Duluth, and that every real estate man should do all in his power to keep prices of real estate that may be needed by the corporation at the lowest reasonable figure. This resolution was carried unanimously, the real estate men feeling they can afford to sacrifice all profits at the start in order to secure so important an institution for the city.

The resolution relative to the railroad proposition directed the secretary of the exchange to advise the city council that the committe of the exchange in charge of the Wisconsin Central matter, will be pleased to assist them in every way possible toward the adjustment of the franchise question, without waiving the street assessments, as explained above.

The members of the organization are as anxious as anybody to see the Wisconsin Central enter Duluth, but they still feel it would be an injustice to allow the road a right-of-way through the city without a provision to the effect that the road should stand its share of street assessments, and will fight any suggestion to the contrary.

The resolution of yesterday is a result of the resolution from the public affairs committee of the Commercial club read before the council at the last meeting, to the effect that steps be taken to patch up the break between the railroad company and the city. It is explained on behalf of he public affairs committee that it is merely the desire of members of the committee to have the difficulty adjusted one way or the other, as soon as circumstances will permit. The committee has no suggestion to make, and does not urge a compromise with the Wisconsin Central, as some people seem to believe. It suggests that all parties interested get together and come to some definite agreement on the proposition, offering the use of the Commercial club rooms for that purpose.

Probably a meeting of the public affairs sub-committee, the committee from the Real Estate exchange, a committee from the council, and representatives of the railroad company, will be called within the next week or two to see if the city and the railroad company cannot get together on the franchise question.

It was further decided that the exchange issue a book setting forth the advantages of Duluth. The book will be owned, issued, distributed, and no one righted by the exchange, and no one else will have a hand in it. It will be issued as soon as the proper material can be gotten together.

BREAKING INTO SOCIETY

Trombly Was Making Hit as College Boy in Dakota.

Had Been Out of Reformatory One Year When Arrested.

Under the able chaperonage of Chief Troyer, Fred Trombly, accused of stealing $500 from the safe in Lawrence's saloon on the Bowery last Friday night, returned to this city from a short visit in Grand Forks last evening, and having waived examination in the municipal court, will make his next appearance before the grand jury now in session.

Trombly had just two days good time after skipping with the coin, and was posing as a "rah-rah boy" from a Montreal college before the good people of the Dakota town. The chief says that if he had not arrived just as he did, Trombly would have been a member of the 400 of Grand Forks, but that his drop was sudden and hard.

Yesterday, by a series of coincidences, was Trombly's birthday, and is also the first aniversary of his release from St. Cloud, where he was serving a sentence for incorrigibility. He was sent to Red Wing first, but became too unruly for the juvenile institution and was shipped from there to St. Cloud where he was kept until 21, a year ago yesterday.

He is claimed to have secured the money while using the telephone on top of the open safe in a room adjoining the bar. When arrested at Grand Forks he had spent $198 of the money on a ticket to Seattle, with stop over privileges, for new clothes, and in sustaing his position as a Montreal college sport. He had $302 still with him in a sack belonging to the saloon man, and in which the money was when he stole it.

He has admitted the charge to Chief Troyer, and will in all probability plead guilty of the charge of first degree larceny.

FRENZIED CLERK STARTS OUT TO KILL THREE PEOPLE

(Continued from page 1.)

serious intent and shows that it was not poor marksmanship that sent the bullet into Miss Butchart's head.

The Letter.

Following is a copy of the letter found on him:

"Dr. McCuen, coroner—Dear Sir:

"I write this letter to let the public know the whole truth of our trouble between my wife and myself. We had a little spat at times. Nothing to amount to much, but the same as every couple has; but we got along all right until her sister Agnes and Bessie Butchart got started, and I believe they are the ones that got her to leave me. Neither of them ever liked me. Her sister and I fought against me all the time I was going with her, about two years, and Bessie Butchart never was a friend of mine, and I think the two of them got in with her and got her to leave me, and there may be others, but I don't blame anyone but those two girls. Now, I have decided to stop our trouble in this way. I am going to see her and try and get her to come back and see if we cannot live happy together. I will do all in my power to bring about peace between us, and if I cannot, then I am going to shoot my wife and Bessie Butchart if I can, and then end my own life.

"I would like to shoot Agnes too, and I will if I can get a shot at her, for she is the main cause of all our trouble.

"The only ones I want to shoot are: Bessie Butchart, Agnes Lavalle, my wife, and myself, then that will end all of our trouble.

"There is one thing I would like to tell the public that is to never come between man and wife in any way. For there is sure to be trouble and you never can tell how it will end, perhaps the same as ours did. Always leave man and wife alone and let them do the best they can; they can get along better without your interference every time.

"Send my body to Durkin & Crawford's morgue and all the rest that I kill if you wish so good by to the whole world for the last time.

"FRED M. ARGYLE.

"Flat 13, Twelfth avenue west, the 9th."

Condition Unchanged.

Miss Butchart's condition this morning was practically unchanged since the latest reports last night. She has been kept under the influence of opiates and has not been conscious more than a few minutes at a time.

The ball entered her head through the left temple and glanced slightly and ploughed its way to a spot just back of the left eye. It still remains in this position as the physicians feared to perform an operation for its removal as Miss Butchart has a weak heart and it it was thought the shock of the operation might make her condition worse. It was the intention of the doctors to remove Miss Butchart to one of the hospitals today and remove the ball but unless her condition improves by this afternoon it is doubtful if the operation is performed today.

When seen this morning Miss Butchart's father stated that Argyle did not reach his wife and strike her after the shooting. Mr. Butchart said that after he heard the shot he ran to the door of his home and saw Argyle chasing his wife. Mrs. Argyle tripped in the snow, however, and was not knocked down by Argyle.

Story of the Shooting.

Mr. and Mrs. Argyle and Miss Butchart are all employed at Panton & White's store and the two ladies were returning home from work last evening when Argyle joined them after they left the car. He was walking along behind them when the shooting occurred and after some words with his wife as to her returning to live with him is said to have cried: "You will never cross that railroad track alive!" and to have fired. The bullet, whether intended for Miss Butchart or not, hit her and she fell with a scream. Mrs. Argyle started to run and he fired three shots after her, which owing to the fact that he was running, did not take effect. He overtook her, pushed her into a snow drift and fired a fifth shot, miraculously missing her again, and as he was evidently anxious to save the sixth shot for himself he then fled as several persons had appeared upon the scene.

From the letter it is apparent that he had been trying all night to make up his mind to kill himself without success. When asked why he did not carry out his threat he said nonchalantly:

"Oh, I changed my mind."

Argyle Unconcerned.

Argyle does not seem at all disturbed by his terrible deed and was quite calm and cool at the station this morning. He refused absolutely to talk, saying that the letter told all.

When asked why he chose last evening for the deed, he said:

"I will tell you about that later."

He also sent a letter to Jacob Johnson, an employe of Bayha & Co., willing all his possessions, including two good-sized bills for a heating stove and an installment plan purchase to him.

The Argyles have been married about nine months and during the time have separated twice. Argyle is said to have driven his wife out of the house on the last occasion and since that time has been stopping with her friend, Miss Butchart.

Joe Parker, who also boards at Butchart's, was with the party at the time of the shooting, but escaped with two bullet holes in his coat.

TO REPRESENT AUSTRIA.

Vienna, March 6.—It is reported that Admiral Von Spaun, who presided over the international commission at Paris, which inquired into the circumstances attending the firing on British fishing boats in the North sea, Oct. 22, 1904, by Admiral Rojestvensky's fleet, will represent Austria-Hungary at The Hague peace conference.

JEROME FINISHES THE CROSS-EXAMINATION OF ALIENIST, DR. WAGNER

(Continued from page 1.)

rounding the killing of Stanford White, there was anything to enable the witness to differentiate between insanity and intoxication?

Dr. Wagner declared there was nothing whatever to indicate intoxication, and much to indicate insanity.

Dr. Wagner further testified today that Thaw was of unsound mind when he married, but had sufficient intelligence to know what he was doing.

New York, March 6.—"Battling" Nelson, the pugilist, was the center of attraction in the courtroom where Harry K. Thaw is on trial for his life today, occupying the entire attention of the spectators up to the time the defendant was called to the bar and Justice Fitzgerald had taken his place on the bench. Nelson was accompanied by his manager, William Nolan, and they occupied seats just behind the prisoner. In anticipation of a continuance of the expert testimony there were many empty seats in the courtroom today.

Thaw again came to court laden down with letters which continue to come to him from all quarters of the globe. Most of the letters are in praise of the defendant, and he manifestly takes great satisfaction in reading them.

Dr. Charles G. Wagner of Binghamton, N. Y., was again called to the stand, and District Jerome began to ply him with questions regarding Thaw's will and codicil.

Dr. Wagner said he believed that when Thaw wrote the section of his will, providing for a fund for the prosecution of any one who might take his life, his mind was clouded, and he did not have as clear an idea of such matters as a man who was wholly sane, but enough to be able to appreciate that the taking of a human life was a crime.

"Doctor, when this defendant stood up to be married on the same day that will was signed, did he know what he was doing?" asked Mr. Jerome.

"I don't think his mind was entirely clear."

"Was it clear enough for him to understand he was getting married?"

"Yes, he understood it."

After questioning Dr. Wagner at some length regarding the letter written by Thaw in 1905 to Attorney Longfellow, Mr. Jerome suddenly asked:

"Was there any period, doctor, between 1903 and 1905 when this defendant was in full possession of his faculties?"

Dr. Wagner hesitated a moment and then replied:

"There are several months in that period of which I have no record. It is possible that there may have been recovery during that time and a condition of soundness."

Mr. Jerome took up a number of works by various authors on psychiatry and asked Dr. Wagner's opinion of the works and the writers. For half an hour this line of questioning was kept up. Dr. Wagner acknowledged that most of the authors noted were learned men. Following this Mr. Jerome returned to Thaw's letter. In explaining that a man might be insane and still have a working knowledge of many matters, Dr. Wagner said that in the institution of which he is superintendent he has a patient who, although the most insane man he has ever seen, is a good shoemaker. One of the delusions which would affect him three or four times a day, is that people who are hundreds of miles away are eating something that causes him nausea.

A tall man with gray hair and a small gray mustache created something of a stir in the courtroom by suddenly slipping into one of the vacant chairs at Thaw's counsel table and engaging the defendant in earnest conversation. A court officer moved toward the table, but Attorney O'Reilly interposed himself between the prisoner and the newcomer, who arose, shook Thaw's hand cordially and left the courtroom. It was explained later that the man was from Pittsburg and had been a close friend of Thaw's father. The defendant would not divulge the name. He seemed glad to see his visitor and smiled several times during their hurried conversation.

After finishing with his questions based on Thaw's letters, Mr. Jerome asked Dr. Wagner:

"Do you know a disease known as circular insanity?"

"Yes," replied the witness.

"Is reasoning in a circle a sign of circular insanity?"

"I don't know what you mean by reasoning in a circle."

"The kind of reasoning you have been doing."

Mr. Delmas at once objected and asked that the remarks be stricken out.

Mr. Jerome settled the matter by withdrawing the remark.

The prosecutor next took up the events on the Madison Square Roof garden the night Thaw shot and killed Stanford White. He asked the witness if the separate acts of the defendant that night indicated insanity.

"Taken in connection with all that has been established here," said Dr. Wagner, "they indicate to me that the defendant was insane. He may have had automatic knowledge as to firing the pistol, and he may have had sufficient intelligence to know he was causing annoyance by blocking the way to the elevator after the tragedy, but these facts do not show he was sane."

Mr. Jerome next asked Dr. Wagner: "Would your opinion as to the defendant's condition be influenced if you knew that he had taken a large amount of liquor that afternoon?"

"I would want to know how much he had taken."

"Men who have been insane are still susceptible to liquor during lucid intervals, are they not? There is nothing in the diseases which would make them immune to the effect of liquor, is there?"

"Nothing that I know of."

"Is there anything in the hypothetical question that enables you to tell whether the defendant was insane or drunk?"

"There is nothing whatever in the question to indicate intoxication, much to indicate insanity."

MUSIC AND THE DRAMA

TONIGHT'S ATTRACTIONS.

LYCEUM—"The Red Feather."
METROPOLITAN—Burlesque.
BIJOU—Vaudeville.

"THE RED FEATHER."

Miss Cehridah Simpson, who is to appear in the title role of the comic opera "Red Feather," tonight, was during the past summer, the star of "Seeing New York," the hot weather musical review arranged by W. A. Brady and Joseph Hart of the New York Theater Roof Garden.

The sum of $72,000, was expended upon the production by Florence Ziegfeld, Jr. and it is probably the most elaborate of any of the long list of musical comedies.

"THE HAM TREE."

One of the most delightful hits in Klaw & Erlanger's production of "The Ham Tree," in which they are starring McIntyre and Heath this season, is the clever work of W. C. Fields, the tramp juggler, who plays the role of "Sherlock Rattles." He does the funniest tramp juggling act on the stage and introduces his tricks throughout his part as the amateur detective. He juggles everything in sight. Mr. Fields excels in comic make-up and his easy manner and laughable pantomine greatly strengthen a most interesting character.

MYSTERY AT THE BIJOU.

The Great Caesar & Co., at the Bijou this week, are giving a most mysterious performance, and one that is almost uncanny in its nature, so unexpected and sudden are some of the feats performed. It is causing no little comment among those who have witnessed it.

DEER RIVER IS LIVELY PLACE

About 10,000 Men Working in Neighboring Lumber Camps.

Deer River, Minn., March 6.—(Special to The Herald.)—Deer River is about the liveliest town along the line of the Great Northern railway from Duluth westward to Bemidji and the healthy business condition that prevails here now is a permanent thing, as the source of Deer River's prosperity is almost inexhaustible and when the country about this place is more densely populated the present timber industry will be succeeded by farmers and dairymen.

During the present winter, this village is the hub of logging operations of a huge character in the Big Fork country, the only outlet of which is the Minneapolis & Rainy River railroad, an enlargement of the old Itasca Logging company's line, this place being the terminus of the road, which extends northward about fifty miles to Big Fork, with numerous branches which run from the main line into the stands of timber which are being logged. The Itasca Logging company, Dempsey & Daugherty, Pillsbury, Carpenter-Lamb and other jobbers have a large number of camps, along this railway and its numerous branches, and a conservative estimate places the number of men employed in the camps at over 10,000. Many millions of feet of pine and other variaties of timber are being logged in the north country, and the camps where the logging is being done are supplied from this city, which is a great item in the business of the village. Much of the timber will be manufactured in the local mill, while a large portion of the logs will be railed to this place, dumped into the Mississippi river and driven out of the country, to be manufactured at Minneapolis or some point further down the river. Besides the logging, there are a large number of settlers adjacent to this railroad who do their trading in Deer River. The land which is being cut over has been proven to be among the very best for agricultural purposes to be found in the state, and the future of this north territory as a farming center is of the brightest.

The village of Deer River is growing steadily in poulation, and is improving greatly from a moral standpoint. The population of this place last May, according to a census which was taken at that time, was 750, and it is estimated that the number has been increased by fully a hundred more since that time; and this in addition to a certain floating class that call this place their home, but are here only a few months in the year.

The moral tone of Deer River has improved much for the better during the past four years. Like all frontier towns, where the country is unsettled, this place was a rather lax community, morally, for several years, but this condition has given away to a much healthier tone and the village is a very desirable place in which to live. The residents of the village, for the most part, own their homes, and are of a thrifty class.

The village owns its own system of waterworks and has the best of fire protection, with an up-to-date set of fire apparatus and a well-organized fire department. There is a village hall and an excellent pumping station.

The business men of Deer River are of the substantial kind, who own their stores and places of business and have demonstrated their confidence in the place by investing liberally in various lines.

Deer River can boast of two of the best hotels in the north half of the state, the European hotel and the Hotel Mohr. Both hotels run restaurants in connection, and there are four other hotels and restaurants in town.

The Deer River Lumber company owns and operates a sawmill on the banks of White Oak lake, half a mile from the business center of the village. This mill handles all kinds of timber, including pine, tamarack, cedar and all kinds of hardwood. There is in the plant one large band and a resaw, a post-splitting machine and a tie machine, and the company makes a specialty of handling the cedar of the homesteaders in the north country and others. There are excellent booming facilities. The mill has a capacity of about 40,000 feet per day, besides the products of the post and tie machines.

The village of Deer River has for its residents a hustling class of people who would succeed in any country and against any adverse conditions. The village is well conducted, there being the best of order and a method in vogue of treating the lumberjack that insures his return to Deer River, which he calls his home when not in the woods.

LOST SOLON FOUND.

Milwaukee, Wis., March 6.—Assemblyman Falvey of Marinette, who disappeared last week in this city, was found at noon yesterday in a sanitarium here. He is said to be very ill.

THE ALDRICH BILL.

Comptroller of Currency Explains Some of the Provisions of Measure.

Washington, March 6.—The comptroller of currency has issued the following statement:

A great many inquiries have been received in regard to the effect of the so-called "Aldrich bill," on the deposit of lawful money, withdrawal of bonds, and retirement of circulation.

The act of March 4, 1907, makes no change in the terms or the wording of the law, as it has stood for many years, except to require the consent of the comptroller of the currency and the approval of the secretary of the treasury and to increase the maximum limit of retirement per month from $3,000,000 to $9,000,000.

Secretary Cortelyou has advised the comptroller of the currency that he will approve the applications to retire up to $9,000,000 for the month of March. It will doubtless be the policy of the department to approve applications for subsequent months, unless some important reason should arise for limiting them.

MAY BE ONLY A JOKE.

Frivolous View Taken of Gigantic Steal in Chicago Sub-Treasury.

Chicago, March 6.—No irregularities had been discovered in the cash of the sub-treasury at the close of the first day of the official count by the four experts sent to Chicago by the United States treasury. The count will take about two weeks. The government's object is to ascertain whether more than $173,000, for which the secret service department is unsuccessfully searching, has disappeared.

One of the theories upon which the government authorities have worked industriously is that the money was taken from Fitzgerald's own cage by some ill-advised practical joker among the eight or nine persons who had access to the department, and who is now afraid to confess. It has been learned that on several previous occasions money was taken from Fitzgerald's cage as a jest and restored later, after Fitzgerald had worried sufficienty to satisfy the practical joker.

PIANIST'S LOVE AFFAIR.

Will Take Bride in Few Days Because Love Dictated.

London, March 6.—Mark Hambourg, the pianist, will wed Miss Dorothea Muir-Mackenzie, who is clerk to the crown in chancery and with whom are entrusted all English voting papers.

The story of the meeting of the pianist and Miss Muir-Mackenzie is as romantic as the most fanciful of musicans could desire. Miss Muir-Mackenzie is an amateur violinist of more than customary ability, who studied under the great Ysaye. During the summer, when the musical season is dormant—save at the seaside—Ysaye generally receives at his Godinne residence, and instructs a few highly favored pupils, and at the same time plays the host to a few personal friends. Two years ago, in that Belgian salon, Jan Hambourg—Mark's brother—and Miss Muir-Mackenzie studied their Beethoven and their Schumann together, prior to the arrival of Mark on a friendly visit. The pianist and his future bride were introduced to one another by Jan, who has taken a keen delight in bringing about the happy result.

TOT BRAVES DANGERS SEARCHING FOR SANTA.

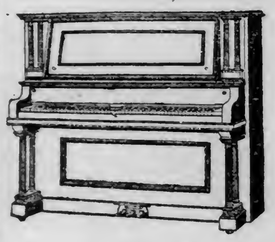
Chicago, March 6.—A search for Santa Claus in the downtown district involved little Howard Noonan, 3 years old, 5533 Morgan street, in a long trip and in street dangers from which he escaped almost miraculously.

Howard asked permission in the morning to take a ride on his tricycle, saying he wanted to ride down town. His mother thought he was joking and told him not to ride far. When he had not returned at noon, she became alarmed and started in search.

The police found the little lad at Twenty-sixth and Wallace streets. He had ridden nearly fifteen miles and had crossed twenty car tracks safely. He explained that he had started out on a hunt for Santa Claus. He remembered seeing a Salvation Army Santa Claus down town at the holiday season and he thought he still might find him down town.

French & Bassett DULUTH, MINN.

Reliable Piano Dealers



Great Piano Bargains!

Mahogany Upright Piano $125

Handsome case, fine tone and action, good as new—$10 cash and $5.00 a month.

Handsome Walnut Upright Piano $145

Very fine tone, perfect condition—$10 cash and $5.00 a month.

New Upright Piano $165

Elegant mahogany case and mandolin and harp attachment—$10 cash and $6.00 a month.

Headache and Sleeplessness

MRS. G. W. RORER.

Mrs. G. W. Rorer of Rockville Center, L. I., suffered so from headaches and nervous trouble that she could not sleep.

She has failed to derive any benefit from the many other remedies she tried. She has been completely cured and restored to health, and now enjoys restful sleep, thanks to DUFFY'S PURE MALT WHISKEY.

Mrs. Rorer is 64 years of age and cannot say too much in praise of this great family medicine.

"I have been a constant sufferer from headache and nervous troubles, sometimes lying awake at night. I saw your advertisement in the paper and made up my mind to try your medicinal whiskey, and it did me so much good that I continued it, but now only take it in the evening and at noon time. I think that it is better than any medicine I can get. I have not had the doctor once since I commenced using it. I thank you again and again for the good it has done me. My age is 64 years."—MRS. G. W. RORER, Rockville Centre, L. I., Dec. 3, 1906.

The above unsolicited testimonial of Mrs. Rorer is similar in its words of praise to many letters received daily from men and women throughout the world, in all walks of life, who have been permanently cured by DUFFY'S PURE MALT WHISKEY, the greatest of all medicines.

Duffy's Pure Malt Whiskey

is recognized everywhere as the unfailing specific for the cure of consumption, nervousness, typhoid, malaria, every form of stomach trouble, all diseases of the throat and lungs, and all run down and weakened conditions of the brain and body. It restores youthful vigor to the old by nourishing and feeding the vital forces of life, and maintains the health and strength of the young. It is a food already digested. It is prescribed by doctors of all schools, is used in all the leading hospitals of the world, and is recognized as a family medicine everywhere. It is absolutely pure. Medical advice and a valuable illustrated booklet on diseases sent free. Our guarantee is on every bottle.

Duffy's Pure Malt Whiskey is sold by all first-class druggists, grocers and dealers, or direct, in sealed bottles only. Price, $1.00. See that the "Old Chemist" trade-mark is on the label. Look for it carefully and refuse substitutes. It will cure you after all other remedies have failed. Duffy Malt Whiskey Co., Rochester, N. Y.

THE DISTANCE TARIFF BILL.

Judging from the arguments that have been made on both sides before legislative committees about the so-called "distance tariff" plan of regulating railroad rates, it is one of those common theories that sound beautifully when presented in a well-rounded plea, but which do not bear the test of practicability quite so well.

It sounds well enough to say that railroad rates should be based on distance; that the railroads should not have the power to build up large cities by favorable differentials; that large terminals should not enjoy discriminatory privileges in rates over smaller cities that are struggling to become large ones; that even if a distance tariff would tear down the large terminals and scatter the population it would be a good thing because the laborers are not happy or well-situated in the great cities.

All of this has a pleasing sound in the ears of those who have been converted to the beauties of the distance tariff plan, but it must be remembered that the change proposed is about as radical as any that could be devised; that it contemplates vast shiftings in the centers of population; and that it might involve destroying the great terminal markets, which are a distinct and even necessary advantage to producers that wish to sell their products.

Furthermore, the "distance tariff" bill now before the legislature, the Cashman bill, is not a distance tariff measure anyway. It has been based on the Iowa distance tariff, but where Minnesota rates are lower than they are in Iowa, which occurs frequently under the new schedule of rates recently made by the Minnesota railroad and warehouse commission, the lower rates are used in the bill, thus destroying the distance tariff idea as effectually as it would if they were higher than the Iowa rates.

In short, the scheme is largely a theory, with questionable results. It is an experiment, and it should not be entered into hastily and without the deepest consideration. Those who fancy that it is only the large cities that would be harmed are in error. There are many small communities, at present favorably situated, that would be seriously harmed by the proposed readjustment of rates. Some of them would even be practically wiped out of existence if a strictly distance tariff schedule should result in making freight rates to such points much higher than they are to neighboring points, because of the difference in the rail haul distance to the terminal markets.

The plan may be all right, but there is nothing but theory to prove it. Its effects would be revolutionary, and if it should prove that they are generally harmful, instead of being beneficial, as the distance tariff advocates claim, those responsible for the enactment of the plan into law might have a hard time explaining to their constituents how it happened.

TWO GOOD ACTS OF CONGRESS.

In deciding almost at the last moment to increase the meager wages of hard-working letter carriers and minor postoffice employes and in enacting into law the La Follette bill limiting the hours of consecutive work of railroad employes to a maximum of sixteen, the late congress atoned in good part for its selfishness in voting future members fifty per cent increases in salaries and for refusing to take action on the Beveridge child labor measure.

The increase in the wages of the letter carriers who, more than any other class of men, are known to the people, because their daily visits bring missives and tokens of joy or sorrow to home and office and store, will be applauded with unselfish approbation by all of the citizens of every place of free delivery service. Certainly, if any class of public servants ever merited better pay, it is the mailmen and also the underpaid clerks in the postoffices.

The increase in the pay of the suburban carriers also is more than merited. No one, who has never been over the average route of a country mailman, especially in the West where the country roads are well-nigh impassable much of the year from snows in winter and rains in summer, can fully appreciate the difficulties of their tasks. All, however, may well imagine from the frequent bad condition of city streets what they must surmount on country roads.

Mr. La Follette's railway employes' bill is a two-edged sword that ought to make for more humane treatment of workmen by the soulless railroad corporations and also insure greater safety to the traveling public. No man, not even one with nerves of steel, can work over sixteen hours at a stretch without paying nature's penalty. No railroad train can be well guarded when the men in responsible places are worn out from the strain of long hours of service.

ERA OF BRAID COMING.

The grand mogul of fashion—the tailor who, from being the ninth part of a man, as the ancient saw has it, has become mightier than the mightiest "captain of industry"—has decreed not only that fat men must wear corsets, but that all men must have their new suits bebraided and befrogged in the most lavish style.

The braid habit to which it seems "mere men" are to be condemned is a most dreadful, really horrific thing as the fair sex who have had periodical attacks of it know to their pocketbook's cost and their own personal sorrow. The very best of braid looks bright and shiny when the rest of the garment shows some signs of wear but has not yet passed beyond the useful stage. The lower qualities fade about ten times as fast as the material to which they are attached and utterly spoil the apparel. All of it has the custom of ripping loose at the most unexpected times and in the most unexpected places.

Fashion, however, decrees braid and braid it must be, willy-nilly. Soon it will be plastered all over the noble masculine form. It will run over the shoulders, down the sleeves and all about the chest, until the civilian is as much befrogged as the general in full-dress uniform glory. It will go up and down the pantaloons until the business man looks like a middle-aged bellboy or a poor imitation of a bandmaster. It will entwine itself all about the waistcoat until, when the threads begin to break, it will put pockets to the bad.

And there are millions of kinds of braids—fantastic and frilly feminine, serpentine, insidious "soutache," wiggly, jiggly and embellished with dingbats and didoes and other horribly mysterious things. To all of these the tailor god condemns poor mortal men. Apparently there is no escape. So let us all resign ourselves with what grace we may to a bebraided and befrogged era or, if we have enough of them, to the wearing out of our old unstylish suits.

THE RETIRED SENATORS.

Of the thirteen members of the senate of the Fifty-ninth congress who will not be seen in the council chamber of the upper house in the Sixtieth congress, two—Messrs. Alger of Michigan and Mitchell of Oregon—were retired by death, one—J. R. Burton of Kansas—by criminal disgrace; one—Mr. Spooner of Wisconsin—by voluntary resignation; six—Messrs. Berry of Arkansas, Allee of Delaware, Blackburn of Kentucky, Millard of Nebraska, Dryden of New Jersey and Carmack of Tennessee—by the adverse actions of their own dominant parties; and three—Messrs. Patterson of Colorado, Dubois of Idaho and Clark of Montana—by political upheavals in their own states. To the six, may be yet added Mr. Wetmore of Rhode Island.

Of those who will no longer take part in the councils of the nation, four will be missed especially. These are Messrs. Spooner, Carmack, Blackburn and Dubois. The first named has been a Republican leader, a brilliant debater and a "thorn in the flesh" of the opposition for sixteen years. Mr. Carmack served only one term in the senate, but he won a high place for himself by his erudition and polished oratory, especially in the last congress. Mr. Blackburn served three terms in the senate, but not consecutively and, though he was not conspicuous of recent years, he was once known as the peer of any orator of the flowery South. Mr. Dubois was one of Idaho's first senators and has just finished his second term. He, too, is a finished and forceful orator and he has been conspicuous because of his unrelenting war on Mormonism.

Of the seven others who are still living and who go into more or less deserved retirement, Burton was succeeded for a few months by Mr. Benson who, in turn, is displaced by Mr. Curtis. Mr. Patterson made a not altogether enviable record for a time as a talker in and out of season, but restrained his ardor toward the last. Mr. Clark was never known for anything except his vast wealth from his copper mines, for he did not even attempt to make his mark as a statesman. Mr. Dryden was a consistent representative of the "vested interests" and, when that is said, his senatorial history is summed up. Mr. Berry, who served two terms, was safe, but too quiet for Arkansas. Messrs. Allee and Millard were senators and nothing more. Mr. Wetmore, whom Rhode Island is not likely to send back, is a multi-millionaire and has been a foil for Mr. Aldrich and that is all.

LOVE'S PITIFUL TRAGEDY.

"When you are 45, you will still be a young man and I will be an old lady."

These simple words, that marked the fearfulness of love of a young French woman of New York city whose life-long admirer was five years her junior, led to the sad climax of a suicide's grave for Jules Tusset, a bookkeeper, and the wrecking of the life of Augustine Dougour, who dared not trust to faithful love to see the object of its affection "ever young and fair."

Did the refusal of the girl, oft-repeated until despair ended all, indicate supreme self-sacrificing love that would not permit the younger man to join himself to a mate who would be fading or faded when he himself would be in the prime of life?

Or was not rather the refusal tinged with selfish fear and chilling calculation that could not, or would not, trust the loving husband to never see, through the eyes of true love, the advancing wrinkles on the feminine face while yet the masculine was unmarked by time's corroding finger?

Whatever may have been Miss Dougour's guiding motive, if she had sought for precedents to justify her in wedding, she might have found many. One of the most idyllic of loves was that of an Episcopal bishop of Maryland for a wife twenty-two years his senior. The life of the renowned Baroness Burdett-Coutts who married Ashmead Bartlett, an American many years her junior, was certainly serene and bright up to the very hour of her recent death. Hundreds of New York wives who are leading happy lives are over five years older than their husbands.

While as a rule, it is possibly not well for the wife to be older than the husband, yet, in such a case as that of Jules Tusset, who had loved from boyhood in France and had never wavered in his love, Miss Dougour made a terrible mistake, even if her refusal had not led to such a sad tragedy.

THE PASSING SHOW.

Goodly improvements in the Duluth-Superior harbor this year are certain now. President Roosevelt has signed the rivers and harbors bill.

* * *

E. H. Harriman says that he would undertake to build the Panama canal if he had a chance. Why not take him at his word and give him that chance?

* * *

General Grosvenor of Ohio "went down with colors flying." His last public act was to rake off $100,000 for a public building for his village of Athens.

* * *

A United States mail wagon has been stolen and looted on a Chicago street. One of these days a Chicago robber will run away with a skyscraper.

* * *

A town in Belgium proposes to have a dozen policewomen. Who says King Leopold's realm is not leading the new century new woman procession?

* * *

Will Harriman quietly pocket the $1,200,000 he has decided not to spend on a Union Pacific headquarters building "because of the recent action of courts and legislatures?"

* * *

The California papers are still waving the red flag of war. They are alone in their exercise. So long as it amuses them and Hobson and does no harm, they are welcome to keep it up.

* * *

Cortelyou's last work as postmaster general seems to have been intended to give his successor, George von L. Meyer, a right lively debut. The dismissal of 41 mail bag repair employes is likely to cause an especial ruction.

HOTEL GOSSIP.

A number of prominent Democrats of the state were in the city yesterday and last night with William Jennings Bryan. Among them were Judge Knox of Jackson, Minn.; C. E. Vasaly, Little Falls, Minn.; Frank Larrabee, Minneapolis; Judge H. L. Buck, Winona, Minn.; D. H. Evans, Tracey, Minn.; F. A. Pike, St. Paul; J. R. Beaumont, St. Cloud, Minn., and L. M. Davis, Long Prairie, Minn. Most of them were registered at the Spalding.

* * *

The new improvements which have been in progress at the McKay hotel for some time past are not yet quite complete. After a rest of a few weeks on the part of the workmen, a crew of men this week began their preparations for the laying of a tile floor. When this is down the hotel will be wholly ready for the summer tourist business.

Improvement work at the Lenox, St. Louis and Spalding hotels is progressing rapidly. All the new rooms at the Lenox will be in readiness for occupancy very shortly, and the work of enlarging the lobby by taking out the partition between the present lobby and the bar will be started.

Decorators are still much in evidence around the lobby of the Spalding, and have much work remaining to be done there. Up to the present time most of the improvement work at the St. Louis has been on the basement floor, and the guests haven't seen much of the workmen. Operations on the upper floors will start very soon, however.

* * *

A good story is told at the Spalding desk about the greeness of a new clerk that was taken on some time ago concerning matters about the hotel. The clerk in question was bright and quick to learn, but occasionally made mistakes that brought smiles to others about the lobby.

One day a patron of the Spalding approached the desk to register. The bookkeeper had the register down behind the glass partition, so that it did not occupy the usual place. The man dipped a pen in the inkstand then looked about for a place to put his signature. The book was nowhere in sight.

"Where's the register?" he demanded of the new clerk.

"We haven't any," said this individual. "We use steam heat here, and have nothing but radiators."

* * *

When people come here from distant points during the winter most of them are greatly disappointed if they do not find the weather bitterly cold, although, it it is cold, they kick vigorously because of it. The local hotel clerks are kept busy answering inquiries concerning the weather, and if Duluth has a nice day along in January, February or March, there are always a certain number of guests at the hotels who express their astonishment that Duluth can have anything but below-zero weather in the winter time.

The town seems to have the reputation of being the coldest place in the Northwest, and when any one comes here from the East or South it is with the expectation of being literally frozen to death. They want to be able to write to the people "back home," of the awful time they are having trying to keep warm, and rather regret it if they strike the Head of the Lakes when a thaw is in progress. In this event they have to draw upon their imaginations for sensational weather material for their letters, and some of the imaginations never fail in an emergency of this kind.

* * *

The Spalding hotel fireplace is an attraction during the winter that appeals strongly to many local people, as well as to guests at the hotel. Numerous stories are told in the light and warmth of the cheerful blaze. They cover a great range of subjects, and are of all varieties of goodness and badness. A Duluth young man was telling an experience he had on a sleighride one evening recently.

"When we started from town for Pike Lake it was snowing, but the weather was not very cold," he said. "Some of the wiser heads in the crowd were in favor of postponing the event until some more favorable night, but the majority was in favor of going ahead as originally planned. When the average person makes up his mind on a certain pleasure, you know, he is bound to have it, no matter what odds are against him. That is the way it was with us.

"Pike Lake, you must understand, is twelve or thirteen miles back over the hill from Duluth, and the roads are none too good at best. We really had no business starting out in a storm. Of course, we hoped to see it clear up, but instead of clearing up the storm became all the more violent, and the snow fell so thickly that we could see only a few yards in any direction. It drifted across the road and covered up all traces of teams that had passed that way before.

"The long and short of it is that we got lost. The driver unconsciously left the Pike Lake road and branched off onto another that led he knew not where. He did not discover the mistake until he had gone five or six miles out of the way, however. When he did learn that he had gone wrong, none of us had any idea where we were at, but it was decided that we proceed a little farther. Pretty soon the moon shone an instant through a rift in the clouds, and one of the boys spied a sign post about 200 yards off the road, apparently on another road.

"He volunteered to see what was painted on it, hoping to find where we were at by so doing. The snow was four feet deep on the level, and it took some little time for him to flounder over to the post. Once arrived there, he found that the reading on the board was hidden by the clinging snow. After much labor he managed to climb the pole and brush away the snow. This is what he read:

"'Buy your clothes at the —— store, Duluth.'

"After that we back-tracked until we struck the Pike Lake road."

Conner, Hibbing; E. D. McMell, Virginia; Mrs. W. Cass, Tower.

THE WEATHER.

Just a pleasant crispness in the early morning atmosphere but nothing like below zero cold and no northwest winds were what the people of Duluth found when they went out of doors for the first time today. The weather clerk who had been "hitting it off" unusually well recently seemed to have missed it this time by several degrees, but no one complained thereat. The sun rose early in a practically unclouded sky and its rays quickly put even the crispness to flight, making the major portion of the day ideally exquisite for early spring. If it were not for the snowbanks, the boys would be hunting up their balls and bats and making ready for spring sports. Last night's lowest temperature was 6 degs. and yesterday's highest was 24 degs. The weather man promises snow tonight and tomorrow with the lowest temperature tonight about 20 degs.

The sun set at 5:59 o'clock this afternoon and will rise at 6:28 o'clock tomorrow morning, again permitting practically all of the work of the city to be done without artificial light.

A year ago today was even warmer than today and was, if anything, more springlike though it was cloudy most of the day.

Says Mr. Richardson of conditions: "The Manitoba high pressure has moved to the Western Lake Region, causing colder weather in that section and the Ohio and Mississippi Valleys with zero temperatures in the vicinity of Lake Superior. The Eastern Ontario low pressure, as it moved eastward to the Middle Atlantic states caused snow or rain over those districts and portions of the Lake Region, while the disturbance central over California Tuesday morning has advanced to Wyoming. This latter has caused rain or snow throughout most of the Southwest and higher temperature in the Northwest. The further easterly movement of the Wyoming low pressure favors snow, rather moderate temperature and easterly winds in this locality during tonight and Thursday."

Following were last night's lowest temperatures; as recorded by the weather bureau:

Abilene	46	Medicine Hat	24
Asheville	39	Memphis	42
Atlanta	40	Miles City	32
Baldwinsville	4	Milwaukee	18
Bismarck	10	Minnedosa	0
Boston	22	Modena	30
Buffalo	18	Montgomery	50
Cairo	32	Moorhead	0
Calgary	24	New Orleans	60
Charleston	48	New York	26
Chicago	26	Norfolk	32
Cincinnati	26	Northfield	14
Concordia	36	North Platte	32

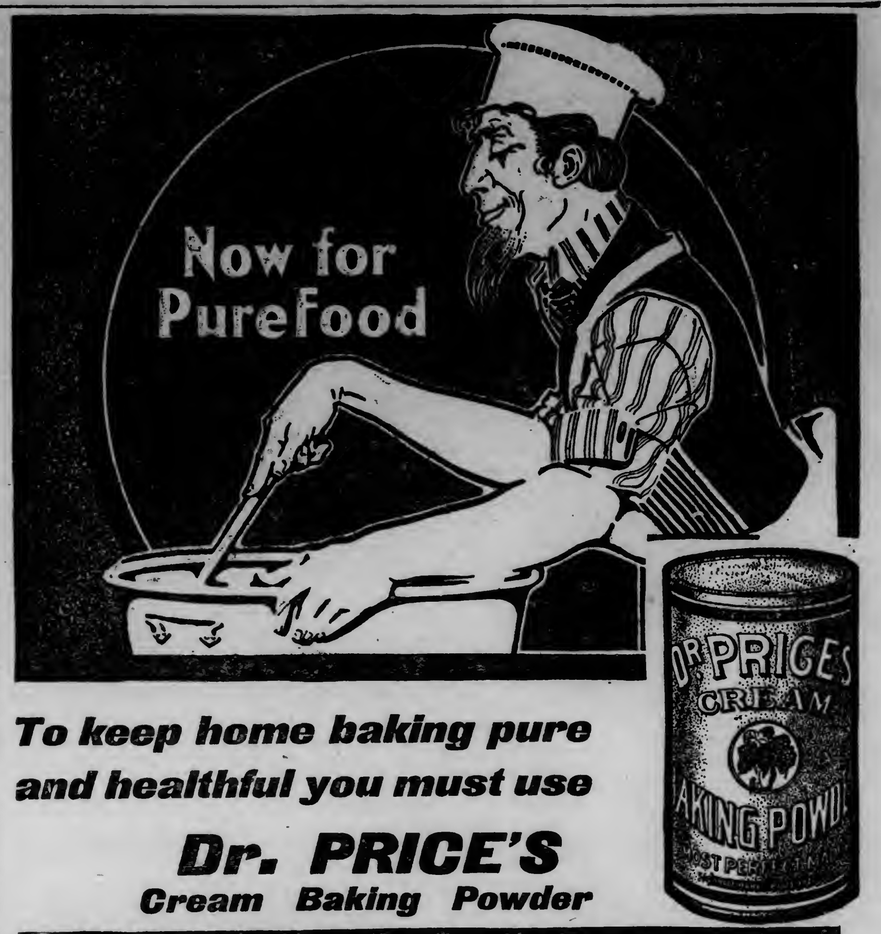
Department of Agriculture, Weather Bureau, Duluth, March 6.—Local forecast for twenty-four hours ending at 7 p. m. Thursday: Duluth, Superior and vicinity, including the Mesaba and Vermilion iron ranges: Snow tonight and Thursday. Warmer tonight with lowest temperatures averaging about 20 degs. Brisk easterly winds.

H. W. RICHARDSON,
Local Forecaster.

Chicago, March 6.—Forecasts until 7 p. m. Thursday: Wisconsin: Threatening tonight followed by rain or snow flurries Thursday. Rising temperature.

Minesota: Snow or rain tonight and Thursday. Warmer tonight and in east portion Thursday. Colder in west portion.

North and South Dakota: Rain or snow tonight and Thursday. Warmer tonight. Colder Thursday.



To keep home baking pure and healthful you must use

Cream Baking Powder

DULUTH'S STEEL PLANT.

Two Harbors Iron News: That the United States Steel corporation will make Duluth a center around which the iron and steel industry will revolve, is now an assured fact. The initial steps are being taken at Duluth for the erection of steel mills and smelters capable of converting into the markett-able product the large share of the ore output of Minnesota mines. Duluth and Northern Minnesota will receive an impetus of development which will bid fair to par that of the Twin Cities and Southern Minnesota. Mesaba range iron ore has too long been the cause of Pittsburg smoke. The steel mills will stimulate iron ore prospecting, and eventually every county in Northern Minnesota may contribute its quota of the ore of iron.

Crookston Journal: The construction of a steel plant at the Head of the Lakes will be a great thing for the state of Minnesota. It will also result in a very lively fight between Duluth and Superior to land the industry.

St. Paul Pioneer Press: The adoption by the United States Steel corporation, of a resolution looking to the establishment—"provided it is practical and reasonably profitable"—of a substantial plant for the manufacture of iron and steel in the vicinity of Duluth, is something to be viewed with satisfaction by every citizen of Minnesota. It means, it is to be hoped, the inauguration of a new era in the handling of the mineral wealth of our state. The establishment of an iron and steel producing plant at the Head of the Lakes will provide for the use, close to the mines, of their valuable product. It will give employment, directly and indirectly, to a large population.

Hibbing Iron Ore: The United States Steel corporation has decided to build big iron mills in Minnesota, and if there is any reason why Hibbing should not be selected as the site it is not apparent.

Stillwater Gazette: Looks as if Duluth would grow, not alone rapidly, but by bounds, if the great steel plant of the United States Steel corporation locates at Duluth.

Eveleth News: The United States Steel corporation has taken formal action on Duluth's claim to an iron and steel plant. The Steel corporation never does things by halves. When things get far enough to go on paper in the shape of a resolution, results can be expected. Minnesota will await with great interest the decision of Messrs. Gary, Corey, Perkins and Frick.

Itasca Iron News: "May mean second Pittsburg," says a Duluth paper in its scare head over news items of proposed iron works in Duluth. Duluth papers are modest. Whether Duluth gets the works or not, she will in the course of time make the big Pittsburg look small in comparison. She has the location—she has everything to make one of the world's great metropolis.

Crookston Times: Duluth papers are filled with the news that the United States Steel corporation will establish a smelting and steel manufacturing plant in the range, likely at Duluth. It is time that such a move were made by the iron interests. This state has had a plant coming to it ever since the iron properties began to show their value, and it is to be hoped that this time there will be a realization of the hopes of years.

Pointed Paragraphs.

Chicago News: Many a train has been wrecked in a ballroom.

Many so-called gilt-edged securities are gilt-edged.

About all a pretty girl asks is a chance to show off.

A dog's bark is worse than his bite, because it last longer.

As the years roll by many old proverbs take to the tall timber.

Courtship fills a man with conceit, but marriage takes it all out of him.

Some willing workers never miss an opportunity to work their friends.

Reflections of a Bachelor.

New York Press: Maybe purgatory is nothing but a dose of machine politics.

A nice thing about having a wife is all the other foolish things it keeps you from doing.

A woman's idea of comfortable shoes are those she can wear for three hours without fainting.

A man has a mighty sweet temper to lose a collar button and not swear it's his wife's fault.

A man works hard all day to support his wife, but not as hard as when he gets home and has to button her up the back.

"Deadheads" From River.

Roseau County Times: Thirty thousand dead heads were taken out of the Mississippi river at Little Falls. Think of that, you delinquent-subscriber-kicking-country-newspaper men.

Washington and Thaw.

St. Cloud Journal-Press: If Father Washington should return to earth and discover that the most important event in newspaper history is the testimony of Mrs. Harry Thaw, wonder if he would think the country was worth the starting?

MINNESOTA OPINIONS.

Minneota Mascot: Wisconsin assemblymen are introducing resolutions calling upon congress for immediate revision of the tariff. Minnesota has as much at stake as her sister state; why not follow the example?

Austin Register: Austin is badly in need of better thoroughfares and nothing will improve its appearance more than to improve these thoroughfares, especially those leading out of the city into the country at all points of the compass.

International Falls Echo: We don't know of a property owner who is not glad that he invested here and we predict that those who hold lots will have more reason to be glad before another year rolls around.

Border Budget: The railroad and warehouse commission admits that it knows little regarding railroad affairs. Their statement is backed by plenty of evidence.

Stillwater Gazette: The city council wisely decided that for the safety of our people it will be better to muzzle the dogs and, shoot the worthless ours that roam the streets.

Lake Crystal Union: The holding-down the lid fad could not be more successfully carried to a final conclusion by any other man in the state than the Honorable Mayor Taylor of Mankato when it comes to avoirdupois.

St. Cloud Journal-Press: A million dollars spent in building good roads in Minnesota would make the next fifty years of travel much easier.

Crookston Journal: Instead of spending $2,000,000 or $3,000,000 for a semi-centennial in Minnesota, why not use the money to better advantage in the construction of state highways? What better advertisement could a state have than good roads?

Moorhead Citizen: Let us keep forging ahead the way we have for some time past and Moorhead will be one of the best cities in the Northwest.

Mower County Transcript: Prof. Maria Sanford of the state university, is lecturing on How to Make Home Happy. She ought to know. We suppose that at her lectures the choir sings "What is a Home Without a Mother?"

Anoka Free Press: Because the statehouse is located in St. Paul is no more reason why Minnesota tax payers should furnish the money for straightening and widening the horrid streets of that city, than it would be for the state to pay for improving and beautifying the thoroughfares of Anoka because the state asylum is located here.

Le Sueur News: Even the Lord helps the railroads. At least He caused the sun to shine and melt the snow on the blockaded roads in North Dakota.

TWENTY YEARS AGO.

Taken From the Columns of The Herald of This Date, 1887.

***A large meeting of the members of the Congregational church was held last evening, at which the building committee made its report. A lot on the corner of Lake avenue and Second street has been purchased for $10,000 as a site for the new church, and $13,000 has been offered for the present edifice and lot. The society has in contemplation a brownstone building, to cost $35,000, exclusive of furnishings, and it is planned to have a parsonage adjoining, to cost $5,000.

***The following real estate transfers have been recorded:

Svend Oleson to J. M. Smith, lots 25, 27, 29 and 31, block 151, Third division, $2,650.

S. F. Wadhams to W. Q. Greely, lot 16, block 32, lot 14, block 54, Endion, $1,850.

George F. Ash to C. Lazier, lot 15, block 32, Endion, $1,050.

J. N. McKinley to N. F. Hugo, 100 by 32½ feet, lots 33 and 35, East Fifth street, First division, $1,750.

J. C. Hunter to Henry Clark, lots 1 to 8, block 14, Portland, $8,000.

A. L. Ordean to L. O. Baldwin, lots 15 and 16, block 85, Endion, $3,500.

Iver Wisted to Edward M. Patterson, 100 by 40 feet, lots 62 and 64, West Second street, First division, $3,800.

Mary Sargent to W. H. Goodwin, block 45, London, $4,000.

W. B. Phelps to A. C. Weiss, lots 5 and 6, block 36, Portland, $3,000.

H. R. Spencer to Neil McLachlan, east half lot 8, block 18, Third division, $11,250.

T. C. Himebaugh to Helen C. Dillebaugh, lots 349 and 351, block 124, Second division, $1,500.

***Morrison & McGregor have sold out their grocery business to Clark & Matter, former employes.

***Under the new city charter the councilmen are drawing salaries of $300 each per annum and the mayor $1,200.

***Abbott & Pew are platting a location for a new city down in section 32. It made considerable merriment when the senior member of the firm presented the new plat to the council, and Mayor Sutphin asked him if the country was inhabited.

***Ward's Lake Superior line will this season constitute the following boats and masters: Propeller W. H. Stevens, Capt. W. H. Campau; propeller S. F. Hodge, Capt. Stephens; propeller James Fish, Jr., Capt. Stenson; propeller Osceola, Capt. Shephard; propeller Toledo, no appointment.

***James Killigan has recently arrived at the West end from Minneapolis, and will probably engage in the restaurant business.

MERRIMENT MAKERS.

Philadelphia Press: Benedick—My wife only weighed 120 pounds when I got her; now she weighs 165.

Batcheller—Well, well! I suppose every man dislikes to see his wife outgrow her wedding gown.

Benedick—Yes, but then there's some satisfaction in knowing that you've given her enough to eat.

Brooklyn Eagle: Mrs. Winks—A man always gets on easier by taking his wife's advice.

Mr. Winks—Yes; when things turn out badly there isn't so much said.

Judge: "What are they moving the church for?"

"Well, stranger, I'm mayor of these diggins, an' I'm fer law enforcement. We've got an ordinance that says no saloon shall be nearer than 300 feet from a church. I gave 'em three days to move the church."

Chicago Tribune: Girl Friend—They are telling the story that when you and Harry dine you kiss each other after every course. You don't, do you?

Young Bride—No, we omit it after the first course. Harry says he knows better than to take anything sweet on oysters.

Washington Star: "A ship's officer must be very alert these days," remarked the traveler.

"Yes," answered the old salt; "a man has to be pretty quick to beat the passengers to the boats in case of accident."

Philadelphia Record: Sillicus—What do you consider the best years of a man's life?

Cynicus—The years that come after his best years have been wasted.

Baltimore American: She—Why do you call such an exciting game "poker?"

He—I don't know, unless it is because it often stirs up hot times.

Detroit Free Press: He—I don't see why you make such hard work of shopping.

She—Of course, you don't. All you have to do is to O. K. the bills.

Washington Post: "Good intentions," said Uncle Eben, "need good judgment to back 'em. A hen don't git no credit wuhtsomever fuh settin' on a chiny egg."

To Save His Bacon.

Washington Star: Gen. Funston, at a dinner in San Francisco, cited an example of great presence of mind.

"In the height of the disorder here," he said, "a mob was looting a big grocery when a band of soldiers arrived on the scene.

"One thief had seized two hams, and was about to make off with one under each arm, when he ran plump into an officer.

"Placing the hams in the officer's arms, he said peremptorily:

"'Take care of these, my man, or the first thing you know they will be stolen.'"

Fried Cat and Dog."

Atchison, Kan., Globe: A dyspeptic Atchison man went into a restaurant the other day and ordered fried catfish. "Fried cat!" bawled the waiter to the cook. Instantly the weak stomach rebelled. "Cancel that order," the customer said, "and give me an order of country sausage." "Sidetrack the cat and make it dog," yelled the waiter, and he is wondering yet why the man grabbed his hat and left.

Defense of "Bob" Taylor.

Chattanooga Times: Just why any newspaper should persist in classing "Bob" Taylor with Davis and Tillman it is difficult to understand. He is as widely different from both of them as it is possible for a man to be. He is clean in every respect and the very opposite of both in sentiment and modes of speech. He is a bubbling fountain of good humor, and is one of the vice presidents of the "Brotherhood of Mankind." He has no use for the "pitchfork" or the "muck rake," and carries sunshine and mirth wherever he goes, and dispenses it lavishly with never a thought that he has an enemy or a foe. The prediction is freely made that Senator Taylor will shortly become one of the most popular men in the senate, and that his cloakroom will be one resort that will always have displayed the sign "S. R. O."

A Question of Passes.

Brainerd Tribune: Why do the railroads furnish passes to members of the state legislature, judges, county attorneys and others in authority who might be of use to them in an emergency? And echo answers, Why?

Might Shoot Next One.

St. Cloud Journal-Press: President Roosevelt thinks he has solved the resignation epidemic of Panama canal engineers. He has placed one of the army engineers in charge of the work, and if this unfortunate resigns, he will probably be shot as a deserter.

Editor's Wedding Notice.

Bluejacket, Va., News: Writing up our own marriage announcement is a serious proposition, and one we would gladly pass over, as the consoling effect of our wife is not to be measured by words and sentences, but by bumps and bruises. We will be glad to admit that it is all accomplished under the guise of love because our newly made wife is kind and affectionate. She has been the mellow sun rays of our past existence, and now, since we have anchored ourselves together in order to spend our terrestrial days she shines out more brilliant than ever. It was Thanksgiving day, 1906, which caused the editor, C. J. Howell, to be thankful by being united in marriage to Miss Beulah Upton of Welch, whom, we believe, is about the most perfect unwinged creature this side of the pearly gates.

Smoke? Never.

Ladies' Home Journal: "Would you mind if I went into the smoking car, dear?" asked the bridegroom in a tender voice.

"What! to smoke, sweetheart?" questioned the bride.

"Oh, dear, no," replied the young husband; "I want to experience the agony of being away from you, so that the joy of my return will be all the more intensified."

How To Keep Well.

St. Louis Post-Dispatch: Stop worrying. Stop hurrying. Cleanse the body and mind of all impurities. Eat to live, instead of living to eat. Take plenty of exercise in the open air. Breathe deeply. Love your neighbor. And call upon a doctor for aid if you must.

Another Sort of Fuel.

Ontario, Or., Argus: Ontario thought coal was again on hand Tuesday morning, a sealed box-car being side-tracked here late Monday night. But when our citizens hastened early to the coal office they were informed the precious car was filled with beer.

John-son Looming Up.

Hutchinson Leader: The other day when William J. Bryan and Governor Johnson were walking out of the Ryan hotel, St. Paul, together, after Mr. Bryan had addressed the Minnesota editors, some one said, "There goes the next president of the United States."

"Which one?" was the query.

"Take your choice," was the answer.

Governor Johnson as a presidential possibility is not so remote as some may think. His phenomenal run for governor has attracted wide attention over the country and many of the longest headed politicians in the United States believe the Democratic party has its greatest, if not its only, hope of victory in the next campaign in the present incumbent of the chief executive's office in the Minnesota state house.

Corporation Lawyers.

Washington Post: This wave of indiscriminate indignation that is sweeping over the country against corporations and corporation lawyers is due to the misconduct of corporations in compliance with legal advice. If every corporation employed legal counsel solely to be advised how to conform to the law, all this howl about corporate greed would be tranquilized so far as it comes from people capable of indulging processes of reason.

HENRY BIRCH IS CAUGHT AT LAST

Fugitive for Fourteen Years Has Been Arrested in Wisconsin.

Chippewa Falls, Wis., March 6.—Henry Birch, a fugitive from justice for fourteen years, ventured back here Monday and was arrested at the home of his son.

Birch and his family, for several years, with rifles, defied the authorities.

In 1894, through strategy, he was arrested, but escaped from jail.

A few months later the sheriff overtook him and a battle ensued, but Birch escaped and then left the country.

Henry Birch first came into prominence in 1892. That year he leased a farm near Cadott. The next year the owner of the land leased the property to John Babbitt, son of Supervisor F. C. Babbitt. The transfer of the lease angered Birch and he determined to get even.

Young Babbitt paid no attention to Birch's threats and plowed up the land, put in the seed and fixed up the buildings. When this was done Birch appeared upon the scene and ordered Babbitt off the property at the point of his rifle. Birch followed up this by having Babbitt arrested on the charge of trespass and won the case, Babbitt being fined 6 cents and costs.

Babbitt immediately took an appeal to the circuit court. Not waiting for the decision of the court Birch went to work and harvested Babbitt's crops and appropriated it to his own use. In order to do the harvesting Birch kept the Babbitts away by free use of his rifle. Birch's rifle bullets became so frequent and were fired in such close proximity to the Babbitts' heads that F. C. Babbitt swore out a warrant against him.

The main issue in the campaign for the election of sheriff in 1894 was the question of Birch's arrest. J. O. Putnam, the Republican nominee, stated that if elected, he would perform the feat. He was elected and shortly afterwards he and Frank Colburn, his undersheriff, made the expedition to Birch's homestead. Before they started they were the subject of much merriment, as it was believed that the outcome of the trip would be a failure.

The officers, upon their arrival at the Birch homestead, found him alone, at work behind the barn. They were quick to realize their advantage and succeeded in taking him unawares.

Birch evidently determined not to stand trial, and one night escaped from the county jail. Sheriff Putnam, believing that Birch had headed for Cadott, took the train for that village. He stood guard by the track waiting for Birch to come along. Presently the prisoner arrived and the sheriff ordered him to throw up his hands. Birch was prepared for such an emergency, and, instead of obeying the orders, threw two big stones at the sheriff and escaped into the woods. Birch, soon after that, left the country, and the authorities heard nothing of him until a few days ago when he was arrested at the home of his son.

SURPLUS IS ENORMOUS

(Continued from page 1.)

have, out of the ultimate distribution of assets, not more than $2 for one of the face value of their shares. This bill provides, however, that where accumulations greater than that amount already have taken place (as claimed in the case of the Prudential), the stockholders shall not be deprived of their rights thereto.

Among other recommendations were: Provisions for the appointment by the governor of three directors of every stock life insurance company, these directors to be persons having no interest in the stock of the corporation; limiting the amount of stock which any insurance company may hold in any other company to 15 per cent of the whole, and that where a company has more than the amount so limited, it shall dispose of the excess within five years, providing that no life insurance company shall invest more than 2 per cent of its own assets in the stock of any other corporation or more than 10 per cent of its assets in the bonds of any other corporation; restricting child insurance; requiring more detailed statements of the affairs of insurance companies for the purpose of securing more publicity with respect to their affairs; requiring the examination of insurance companies at least once in three years, the examination to be brought immediately under the direction of the insurance commissioners; prohibiting contributions to political campaign committees; that after Jan. 1, 1908, no domestic company shall write both participating and nonparticipating policies, and requiring all stock companies to elect on or before September of this year whether they shall conduct a participating or a nonparticipating business after the following first day of January; and a provision that an annual accounting be made to policyholders by classes of the portion of the surplus belonging to them and setting aside of such apportioned part of the surplus to their credit. No recommendations were made bearing upon foreign insurance companies except those which prescribe certain provisions which must be in every policy and those which forbid the putting of certain provisions in policies.

The committee reports that on the whole it found that the companies under investigation have been carefully administered, their funds generally well invested, and the salaries of their officers not so high as to require restrictive legislation. The Mutual Benefit Life Insurance company was found to be a purely mutual company, and to have shown a steady and uninterrputed growth. "There is little suggested by an examination of this company," says the report, which calls for any criticism or reformatory legislation. Its policyholders, although aggregating a very large number of persons, appear never, for many years, to have exercised, to any great extent, their privileges of voting for the directors.

"The directors seem to have been selected with care. When a vacancy has occurred the practice has been for the board itself to look about for some proper representative man to fill the vacancy. It cannot be denied that this practice has resulted in substantially a self-perpetuating board. Whether this method has always been pursued with no interruptions from policyholders may be a question, but no question has as yet arisen, and the practice of sixty years by this, the only mutual company of New Jersey, has been so successful, we think the matter should be left as it is, until occurrences for a change, if it ever does unhappily arise."

The committee has no special recommendations to make with respect to the case of the Colonial Life Insurance Company of America, the funds of which, it says, appear to be carefully invested, or the North American Life Insurance Company of Newark. The latter company was organized only about a month ago.

The report contains an extended review of the Prudential from the time of its organization in 1873 under the name of the Widows' and Orphans' Friendly society, with a share capital of $25,000, until the present, when, as the Prudential Insurance Company of America, it has a capital stock of $2,000,000 and a surplus of $18,580,000. "It is claimed," says the report, "that this surplus belongs to the stockholders, subject to contingent liability to policyholders. It would appear from the president's testimony that certainly, that in the past and the present, some, at least, of the stockholders would, if they could, divide this surplus or part of it, in the shape of cash or stock dividends. The case presents a remarkable state of affairs. By the investment of $91,000 in cash, three stockholders were able to accumulate capital stock of $2,000,000, whereon they have always drawn 10 per cent, or $200,000 per year, and still to accumulate beyond that $16,500,000. Nor is this all. So rapid were the gains and so great the prospect of their future accumulation that in 1902 when the scheme for reciprocal control of the Fidelity and Prunedtial companies was in course of arrangement, the stockholders of this Prudential Insurance company were able to dispose of shares at six times their par value, and the principal promoters of the company actually received for a part only of their holdings in November, 1902, from the treasury of the Fidelty Trust company $5,997,000.

For the shares which produced this amount, there had been paid into the treasury of the Widows' and Orphans' Friendly society by the promoters only $45,484.08, or three-quarters of 1 per cent of this vast sum of money.

If the theory of the stockholders be correct, that the surplus of this company in law belongs to them, the present surplus of $18,580,000 affords $204 for each dollar of the $91,000 contributed to the enterprise, and this in addition to annual dividends of $200,000 or 219 per cent paid for many years past.

The assets of a life insurance company are trust funds, and the management of such a company must be deemed to be the management of a great trust. While it may be true, as a strictly legal proposition, that the obligations of the company to policyholders are limited by the terms of the written contracts or policies which it issues, yet it is not the whole truth, and the Prudential company itself has recognized that its legislalons, in equity and good conscience, go further, for they state that they have voluntarily divided up among policyholders, in excess of its legal obligations, more than $7,000,000.

The truth is that this vast accummulation of money, now amounting to more than $125,000,000 was all contributed by, and in ethics all belongs to the policyholders, after a fair deduction for the expenses of operation and just and liberal return to the promoters of the enterprise. While the vested rights of the stockholders, which ever they may be, of the Prudential company must be recognized and maintained, we cannot contemplate without some solicitude the continuous rolling up of an enormous surplus by this company, taken from millions of contributors for whom the company is the trustee, if this surplus is to be considered the property of a few stockholders whose reward obtained under the company's charter have already been so great. If the stockholders' interest in this corporation is what some of them claim to be, it may be well doubted whether they cannot prevent the voluntary contributions out of the surplus to the policyholders, which have heretofore been made from year to year to the extent of $7,000,000, and it may well be supposed that the time will come, at no distant day, when the pretentions of stockholders may again bring forth from them a demand for the division of this surplus.

It has been stated before us that at the present rate of progress this surplus is likely to be at the end of 1907 $23,000,000, and at the end of 1908 $28,000,000. The money ought, in some way, to be assured to the policyholders, except such part as justly now belongs to the holders of the stock. Rather than allow this accumulation to go on for the benefit of the stockholders, at the expense of the policyholders of this company, we would be in favor of the repeal of the charter of the corporation, and a reorganization of it under the general law and under proper restrictions, if such a measure seemed necessary, and they believe that the invasion of any just rights of the stockholders can be avoided, and yet that the assets can be substantially retained for the policyholders.

It is in place of this extreme measure that the comittee prepared the bill limiting the amount of capital stock of any insurance company to $2,000,000 and restricting the profits of stockholders.

HAPPENINGS IN THE DAKOTAS

Four-Year-Old Lad Takes Long Trip to Visit Grandma.

NORTH DAKOTA.

Fargo—Four-year-old Harold Norgaard is one of the youngest travelers who ever arrived in Fargo alone. He made the trip from Minneapolis, where his parents reside to Fargo to visit his grandmother, Mrs. T. S. Norgaard of this city. The young man slept most of the way to Fargo and gave the trainmen no trouble. He was tagged like an express package.

Williston—More than 1,500 contest cases are pending in the Williston land office. Of this number more than 900 are inherited from the Minot land office which recently was consolidated with the Williston office.

SOUTH DAKOTA.

Selby—Sheriff John Hoven of this county and Otto Cassidy of Evarts, bartender, had an exciting battle a few miles west of this town in which the sheriff was rolled out of his sleigh disarmed and compelled to walk back to Selby. The battle was started by Cassidy, who was fighting for a bride, Ada Morris, also of Evarts, the 15-year-old daughter of the proprietor of a cafe.

Cassidy and the girl eloped and drove to this place in a sleigh. They were apprehended by the sheriff on advices received from Evarts. The officer started with his two captives for Evarts, the three riding in Cassidy's rig, with the sheriff's rig leading behind.

When well out of town Cassidy suddenly threw himself on the sheriff, rolled him out of the sleigh, took his gun away and compelled the officer, at the muzzle of the weapon, to keep at a distance. Cassidy and the girl then made off, driving east and taking both teams.

The sheriff walked back here and messages were sent in all directions. Several hours later a message was received from Pierre that the couple had been caught.

Watertown—Miss Pearl Jacobson, aged 16, was severely burned while building a fire in a cookstove. Her cries brought help, but before the flames could be put out the trunk of her body and her face and arms were seriously burned.

Brookings—Henry Borstad, a young farmer who lived northwest of the city, was instantly killed Monday evening by a Northwestern passenger train. He was on his way home from town and was intoxicated, and had driven straight up the railroad track nearly a mile before the train struck him. Upon the aproach of the train the team turned out of the track and was not injured, but the wagon was demolished. The county coroner decided that no inquest was necessary, no blame being attached to the train crew.

Yankton—Frank Dudley, for five years in charge of the Morris feeding yards, near Kansas City, has accepted the superintendency of the Yankton sheep feeding yards, and will be here this month to superintend the extensive improvements contemplated.

DANAHY HEADS TICKET

In Stuntz Township, Nominated at Caucus at Hibbing.

Hibbing, Minn., March 6.—At a caucus held in Power's theater last night, Michael Danahy was chosen to lead the Republican party in the election which occurs in the township of Stuntz next Tuesday. About 600 people attended the caucus, but the ticket had evidently been made up and agreed to in advance, because there was little rivalry among the candidates for the various offices. B. D. McEachin was chosen chairman of the meeting, and A. E. Pfremmer secretary. The following ticket was nominated: Supervisor, Michael Danahy; township clerk, Charles Calligan; township treasurer, Archie McFadden; township assessor, Al Dyer; overseer of highways, H. Olson; constables, Eric Nord and G. W. Donahue.

ANOTHER VICTIM

Of Wreck of Work Train on the Missabe Road.

Hibbing Minn., March 6.—Two men are dead as a result of the wreck of a work train on the Duluth, Missabe & Northern, nine miles east of Hibbing, Monday. Snyder died a few hours after the accident, and Jacob Berg died last night of internal injuries. A third man, Ole Hanson, lies at the Rood hospital, severely injured internally, and it is doubtful if he will recover. None of the others was seriously injured.

BRIEF TELEGRAMS.

During the Fifty-ninth congress, 34,870 bills and joint resolutions were introduced in both the senate and house, about a fourth more than in the fifty-eighth congress. There were 25,154 house bills, and of these 6,940 became laws, about the same proportion of senate bills received approval.

William A. Doyle, a prominent Democratic politician of Colorado Springs, was shot but not fatally injured by Richard Irwin, a well known mining man as the result of a quarrel in which Doyle and Mrs. Irwin engaged over a party line telephone.

Two more victims of the wreck of the Santa Fe work train at Leith, Nev., last Thursday have died, making seven dead in all. The remainder of the fifty injured are expected to recover.

The Idaho senate has passed the house bill appropriating $50,000 for carrying on the prosecution in the Stennenburg murder case. This bill went through both houses unanimously.

Experts who have been engaged on the books of the late Fred Blumberg, formerly auditor of Skagit county, Wash., report the discovery of a shortage of $9,698 for 1905 and 1906. On Feb. 8 last Blomberg's body was found in a creek near West Mount Vernon.

The industrial tie-up at Butte, Mont., was accentuated Tuesday by a walkout of drivers of transfers wagons. The men demanded an increase from $3 to $3.50 per day. No baggage can be hauled to or from the stations at present.

Workmen have commenced the demolition of the tunnel under the Chicago river between the north and south sides of the city which has for several years been an obstacle to navigation. It is believed the tunnel will be destroyed by the opening of navigation.

CASS LAKE RESERVE.

Part May be Returned to Land Office for Entry.

Washington, March 6.—Gifford Pinchot, chief of the bureau of forestry, issued a statement yesterday relative to the large extension of the forestry areas in the West. Mr. Pinchot defended his policy, and offers figures to show that in a few years the forestry service will be self-sustaining.

It is estimated that there will be an important change made in the Minnesota federal reserve before long whereby a considerable portion of land now within the forest reservation will be returned to the general land office to open for entry, together with additional lands south of Cass Lake. A new superintendent for Star Island reserve at Cass Lake has been appointed in the person of Richard Wilson.

Don't consider lightly the evidence of disease in your system. Don't take desperate chances with ordinary medicine. Use Hollister's Rocky Mountain Tea, the great specific. 35 cents, Tea or Tablets. Ask your druggist.

TRAMP SUSPECT ARRESTED.

Woman's Assailant May be In Jail at Moravia, Iowa.

Moravia, Iowa, March 6.—It is believed that a tramp who has been placed under arrest by local officers is the man who, about a week ago, committed a terrible assault upon Mrs. George Stech, wife of a Wayne county farmer, and for whom posses of citizens with bloodhounds scoured the country without success. The man under arrest answers the description given by Mrs. Stech and his actions indicate that he has knowledge of the crime. Mrs. Stech has been asked to come here and identify the suspect.

NATIONAL BISCUIT COMPANY

YAQUI POISONS WATER SUPPLY

Indian Found Pouring Cyanide Into City Works and Shot.

El Paso, Tex., March 6.—News has been received here that the Yaqui Indian, who had just emptied a 15-pound can of cyanide of potassium in the municipal waterworks at Hermosillo, was caught in the act of emptying another can of the poison. He was ordered shot by the authorities and the sentence was carried out.

A new terror is added to the situation in the Sonora country since the Yaquis have learned the deadly nature of the poison which is so largely used in mining operations in that section and so easily accessible to thieves and desperadoes.

SIX MILLIONAIRES IN OMAHA STREET ROW.

Omaha, Neb., March 6.—Waving bank rolls of big denomination in the air on Farnum and Sixteenth streets, six millionaires became involved in a contest for the purchase of a new automobile.

J. J. Derlight took the machine out of a freight car and made a bet that the machine could make a mile a minute. Frank Colpetzer, Eddie Cudahy, once victim of kidnapers; Herman B. Peters, Edgar Allen and Lee McShane, a nephew of the late Count Creighton, each put up a wager of $100 that he could not make the time.

Derlight won the bet on one of the principal streets, and each of the millionaires offered $3,000 cold cash for the machine. They became involved in a quarrel and during the controversy Derlight, the sixth millionaire, was arrested for exceeding the speed limit. He was later released.

PITTSBURG WOMAN GOES MAD FROM CRUCIFIXION.

Pittsburg, Pa., March 6.—As the result of her ordeal Mrs. Jean Mitchell, who was found nailed by the hands to a sink in her apartments on November 11 last, is now said to be hopelessly insane. She believes as the result of her "crucifixion" that she is a second Christ. Superintendent of Police McQuaide sent her to the insane ward at Claremont.

Mrs. Mitchell is only 19 years old. After recovering somewhat from the shock and injuries she went to live with her sister, Mrs. Edward Worley. Frequently at night she would awake crying that she was a second Christ and that she would be crucified not once but many times. Mrs. Worley notified Superintendent McQuaide.

The police have worked for weeks to unravel the mystery surrounding the torturing of the girl. No idea of the idea of the person who drove the big nails could be obtained. Several days ago Mrs. Mitchell was subjected by the police to a thorough mental examination. On all subjects except that of the so-called crucifixion she seemed to be perfectly sane, but when asked about that she talked wildly.

"Today I got on a street car," said the girl. "A man stood on the platform, and every minute he looked at me and called, saying, 'Crucify her!' I got off the car and boarded another car only to find him waiting for me and still calling, 'Crucify!' I left that car, but he was on the next one. It is terrible. Why does everyone on the street call 'Crucify!' at me as I pass?"

Mrs. Mitchell looks to be at least 30 or 35 years old as the result of her sufferings.

Mrs. Mitchell received her injuries at a time when footpads and burglars were causing terror in Pittsburg. She was found unconscious with two nails driven through her left hand into the woodwork of the sink. A jagged hole in the right hand showed where that, too, had been nailed, but her weight tore it away. In the left hand the nails were "driven home" till their heads touched the flesh, and the whole weight of her body hung on them.

HERO BRINGS FIRE BOAT

To Put Out Conflagration in Large Bowled Tobacco Pipe.

New York, March 6.—Louis Sirkus, a young clerk, was passing a one-story frame house, on East Seventy-fifth street, Friday evening, and saw a cloud of smoke coming out of the open window. He rang a fire alarm and then ran upstairs to assist in saving life. Then he found out that the fire was in the large bowl of a Bohemian's pipe.

The alarm brought two engines, a truck and a fireboat. The firemen had the clerk arrested for sending a false alarm.

"I meant to save human life, but I made a mistake," the young man said in the Yorkville police court yesterday.

"You wanted to be a hero. You had better leave that to the firemen and the policemen next time," responded Magistrate Finelite, as he discharged him.

Found at Last.

J. A. Harmon, of Lizemere, West Va., says: "At last I have found the perfect pill that never disappoints me; and for the benefit of others afflicted with torpid liver and chronic constipation, will say: Take Dr. King's New Life Pills." Guaranteed satisfactory. 25c at all druggists.

RODE A CROCODILE.

Alligator Joe Entertains Palm Beach With a Tussle in Ocean.

Palm Beach, Fla., March 6.—Warren Frazier, known as Alligator Joe, treated society folk at Palm Beach yesterday afternoon to a new sport. Joe towed a crocodile weighing 200 pounds well out into the ocean and then swam out, had a wrestling match with the critter, mounted it bareback and slowly brought it back to shore. The crocodile was about 70 years old and perhaps twelve feet long.

"He's a young one," said Joe. Joe watched his chance when he reached the crocodile swimming about. Then he made a quick dive, came up and landed stomach down on the crocodile's back. Over and over they went. The tail of the animal could be seen lashing about. Once the forefeet of the crocodile were exposed as Joe tilted him up, at the same time keeping out of reach of his teeth.

Gradually Joe worked his way back when the rope was thrown to him. Then, keeping the crocodile under water, he tied the rope around the creature's long snout in two places so that a pull from a man on shore tightened both fastenings. Once on shore the crocodile's tail was turned around to its head and the two ends tied together so that it could be lifted into a cart.

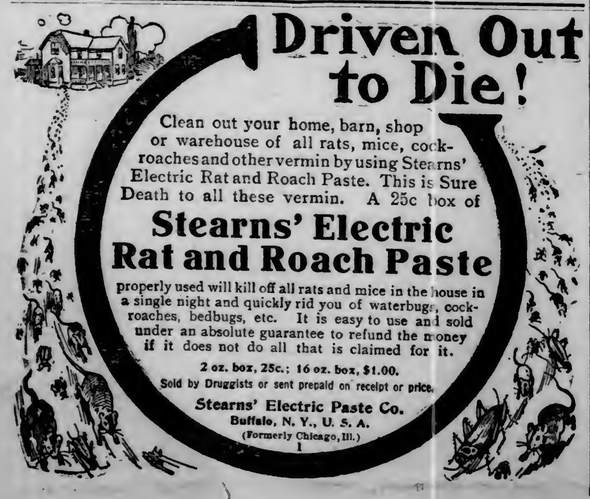
FAMOUS BRIGAND DIES.

Peaceful Old Age of Corsican With a Hot Vendetta Record.

London, March 6.—Full of years and honor, the once famous brigand Bellacosai has died at Ajaccoi, Corsica. He was for years at once the terror and the pride of the district around Basti.

With his brother, Giacomo, he took to the mountains in 1852 in consequence of a series of vendatta murders. The legal period for his liability to punishment expired in 1892 and he surrendered to the police and was exiled to Marseilles.

After a year or so he grew homesick, and went home again. The authorities did not interfere with him, and he spent the rest of his days quietly as a well to do retired brigand.



Driven Out to Die!

Clean out your home, barn, shop or warehouse of all rats, mice, cockroaches and other vermin by using Stearns' Electric Rat and Roach Paste. This is Sure Death to all these vermin. A 25c box of

Stearns' Electric Rat and Roach Paste

Sold by Druggists or sent prepaid on receipt or price.

Stearns' Electric Paste Co.

Buffalo, N. Y., U. S. A.

(Formerly Chicago, Ill.)

LETS FIRST CONTRACT

Courthouse Commission Will Testpit Site for the Building.

Amount of Rock Excavation Will be Determined.

The first contract has been let in connection with the new courthouse to be erected on the east half of the block, bounded by First and Second streets and Fourth and Fifth avenues west.

The courthouse commission has awarded Louis Ramsted a contract to sink six testpits on the courthouse property, with a view of determining the nature of the ground and the depth below the surface of the rock, as it is expected that the excavation work will go to some depth in places. On the result of the testpitting the commission will be able to base its calculations of rock work when ready to call for the bids on the foundation work.

Mr. Ramsted's contract was awarded on the basis of $1.45 per foot, the excavation to be carried on to such depth as may be directed by the commission, and of sufficient area for the work to be performed conveniently, and enable the commissioners to readily determine the character of the ground.

The plans for the new building are well under way by Architect John J. Wangenstein, and it is expected that the commission will very soon be in a position to call for bids on the foundation work. It is planned to have the foundation work begin as early as possible this spring, and the work will be pushed forward as rapidly as practicable until fall, when the assembling of the steel to be used in the building will probably begin to arrive.

It is understood that the general plans of the building have been agreed on by the commission, with the exception of the dome. Two perspectives are now under consideration, one with a dome and the other without that ornamental feature.

Saved Her Son's Life.

The happiest mother in the little town of Ava, Mo., is Mrs. S. Ruppee. She writes: "One year ago my son was down with such serious lung trouble that our physician was unable to help him; when, by our druggist's advice, I began giving him Dr. King's New Discovery, and I soon noticed improvement. I kept this treatment up for a few weeks when he was perfectly well. He has worked steadily since at carpenter work. Dr. King's New Discovery saved his life." Guaranteed best cough and cold cure by all druggists. 50c and $1.00. Trial bottle free.

ADVISES WOMAN TO WHIP HUBBY

Judge, However, Forced to Give Wife-Beater Nine Months.

Kansas City, Mo., March 6.—"Get a whip and let this woman whip the man who beat her. That is the only way to make these brutes who beat their wives feel what they have done."

Harry G. Kyle, police judge, made this order in police court, after Mrs. Elmer Ogle had told a story of brutal abuse on the part of her husband, extending over a period of nearly three years.

Lieut. Frank F. Snow, the court bailiff, secured a whip and handed it to the woman. The spectators in the courtroom straightened up in their seats, eager to see the man given a good thrashing.

"Beat him up," yelled a witness of the dramatic scene, "lick him good."

"Order in the court," shouted Lieut. Snow.

"Don't whip me," whined Ogle, "I'll promise to be better in the future. I love you better than any person in the world. Don't whip me, please."

The woman took the whip and raised her arm, but her face twitched with pain.

"I can't do it," she cried. "My arms are so sore from the beating he gave me that I can't do it justice. They are covered with black and blue marks and so sore that I can hardly raise my hand. Send him to the workhouse, judge; I can't do it."

Ogle was fined $100, which will mean nine months on the rock pile.

VANDERBILT CAR SOLD.

Deemed Dangerous for Northward Trip on Rear of Train.

Asheville, N. C., March 6.—It became known yesterday that George W. Vanderbilt has sold his private car Swannanoa to one of his friends in New York for $75,000. Mr. Vanderbilt says he deems it unsafe to ride from North Carolina to New York with his car hitched to the rear of a train, and, besides, he is cutting down expenses.

The car was one of the finest ever built, and was designed by Mr. Vanderbilt himself. It came near being burned twice while the Vanderbilts were in Europe.

WEALTHY MAN TAKES A NURSE FOR A BRIDE.

Providence, R. I., March 6.—As a reward for her skill as nurse, which brought him back to health through a long illness of pneumonia, John Thornburg Murphy, a wealthy resident of Montana, wedded Miss Clara B. Cobb of this city, at the winter home of John M. Dean, in the Providence colony at Fort Myers, Fla., last Tuesday.

Miss Cobb was at the home of the Deans for a visit after completing her course at the Presbyterian Hospital in New York and became acquainted with Mr. Murphy through being called to nurse him.

She was one of the most popular young women of the section of the city where she lived, a member of the Central Baptist church, and a teacher in the Sunday school until he left the city to become a student nurse. Mr. Murphy, who is an elderly man, is a widower and has a son and a daughter.

The wedding came as a surprise to many friends of Miss Cobb here. Her father, Franklin Cobb, No. 129 Lexington avenue, this city, was present, and gave away his daughter.

Besides having orange groves at Fort Myers, Mr. Murphy has extensive business interests in Montana. His property is said to consist largely of real estate at Helena, where he resides, his fortune being estimated at several millions.

KODOL digests what you eat and quickly overcomes Indigestion, the forerunner of Dyspepsia. Made in strict conformity to the National Pure Food and Drugs Law, and sold on a guarantee relief plan. At all druggists.

REMARKABLE VIGOR

Shown by Gen. Booth, Aged Head of the Salvation Army.

New York, March 6.—Gen. William Booth, the aged leader of the Salvation Army, who arrived in this city yesterday on the steamer Minneapolis from London, will spend two days here as the guest of his daughter, Commander Miss Eva Booth, who is in charge of the American work of the organization, and then will leave for Montreal, Toronto, Ottawa, Vaucouver and Seattle, whence he will sail for Japan. After a short stay in that kingdom he will go to India, and thence return to England. In the fall he will again come to the United States, this time for a general tour of the country. His present visit is purely a private one, and he will make no public addresses. During his stay in Ottawa he will be the guest of Earl Grey, the governor general of Canada.

Gen. Booth showed a remarkable vigor for a man who, on April 10, will celebrate the 78th anniversary of his birth. He said he was in perfect health, and that he had enjoyed his voyage, although it was a stormy one. He spoke enthusiastically of his several colonization projects, after which he spoke of the success which has attended the founding of anti-suicide bureaus in many cities of England. The first five weeks of the work in London, he said, brought 500 cases. "They represented every walk and circumstance of life, and we helped most of them," he asserted.

LITTLE BABY CURED OF ECZEMA

Parents Applied to Hospitals and Doctors but Could Get No Relief—Grew Worse Under Doctor's Prescription—Friends Recommended Cuticura—Result

A SPEEDY AND PERMANENT CURE

"We express to you herewith our best thanks for the cure of our baby from eczema. The eczema appeared when the child was three months old. We applied to several doctors and hospitals, each of which gave us something different every time, but nothing brought relief. A physician recommended a salve which we threw into the fire after two days' use as the eczema became worse so that the baby scratched his face. At last, one of our friends recommended to us Cuticura Soap and Cuticura Ointment. A few days afterwards improvement could be noted. Since then we have used nothing but Cuticura Soap and Cuticura Ointment, and now the baby is six months old and is quite cured. All that we used was one cake of Cuticura Soap and two boxes Cuticura Ointment, costing in all $1.25. Even the poorest man can pay that instead of throwing it into the doctor's lap. I myself only make twelve dollars a week as a teamster, but I recommend the Cuticura Remedies strongly to all mothers whose children suffer from such diseases. They are cheap, harmless and good. C. F. Kara and Wife, 343 East 65th Street, New York, March 30, 1906."

FOR SORE HANDS

Soak the hands on retiring, in a hot, creamy lather of Cuticura Soap. Dry and anoint freely with Cuticura Ointment, and in severe cases spread the Ointment on thin pieces of old linen or cotton. Wear during the night old, loose, kid gloves, with the finger ends cut off and holes cut in the palms, or a light bandage of old cotton.

Complete External and Internal Treatment for Every Humor of Infants, Children, and Adults consists of Cuticura Soap (25c.) to Cleanse the Skin, Cuticura Ointment (50c.) to Heal the Skin, and Cuticura Pills (Chocolate Coated, 25c. per vial of 60) to Purify the Blood.

Sold throughout the world. Potter Drug & Chem. Corp., Sole Props., Boston, Mass. Depots: London, Newbery, 1 Charterhouse Sq.; Paris, Roberts, 4 Rue de la Paix.

Mailed Free, "How to Cure Skin Tortures."

CRISIS FOR ROOSEVELT

In Regard to Third Term Seems to be Approaching.

Pressure is Gaining in Strength Throughout the Country.

New York, March 6.—The Herald publishes a number of signed statements regarding President Roosevelt as a candidate for renomination to the presidency, with the following introduction:

"Whether Theodore Roosevelt is to be compelled by the American people to become his own successor as president is now, and for a year, will be the most important and most discussed of all political problems.

"That Mr. Roosevelt has emphatically announced his determination not to seek a second election is well known, but that the pressure to induce him to reconsider this determination is increasing daily is apparent. In all parts of America Mr. Roosevelt is being urged to take another term, the main argument advanced being that the so-called unwritten law against a third term does not apply in his case.

"Some friends of Mr. Roosevelt are inclined to take him at his word and are looking elsewhere for presidential timber. Others, just as loyal and sincere, take the opposite view, and declare that his duty is paramount and that his inclinations or desires have no part in the crisis he is about to face.

"The Herald, to sound the American public on the question of President Roosevelt's succession, has collected and herewith presents the views of many leaders in varied walks of life."

Among the statements published, are the following:

Grosvenor's Views.

"No man in this republic is so great that he should not bow to the demands of his fellow citizens to fill any office at any time, regardless of circumstances, if the people of the country demand it.

"No man who has been elected to the office of president has a moral right to refuse re-election if the people demand it, and the argument here made extends that situation forward so long as the demand of the people continues.

CHARLES H. GROSVENOR,
Representative, Chillicothe, Ohio."

"There is, as we know, no constitutional inhibition against a third term, and hence the matter of a third term is in the field of unwritten law, or rather sentiment on the part of the people. I am inclined to think this sentiment is pretty general in the United States, and I am myself impregnated somewhat with the sentiment, as repeated terms would indicate a tendency toward a personal monarchy. Having said this much, I am not prepared to say that President Roosevelt will have had two terms at the end of the one he now enjoys, within the sense of the rule of exclusion. At all events a worse thing might happen to this country than to re-elect him.

"J. WARREN KEIFER,
Representative, Springfield, Ohio."

"Personally I would favor the renomination of Theodore Roosevelt, for I am satisfied that a better man could not be obtained for the presidency, but I fear that should he be renominated, the sentiment against third-termism would find expression in a cry of 'emperor!' or something similar, thus detracting from his strength at the polls. It might be that the people generally would be impressed with the fact that Mr. Roosevelt has served only one term, having been elected only once to his high office, but I feel that, inasmuch as he will have served almost two terms, there will be many who will use this as an argument of some effect against him. It is a rule in commercial life to keep good men in their positions as long as possible, and this rule might be applied to public life more extensively than it is without the public service being the worse for it. Applying it to Roosevelt, he should be re-elected. D. N. PARRY,
"Merchant, Indianapolis, Ind."

Fears Roosevelt's Genius.

"Already the president of the United States is in the possession of kingly power. It is the limit that saved the name of it and the face of it. Extinguish this limit, and no constitutional monarch on earth possesses any such sovereignity.

"The election of Theodore Roosevelt in 1908 would proclaim to the world the failure of Republican institutions in America, and would be so accepted. It would as surely Mexicanize our system of government as free silver at the ratio of 16 to 1 would have Mexicanized our money system. To propose it would be to invite a political revolution such as that which broke up the Democratic party in 1896. It might not break up the Republican party, but it would so divide it as to procure its defeat. I have always held Theodore Roosevelt to be a statesman and a politician of the very first order of originality, sagacity and courage. Of his personal cleanliness I entertain no doubt. But in a democracy just such men become most dangerous when they let their ambition overlap their scruples. I do not fear the millions of Hearst. I do fear the genius of Roosevelt.

Nobody can dissipate this fear but Theodore Roosevelt himself, and not until the proper time arrives. That will be when the Republican national committee meets in Washington to prepare for the ensuing Republican national convention. If the president, reminded by the ominous silence of Grover Cleveland on a similar occasion, will call this formative body before him, and will say to them: "He who proposes to keep me here an hour after the 4th of March, 1909, is my enemy and the enemy of his country," or words to this effect, my judgment is that he may not only name his successor, as Jackson did, but can take a life seat in the senate, there to do inestimable public service, going to his final account a good third with Washington and Lincoln!

The alternative picture, even in the event he were elected to succeed himself, would be but a kind of pinchbeck Caesar keeping company with Bolivar and Diaz.

HENRY WATTERSON,
Louisville, Ky.

What Wise Thinks.

The paramount need of the great industry forming the bulk of the business life of America today is a fixed policy of administration. These know fairly well what Roosevelt would do if elected. That predisposes them to him. He has also captivated a large number of the masses by the boldness and directness of his words and action. There is no sound reason against a third term. The arguments are sentimental rather than sound. If Roosevelt should consent to be nominated for a third term, which, by the way, would not be a third term in his case, I do not believe he would lose any considerable vote by reason of any prejudice against the third term idea. He would, however, lose some votes by the vacillation shown in running after having so solemnly declared that under no circumstances would he be a candidate. However honestly he may have made that announcement, and however strong may be his reason for his changing, there would be plenty of people to asperse his motives and refuse to support one who did not adhere to his declaration.

JOHN S. WISE,
Former Congressman from Virginia,
New York City.

The unwritten law against a third term for the presidency is one that should be respected. I should find little difficulty myself in reaching the conclusion that President Roosevelt might stand as a candidate in 1908 without falling under the third term rule were it not for his explicit declaration. I believe that his expression was of a definitely reached conclusion, and therefore I do not feel at liberty, as a friend and admirer of Mr. Roosevelt, to discuss him as a possible candidate.

H. A. GARFIELD,
Princeton, N. J.

Has Had the Limit.

I have only to say that Mr. Roosevelt, having had practically two terms, which is the full limit under all precedent, and having declared himself as unwilling to be a candidate another term, I agree with his good sense upon this question.

JOHN WANAMAKER,
Philadelphia, Pa.

Illinois has been heart set on Roosevelt and I have no idea but what he will be compelled to play the part of the wise statesman and bend to his country's wishes.

SHELBY M. CULLOM,
Senator from Illinois.

Political affiliations do not seem to enter into the minds of the people of West Virginia on the matter of the candidacy of President Roosevelt for another term. They are determined he shall be the candidate.

STEPHEN B. ELKINS,
Senator from West Virginia.

As to Col. Roosevelt's promise not to run for a third term, I merely wish to say to attempt to prescribe any ethical rules for Mr. Roosevelt's conduct would be supererogatory in the extreme. As to his running for a third term, I have never had a moment's doubt. As to his election, the only thing that can prevent it is a sane Democracy.

CHARLES A. TOWNE,
New York city.

Summary of Views Expressed.

Summarized, the views expressed to the Herald size up as follows:

Senator Cullom (Rep.), Illinois—Yes.
Senator Elkins (Rep), West Virginia—Yes.
Senator Patterson (Dem.), Colorado—No.
Henry Watterson (Dem.), Kentucky—No.
Governor Hoch (Rep), Kansas—Yes.
George C. Pardee (Rep), former governor of California—Yes.
Champ Clark (Dem), representative, Missouri—No.
John A. T. Hull (Rep), representative, Iowa—Yes.
Senator Davis (Dem), Arkansas—No.
John S. Wise (Rep.), former congressman of Virginia—Yes.
John A. Sullivan (Dem.), representative, Massachusetts—No.
Charles H. Grosvenor (Rep.), representative, Ohio—Yes.
J. Warren Keifer (Rep.), representative, Ohio—Yes.
W. J. Conners (Dem.), chairman New York Democracy—No.
J. N. Adams, (Dem.), mayor of Buffalo—No.
Charles A. Towne, (Dem.), former representative—No.
John Wanamaker, merchant—No.
C. M. Post, merchant, Battle Creek—Yes.

Richard Mansfield, actor—Yes.
David Warfield, actor—Yes.

KILLED BY STREET CAR.

New York, March 6.—Mrs. Jacob Tumbridge, wife of Maj. Jacob Tumbridge of Brooklyn, was run over by a street car on Brooklyn bridge yesterday and instantly killed. Mrs. Tumbridge was riding in an automobile in company with her husband and his father, Capt. William Tumbridge. Mrs. Tumbridge was frightened by the approach of the car and arose from her seat. The automobile swerved, throwing her in front of the car which crushed her to death.

Woman's Watchword Is Modesty.

Whatever threatens woman's delicate sense of modesty, frightens her. For this reason many a woman permits disease of the delicate womanly organs to become aggravated because she cannot bring herself to submit to the ordeal of unpleasant questionings, offensive examinations, and obnoxious local treatments, which most physicians think necessary. Doubtless thousands of the women who have taken advantage of Dr. Pierce's offer of free consultation by letter have been led to do so by the escape thus offered from a treatment repugnant to modesty.

Any sick woman may write to Dr. R. V. Pierce, Buffalo, N. Y., in perfect confidence; all letters of consultation being treated as strictly private and sacredly confidential, and all answers being sent in plain envelopes with no advertising or other printing upon them. Such consultation costs you nothing whether you take treatment from Dr. Pierce or not.

Dr. Pierce's Favorite Prescription has been long hailed as a "God-send to women." It makes weak women strong and sick women well. It enables women suffering from "female weakness," prolapsus uteri, retroversion, anteversion, and other displacements of the organs distinctly feminine, to cure themselves right in the privacy of their homes. Pelvic catarrhal drains, painful or irregular periods, backache, frequent headaches, weak nerves, dragging-down pain or distress in the lower abdominal, or pelvic, region, gnawing sensation in stomach, dizziness, or faint spells, and kindred conditions and symptoms are cured by Dr. Pierce's Favorite Prescription. It is not a secret or patent medicine, against the use of which most people of intelligence naturally object, but is, in fact, the "Favorite Prescription" of a regularly educated and experienced physician in the treatment of woman's peculiar ailments and who is not afraid to publish all its ingredients, as he does, on its bottle-wrapper, attesting the correctness of the same under oath.

"Favorite Prescription" is the one medicine for woman's delicate ailments which contains neither alcohol nor harmful, habit-forming drugs, being a pure glyceric extract of curative principles found in our most valuable native, medicinal roots, as attested by many of the most eminent medical writers and teachers of all the several schools of practice.

Dr. Pierce's Favorite Prescription is a scientific medicine, carefully devised by an experienced and skillful physician, and adapted to woman's delicate system. It is made of native American medicinal roots and is perfectly harmless in its effects *in any condition of the female system.*

As a powerful invigorating tonic "Favorite Prescription" imparts strength to the whole system and to the organs distinctly feminine in particular. For over-worked, "worn-out," run-down, debilitated teachers, milliners, dressmakers, seamstresses, "shop-girls," house-keepers, nursing mothers, and feeble women generally, Dr. Pierce's Favorite Prescription is the greatest earthly boon, being unequaled as an appetizing cordial and restorative tonic.

As a soothing and strengthening nervine "Favorite Prescription" is unequaled and is invaluable in allaying and subduing nervous excitability, irritability, nervous exhaustion, nervous prostration, neuralgia, hysteria, spasms, St. Vitus's dance, and other distressing, nervous symptoms commonly attendant upon functional and organic disease of the uterus. It induces refreshing sleep and relieves mental anxiety and despondency.

You can't afford to accept a *secret* nostrum as a substitute for this PROVEN REMEDY OF KNOWN COMPOSITION.

"The Blood is The Life."

Science has never gone beyond the above simple statement of scripture. But it has illuminated that statement and given it a meaning ever broadening with the increasing breadth of knowledge. When the blood is "bad" or impure it is not alone the body which suffers through disease. The brain is also clouded, the mind and judgement are effected, and many an evil deed or impure thought may be directly traced to the impurity of the blood. Foul, impure blood can be made pure by the use of Dr. Pierce's Golden Medical Discovery. It enriches and purifies the blood thereby curing, pimples, blotches, eruptions and other cutaneous affections, as eczema, tetter, or salt-rheum, hives and other manifestations of impure blood.

In the cure of scrofulous swellings, enlarged glands, open eating ulcers, or old sores, the "Golden Medical Discovery" has performed the most marvelous cures. In cases of old sores, or open eating ulcers, it is well to apply to the open sores Dr. Pierce's All-Healing Salve, which possesses wonderful healing potency when used as an application to the sores in conjunction with the use of "Golden Medical Discovery" as a blood cleansing constitutional treatment. If your druggist don't happen to have the "All-Healing Salve" in stock, you can easily procure it by inclosing fifty-four cents in postage stamps to Dr. R. V. Pierce, 663 Main St., Buffalo, N. Y., and it will come to you by return post. Most druggists keep it as well as the "Golden Medical Discovery."

You can't afford to accept any medicine of *unknown composition* as a substitute for "Golden Medical Discovery," which is a medicine OF KNOWN COMPOSITION, having a complete list of ingredients in plain English on its bottle-wrapper, the same being attested as correct under oath.

Dr. Pierce's Pleasant Pellets invigorate the stomach, liver and bowels. One to three a dose. Easy to take as candy.

They act like Exercise.

SPORTING NEWS OF THE DAY

CHALLENGE TO BEELL

Billy Maynard Wants to Wrestle the Wisconsin Wonder.

Admits That Jim Parr Handed Him a Prize Package.

Admitting that his match with Parr had not been strictly on the level, Billy Maynard called on the sporting editor of The Herald yesterday and asked to issue a challenge to Fred Beell.

"I admit that I threw the hooks into a certain crowd in Duluth," said Maynard, "but they had it coming. On that last Parr match I was given the double cross, however, and Parr and his friends certainly handed me a prize package.

"I want to wrestle Beell, however, or any other good heavyweight, and I want to wrestle them on the square. No more fixed matches for me.

"I can throw Parr if we meet on the level. I am perfectly confident of this, and I know my man. I am willing to wrestle him for a $1,000 side bet in private, without any stakes, receipts or purses, just to prove it. I can get backing to that amount.

"I consider Beell one of the greatest men of his weight in the world, and the chances are that he would throw me, but I believe I could give him a great run for the money. The betting would probably be in his favor, but there might be a surprise sprung.

"If any of them want to meet me, let them communicate with you and post their forfeits with the sporting department of The Herald. They will find me on deck to meet them, and meet them on the square."

NORTHERNS VICTORIOUS

Defeat Houghton Highs in Fast Game at Houghton.

Winters and Deetz Were Stars for the Duluth Team.

Houghton, Mich., March 6.—The Northern Hardware hockey team of Duluth defeated the Houghton high school team here last evening by the score of 6 to 4, in one of the fastest amateur hockey games of the season. The locals were outplayed throughout the game by the Duluth team except during a few minutes before the end when the Highs scored two and evened up the points. Capt. Roy Deetz of the visitors, with only one minute to play, scored No. 5 and just before the whistle sounded Winters scored the final point.

There was a lack of team work shown by both the locals and the visitors. The first half was unusually free from dirty tactics, but in the second half of the play there was more or less slashing. The only player penalized was Heughens of Houghton.

Duluth's first score was made by Winters in seven minutes and in another seven minutes he had scored again. Krellwitz scored for Houghton in twenty-three minutes and the first half ended 2 to 1. The third for the visitors was made in five minutes of the second half by Deetz, and a minute later Krellwitz had made it two for Houghton. Deetz made it four for Duluth in fourteen minutes and then Krellwitz and Sicot with two points tied the score and there remained but one minute of play. The local were played off their feet in this brief interval, however, and were scored upon twice by the visitors. For Duluth Winters and Deetz were the stars, while Wortley and Smith starred for Houghton.

BILLIARDS IN NEW YORK.

Two Games are Played in Amateur Tournament.

New York, March 6.—Two games were played yesterday in the national amateur billiard championship tourney, which began Monday at the Liederkranz club. Both were interesting, the first between Conklin and Gardner because of its closeness, 300 to 299, and the second, between Mial and Poggenburg, for the surprise it furnished in the defeat of the former national amateur champion. The score for this second game was 300 to 209.

The afternoon game was hard fought to the finish, Champion Edward Gardner of Passaic, N. J., winning from Charles F. Conklin of Chicago in the forty-sixth inning by one point. The game occupied 3 hrs. and 22 mins. Score:

Gardner—2, 1, 1, 20, 7, 17, 2, 6, 5, 43, 0, 0, 1, 2, 9, 2, 1, 13, 6, 55, 3, 7, 0, 2, 15, 2, 1, 1, 0, 2, 10, 1, 0, 0, 1, 0, 0, 7, 4, 5, 2, 3, 0, 0, 5, 7—total, 300; average, 6 24-46; high run, 55.

Conklin—10, 3, 7, 0, 1, 7, 7, 0, 3, 11, 0, 6, 1, 13, 0, 2, 2, 61, 0, 1, 16, 2, 0, 34, 0, 15, 0, 0, 3, 1, 0, 4, 0, 0, 2, 33, 5, 0, 13, 0, 0, 1, 0, 0, 17—total, 299; average, 6 29-45; high run, 61.

BURNS THROWS PARR.

Englishman is Defeated in Wrestling Match at Omaha.

Omaha, March 6.—"Farmer" Burns won his wrestling match with James Parr, champion of England at the Auditorium last night. Parr took the first bout in twenty-one minutes and Burns the second and third in thirteen and twenty-four minutes respectively. The wrestling was catch-as-catch-can.

PENNANT TO HOUGHTON

Portage Lake Wins Wildly Exciting Game From Pittsburg.

Taylor Scores Winning Goal by a Brilliant Dash.

Pittsburg, March 6.—(Special to The Herald.)—Portage Lake cinched the International Hockey league pennant in a wildly exciting game here last evening, winning by a score of 3 to 2.

About 5,000 hockey enthusiasts were on hand for the game, which was the decisive one in the hockey season. Pittsburg needed to win all three games of the series to capture the pennant. If Portage Lake got away with one of the three it would have the hunting cinched. Last night's game was the first of the three.

During the first half the visitors scored two goals and Pittsburg one. Early in the second half Gardner scored again for the Pittsburg, tying the score. The crowd went crazy and piled out on the ice to embrace their favorites, stopping the game for nearly ten minutes.

When the play was resumed, it was a slam bang affair, but just a few minutes before time was called, Fred Taylor made a brilliant dash through the entire Pittsburg team, scoring the wining goal single handed.

Campbell and Gardner starred for Pittsburg, scoring the two goals, while Taylor, Cochrane and Stuart were the stars for Portage Lake. Taylor scored one goal and Cochrane two.

The victory gives Houghton the pennant even though Pittsburg should win the remaining two games of the series.

JEFFERSONS WIN PENNANT

Interscholastic Basketball Season Comes to a Close.

The Interscholastic basketball league conducted by the boys' department of the Y. M. C. A. has just closed its season. The league has been such a success that the committee has decided to make it an annual affair. The Jefferson school has the honor of leading the league, not having lost a game. The Jeffersons had the advantage, however, of having each member of the team a member of the boys' department. They played a good clean game throughout and have developed into a fast five, and no doubt will make a place on the bigger teams next year. The league was open to all the schools in the city, and the teams were secured from the best players in the school, whether they belonged to the boys' department or not.

The games were all played in the afternoon and attracted a large number of boys, and a great deal of interest has been aroused in the game. Next year there will be more and better teams enter the league.

The Jefferson school will be awarded a silver pennant made in the colors of the school. It will be presented some time during the last of the month. Jefferson line-up: Herbert Helmer, Palmer Bevis, Alphonse Walter, David McLeod, Percilious Landfald.

The standing of the teams:

	Won.	Lost.
Jefferson	6	0
Washington	5	1
Endion	3	3
Emerson	2	4
Lincoln	1	5
Adams	0	6

The Jeffersons will play the Washingtons, the winners of second place, in an exhibition game Friday afternoon at 4:30.

RECEPTION FOR FRANK MAXWELL

Duluthians to Bid Farewell to Y. M. C. A. Physical Director.

Mr. and Mrs. Frank A. Maxwell will be given a farewell reception by the members and friends of the Young Men's Christian association this evening at the association building before their departure for Western Canada in a few days. The reception will be held this evening at the association headquarters from 8 to 10 o'clock.

This city has been the home of Mr. and Mrs. Maxwell for the past six years, and the couple have made a host of friends during that period. Following an informal program of music, instrumental and vocal, at the reception this evening, several prominent Y. M. C. A. workers will deliver addresses.

The local Y. M. C. A. has retained the services of Mr. Maxwell as physical director for the past six years, and the many people who have developed under his instruction regret greatly to see him leave Duluth. Alberta, Canada, is the destination of Mr. Maxwell and his brother when they leave this city, March 13. They have taken up farm lands there and will make their future homes in Canada.

The public has been invited to attend the reception this evening and bid farewell to Mr. and Mrs. Maxwell.

Wants to Meet Gans.

Syracuse, N. Y., March 6.—Tommy Ryan, who Monday night fought Hugo Kelly at Rochester, said yesterday that he would accept the offer of the Tonopah Athletic Club of Tonopah, Nev., to fight Joe Gans for a purse of $30,000 on Labor day, and will go into training as soon as the articles are signed.

Billy Maynard has decided that there is nothing in the wrestling game as long as matches are fixed, and wants to get some straight sport.

Maynard certainly has the goods. Nobody in Duluth ever questioned his ability on the mat, and he is probably as good a man of his weight as there is in the country, with the possible exception of Beell and perhaps one or two others. How he would line up with Beell is a question. He would give the Wisconsin wonder a hard match, and might possibly throw him.

He has authorized a challenge to Beell through the sporting columns of The Herald, and if Beell accepts, a match will probably be pulled off in Duluth in the near future. Duluth people won't stand for any more crooked wrestling, and if such a match is held here, and arranged through the sporting editor of this paper, it has got to be on such terms as will make any faking impossible.

* * *

The Portage Lake hockey team of Houghton has once more won the championship of the International league, which means the championship of this country, and possibly of the world, for few Canadian teams compare with those in the International league.

Here's hoping that Duluth will see a game like that played in Pittsburg last night, next year, and be more successful than Pittsburg was.

* * *

The big rink at Houghton didn't worry the Northern Hardware hockey players a little bit, and they repeated the defeat administered to the Houghton amateurs in Duluth there, last evening.

* * *

The Duluth Yacht club does not propose to be left behind in the matter of improvements by the Duluth Boat club, and it is planning to make some additions and extensions, an account of which is given in another column.

Duluth is so situated that it should be one of the leading cities of the country in regard to water sports. There is plenty of room for both the yacht and boat clubs, fostering as they do different lines of sports, and their rapid growth is gratifying.

ARE NEARING THE FINALS

Competition Among Curlers is Narrowing Down Rapidly.

The finals in the curling contests will probably be reached by the end of this week, and another week will be left for the wind-up of the season's sport.

A. H. Smith qualified for the finals last evening by defeating Ron McLeod's rink 11 to 7. E. N. Bradley defeated Myron last evening 11 to 9. This leaves Bradley and Fred Smith to play out the semi-finals.

In the Meader event, Stillman, Dinham, Whyte and Nichols are the only four skips left, and in the Manley-McLennan event Fred Smith, Tresise and McRae are left in the third squad, with A. H. Smith, Myron and Annecke in the fourth and Catlin and Jones in the first. Dinham has distanced all competitors in the first.

Last evening's games were as follows:

ST. LOUIS COMPETITION.

C. A. Payne,	G. H. Spencer,
W. C. Harris,	W. L. McLennan,
F. A. Currier,	D. W. Stocking,
A. H. Smith, Skip—11.	R. J. McLeod, Skip—7.
D. A. Willard,	P. H. Seymour,
Alex Graham,	W. S. Telford,
E. R. Jacobi,	T. F. McGilvray,
E. N. Bradley, Skip—11.	J. C. Myron, Skip—9.

MANLEY-McLENNAN COMPETITION.

E. W. Deetz,	M. H. Alworth,
W. Spalding,	E. A. Forsythe,
W. G. Hall,	Thomas Gibson,
Fred Smith,	Alex Macrae,
Skip—19.	Skip—9.

LIKELY TO MEET AGAIN.

Kid Deno and Milton Will Probably Have Match Friday Evening.

As Adams has not yet succeeded in losing enough weight to permit him to accept Charley Watson's challenge to any wrestler in the 133 pound class, it is probable that Kid Deno and Milton will toy with each other on the wrestling mat at the Metropolitan Friday evening. Adams and Watson may meet there on the following Friday evening.

Deno is anxious to meet Milton again and a good match is looked for Friday evening. In the match last Friday evening, he secured one fall and lost the other two. He secured his fall by a clever head lock, from which Milton plans to keep away if they meet again.

DISTRIBUTES THE MAIL REGARDLESS OF ADDRESS.

Tacoma, Wash., March 6.—Many protests have been made to the Bellingham postoffice because of the peculiar manner in which mail is distributed by the carrier on the new Goshen rural route. Very little of the mail had been delivered properly since the route was established, on February 15th, and so serious did the mix-up become that Postmaster Eldridge of Bellingham dispatched a man to discover the cause.

The investigator found that a German with little knowledge of the English language had been appointed carrier, and he is said to have placed letters and papers in boxes regardless of the addresses. Apparently he believed there should be a fair distribution, and with that done he considered his duty acomplished. The German frankly admitted that it was too much trouble to read the addresses.

Constipation causes headache, nausea, dizziness, languor, heart palpitation. Drastic physics gripe, sicken, weaken the bowels and don't cure. Doan's Regulets act gently and cure constipation. 25 cents. Ask your druggist.

WILL BUILD NEW HOME

Many Improvements Are Planned for the Yacht Club.

Ball Room and Branch House Will Be Built.

In a very neat and pretty little booklet just issued, announcing its plans for the coming season, the Duluth Yacht club states positively that the dream of its members for a larger and more complete clubhouse is about to be realized, and that work on the new building will be begun within the next few weeks.

The clubhouse will not be entirely new, for it will be built on to the old building. There will be so many additions, however, that it will be practically a new building throughout. All the work on it will not be done this summer, but it will be erected one wing at a time, as conditions warrant, and possibly the entire structure will not be completed before next year.

The first addition to be built will be a fine ball room. Work on this will start very soon, and it will be in readiness for use by the time the summer season opens. This ball room will be one of the finest in Duluth, measuring ninety-four feet in length. The floor will be the best human skill can make it. Hereafter the social side of the organization will receive even more attention than in the past, and the ball room will have a big influence in this direction.

The cafe service was popular with members last year, and in future the accommodations in this respect will probably be larger. There will be private dining rooms in connection. A social club room will afford members a comfortable lounging place. Dormitories will be located in the clubhouse. Tennis courts and a bowling alley will be located on the shore lots. A branch club and launch house will be erected at Lester river.

CASE BILL IS KILLED.

(Continued from page 1.)

vote by which the tax amendment was adopted and the good roads amendment defeated so far as legislative action is concerned.

* * *

For a Women's Dormitory.

If the finance committee of the senate and the appropriations committee of the house refuse to provide the money for a woman's dormitory at the state university, the committee hearts must be hearts of stone.

The two committees had a joint session yesterday afternoon, to hear arguments in behalf of the construction of a dormitory, and these arguments were presented by a bevy of bright and beautiful girl students, assisted by some of the women who instruct them.

They told of the difficulties of finding good boarding houses for the girls who come from the country and outside the Twin Cities. They told of the expense attaching to their schooling under these conditions. They told of the lack of comforts many of them are forced to suffer in order that they may be educated. They told of the temptations that surround these girls, alone in a strange city. They told of the advantages offered by a womens' dormitory, where the girls can be together and in the care of suitable supervisors, and where they can get better accommodations at lower rates than they can in the boarding houses.

It was shown, too, that at present only a third of the girls attending the university are from elsewhere than the Twin Cities, and that this is due to the expense and inconvenience attending upon the lack of suitable dormitories.

Many of the girls spoke, telling their personal experiences, and giving sound arguments in favor of the dormitory. They told their stories well, too. They were self-possessed, as a rule, well-poised, and in marked contrast in point of bearing to boys of similar age under similar conditions.

* * *

County Option Bill.

The house temperance committee held its second hearing yesterday afternoon, when both sides were heard on the county option bill. At the last meeting the temperance people only were heard, but this time those who are against the enactment of a county option law were given an inning, and they were answered by more orators, speaking from a temperance standpoint.

The hearing took place in the house chamber, and the room was packed to suffocation by temperance advocates. They were very enthusiastic, and prone to express their feelings loudly. When those opposed to the bill were talking, they greeted their statements with hisses and derisive laughter, and finally Chairman Webster was compelled to call them down, which he did gently but firmly, and with apt diplomacy. He told them that if the speakers on either side did not receive a respectful hearing, the committee would be forced to adjourn to a smaller room, where such a hearing could be had.

P. C. Schmidt of Duluth led the argument in opposition to the bill. Besides Mr. Schmidt, city officials from Mankato, Fergus Falls, Rochester and East Grand Forks opposed the bill.

Mr. Schmidt furnished the keynote of the arguments against the bill. He said that it is not within the spirit of the constitution, because, under an ameadment adopted in 1896, the cities were given the right of local self-government, including the right to frame their own charters, thereby making their own laws. County option takes that power away, in a measure, and gives it to the residents of counties outside the cities. The idea of the provision is that the cities are better able to take care of themselves than anybody else, and it is inconsistent with this to let people outside of a city regulate its conduct of the saloon business. It would be just as fair to let the outsiders regulate street paving or any other local matter.

Furthermore, he said that the county option law would mean that the people of a county would have a chance to vote on whether they were to have licensed saloons under strict regulation, or blind pigs. It is impossible to stop the use of liquor, and the only thing that can be successfully done is to control its use. Measures tending toward prohibition simply make things worse. Prohibition has been repudiated in all but three states in which it has been tried, and in those states the fact that it is ineffective is shown when it is proved that there are more government liquor licenses than there are in license states, and more convictions for crime. He quoted statistics tending to show that in certain cities in prohibition states the proportion of arrests for drunkenness is greater than in cities of similar size in license states. He quoted scholars and statesmen against prohibition, and said that all it does is to legislate out the harmless beers and mild wines, and to legislate in the vilest whiskies that man ever concocted.

A number of talks were made on the temperance side of the argument. The idea of the friends of the bill is that it is a matter on which the people should have a right to vote, and that the legislature should not refuse them this right.

* * *

Iron Ore Taxation.

The Cooke committee to investigate iron taxation will have another meeting this afternoon, when the range delegates will be heard in opposition to the proposed tonnage tax.

An attempt is being made to show that there is a widespread popular demand for a tonnage tax in this state.

As a matter of fact there is absolutely nothing to indicate such a public demand. There undoubtedly is a widespread feeling that the iron mines are not contributing enough taxes to the state, but the tonnage tax idea is a legislative growth entirely, and does not come from the people.

Neither is it true that a tonnage tax is certain to go through the legislature, or through either branch of it. There is unquestionably a strong sentiment in favor of it in the house, but it has yet to be shown that that sentiment is strong enough to force the bill through. There is much less sentiment in favor of the tonnage tax plan in the senate, though that body unquestionably feels that something should be done to give the state more taxes from the iron mines.

Some hard work will have to be done to defeat the tonnage tax, but the majority of the members of the legislature are reasonable and would be reluctant to do anything involving serious injustice to a large section of the state.

It is not possible for the legislature to increase the assesment on the iron mines, but it can recommend that the values for purposes of taxation be increased to $200,000,000 or any other sum it sees fit, and there is little doubt that the state board of equalization, or the tax commission, if one is created, will see that the task is performed.

* * *

Wires Over Railroads.

The house committee on express, telegraph and electric lines had a public hearing yesterday afternoon on two pending bills regulating the stringing of wires over railroad tracks. The pending bills provide that the railroad and warehouse commission should have jurisdiction over the subject matter of the bill, but the committee decided that this machinery was too cumbersome, and sent the bills to a subcommittee to be redrafted.

Railroad employes are back of the measures. It is claimed that where poles are not strong, or wires are too low, that they form a serious menace to railroad trainmen. The bill will provide, as redrafted, that telegraph and telephone wires shall be at least twenty-five feet from the tracks and trolley wires twenty-two feet. It was at first proposed to have trolley wires at the same height as others, but street railway men were able to convince the members of the committee that if the wires were too high the trolleys would be likely to slip off, leaving the cars stranded across the tracks in danger from passing trains.

* * *

Increasing Salaries.

The legislature will have a chance to vote on whether the salaries of lawmakers in this state shall be increased to $1,000 for a term of two years. The house committee on compensation of public officers yesterday afternoon voted to recommend for passage the Wells bill making this increase. At present the members get $5 per day, or about $530 for each biennial session. The bill originally provided that the lieutenant governor and speaker in addition to the same salary as the rest, should get $10 a day, but the committee cut this to $5.

* * *

The same committee took up the Brady bill, increasing the salaries of state officers, and decided to have a hearing Friday afternoon; when the officers can come in and state their cases if they wish to.

The Brady bill raises the governor from $5,000 to $7,500; the auditor from $3,600 to $5,000; the secretary of state from $3,500 to $5,000; the treasurer from $3,500 to $5,000 and the attorney general from $4,800 to $6,000. With the exception of the attorney general's, these salaries were fixed many years ago. The governor's and state auditor's pay was fixed in 1885, the secretary of state's in 1887, and the treasurer's in 1874. The attorney general was raised to $4,800 in 1903.

Before it was decided to have the public hearing, the committee had started to shave down the proposed increases, and had cut the governor to $6,000 and the attorney general to $5,000.

* * *

General Legislation.

The house committee on general legislation yesterday afternoon recommended for passage the Case bill providing that where the owner of property is killed, none of those responsible for his death can participate in the distribution of his estate.

The same committee approved Representative Saari's bill providing that county funds may be left with banks on time deposits, drawing a larger rate of interest. It also approved Representative Randall's dog bill, providing that dogs must be muzzled. The committee also aproved the Rachie bill requiring the public examiner to make reports semi-annually instead of annually.

The Adams bill requiring the licensing of public accountants was killed by this committee, and F. T. White's bill prohibiting discrimination in wholesale dealing, levelled at the coal combine, was referred to the judiciary committee for its consideration.

* * *

The bill that Senator Vail, himself a brewer, introduced in the senate yesterday regulating the issuance of liquor licenses, will have a deep interest for the brewers that operate saloons as a part of their business. It prohibits the issuance of licenses to anybody but bona fide owners of saloons, and it provides further that, when the holder of a liquor licenses ceases to become the actual owner of his saloon, the license shall cease to be effective.

A large proportion of the saloons in the cities are owned by the brewing companies, and operated by employes on salary or commission. The Vail bill would cut this all out, and under it nobody could operate a saloon who did not actually own it.

STILLMAN H. BINGHAM.

WAITRESS WANTS TO BE REPAID

Says She Grubstaked Man Who Found Nevada Wonder Mine.

Reno, Nev., March 6.—L. A. Savage, a young mining man of wealth and prominence, discoverer of the Nevada Wonder mine, was arrested upon complaint of Simona Aguirre. Miss Aguirre, while a waitress at Tonopah, grubstaked Savage with $700 on April 18th of last year. Savage went to Wonder and located claims which later made him rich, but he forgot his benefactress. On February of this year she agreed to take $20,000 and 500 shares of Nevada Wonder stock for her interests, but this was never paid. Now she wants $40,000 as her share.

Several friends of Savage have been arrested to recover stock given to them to keep. One detective recovered $8,000 worth of stock in this manner. Friends claim that the woman wants Savage to marry her, and that the suit is instituted to force the wedding.

LOOKS LIKE MURDER.

A Wealthy Cleveland Woman Found Dead in Her Home.

Cleveland, Ohio, March 6.—Mrs. Minnie Sherman, a wealthy widow, residing in the exclusive village of Euclid, on Euclid avenue, was found dead in her home last night under circumstances pointing to murder. The police are working on the theory that the woman was drugged with poison and robbed early yesterday. An autopsy will be performed by the coroner. Mrs. Sherman was negotiating for the disposal of part of her property, and the deal, it is understood, was to have been closed yesterday. During the night the woman tried to summon her neighbor, Dr. Stark, on the telephone, but her message was suddenly interrupted, and the doctor did not respond.

The authorities found the house rifled and the dead woman's body lying on the floor, her eyes dilated as if from the effects of poison, the doctors declare. Her jewelry was gone and her strong box emptied.

THREW BABY AT HER.

Father Attempted to Assault Mother, But Son Caught Human Missile.

Philadelphia, Pa., March 6.—Joseph Higgs and his wife Mary have lost the custody of three of their four children because of their fondness for liquor. It is charged that while both parents were drunk on Saturday afternoon the father threw their 18-months-old baby at the mother, but their oldest child, John, 10 years old, caught the baby and saved it from harm.

Higgs and his wife were arrested, but Magistrate Gorman allowed them to go after they had promised to keep sober in the future. The three oldest children were turned over to the society.

OLD SORES FED AND KEPT OPEN BY IMPURITIES IN THE BLOOD

An old sore or ulcer is only a symptom, an outlet for the impurities and poisons which are circulating in the blood, and as long as this vital fluid remains in this impure and contaminated state the place will never heal. It may scab over and appear to be getting well, but a fresh outpouring of diseased matter from the blood starts it again, and thus it goes on, sometimes for years, continually growing worse, and slowly sapping away the streugth and vitality of the sufferer.

There are many ways by which the blood may become contaminated and poisoned. A long spell of fever, or other sickness, breeds disease germs in the system, the failure of nature's eliminative members to remove the waste and refuse matter of the body, the excessive use of minerals in certain diseases, all infect the blood with morbid matter and germs, which sooner or later manifest their presence by a sore or ulcer which refuses to heal under the ordinary treatment of salves, washes, lotions, powders, etc. A boil, blister, pimple, burn or even a slight scratch, often develops into a festering or discharging ulcer if the system is run down or the blood depreciated from any cause.

A BAD SORE ON HIS FACE.

I was afflicted with a sore on my face of four years standing. It was a small pimple at first but it gradually grew larger and worse in every way until I became alarmed about it and consulted several physicians, They all treated me but the sore continued to grow worse. I saw S. S. S. advertised and commenced its use and after taking it awhile I was completely cured. My blood is now pure and healthy from the effect of S. S. S., and there has not been any sign of the sore since S. S. S. cured it.

West Union, Ohio. THOS. OWEN.

Persons with an inherited blood taint are very apt to be afflicted with sores and ulcers. Being born with an unhealthy blood supply, the different parts of the body are never fully nourished, and when middle life is reached or passed and the vigor and strength of the system begins to weaken and wane, the tissues in some weak point break down and a chronic sore or ulcer is formed, and kept open by the constant drainage of impure matter from the blood. How aggravating and stubborn an old sore can be is best known by those who have nursed and treated one for years, applying salves, washes, powders, etc., with no good results. The place remains and continues to grow worse by eating deeper into the surrounding flesh, festering, discharging, sometimes throbbing with pain, and gradually undermining the constitution by its unhealthy action on the system.

It is a great mistake to expect to cure these places with external applications. True this treatment assists in keeping the parts clean, and are beneficial in this way, but do not reach the real trouble which is in the blood. The practice of cutting out the diseased parts and even scraping the bone beneath, is often resorted to, but these severe measures seldom do any permanent good. The sore may be removed, and for a time heal over, but the same poison that produced it the first time is still in the blood, because ***The Blood Cannot Be Cut Away,*** and ***The Sore Will Return.***

S.S.S.

PURELY VEGETABLE

The only treatment that can do any real good is a competent blood purifier—one that goes to the very bottom of the trouble and removes the cause, and for this purpose nothing has ever been found to equal S. S. S. It goes down into the circulation, drives out all poison and morbid matter, reduces the inflammation, and by sending pure, rich blood to the diseased parts, instead of feeding them with impurities, allows the sore to heal naturally and permanently. Not only does S. S. S. purify the blood of all poisons and germs, but builds it up from its weakened and impoverished state, making it strong and healthy and able to supply every part of the body with sufficient and proper nourishment to keep it in perfect health. If you have a sore that is slow in healing, do not depend upon external applications alone, nor experiment with unknown medicines, but begin the use of S. S. S., and by removing every vestige of the cause, cure the trouble permanently. Special book on Sores and Ulcers and any medical advice desired sent free to all who write.

THE SWIFT SPECIFIC COMPANY, ATLANTA, GA.

CONCERNING WOMEN.

Tomorrow morning the last meeting of the year of the Morning Shakespeare class of the Twentieth Century club will be held. A special program will be given, with readings by Miss Mae Wylie, Miss Shesgren and Mrs. Mary Nelson. Following the program, the annual meeting of the literature department of the club will be held. The Morning Shakespeare, the Morning Browning classes and the literature class of the club belong to the literature department of the club, and the election of leaders will take place. The members of these classes are urged to be in attendance. The hour of meeting is 10 o'clock.

SCHUMANN-HEINK

Great Contralto to be Heard at Lyceum May 1.

Of artists there are always two opinions. This is always so true that the one exception will prove it to every mind. People hear a singer, and one says, "The voice is all right, you know, but," with an aesthetic shudder, "the technique! Mercy!" and the next person: "The training is all right but, goodness me, the voice is so disagreeable," and the third says, "The training and voice are all right, but there is no temperament, and that's the essential thing after all." These three opinions are the ones heard about the work of a single person in nine cases out of ten. The grand exception to this rule of artistic and lay opinions of great artists is in Schumann-Heink. She appeals to the most cultured of the educated musicians, and to the least musically educated person who comes within reach of her compelling good nature and radiant charm. There will be undiluted pleasure broadcast in the announcement that she will sing in recital at the Lyceum Wednesday evening, May 1.

In the Windows.

Everything must match this spring. If one chooses a suit of soft tan, or an exquisite faded brown, one must have a waist of deep ecrue of the proper tone to go with it. Then one must get very smart low tan shoes, or if one can afford it, those lovely, dull and soft buckskin kind. One purchases next a bracelet of broad, stiff chased gold set, with three gleaming bits of yellow glass, that are a blending of agreeable color. Next, one buys a pair of soft, long gloves, of the proper tone, and a hat with a few buttercups, or brown eyed and yellow-petalled susans. Nobody with a bit of taste but would also get a bottle of something to bring out the golden lights in one's hair. If one's money has not given out yet, which it probably did with the first purchase, one might get a golden chain, set at intervals with nice, glistening bits of topaz colored glass.

If one objects to so much yellows and browns, the soft green of Chinese jade is made up in some of the smartest novelties of the spring, and will furnish a pleasing note of contrast.

Butterfly bows, sassy little things, come already made of net, edged with a bit of blue, or green, or brown, or red silk, or some lace, and they are to be worn with the very stylish linen embroidered collars and cuffs. The neckware is one of the leading features of the new things that one sees through the windows.

Cecilian Society.

The Cecilian society will meet tomorrow afternoon with Miss Ethleen Fee of 2305 East Third street. The subject of the afternoon's study will be "Opera Bouffe." The program, which was arranged by Mrs C. P. Craig, is as follows:

Informal talk on Opera Bouffe and development of Opera Comique. Miss Josephine Carey.

Illustrations from "La Fevra Padrone," by Pergolesi (1732.) Mrs. Percy Gough.

Piano Duet—Pique Dame ....Helevey Mrs. Harry Strong and Mrs. K. A. Ostergreen.

Voice—"The Serenade from "I'Castilliana" ..... Paccia Mrs. George L. Tyler.

Piano Duet—Selections from Barber of Seville ..... Rossini Miss Isabel Pearson, Mrs. William Sargent.

Voice—"Una Voce Poco Fa" ..Rossini Mrs. Percy Gough.

Quartette—The Madrigal from the Mikado ..... Sullivan Mrs. C. P. Craig, Mrs. Herbert Jones, Mr. George Tyler and Mr. Suffel.

Voice—The Moon Song .....Sullivan Mrs. C. P. Craig.

W. R. C. Card Party.

The members of the Women's Relief Corps entertained at cards yesterday at Rowley hall. The six hostesses who received the guests and presided at the affair were in Dutch costumes and the luncheon served further followed out the keynote of a Dutch afternoon. The hostesses were Mrs. Rachael Ross, Mrs. W. M. Smith, Mrs. C. Best, Mrs. Lucken, Mrs. G. W. Gild, ond Mrs. G. W. Preston. Cards were played at twelve tables and the favors were won by Mrs. William Miller and Mrs. C. H. Fletcher.

W. C. T. U. Meeting.

An important meeting of the Women's Christian Temperance Union will be held tomorrow afternoon with Mrs. David Adams of 319 North Twenty-eighth avenue west. In response to roll call the names of noted women will be given and the subject of the afternoon's program is "Women's Educational Advantages." A large attendance is desired as business of importance will also come before this meeting.

Personal Mention.

Mr. and Mrs. D. Van Baalen of 522 East Third street have returned from a three weeks' trip to New York, Philadelphia and Boston.

* * *

Mr. and Mrs. Louis Oreck have returned from a six weeks' Western trip.

* * *

Mrs. H. V. Goetchius of London Road has gone to Massachusetts City, Mich., for a two weeks' visits with friends.

* * *

Mrs. Albert Abraham of 1430 East First street has returned from a visit at Philadelphia.

* * *

Mr. and Mrs. E. C. Blanchard have returned from a month's Southern trip. They attended the Mardi Gras festival in New Orleans, and visited in Mexico and Arizona.

Church Meetings.

The Ladies' Aid society of St. Paul's German Evangelican church will meet tomorrow afternoon with Mrs. C. Ottin of 414 East Fifth street at 2:30 o'clock. The Mission society of the same church met this afternoon with Mrs. W. Braun of 512 East Seventh street.

Farewell Dinner.

Miss Lee Morris, who will leave soon to make her home at Virginia, Minn., was the guest of honor at a dinner at the McKay hotel last evening. The guests were:

Misses—

Elyse Douglas, Jennie Halley, Mattie Goodman, Raleigh, Moe, Agnes Poirier, Dora Schneider, Louise Wilson, Belleperche, Hines.

Church Wedding.

A pretty wedding took place last evening at the Norwegian Lutheran church when Miss Bordevine Hansen became the bride of Martin Sollie. The wedding service was read by Rev. Stenberg, and the wedding music was played by Prof. Horace W. Reyner. The bridesmaids were Miss Olga Sollie and Miss Alvilde Jentoff, and the groom's attendants were Olaf Halten and Albert Johnson.

After the ceremony, a wedding supper and reception took place at the home of Mr. and Mrs. Ingvald Westgaard of 732 East Fourth street. Mr. and Mrs. Sollie will be at home at Two Harbors.

Before Legislature.

Miss Margaret Ryan of this city, who is attending the Minnesota university, was one of a committee of "co-eds" of the university who visited the legislature yesterday to make known their very great desire for a $100,000 dormitory for the "U." The other members of the committee who pleaded for the new dormitory were: Miss Rose Marie Schaller, Miss Emily Crosby, Miss Esther Chapman, Miss Amy Oliver, Miss Gladys Glendenning and Miss Josephine Schain.

What Retail Markets Offer.

Sweet potatoes, 4 lbs. for 25 cents.

Celery, 2 bunches for 25 cents.

Ben Davis apples, 50 cents a peck.

Peanut butter, 25 cents a jar.

Beef tongues, 60 to 70 cents each.

Pork tenderloin, 28 cents a lb.

Crabs, 30 cents each.

For many weeks the sweet potatoes in the market were thin, emaciated looking things which shriveled up to nothing but the skin after they had been baked. For these near delicacies you paid 25 cents for four pounds, which was extravagant and willful waste of money. But now the potatoes are looking like the picture of "after taking" for they are fat and prosperous and sound and good, and although the price remains the same, it is money well invested to have sweet potatoes.

It has been mentioned before that one of the nice possibilities of the season is a fresh cocoanut cake. But people who live in glass houses (there never were any, of course) in addition to refraining from throwing stones must deny themselves fresh cocoanut cake, for the only way to break the exceeding difficult and adhesive article called a cocoanut is to stand some few feet from a brick wall and heave the tropical product again and again at the trustworthy resistance. It will make a dent in just an ordinary frame house, and although the brick usually stands it there are always some few little nicks taken out. So if you own your own home, which anybody can do with a deposit of the price of one copper share down and the dividends paid regularly, you better not throw cocoanuts at it. Of course, if you have a landlord to get even with, it is a different matter. But if you have gone to all this trouble, the result, a delicate, tender tasteful, combination with a filling, soft, rich and piled high with the internal whiteness of the cocoanut—oh, my gracious, but it is good.

THE THIRD PERSON

By Owen Oliver.

(Copyright, 1907, by Joseph B. Bowles.)

"They're two of Sis' sweethearts," said Mrs. Vaughan, with a laugh, as Jack Read and James Bell went past the gate. I looked after them with surprised disapproval.

"Sweethearts!" I cried. "Why, the child has only just put her hair up."

Mrs. Vaughan laughed again.

"She's 18, you know. I had a couple of proposals before I was her age." She matched a skein of wool critically against the light. "For the matter of that, I believe they both propose to her about once a week." She settled upon the skein and resumed her work. "It seems only the other day that you used to call her your little wife.....Well, well.....You were always fond of her."

"Of course," I agreed. "Of course I am. Little girls are like kittens. They ought not to grow up. It makes one feel old." I sighed.

"Old maids and old bachelors are always older than other people," Mrs. Vaughan inspected the skein again, as if she mistrusted it. "Why don't you marry, George?"

"You aren't available," I pointed out. She threatened me with a knitting needle.

"My age relieves me from the necessity of boxing your ears."

"You are a boy to me." She shook her head slowly.

"You don't look 30," I protested.

"I'm 40 next week. You are 33, aren't you?" I nodded. "How old do you feel?"

"Anything from 25 to 100. I think Sis has kept me young. I shall miss her if she goes and gets married." We had been friends since she was a baby.

"You won't try to persuade her not to, will you?" Her mother laid her hand on my arm.

"You over-rate my powers of persuasion."

"I am not so sure of that. She thinks a great deal of what you say."

"Umph!" I got up and took my hat. "I'm afraid my reign is over. Anyhow, she hasn't told me about the sweethearts. Goodby."

"Good-by." Mrs. Vaughan held my hand a trifle longer than usual. "You will miss your little playmate, George," she said, gently. "You've always been so kind to her; so very, very kind. She'll never forget; but.....Time flies doesn't it. If I were you I should replace her by a wife. There are lots of nice girls."

"I'm afraid I should be hard to please. Sis and Sis' mother have set my standard——Bless them! Good-by!"

Then I went. As I was going slowly down the front path Sis swept in at the gate. She caught me by the arms and tried to spin me round. The dignity of her years had not fully come upon her.

"My dear man!" she cried, "you're looking as solemn as a funeral. What is the matter with you?"

"Sweethearts!" I said.

She opened her eyes wide. She has wonderful eyes and splendid long lashes.

"You haven't!" she cried. "If it's that horrid Miss Mellor I'll never speak to you again——Then I believe it's Miss Gray? I saw her talking to you after church on Sunday, and you wouldn't take any notice of me. She isn't a bit nice. So there!"

"I didn't say my sweethearts," I remarked. She had the grace to blush.

"Mother has been talking nonsense to you." She poked a stone with her parasol.

"Is it nonsense Kiddie?" I always used to call her that. "But I suppose you won't tell me your secrets now?"

She chivied the stone through the gate and into the gutter.

"You don't want to know my secrets now," she said, with an air of grievance. "I suppose that Miss Gray—her hat doesn't suit her." She nodded aggressively.

"Miss Vaughan has a new hat, I observe. She used to show me her new hats before she was grown up.....I wish you hadn't grown up, Kiddie."

"Well, pretend I haven't," she proposed. "Let's go down the lane and fish for tiddlers." She laughed and took my arm. "Do you remember when I fell in the pond?" I laughed, too.

"Don't do that today. I can't pretend you're little enough to carry home..... About those sweethearts, Kiddie?"

"Which?" she inquired, innocently.

"Tell me about all of them."

"We've only an hour and a half." She laughed wickedly, under her breath.

"Then tell me about Jack Read and Jim Bell. Which is it?"

"That is the difficulty," she stated.

"Which do you like best?"

"There's a bird's nest somewhere about here," she observed irrelevantly. "Three speckled eggs!"

"Which do you prefer?"

"They're all alike."

"Your sweethearts?"

"No, the eggs." She laughed triumphantly, and I had to laugh too.

"You mean you won't confide in me now?"

She studied my face, under her long lashes, and grew serious.

"Of course, I will. I like Jack best, because he's dark."

"Umph!"

"But I like Jim best because he's fair."

"Ph!"

"I prefer Jack when he gives me books."

"Confounded cheek!" I growled.

"But I prefer Jim—when he gives me music."

"Like his impudence!"

She seated herself on an old tree-trunk and swung her hat by the ribbon.

"You see," she explained, "I like Jack-without-Jim, and Jim-without-Jack.' So I don't know what to do. If there were she-Mormons— You are looking horribly cross, George."

"Umph!"

"Your conversation is monotonous!"

I sat down on the trunk beside her. "The fact is Kiddie, I've had a shock. I've only just realized that you are grown up. It's very nice for you, and you've grown up very nicely. But it isn't nice at all for me. I lose such a jolly little chum."

She took my arm impulsively.

"Oh, you don't! Only I thought—" She stopped and looked down at her shoes.

"Thinking is a new pastime for you." She glanced at me reproachfully.

"You always say things like that. That is why I think—at least, I don't think—only—"

"Tell me, dear." I put my hand on her shoulder.

"I thought perhaps that, now I was grown up, you—you didn't approve of me."

"I see, I don't flatter you. The 'sweethearts' do."

"They mean it." There was a flash in her eyes.

"Yes," I agreed. "I'm sure they do. Of course they do. They don't mean nicer things than I think of you. . . . Which is it, little girl."

"Neither." She shrugged her shoulders pettishly. "I like one just as much as the other. Really I do. I suppose I shall end like the girl in your verses."

"Which verses?" I asked. I am a writer by profession, and I've written so many verses; and most of them about girls.

"Those in The Mirror. 'The Third Person.' Don't you remember them?"

"No-o. How do they go?"

I did remember them, as a matter of fact; but I wanted to be flattered by finding that she did.

She fumbled about for a pocket—another sign of grown-upness—and produced a tattered cutting.

"Read them!" she commanded. So I read:

THE THIRD PERSON.

Two gentlemen came courting me,
Their names were John and Jim—
Including Peter, there were three;
But who would reckon him!

Dear John was dark. I like dark men,
And men who're fair (as Jim).
Poor Peter's half and half; but then
I never thought of him.

John raved about my hair and eyes,
My voice enraptured Jim,
But Peter used to criticise—
As if I cared for him!

'Twas John, who sent the books I knew,
The music came from Jim.
That stupid Peter sent the two—
I was so mad with him.

I liked John best, when John was by;
With Jim inclined to Jim;
But as for Peter—Really, I
Took no account of him!

I often used to wish I could
Accept both John and Jim.
If they proposed. If Peter should,
I'd soon dispose of him.

Last Monday, at the fancy ball,
John asked me; so did Jim;
But Peter never asked at all—
'Twas just as well for him.

Because of John, I told Jim 'no!'
And John because of Jim;
And then—Well, Peter bothered so,
I said I'd marry him!

"Ah," I said, when I had finished. "I see; and who is Peter?"

She would not answer, or look at me, and we sat in silence for several minutes. Then I stroked her hair.

"God bless you both, my dear. He's a lucky man."

Then suddenly I had a glimpse of her eyes; they were smiling a little, and a little tearful; and I found myself kissing them.

Little globules of sunshine that drive the clouds away. De Witt's Little Early Risers will scatter the gloom of sick-headache and billousness. Recommended and sold by all druggists.

LATE DOINGS IN UPPER MICHIGAN

Lake Linden—Sunday afternoon Oscar Bellair, one of the old residents of Lake Linden, died at his home after a very short illness. He had been confined to his home for a few days with la grippe and his death came as a great surprise. He was about 50 years of age and had lived here several years. He was employed as a lumberman, and up to a few days ago always enjoyed the best of health. He is survived by a wife and two sons.

Houghton—County Physician Jackson has returned from a trip to Laird where he went to look over the situation with regard to the recent smallpox scare. The reports he brings home with him are indeed encouraging. He says that all danger is not only past, but that the authorities have been able to confine the cases of the diseases to one single family, that of A. Obermeyer, and only two of the members were taken down with it. They are the old gentleman and his 2-year old son. Both of them have recovered.

Dr. E. J. Barbe left yesterday for a trip to Texas and California, in an attempt to better his health, which has not been of the best of late. He will be gone for about two months, and will visit San Antonio, Tex., the city of Alamo, as well as Los Angeles in California, where his people reside. Supt. Woodson of the Electric Light works has rented the doctor's residence for the time being.

Hancock—Mr. and Mrs. J. C. Wareham left Monday for Altoona, Pa., where they will visit relatives for a couple of weeks, after which they will go to New York for a visit with Mrs. Wareham's sister, who recently underwent an operation in a hospital there. Later they will visit relatives in Peterboro, Canada.

Mrs. Alex Stevenson left Monday for Jackson, Mich., in response to a message announcing her father's death, which occurred in Alabama. The body will be brought to Jackson for interment. Mrs. Stevenson had been ill for several days past, and the shock was greatly felt by her.

A deal has been closed whereby the Houghton County Street Railway company will carry the mail between the Hancock and Houghton postoffices and the Franklin mine and Demmon. At present the mail is carired between these points by team. Under the new plan the service will be greatly improved.

Ontonagon—C. Meilleur left yesterday for Mt. Clemens, where he will take a course of treatments for rheumatism. He expects to be absent about a month.

Richard A. Heard has been suffering the past week with a severe attack of the grip, which settled in his ears, causing almost total deafness.

The northwest quarter of 31, 49-40, Matchwood township was sold to James O'Rourke of Ewen at sheriff's sale last Monday afternoon to satisfy a mortgage held by Nels J. Benson of Tower, Minn. The consideration was $800.

Miss Alice Penegor, daughter of Mr. and Mrs. Xerier Penegor, is ill with diphtheria. The house has been quarantined and steps are being taken to prevent a spread of the disease.

Mr. and Mrs. Robert Anderson returned to Ontonagon Tuesday, after an absence of several weeks. Mr. Anderson was on a land cruise through Alabama and Mississippi, and Mrs. Anderson visited with relatives at Wausau.

Ontonagon school board has purchased of Halter & LeMoine two lots, 100 by 163 feet, adjoining the Central school property and the residence of Michael Dolan. The additional ground is acquired with a view of adding to the school buildings as conditions shall make it necessary.

Don't let the baby suffer from eczema, sores or any itching of the skin. Doan's Ointment gives instant relief, cures quickly. Perfectly safe for children. All druggists sell it.

Style Talks Worth Reading!

Following up our general talk in last night's Herald—we take up four fabrics which we unhesitatingly advise you to buy now. Whether you have patronized our Dress Goods and Silk Departments in the past or not—the showing we are now making must impress you with the fact that here are many things, exclusive in character and charming in style and reasonable in price—and they have no counterparts elsewhere!

The Styles, the qualities, and the prices are striking examples of the "Whys" of the remarkable growth of our business.

We Sell and Guarantee

The Ladies' Home Journal Patterns. They are now being used by thousands of women at the Head of the Lakes. They are the simplest, best fitting, most stylish patterns made—could not be better if the price were $1.00 each, instead of only 10c and 15c.

Ask to see the new Transfer design for embroidery.

NEWS OF NEW DRESS GOODS

PLAIDS—An entirely new style is a combination of stripes and different size checks—in one square there are checks about a quarter of an inch square; in another are tiny checks—while others are made up of different size stripes.

You'll appreciate their newness and handsome effect—23 inches wide—$1.25 a yard.

BLOCK CHECKS—Blues, browns and blacks are the favored colors in the block styles. We show them in three different sizes, and the smartest of suits and waists are possible with them.

Don't delay getting yours—the market is well cleaned up—a special value is shown at 75c a yard.

NOTE!

We have another lot of Ladies' Home Journals for March.

Get in Your Order Right Away.

NEWS OF NEW SILKS

VOILES are to be extensively worn this season—there are various weights and weaves shown, but undoubtedly the French and German crisp weaves will get the preference—we have them all and it is for you to say which you prefer.

A Silk Check Voile just received is very effective as are also the Silk Voiles—we show them from $1 to $2 a yard.

SRING SUITINGS—A most beautiful showing of imported and domestic weaves—neat checks in different color combinations—plaids in pronounced and dice checks—the patterns are away from the ordinary and the colors are so pretty and blended with such good taste that

They will appeal to you strongly—they're exclusive too—all qualities from 85c to $1.75.

First Derby made in American was a C. & K.

Hats For Men

KNAPP-FELT Hat combines three cardinal points of superiority to hats of any other make---noticeable elegance of style, absolute permanence of color and superb quality of materials and workmanship.

The shapes are exclusive C & K designs which cannot be found in any other hats and are of sufficient variety to make it possible for a man who desires to wear the best to exercise his own taste and judgment in the selection of a properly becoming style.

The coloring of Knapp-Felt hats is accomplished without regard to expense. No rule o' thumb methods are employed and only the purest and most rigidly tested chemicals are used. Hence, the steadfast Cronap dye is not affected by weather or climate and will hold its original depth and bloom through rain and shine.

Knapp-Felt is a wear-resisting hatfabric of unrivaled beauty and durability, and is a product peculiar to the C & K shop where for fifty years the best hats have been made. Owing to the selection of the finest materials and the manipulation by the most experienced workmen the closer and firmer texture of Knapp-Felt hats is less affected by constant wear than any others. They not only wear long—they wear well. They are sold in Duluth by the Columbia only. Knapp-Felt De Luxe hats, the best made, are Six Dollars. Columbia Special, the next best are Four Dollars.

The Columbia Three Dollar Hat, is made in the same shop and is now shown here in all the proper shapes for spring. One trail will convince you that it surpasses in quality all other hats offered at the same price.

COLUMBIA CLOTHING CO.

Hanan $5 and Columbia $3.50 Shoes.

STRUGGLES OF MRS. FAIRBANKS.

New York Press: That cold storage house of politics, Vice President Fairbanks, occasionally has joined the chorus in praise of early struggles as the best foundation for a successful life. Mrs. Fairbanks does not look with favor on those alliances where great wealth is demanded on both sides and where, when the honeymoon is ended, the couple walk into a mansion furnished with every luxury. When she got married Fairbanks had just been admitted to the bar and was working for $20 a week as a reporter in Cleveland. She attended to the household for ten years before she took the extravagant step to study law. She assisted her husband in drawing briefs; in fact, she did all his office copying. Mrs. Roosevelt, too, was a helpful wife. She had prepared herself for teaching and had gone to London to take a place in the home of a relative, when she met Roosevelt and an early love affair was renewed. Friends of Mrs. Roosevelt say that her denial that she ever was a governess is not based on any objection to any honorable avocation; simply in her case the story is not true. She intended to be a governess, but never took the position.

CAPTAIN AND THE MOROS.

A sketch of Brigadier Gen. John M. Pershing in The World's Work affords some explanation of the reason why an obscure captain was jumped over the heads of hundreds of men.

He was a West Pointer and had ten years of Indian fighting on the plains. He was in action at Santiago with the Tenth cavalry, the colored regiment, and distinguished himself.

But his best work was in the Philippines where he subdued the Moros and at the same time won their friendship. The evidences of this friendship were sometimes a trifle embarrassing.

For instance, one fine morning the bachelor captain awoke to find himself father of a splendid 18-year-old boy. The original father of the lad, the sultan of Oato, had paid to this mere Christian the highest tribute of respect and affection a Moro knows, and given him his heir.

Stranger things happened. In February of 1903 the captain was invited to Bayan, the scene of the first fight, to confer with the supposedly half hostile datto of that rancheria.

He was received by a half a dozen dattos, who proceeded with due religious ceremony to make him one of themselves, as hereditary ruler with royal rank and power of life or death —so that he is today the only Mohammedan war lord who bears the golden stars of the United States on collar and saddle cloth.

Immediately after the ceremony an incident occurred which showed the new datto's practical turn of mind. An American flag was hoisted over the Moro fort and Datto Pershing, wishing to salute it, could find no ammunition for the purpose save a live shrapnel. They burst with thrilling pyrotechnic effect, and served to deepen the respect in which he was held.

Day after day The Herald want columns show a procession of opportunities—opportunities to buy, to sell, to lease, to hire, to find people to work for you, to find people to work for, to find boarders, lodgers, tenants, or partners. These want ad. opportunities touch almost all phases of life and living in this city.

OUR SPRING STYLES NOW READY.

In selecting our goods we exercise the greatest care to buy only those fabrics which will give good wearing value. Those are made up in the latest styles (and fit guaranteed), at almost the same price you would pay for an inferior piece of goods in a ready-to-wear suit.

8 LAKE AVENUE SOUTH.

WEST DULUTH

WARNING IS GIVEN OUT

West Duluth Real Estate Values Must Not Be Raised.

Steel Plant May be Lost if Prices are Prohibitive.

Thomas F. Cole, president of the Oliver Iron Mining company, has issued a warning to property owners of West Duluth, and asks them to be careful and not boost the values of real estate to an impossible figure on account of the steel plant report, or the city may lose the plant entirely.

This is the only thing which Mr. Cole fears in regard to the location of the steel plant. He said yesterday, in answer to a telephonic query from L. A. Barnes, concerning the report that Two Harbors might get the plant, that all of the officials of the Steel company in Duluth favored West Duluth, but that if the property owners boosted the value of their land to an impossible figure, the plant would probably be taken elsewhere.

Mr. Cole told Mr. Barnes that the Steel company owns considerable property at Two Harbors, and as it would be easy to centralize the business there, the Eastern officials of the company might favor that point if a proper tract of land cannot be purchased at a reasonable price in West Duluth.

The committee of Steel trust experts is due in Duluth tomorrow, and the situation will be thoroughly considered by them after their arrival.

DEATHERAGE STILL WINS.

Victorious Over Method in Commercial Club Trophy Contest.

Deatharage and his team or curlers is still winning in the West Duluth Commercial club trophy series, and in an interesting contest, played last evening, the rink skipped by Method was trimmed by a score of 12 to 7. This puts the Deatherage rink in on the finals.

A practice game was also played last evening, and the rink skipped by Hoag won over a rink skipped by Macauley by a score of 8 to 6. The scores:

Larson	Olivson
Buckley	Lanners
Graham	Iltis
Deatherage	Method
Skip—11.	Skip—7.
Bleckle	Winton
Martin	Brotherton
Fillatrault	Gaspard
Hoag	Macauley
Skip—8.	Skip—6.

West Duluth Briefs.

regular meeting of Euclid lodge, No. 196, A. F. & A. M. will be held tonight at the Masonic hall.

Mr. and Mrs. George D. Shannon entertained the choir and several members of the Westminster church at their home at 423 South Seventieth avenue west last evening.

Mr. and Mrs. Andrew Granlund, 4729 Magellan street, are the parents of a son, born yesterday.

Mrs. E. Weber entertained a few of her friends yesterday afternoon at her home on Second street.

Miss Bolligan of St. Paul has arrived in West Duluth and will remain during the spring season and will be employed as trimmer at Miss Lindgren's millinery store.

M. L. Olander has returned to his home at 1010 North Fifty-sixth avenue west, from Rochester, where he has been under treatment.

Fred Rockwell came down from Aurora yesterday and spent the day with his parents at 118 North Fifty-fourth avenue west.

Watch and jewelry repairing. Hurst.

Clarence Harvey of Scanlon spent yesterday visiting West Duluth friends.

W. H. Kilton left yesterday for Denver, Colo., where he will remain to look after his mining interests for the next two months.

Mr. and Mrs. M. Kastriner, 232 North Central avenue west, who have spent several weeks on an Eastern trip, are expected home today.

The Ladies' Calendar circle of the Westminster church held a business and social meeting this afternoon at the home of Mrs. Haldore Olson, 329 North Fifty-ninth avenue west.

Wood—We will deliver wood from dock No. 1 of the Duluth, Missabe & Northern Railway company. Prices named upon application. Apply to A. P. Lacey at ore dock. Immediate delivery if desired. Lacey & Barnes, contractors.

Mr. and Mrs. Charles Peterson are the parents of a daughter born yesterday, at their home, 213 North Sixty-first avenue west.

W. E. Kern, 16 South Fifty-seventh avenue west, is spending the week visiting relatives in Missouri and Illinois towns.

Mr. and Mrs. John Wilson are the parents of a son born yesterday.

Alfred Holter, who was seriously injured while working at the lumber camp of John Winness last Saturday, is still laid up, and will not be able to be out for some time.

Julius Johnson left yesterday for Seattle, Wash., where he will make his home with his sister.

Masquerade, Grand Eastern hall, March 7.

"THERE'S A REASON."

YOUNG ALGER ELECTED.

Late Senator's Son Succeeds His Father in Business.

Detroit, Mich, March 6.—At a meeting of the Alger-Smith & Co., Russel A. Alger was elected president of the company to succeed his father, the late Senator R. A. Alger. This places Mr. Alger, a young and energetic business man, at the head of one of the largest lumber companies in the United States.

His training has thoroughly fitted him for the responsible position to which he has been elected. Born on his father's birthday, Feb. 27, 1873, Mr. Alger at quite an early age went into the woods to gain a practical knowledge of the lumber business and filled the position of trust in management of the camps of his father's firm until 1891, when he began to operate for himself.

Mr. Alger is also vice president of the Packard Motor Car company, president of the Anderson Forge & Machine company, treasurer of the Duluth & Northern Minnesota Railroad company, vice president of the Great Product company, secretary and general manager of the Great Sugar Syrup company and director of the following concerns: Security Trust company, Manistique Lumber company and the Alger-Sullivan Lumber company, which is operating in the South. Mr. Alger is also executor under his father's will.

STRONG BUYING OF GREENE GOLD-SILVER STOCK.

New York, March 2.—There continues to be strong buying of the preferred shares of the Greene Gold-Silver company in the curb market. Heavy purchasing orders have been executed this week for important financial interests which were bought for investment purposes.

The preferred stock, which is selling around $8.50 per share, the par value being $10, is paying 8 per cent annual dividends and thus nets approximately 9 per cent on the investment. There also has been a strong buying of the common stock around $2 per share, many thousands of shares of both preferred and common being dealt in every day.

In the report which President William C. Greene has made to the stockholders of the company it is announced that the mills of the company now are treating 200 tons of ore daily, on which the net returns are $4,000. Under arrangements that since have been made, the company soon will be treating 500 tons of ore daily.

TAXING OLD MAIDS.

Vigorous Protest Against Proposition of Bachelor to Play Even.

Brooklyn Eagle: In one of Miss Adele Field's clever lectures, she remarks that in the Orient, where civilization runs lowest, there are no old maids. All girls are married there, in many cases before they are 10 years old.

As we move Westward from India, Thibet and Turkey, we find an occasional old maid in Russia. In Germany and France they become fairly frequent. In England they are numerous and highly respected, but it is only in our own favored land that they are, to be met in really full bloom, as it were.

"Thus we see," concludes Miss Field, humorously, "that the true touchstone of a nation's civilization may possibly be the number and quality of its old maids."

We have all heard the story of the colored mammy who was worried about a former charge. She was verging perilously near to the danger mark of thirty, and her old nurse feared that the girl might never get married.

"Yo' bettah be settlin' down, Miss Mamie," she pleaded, "pretty soon yo'll be growin' ole an' humbly an' yo' won't be havin' no chances."

"Maybe I shan't get married at all, Aunt Betty," laughed the girl, mischievously. "A good many people think that the single women have the best time of it, on the whole."

"Well," pondered the good old soul, shaking her head doubtfully, "I do' know but dy do—after dey done got true struggiin'."

In America we have a large population of unmarried women, mostly among the better class, who seem to have given up "struglin'" to get married, and are pursuing some noble and necessary work. They teach our schools, bring up the motherless children of their relatives, conduct our charities. Somebody has said that behind every important work for women anywhere you are pretty sure to find several unselfish and devoted old maids. And it is true. Our society, as at present constituted, could not get on without them.

Yet in the face of all this splendid record, comes a demand from some unreasonable editor, that we should tax old maids!

In support of his novel position, he insists that all women could marry if they would; that the old maid "gets all the benefits of civilization, without making any adequate return"—and that "through sheer obstinacy she clogs the wheels of progress."

After what has been already said, these assertions need no further reply. One cannot help suspecting that the numerous requests for the taxing of bachelors have wrought upon the brain of this misguided editor, until he has had an attack of "emotional insanity," induced by some long-brooding scheme for avenging his abused sex.

Now, the case of the old bachelor is utterly different from that of the old maid. For instance, if a girl sets her heart upon any particular person (a foolish thing, by the way, until she is sure of him), and he does not reciprocate the attachment, or dies, she usually ceases to think of love and marriage. She sets to work in some direction which interests her, and becomes, as the phrase goes, "wedded to her art." If she sees another man whom she thinks she might love, she might, under other circumstances, devote herself to the business of being agreeable to him, but the remembrance of the past and her natural modesty usually make her choke down any such thought.

The bachelor, on the other hand, has no such excuses. The remembrance of the past does not paralyze him, nor does his modesty dampen his courage. He can toss out a casual box of candy or a bouquet of violets, or an invitation to the theater, and thus "feel his way." If he is well received, it is astonishing how quickly the torch of love relights in his manly breast.

It is uncertain, too, what sort of a man the old maid may attract. She has usually laid aside many of the allurements of dress—which does greatly enhance the charms of woman, deny it as we may!—and, to adapt Byron's line, men are mostly "caught by glare." The woman, who, as E. H. Ormsbee says, in one of his clever stories, "doesn't primp none" is at a great disadvantage in the matter of attracting. Among those whom she may happen to please, the right one does not often occur.

The bachelor, on the contrary, depends comparatively little upon his looks—and he is free to go whithersoever he will, and offer his candy and his posies to the one he likes. He has every advantage over the old maid, and it is he who ought to be taxed. For a while this matter seemed to be doubtful; but now that the theories of Malthus have ben exploded, no one need hesitate in admonishing the bachelor to get a wife and establish a home as soon as may be. He is no good citizen unless he does.

But when he does, let him choose a mate from among the old, and not the young maids. The bachelor of 30 seems to prefer the girl of 17. He of 40 rarely seeks a helpmeet under 25. It is the perennial charm of the outside! It wins, in nine cases out of every ten, over the far more abiding and valuable charms of heart and mind. And yet it has been remarked by some shrewd observer that the women from whom their husbands seek to be divorced are almost invariably handsome; while, alas! it is the plain wife, but usually good and true, who has to protect herself by the same means from the inconstant husband. We are all of us more or less slaves to the eyes rather than to the master mind; the casket outweighs the jewel, to our stupidity.

But the old maid is just as likely to be beautiful as plain, in these days, when, truly, as the old mammy was informed, the single women do often "have the best of it." It used to be thought that she must become crabbed and sour, being presumably cheated out of the possession of a husband and home of her own by untoward fate.

Now we know her to be just as sweet and lovely as her married sister. As the unkind editor invidiously remarks, she might have been married if she had chosen. But why should she marry a man if he was not just the one she wanted?

In short, the old maid is usually so either from high principle, deep sentiment, or in a few instances, from necessity.

The old maid is, on the whole, rather the most helpful and lovable member of modern society. As for the old bachelor—but, poor fellow! Perhaps he is more to be pities than blamed.

A. O. U. W.

Fidelity Lodge, No. 105, will give a social dance at Maccabee hall tomorrow evening. Admission, 25c.

AVERAGE LEGISLATURE.

Samuel Merwin in Success Magazine: The legislature couldn't make one good law in three months, let alone three thousand, without turning in some direction for aid and counsel. Our well-meaning farmers and grocerymen and manufacturers are probably endowed with that profound ignorance of basic problems which comes out in the form of a loud contempt for "science" and "theory." But now they are, in the language of the committee room, up against it. They have got to make three thousand laws in three months, without much of an idea, in some cases, of what the blessed things are all about. A good many of our farming and manufacturing friends would really like to make good laws; but probably not one of them is competent to draw a bill that will hold together. To make it worse, these laws, good or bad, will come down forcibly on every man, woman and child in the state.

In view of this fact—that the legislature, made up of bungling, good-hearted amateurs, with a leavening of crooks, is bound to turn out just about so many laws anyway—do we citizens, the real "interests" most vitally affected by the mass of legislation, take any adequate measures either to put in abler men, or to supply accurate and thorough-going information as a basis for the legislation? Not at all. We send our legislators down to the capital, and go on, serenely vague, about what we like to call "our business." The snail's on the thorn. God's in His heaven, all's right with the world! And meanwhile the attorneys for the railroad and the "public service" company, and the big brewers and manufacturers are drawing up bills which our farming friends don't understand, and are crowding them through with doubtful statistics and specious reasoning which our farming friends may question, but which they have neither the time nor the resources to dispute.

This firm has a high standing as Ribbon manufacturers, known as the "Fair and Square" Brand.

These goods just arrived and will be ready for sale within a day or two. Wait for the announcement.

WHEN "KIDS" WORE TIPPETS.

An Old Boy Tells of the Winters of His Youth.

Kansas City Star: "Wisht I was a kid again," a man said this morning, looking through the window of a Brooklyn avenue at a crowd of boys coasting on a cross street hill. "Like to be a boy today," he said. "Real sport, isn't it? We didn't realize its full value. Might have had more fun, Jim."

"Yep," his companion replied. "I'd like another chance at it. That coasting's fine, but it ain't like it used to be when I was a boy back on the farm. When a snow came then it drifted and heaped and lasted for weeks. And my, what fun it was. We used to be up and have our chores done before daylight—then for the sleds, big, wooden home made sleds with tin runners, not the puny little things those kids are using. And we didn't have to carry our sleds up any steep hills, either—that's work—we didn't have any hills back in the country. But we hooked our sleds, small 'bobs' we called 'em, onto a wagon bound for town. I would be just behind the wagon and Bill's sled would be fastened on to mine and Jack's on to Bill's and so on. Sometimes there would be a dozen sleds hooked onto a single wagon; and the farmers didn't care either, but always stopped while we 'hooked on.'

"And we didn't have to walk back like those kids do up that hill. We caught a wagon going back same as we caught one going to town and we kept that up all day and at night, ah, what real sport me used to have at nights. W'd fasten all our sleds together and hitch 'em to old Jim—Jim was the gentlest horse in the barn and awful lazy, but somehow he always went a jolly gait when he pulled our sleds—guess he must have been scared at the noise we made or maybe the old fellow was entering into the spirit of the fun. Anyway it was lively sledding, that—and there used to be dozens of kids on the same country road. You don't see anything like that now, do you? I tell you those days were the real sled days.

"Why, the kids nowadays don't even look like we used to look. There's that boy in his leather leggings, his fur cap and heavy sweater—doesn't look like I used to when mother fixed me up for a day in the snow. I used to wear three pairs of heavy socks and my leather boots. Then mother would always have to wrap my head and neck in a tippet and, say, it was gorgeous, with long ends streaming down my back. If it wasn't a tippet it was a shawl she used to tie around my head and ears. A boy in such a garb wouldn't last long in that crowd. They'd hoot and jeer and he would be more fun for that bunch than the coasting.

"But all the same, I'd like to be a kid again back on the old farm and have mother fix me up, even in the old red shawl."

SPEEDY COASTING.

New York Press: The finest coasting hill in the world is at St. Moritz, in Switzerland. The hill is a mile long, and to coast down it takes, on an average of sixty-seven seconds.

The Cresta course, as it is called, is iced and runs between snowbanks. Its turns are dangerous, and only skilled coasters venture on it. They use the American flat toboggan, lying on the stomach, and steering not with the feet, but with lifts and jerks of the body.

A few seconds from the start on this course the coaster is going at a speed of twenty miles an hour. This speed soon increases to forty miles. Faster and faster he flies swooping down the precipitous Church leap at the speed of an express train, and then on to the long, straight Shuttlecock run. To fifty, to sixty, to seventy, to eighty miles an hour the pace grows, till it is like the flight of the swiftest bird through a blinding blur of snow. Yet the speed still increases, and at the end of the Shuttlecock eighty-seven miles an hour is registered.

These Cresta course speeds are not problematical. They are the accurate timings of an electric clock.

It takes a man of very sanguine temperament to persuade himself that he is fortunate because his wife does not read the ads, and is, thus, not a "bargain-hunter."

"As we say, or your money back."

The Ericson Suit and Overcoat Sale is For You!

You should do yourself the justice of at least seeing the exceptional values offered in stylish, up-to-date clothing for men, boys and children.

Clothier, Hatter, Furnisher.

219 West Superior St.

WHEAT HAS AN ADVANCE

Prices Are Better in All of the American Markets.

Flax Closes Lower After Dull Session in Duluth Market.

Duluth Board of Trade, March 6.—Wheat advanced in the American markets today, on unfavorable reports from the Southwest, where the "green bug" is said to be damaging the winter wheat crop and higher cables. Berlin closed unchanged and Budapest ⅝c higher.

The May option closed ½c higher in Duluth, ⅝-½c in Chicago, St. Louis and Kansas City, ⅜c in Minneapolis, ⅝c in New York and ¼c in Winnipeg. The July option closed ½c higher in Duluth, Chicago, New York and Kansas City ⅝c in Minneapolis and ⅜-½c in St. Louis.

May corn closed ⅜-½c higher in Chicago. May oats closed ¼c higher in Chicago.

Car receipts at Duluth were 49 against 22 last year, and at Minneapolis 295 against 274 last year, making of a total for the Northwest of 344 against 296 last year. Winnipeg received 70 against 124 last year.

Primary receipts of wheat were 563,000 bus., last year 409,000 bus., shipments 224,000 bus., last year 169,000 bus. Clearances of wheat and flour aggregated 205,000 bus.

Primary receipts of corn were 831,000 bus., last year 480,000 bus. Shipments 606,000 bus., last year 271,000 bus. Clearances of corn were 550,000 bus.

Wheat was active in the Duluth market. May wheat opened ⅛c lower at 78¾c, advanced to 79c by 9:35, fell off to 78⅝c by 9:40, rallied to 79⅛-¼c by 9:49, declined to 78⅞-79 by 11:40, reacted to 79 by 11:45, declined to 78⅝c by 12:10 and closed at 79⅜c, a gain of ⅛c over yesterday. July wheat opened unchanged at 79⅝c, declined to 79½c, rallied to 79⅝-¾c, fell off to 79⅝-¾c, rallied to 79¾c, declined to 79⅝-¾c, rallied to 80⅛-¼c and closed at 80⅛c, a gain of ⅛c over yesterday. September wheat was inactive and closed ⅛c higher at 78½c.

Durum wheat was unchanged and cash spring wheat was selling at the May price.

Flax was dull. May flax opened unchanged at $1.22, advanced to $1.22⅛, declined to $1.21¾, rallied to $1.22, declined to $1.21⅜ and closed at $1.21½, a loss of ½c from yesterday. July flax opened ½c higher at $1.22⅜, declined to $1.22 and closed at $1.22¼, a loss of ⅜c from yesterday. October flax closed unchanged at $1.18½.

The coarse grains were unchanged, although oats had a strong tone all through the session.

Following were the closing prices:

Wheat—No. 1 hard on track, 80⅜c. To arrive: No. 1 northern, 79⅝c; No. 2 northern, 77⅜c. On track: No. 1 northern, 79⅜c; No. 2 northern, 78¾c; May, 79⅜c; July, 80¼c; September, 78½c; May durum, No. 1, 70⅜c; No. 2, 67c; durum on track, No. 1, 70⅛c; No. 2, 66¾c. Flax to arrive, $1.20¾; flax on track, $1.20¾; May, $1.21½; July, $1.22¼; October, $1.18½. Oats to arrive, 38½c; March oats, 38⅜c; rye, 60½c; barley, 58-65c.

Cars inspected: Wheat, 49; last year, 22; oats, 3; rye, 1; barley, 3; flax, 16; last year, 2).

Receipts: Wheat, 110,634; barley, 14,517; flax, 30,405.

Shipments: Wheat, 885.

THE CHICAGO MARKET.

Moderate Decline in Liverpool Causes a Weakness in Wheat.

Chicago, March 6.—The wheat market today opened weak because of a moderate decline at Liverpool. The loss in prices, however, was quickly regained on buying by commission houses and shorts which was based upon additional reports of damage in the Southwest by the Greenbug." May wheat opened ¼c to ⅜c lower at 75⅜c to 75¼c, sold at 75¼@75⅝c and then advanced to 76⅛@¼c. Minneapolis, Duluth and Chicago reported receipts of 373 cars against 423 cars last week and 302 cars a year ago.

Trading was less active in the latter part of the day, but prices were firm throughout the session. Damage reports caused the greater part of the bullish. The high point for May wheat was 76½@⅝c. The close was strong with May up ⅞@1c at 76⅜@½c.

The corn market was firm on a good demand from commission houses and light offerings. Unsettled weather in the west and moderate local receipts strengthened prices somewhat. May corn opened a shade lower to ⅛c higher at 46⅜c to 46½@⅝c and sold at 46¾c. Local receipts were 317 cars with one of contract grade.

The market was strong all day, chiefly because o fa report that the Argentine crop will be much less than that of last year. The high point for May was 46⅞c. The close was strong with May up ⅜@½c at 46⅞c.

The oats market was firm the principal trade being in the July option. Offerings of May scarce. May corn opened a shade lower to ⅛@¼c higher at 41⅜c to 41½c and sold at 41½@⅝c. Local receipts were 121 cars.

The provisions market was irregular. Pork was easier on realizing sales. Lard was steady and ribs were firm. May pork opened 7½c lower at $16.25. Lard was a shade lower to a shade higher at $9.60 to $9.62½. Ribs were up 5 to 7½c at $9.05 to $9.07½.

Close: Wheat—May, 76¾@½c; July, 77⅜@¼c. Corn—May, 46⅞c; July, 46¼c. Oats—May, 41⅞@42c; July, 40⅜@41c. Pork—May, $16.30; July, $16.50. Lard—May, $9.60@9.62½; July, $9.65. Ribs—May, $9.05; July, $9.15. Rye—Cash, 61½c. Barley—Cash, 64@68c. Flax, clover and timothy, nothing doing. Cash wheat—No. 2 red, 74½@75c; No. 3 red, 72@74½c; No. 2 hard, 73½@76c; No. 3 hard, 66@74c; No. 1 northern, 82@84c; No. 2 northern, 79@82c; No. 3 spring, 76@82c. Corn—No. 2, nothing doing; No. 3, 42½@43¼c. Oats—No. 2, 41c; No. 3, 41c.

Liverpool Grain.

Liverpool, March 6. — Wheat—Spot steady; No. 2 red western winter, 6s 2d; futures steady; March, 4s 4¾d; May, 6s 5½d; July, 6s 2½d. Corn—Spot steady; American mixed new quiet, 4s 5d; old steady, 4s 7½d; futures firm; March, 4s 4½d; May, 4s 5½d

Minneapolis Wheat.

Minneapolis, March 6.—Close: Wheat—May, 78¾@7⅜c; July, 79c; September, 77¾@77⅞c; No. 1 hard, 80½@81c; No. 1 northern, 79½@80c; No. 2 northern, 77½@78c; No. 3 northern, 74@76c.

New York Grain.

New York, March 6.—Close: Wheat—May, 84¼c; July, 84¼c; September, 83½c. Corn—May, 83⅞c; July, 53⅜c.

Minneapolis Flour.

Minneapolis, March 6.—The flour market was firm. The steadier tone in the wheat market has caused a firmer flour market. Buyers are taking a little more freely, but not with any tendency to stock up. No improvement is noted in the car situation. Shipments, 46,041 barrels. First patents, $4.20@4.30; second patents, $4.05@4.15; first clears, $3.25@3.35; second clears, $2.40@2.60.

Grain Gossip.

Logan & Bryan, Chicago, to Paine, Webber & Co.: While all the advance was not held prices, however, show little advance for the day. We receive quite a few reports of damage being done by the green bug in the southwest, but the trade is not quite in humor just now to pay more than passing notice to complaints. It is doubtful if any of the dyed in the wool notice to complaints any of their wheat on today's advance. This leaves market in position for a quick advance if cables follow our upward tendency and if reports of damage are followed by further complaints.

Corn—Undoubtedly the tendency will be better defined after the government report Monday. Now it looks like a scalping affair.

Oats—The government report on Monday is expected to show amount in farmers hands materially under that of last year. If this expectation is realized, we think, it will have a bullish effect on the market.

Provisions—It looks as if some September ribs are being picked up for investment.

THE PRODUCE MARKET.

The following prices, with the exception of those on hay, feed and meats, are the official quotations of the Duluth Produce exchange and shippers can rely upon them as being correct. The list is corrected daily by the secretary, and it shows accurately the market conditions up to 12 o'clock on the date of issue. The weekly market letter, published on Fridays, is not an official statement of the exchange, but the information is gathered personally from the different dealers:

Stock Gossip.

Boston to Gay & Sturgis: The weakness of the security market not only reflects the disgust of capital at legislation directed against corporate interests, but the persistent extension of credit, the absorption of liquid money, and the higher cost of operating expenses. Because of all this there has been for a long time a lack of that support, the absence of which emboldens the professional traders to attack prices for the fall.

The level of prices has reached a point where people who are heavily committed on the long side are either influenced or forced to let go their holdings, and the consequence is the demoralization now witnessed.

On the other hand, some good investment buying is noticed, and it is safe to assume that those interests who were quietly marketing their speculative or semi-speculative holdings, when the trading public wanted are now recouping their holdings when everybody is apparently a seller.

In all probability the foundations are being laid, and laid well for the other swing of the pendelum. We shall shortly begin to talk crops, and the outlook in this direction is thought to be excellent. The sap will soon begin to run up the trees, and a spring rise is likely to follow the liquidation of today.

* * *

Waldorf to Paine, Webber & Co.: The comments of a man who frequents many big offices during the day very well illustrates the depths of despondency in Wall street. He said he kne wfirms that would buy stocks on three-points margins when stocks were 50 to 100 points higher, but now want twenty points. The statement may exaggerate the facts, yet it would be difficult to imagine a more dejected or more general hopelessness than now prevails. Speculators, who were bullish on Northern Pacific at 220, are now selling it under 160. Only the bad features are talked of in brokers' offices. The concensus is that all this marks the final stages of the downward movement. Liquidation has been drastic and it is believed to have run its course. For the first time in over a year the bull side has in its favor a low level of prices. Standard Oil interests have added heavily to their holdings.

* * *

Logan & Bryan to Paine, Webber & Co.: Surprise followed surprise today. Quite a substantial rally set in after the opening, which was short lived and followed by a bull raid. Reading was taken in hand and advanced 11 points, turning the market into a bear panic. Copper broke badly. We have had a violent setback, and even at the closing tonight the market is still very much lower than two weeks ago. The situation has been cleared very much. The short interest is still large and less confident.

* * *

Boston to Paine, Webber & Co.: During most of the session market was very heavy and prices showed a bad break all through the list. Money was 10 @ 11 per cent. Most of the brokers were buying only for cash and were turning down buy orders freely. Toward the close there was a good rally, but we think that stock climbed altogether too fast and they will be on sale again tomorrow. With the gilt edged rails paying 6½ to 7 per cent for money there is no inducement for anybody to buy the more speculative stocks unless they return 8 to 10 per cent. We advise great conservatism for a while.

New York Money.

New York, March 6.—Close: Money on call, firm at 6¾ per cent; ruling rate, 5; closing bid, 5; offered at 5½. Time loans, steady; sixty days and ninety days, 5¾ per cent; six months, 5½@5¾ per cent. Prime mercantile paper, 6¾@6 per cent. Sterling exchange, heavy with active business in bankers' bills at $4.84.45@4.84.60 for demand and at $4.80.30@4.80.35 for sixty-day bills; posted rates, $4.81½@4.85½; commercial bills, $4.80@4.80¾. Bar silver, 63¾c. Mexican dollars, 53¾. Government bonds, firm; railroad bonds, irregular.

The Cotton Market.

New York, March 6.—The cotton market opened steady at an advance of 5 points, in response to better cables than expected. At first there was some hesitation, as bull support was not very aggressive, and some traders evidently figured that the reaction of yesterday had not been sufficient to alter the technical position of the market, but offerings were very promptly taken and were not heavy, and prices advanced during the middle of the morning to a net gain of about 11 points. Trading was not quite so active as during the past few days, and there was no special feature to the Southern news.

Cotton, spot closed firm; 10 points; middling uplands, 11.45; middling gulf 11.70. Sales 309 bales. Futures, closed firm. Closing bid: March 9.88; April 9.95; May 01.02 ;July 10.11; June 10.06; August 10.16; September 10.17; October 10.37; December 10.44; January 10.62.

Midway Horse Market.

Wheat—No. 1 hard, 3; No. 1 northern, 17; No. 4 spring, 2; rejected, 1; durum No. 1, 12; durum No. 2, 5; durum No. 3, 4; durum No. 4, 1; total of durum, 26; total of wheat, 49; last year, 22.

Flax—No. 1 northwestern, 8; No. 1, 8; total of flax, 16; last year, 21.

Oats, 3; rye, 1; barley, 3.

Total of all cars, 72; cars on track today, 115.

Duluth Car Inspection.

Minnesota Transfer, St. Paul, March 6.—Barrett & Zimman report: Today's sales were well attended and all good offerings found ready sale. As in previous auctions, the bulk of the sales were made to Dakota buyers, who were heavy carload purchasers.

Chicago Live Stock.

Chicago, March 6.—Cattle—Estimated receipts, 20,000; market steady to 10c higher. Beeves, $4.20@6.90; cows and heifers, $1.75@5.25; stockers and feeders, $2.75@5; Texans, $4@4.75; calves, $6@7.50. Hogs—Receipts estimated, 25,000; market strong to a shade higher. Mixed and butchers, $6.80@7; good heavy, $6.92½@7.02½; rough heavy, $6.80@6.90; light, $6.80@6.97½; pigs, $6.15@6.75; bulk of sales, $6.90@7. Sheep—Estimated receipts, 18,000; market steady to strong. Sheep, $3.75@5.65; lambs, $4.85@7.60.

St. Paul Live Stock.

St. Paul, March 6.—Cattle—Receipts, 700; good kind strong; common, steady; quotations unchanged. Hogs—Receipts, 4,800; market steady; range, $6.65@6.75; bulk of sales, $6.70. Sheep—Receipts, 500; market steady; lambs, weak; sheep, $3@6.25; lambs, $2.50@7.15.

COMMITTEE FROM HOUSE WILL COME TO DULUTH

(Continued from page 1.)

cutting out all of the provisions of the house bill substituting for them the provisions of the senate bill. How the house will like this remains to be seen.

The St. Louis county delegation recommended for passage the bill allowing the county to issue certificates of indebtedness to build a new courthouse, the total cost not to exceed $600,000.

Speaker Johnson appointed Representatives Mork, Allen, Case, Thundale and Swendsen on the committee to investigate the financial affairs of the state university.

The pending normal school bills, providing for a new school in Northern Minnesota, were referred by the senate from general orders to the normal school committee in the hope of arranging a compromise.

The house made up for the shortage of new bills yesterday, by introducing thirty-eight today. Among the new ones are the following:

Representative Hicks, providing that no fur-bearing animals shall be killed between April 15 and Nov. 1, that no otter or beaver can be killed until 1917, and prohibiting the destruction of muskrat houses; S. D. Peterson, legalizing chiropractic and "natural healing" methods, which includes vibrations, massage and electric healing, and providing for a state board of examiners for such practitioners; Dr. J. A. Gates, placing all methods of treatment of disease, except dentistry and osteopathy, under state medical board and requiring practitioners to be licensed as physicians; Hollister, providing for a hospital farm for inebriates, to be supported by a tax of 2 per cent on all liquor license fees; Wright and Phillips, abolishing capital punishment and providing that there shall be no pardon for first degree murder except on proof of innocence; Swannelson, licensing private detectives; Cummings, prohibiting pooling of bridge contractors; Rowe, new game and fish law, making season for Lake Superior fishing same as that in Wisconsin, the closed season being the month of November; Walse, declaring the state's ownership of all minerals under lakes; Senator Thorpe, placing all banks in the state under public supervision, and prohibiting the use of the term "bank" otherwise; Senator Wilson, fixing salary of public examiner at $5,000 and giving him a contingent fee of $15,000; Senator Witherstine, providing for primary election of delegates to political conventions instead of direct primary elections.

* * *

The house will hold a night session tonight.

Calumet & Sonora is one of the best stocks for very big money and it will not be long before this mine will be shipping big lots of good ore to the smelter. There is no other property in the country with such good prospect in store for it. Calumet & Sonora should sell at $100 a share next fall. National now has the ore in the drift and we should soon have bigger prices for this stock. You will find that National will be a good stock to have around, for all they have to do from now on is to keep cutting the ore, and stock will take care of itself.

Don't forget that there is no mine in the Globe camp that has a better location than the National and the fellow that sold National at $2 may not be the happy man after all. Denn-Arizona is getting stronger all the time and soon we should see prices like those we had in the "good old olden days" not long ago. Denn will be a big mine and will soon be shipping ore to the smelters at Douglas.

Sometimes stocks go up and sometimes down, but if you stick to the good ones and they get big bodies of ore you will make more money than if you made a little profit on selling before the mine has a chance to develop. The men in Duluth who head Calumet & Arizona, Shattuck or North Butte have the money now. Calumet & Sonora should advance to $100 a share before next Christmas. National should sell at $10 and Denn Mining at $40. They are all good stocks and you will find that I am right about their selling price. Put these prices in your hat for next fall.

ORDER FOR HEARING APPLICATION FOR APPOINTMENT OF ADMINISTRATOR—

State of Minnesota, County of St. Louis —ss.

In Probate Court, Special Term, February 26, 1907.

In the Matter of the Estate of William Hill, Deceased:

On receiving and filing the petition of Flina Hill of the County of St. Louis, Minnesota, representing, among other things, that William Hill late of the County of St. Louis, in the State of Minnesota, on the 22nd day of January A. D. 1907, at the County of St. Louis died intestate, and being an inhabitant of this County at the time of his death, leaving goods, chattels and estate within this County and that the said petitioner is the widow of said deceased, and praying that administration of said estate be to her granted;

IT IS ORDERED, That said petition be heard before said Court on Monday, the 25th day of March A. D. 1907, at ten o'clock A. M., at the Probate office, in the Court House in the City of Duluth, in said County.

ORDERED FURTHER, That notice hereof be given to the heirs of said deceased and to all persons interested, by publishing this order once in each week for three successive weeks prior to said day of hearing, in the Duluth Evening Herald, a daily newspaper printed and published at Duluth, in said County, and that a copy of this order be served upon the County Treasurer of St. Louis County not less than ten days prior to said day of hearing.

Dated at Duluth, Minnesota, this 26th day of February A. D. 1907.

By the Court,
J. B. MIDDLECOFF,
Judge of Probate.

(Seal of Probate Court, St. Louis Co., Minn.)
Duluth Evening Herald, Feb. 27, March 6-13, 07.

FIRING TO FRIGHTEN

Argyle Says He Was Shooting Into Air at Time.

Miss Butchart's Condition is Unchanged and Very Critical.

That he was only firing into the air to frighten the ladies and did not intend to hit anyone, is now the claim of Fred M. Argyle, the man who shot and seriously injured Miss Bessie Butchart last evening on Fifty-eighth avenue east.

He told Chief Troyer this morning that he was firing up in the air, and that Miss Butchart turned suddenly and, grabbing him by the coat, pulled him violently to one side, spoiling his aim, and causing the bullet to enter her forehead.

This is in spite of the letter found on him threatening to kill Miss Butchart and his wife and her sister, Miss Lavalle, which is published in another column. Argyle is the least excited man who has had anything to do with the case, and enjoyed a cigar this morning with an apparently untroubled mind.

He was arraigned at 2 o'clock this afternoon, charged with assault with intent to kill, waived examination and was bound over to the grand jury, which is now in session.

Miss Butchart's condition is still very critical, there having been no change since this morning, and it is doubtful whether the operation for the removal of the bullet can be held today.

One of the buyers for Panton & White has been subjected to a good deal of annoyance since the publication of the picture of Argyle in this morning's paper, as the photograph bears a strong resemblance to him, and a number of his friends have called up to know if he were the guilty man.

Since the picture was taken Argyle has grown a mustache. He was never employed behind a counter at the Glass Block, but was a packing clerk in the sub-basement. He is rather slouchily dressed, and the picture in question does not give a very clear idea of him.

To remove a cough you must get at the cold which causes it. Nothing so good for this as Kennedy's Laxative Cough Syrup. The liquid cold relief that is most quickly effective. All druggists.

MANY SURPRISES

Await Those Who Have Not as Yet Visited Henricksen's.

There is something fascinating in the idea of roaming through a jewelry stock, especially when a hundred and one odd pieces are offered at a fraction of their worth. The many who have already visited the M. Henricksen Jewelry Co. have been amazed at the values offered in beautiful articles of every description, which must be seen to be fully appreciated.

TRAIN IS DERAILED TO PREVENT COLLISION.

Cayuga, Ont., March 6.—The Wabash limited, bound from St. Louis to Buffalo, was purposely derailed at Canfield Junction, last night, to prevent it crashing into a Grand Trunk railway train. No passengers were hurt, but James Scovel, the fireman, of Detroit, was slightly inured.

OCEAN STEAMSHIPS.

New York—Arrived: Pottsdam, Rotterdam.

Liverpool—Arrived: Oceanic, New York.

DOUMER IS COMING.

Paris, March 6.—Paul Doumer, late president of the chamber of deputies, has decided to accept the invitation to attend the inauguration of the Carnegie institute at Pittsburg, April 11.

THOSE WHO HAVE PASSED BEYOND

Lima, Ohio, March 6.—Frank T. Campbell, for many years a prominent leader in the Republican party of Iowa and formerly publisher of the Lima Republican-Gazette, died here today, aged 74 years.

As commissioner of railways in Iowa Mr. Campbell is said to have framed the revised freight tariffs adopted by Iowa, Wisconsin and Minnesota.

Cincinnati, March 6.—David Wilson Belding, president and founder of the Belding Silk company, died at his home in this city yesterday, aged 75 years. With his brothers he founded the silk business, having extensive factories in Connecticut, Massachusetts, Michigan California and Canada. Mr. Belding retired from active business four years ago.

WAS HIT WITH BEER MALLET

Henry Weaver Sues the Fishers for Heavy Damages.

Among the civil cases that will be tried this term of the district court is the damage action of Henry Weaver against A. H. and May Fisher of Chisholm.

The complaint, which was was filed this morning, alleges that the Fisners run a house of questionable reputation and a public bar at Chisholm. Weaver claims that while he was drinking at the bar, Jan. 28, 1907, A. H. and aMy Fisher, without cause or provocation, willfully and maliciously assaulted him.

The Fishers are claimed to have struck Weaver about the face and head with their fists, kicked him in the stomach, and finished him off by a few cracks on the back of the head with a beer mallet that rendered him unconscious for at least an hour. Weaver clealms that while he was unconscious he was left lying on the bar room floor. He claims he has been sick ever since the alleged assault and has been permanetly injured in health. Weaver asks for $5,000 damages. He is represented by Martin Hughes and W. E. Crangle. The Fishers are represented by Austin & Austin and Alexander Marshall.

ANOTHER STORM BREAKS OVER THE SALTON SEA.

El Paso, Tex., March 6.—Another storm has broken over the Salton Sea and the Southern Pacific tracks are reported under water, wave washing against passing trains. Trains are from two to four hours late.

STEAMER VANDALIA IS DAMAGED BY FIRE.

New York, March 6.—Damage from a fire at sea amounting to fully a quarter million dollars, was reported by the German steamer Vandalia, which arrived here today from China and Japan. The fire started in the Vandalia's hold on the afternoon of Feb. 25 and was subdued only after the hold had been completely flooded with water.

Jolly Crowd at
LincolnRollerRink
FRIDAY EVENING, MARCH 8.
Good music. Come and have a good time on wheels.
Auspices of City Union C. E. societies.

For Benefit of Band.

In order to put the Third Regiment band on its feet financially, and make it a representative musical organization, the following appeal has been sent out by Mayor Cullum:

"We take considerable pride in the fact that Duluth is becoming quite a musical center. Many cities of the size of Duluth are able, through their public funds, to assist the musical organizations of the city by employing them for public concerts in the parks and on other occasions. The city of Duluth, having no such fund, finds itself unable to render any assistance in this manner. We feel our Third Regiment band is a creditable organization, and Duluth has every reason to be proud of it. In order to exist and maintain its efficiency and high standing in the Northwest, it must receive some sort of patronage from lovers of music and the public in general. To that end I would suggest to those who are interested in these matters, the most liberal treatment for this organization."

FRENCH TROOPS MUTINY.

Toule, Department of the Meaurthe-et-Moselle, France, March 6.—A mutiny occurred in the artillery barracks here today. The men attacked noncommissioned officers with revolvers and swords. Several were wounded on both sides before the disturbance was quelled. The mutineers were captured and imprisoned.

GREATEST FOE TO PHYSICAL BEAUTY.

Dr. W. R. C. Latson in The Outing Magazine: If I were asked what was the greatest foe to beauty in both man and woman, I would say, not errors in diet, not lack of exercise, not overwork, not corsets, not any one of these, but bad mental habits. If we observe closely the faces of the people we meet at random on the street, at the theater or in the great shops, we will observe that nearly all of them are characterized by the lined mouth, the drawn brows and other bad mental states?

What do I mean by bad mental states? I mean anger, fear, worry, anxiety, irritability, regret, envy, jealousy, lack of trust in oneself and in God—all these are bad mental states; and all these destroy beauty, not only by interfering with the action of the vital organs, but by directly disfiguring the expression of the face.

Unless the beauty seeking young woman is prepared to deliberately cultivate good nature, kindliness, calmness, cheerfulness even to hilarity—unless she is prepared to deliberately conquer all tendencies to the bad mental states above mentioned, there will be little or no results from her efforts to develop in herself that most divine gift of beauty.

ORDER FOR HEARING ON CLAIMS—

State of Minnesota, County of St. Louis —ss.

In Probate Court, Special Term, February 26, 1907.

In the Matter of the Estate of Andrew Williams, Deceased:

Letters of administration on the estate of Andrew Williams, deceased, late of the County of St. Louis, State of Minnesota, being granted to Henry Williams;

IT IS ORDERED, That six months be and the same is hereby allowed from and after the date of this order, in which all persons having claims or demands against the said deceased are required to file the same in the Probate Court of said County, for examination and allowance, or be forever barred.

IT IS FURTHER ORDERED, That Monday, the 9th day of September, 1907, at 10 o'clock A. M., at a special term of said Probate Court to be held at the Probate Office in the Court House in the City of Duluth, in said County, be and the same hereby is appointed as the time and place when and where the said Probate Court will examine and adjust said claims and demands.

AND IT IS FURTHER ORDERED, That notice of such hearing be given to all creditors and persons interested in said estate by publishing this order once in each week for three successive weeks in The Duluth Evening Herald, a daily newspaper printed and published at Duluth, in said County.

Dated at Duluth, Minnesota, this 26th day of February, A. D. 1907.

By the Court,
J. B. MIDDLECOFF,
Judge of Probate.

(Seal, Probate Court, St. Louis Co., Minn.)

BARBER CHAIR PERILS.

Physician Calls Attention to Dangerous Tonsorial Attentions.

Washington Star: "There seems to be considerable diversity of opinion on the part of the boss barbers of the capital as to the price of a shave or a haircut," remarked a smoothly shaved man, "and as to whether there shall be an extra charge for shaving the neck and for the use of a hot towel.

"But there is no diversity of opinion on the part of the men who are shaved by barbers that a few more arrests and fines of $10, like that recently in Georgetown, for keeping a shop in an unsanitary condition, will do more toward this needed reform than tons of talk and moral suasion.

"It has always given me a chill of horror, perhaps because I am a physician, to see barbers reach out for a needle lying on the razor stand and calmly pick a pimple on the face of the man in the chair. Then they will take a pair of small tweezers and appiy them to some portion of the man's face, perhaps in squeezing an eruption, or elsewhere upon an open scratch or cut. But the same old needle and tweezers are used just the same.

"If you have the hardihood to call to the barber's attention the deadly danger of this pernicious practice he will look at you in astonishment and reply that the articles used are 'clean' and are 'wiped off' after each application. You see, the barber, fro mhis limited standpoint, pities your ignorance and resents your applied assertion that his articles are not clean.

"But the amazing part of it is that men submit to these hazardous facial manipulation with complacency and as a matter of course. It is past my individual understanding, but you witness it every day in barber shops in every city in the country. It is bad enough to go into the average barber shop and be shaved by a razor, which, in nine cases out of ten, is merely wiped off on the shaving paper before it is replaced in its sheath. This leaves out entirely the fact that your face has had a preliminary scrubbing with soap and brush which are used promiscuously upon other faces, very often but imperfectly rinsed after the previous use.

"Men should positively and firmly decline these gratuitious offices on the part of the barbers, and never, under any circumstances, permit the application to the face of any metal instrument except the razor itself.

"It has likewise given me spasms of horror to observe the tonsorial 'artist,' when a cut in the skin is made by the razor, or the cuticle surfaces are abrased, or the apex of a pimple or other eruption scraped, methodically reach for a small or large piece of alum or stick of caustic and apply it to the cut or the abrasion to 'heal' or 'stop the bleeding.' And it is the same old piece of alum or stick of caustic that goes on each and every face, though, of course, it is always 'clean' or 'wiped off,' and therefore harmless from the barber's standpoint.

"And men foolishly take this application of extraneous substance to the face as they do the needle or the tweezers, and as a matter of course—and through habit and long established custom, though in some instances they could with equal safety submit to a hypodermic injection of the virus of one of several dangerous and infectious diseases.

"When a youth, and long before I began the study of medicine, I never permitted such application to my face, and my refusal in a majority of cases has caused a mild or indignant protest on the part of the learned razor wielder. I have always insisted, when a cut was developed, that the clean end of towel, soaked in hot water be applied, and this is bad enough in itself under the circumstances.

"Neither have I permitted barbers to apply, after shaving, the regulation and time honored 'face wash' of various mixtures, ranging from diluted witch hazel to what is claimed to be bay rum. This 'face wash' comes also from the same old bottle and applied by the same hand that has gone over other faces. The application of the scented water from bottle and the rubbing of the hair after a shave or hair cut largely tends to cause falling of the hair and resultant baldness—barbers have 'rubbed' countless men into baldness by the application for years of this alleged 'sweet smelling' mixture.

"Where face powder is applied after a shave on the end of a clean towel, it is not so bad as where a pice of solid chalk is rubbed upon the fact. This is likewise a pernicious practice, for it is the same old piece of absorbent and holding material that goes over all faces alike that come into that particular shop—but it is 'clean,' of course, from the shaver's standpoint."

AN $8,000 COW.

New York Herald: Eight thousand dollars, recently paid by Daniel W. Field, a Brockton shoe manufacturer and farmer, for a meek-eyed, pale-faced, but industrious cow, makes this acquisition to Mr. Field's herd of full-blooded stock the highest priced bovine in the United States.

And Pontiac Rag Apple, this euphoniously dubbed Holstein-Friesian, although she has been in the hands of her present owner only a month, has already returned $4,000 or one-half of the price paid for her, a sum agreed for her next calf, which has already been sold to a New York breeder of fancy stock.

In addition to having immediately halved her cost, this wonderful animal holds the second highest record for the amount of milk and butter produced by any one cow in the world.

It is expected by her present owner that she will reach the champion producing mark during the next year. She is at present less than five years old.

BUCKWHEAT CAKES AND CULTURE.

Philadelphia Bulletin: Tradition associating great men with griddle cakes is rare. An anecdote told of Matthew Arnold and some American buckwheats possesses the piquancy of that old tale of King Alfred and the peasant woman's burned cakes.

It was at breakfast at the home of Dr. Edward H. Magill, then president of Swartmore college, that the greatest critical mind of his age was confronted with the vital problem of whether he liked this distinctive American viand.

"Culture," Dr. Arnold was remarking, "is indicated by our ability to conceal the first sentiment with which an object inspires us."

At this point he was interrupted by the entrance of a maid who placed before the author and his wife a plate of buckwheat cakes. Mr. Arnold and his wife eyed them in the distrustful manner of some ancient Roman, fresh from his banquets of lampreys and flamiuges' tongues, confronted for the first time with the unsophisticated fare of the Gauls. It was plain they had never seen them and never wished to see them again.

"Take one, my dear," he said, turning to his wife, as he at last decided to try one; "they're really not so nasty as they look."

"Thee was saying, was thee not, Mr. Arnold," he said slyly, "something about the degree of culture being indicated by the ability—"

But here Mr. Arnold saw the point.

SAD RESULTS OF CIDER MAKING.

Cleveland Plain Dealer: Instead of "making hay while the sun shines," as most farmers do, Farmer Sanford Sisson made cider.

Azuba Sisson is the wife of Sisson. They were married in 1878, and have a daughter 17 years old.

The farm of the Sissons is near Norwalk. It is one of the pretty farms of the neighborhood and capable of producing fine products, but of all things that come from a farm cider looked the best to Sisson.

In Norwalk cider is generally regarded as a temperance drink. Not so does Azuba Sisson regard the cider that her husband makes and which she avers he drinks. It was Sisson's cider that caused the domestic breach.

Yesterday Azuba Sisson applied to the Common Pleas court for divorce. In her petition Azuba Sisson says that Sanford Sisson makes the cider in the summer time and stays drunk on it nearly all the winter.

Azuba says that Sanford's summer cider has kept Sisson intoxicated nearly all the winter for several winters past.

JEWELER'S BIT OF ADVICE.

Kansas City Star: "I think I'll have to bring her in and let her choose," said the embarrassed young man, as he looked hopelessly at the diamonds spread out on the table.

"Pardon me for a bit of advice," the jeweler said, earnestly, leaning forward, "but I've had a lot of experience in such matters. If you pick ft out yourself, and take it to her, she'll surely be satisfied. Always are. But if she comes here, and sees bigger, handsomer rings, she won't be contented with the ones you can afford. The $500 or $800 ring she sees will stay by her. We've often lost sales that way. I've frequently seen the young woman pick out a ring that the man obviously couldn't afford, and he would find some excuse for not buying it."

Then the young man said he thought he might as well decide on that $110 trifle at once.

MINNESOTA HISTORICAL SOCIETY

THE COUNTY OPTION BILL GETS ITS QUIETUS IN THE SENATE BY LARGE VOTE

No Hope for Bill Still Pending in the House.

Senate Passes Measure for Service for Battleship Minnesota.

Committee to Investigate Boards of Trade to Meet Tuesday.

(From a Staff Correspondent.)

St. Paul, March 7.—(Special to The Herald.)—The senate laid the county option bill to rest this morning by a large majority. The bill is still pending in the house, but similar action is likely to be taken there, and there is no prospect that the bill will become a law. This removes from the field one of the most vexing problems of the session. The senate temperance committee this morning reported the bill for indefinite postponement, and Senator Elwell of Minneapolis submitted a lonely minority report recommending that it be placed on general orders for consideration. Senator Thorpe, the author of the bill, tried to gain time by having both bill reports laid on the table for the present, but the senate was ready to kill it, and rejected the motion, 23 for and 36 against. Senator Campbell then moved that the majority report be adopted. The latter motion was voted down 22 for and 37 against, and the majority report was adopted by a viva voce vote, thus disposing of the bill.

* * *

The senate, after an hour's debate, passed the Calhoun bill appropriating $10,000 for a silver service for the battleship Minnesota, 38 to 17. Senator Peterson complained that the bill had

HEARING ON IRON TAXES

Will be Concluded by Legislative Committee Next Wednesday.

John Lind Favors Tonnage Tax of 2 1-2 Cents a Ton.

(From a Staff Correspondent.)

St. Paul, March 7.—(Special to The Herald.)—The final hearing of the special joint committee to investigate the taxation of iron mines will be held next Wednesday afternoon, when the range delegations are expected here, as well as delegations from Itasca county and from Brainerd, in the Cuyuna range district.

A partial hearing was held yesterday afternoon, but it was clear that it would be impossible to complete it before next week, and as there is talk of adjourning the legislature from Saturday to Wednesday on account of the spring elections throughout the state, it was decided to have the hearing Wednesday afternoon.

Ex-Governor John Lind made a talk yesterday afternoon in favor of a tonnage tax, which he did not think should exceed 2½ cents per ton. He based this on the theory that iron ore after it has left the ground is personal property and is taxable as such, and he based his limitation of the rate upon the theory that 2½ per cent is about the average tax rate throughout the state, and that the ore at the mine is worth about $1. To make it more than that, he intimated,

(Continued on page 5, fourth column.)

NON-RESIDENT WITNESSES

Of Standard Oil and Other Companies Can be Summoned.

St. Louis, March 7.—A decision was handed down in the United States circuit court today sustaining the order of service out of the United States circuit court against the Standard Oil company and over fifty other nonresident corporations and individual defendants with the Waters-Pierce Oil company in the suit filed by the government at the instance of President Roosevelt.

Over a month ago a motion was filed by the defendants to the effect that it was not in the jurisdiction of the St. Louis court to compel nonresident witnesses to come here and testify in the suit. The arguments were heard before Federal Judges Sanborn, Hook and Vandevanter and the point at issue was taken under advisement. Judge Sanborn wrote the opinion.

CONGRESSMEN GO ON JUNKET TO PANAMA.

New York, March 7.—Fifty-three representatives in congress, who desire to know for themselves the conditions under which the Panama canal is being built, sailed yesterday on the steamer Panama for Colon.

With them went Lieut. Col. George F. Goethals, a United States army engineer, who will undertake the construction of the canal, and Maj. Gaillard, U. S. A., who will assist Col. Goethals.

The party includes Sereno E. Payne, New York; John Dalzell, Pennsylvania; Warren Keifer, Ohio; Samuel T. McCall, Massachusetts; William A. Rodenburg and J. V. Graff, Illinois; W. A. Calderhead, Kansas; C. R. Davis, Minnesota; J. C. Cheney and J. H. Foster, Indiana; Theobald Otjen, Wisconsin; George A. Loud, Michigan; Charles F. Scott, Kansas; T. F. Marshall, North Dakota; P. T. Chapman, Illinois; Frederick Landis, Indiana; and F. J. Garrett, Tennessee.

SPOONER'S NEW PLACE

Will be General Counsel for James J. Hill's Interests.

Salary Equal to That of President of United States.

St. Paul, March 7.—The secret of the United States Senator John C. Spooner's resignation from the upper house has been brought to light.

The famous Wisconsin solon, whose recent retirement from the United States senate caused a profound sensation politically, has doffed the senatorial toga to accept the important post of general counsel for James J. Hill's interests, including the Great Northern, Northern Pacific, Chicago, Burlington & Quincy railroads, as well as the Great Northern Steamship company, the Northern Steamship company and the other varied Hill interests, of which the ore lands, both in Minnesota and other states, constitute a factor.

Senator Spooner will assume his new duties on May 1, the day when his retirement from the senate takes effect.

Although the announcement of Senator Spooner's election by Mr. Hill to head the legal department of the Hill interests has not been officially announced, the Great Northern president now being in New York, the Minneapolis Tribune was informed that it is only a matter of time when the appointment will be given out from the Great Northern general offices in St. Paul.

It is said that at Senator Spooner's request Mr. Hill had determined to withhold the official announcement until April 1, but now that the news has become public it is probable that

(Continued on page 7, first column.)

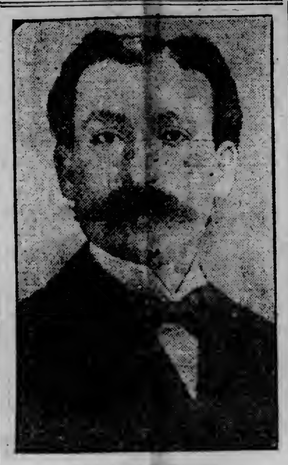
RUSSIAN ROBBERS GET A BIG HAUL

Seize $20,000 Which Was Being Paid to University Officials.

Moscow, March 7.—A daring holdup occurred at the University here today. While the officials were being paid off in the chancellery seven armed men entered, threatened all present with death and demanded the money. The intruders then fired in the air, seized $20,000 and decamped, killing a sergeant of police whom they met at the door as he was about to enter the building.

The university is now surrounded by police and all the houses in the vicinity are being searched.

RAILROADS IN NEBRASKA PROMPTLY RETALIATE ON NEW TWO-CENT FARE LAW



ABRAHAM RUEF,
San Francisco Attorney, Who Is a Fugitive From Justice, and Although in the City Cannot Be Found by the Sheriff.

All Privileges to Any Class Summarily Cut Off.

Homeseekers' Excursions and Every Special Rate Abolished.

Straight Two-Cent Per Mile Fare Only Thing That Goes.

Omaha, Neb., March 7.—In retaliation for adverse legislation, culminating in the passage of the 2-cent per mile passenger fare bill passed by the Nebraska legislature, and which went into effect this morning, all Nebraska railroads, including the Union Pacific, Burlington, Northwestern, Missouri Pacific, Rock Island and Great Northern, issued circulars today absolutely abolishing all classes of reduced fares. Under the head of "special instructions" the circular says: "Agents must not honor clergy permits, reduced rate orders, orders or instructions for rates for disabled volunteer soldiers, orders for charitable rates, or any other form or reduced rate order, whether for a state or interstate journey, in any portion of Nebraska.

"All excursion rates one way or round trip, whether on excursion or certificate plan, at present authorized for conventions, assemblies, events, etc., homeseekers' rates one way or any other special rates or round trip, applying between two points, both of which are in the state of Nebraska, are hereby cancelled."

The circular concludes by calling attention that it is the purpose to make the 2-cent rate the only possible rate to apply on Nebraska passenger fares.

STROTHERS NOT GUILTY

Two Brothers Promptly Acquitted of Murder by Jury.

Judge Harrison Expresses His Approval of the Verdict.

Culpepper, Va., March 7.—James and Philip Strother, who have been on trial here for the past two weeks, charged with the murder of their brother-in-law, William F. Bywaters, were today pronounced not guilty by the jury. The twelve men who tried the case spent an hour and thirty-two minutes in reaching their verdict. The court convened at 9:30 o'clock and eight minutes later the case was in the hands of the jury.

The announcement of the verdict of

(Continued on page 7, first column.)

WHEREABOUTS OF ABE RUEF

Cannot be Ascertained by Coroner Who Has Bench Warrant.

San Francisco, March 7.—The whereabouts of Abraham Ruef remained a mystery today. Coroner Walsh, who has succeeded Sheriff O'Neil in an attempt to serve a bench warrant on the indicted attorney, will so report to Judge Dunne.

COMMITTEE OF EXPERTS TO REPORT ON PROPOSED STEEL PLANT ARRIVES

RUSSIA'S DOWAGER-EMPRESS,
Mother of the Czar, and Daughter of King Christian of Denmark, Who Is on a Visit to Her Sister, Queen Alexandra of England.

Second Vice President Dickson of New York Heads Party.

Says He is Here Seeking Information, Not Giving It.

Prominent Duluth Men Meet Visitors and Act as Escorts.

The party of experts sent out by the United States Steel corporation to pass upon the establishment of a plant at Duluth for the manufacture of steel arrived in Duluth over the Omaha at noon today from Chicago. The train was nearly an hour late.

The party is headed by W. B. Dickson of New York, second vice president of the United States Steel corporation. With him are John Reis of New York, assistant to the president of the Steel corporation; E. E. Slick of Pittsburg, chief mechanical engineer of the Carnegie Steel company; M. A. Neeland of New York, assistant to Mr. Reis; S. A. Benner of Pittsburg, general sales manager of the Carnegie Steel company, and T. W. Robinson of Chicago, first vice president of the Illinois Steel company.

None of these gentlemen had anything in particular to say regarding the trip. The interviewer was referred to Mr. Dickson, who appears to be acting as spokesman of the party.

"We are here to seek information, not to give out information," said Mr. Dickson, with a smile. "There is nothing that we could say just now, anyway. We are here for the purpose of finding whether it will be feasible to establish a steel plant in Duluth. As yet we are practically unacquainted with conditions as they exist here in this particular regard, and therefore are in no position to say what the nature of our report is likely to be.

"We shall probably remain in Duluth until Saturday, at least, and by that time hope to have a pretty good idea of the situation. It is the desire of the Steel company to establish a plant here, as already has been outlined in the papers, provided conditions are such as to warrant such a thing. We are here to find whether or not they will warrant it. I do not know just what the program will be during our stay, but understand we

(Continued on page 7, third column.)

DOWAGER EMPRESS

Of Russia Pays Visit to Her Sister, Queen Alexandra.

Police Are Taking Great Precautions for Her Safety.

London, March 7.—The dowager empress of Russia arrived here this morning and was greeted at the railroad station by her sister, Queen Alexandra, the prince and princess of Wales and the staff of the Russian embassy. The empress reached London half an hour earlier than the time publicly announced, and several foreign ministers who had not been apprised of the change, arrived at the station after the departure of the royal party. The expediting of the empress' arrival was, it is understood, planned by the police, who have taken stringent precautions for her protection. While the officials of Scotland yard have little fear that anarchists will imperil their chances of obtaining an asylum in England by any attempt on the life of the empress, they are taking no chances and every possible avenue of attack will be guarded. From the railroad station the dowager empress and the queen drove to Buckingham palace.

CONSIDER THE WORST IS OVER

The Women in the Thaw Case Are Greatly Relieved.

New York, March 7.—"So far as women are concerned, we consider the worst over," said Mrs. Evelyn Thaw today, "we are all greatly relieved that Harry's mother's testimony has been given. The suspense of waiting to be called bore heavily upon her and all of us are happy to know it is over."

Mrs. Thaw called on her husband in the Tombs early today and announced her intention of remaining there as long as the prison rules permitted. Mrs. William Thaw, Mrs. George L. Carnegie and the countess of Yarmouth also called at the prison today.

Thaw received the usual large number of letters in the early mail today. A number of them came from foreign countries.

CHORUS SINGER GOES CRAZY AT BERLIN PALACE.

Berlin, March 7.—Eugene Kupke, a chorus singer of the Royal opera, became suddenly demented at a concert given in the palace last night and at which all the ambassadors and most distinguished persons in official life were present. During a pause, while refreshments were being served, a drum was beaten, giving the military signal to "assemble." The guests hurried to their seats and the emperor, who was much astonished, asked the conductor, Richard Strauss, why the signal was given. Strauss explained that it was the act of an insane person who was forcibly removed.

BRITISH STEAMER LOST; TWENTY-NINE DROWNED.

Castellamare di Stabia, Italy, March 7.—The British steamer Malaga was lost in sight of this port during a severe storm. Twenty-nine bodies have come ashore from the wreck.

THE JURY STILL OUT

No Return Yet Made in Trial of Steve Adams.

Trial of Moyer, Et Al Will Follow in Few Days.

Wallace, Idaho, March 7.—Nothing has been heard from the jury in the Steve Adams case, which retired yesterday, and a disagreement is now thought to be more than likely.

Steve W. Adams was arrested in Oregon more than a year ago on the charge of having murdered Fred Tyler, a claim jumper in the St. Joseph river region of Idaho in August, 1904. Jack Simpkins, also wanted in connection with the same murder, is still a fugitive from justice. Adams was taken to the Idaho penitentiary at Boise. There he was informed that Harry Orchard in confessing the assasination of Former Governor Frank Steunenbery, had implicated the Western Federation of Miners in that crime and had asserted that Adams knew about the plot to assassinate Steuenburg and that Adams could be brought back to Idaho on the charge of killing Tyler.

Adams made a confession to Detective McPartland, in the presence of witnesses while still in the penitentiary, admitting that he had shot Tyler with a rifle, at the behest of Jack Simpkins. In the confession Adams also told of the murder of Boule, another claim jumper, and of an alleged plot by the Western Federation of Miners to "get" Steunenburg. When the case finally came to trial Adams asserted that he had been forced to give the confession, and that the detective had assured him of freedom if he would make a statement involving the Western Federation of Miners in the assassination of the former governor of Idaho. Detective McParland and the witnesses to the confession testified that no promises of immunity were made. This testimony was denied on the witness stand by Adams. The trial of President Moyer, Secretary Haywood and Committeeman Pettibone of the Western Federation of Miners on a charge of instigating the murder of Steunenburg will probably come up for trial at Caldwell within a few days.

UNDERWRITERS ARE OPTIMISTIC

Concerning the Dakota But Divers Have Different Opinion.

Yokohama, March 7.—Representatives of the underwriters' board, who today again visited the scene of the wreck of the steamer Dakota in the Bay of Tokio, report that salvage work is possible if time, weather and wrecking apparatus are adequate.

A diver who visited the Dakota returned here this afternoon. He says the vessel is in the greatest danger. She is resting on four rocks, her rudder is ten feet above the water, the foot of her second mast is on a level with the sea, she has three large holes in her port side and there are smaller holes in her starboard side. In addition, parts of the steamer's sides are bent in. The Dakota apparently passed through a ridge of rocks shaped like a vise, the upper parts of the rocks being turned in.

A portion of the Dakota's mail is still on board the vessel.

STEAMER ON A SAND BANK

Cross Channel Boat Cambridge Goes Ashore in Fog.

Forty-Six Passengers Are Aboard But in No Danger.

Flushing, Holland, March 7.—The British steamer Cambridge, belonging to the Great Eastern Railway company of London, grounded this morning on Nolle Plaat during a fog. The sea is calm and the vessel probably will get off at the next tide. This is the second cross channel steamer to be imperilled on this coast since the steamer Berlin was wrecked off the Hook of Holland, a fortnight ago.

As the tide receded, it left the Cambridge high and dry on a sand bank. The passengers were still on board at 2:30 this morning.

London, March 7.—There are forty-six passengers on board the Cambridge and her crew consists of between forty and fifty officers and men.

The Great Eastern Railway company this afternoon received a telegram announcing that the Cambridge was not in the slightest danger.

WISE MEN FROM THE EAST.

Hark, hark, the dogs do bark, the experts have come to town; some with wheels, some with steel, and a plant of great renown.

ICE FIELDS ARE LARGER

Than They Were at This Date a Year Ago.

Weather Bureau Issues Report of Conditions on Lakes.

According to the ice report of the United States weather bureau, there is more ice in all of the lakes at present than there was at this time last year. Over Western Superior the ice fields extend beyond Two Harbors, and over the central and eastern portions the fields are heavier and more extensive.

St. Mary's river ice is solid, and extends the entire length, while in Green Bay the average thickness of the ice is from ten to twenty-six inches, and it is solid. Although the fields in Lake Michigan are more extensive than last year, they have impeded navigation but little so far. The ice in the Straits is solid, and extends from the east end of Bois Blanc Island to Lake Michigan, but it is not as heavy as usual.

Over Lake Huron there are also extensive ice fields, and the St. Clair river is solid, from Port Huron to Lake St. Clair. The ice fields along the south shore of Lake Erie extend beyond vision, and in Ontario there have been extensive ice fields in sight during the past week.

In the Duluth and Superior harbor the ice ranges from sixteen to thirty-four inches in thickness, and averages about ten inches thicker than a year ago. The ice field in the lake, which extends beyond Two Harbors, ranges from two to eight inches in thickness. At Sault Ste. Marie the harbor ice is about twenty-one inches thick, and the river is frozen over solidly for the entire length.

BRIEF TELEGRAMS.

Governor Sheldon of Nebraska, shortly before midnight, signed the 2-cent railroad passenger bill. A few moments later the bill would have become effective without executive approval. The governor said he was led to sign because of a doubt whether the emergency clause would have been effective without his signature.

Rev. E. Lawrence Hunt has appealed to the court of appeals of the District of Columbia from the present decision of Justice Gould, granting Charles C. Bassett a divorce from Fanny Rice Bassett. Mr. Hunt was named as corespondent in the petition filed by Mr. Bassett.

An opinion by Attorney General Bonéparte regarding the action of the South Carolina authorities in bringing imigrants to the United States for work in that state, is that it is unlawful for a state government to pay the passage of intending immigrants or to assist immigration otherwise than by advertisements.

Col. Edwin R. Fox, describing himself as a veteran of the Civil war and a bond broker of Los Angeles, was arrested at New York Wednesday on a charge of criminal libel preferred by Dr. Harry MacDonald Peggs. The physician says Fox circulated a pamphlet libeling him.

President Duffy and almost all the officers of the Butte Miners' union were re-elected at the election, closing late Tuesday night. Prospects for a settlement of the strike now seem bright except that there is no change in the newspaper situation.

The Rock Island Golden State Limited, which left El Paso, Tex., Wednesday for Chicago, was wrecked near Tony, N. M., after midnight. The engine and four cars left the track. One passenger and a mail clerk were slightly injured.

Weather Forecast: Snow flurries and colder tonight with minimum temperature 10 degs. to 15 degs above zero. Friday generally clear. Northerly and westerly winds.

Advance Spring Models

In Suits and Overcoats for Men and Young Men.

We have the pleasure to announce that this season's preparations have been on a wider scale than ever before.

Our showing of spring styles is diverse and authoritative. It is not merely a question of fabrics, for any maker can buy good material.

Where we excel all others is in the fit, style and variety.

Our garments at Fifteen, Eighteen and Twenty Dollars excel all others at those prices.

Our Prices Range From $10 to $45.

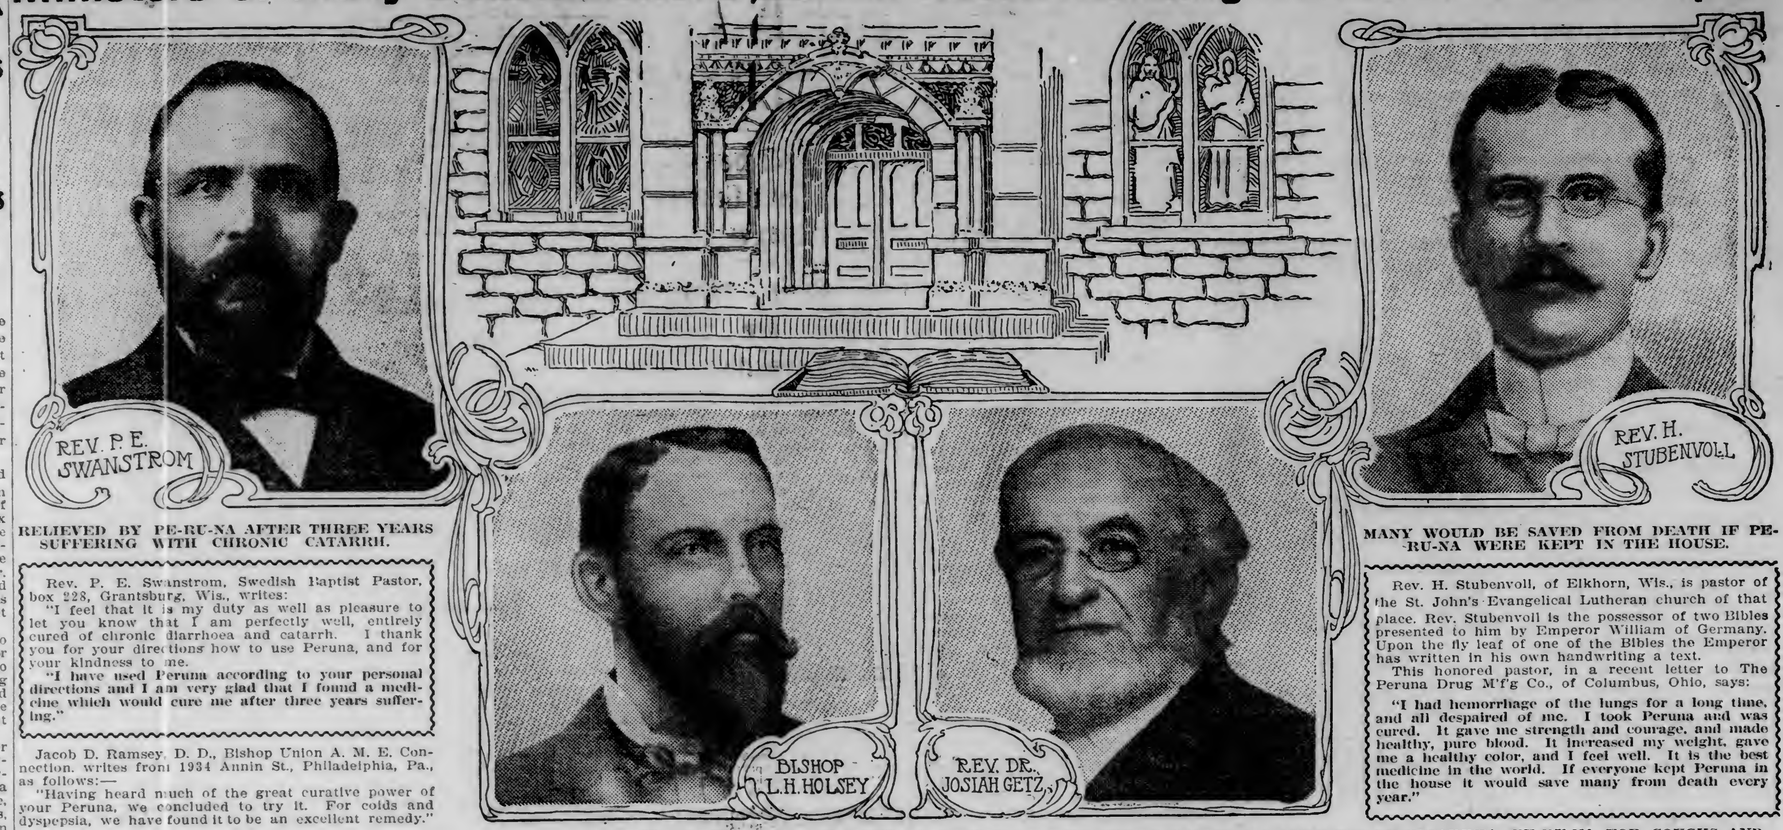
THE CLERGY SPEAK OUT CONCERNING PE-RU-NA.

Ministers of Many Denominations Join in Recommending Pe-ru-na to the People.



RELIEVED BY PE-RU-NA AFTER THREE YEARS SUFFERING WITH CHRONIC CATARRH.

Rev. P. E. Swanstrom, Swedish Baptist Pastor, box 228, Grantsburg, Wis., writes:

"I feel that it is my duty as well as pleasure to let you know that I am perfectly well, entirely cured of chronic diarrhoea and catarrh. I thank you for your directions how to use Peruna, and for your kindness to me.

"I have used Peruna according to your personal directions and I am very glad that I found a medicine which would cure me after three years suffering."

Jacob D. Ramsey, D. D., Bishop Union A. M. E. Connection, writes from 1934 Annin St., Philadelphia, Pa., as follows:—

"Having heard much of the great curative power of your Peruna, we concluded to try it. For colds and dyspepsia, we have found it to be an excellent remedy."

MANY WOULD BE SAVED FROM DEATH IF PE-RU-NA WERE KEPT IN THE HOUSE.

Rev. H. Stubenvoll, of Elkhorn, Wis., is pastor of the St. John's Evangelical Lutheran church of that place. Rev. Stubenvoll is the possessor of two Bibles presented to him by Emperor William of Germany. Upon the fly leaf of one of the Bibles the Emperor has written in his own handwriting a text.

This honored pastor, in a recent letter to The Peruna Drug M'f'g Co., of Columbus, Ohio, says:

"I had hemorrhage of the lungs for a long time, and all despaired of me. I took Peruna and was cured. It gave me strength and courage, and made healthy, pure blood. It increased my weight, gave me a healthy color, and I feel well. It is the best medicine in the world. If everyone kept Peruna in the house it would save many from death every year."

THE vocation of preaching is a very trying one, especially to the throat and lungs. The preacher must stand before large audiences, frequently in illy ventilated rooms, sometimes over heated, and other times filled with dangerous drafts. The preacher is frequently called upon to stand in such places and preside at a service an hour or more in length.

This is the most trying test that can possibly be put to the vocal organs. The liability to catarrh is very great. This is so universally true that the majority of preachers have catarrh, in more or less pronounced form.

Many preachers have found Peruna of use to them, to prevent as well as to relieve the catarrhal ailments to which the preacher is constantly subjected.

Follicular pharyngitis has come to be a very common expression. It is sometimes called preacher's sore throat. In reality, this affection is catarrhal pharyngitis. Hoarseness is generally due to catarrhal laryngitis. Chronic cough is generally due to catarrhal bronchitis. All these conditions beset the preacher, and are his constant liability the whole year round.

Notwithstanding the diffidence of the clergy to give public testimony to any remedy, yet a large number of them, impelled by gratitude, have expressed their high appreciation of Peruna as a remedy for this class of ailments.

COLD SETTLED ON LUNGS.

H. M. Turner, D.D., L.L.D., 30 Young St., Atlanta, Ga., writes:

"I contracted a dreadful cold which settled on my lungs. I tried several remedies recommended by the doctors, but my condition grew worse until I was alarmed.

"I finally resorted to Peruna, and I find myself well again."

BISHOP HOLSEY'S STRONG TRIBUTE TO PE-RU-NA.

L. H. Holsey, Bishop C. M. E. church, Atlanta, Ga., writes:

"I have found Peruna to be a great remedy for catarrh. I have suffered with this terrible disease for more than twenty years, until since I have been using Peruna, which has relieved me of the trouble.

"I have tried many remedies and spent a great deal of hard earned money for them, but I found nothing so effectual in the cure of catarrh as the great medicine, Peruna.

"I feel sure that Peruna is not only a triumph of medical science, but it is a blessing to suffering humanity.

"Every individual who suffers with respiratory diseases will find Peruna to be a magnificent and sovereign remedy."

CONVINCED OF THE MERITS OF PE-RU-NA.

Rev. Dr. Josiah Getz, 47 Park avenue, Albany, N. Y., for years a Rabbi of the Hebrew Synagogue, but now retired, writes:

"I am fully convinced of the merits of Peruna in cases of colds and catarrh, and as a general tonic.

"I have taken it off and on now for several years and always find that it is very effective in restoring lost strength and appetite, and very effective in ridding the system of cold. I gladly endorse it."

Rev. J. G. Dukes, pastor of the Unitarian church, of Pinetown, N. C., writes:

"My wife has been in a very bad state of health for several years, and nothing seemed to do her any good until she began to use Peruna one month ago. Since then the color has returned to her face, and she is gaining in flesh every day and I believe she is a well woman today."

THROAT AFFECTED BY CATARRH

Rev. H. W. Tate, 920 Lincoln Ave., Walnut Hills, Cincinnati, Ohio, writes:

"For several years I have been troubled with a peculiar spasmodic affection of the throat. It would seize me suddenly, and for a few minutes I would be unable to speak audibly, and my breath would be greatly interfered with. I would be obliged to gasp for breath.

"I finally concluded that it was some catarrhal affection which probably excited the spasm. It interfered with my vocation as a preacher, attacking me occasionally in the pulpit.

"I had heard so much about Peruna as a catarrh remedy that I determined to try it. After taking two bottles my trouble has disappeared. I feel sure that Peruna has greatly benefited me."

For catarrh of the respiratory organs, no remedy has ever been found to equal Peruna.

PE-RU-NA FOR COUGHS AND COLDS.

E. Cottrell, D. D., Presiding Bishop of Fifth Episcopal District, C. M. E. church in America, writes from Holly Springs, Mass., as follows:

"I have used Peruna in severe cases of neuralgia, colds and coughs, and find it to be one of the most valuable remedies on the market.

"I unhesitatingly recommend it to all sufferers from the above troubles."

PE-RU-NA CONTAINS NO NARCOTICS.

One reason why Peruna has found permanent use in so many homes is that it contains no narcotics of any kind. Peruna is perfectly harmless. It can be used any length of time without acquiring a drug habit. Peruna is not a mere palliative, but if used according to directions its beneficial effect is frequently of a permanent character. The principal ingredients of Peruna are well known and highly praised by medical writers of all schools.

BUILDERS TO HAVE BANQUET

Annual Affair of Duluth Exchange at St. Louis Hotel.

The fourth annual banquet of the Duluth Builders' exchange will occur at the St. Louis hotel this evening. The exchange has sent out a large number of invitations and it is expected that more than 200 will be present including prominent members of the Minneapolis and St. Paul exchanges.

R. D. Haven president of the local exchange will act as toastmaster. Among those who will speak are Mayor Cullum, William Corning and G. M. Gillette of Mineapolis, S. H. Cameron of St. Paul and President Frank Crassweller of the Duluth Commercial club. Toasts will also be given by members of the local exchange.

The affair will be further enlivened with a program of musical and dramatic numbers.

The committe on arrangements is comprised as follows: Alexander Anderson, H. A. Hall, H. R. Armstrong.

Reception committee: A. H. Kreiger, Louis Ramstad, W. F. Quayle, J. F. Schleunes, S. F. Matter, T. J. St. Germain, D. R. Black, S. D. Glass, R. A. Webster, E. G. Wullinder, A W. Deetz and William Penn.

STOLE BRIDE AS PARENTS SLEPT

Maid of Sixteen Descended on Ladder to Her Love.

West Branch, Iowa, March 7.—News has reached here of the elopement of W. F. Harbit of this place, and Miss Grace Peters of Paris, Mo., in which a ladder, a club and a dark rainy night, acted as faithful allies of Cupid.

Miss Peters was but 16, and for this reason her parents strongly objected to her marriage. They told Harbit that if he waited long enough this objection might be overcome. The prospective son-in-law admitted the force of the argument, but decided he would not wait. He prepared to steal Grace, and Grace was willing to be stolen.

So, on a dark and rainy night, Harbit repaired to the Peters' homestead and, placing a ladder against his sweetheart's window, gave a preconcerted signal. The young woman began to descend the ladder, but, unfortunately, the signal also had been heard by the family bulldog. Harbit fought off the dog, and the noise of the rain beating against the gable drowned the sounds of the battle so that through it all the old folks slumbered on.

The elopers hurried to the station and were soon in Macon, where they had made arrangements for the license clerk to await them with a minister. Just as the license had been filled out, the long-distance telephone bell rang, and inquiry was made for the lovers. It was the voice of Peters, here, who chided the runaways, but finally promised them forgiveness, and said that if they would return he would give them the finest wedding the county had ever seen.

"He might change his mind," said the canny little bride. "Let's get married now while everything is in readiness. Then we can go home, accept papa's forgiveness and let him give us a reception."

AFRICAN WANTS LAND.

Sends Letter of Inquiry to Officials at Local Land Office.

The Duluth land office has received a letter from far off Africa, through which Charles P. Dumeresq is seeking information concerning farm lands in Northern Minnesota. The letter is dated at a town in Orange River colony.

Questions are asked concerning the price, the size of the farms, and the form of cultivation for which they are best adapted.

The text of the epistle is as follows:

"Wonderklip, Fleksburg, Orange River Colony, Feb. 1, '07.

"Sir: I understand that there is still a certain amount of state land open for settlement in the state of Minnesota. I should, therefore, be greatly obliged to you if you could furnish me with particulars of price, size of farms and for what form of cultivation these lands are most suited.

"I should also be grateful for any information you could give me with regard to the approximate average rental of private farms in the above named state. I am, sir, your obedient servant,

"CHARLES P. DUMERESQ."

PERFECT CONFIDENCE

Duluth People Have Good Reason for Complete Reliance.

Do you know how—
To find quick relief from backache;
To correct distressing urinary ills;
To surely cure sick headaches?
Just one way—your neighbors know—
Have used Doan's Kidney Pills;
Have proved their worth in many tests.
Here's Duluth testimony.

Mrs. C. M. Bradley, dressmaker, of 109 First street east, Duluth, Minn., says: "Since giving a testimonial for publication some six years ago, which has appeared at intervals in our Duluth papers, and in which I told of the gratifying benefit I obtained from the use of Doan's Kidney Pills, my faith in this remedy has only increased. Not only myself but numerous friends have found that Doan's Kidney Pills are a remedy that can be relied upon. I used to suffer from aching pains in the small of my back so that I couldn't stoop nor rest at night. This trouble is now a thing of the past and the action of the kidney secretions has also been regulated. I unhesitatingly recommend Doan's Kidney Pills at every opportunity."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

ARRESTED ON PERJURY CHARGE

Anton Forte Claimed to Have Sworn to False Statement.

The United States marshal yesterday arrested Anton Forte and he is charged with perjury in making a homestead entry in 1904. When arraigned yesterday he waived examination, and his hearing was set in the United States court for July 9, and his bond fixed at $500. It is expected that this will be furnished today. J. M. Martin is his attorney.

It is specified in the complaint against him that Forte swore before Otto Poirier, a duly qualified agent, that he had been living on the land since April 12, 1899. The complaint alleges that he perjured himself by making a false statement.

If the charge is proven against Forte it will be one of a very few offenses of asimilar nature which have been committed in this district.

INVITES FATE OF ANDREE.

Captain Daring to Make Dash in Balloon for the Pole.

Milwaukee, March 7.—Undaunted by the fate of Capt. Andree, Capt. Daring of Milwaukee will leave Sunday for Montreal, from which city he will attempt to reach the North pole by balloon. He hopes to make his dash successfully and to reach the pole in forty hours.

The captain and two companions expect to take advantage of a trade wind the course of which is believed to describe a half circle from the Atlantic coast through Canada and Alaska to the North. His balloon is of special construction. It is not of the dirigible type of airships, but is patterned after the old model of gas-inflated balloons. It has a carrying capacity of 2,000 pounds and is equipped with a gas-producing machine and a searchlight of 3,000 candle power. Provisions sufficient to last two years will be taken.

SUES THE CITY.

Dr. Confer Asks Damages on Account of Injuries.

Samuel C. Confer, a veterinary surgeon, residing in Oneota, has sued the city of Duluth for $2,500 damages on account of injuries alleged to have been received at the Thirty-sixth avenue west crossing, on Third street, Oct. 18 last.

Dr. Confer claims that his horse stepped in a hole left uncovered in the street, and caused the doctor to be thrown from his carriage. It is alleged that he was injured in the back and hands and has been incapacitated from carrying on his professional work ever since. Dr. Confer claims that there were no warning lights placed at the excavation.

THE DIVORCE INDUSTRY KILLED IN SOUTH DAKOTA.

Pierre, S. D., March 7.—The house yesterday passed the senate divorce bill requiring a residence of one year in the state and three months in the county, before beginning a divorce suit, with all hearings in open court. This law kills the divorce industry of the state, which has become distasteful to the people of South Dakota.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm.

WALDING, KINNAN & MARVIN, Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all Druggists.

Take Hall's Family Pills for Constipation.

GIRLS FEARED "X-RAY" GLASSES OF THE BOYS.

Mattoon, Ill., March 7.—The village of Long View, in Douglass county, has almost been rent asunder. Some of the larger boys in the school recently bought some cheap magnifying glasses from a Chicago mail order house. The impression got out among the girls that these glasses were X-rays, and as they had heard of the power of the X-ray for penetration, they became embarrassed and alarmed.

The girls went to their mothers with the story, and some of the women laid the matter before the board of education.

The directors had the owners of the "powerful X-ray" instruments examined. They found nothing but ordinary magnifying glasses. The mothers breathed easier, and the girls are again in school.

LIGHTNING CHANGE SUIT.

British Dress Reformer Invents a New Garb for Men.

London, March 7.—Edgar Jephsen of Wembley, Middlesex, is the latest British dress reformer. He has invented a suit for men in a hurry, the main usefulness of which lies in the fact it can be put on and taken off in record time. In appearance it differs only from the conventional attire when seen from behind, but it is so distinctive from this point of view that when Jephsen first wore it in public he was derided. The novel feature of the suit consists in combining the jacket and trousers, the latter being fastened by concealed buttons. Jephsen proposes to extend the idea to evening dress, but doubts whether it will be popular, because it is so useful.

ELBA MINER KILLED.

Fell From Tram Car and Two Cars Passed Over Him.

Eveleth, Minn., March 7.—Pasquala Demperil, an Italian miner, was killed in the Elba mine, about five miles from here, Monday night. Demperil was a driver of a tram car in the mine, and in some way fell from his seat onto the tracks, two tram cars filled with ore passing over his body. He was taken to Dr. Farmer's hospital at McKinley, where he died in a few hours. The only relatives Demperil had in this country were two cousins, one of whom resides at McKinley, and the other here. The body was brought here and was buried from the Holy Family church, yesterday, Father Biban officiating.

A peculiar circumstance connected with taking the wounded man from the mine was the fact that the skip was out of order, and it was necessary to tie a rope around Demperil and hoist him through the shaft.

CRIPPLED BOY'S CHAIR

Is Tossed on a Sleigh Tongue by a Runaway Team.

Lake City, Minn., March 7.—The invalid son of Mrs. Wenzel narrowly escaped death under the feet of a runaway team. The boy was in his invalid chair in front of his mother's bakery when some one pushed the chair in front of the horses. It caught on the sleigh tongue and the frightened team dashed down the street with it. The boy was rescued by several men.

IOWA YOUTH A SUICIDE.

Young Shubert of Britt Made Desperate by Chronic Ill-Health.

Britt, Iowa, March 7.—Because, it is believed, he had become despondent over continued ill health, Henry Shubert, Jr., the 17-year-old son of Henry Shubert, a well-known farmer living five miles north of here, committed suicide by shooting. In the temporary absence of his mother, with whom he was alone in the house, the young man secured a shotgun, and, placing the muzzle in his mouth, discharged the weapon by pressing his foot against the trigger. His mother heard the report of the gun and found the boy lying dead upon the floor.

ROBBERY NOT AN ERROR.

Count Proves That $173,000 is Missing From Chicago Treasury.

Chicago, March 7. — Any possibility that the missing $173,000 from the subtreasury might have been tucked away in the currency on hand, was eliminated when the nimble fingers of four experts from the United States treasury at Washington, counted the last of the paper money in the vaults.

"It came out correct to a dollar," said Assistant Treasurer Boldenweick.

The secret service bureau meanwhile appeared to make no further progress in detecting the thief.

DIES RICH BUT IN WANT.

Mexican Woman Perishes in Squalor With a Fortune.

Mexico City, March 5.—Miss Maria De Jesus Negreta, who died in a cheap lodginghouse apparently in direst poverty in this city a few days ago, left a fortune in money and property valued at more than $1,000,000. Concealed in her clothing and in secret hiding places in the room where she died, have been found $250,000 in gold. A bank book, showing that she had on deposit $30,000 in the Bank of Guatemala at Guatemala City and deeds to much property in Guatemala and Mexico, have also been found.

Complies with the pure food laws of every state

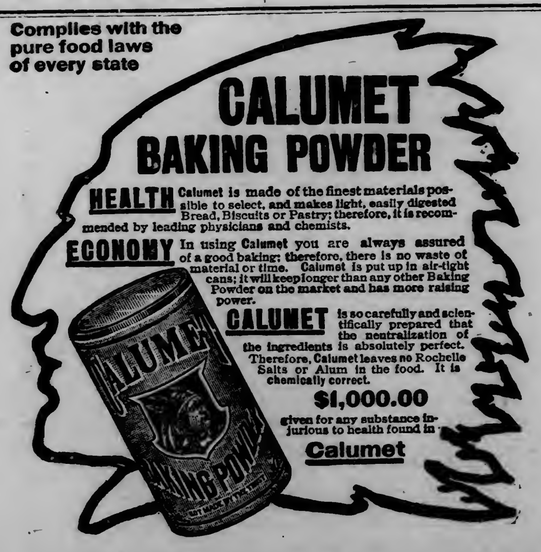
CALUMET BAKING POWDER

HEALTH Calumet is made of the finest materials possible to select, and makes light, easily digested Bread, Biscuits or Pastry; therefore, it is recommended by leading physicians and chemists.

ECONOMY In using Calumet you are always assured of a good baking; therefore, there is no waste of material or time. Calumet is put up in air-tight cans; it will keep longer than any other Baking Powder on the market and has more raising power.

CALUMET is so carefully and scientifically prepared that the neutralization of the ingredients is absolutely perfect. Therefore, Calumet leaves no Rochelle Salts or Alum in the food. It is chemically correct.

$1,000.00 given for any substance injurious to health found in Calumet



Informal Displays Continue!

The fact that you can absolutely depend upon the styles here—together with the assortment that every garment is made by the very highest type of tailors and dressmakers—in the best work shops of New York—are arguments that should appeal to discriminating women—those who are particular and critical about the clothes they wear.

IN THE WINDOWS.

Everything must match this spring. If one chooses a suit of soft tan, or an exquisite faded brown, one must have a waist of deep ecrue of the proper tone to go with it. Then one must get very smart low tan shoes, or if one can afford it, those lovely, dull and soft buckskin kind. One purchases next a bracelet of broad, stiff chased gold set with three gleaming bits of yellow glass, that are a blending of agreeable color. Next, one buys a pair of soft, long gloves, of the proper tone, and a hat with a few buttercups, or brown-eyed and yellow-petalled susans. Nobody with a bit of taste but would also get a bottle of something to bring out the golden lights in one's hair. If one's money has not given out yet, which it probably did with the first purchase, one might get a golden chain, set at intervals with nice, glistening bits of topaz-colored glass.

If one objects to so much yellows and browns, the soft green of Chinese jade is made up in some of the smartest novelties of the spring, and will furnish a pleasing note of contrast.

Butterfly bows, sassy little things, come already made of net, edged with a bit of blue, or green, or brown, or red silk, or some lace, and they are to be worn with the very stylish linen embroidered collars and cuffs. The neckwear is one of the leading features of the new things that one sees through the windows.

MEETING OF CABINET

Leaders of Y. M. C. A. Decide on Plans for the Month.

Set Date for Banquet—Membership Campaign Closes.

The regular monthly meeting of the cabinet of the boys' department was held last evening, at the home of Dr. J. J Eklund, the following members being present William Burris, president; David Duncan, Sargent McGonagle, Philip Heimbach, Max Pulford, Harvard Rockwell, Fred Cole, Lyman Taylor, William Eklund, Laurence Jaques, Arthur Dunning, Walter Newcomb and N. D. McLeod.

Max Pulford, for the social committee, reported that the attendance at the rooms had been 3,702. Ten group suppers had been given, with an attendance of 104; two socials, attendance, 72; and the Washington's birthday program, attendance, 150.

David Duncan, for the Sunday club, reported that four meetings had been held on Sunday afternoons for older boys, and four for the younger boys; one Sunday lunch, at which William Burris gave his report of the state convention.

Lyman Taylor, for the Sunday club Bible study, reported that twenty-nine sessions had been held, with an attendance of 285, showing an increase over the past month; eight Bible study lunches had been given, with an attendance of 136. Special emphasis was laid on the class for high school boys, which meets Friday at 6 o'clock for lunch. The class is over at 7 o'clock. Mr. Taylor urged the members to make this meeting widely known amongst the high school boys. It is open to boys, whether members of the club or not.

Laurence Jaques, for the athletic committee, reported that fifty-one regular sessions of gymnasium classes had been held, with a total attendance of 1,359. One field meet had also been held. He reported that both basket ball leagues had been a success, and that sixteen league games had been played during the month. He reported that his committee had raised their funds to send a delegate to the boys' conference at Lake Geneva, next August.

Arthur Dunning, for the entertainment committee, reported that this committee has been busy all month getting redy for the entertainment to be given tomorrow evening, the funds of which will be used in sending a delegate to Lake Geneva.

The membership committee report by Walter Newcombe shows that the totaol membership to date is 430. The big campaign will close tonight at 930. The cabinet will make a special effort this afternoon and tonight to swell the list.

The special committee on the banquet reported that the annual affair will take place Friday, April 19. The toast list has been prepared, and the speakers have been appointed. Special sub-committees have been appointed to look after the details.

It was decided, last night, that the banquet to the basket ball teams in the high school league shall take place Friday, March 22. This banquet will be given by the losing teams in the league, and the juniors will be the guests of honor. The silk banner, awarded the junior class, will be presented on this occasion. It is made in the colors of the class, and will have the names of the players on it. The banquet will be followed by a social, to be given by the cabinet to the high school boys. It will take place from 8 to 10 o'clock. Inspection of the clubhouse, competitive games and refreshments will take up the time till 9 o'clock, when the boys' department basket ball team will play a picked team from the high school.

The outing committee, by Harvard Rockwell, reported that four outings have been held, with an attendance of sixty-nine. The committee is planning for the summer camp, gypsy trip and several observation parties, including one to Thomson. A shack will be built this summer as soon as a suitable place can be found.

STORY NOT TRUE, SAYS SPOONER

Is Not to Enter the Employ of James J. Hill.

Washington, March 7. — Senator Spooner had the following to say today about a report from Minneapolis that he is to enter the services of J. J. Hill of the Great Northern at a salary of $50,000 a year:

"Mr. Hill offered me the place of general counsel of his roads in 1884. I have not met Mr. Hill since then, nor have I had any communications from him. The story that I will be in his employ is a fabrication pure and simple. I did not announce my retirement from the senate to become the lawyer of any single corporation."

11 East Superior Street.

RAILROADS

TITLE IS A HIGHER ONE

Kennedy Will be Known as Assistant General Manager.

Other Great Northern Officials Are Given Better Positions.

It is now learned that H. A. Kennedy, superintendent of the Great Northern at Spokane, will have even a higher position than the one formerly held by George T. Slade, whom he was appointed to succeed as general superintendent. Mr. Kennedy's title will be that of assistant general manager, and he is to have supervision over the superintendents. Henceforth there will be no assistant general superintendents, there being, instead, several general superintendents.

E. L. Brown, well known in Duluth, and at present assistant general superintendent of the road, with jurisdiction over the entire Eastern branch, will be appointed general superintendent of the Eastern branch. The other two assistant general superintendents of the Great Northern will be given the same title in their respective territories. They are F. S. Forest, general superintendent at Great Falls, with jurisdiction over the central part of the line, and R. W. Bryan, who will have general supervision over the Western branch of the line, succeeding Mr. Kennedy. Mr. Bryan, at present superintendent of transportation, will be succeeded in that position by C. W. Watrous, now chief clerk in the car service department.

Mr. Brown first entered the railroad service in 1875, as a messenger boy for the Rock Island road. From 1877 to 1880 he held various positions as telegraph operator, station agent and train dispatcher, until he became joint agent of the Rock Island and other roads.

In 1890 he went with the old St. Paul & Duluth as general agent at Superior. In 1891 he became commercial agent of the road at Minneapolis. From this position he rose rapidly until he became superintendent of transportation in 1896. He first went with the Great Northern in 1903, as superintendent of the Montana Central railway. He was appointed to his present position in 1903.

It is understood that all the new appointments will take effect April 1.

FALSE REPORTS.

Coal Famine Conditions in Dakotas Not as Bad as Painted.

Stories to the effect that recent coal famine conditions in the Dakotas were not so bad as reported are still coming in.

Charles J. Chapman of 314 East Sixth street, a commercial traveler, informs The Herald that the amount of suffering in the afflicted district was not nearly so great as has been reported.

"I make the entire state of North Dakota," he says, "and have not seen any more hardships this winter than any previous season, only there have been more delays on the railroads than is usually the case. But actual suffering I have not seen. The reports of hardships that have been sent out all tend to retard immigration to the Dakotas."

LINE OF STEAMERS.

New Haven & Hartford Secures Control of Steamship Co.

Boston, March 7.—The New York, New Haven & Hartford railroad has acquired control of the Merchants' & Miners' Transportation company, which operates lines of steamers between Atlantic coast points from Boston to Savannah, Ga., according to a statement made today by Mayor John F. Fitzgerald of Boston. Mayor Fitzgerald said that this information came out at the conference held yesterday between the mayor and Charles S. Mellen, president of the New Haven road, concerning the transaction pending between the New Haven road and Charles W. Morse of New York for the purchase of the sound lines controlled by the railroad.

O. L. Hill Appointed.

O. L. Hill has been appointed Northwestern freight and passenger agent of the Chicago & Alton, with headquarters at Minneapolis. His territory includes Minnesota, North and South Dakota and Manitoba. Mr. Hill used to visit Duluth regularly, and has many friends among the railroad men here.

ACTRESS DISPLAYS A SERPENT AS NECKLACE.

London, March 7.—Society and other women seem to have gone wild over the subject of weird and repulsive pets. The changing chamelon, little whiptail lizzards, veteran land turtles and the beautifully marked king snake are among the most ordinary reptiles that one sees fondled and carried by those who affect the unusual.

One titled lady keeps pythons as plaything and has even allowed her photographs to be exhibited and sold with these serpents as her companions, but it has remained for Miss Hammond, of the Gaiety theater, to use a snake for a necklace.

It is true the reptile which Miss Hammond uses for living jewelry is a harmless cat-snake, but it is no less a startling and repellant sight to see her with this scaly worm tied about her neck. Miss Hammond declares that her pet has quite an affectionate nature, and is not only as wise as a serpent, but it is as harmless as a dove.

The fact is there is a very snaky turn to adornments nowadays. Serpent rings, brooches, bangles and necklaces are the fashion, and West end firms have already received many orders for jewelry of this description. One woman is having made for her waist a belt in the form of a gold rattlesnake, and at a ball given last week one of the guests wore a cornet composed of jeweled snakes.

COURT HEARS DIVORCE CASES

Five Separations Granted and Three Under Advisement.

With about thirty divorce cases on the present term calendar two judges of the district court began this morning to listen to the petitions of misfit couples and tales of domestic woe.

Five decrees were granted for desertion, one including grounds of habitual drunkenness and abuse, and three others in which desertion was the charge, were held under advisement by the court.

Decrees of divorce were granted in the following cases: Anna M. Shireman against Frank P. Shireman; Margaret Gunn against Frank Gunn; Lola Tracy against Melville T. Tracy; Augusta Johnson against William H. Johnson; Permilla Van Alstine against Arthur Van Alstine.

The following cases were heard and taken under advisement: Anna Bloomberg against Emil Bloomberg; Mary Brookbank against Charles E. Brookbank and Bella Wilds against Frank Wilds.

None of the defendants in any of the cases made an appearance.

PRINCE HAS NARROW ESCAPE FROM BOMB.

Warsaw, Russian Poland, March 7.—A bomb was thrown at noon today into a flat occupied by Prince Argutynski, director of the government high school. The premises were wrecked, but the prince was not injured. The thrower of the bomb, a youth, succeeded in making his escape.

TALK RECORD IS BROKEN AND YOUNG WOMAN WINS

Windsor, Ont., March 7.—All long-distance records for talking have been broken by Miss Mary Jawyer of this place.

Miss Jawyer's reputation as a conversationalist was established years ago, but no thought of turning her powers to any other purpose than that of entertaining her friends ever entered her head until just recently, when a score of young men of her acquaintance decided to test her ability.

One recent morning, the party met at Miss Jawyer's home. A physician and a trained nurse attended to care for the visitors. Miss Jawyer's only stimulant was a wad of pepsin gum.

Beginning at 8 a. m., the flow of conversation on the part of Miss Jawyer continued without interruption until 1:30 the next morning. She discussed the weather, crops, the hard winter, lack of coal in the Northwest, Rockefeller's gift to education, the control of railroads, effect of weevil on the wheat crop, foreign immigration, Parisian styles and work on the Panama canal.

Next morning the committee appointed to conduct the test was completely exhausted.

THE RICH MISSIONARY MUST PAY THE CHURCH.

Abilene, Kan., March 7.—How would you like to dig among the sands of Nome amid privation and exposure and get a fortune, then have to give it to the church?

That is the plight of Peter Anderson, a young Swede of this county, who ten years ago went to the Klondike as a missionary and came home a half-millionaire.

Anderson lived on a farm twelve years ago. He went to Chicago, became ill over his studies for mission service and was sent to the hospital. A pretty Swede nurse attended him, and an Alaska girl with Eskimo blood in her veins was also a patient. The latter induced him to go to the Klondike when he recovered.

There, with four others, he labored. They ran out of coal, and seeking for it found gold—lots of it. He resigned from the mission service and became a miner. His first year's returns were $100,000. The next year he did better.

One of his companions became discouraged and sold a claim to Anderson for $48. Out of it was taken $50,000.

Anderson came home worth half a million. He bought several of the best farms in this section, land now worth $60,000. He gave a fine farm to his parents. A cousin who loaned him $50 with which to go to Chicago received a $5,000 stock of goods as a gift. All his brothers and sisters were made well-to-do.

He married the nurse in Chicago and gave to the hospital buildings that cost a lot of money.

Then he went to South America, and when he returned the Swedish Mission society sued him. It claimed that as he had gone to the Klondike as a missionary he must give to it the fortune he found while there. It was arbitrated, then went to the courts, and now a judgment has been rendered in the court of this county and in Illinois for $267,000. The society will try to obtain the land he deeded to his relatives and to his wife in this county.

Anderson has appealed to the United States supreme court to have the judgment reversed.

SALVATION ARMY GIRLS MAY GO INTO SALOONS.

Lexington, Ky., March 7.—The city ordinance prohibiting women other than members of the proprietors' families from enternig Lexington saloons, went into effect on March 1, and Mrs. Jones, a Salvation Army leader, inquired of the mayor if she was included in the prohibition. She said that the women of the Salvation Army secure considerable part of the army's funds by soliciting in the saloons. Mayor Combs told her he did not think the ordinance would be enforced against women who enter saloons on such errands.

The New Things!

Since the return of our Mr. E. A. Silberstein from his spring purchasing trip, the new things have been coming in so rapidly that already we have a large and pleasing assortment of Spring Styles to choose from. Among them may be mentioned

Beautifully Tailored Suits and Wraps.

In the new Spring Novelty Materials, as well as staple blacks, blues and browns. Beginning at **$19.50 and thence up to $75.00.**

Silk Jumper Dresses and Skirts.

Bright, shimmering examples of the artistic taste in colors, trimmings and general effect found only in the productions of the world's finest tailors.

Beginning at **$12.50,** and thence up to **$45.00.**

Voile, Panama and Novelty Skirts.

In plain and novelty effects, never so immense in assortment or so effective in design and trimmings.

Beginning at **$6.00,** and thence up to **$25.00.**

Waists of Net, Silk, Lace and Lawn.

A bewildering assortment at from $1.50 up to $35.00.

IN FACT—
EVERY PRETTY CONCEIT OF THE SEASON IS ALREADY HERE.

Silberstein & Bondy Company

EXHIBITION AND SALE OF OIL PAINTINGS

By G. I. Gulliksen of Christiana, Norway, at Flaaten's auditorium, 212 West First street. Open from 9 a. m. to 8 p. m. Orders received and lessons given in portrait and interior painting.

Barley, Bread and Beer

These three words are derived from the same Anglo Saxon root—*breowan.*

All three are foods. Barley, a grain that makes both bread and beer. Bread, a solid food. Beer, a liquid food.

In making bread, flour and yeast are used; in making beer, barley-malt, hops and yeast are used. The same principle is in each—both are wholesome foods.

In Pabst Blue Ribbon Beer the Pabst Eight-Day Malting Process matures the malt slowly and uniformly, thus transforming every particle of nutriment in the barley into perfect food substances.

To these are added the invigorating properties of the choicest hops, by the Pabst brewing process, which insures absolute purity.

Your system requires a liquid. Why not use one that is both food and drink—

Pabst Blue Ribbon

The Beer of Quality

The special value of Pabst Blue Ribbon at meals is that it encourages the fluids of the stomach to readier action—thus aiding you to get the fullest nourishment from your food.

You can prove the value of Pabst Blue Ribbon as a food, by ordering a case today for home use.

Made by Pabst at Milwaukee.

Pabst Brewing Co.,
Lake Ave. Viaduct & R. R. St., Duluth.

LODGE NOTES

Maccabees Surprised.

Duluth Tent No. 1 K. O. T. M., were pleasantly surprised by their wives and friends, immediately after their meeting last night. Cards were the amusement of the evening, Mrs. A. Gelineau winning head prize and Mrs. M. Putman the consolation. The men's prizes were won by A. Ancill and M. Johnson. A dainty lunch was served by the ladies.

The third game of a series with West Duluth Tent No. 2, will take place at Great Eastern hall, West Duluth, on Monday, March 11. The score at the present time is in favor of No. 2 by two points, but No. 1 hopes to wipe out that margin at the next game and carry off the prize.

At next Wednesday's meeting the final reading of the tent bylaws, as revised, will take place. The committee for the revision of these is composed of Harry Milnes, Charles J. Hector, J. P. Peterson and J. B. Gelineau. A large attendance at that time ex expected.

Clan Stewart Dance.

The regular monthly dance of Clan Stewart last eevning, was attended by more than 150 couples, and was very successful from every standpoint. Charles Cannon and James McGhie sang a duet entitled "He's a Cousin of Mine." The members who had charge of the affair were: James McGhie, chairman, Simon Clark, James Elder, J. R. Rankin, John Smith and Alex Anderson.

FOR STEPHENSON.

Senator La Follette Will Actively Support the Marinette Candidate.

Milwaukee, March 7.—An Evening Wisconsin special from Marinette, Wis., says: Senator La Follette is, and will be, for Isaac Stephenson for senator. This is authoritatively stated, although not announced by Mr. Stephenson himself. It is known here that Senator La Follette will support effectively the candidacy of the Marinette man and will in good time make a definite statement to that effect.

Don't consider lightly the evidence of disease in your system. Don't take desperate chances with ordinary medicine. Use Hollister's Rocky Mountain Tea, the great specific. 35 cents, Tea or Tablets. Ask your druggist.

CANNOT FIND A FOUR-YEAR-OLD MISSING BOY.

Dover, Del., March 7.—After another day's fruitless search for the missing 4-year-old son of Dr. H. M. Marvin, recently of Sioux City, Iowa, who disappeared on Monday last from the Marvin farm at Kitts Hammock, the family and neighbors are as much in the dark as ever. Anxiously looking for some tidings either by wire or letter, Dr. Marvin went to Wilmington today to consult the state officials relative to the mystery.

SCHMITZ APPEARS AND PLEADS NOT GUILTY.

San Francisco, March 7.—Mayor Schmitz appeared before Judge Dunne today and pleaded not guilty to the charge of extortion preferred against him by the grand jury. By agreement next Monday was set for the trial. The court then adjourned until 2 o'clock to await the report of the coroner who has been directed to take Abraham Ruef into custody.

"Get in the Habit"

CONCERNING WOMEN

The annual meeting of the Literature department of the Twentieth Century club was held this morning, after the regular meeting of the Morning Shakespeare class of the club. The department consists of the Shakespeare class, the Morning Browning classes, and the Literature class. Mrs. H. C. Marshall was re-elected chairman of the literature department, and Mrs. L. K. Daugherty was re-elected secretary of the department. The annual meeting of the Shakespeare class was also held, and Mrs. L. H. Corcoran was re-elected leader. The committee who will choose the plays to be read next year will consist of Mrs. Henry Taylor, Miss Shesgren, Miss Wylie, Miss McClaren and Mrs. Mary Nelson.

At the meeting of the class a short talk on "Henry VIII" was given by Mrs. James Dow Morrison, who was leader during the study of this play, and the resume was listened to with much profit and pleasure. An informal program of readings was given by Miss Shesgren, Miss Wylie and Mrs. Nelson.

Y. W. C. A. NOTES.

Mrs. W. H. Cole Hostess at Receptions—Other News.

The board of directors of the Young Women's Christian association has organized for the active campaign in raising funds for the new building. Each member of the board will secure ten women to work with her to this end and the work of interesting women throughout the city in the work will be carried on by these clubs of which the board members are chairmen. Mrs. W. H. Cole, a member of the board, has issued invitations to the women chosen for this work by the members, for a reception at her home, 1131 East First street, Tuesday afternoon of next week. In the evening of the same day the young business women of the association who will work in the campaign, will also be received by Mrs. Cole from 8 to 10 o'clock.

* * *

In a letter received today from Miss Grace Maxwell, formerly of this city, and now educational secretary of the Young Women's Christian association of Los Angeles, the writer told of the successful completion of the campaign of the Los Angeles association for a building fund. The Western association received $150,000, the campaign being finished in February. The movement for new buildings among associations seems almost epidemic throughout the country and each successful project of this sort is a spur to the local work. Miss Maxwell left Duluth in September, 1905, to take up the association work at Los Angeles and her work there has been very successful.

* * *

The secretaries of the Young Women's Christian association, Mrs. Wesley Feetham and Miss Bennett, with the teachers in the English class will entertain at a party tomorrow evening at the association rooms for the young foreign women who are studying in these classes. The importance of this work is realized by few that are not in active contact with the classes. Fifty young foreign women are enrolled in the classes for the study of English with four teachers, Misses Ella Wilson, Addie Maltby, Katherine Joyce and Frances Pollard. This work of the association offers the only opportunity to the large numbers of foreign young women who arrive in the city each year, to learn the language of their adopted country. The interest in their lessons is great and the informal social evenings planned in their honor are much enjoyed.

In the Windows.

It would seem that the last word has been said, or at least the last feather adjusted, for bizarre effects in hats. It is all very well to stand on the outside of the windows and think the above opinion out loud if one wishes, but the matter is entirely different when you are seated before a pier glass and the milliner, who is an artist in making, and especially in selling hats, takes what was your special abomination out of the window and places it on your head to the accompaniment of a sigh of pleasure at its telling effect in that advantageous position. One gasps with horror at the effect. The hat, whose brim is just as wide as the crown is high, cuddles down back of one's ears. It is adorned with grasses and a variegated selection of flowers. It becomes one not at all, and it appears utterly illogical. One could never imagine such a thing really belonging to one. All this goes through the purchaser's mind in the first five seconds that the hat rests on the head, but before one declares one's self irrevocably, the milliner says, with a little gasp of pleasure, "Isn't it charming? Such a stylish little hat!" The deed is done. The deadly power of suggestion has done its work. One looks at it from the side, and rather likes it. One looks at it in the back and thinks that the way those loops of ribbon droop down isn't very bad. One looks at the other side and is quite taken with it, and one looks at the front and asks, in a wee, small voice, "How much is it?"

Such is the procedure after one has entered the web of the milliner's guile and closed the street door of departure firmly behind one. When, however, one stands on the outside of the window one can contemptuously inquire of one's self, "Did you ever see anything worse than that combination of pink rosebuds and violets and lilies of the valley and blades of grass? Or that brown thing with the two wings close on each side, and two pins, like two eyes staring out. Ooh! It makes me shiver, it looks so much like an animal. I dont' like the hats a bit, not a single bit," but the milliner, safe in the security of knowing humanity's needs, makes another hat after the ideas of an unpleasant dream she had the night before, and waits for the inevitable call of spring to bring the victim to her chair.

Farewell Reception.

A large reception was held last evening at the rooms of the Young Men's Christian association, on East Superior street, at which Mr. and Mrs. Frank Maxwell were the guests of honor. Mr. Maxwell has been physical director of the association for several years, and he will leave soon with his family to make his home at Alberta, Can. During the evening an informal musical program was given by Miss Edna Harris, pianist, and L. T. Copeland, violinist. A large number of the association members and their wives called during the evening. Short addresses of farewell were spoken by Phil Bevis, secretary of the association, and Albert Ames, who spoke in behalf of the members of the gymnastic classes.

Musical Lecture.

Tomorrow evening, at the Unitarian church, Mrs. Stella Prince Stocker will give a lecture recital on the entire Nibelungen Ring. Before proceeding with the last opera, "Gotterdammerung," she will give a musical outline of the history of the Ring.

The lecture recital will be illustrated by the following stereopticon views from Wagner's operas: "Wotan Denounces Bruennhilde;" "Wotan's Farewell to Bruennhilde;" "Siegfried Prepares for the Dragon;" "Siegfried Kills the Dragon;" "Mimi Comes with the Poisoned Broth;" "Theresa Malten (of Dresden) as Bruennhilde;" "Cudehus (of Dresden) as Siegfried;" "Gutrune Gives Siegfried the Magic Draught."

Eight views from "Parsifal" will follow and then one from "Lohengrin;" one from "Tannhaeser" and Max Alveary as Tristan. The collection closes with a portrait of Wagner.

Club Musicale.

The Young Ladies' club of the First Methodist church will entertain at a musicale tomorrow evening at the parlors of the church. The meeting is on postponed from Tuesday evening of this week, and the women friends of the members are invited to be present. Those taking part will be Miss Mary Syer Bradshaw, Miss Marie Agatin, Miss Ella Mason and Miss Velna Yeaw, and Messrs. Louis Dworschak and Oliver Colbentson.

Lecture by Rev. Rice.

The next entertainment in the series given during the winter at Lester Park Methodist church will be given tomorrow evening at the church. The lecturer will be Rev. M. S. Rice, and his subject will be "Just for Fun."

Personal Mention.

Mr. and Mrs. M. M. Gasser have returned from a month's Southern and Western trip.

* * *

Mrs. Luther Harris has returned from a visit at New Orleans.

* * *

Mr. and Mrs. R. C. Little have gone to West Baden for a few weeks' visit.

* * *

A. M. Marshall has gone to California to join Mrs. Marshall and the children. They will visit the Hawaiian Islands before their return.

* * *

Mrs. How of Sauk Center, Minn., is the guest of her son, B. F. How, at the Spalding.

* * *

Mr. and Mrs. W. E. Richardson of 227 West Third street, have returned from their Mexican and Southern trip. The Misses Richardson will return tomorrow.

Church Social.

An old-fashioned Methodist social was enjoyed last evening by the congregation of the Lester Park Methodist church at the home of Mr. and Mrs. Arthur Barnes of Fifty-eighth avenue east. Sixty guests were present.

What Retail Markets Offer.

Rhubarb, 15 cents a lb.
Parsley, 5 cents a bunch.
Squash, 5 cents a lb.
Fresh eggs, 20 cents a dozen.
Butterine, 20 cents a lb.
Squirrels.
Fresh salmon and halibut.

The rhubarb in the market is especially nice looking. It is crisp and fresh and red and tender loking and is just about half as expensive as it was when it first made its appearance. Made into a sauce and served with little individual corn starch pudding, rhubarb is a lovely spring desert.

Eggs have gone down in price 11 cents in one week. You can now purchase perfectly fresh eggs for 20 cents a dozen, which is quite different from 31 cents for twelve. Butterine is adadvertised for sale in a number of markets along the street. In order to sell this apology for hand churned cream, the market man must have a government license which costs him $5 a year. He must also place large and glaring signs "Butterine sold here" about the walls and submit to a lot of curious questioning from people who have nothing else to do.

The fresh Western fish are very good.

SPORTS OF THE DAY

NORTHERNS LOSE LAST

Duluthians Defeated 4 to 3 in Best Game of Series.

Skated Rings Around Houghton Bunch in Second Half.

Houghton, Mich., March 7.—Houghton took the last of the series between the Houghton Amateurs and the Northern Hardware hockey team of Duluth, here last evening by the score of 4 to 3.

The game was faster in some respects than the game Tuesday evening, as the visitors displayed better team work, and the work of both aggregations was faster and surer throughout the game.

Deetz, Duluth's captain, was struck in the head with a puck in the middle of the second half and was out for a minute or two, but went back in the game and scored the third and final score for his team. In spite of the fact that Cummings, who was injured in Tuesday's game, was out of the contest, the Duluthians played all around the Copper country representatives in the second half, and while Deetz registered once for Duluth, not a single shot got past Tenton at goal for the visitors. The score at the end of the first half was 4 to 2 in favor of the home team, the third score for Houghton having come on a fluke, and had the Duluthians played the game during the initial half of the contest which they did during the second division, the third game would have gone to them as well as the first two.

Deetz, Winters and Cargill did the best work for the Zenith City men, while Emmens, Krellwitz and Sicotte starred for Houghton.

POGGENBURG IS DEFEATED

Clever Billiard Exhibition by Calvin De Marest of Chicago.

New York, March 7.—Calvin De Marest of the Chicago Athletic association, the young aspirant for national amateur billiard championship honors, won a great game last night from J. Ferdinanad Poggenburg, a former national champion, in the tournament at the Liederkranz club. De Marest ran up 300 in sixteen innings, his average of 18 12-16 equalling the national amateur record held by W. P. Foss of Haverstraw, N. Y.

Poggenburg got only 139 points, while the young man was gathering in the necessary 300 with the fastest billiards seen thus far in the tournament. The game lasted one hour and twenty-eight minutes.

De Marest passed the 200-mark in the fifteenth inning, when he ran 66 points, after some of the most difficult shots possible. A simple draw near the top rail, however, proved his undoing. Poggenburg made only four in his half. The Chicago man electrified the onlookers with his fine work in the sixteenth inning, in which he scored out the game with an unfinished run of fifty-seven.

Chicago's other representative in the tournament, Charles F. Conklin, won the afternoon game from T. M. S. Rolls of Philadelphia by the score of 300 to 196. This afternoon Dr. L. L. Mial will play Conklin, and in the evening Gardner will meet Rolls.

HAVE BIG SQUAD.

Aristocrats Have Nineteen Men Signed for Next Season.

Houghton, Mich., March 2.—(Special to The Herald.)—The management of the Calumet Aristocrats of the Northern-Copper Country Baseball team has signed nineteen men to work out in the spring practice for the beginning of the baseball season, which will open shortly before the middle of May. Among other men secured are Newcombe and Kurke, the crack battery of last year's Lake Linden team, and the Aristocrats also have options on any of the men held on the Lake Linden reserve list.

Jesse Becker of last year's Lake Linden team has gone to Atlanta, Ga., where he will play during the coming summer.

WESTERN BOWLERS

Have Begun Their Second Annual Meet in Denver.

Denver, Colo, March 7.—Eighty-five teams have entered for competition in the second annual meet of the Western Bowling congress which opens at the colliseum hall at 8 o'clck tonight. The congress will continue until Wednesday night of next week. Teams from Portland, Seattle, Butte, Salt Lake, Ogden, Kansas City, Omaha, Peoria and Chicago, besides nearly every town in Colorado, are entered. Five thousand dollars in prizes have been offered. The bowlers from the Northwest arrived here in a special train this morning. Mayor Speer will officially welcome the visitors tonight and start the tournament by taking the first shot at the pins. The contest will be on each day at 2 o'clock in the afternoon until 10 at night. Already there is an active pursuit of the honor of holding the next tournament, Kansas City and Butte being prominent in the bidding.

Herald want advertising abolishes "property-poverty." Those who make timely use of the want ads. may make their properties yield incomes for them.

A CORNER IN SPORTS

The vaunted superiority of the Copper country in the hockey world is not apparent from this distance.

A Duluth team has invaded the Copper country and has defeated the champion amateur team of the upper peninsula. Duluth won the one game played in this city, and got an even break on the two games in Houghton, thus winning two of the three games.

When the Northerns defeated Houghton here, surprise was expressed that they could whip a Copper country aggregation, but the victory was set down to the small rink which was thought to have handicapped the Houghton boys. When news came of the victory at Houghton Tuesday, hockey fans pricked up their ears, and the performance of the Northerns in Houghton this week has done more to boost hockey than anything that could have happened.

The Copper country realizes that Duluth can turn out a team, and Duluthians realize this fact also.

Duluthians have this year given an enthusiastic support to the game such as they never did before. Add to these the fact that the Copper country is anxious to get a hockey team established here, stir well together, bring to a boiling point, season with a few moneyed sports who will back the project, and, presto! you have a hockey rink at the Head of the Lakes that will make the Amphidrome and the Palestra take seats in the back row.

• • •

It is hereby announced that no more accounts of the engagements of Battling Nelson to actresses will be published in The Herald until Bat produces the license. Billy Nolan isn't going to get in his work any longer.

• • •

The value of competition is well shown by the Duluth Yacht and Boat clubs. The two organizations are striving to see which can offer the greatest number of inducements to the young men of the city, and the result is that Duluth is able to offer more attractions in the line of summer sports than any city in the Northwest. The rivalry is of a friendly nature, and it is proving a very healthy stimulus to both clubs.

A NEW GAME ON ROLLERS

Superior Teams Give Exhibition of Roller Polo at Temple.

Roller polo was officially introduced to Duluthians last evening at the Temple rink by the Nemadji and Superior teams, both aggregations from across the bay journeying over here to show the Zenith City sports how they play the game in Wisconsin.

To tell the truth, Duluth was not overcome with delight at the Superiorites' style of play, but the possibilities of the game are many and were appreciated. The game is much like ricochet, except that hockey sticks are used instead of rackets, and a tennis ball is used as a puck.

Only one score was recorded during last night's contest, Schweitzer of the Nemadjis shooting the ball past Witcani in the last minute of play. There was some pretty individual work in the game, but the team work was poor.

Both teams need considerable practice in goal-shooting and a greater familiarity with their team-mates would make good fast aggregations of both the Nemadjis and the Superiors.

The teams lined up as follows:

Nemadjis.	Position.	Superiors.
Hagen	center	Miller
Baken	point	Clark
Schweitzer	rover	Hanson
McDonough	cover point	Stockey
Finnegan	guard	Witcani

FURTHER SUITS MAY BE BROUGHT

Against Christian Science Officials by Mrs. Eddy's Relatives.

Boston, March 7.—Former United States Senator W. E. Chandler, special attorney for George Washington Glover, of Lead, S. D., and for relatives of Mrs. Mary Baker G. Eddy, who have brought suit against Christian Science officials in three states, announced last night that a second suit may be instituted in either the state or federal court in Massachusetts.

Mr. Chandler has been in consultation here for two days with counsel for the plaintiff. In addition to the former senator, there were present John W. Kelly of Portsmouth, N. H., Nathaniel E. Martin of Concord, N. H., and F. W. Peabody of this city. The following statement was issued by Mr. Chandler:

"It has been decided to serve immediately the processes on the four New Hampshire defendants, Calvin A. Frye, Irving C. Tomlinson, Herman C. Hering and Lewis C. Strang, and to give notice to the Massachusetts defendants so that they may be present and join in the New Hampshire suits if they choose. If they do not join, possibly a second suit will be instituted in Massachusetts in the state or federal court.

"It was decided to begin immediately the taking of testimony in the various places, in both states, and get ready for trial as soon as possible."

MAYNARD IS 'YOUNG HACK'

Unknown Who Has Sprung Into Limelight in Wrestling World.

Maynard Wants Match With Gustafson of Des Moines.

That "Billy" Maynard and George (Young) Hackenschmidt, the wrestler who has been attracting so much attention from sporting papers all over the country for the past few weeks, are one and the same, was learned yesterday.

"Young Hack" has been touring the country for the past month, and perusers of the sporting columns have noticed frequently the brief notices of his victories. That Hack was the well known Billy Maynard never occurred to folks in this neck of the woods, however, and if the gentleman himself had not chosen to let it out yesterday "Young Hack" might have gone to his grave unwept, unhonored, and unsung, so far as Duluth is concerned.

In spite of a couple of rather questionable matches Duluth sports recognize the ability of Maynard as a wrestler.

Wrestling as Young Hackenschmidt, he has met some of the best men in the country, among them being Gotch. He also met Prof. Dwyer, the pride of Denver, and lost to him in his home town.

As to the match with Beell, which is of course, largely speculation at present, the little Wisconsin man could not afford to throw a match when in his present position and there would be but little chance for a rake off in the betting line at least, on a match of this kind.

If Maynard would go in for such a match on the square, and would really work to win, as he says he is prepared to do, it would be a match worth going many miles to see.

Maynard is now looking for a match with Charles Gustafson of Des Moines, Iowa, the big fellow who has been cutting such a wide swath in his home town, and a match between Billy and the Cornhusker may not be far distant.

NEW BOATING COSTUMES.

Duluth Boat Club Adopts Handsome Design for Its Crews.

The Duluth Boat club has adopted a new rowing and bathing costume. The new sleveless jersey's will be white and will bear in the center the letter "D" in white in a blue circle. In addition to this those men who have made the crews will be permitted as an especial badge of honor, to wear a broad blue stripe around the middle of the shirt.

The new costumes are on exhibition in a window of a downtown store, and are attracting a great deal of interest and admiration.

Constant Clinching.

Philadelphia, March 7.—Joe Thomas of California had a slight advantage over William Mellody of Charlestown, Mass., in their six-round fight before the National Athletic club last night. Thomas dropped Mellody in the opening round with a left to the chin, but the latter was quickly on his feet and rushed to a clinch. The fight was unsatisfactory because of the almost continuous clinching of both fighters.

SHERIFF CANNOT FIND ABE RUEF

Court Dissatified and Appoints Coroner to Bring in Man.

San Francisco, March 7.—Attorney Abraham Ruef, jointly indicted with Mayor Schmitz on five charges of extortion, is still a fugitive from justice, according to Superior Judge Dunne, who late yesterday afternoon decided that Sheriff O'Neil had not shown due diligence in producing him for trial, and appointed Coroner Walsh as elisor to serve a bench warrant on Ruef. The coroner was ordered to make a return this afternoon. This was the net result of a day devoted to a fruitless search for Ruef, although none of those interested deny that he is in the city.

When court convened yesterday morning, Sheriff O'Neil reported that his search for the attorney had been unsuccessful. Others supposed to know the attorney's whereabouts were examined, but no information of value was obtained.

Then, after two adjournments, Assistant District Attorney Heney presented to Judge Dunne a lengthy affidavit, signed by himself, in which he recited alleged facts that Sheriff O'Neil is a close personal friend of Ruef; that the latter, "recognized as the political boss of San Francisco," had procured O'Neill's nomination, and assured his election, and that consequently the latter was under obligations to Ruef, unfitting him to serve as the arresting officer. Similar assertions were made regarding the sheriff's deputies, who, it was alleged, had been named by Ruef.

The assistant district attorney also stated that he had been informed that one of Ruef's attorneys had applied to the district court of appeals for a writ of prohibition, declaring that if it was granted the missing attorney would be produced For these and other similar reasons, Heney asked that Sheriff O'Neill be replaced by Coroner Walsh and Judge Dunne so ordered.

RAISE PRICE OF HAIRCUT

Charge of 35 Cents Will be Asked After April 1.

Proprietors and Employes Come to Agreement On Increase.

An agreement has been reached by the master barbers' association and the barbers' union of this city, that after April 1 the sum of 10 cents will be tacked on to the present price of a haircut. This new rate will apply to practically all the shops of the city although it may not reach West Duluth unless the barbers out there decide to adopt it, as a separate union exists there.

An increase in the price of a haircut has been considered for some time by the barbers of Duluth and there have been several discussions at the meetings of the union and the association but until last week no action was taken. The price of 35 cents for a haircut has been general in the majority of the cities in the West for several years.

Last week a joint meeting of the journeymen barbers and the master barbers was held and it was decided at that time to send out a committee to the different barbers who were not in attendance to see if the majority were in favor of raising the price. Although a few were found to be in opposition to the increase, the majority favored it.

Another meeting was held on Monday evening and the first of the month was set as the time for the increase to go into effect. There will be no change in the prices charged for a shave or shampoo and other services of the barber, and only the haircut is included in the raise.

Practically all the master barbers in the city have agreed to the raise and it is thought that all of them will charge the 35 cents price after April 1, but if any should refuse to do so, the barbers' union will call out their men from these shops and in this way compel the rebellious barbers to abide by the agreement.

What effect the raise of 10 cents will have upon the average Duluthian can hardly be surmised, but it is not expected that many will commence wearing their hair according to the fashion set by the would-be poets and musicians on this account.

HEARING ON IRON TAXES

(Continued from page 1.)

might involve the constitutionality of the tax, as it would be putting a higher rate of taxation on one kind of personal property than on another.

He said that he had given some thought to taxation, and had been called upon to do so officially. The primary aim of taxation is to secure justice to all interests, and to shape tax legislation so as to best conserve the interests of society. A tax law that may seem theoretically just may be prejudicial to development. He had no prejudice for or against the mining interests, though he had an interest in a mine that is producing a small amount of royalties each year. Iron ore in the ground is real estate, and is taxed as such today. Property is the product of the soil fructified by labor. Wheat is the same as ore, on this basis. If a farmer has wheat on hand on May 1, it is taxed as personal property, and iron ore in stockpile on that day is also taxable as personal property.

The solution of the problem is simple. The legislature should extend the same rules of taxation to the iron industry that has made the state great. The tax ought not to exceed 2½ cents a ton to start with, which would yield the state $750,000 to $1,000,000 a year. this revenue about 5 to 15 mills should be apportioned to the permanent school fund. About 2 mills should go to chemical and metallurgical work in the state university, and part should go to the road fund.

Part should go to the state revenue fund, but it is unwise to make that fund too large. A surplus is a menace, a standing temptation to bad administrations, to bad appropriations, and to graft in its various forms.

The rate of 2½ cents per ton is high enough. It is not the duty of the legislature, in framing tax laws, to pursue any industry or to be vindictive. Iron ore after it is mined should be treated the same as personal property, and to it should be applied about the same rate of taxation as to other personal property.

C. E. Dowling of Eveleth, a former member of the house, made a pointed talk against the tonnage tax. In opening, he said that the range citizens had assumed that it was proposed to levy a tonnage tax in lieu of all other taxes, and that that accounted for the demonstrations that had been made. Now he realized that that was not intended, and the range people were glad to find it out. It might be thought that after this discovery the range people had no further interest in the matter, but that is not true. The tonnage tax proposal sets aside certain counties and levies a special tax against them. This would divorce the state from any interest in the valuation of the iron mines, upon which local taxes would be raised. That would leave the fixing of this valuation to local authorities, who might let the valuation slip back to what it used to be before the state authorities had it raised.

The only solution for the iron tax problem, he said, was to leave the present valuation tax in effect, and to raise the valuation, if it is not high enough and the state is not getting enough revenue out of the mines. Nobody in St. Louis county would object to such a move, as all would share in the benefits. Another objection to the tonnage tax is that the ore is of varying grades and varying values, and a tax rate that might be fair as to some ores would be prohibitory as to others.

Mr. Dowling went into the scant consideration St. Louis county has had from the state, and showed that it had had no aid in road building to amount to anything, absolutely no aid in drainage, and that the state had tied up large areas of state lands that ought to be in the hands of settlers. If the state would do justice to the county, it will let it share in whatever increase is made in the mining taxes.

As to the steel plant at Duluth, he said that that proposition did not arise out of the tax agitation, but that it was the result of years of work for it and of the ripening of market conditions that have made it feasible.

W. J. Stock of Bovey, also a former member of the legislature, said that Itasca county wanted to be heard, and C. L. Newberry, superintendent of schools at Ely, said that the range delegations could hardly get down before Monday or Tuesday.

Representatives Wells and Zelch of the committee said that the trouble with postponing the hearings was that the house tax committee was pushing this committee, and threatening to pass out a bill without waiting for its report.

Clarence B. Miller of Duluth said that this is the most important matter before the legislature, and that it should not be hurried, because action should be based on the fullest possible information.

It was finally decided to have the final hearing Wednesday, as stated.

• • •

The senate committee on municipal legislation had a public hearing yesterday afternoon on the Fosseen-McGowan bill, making the so-called Mueller law of Illinois the law of this state. It provides that cities, after accepting the law, may by vote of the people, establish municipal utility plants, and issue bonds therefor which will be a lien upon the plants only, and not upon the city.

City Attorney Bert Fesler of Duluth made the principal talk in favor of the bill, and other speakers were ex-Mayor J. C. Haynes, ex-Governor John Lind, Alderman Platt B. Walker, H. Castner and M. F. McCahill, ex-Senator S. A. Stockwell and E. C. Best, former president of the Minneapolis Commercial club, all of Minneapolis. The committee decided to have an adjourned hearing on the bill Friday afternoon. In the house the bill has been recommended out from the committee and is on general orders.

• • •

The senate temperance committee yesterday afternoon voted to recommend for indefinite postponement the Thorpe bill providing for county option, with only one vote in favor of the bill. Senator Thorpe was in Duluth yesterday, and as soon as he returns the committee will report. He is expected to make a fight to overturn the report and place the bill on general orders for consideration.

In the meantime the house temperance committee is giving public hearings on the bill, and will have a final hearing tomorrow afternoon.

• • •

The senate railroad committee had a hearing on the reciprocal demurrage bill last evening when W. A. Nolan, author of the bill, explained it, and railroad representatives gave their arguments against it.

The house committee on training schools will recommend for passage the Spooner bill providing for a new training school for girls at some other place than Red Wing, where the present school houses both boys and girls. There will be a minority report in favor of the Putnam bill providing for a new building at Red Wing, removed from the boys' building, and both will probably be considered by the house. The several bills locating the girls' school at various places will all be killed.

• • •

The senate committee on public health and pure food had a public hearing yesterday afternoon on the Calhoun bill making the federal pure food law the law of this state and repealing the Minnesota laws on that subject. Duluth wholesale grocery houses are in favor of the bill, as well as the candy manufacturers, and George D. Lucore and J. J. Wahl, Duluth candy makers, are here in its interests. The argument of those who favor the bill is that they want a single standard, so that they may not be compelled to get out several different varieties of each product.

The only hitch in the hearing yesterday appeared to be on the question of coal tar products. Dairy and Food Commissioner Slater wants to prohibit their use, and there were representatives of various interests at the hearing who protested that they are perfectly harmless, and that as a matter of fact they are safer than vegetable dyes. The Minnesota law now prohibits their use in candies, and the dairy and food department wants a law prohibiting their use in any food products. They are now used as coloring matter for butter in many cases. The argument as to whether coal tar products are wholesome for food purposes waxed fast and furious, but no action was taken by the committee.

• • •

The joint committee appointed to discuss a reapportionment of the judicial districts has decided not to attempt such a reapportionment, but to consider the various propositions now pending for changes in the present district. The senate judiciary committee has recommended the Sullivan bill taking Chisago, Pine, Kanabec and Washington counties out of the First judicial district and making a new district out of them, and the special committee has also approved this plan.

• • •

A number of Duluth people will be interested in the passage of the bill appropriating $60,000 to pay for animals condemned and killed by the state live-stock sanitary board. For eighteen months the board has been without funds, but it has killed cattle afflicted with tuberculosis and horses suffering from glanders, and the appropriation is to pay these claims. About $5,000 is due to St. Louis county owners for stock killed by the board in the past eighteen months.

• • •

W. A. Gulick, clerk of the house engrossing committee, is interested in the announcement that a new steel plant is likely to be located in Duluth, because when the first blast furnace was built in Duluth along in the early '70s, just in time to be crushed by the panic of 1873, he was a law student in the office of Stearns & Ensign, and his first legal work was to draw up papers in lien cases brought against the plant by workmen.

• • •

The senate committee on public health and pure food, to which was referred the Sundberg anti-cigarette bill, has again recommended it for passage. It is on general orders in the senate for early consideration. The house has substituted a harmless measure, but if the senate adopts the Sundberg bill it is likely to take similar action.

• • •

Representative Frank T. White, chairman of the house reapportionment committee, has a proposal that he believes will enable the senate to give way and afford some relief to Northern Minnesota. His plan is to increase the house membership by twelve, making the lower body consist of 131 instead of 119 members, and leave the senators as they are. The dozen new members would be distributed where they are most needed in Northern Minnesota. The senate would probably have no objection to this plan, but it involves abandoning all hope of a general reapportionment.

The house committee on express, telegraph and electric lines yesterday afternoon agreed to report out for passage the bill placing street railways under the control of the railroad and warehouse commission. To meet the objections of the cities, including Duluth, an amendment was offered providing that the bill shall not operate to take away any of the rights and powers now enjoyed by the municipalities.

• • •

The house put in a busy session on the calendar last night, and passed eighteen bills and killed one.

The one that was killed was by Representative Morse, and it provided that the several counties of the state should be empowered to appropriate money for suitable exhibits of their local industries at the "exposition to be held upon the state fair grounds next year in commemoration of the fiftieth aniversary of the admission of the state of Minnesota into the Union." The bill was voted down, 51 for, when it needed 60, and 39 against. Representative Libby gave notice that he would move to reconsider the vote by which the bill was lost.

As indicative of the temper of the house on the subject, this action is not encouraging to those who want to see the exposition held next year.

• • •

Among the bills passed by the house were the following:

By Representative Tighe—Three bills providing that in proceedings relating to contempts of the legislature, and in bribery proceedings of all kinds, nobody shall be excused from testifying, but providing also that their testimony shall not be used against them in criminal cases.

By Representative Webb—Authorizing counties having not less than 40 per cent of wild lands to appropriate not to exceed $500 for exhibits at the state fair.

By Representative Libby—Prohibiting the improper stamping of any merchandise made in gold or silver; designed to stop selling cheap jewelry stamped "sterling silver" or "14-carat" gold.

By Representative Lobeck—Making it a felony to invite, direct or accompany a boy under 15 to a house of evil repute, punishable by imprisonment for six months to five years; making it a felony to admit him into such a place, punishable by imprisonment for eighteen months to seven years; and making it a misdemeanor for a dissolute woman to receive him.

By Representative J. A. Gates—Prohibiting fraud and deception in the manufacture of ice cream.

By Representative Saugstad—Providing that where legislative candidates are running in more than one county, their filing fee shall be $10, the same as those running in only one county, instead of $20, the present fee; and providing that county commissioners whose pay is less than $300 shall pay only $5.

By Representative Vollmer—Punishing the illegal use of the term "weighmaster" in issuing receipts or certificates for grain, hay and straw weighed.

By Representative Vollmer—Authorizing the railroad and warehouse commission to fix the time when local warehousemen shall keep open for business.

By Representative Zelch—Allowing the railroad and warehouse commission to fix the fees for appeals from the grading of grain.

By Representative Rines—Providing that road and bridge appropriations made in 1901, 1902 and 1903, and not yet expended, shall be good until 1909.

By Representative O. B. Nelson—Requiring railroad companies to build underground passageways for stock when their lines cross a farm, in order that the farmer may be able to get his cattle from one part of his farm to the other without exposing them to the risk of being run over. The farmer is to pay 25 per cent and the railroad 75 per cent of the cost.

By Representative Dalzell—Prohibiting the diversion of life insurance funds for political purposes.

By Representative W. I. Nolan—Prohibiting discrimination by life insurance companies.

By Representative Saari—Prohibiting the issuance of non-participating policies by domestic life insurance companies.

By Representative Brady—Providing that life insurance companies shall not spend over $100 without proper vouchers, and that if the money is spent in legislative expenses, the vouchers shall show the company's interest in the legislation on which the money was used.

Another splendid bargain opportunity presented Friday—

Housekeepers' Day

Read over this listing of tomorrow's "Specials." These are all practical helps to the complete supplying of housekeepers' needs at prices that make for economy and thrift. Keep in touch with "Bargain Friday" for housekeeping savings.

Towel Rings!
Two wood rings on small piece, to fasten on wall—a bathroom or kitchen necessity—special—
Worth 10c to any household.
5c

Cake Mixer
The "Universal" cake maker—a delight to her who bakes cakes—the finest made—regularly $2—special—
$1.69

Hayne's "Gainsborough"
Green and Yellow Decorated Ware.
Beautiful shading and blending of colors, is the attractiveness of this imported English ware. There are cracker jars vases, tobacco jars, ferneries, sugar and creams, lemonade pitchers, steins, etc., etc.—Tomorrow the entire line—
½ Price

Dinner Set
Homer Laughlin's fine porcelain "Angelus" pattern, dainty poppy decoration, regular price $14.25, complete, 100-piece set for
$9.98

"Clearlight" 69c
A complete gas light and a good one. Genuine Wellsbach mantle and burner, Lindsay opal globe; others ask 85c; our price Friday, complete
69c

Glass Rolling Pin.
The finest sort, hollow glass pin—can use cracked ice in it—regularly 48c, special.....33c

Colonial Glass.
Tumblers—bell shaped, Colonial tumblers, regularly $1 dozen, special
79c
Sherbets—footed style, regularly $1.10 dozen—special
85c
Water Bottle—good size, low shape — worth 25c—special.....15c

Bath Room Sets.
Nickeled soap dish, tooth brush holder, tumbler holder and towel bar, 4 pieces mounted on sheet of enameled metal, ready to fasten to bath room wall— special at.....75c

$1.85 Boilers $1.00.
Fine copper rim Boilers, all a bit bumped or dented, but we don't believe "a-one of 'em" leaks. The $1.85 kind tomorrow, if you want 'em.....$1.00

Kitchen Set.
Spoon, fork and cake turner, regularly 25c, special—
15c

Egg Poacher.
The "Buffalo" steam egg poacher is the highest perfection for poaching eggs. Poach 5 eggs at a time, by steam, each in an individual cup Don't fail to see them. Then you'll have one. Regular 48c, special.....35c

"3-in-1" Grater.
A round grater—coarse, medium and fine screen, all on one grater—a splendid value at regular price 10c—special—
7c

Bohemian Vases.
Choice of a lot of fine imported Bohemian vases, in beautiful colorings—assorted shapes. Regular price—very low—is 39c, special.....25c

New Bargains
Are prepared for every Friday—at positively saving prices.

It is important when desiring the address of your paper changed to give both old and new addresses.

READY FOR STEEL EXPERTS.

The second great step toward the establishment in Duluth of the long and ardently desired steel plant by the United States Steel corporation—and probably the decisive one—will be taken today when the committee of carefully selected experts of that vast organization begin to initiate a thorough investigation of the field, to inquire about the tributary territory, to examine into all of the facilities and to determine whether this city will give assurances that such an enterprise, involving an outlay of millions, will be "reasonably profitable."

These visiting experts are all men of the highest standing in their profession, distinguished in the world of iron and steel, and of the keenest discernment. They know every jot and tittle of the requirements necessary to the establishment of a sucessful steel plant. They will undoubtedly ask many pointed questions during their stay here and they will be ready and willing listeners of all that the people of Duluth may have to offer to them. To them, facts count above all else and facts carefully and logically presented will win their fateful approval.

The people of Duluth welcome these gentlemen with calmest confidence that they shall be able to present to them such an array of convincing facts as will compel a highly favorable report from them. For over twenty years, this city has dreamed of, hoped for and striven in all ways possible to secure a plant that will turn a portion of the iron ore, that has been passing through in a vast stream, into finished products at home. Now that realization is at hand, they will not be found wanting in their efforts to make present assurance doubly sure and win the hearty, unanimous approval of the experts.

The Commercial club has made all possible arrangements to give the visitors every facility for learning easily and completely all that they desire to know. In this the organization has been assisted freely and fully by all of the varied interests concerned in any way in the vast new enterprise. The club committee members are prepared with trade, territorial, railroad rate and other statistics. If anything essential has been overlooked, they do not know it, but they stand ready to repair any possible omissions at an hour's notice. Further, they have arranged to extend all possible courtesies to the gentlemen.

The Real Estate exchange has also not been idle, but is prepared to give all desired information as to available sites and their values with facts and figures concerning lots for homes for the employes of the projected plant—a matter in which the Steel corporation always takes a paternal interest.

Quite unexpected but nonetheless welcome, a committee of the state legislature headed by the speaker of the house will meet the experts and will give what information may be desired as to legislation while, at the same time, seeking to learn what the visitors have to impart.

The experts may rest assured that every person, not only in Duluth but throughout the iron region, will do everything possible to facilitate their quest. They may also know that tens of thousands of people will await their decision with calm confidence but nevertheless eager anticipation.

GOVERNOR HUGHES' MAXIM.

"I shall count nothing a failure but a failure to do what is right."

With such a guiding principle as this enunciated slowly and with the utmost distinctness in a recent public address, Governor Charles E. Hughes, New York's new chief magistrate, cannot go very far wrong and, if he shall be found making mistakes, they will be errors of the heart or of political inexperience rather than of the head or will.

Is it any wonder that the new chief magistrate of the Empire state has put to rout all of the calculations of the politicians, has dumfounded his foes and has caused his friends to marvel? Is it at all surprising that already he is being called an even "harder nut to crack" than was Theodore Roosevelt when governor? Is it a matter for marvelling at that he is being compared by Democrats and Independents with Samuel J. Tilden, universally conceded to have been the greatest executive in New York's history?

It may be that the political leaders are aiming to try to get Mr. Hughes to dig his own grave by giving ready assent to the "governor's public service commission bill" that provides for the abolition of the state railroad and gas and electricity commissions, the New York city inspectorship of gas meters and the rapid transit commission and for the substitution for the four of two public service commissions of five members each to be appointed by the governor, with strict safeguards about franchises and stock and bond issues by corporations. But, if this be so, they will most probably fail to their own discomfiture.

Certain it is that no serious errors, resulting in anything even remotely resembling failure, can possibly cause the downfall of a governor who aims ever to "do what is right." Nor can the political sharpers force such a chief magistrate into deals and get him into their power.

IS IT FAIR?

If a tonnage tax on iron is fair and equitable, why would not a similar tax be just on wheat, or lumber, or flour?

Probably no member of the legislature would have the temerity to introduce a bill prescribing a tax of five cents a bushel on all wheat grown in Minnesota, the funds thus raised to go into the state treasury. It would bring an avalanche of opposition from the rural members.

One can also imagine the frenzy of indignation that would be turned loose by the representatives from Minneapolis, if a tax on the flour output were imposed for the benefit of the state treasury.

Naturally the argument brought to answer this proposition is that flour is a manufactured product, but this does not answer the argument that a tonnage tax on ore is a tax on one section of the people for the benefit of the other parts of the state. Iron ore is the chief wealth of St. Louis county, as wheat is the chief wealth of many of the rich farming counties in the western part of the state. At present the state gets its share of the tax on iron lands just as it gets its share of the tax on the wheat growing lands, but why should it be entitled to a still further tax on the output of these lands more than it is to be the output of the wheat lands?

Under the present system the levy for state purposes is approximately one-tenth of the taxes raised by the county. If then a tonnage tax were forced upon the people of the northern counties of the state in spite of their opposition to it, why should not these counties be entitled to nine-tenths of this tax as they are to nine-tenths of all other taxes raised. It reduces itself to this simple proposition: The legislators who favor the tonnage tax would force upon the iron producing sections of the state an added burden over and above what the other counties will pay, which shall be for the benefit of the state at large.

If the other parts of the state believe that the iron interests are not paying their fair share of the taxes, the only just method would be to raise the assessed valuation, and the northern counties would then receive their fair share of the increased revenues.

ONE RAILROAD OPTIMIST.

In the midst of the chorus of pessimistic forebodings which such famous railroad magnates as James J. Hill, E. H. Harriman and George F. ("Divine Right") Baer have been leading of recent days, it is pleasantly refreshing to have B. F. Yoakum, chairman of the executive committee of the great Rock Island system, not only refuse to join that chorus of gloom but take direct issue with his brethren of the rail.

Mr. Yoakum's arguments are sound and ought to be convincing to any one whose views are not distorted by darkened prejudices. He holds that the country itself is too big and strong to be even materially damaged by any kind of agitation whatsoever and that, if the railroads adopt sane and sensible courses of action and devote themselves strictly to their legitimate business, they will inevitably prosper and grow stronger co-ordinately with the nation.

It is true that there has been widespread indignation over the nefarious manipulations of Harriman and over the unscrupulous watering of stocks, for the payment of which the people have been "bled" by high charges for freight and passenger service, but nowhere is there any agitation" beyond reasonable demands for the enforcement of "a square deal." The people and the legislatures are not seeking to confiscate any property whatsoever. All they desire is assurance that they are not being gouged to enable the magnates to make dividends for watered stocks.

If, for any reason, overzealousness or unjust suspicion, the railroads are dealt with too severely, the courts may be depended on to see that such severity shall do no harm. Under the circumstances and with abundant crops not yet handled and equally good crops in prospect, why should not Messrs. Hill, Harriman and Baer and their followers abandon their jaundiced views and join Mr. Yoakum in looking at the future through rose-tinted glasses?

THE PASSING SHOW.

There is one good thing about Chief Engineer Stevens of the Panama canal—he is making the dirt fairly fly before his retirement.

* * *

Rhode Island's "blind boss," General Charles R. Brayton, seems to be even more of a sticker than was his noted San Francisco counterpart.

* * *

Isaac Stephenson, who is said to be slated for Senator Spooner's toga for two years, is well qualified by wealth to join the Millionaires' club.

* * *

Secretary Taft is going soon on a trip to Panama. Will this be followed, according to precedent, by the resignations of the army officer engineers?

* * *

Either John D. Rockefeller is growing garrulous in his old age or he has changed his mind. He says that he did not promise to "make a tremendous gift."

* * *

J. Ralph Burton will soon be able to write a "double ex" before his name. No matter how long he may live, however, he will never carry the "triple x" mark.

* * *

Spring trade all over the country is reported on the boom with the prospects good for topping last year's record. Duluth, it is needless to say, is well up in the procession.

* * *

Mr. Bryan found out one thing on his visit to Duluth, if he found out nothing else, and that is that he has not lost one particle of his old hold on the regard of the Democrats.

* * *

The great bulk of the people, especially those of the Central West, will give a vote of thanks to the Democratic senators for putting ship subsidy into a "state of innocuous desuetude."

* * *

Governor Hughes of New York continues to "heap coals of fire" on W. R. Hearst's head. In a public speech he has declared in favor of a recount of the McClellan-Hearst mayoralty ballots.

* * *

Congressman Tawney of Minnesota accuses the senate of wild extravagance. The people will all agree with him and will further add the whole "billion dollar session" congress to the indictment.

* * *

New York's legislature is making ready to give Governor Hughes "plenty of rope." He will use it not to hang himself—of that there is no danger—but to suspend the many useless officials of the state.

* * *

Married men are declared to have shown the greater bravery in both the Boer and Japanese wars. Really, however, that is not surprising for most of them displayed the height of courage when they were wedded.

* * *

It is somewhat difficult from this distance to see what the Russian revolutionaries will gain by rioting on the very day of the assembling of the new duma. They would certainly have been wiser to have saved themselves for the failure of that body to do anything.

* * *

If E. H. Harriman were to undertake to build the Panama canal and were, at the same time, to keep control of the trans-continental roads, would he not be in the position of the circus rider trying to make a display on two horses pulling in opposite directions?

HOTEL GOSSIP.

"The Coeur d'Alene mining district in Idaho has the reputation of having produced larger returns on money invested than any other mining camp on the continent," said L. J. LePage, a mining engineer of Wallace, Idaho, who is a guest of William Burrell of the National Employment company. His remarks containing the district were brought out in an interview with local capitalists at the Spalding.

"In the Coeur d'Alene region the copper is mostly low grade, but it is easily gotten at, and the profits in mining it are very large. In connection with the copper there is silver and lead, and some of the mines are lead and silver exclusively. The properties now being worked all have ores very near the surface of the ground, so the cost of putting the mines on a paying basis is comparatively small. This is why larger returns in proportion to the money invested are obtained from the district than from any other district in America.

"One of the best of the mines, the Snow Storm, was discovered by a mule, so you see the ore could not have been very far beneath the surface. A party of prospectors were on their way to a promising piece of ground in Idaho to see if they could not locate a mine, when they stopped at the present location of the Snow Storm for lunch. A pack mule was tied to a tree, and remained there for perhaps an hour. From long association with miners, the animal seems to have had its mining instinct well developed. It pawed uneasily at the ground until the surface earth was torn away and a ledge of rock disclosed. The iron-shod foot knocked off a piece of the rock, and when the owners of the mule came to untie him, they found he had discovered for them a mine.

"I have just returned from a trip East, where I went at the request of Pittsburg capitalists who made me a proposition to gain control of the Verda Mining company. They insisted on obtaining a controlling interest, and so I was compelled to turn them down. It is curious to note how different cities are interested in different mining sections. In Pittsburg all the men with money for mining properties look to the Coeur d'Alene district. Cleveland has its favorite camp, and it is the same with Toledo, Detroit, and half a dozen other cities I could name.

"In some cities east of here you hear no talk that does not concern the Goldfield district in Nevada. In others the talk is all about the Cobalt district in Canada. Here in Duluth the Butte and Globe camps are the favorites, with some other regions coming into favor. Duluth is really interested in more districts than almost any other city."

* * *

T. Morita of Tokio, a Japanese student who is in America to secure material for a book on the conditions of the Japanese in America, was registered at the St. Louis yesterday. At the time the trouble over the schools in San Francisco first occurred he was editor of the Soko Shimbun, a Japanese paper published in the Western metropolis.

"People of my nationality in San Francisco have never been given an equal right with Europeanss or Americans," he said yesterday. "The various cities of the state have violated the second article in the treaty between the United States and Japan time and time again. There should be small room for misunderstanding between the enlightened American and the enlightened Japanese. The educational trouble in the West has been started by the lower classes of both nations. They may make a lot of noise, but will find it impossible to break the friendly relations existing between the two countries. Most of the trouble lies with the politicians who are after votes among the laborers.

"I am much interested in your municipal waterworks. For four years I was connected with the waterworks of Tokio and was at one time secretary to the mayor of Tokio. I shall go from here to Minneapolis and St. Paul, where I will visit for several days before going East. The Japanese you have here in Duluth are all students who are earning their living while learning the language and customs of your country. Many of them would gladly live here. Others will go back to Japan and put to practical use the knowledge they have gathered here."

* * *

At the St. Louis: F. W. Norton, Minneapolis; C. Jesmore, Eveleth; J. R. Whiteside, Minneapolis; R. W. Hadley, H. L. Mitchell, St. Paul; W. R. Bauder, Ishpeming, Mich.; P. O'Connor, Ely; A. B. Pointed Paragraphs.

Chicago News: Of two evils some people choose both as samples.

Little girls cry for dolls and big girls cry for dollars.

It's just as well to remember that it's always well to be just.

Most people look at their troubles through a magnifying glass.

Occasionally a man climbs out of a rut only to find himself in a hole.

If a man has common sense he enjoys a little nonsense occasionally.

There's quite a difference in dressmakers, even when they seem alike.

Reflections of a Bachelor.

New York Press: No matter what a breach of promise suit costs it's cheaper than if you had married her.

When a man will laugh at a joke no matter how many times he hears it, it's a rich relative.

It takes a lot of nerve to acknowledge in a downtown barroom what everybody knows—that you aren't boss at home.

Two-Cent Service.

Le Sueur News: Another bluff put up by the railroads is that a 2-cent passenger rate will result in a 2-cent service. That is more than the service in some parts of Minnesota is worth now, and the railroads should remember that they are in no position to make threats.

When the Children come home from School

They usually want something from the pantry

You remember the hunger you had—Home cooking counts for much in the child's health; do not imperil it with *alum* food by the use of poor baking powder.

Have a delicious, pure, home-made muffin, cake or biscuit ready when they come in. To be sure of the purity, you must use

ROYAL BAKING POWDER

Royal makes a difference in your home—a difference in your health—a difference in your cooking.

ROYAL is absolutely Pure.

THE WEATHER.

Barely enough snow fell last night and early this morning to vindicate the weather clerk and cover up icy places on the sidewalks, making pedestrians more uncertain than ever and leading to many falls. The temperature was mild, despite the cloudiness that prevented the sun from getting in its work on the snowbanks. The absence of wind also served to emphasize to spring-like temperature, and householders experienced no hardships in clearing away the inch or two of the "downy" that had fallen. All morning more snow was threatened, but none fell. Last night's lowest temperature was only 16 degs, while yesterday's highest was 22 degs. The weather man says there will be snow flurries and lower temperature tonight, but tomorrow will be clear.

The sun set at 6:02 o'clock this afternoon and will rise at 6:35 o'clock tomorrow morning. Since Sunday there has been a gain of thirteen full minutes of sunlight, and today has 11 hrs. 25 mins. from sun-up to sunset.

A year ago today was warm and the streets were slushy from melting snow, following a night in which water froze on the streets and sidewalks, making pedestrianism unstable.

Says Mr. Richardson of conditions: "Light snow or rain fell during Wednesday or last night in the lake region, Ohio, Upper Mississippi, Missouri and Red River valleys, and it is warmer this morning over the greater part of those districts, due to barometric disturbance which has moved from the Yellowstone region to the Mississippi valley. This low pressure also caused some snow or rain in the plateau region and California. The southwestern high pressure has moved to Oregon, Washington and Montana, causing slightly colder weather in the Far Northwest. General fair weather is indicated for this section tonight and Friday, but the temperature will be a little lower during tonight."

Following were last night's lowest temperatures, as recorded by the weather bureau:

Abilene	60	Marquette	16
Asheville	32	Medicine Hat	14
Atlanta	44	Memphis	52
Battleford	10	Miles City	20
Bismarck	22	Milwaukee	30
Boston	16	Minnedosa	14
Buffalo	10	Modena	26
Cairo	42	Montgomery	56
Calgary	18	Moorhead	24
Charleston	44	New Orleans	64
Chicago	20	New York	16
Cincinnati	30	Norfolk	28
Concordia	34	Northfield	4
Davenport	32	North Platte	28
Denver	28	Oklahoma	48
Detroit	20	Omaha	32
Devils Lake	4	Phoenix	44
Dodge	36	Pittsburg	22
Duluth	16	Port Arthur	10
Edmonton	22	Portland, Or	46
El Paso	64	Prince Albert	6
Escanaba	14	Qu' Appelle	8
Galveston	68	Rapid City	24
Grand Haven	24	St. Louis	38
Green Bay	24	St. Paul	24
Havre	4	San Antonio	64
Helena	22	San Francisco	46
Houghton	16	Santa Fe	26
Huron	26	S. Ste. Marie	4
Jacksonville	54	Shreveport	64
Kamloops	24	Sioux City	30
Kansas City	36	Swift Current	10
Knoxville	36	Washington	22
La Crosse	26	Wichita	42
Lander	28	Williston	10
Little Rock	48	Winnemucca	34
Los Angeles	48	Winnipeg	20
Madison	26	Yellowstone	22

Department of Agriculture, Weather Bureau, Duluth, March 7.—Local forecast for twenty-four hours ending at 7 p. m. Friday: Duluth, Superior and vicinity, including the Mesaba and Vermilion iron ranges. Snow flurries and colder tonight with minimum temperature 10 degs. to 15 degs. above zero. Friday generally clear. Northerly and westerly winds.

H. W. RICHARDSON,
Local Forecaster.

Chicago, March 7.—Forecasts until 7 p. m. Friday: Wisconsin: Fair tonight and Friday, except snow flurries in east portion tonight. Colder in west portion tonight.

Minnesota: Fair tonight and Friday. Slightly colder in south and west portions tonight.

North and South Dakota: Fair tonight and Friday. Moderate temperature.

Removing Ink Blots.

New York Sun: A woman was trying to lift a big blot of ink from a letter with a piece of blotting paper, with the usual result of making the blot bigger and uglier than it was at first. "Let me show you how to do that," said her friend. "I learned the trick in a stationer's shop in London last year. You just moisten the corner of the blotter first, to get it started, and then apply it to the ink spot. There! Isn't it wonderful how clean it takes it all up!"

Mating of Unsound Persons.

Philadelphia North American: Only pairs physically and mentally fit will be allowed to marry in Pennsylvania, if the legislature looks favorably on a bill introduced in the house by Representative Woodward, Republican, of Allegheny.

His bill forbids court clerks to issue licenses unless both persons produce a statement, made out and sworn to by a physician, that neither has pulmonary tuberculosis, epilepsy, insanity, imbecility or idiocy, nor any taint of disorders which are likely to develop in the next generation.

This philanthropic plan to improve the human kind has been discussed with much favor among medical men.

MINNESOTA OPINIONS.

Mesaba Ore: If the "mining country" would go down into the southern portion of the state and attempt to gobble the revenues there would go up a howl that would lift the state out of its socket—and it would be justified.

Virginia Enterprise: The city of Tower is clear of debt and has a snug sum in the treasury to boot. Not many of the north country cities with as clear a record.

Austin Register: Mayor Johnson of Cleveland, Ohio, is now after free street cars for his city. Cleveland may stand for it but it is doubtful if Thomas Lowry of Minnesota would take kindly to such a proposition.

Brainerd Dispatch: The vigorous protests being put up by the range towns against a state tonnage tax on iron ore is having its effect and the entire northern part of the state should take the matter up. The action of the Commercial club of this city in requesting the senator and representatives from this district to use their influence against the bill is in line with the sentiment of the people of this section.

Border Budget: Some philanthropically disposed man of means could gain sufficient fame to entitle his bust to space in the hall of fame by establishing a cure to prevent legislators from going wrong.

Rochester Post and Record: Of course Mr. Foraker would rather be right than president. But the chances are diminishing that he will ever be either.

Stillwater Gazette: There is no particular use in widening the capitol approaches if it is for the benefit of the members of the legislature. They all make it on the present width without serious trouble or embarrassment.

Le Sueur News: If the courts of justice do not give the "unwritten law" a vacation it will be set up as an answer in every criminal case very soon.

Anoka County Union: Better normal schools, not more of them, should be the platform of the legislature.

Mankato Free Press: The Fairmont Sentinel says a great hullabaloo is being raised over "widening the capitol approaches," but they can never be made wide enough for some of the noisy, ambitious politicians to reach the capitol.

Lake Crystal Union: John P. Hultengren, a Mankato-ite who left twenty-five years ago to make his fortune in the West has returned poorer than he went. This is generally the case.

ANENT THE LEGISLATURE.

Orionville Herald-Star: Some of our timid legislators have seen a real lobbyist and are afraid. They wont be so shy in sixty or ninety days.

Polk County Journal: The people as a whole want all necessary improvements made to the university, and will heartily support such action by the legislature.

Austin Register: There seems to be a lack of team work noticeable in the senate this year. The recent little scrap in the upper branch of the state legislature may be only a forerunner of other scraps which may develop in that same body before the present session ends.

Perham Enterprise: The first bill passed by the legislature was one appropriating $150,000 from which the members could draw their salaries. It is easy to guess the subject that is uppermost in the majority of our great law makers' minds.

Todd County Argus: As sure as the primary law is changed so that voters will be represented by delegates, that sure the people will punish the Republican party by defeat. It is only necessary to keep an ear to the ground to learn this.

Mankato Free Press: Those who live in the rural districts have no objection to the legislature appropriating generous sums to maintain the State university, but if must not be done at the expense of the rural schools.

Rush City Post: The majority of legislators will gain experience enough this session to go into the business of building and operating railroads as a profession at the end of the term.

Cannon Falls Beacon: For many years the Democratic party was by unanimous consent given credit for doing the fool thing at the psychological moment. Judging from the performances of Republicans in conventions, in congress, and in the legislature of Minnesota they are putting in a claim for that distinction themselves.

Hibbing Tribune: The biggest investigation of them all is the investigation the people are making into the acts of their representatives.

Wheelock's Weekly: The legislature is full of qualnt crochets this year. Regulation of the size of firecrackers is one of them. Some legislator who chokes on an unusually large oyster in a St. Paul cafe is quite likely to bring in a bill to limit the superficial area of the imported bivalve; they can't honestly tackle any of the domestic breeds.

ALL SAID IN FUN.

Cleveland Plain Dealer: "Here is a statement by Booker Washington that the negroes in the United States have acquired landed property greater in area than the whole of Holland.'

"Well, that certainly beats the Dutch."

Washington Herald: "Came near being a bad fire at the theater last night."

"How was that?"

"The villain lit a cigarette and tossed his match into the snow."

New York Sun: First Cannibal—Is this a dry town?

Second Cannibal—Yes, indeed; you have to eat a sandwich man before you can get a drink.

Chicago Record-Herald: "Young man," said the preacher, "do you know that you are sowing the wind?"

"Thash all ri', I ain' goin' 'round blowin' about it, am I?"

Philadelphia Catholic Standard: "Too bad about Keene. There's a fund of good, humorous stuff in the antics of the would-be society people in his new neighborhood."

"Well, he's just the fellow to take advantage of that for his funny sketches."

"Yes, but his wife is trying to get into society there."

Washington Star: "Do you believe in the faith cure?"

"Yes," answered the robust man; "it at least does something to counteract the tendency of people to overdose themselves."

Indianapolis News: "Yes," said Lovett, "I was engaged to her once."

"So I understand," remarked Newitt. "She told me she was an old flame of yours."

"That's pretty near right. She certainly did burn up my money."

Philadelphia Ledger: The magnate was on the stand.

"You have given millions for the education of the people?" suggested the lawyer.

"Yes, sir."

"Where did you get them?"

"Out of the system of educating the people," responded the magnate.

Chicago News: "Why do you hate him so?"

"He and I were lovers once, and we quarreled."

"Was that all?"

"No. He came to me and we both acknowledged that we were partly wrong. Then we agreed to forgive and forget."

"Yes?"

"He has forgotten."

Chicago Tribune: "Officer," said the man with the slight limp, "I'm a stranger here. Can you tell me where I will find a numismatist?"

"Yes, sir," responded the policeman at the crossing. "There's one down there in the next block on the fourth floor of the building with the brown front. He'll take 'em off for you for 50 cents apiece. First one free."

He Made His Choice.

Kansas City Journal: A Kansas probate judge who chewed tobacco twenty years has quit. He says he couldn't kiss the brides with tobacco in his mouth, and so he decided to give up the tobacco.

TWENTY YEARS AGO.

Taken From the Columns of The Herald of This Date, 1887.

***Henry Ward Beecher, the noted pastor of Plymouth church, Brooklyn, is dying.

***Miss West, who has been visiting her brother, Charles West of this city, for some time past, left for her home in Des Moines today.

***With palatial hotels at the East end, at he West end, on the hilltop, at New London and on Park Point, verily the ins and outs of Duluth will eclipse those of Saratoga.

***Duluth's increase in population in the present year is variously estimated at from 12,000 to 25,000 people. Placing it conservatively at 10,000, this will give us at the lowest estimate a population of 35,000, and if history repeats itself, from this figure we may expect to rapidly jump to 100,000.

***Mrs. Ruth Harmon, the grandmother of Mrs. Grover Cleveland, died yesterday at the home of her son in Jackson, Mich.

***Hanlan and Gaudaur will row on March 30 for the championship of America and $5,500. In August Hanlan and Beach will row in Australia for $5,000 and the world's championship.

***Daniel Jones, a well known Minneapolis real estate man, and H. S. Merwin, formerly of Merwin & Co., have formed a partnership to do a general real estate business under the firm name of Jones & Merwin.

***Bank clearances for today reached the highest figure since the clearing house was organized, $425,553.

***Abbott & Pew made a sale of 75 feet on East Superior street this afternoon for $15,000. John H. Lee of St. Joseph, Mich., was the owner.

***There was a serious row yesterday at the saloon of John Freeman at Thomson, in the course of which John Brown, the bartender, struck Morrill S. Butler on the head with a billiard cue, fracturing his skull, so that he died a few hours later. A number of arrests followed, and all, including Brown, were bound over to the April term of court.

***The Kansas City Journal says: "Duluth is rapidly becoming an important factor in Minnesota affairs, and the quarrelsome Twin Cities must look to their laurels."

***Manning Logan, son of Gen. John A. Logan, has developed greatly since his father's death. He is to go into business at Youngstown, Ohio, where Miss Edith Andrews, the lady to whom he is engaged, resides. They will be married early in the spring. It has been his desire to assume the name of John A. Logan, Jr., and he is often called by that name.

SPOONER'S NEW PLACE

(Continued from page 1.)

Mr. Hill will take immediate steps to issue the circular which will proclaim Senator Spooner's appointment.

It has long been known in railroad circles that since the death, more than a year ago, of M. D. Grover, the Great Northern general counsel, that Mr. Hill has been casting about for a strong man to assume the duties of the head of the Hill legal forces.

At one time it was rumored that Elihu H. Root, ex-secretary of war, was to be Mr. Hill's chief legal advisor, but the New York legal giant could not be tempted by even the magnificent salary offered, a salary usually that of the president of the United States—$50,000 a year.

Mr. Root, during the famous Hill and Harriman legal battle in St. Paul, when Harriman attempted to wrest the control of the Northern Pacific of the St. Paul magnate was of the counsel and rose high in the latter's esteem at that time.

Among others who have been mentioned as possible candidates for the general counselship of the Hill interests was Frank B. Kellogg, who, in the past few years, has gained much prestige in corporation law and who is at present representing the government in the investigation of the Harriman methods of finance.

About six months ago Mr. Hill personally approached Senator Spooner and proffered to the Wisconisn solon the position of general counsel.

It is said that Senator Spooner accepted the same, but with the condition that he be given until May 1 before assuming his duties.

To this President Hill agreed. From what can be learned at this time, Senator Spooner, after entering the Hill services will probably make his headquarters in New York, where he will personally direct all of the higher legal policy of all of the Hill interests.

Althought Senator Spooner has devoted most of his attention of the past ten years to politics, he has always been known as a most astute corporation attorney and especially has his intimacy with railroad law made him well known to railroad magnates and their attorneys.

At one time he was general counsel for the road which is now known as the Chicago, St. Paul, Minneapolis & Omaha.

For some time past, the Great Northern legal department has been under a temporary head of William R. Begg, a well known St. Paul attorney, who is still a young man. Mr. Begg is known as general solicitor and will retain that title as well as still continue in the Great Northern service in St. Paul.

He will report directly to Senator Spooner. Due to the fact that the Hill forces have been without the services of general counsel, Mr. Hill has found it necessary, in legal cases of great importance, to employ as special counsel, attorneys of national fame, whose fees have made the expense account of the Great Northern's legal department take on enormous proportions.

STROTHERS NOT GUILTY

(Continued from page 1.)

"not guilty" was the signal for an outburst of approval, which Judge Harrison quickly silenced. James Strother reached for the hand of Mr. Moore, one of his counsel, and Phillip was quickly surrounded by the friends who have stood by the brothers since the opening of the trial. Mrs. James Strother, overcome by emotion, fell forward into her husband's arms, sobbing and exclaiming her thanks.

When the effects of the critical moment passed, Judge Harrison addressed the jury as follows:

"Gentlemen of the jury: I thank you for a verdict which I think will be approved by the public. It is an established precedent in the state of Virginia that no man tried for defending the sanctity of his home should be found guilty."

SECOND HIBBING TICKET IS NAMED

Dr. Butchart Heads Ticket in Abolition of Gambling.

Hibbing, Minn., March 7.—A second village ticket for the coming election, which will be held Tuesday, was put in the field yesterday, and it is understood to have as the chief plank of its platform the abolition of open and slot machine gambling, which has caused a considerable stir lately. The ticket follows: Village president, Dr. G. M. Butchart; trustees, B. H. Hayes, John Dugal, John Maki; recorder, Burt Rowe; treasurer, R. L. Giffin; constables, Erick Nord, Henry Little. No one was named as municipal judge. A contest is on between J. F. Wilkey and T. F. Brady, the present incumbent, and it was decided to leave the choice to the people without any recommendation.

Dana Butchart, the 5-year-old son of Dr. G. M. Butchart, was thrown from a bucking pony yesterday afternoon in front of his home, sustaining a fractured skull and other injuries. He was rendered unconscious by the fall, and is in a very critical condition. The lad was starting out for a gallop, and upon reaching the street the animal he was riding started to rear and kick, throwing him to the icy pavement.

WOULD PREVENT CALUMET & HECLA

From Voting the Stock of Other Mining Properties.

Lansing, Mich., March 7.—Legislation affecting the reported effort of the Calumet & Hecla Mining company to get control of the Centennial, Allouez and Osceola copper mining properties was undertaken in the Michigan legislature yesterday. A bill to prevent the stockholders of one company from voting the majority stock in another was introduced, passed by the senate and made a special order for today in the house. Its backers are making every effort to have the bill enacted before the annual meetings of some of these companies, March 12. By an act passed two years ago the Michigan anti-trust law was rendered ineffective in regard to mining companies.

When the Hair Falls

Stop it! And why not? Falling hair is a disease, a regular germ disease; and

Ayer's Hair Vigor

NEW IMPROVED FORMULA

quickly and completely destroys these germs. The hair stops falling out, grows more rapidly, and dandruff disappears. An entirely new preparation.

The New Kind

Does not change the color of the hair

J. C. AYER CO., Manufacturing Chemists, Lowell, Mass.

BIG PERMIT IS GRANTED

D. M. & N. Takes Out $100,000 Permit for New Coal Dock.

Nineteenth Permit of This Size Issued in Duluth.

The building inspector's office is celebrating the issuance of a $100,000 permit. The big one was granted yesterday to the D. M. & N. railway for their coal dock "on St. Louis bay, between Twenty-ninth avenue west and the ore dock," as the permit reads.

Permits of $100,000 are still rare things in this city though with a steel plant in prospect and other signs of prosperity looming up on the horizon. Inspector Kelley is considering getting a $100,000 stamp for big permits in the future, to save writing them.

The largest permit ever issued in the city was for the big ore dock erected last year for $500,000 and the total of the permits of more than $100,000 issued in Duluth since the office of the building inspector was established and records have been kept, is only nineteen. The $275,000 Peavey elevator permit was the last one granted before yesterday's issue.

A list of the nineteen big permits which have been issued here is as follows:

Palladio building	$300,000
Duluth Chamber of Commerce	100,000
Union depot	250,000
Endion school	160,000
Burrows block	150,000
Torrey building	200,000
Elevator Imperial Milling company	200,000
Duluth Board of Trade	230,000
Lonsdale building	200,000
Addition to Elevator "E"	120,000
W. S. Flour Milling Co. elevator	150,000
Marshall-Wells building	150,000
Peavey elevator	150,000
Wolvin building	200,000
D. M. & N., ore pockets in dock	200,000
Great Northern Power company	100,000
D. M. & N. ore dock	500,000
Peavey elevator, rebuilt	275,000

The nineteenth permit for $250,000 was for the erection of a ten story building on Fourth avenue west and Superior street, a project later abandoned.

COMMITTEE OF EXPERTS

(Continued from page 1.)

are to hold a conference with the committee from the Minnesota legislature this afternoon."

The party registered at the Spalding hotel, and shortly afterwards were escorted by W. J. Olcott, Capt. A. B. Wolvin and J. L. Norman to the Kitchi Gammi club, where they were served with dinner. This afternoon the visitors are meeting with the legislative committee, which returns to St. Paul tonight. Tomorrow the party will visit the plant of the Great Northern Power company, being taken to the scene of operations by a special train, and in the evening will be entertained at dinner at the Commercial club. At least this is the program that will be carried out if it proves acceptable to the members of the party. Further than this, details of their stay here have not been arranged. Every interest in Duluth stands ready to assist the steel men in every way possible in securing the desired information, and the several local organizations formed for advancing the best interests of the city, such as the Commercial club, the board of trade, the Duluth Real Estate exchange, etc., have appointed committees to act in conjunction with the party wherever necessary.

SPEAKER JOHNSON.

The legislative committee consists of Speaker L. H. Johnson, Representatives A. J. Rockne of Zumbrota, R. J. Wells of Breckenridge, Burdette Thayer of Spring Valley and Swan Nelson of Minneapolis. George M. Gillette, a Minneapolis manufacturer, is also with the party. The legislator are anxious to encourage the establishment of a steel plant here, and are ready to impress this fact upon the Steel company experts.

"I wish The Herald would make it plainly understood," said Speaker Johnson, this morning, "that our visit here at this time has nothing whatever to do with the proposed tonnage tax, or the taxation of iron ore in any form whatever. The legislature would have had a committee in Duluth today whether the tax question were before it or not.

"Our purpose here is to assure the representatives of the United States Steel company that the state of Minnesota stands ready to lend every encouragement to the establishment of a steel plant within the borders of the state, and to express it as the belief of the legislature and people of Minnesota as a whole, that the corporation really should build and operate such an institution in Minnesota. There is every reason why this state should receive some of the benefits of manufacture of steel, and we cannot understand why it should not be perfectly feasible to operate a plant of the kind in question in Duluth or vicinity. It naturally follows that such action on the part of the company might be expected to lead to the most liberal possible treatment of the corporation at the hands of the state."

Mr. Johnson emphatically repeated his assertions to the effect that it was not the purpose of the legislative committee at this time to discuss the tax proposition with the steel experts, and that they were here merely for the purpose of encouraging the building of a plant in the state. Mr. Johnson, who naturally is a man of very great influence in the legislature, is disposed to be fair on all matters of legislation, whether affecting large or small interests, and, while he refused today to discuss the matter of a tonnage tax, it is believed he will act according to what he believes will be just and right when the question comes to a vote.

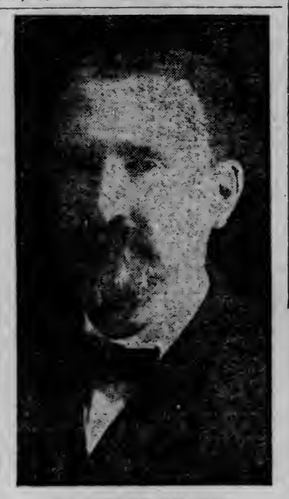
The representatives of the steel company will not lack for the information they are after while in Duluth. Everybody in the city, particularly the business interests, is earnestly hoping for the establishment of a plant for the manufacture of steel here, and everything possible will be done to remove any obstacles that may appear in the way of starting such an institution. The real estate men, at a meeting of the exchange Tuesday, were enthusiastically unanimous in voting that real estate valuations should be placed very low on all property desired by the steel corporation, in order to lend additional encouragement for the building of a steel plant. The real estate men are convinced that building such an institution in Duluth will have such a very great influence on future real estate valuations in and about the city that they can well afford to sacrifice practically all profits to meet the needs of the present occasion, and secure the desired improvement.

It is not the intention of Duluth to tire the visitors with a bewildering array of speeches, figures, etc. Aside from the dinner at the Commercial club tomorrow night, whatever meetings or conferences are held between local interests and the visitors will depend entirely upon the pleasure of members of the party. The city is willing and eager to offer information of any desired sort wherever wanted, but does not intend to force a long line of arguments on the matter in hand unless there is evidence that they are wanted. It is taken that the experts know just what line of information they want, and that they will go about securing it in the shortest possible way.

Duluth will be represented on this important occasion by one big general committee, consisting of men representing all the important interests of the city, and acting jointly. All are members of the Commercial club, though some in the present instance are representing other bodies as well as the club. The general committee is made up as follows:

A. M. Marshall, T. W. Hugo, W. A. McGonagle, A. C. Weiss, Millis Bunnell, Alexander McDougall, C. A. Duncan, Thomas F. Cole, C. A. Congdon, W. J. Olcott, A. L. Ordean, G. G. Hartley, A. B. Wolvin, J. B. Cotton, Dwight E. Woodbridge, Thomas Pettigrew, H. P. Broughton, F. A. Cokefair, H. V. Eva, F. A. Patrick, B. W. Howe, W. G. Hegardt, Frank Crassweller, W. I. Prince, C. R. Rust, C. A. Luster, E. P. Coleman, L. A. Barnes, C. W. Elston, J. J. Moe, J. H. Barnes, W. S. Moore, Pentecost Mitchell, J. H. McLean, J. Uno Sebenius, George Spencer, A. W. Frick, G. A. Tomlinson, Ward Ames, G. L. Douglas, D. T. Helm, S. H. Jones, M. J. Forbes, C. P. Macdonald, W. B. Silvey, Henry Nolte, N. J. Upham, Whitney Wall and W. M. Prindle.

It will be noticed that the above list includes the names of local officials of the Steel corporation. The greater part of tomorrow will be spent in the inspection of the workings of the power company, and lunch will be served while the visitors are at the power plant.



BURDETTE THAYER,

Evils Resulting From Constipation

How this Trouble May Be Readily Corrected.

You are drowsy, heavy, loggy, lack energy—every exertion is an effort—your head is not clear and it is hard to think, you have a full and oppressed feeling in your stomach and bowels—all your limbs and body ache—in fact, life seems hardly worth living under such conditions. Ask yourself, "Do your bowels move regularly?" If you feel as above your answer will be "NO"—that is the cause of your troubles. If not properly corrected this condition will lead to much more serious disorders of the blood and body, due to the poisons in the waste matter which should be promptly carried off. And it seems so foolish to suffer when Nature has provided her own wholesome and certain remedy in the pure Mineral—Laxative Water—HUNYADI JANOS—from the famous Springs in Hungary. ½ a tumblerful of this wonderful water drunk on arising in the morning (slightly warmed for best results) will give you within an hour a delightful pleasant and copious movement. This will clear your head, sharpen your appetite and make a new man of you. Try it and see. At all druggists.

A. J. ROCKNE.

D. E. H., March 7, 1907.

TIRED OF SNOW?

If you are tired of looking at snow come in and inspect the beautiful spring creations in Suits, Coats and Cravenettes of which we now make a liberal display. Bulky shipments reached us from both the Stein-Bloch and Sincerity Tailor Shops.

All are invited, especially those who, being ignorant of the wonderful progress made in the manufacture of clothes ready-to-wear, still stick to merchant tailor and waste their money.

MINERS TO MAKE AN AGREEMENT

With Copper Companies Concerning an Increase in Wages.

Butte, Mont., March 7.—At the special meeting of the Miners' union last night the report of the committee who met John D. Ryan, managing director of the Amalgamated Copper company several days ago, was accepted, and the committee was given extended power toward bringing about an agreement concerning the new scale of wages. It is stated that Mr. Ryan offered a sliding scale dependent upon the price of copper for the next five years, with $4 per day as the maximum wages for underground miners as long as copper shall remain at or above 18 cents per pound and $3.50 as the minimum if the red metal falls below that figure.

There was some discussion relative to the demands of the smelter men for higher wages, and the committee was instructed to meet with a committee from the Mill and Smeltermen's union at an early date to agree upon som plan for adjustment which may be acceptable to the large companies.

NO CONCESSION IN STEEL BARS

Manufacturers Will Not Favor Implement Men This Year.

Cleveland, Ohio, March 7.—The Iron Trade Review will say: The most interesting development of the week in finished lines was the action of the agricultural implement manufaoturers in appointing a comittee to endeavor to obtain a concession of $3 per ton on the price of steel bars for their annual contracts for the year ending June 1, 1908. Manufacturers state emphatically that no concession will be made. The dissatisfaction caused among other buyers of steel bars last year, when a reduction of $2 per ton was made to agricultural interests and the great demand for all kinds of finished materials this year tend to make the sellers very firm in their position.

The purchase of 5,000 tons of Bessemer pig iron by the Carnegie Steel company for March delivery at $22, Valley furnace, indicates that the output of the Carnegie furnaces is still inadequate and it is expected that further purchases will be made, provided a satisfactory price is made. Sales of about 75,000 tons of Southern pig iron are reported, and in spite of some weakness in the Chicago market, the Southern product is strong. Transactions in Northern foundry pig iron are not numerous, but the market is firm.

Careful investigation concerning the position of the railroads has shown that reports of retrenchment are much exaggerated.

DAVIS CASE AT A STANDSTILL

Case May be Tied Up Indefinitely on Legal Points.

Danville, Ill., March 7.—The trial of Will J. Davis, charged with manslaughter, on account of the fire in the Iroquois theater at Chicago, in 1903, is now at a standstill so far as evidence is concerned, and the case promises to be tied up in the courts indefinitely on legal points, and may be carried to the supreme court before the trial itself can go on. The witnesses have been released and have returned to Chicago, subject to further notice.

When the prosecution had finished its statements to the jury yesterday, the defense waived the right of address temporarily.

The prosecution had scarcely begun to question the first witness when the defense objected to the entire proceedings and moved to have the court direct the prosecution to introduce, first of all, the Chicago ordinance, the alleged violation of which before the fire, caused the loss of life. If the ordinance is declared invalid, then, it is argued, there was no law to violate, and Davis is guilty of no crime. The afternoon was consumed by Levy Mayer in arguing this point. Assistant State's Attorney Kimbark of Chicago, who has made a specialty of this ordinance, has been sent for to participate in the argument. When this point has been passed to the court another vital one will be submitted. The defense offers to admit the facts. The prosecution denies its right to do so. If the defense can admit the facts, then the prosecution will be denied its chance to introduce witnesses, some of whom were maimed in the fire.

COMING TO DULUTH.

Benjamin Fay Mills Will Hold Meetings Here.

Benjamin Fay Mills of Los Angeles, once a noted orthodox evangelist, will be in Duluth in April to hold a series of meetings under the auspices of the First Unitarian church in this city. Mr. Mills has visited Duluth before in his capacity as an orthodox evangelist and will be remembered by many people here. He is a man of more than national reputation, and is known as the founder of The Fellowship, an expression of present day religion.

He begins a tour of the country this week, starting from Los Angeles, and the series of Duluth meetings will begin Wednesday, April 10, continuing for ten days. Mr. Mills is heard with much interest, and the members of the local Unitarian congregation are delighted at being able to have such a speaker here for a series of meetings which will be of interest to the public at large.

LAST OF HISTORIC LOG HOUSES IS BURNED.

Chillicothe, Mo., March 7.—The last of the historic log houses built by the Mormons when they settled in Livingston and Caldwell counties, in 1835, was destroyed by fire yesterday near Mooresville, close to the scene of the Hauns Mill massacre. The building formed part of a private residence.

Brains Rule This World—

Not muscle, but brains governing muscle.

The quality of brain can be changed by certain selection of food.

A food expert perfected a brain-building food by preparing certain elements in wheat and barley in a way that nature would make use of. That food is

Grape-Nuts

In it the Phosphate of Potash, obtained from nature's grains (not from the drug shop), is retained in minute particles. This has an affinity for Albumen, and these two with water make the soft gray matter in the brain and nerve centres.

A solid fact you can demonstrate by the use of Grape-Nuts.

CONTRACTOR FINED

For Feeding Men at His Cedar Camp With Venison.

Bemidji, Minn., March 7.—(Special to The Herald.)—Charles Bjornson, a cedar contractor, who is in charge of a camp on the Peruna branch of the Minneapolis & Rainy River railway, about thirty miles north of Deer River, paid a fine of $50 and costs, for having venison in his possession and feeding the luscious wild meat to his employes in lieu of the regular beef and pork. Bjornson was apprehended by A. G. Rutledge, game warden of Bemidji, who visited Bjornson's camps and found that he had one whole deer, which he had just skinned and the green hide of another, the meat was in the kitchen, being prepared for the regular evening meal of the lumberjacks. Bjornson was caught red-handed, and after a heart-to-heart talk with the warden, plead guilty to having deer in his possession out of season and liquidated to the extent of $60, being $50 and the cost and mileage of a deputy sheriff.

WEST DULUTH

WANT NEW BUILDING

Members of W. C. T. U. Are Anxious for Y. M. C. A. Branch.

One is Greatly Needed by West Duluth People.

Another attempt is being made by the members of the W. C. T. U. of West Duluth to either induce the Duluth Y. M. C. A. to establish a branch association at this end of the city, or decide upon what is to be done with the property which was deeded to it by the W. C. T. U. several months ago.

A committee of the W. C. T. U. members raised about $600 over a year and a half ago, and purchased two lots on Fifty-seventh avenue. These lots were deeded to the Duluth association, with the understanding that a branch building would be established.

Since then nothing has been done about forming a branch association out here, and the members of the W. C. T. U. are wondering if they will ever get the building. Mrs. H. H. Phelps and Mrs. C. R. Keyes of the W. C. T. U. are very earnest in their desires to get the building, and have had several conferences with Secretary Bevis of the Duluth association.

Mr. Bevis has stated that when he interviewed some of the West Duluth business men, some months ago, they seemed to be very little interested in the matter, and on this account he has not pushed the building project as much as he might have.

The ladies of the W. C. T. U. will probably make an attempt to obtain the signatures of a number of prominent business men who are in favor of establishing a branch here, and they do not expect any difficulty in this work. They claim that something of this kind is greatly needed by West Duluth.

FAREWELL FOR METHODS.

Party Given in Their Honor Before They Go South.

Mr. and Mrs. Joseph Method entertained a number of friends at their home, 527 North Fifty-seventh avenue west, at a farewell party last evening, in honor of Mr. and Mrs. Victor Method, who will soon leave Duluth for the South. Mr. Method has secured a good position with a lumber company in Louisiana.

The tables were handsomely decorated with tulips and evergreens and about twenty-five sat down to dinner. The evening was spent by those present in a social manner and addresses were made by Rev. Feehely of Grand Rapids, L. A. Barnes, J. A. Scott and Dr. C. R. Keyes. Mrs. Method was presented with a complete manicuring set as a remembrance.

The following were those present: Rev. D. W. Lynch, Rev. J. J. Feehely, L. A. Barnes, J. A. Scott, Dr. C. R. Keyes, E. Z. Zauft, M. A. Willinsen, C. R. Little, H. E. Kringle, J. D. Larrigie, C. A. Munroe, J. D. Kenna, L. J. Brotherton, R. Richardson, John Cashin, D. Keefe, J. P. Hammil, George Method, J. Johnson, G. J. Lynch, and Mr. and Mrs. V. R. Method.

Mrs. Smearage Entertains.

Mrs. Edward Smearage entertained about thirty-five of her friends last evening at a pleasant party given in honor of her guests, Mrs. Kilby and Mrs. Winton of Chicago, at her home on Sixty-first avenue. The rooms were artistically decorated with ferns and flowers and the tables were fancifully set for the members of the party. An informal program of musical selections was given by Miss Holt and several recitations by Miss Lillian Flaherty.

Mrs. Yandel is Dead.

After an illness and suffering which had lasted for the past three years, Mrs. Cathrina Yandel died yesterday afternoon at her home, 5813 Redruth street. She was 47 years old and had resided in West Duluth many years. Her husband, George Yandel, and five children survive her, and were all at home when death occurred. Mrs. Yandel was a member of the ladies' lodge of the C. O. F. of West Duluth, and was well known. The funeral will be held Saturday morning from the St. James Catholic church and the burial will be at Calvary cemetery.

Dies in Sanitarium.

Word was received yesterday of the death of John Wangen, a popular West Duluth young man, at a sanitarium in Michigan, where he had been sent several days ago in hopes of his recovering. Diabetes caused the young man's death, and he had suffered from it for several months. Mr. Wangen was 26 years old and had resided with his parents, Mr. and Mrs. David Wangen at 509 North Fifty-ninth avenue west. He had lived in West Duluth for about seventeen years and was well known. The remains will be brought to West Duluth for burial.

Surprise Party.

Mrs. James Carey was very pleasantly surprised last evening by a number of the friends and members of the Degree of Honor Lodge, No. 85 of West Duluth, at her residence, No. 4 Munger row. An informal musical program was rendered and the evening was spent socially by the members of the party.

Those present were: Mesdames M. S. Phelps, William Burdick, John Cashin, Henry Hewitt, George Ayotte, David Sang, George Murcau, A. Mirran, J. McClure, Duncan McLean, W. A. Pond, Messrs. M. S. Phelps, William Burdick, John Cashin and W. A. Pond; Misses Ray Sang and Pearl Ayotte.

West Duluth Briefs.

Mrs. R. Bartley has returned to West Duluth after a few days' visit with relatives in Upper Michigan.

Gilbert Drovadal of New Duluth, has joined the office force of L. A. Barnes.

Mrs. William Langslow of Fifty-sixth avenue, who has been ill for several days, has recovered.

Miss Floyd Campbell, who has been visiting relatives at Virginia for the past three weeks, has returned to West Duluth.

Miss Karaus, who has been visiting relatives at Owatonna during the last two weeks, has returned and taken up her duties as head nurse at the Duluth hospital.

A regular meeting of the Women's Foreign Missionary society of the Asbury M. E. church will be held tomorrow at the home of Mrs. David Sang, 426 North Fifty-eighth avenue west.

Rev. Father Lynch has prepared an excellent program for the sacred concert and lecture to be given a week from Sunday at St. James' church.

A well attended meeting of Euclid Lodge, No. 198, A. F. & A. M., was held last evening and important business was transacted. Several visitors from Duluth and Proctor lodges were present.

Neglected Colds Threaten Life.

(From the Chicago Tribune.)

"Don't trifle with a cold,' is good advice for prudent men and women. It may be vital in the case of a child. Proper food, good ventilation, and dry, warm clothing are the proper safeguards against colds. If they are maintained through the changeable weather of autumn, winter and spring, the chances of a surprise from ordinary colds will be slight. But the ordinary light cold will become severe if neglected, and a well established ripe cold is to the germs of diphtheria what honey is to the bee. The greatest menace to child life at this season of the year is the neglected cold." Whether it is a child or adult, the cold slight or severe, the very best treatment that can be adopted it to give Chamberlain's Cough Remedy. It is safe and sure. The greatest popularity and immense sale of this preparation has been attained by its remarkable cures of this ailment. A cold never results in pneumonia when it is given. For sale by all druggists.

NOTICE

The Duluth Retail Liquor Dealers' Association meets every second and fourth Friday of the month, at 2 p. m., at the Eagles' Hall, 116 West Superior street.

JOHN GONSKA, Pres.
FRANK PETERSON, Sec.

CONSPIRACY IS CHARGED

By Hotel Man Who Has His Enemy Arrested.

Hayward, Wis., March 7.—On Monday a warrant was issued for the arrest of David McDonald of Draper county, charged with conspiracy against C. H. Maddocks, a hotelkeeper of that place.

In his complaint the complaining witness charges that McDonald hired Frank Lamott to place illegal venison in his (Maddocks') shed, and then tipped off information to Deputy Game Warden Kirkoff of Eau Claire, hoping to have Maddocks arrested for violating the game laws, and thereby to satisfy an old grudge.

The game warden found the venison, but thought the circumstances looked a little suspicious. Frank Lamott was believed to know something of the matter and upon being cornered and questioned, admitted that he had been hired by McDonald to put the meat in the shed. He said the deer was killed by McDonald.

The case was called in Judge Riordan's court in this city yesterday afternoon, but on motion of Attorney C. A. Stark for the defense, it was continued till the 19th inst., to give the defendant time to prepare his case.

A short time ago McDonald had a son of Maddocks arrested for running a saloon within 300 feet of the schoolhouse. Young Maddocks, being ignorant of the law, pleaded guilty to the charge and was fined $50 and costs. In court yesterday the district attorney moved that the fine be remitted, as he had investigated the case and there was no merit in it; that the saloon was established before the school was opened and that the state would not have proved its case if the defendant had pleaded "not guilty." The three children of McDonald were the only ones attending the school and as they practically live in their father's saloon it was not thought the proximity of the saloon of the defendant worked a moral detriment to them.

HAPPENINGS IN THE DAKOTAS

North Dakota Hardware Dealers Look for Big Meeting.

NORTH DAKOTA.

Minot—Big preparations are being made by the hardware dealers of the state to make their coming annual convention of the North Dakota Retail Hardware Dealers' association a great success. The meetings, which was postponed from the original date in January, on account of the demoralized state of railroad traffic at that time, will be held in Minot March 12 to 15 inclusive.

Matters of general interest to the trade will be discussed at this meeting, and a large attendance is anticipated. Besides the members of the association, representatives of a number of wholesale and jobbing houses will be present and will have exhibits in the Leland hotel during the convention.

It is expected that a number of manufacturers and men prominent in hardware circles in the East will be present, and among the most important subjects to be discussed will be the pure paint law of North Dakota.

Grafton—The trial of Otto Weberg on a charge of murdering Anna Engalsrud at Fairdale, Walsh county, will probably be commenced when the case of John Osowski goes to the jury. Weberg will seek to escape the gallows by a plea of insanity, it is understood. Osowski is charged with assault with a dangerous weapon. He was one of the guests at a Polish wedding at Warsaw. He was attacked, according to the defense, and was obliged to defend himself with a knife. Over a dozen kegs of beer had been provided for the celebration of the wedding, and so nearly all were more or less intoxicated.

Fargo—The McKenzie county seat fight will be taken up before Judge Molloy, March 11. The case was transferred to Fargo from the Eighth district. The fight is between Alexander and Schafer over the county seat. The advocates of the latter claim to have gotten the greater number of votes at the last election.

The failure of the senate to confirm a number of state board appointments made by Governor Burke interests Fargoans. For the agricultural college board the senate turned down Eaton of Fargo and Svengaard of Wells county. The fight is more for the control of the funds of the college than for any other reason. The board selects the treasurer, and its makeup and selection determines which of the local banks will get the deposits. The defeat of Hancock of Fargo for a place on the penitentiary board was brought about to prevent the removal of Warden Boucher and retain control of the institution in Bismarck.

Rev. Adams received a telegram Monday from Mrs. Sarah Sanborn, stating that her husband had died in Milwaukee from injuries received. George H. Sanborn was one of the pioneer settlers of the Red River valley. He came to Fargo more than thirty years ago and settled on an eighty-acre tract a few miles west of that city. For several years he has resided in the East.

SOUTH DAKOTA.

Highmore—Clad only in her nightrobe, Mrs. Andrew H. Lien, a bride of eight months, rode three miles on horseback through bitter cold to summon aid for her husband, whom she carried from their burning farmhouse. Lien used kerosene in building a fire at his house, upon his return from town at night. Mrs. Lien was in bed. An explosion followed and Lien, with his clothing aflame, called for help. Mrs. Lien attempted to smother the flames with a quilt, after which she carried her husband from the burning house to the barn. By that time the house was in flames, so she could not enter for clothing or reach a telephone. Bridling a horse she rode three miles in her nightdress to the home of the nearest neighbor, from which place a physician was summoned. Mrs. Lien fainted, but insisted later upon returning to her husband, who died the next morning. She is suffering from the burns and exposure and her recovery is doubtful.

Alpena—A sensation has been created here by knowledge that the anti-saloon element has engaged the services of a detective with the object of securing evidence against local residents who are suspected of violating the liquor license law. One case already has been instituted, the defendant being W. W. Hillis, a druggist. In a complaint sworn out before a local justice the detective alleges that he procured liquor at Hillis' place of business. Mr. Hillis entered a plea of not guilty and furnished bonds. It is hinted that several other arrests are about to be made.

DAVIS TO MARRY AGAIN.

Iroquois Theater Owner is Engaged to His Secretary.

Chicago, March 7.—In connection with the trial of Will J. Davis, proprietor and owner of the Iroquois theater, charged with manslaughter because of the terrible fire at that theater, comes the interesting announcement that Mr. Davis is to be married to his secretary, Miss Ellen Hagen.

The wedding will be celebrated immediately after the trial in case he is acquitted.

Mr. Davis' first wife, Jessie Bartlett Davis, died in 1905.

OFFICERS ELECTED

By Bemidji Commercial Club and Other Business Transacted.

Bemidji, Minn., March 7.—(Special to The Herald.)—A well attended meeting of the Bemidji Commercial club was held Tuesday evening at the city council chambers, and much business of importance to the city was transacted. The meeting was presided over by the ex-vice president, E. A. Schneider.

The election of officers for the new club was taken up. Frank S. Lycan was elected president of the club, receiving the unanimous vote of the board of directors, with the exception of his own ballot. Clyde J. Pryor, business manager of the Bemidji Daily Pioneer, was elected secretary of the club. E. A. Schneider, who has acted as vice president of the club since it was first organized, was re-elected to that position. G. E. Carson was also re-elected treasurer.

It was agreed that the membership fee should be fixed at $5, with monthly dues of 50 cents. The committee appointed to draft new by-laws asked for and was granted further time in which to prepare its report. E. A. Schneider, W. N. Bowser and W. L. Brooks were appointed a committee to select suitable quarters for the club. A committee, consisting of G. E. Carson, E. A. Barker, Wes Wright, W. G. Schroeder and W. L. Brooks, was appointed to confer with the officers of the county agricultural society and ascertain the best methods to pursue to assure success of the next county fair.

The report of Treasurer G. E. Carson showed that there was a balance in the treasury of $132.82.

EVELETH ANSWERS

Suit by Dowling Bros. and Makes Counter Claim of $4,200

Eveleth, Minn., March 7.—(Special to The Herald.)—The city of Eveleth has filed its answer in the suit brought by Dowling Bros. for $4,500 claimed to be due them for extras on the city waterworks contract, in which it is claimed that nothing is due under the terms of the contract, which stated that no moneys be paid except as previously agreed upon, and the city also puts in a counter claim of $4,200 for non-completion of the contract for one year after the specified time, and overpayment said to have been made.

KRIEGER'S ADVENTURE.

Was Slugged and Left for Dead---Both Feet Frozen.

Owatonna, Minn., March 7.—A strange story is told by a man giving his name as Krieger and now a patient at the city hospital. Some few days ago Krieger, with both feet so badly frozen that he could hardly walk, staggered into Owatonna. A physician ordered him to the hospital, and it is feared amputation of both feet must follow.

Krieger says his former home was at Raymond, Iowa, and later at Waterloo, Iowa. Prior to Feb. 19 he was engaged by a man named Webber at Raymond to accompany a car of stock to Vernon, N. D., to which place Webber was moving, where he expected to secure work. At this point he left the car for the purpose of obtaining water for the stock. His feet became wet, and when he returned to the car he pulled off his boots and threw them into the car and was in the act of crawling in himself when two men came up behind him and struck him over the head, knocking him senseless. It was while in this condition that he says his feet were frozen.

He remembers little after that except that the car left without him and the next morning he boarded a passenger train and rode as far as Pratt station five miles south of here. Some one at Pratt discovered his condition and urged him to go to Owatonna for medical assistance.

A dispatch from Waterloo says the officials have been making inquiries for friends of Krieger, but they have not been found. Even if amputation is not necessary, Krieger will be a cripple all his life.

Kornelia Kinks with genius great
Displayed her skill on her grandpa's pate.
When next he eats—Oh! poor old coon,
He won't know where to thrust his spoon.

"Korn Kinks" is good for the memory. That's true because it strengthens mind and body—no food is so strengthening and sustaining as corn, and "Korn Kinks" is malted corn prepared in a way that makes it most delicious and easily digested. Only 5c. at your grocer's.

A RUBBER TEST

NOTE:—This is a pair of "light weight" **Foot-Schulze** which makes the test even more convincing. The **heavier grades** of **Foot-Schulze** rubbers, rubber boots and overshoes are even more sturdily built for the hardest kind of wear.

Here is a Photograph of the Soles of a Pair of

Foot-Schulze Rubbers

Taken at the end of two months wear by a man weighing over 200 pounds, who walked from *5 to 10 miles* on hard city pavements, packed snow and stone sidewalks every day during the two months.

¶ At the end of the two months, during which they covered over 600 miles, these soles were practically as good as new (the worn spots are accurately depicted in the photograph). It will be noted that they were not even worn smooth at all points.

¶ Many people who tried to get **Foot-Schulze** last fall and who took the substitutes offered, will be interested in this test. Did the substitutes "stand the racket" as well as these **Foot-Schulze** have done?

¶ The moral is—next time *don't* take the substitute, *insist* on **Foot-Schulze.** They cost no more than *ordinary* kinds and they *wear* and *wear* and *wear* after the *ordinary* kinds are out at the heel and gone to pieces all over. In the light of the following facts **Foot-Schulze** superiority is no mystery:

¶ **Foot-Schulze** contain *more pure India rubber gum* than any other brand of rubbers on the market. This *gum* is what gives them their tough wear resisting qualities.

¶ **Foot-Schulze** are thoughtfully and scientifically constructed to *fit modern shoes*—there is no chafing and wearing on certain spots where the fit is uncertain. That's another reason.

¶ **Foot-Schulze** rubbers, rubber boots and overshoes are the original "Glove" brand known the world over, the *first rubber shoe made.* Its name and reputation is *over 60 years old.*

¶ "Glove" goods possess the old-fashioned honest *quality* that our *grandfathers* knew, together with the *modern styles* that *we* know.

THEY ARE THE BEST *and* IT PAYS TO GET THE BEST

Look for the mark "Foot Schulze & Co., St. Paul." (See it on photograph of rubbers herewith)

PARIS CABWOMEN

In Pantaloons and Hats That Save Heads From Falls.

Paris, March 7.—The women cab drivers who have been at work for two weeks do not cease to attract attention. When their licenses were granted, M. Lepine, the prefect of police, who is a thoughtful official, gave notice that they were to wear, "with a view to the possibility of falls, stout pantaloons, short jackets and boiled leather hats."

These last are the strange, shiny toppers which, on a Paris cabby's head, have often attracted the tourist's notice. The wearer can safely fall on them, and they will protect him or her admirably from contact with stone pavements. The lady cabdrivers deride the idea that they will ever fall from their boxes.

Madame Duffaut and Mlle. Charnier wear doublet and hose. The jacket is short and tight-fitting. Below, the cab-ladies sport knee-breeches.

VAUDEVILLE IN CHURCHES.

Ohio Preacher Uses Graphophone in Lieu of Choir.

Marion, Ohio, March 7.—Rev. J. P. Curtin, who came here from California as pastor of the First Baptist church, introduced graphophone music last Sunday in lieu of the choir. There was a fifteen-minute program by the graphophone, followed by baptism and a sermon on "Evangelism."

Recently Rev. Byron C. Platt, pastor of the Central Christian church, created surprise by advertising that in future he would use stereopticon views to illustrate his evening sermons. Sunday night fifty pictures were thrown upon a screen to exemplify the teachings of Christ.

RISING BREAST And many other painful and serious ailments from which most mothers suffer, can be avoided by the use of "Mother's Friend." This great remedy is a godsend to women, carrying them through their most critical ordeal with safety and no pain. No woman who uses "Mother's Friend" need fear the suffering and danger incident to birth for it robs the ordeal of its horror and insures safety to life of mother and child, and leaves her in a condition more favorable to speedy recovery. The child is also healthy, strong and good natured. Our book, "Motherhood," is worth its weight in gold to every woman, and will be sent free in plain envelope by addressing application to

MOTHER'S FRIEND

Bradfield Regulator Co., Atlanta, Ga.

HIGH RENTS IN WINNIPEG

Workingmen and Small Merchants Seeking New Locations.

Looks as if Reaction is Impending, Says John L. Morrison.

"The real estate men and rental agencies are going to kill Winnipeg if they do not stop boosting prices."

That's the opinion of John L. Morrison, who has just returned from a trip to Manitoba's capital and who also claims to possess some skill in diagnosing symptoms concerning a city's business and financial health.

"I heard serious complaint on every hand," continued Mr. Morrison to The Herald this morning. "Working people, and even small merchants are, quietly but persistently looking about for new locations. Some of the wage earners will try farming on the cheap lands in the wheat and stock regions. Many are investigating British Columbia and the Coast cities. I met a number who declared that they proposed trying the States, particularly in the far West.

"Any slinky sort of a little cottage costs about $40 a month. I know of one frame residence, so far from the business center as to require street cars, that costs $75 a month and is occupied by three families, as well as several roomers. The latter pay $15 a month for rooms and at least one room is furnished by the occupants. A mechanic occupies three small rooms on the second floor, with his wife and daughter, for which he pays a rent of $30 a month. He will move out as notice of an increase to $37.50 after May 1, has been served.

"A seasoned newspaper man told me that building permits have fallen off 50 per cent since the first of the year. Those owning property are getting fat fortunes in rents and propose to see how the cat jumps before going in deeper. Many of the small fellows cannot procure means to build their own homes, hence talk of leaving the city. Others are afraid to invest more capital in office and residence property, fearing a wholesale exodus and a slump in demand.

"While the demand for and traffic in lands in the Western wheat regions keep up and promise to continue at flood tide, it looks as if the apex of the Winnipeg boom has been reached and that a reaction is is impending. While there may have been a bit of over-development, I ascribe the main reasons to the following causes, viz:

"Excessive rentals for residences and offices.

"Inability or negligence of the railroads to provide a fuel supply to both Winnipeg and the regions to the Westward, many of which have neither coal nor wood.

"Disgust of working people and small dealers with high rentals, high living, inadequate fuel supplies and a general movement to get into some part of the country where abnormal conditions do not exist.

"I was in several of the largest stores in Winnipeg and it was surprising how few customers were in evidence. There is entirely too much complaint over poor trade. The common people, who form the backbone of business, are saving up to get away before another winter and another boost in rental prices catches them.

"Winnipeg has made a wonderful growth in the past ten years. I hardly knew the town and found trouble in locating many of the old land marks. There are some structures there that would be a credit to any city. The paternal municipal government, possibly retaining the influence of the days of barter and Indian tee-pees, has passed an ordinance, by-law they call it, limiting the height of business structures. Sky scrapers make them dizzy.

"Then there's the new 'Lord's Day Act,' making it unlawful to do many common things on Sunday, recently passed by the Canadian government. There's a tendency to ignore many of the restrictions in Winnipeg. I was surprised to see the cars running on Sunday. That great and powerful corporation, the Canadian Pacific Railway, observes the new law and refrains from sending out any trains of any sort, from terminals, after midnight, Saturday. Trans-continental trains are permitted to continue their run, however.

"The C. P. R. has a new depot and hotel that are highly creditable. Several other fine hotels have been erected and charge New York rates. Winnipeg is developing into a good show town, and amusement lovers are provided the best in both vaudeville and the legitimate. A very fine theater, the Walker, recently was erected.

"There is a large Duluth colony in Winnipeg. Duluth contractors have done well there. Duluth capital is represented in the jobbing trade, and the building improvements in the jobbing district are especially noticeable. The Winnipeg grain market is steadily increasing in importance with Duluth grain men.

"Among former Duluth men who are in the grain trade for themselves or with others may be mentioned Donald Morrison, William Gallie and A. T. Hepworth. George Mackenzie recently was given a fine position in the Winnipeg banking field, being transferred from Fort William.

"Winnipeg's future should, in my humble opinion, be closely watched by Duluth," concluded Mr. Morrison. "There is much in common between the two cities, and that field should not be neglected by Duluth enterprise and capital. The railroads could help by giving Duluth at least a small part of the comfortable cars and fast train service afforded Minneapolis. It may be that the Duluth, Virginia & Rainy Lake road will help Duluth secure better trains and greater consideration from the railroads."

Rheumatic Pains Relieved.

B. F. Crocker, Esq., now 84 years of age, and for twenty years Justice of the Peace at Martinsburg, Iowa, says: "I am terribly afflicted with sciatic rheumatism in my left arm and right hip. I have used three bottles of Chamberlain's Pain Balm and it did me lots of good." For sale by all drugggists.

HE SLEPT FOR TWO YEARS.

Wakes Up With Normal Mind, But Forgets How to Walk.

Staunton, Va., March 7.—Leslie Chewning, age 14, of Spottsylvania Court House, lay asleep practically two years. All efforts to arouse him failed.

After having slept continuously for two days, his family became alarmed and summoned a physician, but the boy failed to respond to the most drastic treatment. Days passed into weeks and weeks into month and he could not be aroused.

Finally he was sent to a hospital, where he remained in bed, never showing any desire to get up, even when not entirely unconscious. At times he could be sufficiently aroused to eat. At other times he would have to be nourished artificially.

Two days ago he woke up. Although a stranger when taken there he knew by name on recovery all the nurses in his ward. His mind is apparently normal, but he has forgotten how to walk.

WAITS FOR PASSPORT

Dwight E. Woodbridge Should Have Been in Mexico Days Ago.

He Frets at Home While Washington Acts in the Matter.

Business of an important nature has been calling Dwight E. Woodbridge to Mexico for the past thirty days, but although the well known mining expert has tried, he cannot get there—or rather he cannot get to that particular part of Mexico that he wants to visit.

Of course, Mr. Woodbridge has plenty of money for his railroad fare and he happens to have the time—this being an important matter, but international complications keep him from that part of the Southern republic where he should have been busily engaged for these last twenty days.

It seems that at present, it requires half a dozen passports, a couple of writs, and a diplomatic corps to get across the international boundary at the point where Mr. Woodbridge would penetrate Mexico.

Mr. Woodbridge is something of a diplomat himself and figures that he can accomplish his own diplomacy, but he really does need a passport and he has been waiting a month to get one, but as yet it has not arrived.

No less a person than the secretary of war, or maybe it is the secretary of state, has to issue the permit to get across the line, and Mr. Woodbridge frets at home while considerable red tape is unraveled at Washington and the passports are acted upon.

Something like a month ago, Mr. Woodbridge said farewell for the nonce to Hunter's Park and set out for Mexico, but pompous officials halted him and he was forced to turn back. He had not the necessary "papers." The only thing for him to do was to return and wait here for good news from Washington, which he has done up to date without reward. However, he is hoping that the secretary of war, or the secretary of state, will soon send the open sesame to Mexico's closed door.

"All of this bother is the result of incipient revolutions and Yaqui Indian troubles," said Mr. Woodbridge. "For some time, the Mexican authorities have kept a close watch upon the international boundary in the western part of their country and unless a strange has proper credentials, it becomes mighty unpleasant for him if he tries to get through and is caught at it.

"Not long ago, two Americans were arrested and clapped into a dirty Mexican jail for no reason at all, except that they did not have permission from the proper authorities to cross the border at that point. They were not only put in confinement, but were not allowed to communicate with their friends for a month. I guess they finally did get out, but I do not envy them their experience.

"All persons crossing the border in the Western part of the country are carefully searched and regarded as generally suspicious characters until they can prove to the satisfaction of all concerned that they are peaceable persons and have business on the other side."

A HAPSBURG DUCHESS RAN AWAY WITH A MAN.

Vienna, March 7.—In the Hapsburg blood there is a restless strain that frequently breaks out in unsavory actions. Archduke Leopold Salvator has just returned after giving up his actress wife, but the joy at his coming back to Vienna has been discounted.

For nearly two months the imperial court was in a state of terror and astonishment. An archduchess disappeared mysteriously from court. No trace of her could be found until a few weeks ago, when she was discovered in the Hotel Bellevue, at Geneva, in the company of a good-looking man, who signed the hotel register as Ferdinand de Sznyni.

During a month the two lovers lived in a most extravagant manner, and passed their nights at the music halls and masked balls.

M. Stanz, a well known lawyer of Vienna, was sent by the royal family of Austria to persuade the princess to quit the man. She obstinately refused. Dr. Josef Fleischmann, also of Vienna, went to Geneva and succeeded in persuading the archduchess to return to the court with him.

Sznyni left alone, quitted the hotel without paying the bill, leaving behind the luggage of his royal companion.

The scandal is causing a sensation here in the highest circles.

Piles Cured Free

Get Rid of Your Piles Right Now—Pyramid Pile Cure Can Do It Quickly and Painlessly.

FREE PACKAGE SENT TO PROVE IT.

Half of the suffering and torture of piles has never been told. But no matter. Whether your particular case of piles is almost too excruciating for any mortal to bear, or if you are fearfully tantalized by unreachable itching, or whether you have only a moderate case of piles, there is positive relief, and quick too, in Pyramid Pile Cure.

You need not take for granted all we ourselves say about our Pile Remedy. We want it to speak for itself. We want you to send for a free package, today, of the marvelous Pyramid Pile Cure. We want to prove these statements to you personally, so that you will feel the result yourself.

Pyramid Pile Cure has cured the worst form of piles known. We prove it.

Instant relief can be gotten by using the marvelous Pyramid Pile Cure. It immediately reduces all congestion and swelling, heals all sores, ulcers and irritated parts.

The moment you start to use it, your suffering ends and the cure of your dread disease is in sight. Here is one of the many thousand letters we get about this great cure:

"I have been a terrible sufferer of piles for fourteen (14) years and during all this time you can have an idea of how many kinds of medicine I tried. But I found no relief whatever.

Now, after trying but one treatment of your 'Pyramids,' I am free, free to tell all sufferers of this dreadful disease to try this medicine—the Pyramid Pile Cure. It will cure when all others fail. Sincerely yours, George Branegight, Schellburg, Pa."

The Pyramid Pile Cure is put up in the form of "easy-to-take," specially made suppositories. They are soothing, painless, instant and certain.

A trial treatment will be sent you at once by mail, in plain, sealed wrapper, without a cent of expense to you, if you send your name and address to Pyramid Drug Co., 183 Pyramid Building, Marshall, Mich.

After you receive the sample, you get a regular-sized package of Pyramid Pile Cure at your druggist's for 50 cents, or if he hasn't it, send us the money and we will send it to you.

TAX-DODGERS GET NO MERCY

Woman Tax Collector's Record Better Than That of Men.

Laconia, N. H., March 7.—Miss Martha W. Johnson, New Hampshire's first woman tax collector, has made good.

She has chased the tax dodgers and has collected the tax list cleaner than any man who has held the office since the city was incorporated in 1893.

One of the special features of Miss Johnson's work has been the rounding up of poll tax delinquents, a class that has made no end of trouble for the collectors in past years.

She has not been content with sitting in her office day after day and sending out bills and summons, but has "got on to the street" herself, and the result is that there will be a much smaller list of abatements this year than ever before recorded.

At the time of Miss Johnson's election a year ago not a few hints were thrown out that the selection of a woman for the position might prove to be a costly experiment.

Her first annual report, just submitted, however, proves that she has been a success.

The report shows that of a total amount of $100,978.05 placed in her hands for collection at the beginning of the year, she has collected $90,-162.24, with the additional amount of $1,280.73 on old tax lists, and $67.66 in interest.

The balance of uncollected taxes on her lists at the present time is $9,-432.38, and a greater portion of this will be secured before the time for the election of a new collector will arrive.

There is but little chance, however, of any change being made in this direction, and at the annual meeting of the city council for organization, the last Monday in March, Miss Johnson will probably be re-elected.

Miss Johnson was born in this city March 5, 1876, a daughter of the late Mrs. Abbie D. Harriman. She is a graduate of the high school class of '95. Previous to her election she was employed in various city offices and had been collector for the Laconia Electric Lighting company.

WILL TAKE UP RESCUE WORK

Duchess of Marlborough to Renounce Blenheim for London Slums.

London, March 7.—It is announced that the Duchess of Marlborough will join the Church Army with the intention of devoting herself to social rescue work. The Weekly Dispatch says the duchess will renounce the glories of Blenheim castle for the labors of philanthropy among the squalor and poverty of the slums.

The Rev. Colin Campbell, secretary of the Church Army's social department, said in regard to this matter: "The Rev. Mr. Carlile, our chief, is now in the south of France, but we know that about three weeks ago he with Mrs. Carlile visited the duchess at Nice. Many times she has opened work for us, and garden parties have been held at Blenheim."

FROG SKIN GRAFTED.

Cuticle Used on Burned Arm of Woman With Success.

South Bend, Ind., March 7.—Seventy-two square inches of frog skin have been grafted on the arm of Mrs. Orville Kizer with apparent success. The bandages will shortly be removed and the result of the experiment will be definitely established. The grafting was resorted to because of the large area of exposed surface. Mrs. Kizer was burned while heating turpentine about nine months ago.

Six big live frogs were stripped of their skin and the cuticle grafted. The arm did not present an attractive appearance when the work was completed, but as the green outer skin of the frog sloughs off the same as the outer skin of a human being, the under layer is the only one that will adhere and this is the part that is needed.

DISTRESSING STOMACH DISEASES

Permanently cured by the masterly power of "South American Nervine Tonic." Invalids need suffer no longer, because this great remedy can cure them all. It is a cure for the whole world of stomach weakness and indigestion. The cure begins with the first dose. The relief it brings is marvelous and surprising. It makes no failure; never disappoints. SUMMONS IN APPLICATION FOR REGISTRATION OF LAND.—State of Minnesota, County of St. Louis. —ss.

District Court, Eleventh Judicial District.

In the matter of the application of Alexander W. Hartman to register the title to the following described real estate situated in St. Louis County, Minnesota, namely: The Northerly half of Lot Fifteen (15), Transfer Division of Duluth, and that part of the Southerly half of Lot Sixteen (16), of said Transfer Division of Duluth, lying between Lake avenue and the Easterly line of St. Paul and Duluth Slip—extended, all according to the recorded plat thereof, on file in the office of the Register of Deeds, in and for St. Louis County, Minnesota, together with full and free access by water for all purposes of navigation to the premises herein contained; the said premises fronting on Lake avenue one hundred (100) feet, and extending Westerly parallel with the Southerly line of said Lot Fifteen (15), two hundred and sixty (260) feet to the said St. Paul and Duluth Slip, and the Easterly line of said Slip extended,

Applicant,

vs.

George B. Orr, Trustee, Northern Pacific Railway Company, City of Duluth, the unknown heirs of Annie R. Wemyss, deceased, The unknown heirs of Edward L. Orr, deceased, and all other persons or parties unknown, claiming any right, title, estate, lien or interest in the real estate described in the application herein, Defendants.

The State of Minnesota to the above named defendants:

You are hereby summoned and required to answer the application of the applicant in the above entitled proceeding and to file your answer to the said application in the office of the clerk of said court, in said county, within twenty (20) days after the service of this summons upon you, exclusive of the day of such service, and if you fail to answer the said application within the time aforesaid, the applicant in this proceeding will apply to the court for the relief demanded therein.

Witness, J. P. Johnson, clerk of said court, and the seal thereof, at Duluth, in said county, this 21st day of February, A. D. 1907.

J. P. JOHNSON, Clerk.

By V. A. DASH, Deputy.

JEFFERSON DAVIS HAD NO WOMAN'S CLOTHING.

Lewiston, Me., March 7.—Recently the Boston Herald published an exclusive interview with L. C. Bateman of Auburn, a veteran of the Civil war, in which Mr. Bateman stated that the story of Jefferson Davis, the leader of the lost cause, when captured by the Union troops, was dressed in woman's clothing is a myth.

The Herald interview has been widely copied, and Mr. Bateman has received many letters regarding the matter, and almost without exception they are favorable to his side of the controversy.

Wednesday Mr. Bateman received a letter from Capt. B. D. Bryant, sheriff of Jackson county, Mo., in which among other things, he says:

"I was a commissioned officer of the Twelfth Maine regiment, and was with the regiment at Augusta, Ga., when Jefferson Davis was brought in by his captors. I remember the incident very well, and your interesting story awakens a slumbering memory of those stirring times.

"I, too, saw Mr. Davis and his entire party and had conversation with Stephens and others of the distinguished prisoners.

"I spoke to Davis, but he was reticen and disinclind to notice me.

"I was officer of the guard by regular detail this day which gave me vantage opportunities that I might not otherwise have had. I was aboard the Planter and took in everything in sight and some that were not. Several officers of our regiment accompanied the Planter on its trip with its precious cargo of the defunct confederacy.

"Your description of Mr. Davis in surtout and cavalry boots tallies exactly with my remembrance of his attire, and I have always maintained that a mistake has gone obroad concerning his capture in female garb."

ADRIAN WOMAN

Quotes the Bible to Prove Woman Will "Compass" Man.

Adrian, Mich., March 7.—Mrs. M. L. Karnes, the Adrian "flagman," who resigned to take up the lecture platform, has announced that her lecture, "Woman's Mission, or the Coming Woman," is based upon the Bible.

This is proof enough that she will make good as a lecturer, for she can quote scripture with a fluency that would cause an amen deacon to sit up and take notice.

"Woman's mission today is to rise and shine," says Mrs. Karnes. "Jeremiah said: 'There will be strange things on the face of the earth, woman shall compass man.' There are two meanings to the word compass, one is to point the way. That is woman's mission, to point the way. We don't want to crush man but simply want to stand shoulder to shoulder with him."

Chamberlain's Cough Remedy Is Both Agreeable and Effective.

Chamberlain's Cough Remedy has no superior for coughs, colds and croup, and the fact that it is pleasant to take and contains nothing in any way injurious has made it a favorite with mothers. Mr. W. S. Pelham, a merchant of Kirksville, Iowa, says: "For more than twenty years Chamberlain's Cough Remedy has been my leading remedy for all throat troubles. It is especially successful in cases of croup. Children like it and my customers who have used it will not take any other." For sale by all druggists.

ANSWER OF COL. GREENE

Copper Magnate Denies Assignment of Cananea Stock.

Alleges That He Paid Claim of Lindsay in Full.

The answer of Col. William C. Greene in the suit instituted by Lycurgus Lindsay to determine title to 8,000 shares of Cananea Central copper stock, was filed in the district court this morning.

Col. Greene alleges that on, or prior to Aug. 10, 1904, he was entitled to purchase from the Cananea Central Copper company over 10,000 shares of its stocks at the par value of $10, of which $5 was to represent a cash payment per share.

Col. Greene alleges that about Aug. 1, 1906, Lycurgus Lindsay, on behalf of Col. Espes Randolph of Tucson, Ariz., paid Col. Greene $50,000 and the latter gave Lindsay an instrument as described in the complaint, but denies that it was, or was intended to be, an assignment of or an order for the stock described, or a sale of the stock or any part thereof to Lindsay.

Col. Greene claims the instrument was signed and delivered without any consideration and that it has not, or never has had, any binding force in law or equity. He claims that Lindsay, at the time he paid the $50,000 to Greene, obtained from Greene the instrument represented to him and that he paid the same at the request of Randolph and for his use and benefit, and that the acknowledgment in this investment of the receipt by Greene of $50,000 from Lindsay was intended to be a receipt from Lindsay, not in his individual capacity, but as the agent of Randolph. It is alleged further that about Dec. 10, 1906, at the request of Randolph, Greene repaid him $50,000.

Col. Greene further claims that about $10,000 was paid by Randolph to Lindsay about Aug. 10, 1906, and that about Dec. 10, 1906, at Los Angeles, Cal., he, Col. Greene, duly tendered Lindsay the sum of $40,000 with interest from Aug. 10. Col. Greene alleges that he has tendered to the Cananea Central Copper company $50,000 and requested the issuance of 8,000 shares of stock and that he has been ready and willing to pay that amount.

Col. Greene alleges that the market value of the stock is now approximately $20 per share.

He demands that he be decreed owner of 8,000 shares of the stock and that the company deliver the same to him.

HISSES FOR THE JAPANESE FLAG

Audience in Seattle Theater Shows Hostility to That Nation.

Seattle, Wash., March 7.—At two performances in the Star theater, a vaudeville house, when Omar, an international character dancer displayed the flag of Japan, it was hissed. France's tri-color received little applause; Italy's was met with silence; the colors of England brought a round of applause, and the German emblem brought a ripple. The audience lapsed into silence again when the Russian flag was displayed.

A thrill ran through the audience as the Japanese flag was flaunted. There was a momentary silence. Suddenly a hiss sounded, and like a wave it spread over the audience. It was long and insistent. A few attempted to applaud, when the hissing broke out with renewed vigor.

No Japaneses were noted in the audience, but the matter had been reported to Consul Hismidsu immediately and he has intimated that he will report the matter to his government.

BINGHAM SAYS POLICE MUST NOT TAKE TIPS.

New York, March 7.—Police Commissioner Bingham has issued general order No. 11, which reads as follows:

"No member of the police force will be permitted to receive any rewards for the arrest of any person, or for the arrest and conviction of any person, or for the recovery of any property, except for the rewards offered for the arrest of deserters from the army and navy of the United States, and such rewards as are open to all by published notices, and those commonly known as standing rewards."

The commissioner explained that the order was issued to stop what he called "the accepting of tips whenever an officer does anything."

"BUNCH OF KNAVES"

Says Grand Rapids Prosecutor, Referring to a Jury.

Grand Rapids, Mich., March 7.—"In my opinion, the jury which acquitted Frank Lynch was a bunch of knaves. I should have had a verdict. The defense did not put up any fight at all," said Prosecuting Attorney McDonald in speaking of the trial of Frank Lynch, the man who was charged with promoting the prize fight between Harry Lewis of Philadelphia and Mike Ward of Sarnia, Ont., in which the latter received injuries from which he died.

ALFONSO GIVES PROUD GRANDEES KINGLY SNUB.

Madrid, March 7.—King Alfonso has been giving some strong indications of his originality and independence of spirit. He has quite shocked the stiff necked Spanish grandees and courtiers by his indifference to tradition and etiquette.

The rigid Catholics of the court have been scandalized by the king's order that an Episcopal chapel shall be fitted up in the palace of El Pardo for the use of his mother-in-law, Princess Henry of Battenburg, when she visits Spain.

The king paid no attention to their protests beyond saying contemptuously: "Well, gentlemen, if you don't like it you need not go there."

Another incident shows the king's decisive character. He granted leave of absence to an officer of the Palace guard to see his dying mother at Avila, ninety miles from Madrid. As a special train could not be obtained, his majesty placed his fastest automobile at the officer's disposal, and ordered the chauffeur to make best speed to Avila.

The road to Avila is a dangerous one, and the chauffeur raised objections. "Very well," said King Alfonso, "if it is so difficult I shall have to drive the auto myself."

The king's firm attitude made the chauffeur obey without another word.

ROCKEFELLER'S DOUBLE SENSATION OF TRIAL.

Chicago, March 7.—When Charles A. Richardson, a farmer living near Joliet, appeared at the federal building, he was surprised at the furore his arrival occasioned.

Elevator men, high government officials, and even members of the secret service corps were eager to do him honor. His journey from the Clark street entrance to thee levators was one continuous ovation. The importance accorded him, unsolicited, caused amusement, which reached a climax when Attorney Charles Miller greeted him effusively:

"Why, how do you do, Mr. Rockefeller?" exclaimed the lawyer. "You are looking remarkably well."

Then he understood. Farmer Richardson bears a striking resemblance to John D. Rockefeller, and the ovation was not for him, but rather for the oil magnate. Although the fact that he is a double for the multi-millionaire has previously caused him amusement, the resemblance had never caused the excitement it did this morning, when he appeared in answer to a summons to act as a petit juror.

As the men were leaving the court-room in charge of bailiffs, Richardson was stopped and asked to pose for a photograph.

"I do not care to have my picture taken, especially in this case," said Richardson. "I have heard so much of my resemblance to Mr. Rockefeller that it bores me. Every one who knows me speaks about it."

Richardson said he had no prejudice against the man whom he resembles.

A FORMER MAYOR HAS BOUGHT HIS OLD SHOP.

New Bedford, March 7.—Ex-Mayor Thomas Thompson has purchased from the Donaghy estate the old marble shop at the corner of Fourth and Spring streets, where he was employed for so many years.

Where he resumes business, as he will probably do at an early date, he will become again the man in the overalls, as he was when he made his successful fight for mayor two years ago.

Since he went out of office, Jan. 7, Mr. Thompson has been taking a vacation. It was not that he needed a rest after his strenuous year in the mayor's chair, although he was not off duty a day during his term, but since he went to work as a boy Mr. Thompson has never had a vacation, and he considered that he had earned a respite, and that this was as good a time as any to take it.

After taking his ease for about two months, the former mayor will go back to his old trade, and the marble shop will again open its doors to his admirers.

Mrs. Cora B. Miller Makes a Fortune

Started a Few Years Ago With No Capital, and Now Employs Nearly One Hundred Clerks and Stenographers.

Until a few years ago Mrs. Cora B. Miller lived in a manner similar to that of thousands of other very poor women of the average small town and village. She now resides in her own palatial brown-stone residence, and is considered one of the most successful business women in the United States.

Mrs. Miller's New Residence, Earned in Less Than One Year.

Several years ago Mrs. Miller learned of a mild and simple preparation that cured herself and several friends of female weakness and piles. She was besieged by so many women needing treatment that she decided to furnish it to those who might call for it. She started with only a few dollars capital, and the remedy, possessing true and wonderful merit, producing many cures when doctors and other remedies failed, the demand grew so rapidly she was several times compelled seek larger quarters. She now occupies one of the city's largest office buildings, which she owns, and almost one hundred clerks and stenographers are required to assist in this great business.

Million Women Use It.

More than a million women have used Mrs. Miller's remedy, and no matter where you live, she can refer you to ladies in your own locality who can and will tell any sufferer that this marvelous remedy really cures women. Despite the fact that Mrs. Miller's business is very extensive, she is always willing to give aid and advice to every suffering woman who writes to her. She is a generous, good woman and has decided to give away to women who have never used her medicine $10,000.00 worth absolutely FREE.

Every woman suffering with pains in the head, back and bowels, bearing-down feelings, nervousness, creeping sensations up the spine, melancholy, desire to cry, hot flashes, weariness, or piles from any cause, should sit right down and send her name and address to Mrs. Cora B. Miller, Box 661, Kokomo, Ind., and receive by mail (free of charge in plain wrapper) a 50-cent box of her marvelous medicine; also her valuable book, which every woman should have.

Remember, this offer will not last long, for thousands and thousands of women who are suffering will take advantage of this generous means of getting cured. So if you are ailing, do not suffer another day, but send your name and address to Mrs. Miller for the book and medicine before the $10,000.00 worth is all gone.

STRIKE OF THE WAITERS

Caused Two Hundred Hotel Guests to Fume and Fret.

When Waiters Won Out the Hungry Guests Had Gone.

New York, March 7.—Two hundred men and women in the Hotel Breslin dining-room sat from 6:45 until 8 o'clock, while their soups grew cold and their tempers grew hot, wondering what transformation act had suddenly robbed the three big rooms of all their waiters. The guests fumed and fretted. They didn't know that the pot of discontent was boiling still hotter below stairs. As most of them donned wraps and overcoats to depart, Manager Stockham and the waiters were arguing why pay should not continue at the rate of $25 a month, instead of $20, as a sign in the dining-room announced.

Fifteen minutes after the sign had been posted every waiter had solemnly announced that he was on strike. At this time the main diningroom was crowded, and the three smaller ones were comfortably filled.

The dinners of the guests were in various stages of completion. Some had had oysters and were patiently waiting for soup. Others had disposed of roasts and were longing for salads. A few of the more fortune were up to the dessert stage.

M. Clabeaux, head waiter, was pompously walking up and down the main room when he observed the dearth of waiters. Then from one table after the other came insistent demands that he tell Louie to hurry up. With his dignified countenance wreathed in frowns M. Clabeaux descended to the "food" room prepared to administer sharp rebukes and inflict fines.

There, in front of the small sign, stood the entire force of waiters talking in every patois known to France. Consternation supplanted the frowns on M. Clabeaux's face.

"Tear that down!" yelled the waiters.

Then M. Clabeaux, with the eloquence of a trained diplomat, began to plead, but his oratory fell flat.

"The flying leap for you!" shouted a big "Louis," brandishing a pot of boiling coffee.

Breathless, M. Clabeaux hunted up Manager Stockham and begged him to intercede with the belligerents. Mr. Stockham's fate paralleled Clabeaux's. Manager Stockham lined up all the bellboys, intending to conscript them for the night, but not one would admit that he knew a thing about diningroom service.

Back to the foodroom went Mr. Stockham.

"What do you want?" he said to the gathering of Louies.

"Tear down the sign!" they yelled.

"What then?"

"Your word that we get the same pay for March that we have been getting."

"I give it," said the desperate Stockham.

"And that there are no fines for the guests who leave our tables tonight," insisted the Louies.

"You're on!" yelled Stockham.

A wild rush for the piled-up food was made by the waiters, and when they entered the diningrooms they found most of the chairs empty. The hungry guests went across to the Gilsey house to complete their dinners.

MEDICINE MAKES HER FAT.

Washington, Pa., Woman Sues for Money Paid for Obesity Cure.

Washington, Pa., March 7.—Mrs. Maria Mitchell is fat and wants to be lean, so she answered an advertisement which offered to "cure obesity or money refunded." This was several weeks ago. Mrs. Mitchell says she has taken her medicine with religious regularity, but has grown fatter every day.

She has placed her case in the hands of a local justice of the peace, with instructions to compel the specialist to refund her money.

MOST ANCIENT PARISIAN.

Woman Has Not Left City Since Arriving There in 1815.

Paris, March 7.—Paris thinks it has discovered its oldest inhabitant. She is said to be Mme. Robineau, who lives near the Boulevard Pereire. She came to the city soon after the restoration in 1815, and has never left it since. She was born in 1800, and is therefore 107 years of age. Her active life ceased when she reached the age of 100, when she moved from the Boulevard Voltaire to her present residence, which she has not left since she went into it.

FEMALE BULL FIGHTERS.

Nordica Gives Prize to One of the Matadors.

El Paso, Tex., March 7.—Lillian Nordica, grand opera singer, and 10,000 other persons gathered at the Jauerz (Mexico) Plaza del Torors to see a bull fight in which professional female Spanish matadors and banderillos killed three out of four bulls.

Two of the bulls killed would have done credit to any matador who ever appeared in the Juarez plaza. Mme. Nordica, in whose behalf one of the bulls was killed, rewarded the successful matador with a roll of bills.

BENNETT PLEADS GUILTY.

Admits "Personals" Are Not Proper Matter to Go Through Mails.

New York, March 7.—A plea of guilty to a charge of sending improper matter through the mails—its "personal" column—was entered in the United States circuit court by William Rand, counsel for the New York Herald company. The plea was made on behalf of James Gordon Bennett, owner of the Herald, and William Gillam, advertising manager. Sentence will be imposed April 2. The maximum fine under the counts of the indictments is $40,000.

DEATH TO A DOG THAT BIT MISS BARRYMORE.

New York, March 7.—"Wanted—An actor to play a prominent part in a musical comedy now on Broadway. Will be treated and fed at management's expense, but must promise not to bite leading lady or other members of company."

This advertisement has not appeared yet, but there is a chance it may. The company in question is that of "Captain Jinks," now playing at the Empire theater. If the advertisement does appear it will be at the instigation of Miss Ethel Barrymore, who is nursing a very sore arm as a result of being bitten by one of her company. The actor was Leonora, one of the big St. Bernards who appear in the first act. The other evening Miss Barrymore stepped too close to the dog and with a snarl the beast sunk his fangs into the leading lady's arm.

Instead of fainting and creating a scene, the actress threw off the dog and asked that a physician be summoned immediately. Dr. C. W. Stevenson was called and cauterized the wound, after which Miss Barrymore went on with her performance.

A court martial, consisting of the executive staff of Charles Frohman, considered the case of Leonora, and without a dissenting vote the fate of the St. Bernard was settled, sentence of death being pronounced after the jury had been out but a few minutes.

The sentence was executed quickly chloroform being administered with telling effect, and in a few moments a member of Miss Barrymore's company was no more.

50 ONLY 50

Will have an opportunity to become

BANK DIRECTORS

And Secure One Beautiful and World Renowned $400 Kimball Piano Free.

Requires immediate response. Only first fifty eligible. Write for Circular giving particulars or call and secure one at warerooms.

U. S. Pure Food Inspectors refuse to eat adulterated foods—they also refuse to drink adulterated and counterfeit whiskies. Every man of them KNOWS that

Sunny Brook
The Pure Food
Whiskey

obeys the National Pure Food Law—they also KNOW that Sunny Brook is "BOTTLED IN BOND" under the direct supervision of U.S. INTERNAL REVENUE OFFICERS, who affix over the neck of each bottle of our Rye and Bourbon the Government "GREEN STAMP," guaranteeing AGE, PURITY and QUANTITY.

Of the hundreds of samples analyzed by the North Dakota Pure Food Department chemists—acknowledged to be the most rigid in the U. S.—Sunny Brook was the ONLY whiskey found NORMAL.

BLIND TIGER LAW ENDS CHAFING DISH PARTIES.

Indianapolis, Ind., March 7.—The pleasure of lighting an alcohol lamp and preparing a nice little chafing dish luncheon is at an end in Indiana, according to druggists who would repeal a part of the Ganiard blind tiger act.

These druggists declare that the women of Indianapolis and Indiana are protesting against the Gainard law, which provides that druggists may not sell intoxicating liquors without a physician's prescription.

"Why, a woman hurried into my store the other day," said one of the druggists, "and said she wanted some alcohol to burn under her chafing dish at home. I told her she would have to get a prescription in order to prepare an innocent lunch?" She thought I was joking. But she found out that I was not. It was all because of that Ganiard law."

GENERAL WAR WILL RESULT

The Five Republics of Central America Likely to be Involved.

Washington, March 7.—Mexico and the United States are using their kindly offices in an attempt to effect a settlement of the trouble which threatens to involve all five of the Central American republics in war. Mr. Creel, the Mexican ambassador, had a long conference with Secretary Root today, and Mr. Corea, the Nicaraguan minister, and Mr. Calve, the Costa Rican minister, also called at the state department, but there were no late advices, and no one would even comment on the situation today. The impression is still general in diplomatic circles that Salvador, Guatemala and Costa Rica are about to throw their support to Honduras, in an attempt to crush Nivaragua and to humble President Zeelaya. It can be stated positively that there is no thought of intervention on the part of the United States, and Mexico is believed to be unwilling to intervene. Although strong efforts are being made for an arbitration of the grievances which threaten to result so disastrously, the opinion prevails in Washington that the five republics will all be involved in actual war.

CRUSHED IN THE ICE.

Fishing Steamer Leopold Wrecked---Crew of 103 Men Saved.

St. Johns, N. F., March 7.—The seal fishing steamer Leopold was crushed in the ice floes off Cape Race during a terrific gale at midnight and was totally wrecked. Her crew of 103 men reached land safely.

IMPORTANT SALE

oing on at M. Henricksen Jewelry Co. This Month.

As in every other line, odd pieces collect in a jewelry stock. These pieces do not deteriorate in value, but it is the part of wisdom for the merchant to dispose of them to make room for new and complete lines. Consequently, the M. Hendrickson Jewelry Co. has inaugurated annual clearing sales, and has placed on sale for this month everything in the store at descounts of from 10 to 50 per cent.

The well known reliability of the firm and its reputation for handling only a superior class of goods, insures a genuine bargain feast for lovers of high grade jewelry.

The firm's announcement appears on another page.

REALISTIC SCENE.

Novel Display in East Window of Columbia Clothing Co.

Passers by are attracted by a very novel display in the east window of the Columbia Clothing Co.'s store. A lumber camp is seen in the background; in the foreground a woodsman before and after leaving for the Columbia Clothing company. The scene is realistic enough to make a lumberjack grin with delight, and to interest all, and is one of the biggest hits made by a Superior street store in some time. The idea was originated by Felix Sellgman, the clever inciter of public interest for the firm.

RACE

WIGGINS vs WEBB in 2-mile race at

TOMORROW NIGHT.

VAN WAGNER & SAUER.

New Firm to Open Soon at 1905 West Superior St.

A. Sauer and S. Van Wagner have entered into a partnership and will in a short time open up a store at 1905 West Superior street, devoted to men's hats, shoes, and furnishings. Both members of the firm are well known in the West end, and both are popular with a large number in that part of the city, Mr. Sauer having had a practical experience of many years in the business. The new firm will be known as Van Wagner & Sauer.

AUTOIST HELD FOR TRIAL.

Racine, Wis., March 7.—Edward Collier, charged with manslaughter in the fourth degree, in connection with the killing of William Dreyer, by an automobile, was today held for trial in the circuit court at Kenosha, Wis.

SAFE ROBBED AT MASONVILLE.

Dubuque, Iowa, March 7.—The safe in the Farmers Savings bank at Masonville, Iowa, was blown open early today. The robbers took $4,000.

"Here's to your health and your good large families, and may you live long and prosper."

Moose Beer

Delights the Eye
Pleases the Palate
Nourishes the Body

Moose Beer is a rare combination. Water is its basis, hence it quenches thirst.

There is lots of carbonic acid gas in it, which makes it sparkling and lively.

The brewing process develops in it a little alcohol (about 3 per cent), which renders it mildly stimulating and increases the activity of the stomach, thus aiding digestion.

Then there is the tonic quality, resulting from the use of any wonder that Moose Brand Beer is so popular in Duluth?

Combining, as it does, all of these valuable qualities, is it hops and the nutritious element, derived from the barley malt.

If you once try this Beer you will cling to it.

On sale 'most everywhere—beer is handled. We supply the family trade.

Duluth Brewing & Malting Co.

'Phone No. 241 Either. Duluth, Minn.

THE LISTED SHARES OFF

But the Unlisted Market Holds Firm in Duluth.

Denn Mining is One of Features of Local Market.

The copper stock market had a weaker tone again today. The opening prices were about unchanged from yesterday's but prices fell off, to rally and fall off again before the close.

North Butee opened at $107, declined to $105.50, rallied to $107.50 and closed at $106 bid and $106.25 asked. Amalgamated opened at $107, went as high as $107.12½, declined to $105 and closed at $105 bid. Anaconda opened at $70, declined to $68.37½ and closed at $68.50 bid. Butte Coalition opened at $32.25, declined to $32, rallied to $33.75 and closed at $33.25 bid. Calumet & Arizona opened at $179, declined to $178 and closed at $177.50 bid and $178.50 asked.

Greene-Cananea sold at $19.12½, declined to $18.87½ and closed at $18.62½ bid and $18.87½ asked. Greene Consolidated opened at $28, advanced to $28.50, declined to $28 and closed at $28.50 asked. Cananea Central sold at $31 and closed at $30.50 asked.

Superior & Pittsburg sold at $25.50 and $25.25 and closed at $25.12½ bid and $25.37½ asked. Denn-Arizona sold at $67 and $67.50 and closed at $67 bid. Denn Mining stock had a good tone, selling at $17 and $17.75 and closing at $17.50 and $18 asked. Globe Consolidated sold at $17 and closed at $17 bid and $18 asked. Carman at $4.75 and closed at $4.50 bid and $5 asked, National at $1.25 and closed at $1.12½ bid and Hancock at $12.50 and $13.25 and closed at $13 bid and $14 asked.

Keweenaw was inactive and closed at $10.50 bid and Warren at $13.75 bid and $14.25 asked, Copper Queen of Idaho at $1.50 bid and $1.75 asked, Calumet & Montana at $2 bid and $2.50 asked, Calumet & Sonora at $30 asked and Cliff at $3.75 and $4 asked. Black Mountain sold at $7 and closed at $7 bid.

* * *

A Duluth man has received word from a friend in Bisbee, Arizona, to the effect that work at the Hoatson shaft at the Superior & Pittsburg has shut down for the time being at least, on account of the water in the mine.

The water in the Hoatson shaft has been pumped by the Junction pumps and the Bisbee man states that the Junction are unable to handle it, so work ceased at the Hoatson shaft the first of the month. It is not known when work will be resumed there.

Spain Building Up-to-Date Navy.

Spain is making rapid progress in rebuilding her navy. the expenditure of 70 millions of dollars provides for the construction of eight battleships, 9 cruisers and many smaller vessels. The quickest way to rebuild a system that has become weakened by sickness or neglect is to commence taking Hostetter's Stomach Bitters. No matter how long you have suffered from ailments of the stomach, liver, bowels or kidneys, you'll find the Bitters will help wonderfully in making you well again. In thousands of cases, probably worse than yours, it has already proven its valuable merit. It always cures headache, poor appetite, dyspepsia, indigestion, costiveness, billousness, colds, grippe, female ills, cramps, backache or malaria fever. Try a bottle today. We guarantee it to be strictly in accordance with pure food and drug act of June 30, 1906.

PHILBIN GIVEN A PROMOTION

General Superintendent of Great Northern Lake District.

St. Paul, March 7.—(Special to The Herald.)—Official notice was made Wednesday afternoon at the Great Northern office of the various appointments which have been made for assistant general manager and general superintendent, resulting from the resignation of George L. Slade. The appointments will become effective Monday, March 11, as follows:

H. A. Kennedy is appointed assistant general manager with headquarters at St. Paul; W. C. Waltrous is appointed general superintendent of transportation, with headquarters at St. Paul; E. L. Brown is appointed general superintendent, Eastern district, with headquarters at St. Paul; D. M. Philbin is appointed general superintendent, Lake district, with headquarters at Superior, Wis.; R. W. Bryan is appointed general superintendent, Central district, with headquarters at Minot, N. D.; F. S. Forest is appointed general superintendent, Western district, with headquarters at Spokane, Wash.

The office of assistant general superintendent for each of the districts above named is abolished.

According to this circular, there is to be one new important office made, that of general superintendent of the Lake district. Heretofore, there has been no such an office, but the position is established to take care of the rapidly growing and important business of the mining districts.

MINISTERIAL CRISIS

May Occur in Italy, Caused by Death of Minister of Justice.

Rome, March 7.—Signor Gallo, the minister of justice, died this morning of syncope. He was born in 1849 and formerly was minister of public instruction, president of the chamber of deputies and minister of education.

Signor Massimi, the minister of finance, who was stricken with apoplexy yesterday, is said this morning to be in a dying condition.

The impression caused by the death of Signor Gallo and the condition of Signor Massimi is intensified by the fact the former is the sixth minister of different Giolitti cabinets who has passed away while in office. The opposition newspapers are even hinting at the possibility of a ministerial crisis but in well-informed circles this is not considered to be likely.

WILL START ON RECOUNT OF THE ENTIRE STATE

First Inspectors Resign and New Ones Are Appointed.

Errors Shown Up in Duluth Ignored by Legislature.

Judge Homer B. Dibell, in an order filed in the district court this morning, has appointed William F. McKay of Duluth, E. L. Thornton of Benson, and A. B. Hilton of Fergus Falls as inspectors or referees to inspect and recount the ballots cast at the recent election for and against the amendment to the state constitution relating to taxation. The proceedings are known as the McConaughy-Watkins appeal cases, from the action and decision of the state canvassing board in declaring the tax amendment to have been adopted and the good roads amendment to have been lost.

The order appointing the new inspectors follows the resignation of George H. Claypool of Duluth; Charles W. Somerby and Lyndon Smith, former referees appointed by the court, and who recounted the ballots on the tax amendment and the good roads amendment cast in the city of Duluth.

When the inspectors were first appointed it was the understanding between H. H. Phelps, attorney for the appellants, and the state attorney general, that they should serve long enough to make a recount that would demonstrate to the state legislature that a serious mistake was made in the counting of the ballots on the amendments at the last election. The result of the recount in the city of Duluth, which showed that a big error had been made, was laid before the legislative committee, but it reported adversely to a state recount, to the legislature.

Following out the understanding of the attorneys the former inspectors resigned, thus opening the way for the appointment of the new inspectors, who will set about making a recount of all the ballots cast within the state for and against the amendments. The expense of the recount will be paid for out of a fund of which Mr. Phelps is the custodian.

Whether the inspectors make a recount of the ballots cast in every precinct of the state will probably depend on the recount as it progresses. If the mistakes are of such proportions as to probably show the court that there is good reason to declare the action of the state canvassing board void, it is possible that it will not be necessary to go to the expense of canvassing the entire vote.

The new inspectors have ten days from the filing of the court's order to qualify and begin work. They are to continue to work with all possible speed until such a time as the court may direct them to stop, reports of their progress and the results of the recount to be made at certain intervals to the court.

The order for the new inspectors was made on the petition of Mr. Phelps, attorney for the appellants, who represented to the court that to prepare his case it would be necessary to have the ballots cast for and against the amendments, recounted.

CITY BRIEFS

Seek Recruits at Tower.

The city of Tower will be the seat of a new recruiting office which will be opened by the army officers this week. Corporal Wilson, a member of the local recruiting staff will leave today to take charge of the new office. Many of the lumber camps will be breaking up soon and the officials have great hopes of landing a big bunch of them for the service.

New Scales Installed.

Two track scales of 100 tons capacity have been installed by the Duluth, Missabe & Northern road at Proctor, taking the place of two 80-ton scales that were formerly in use. These scales are designed particularly for weighing ore trains. Another scale of 150-ton capacity has been installed to replace one of 50,000-pound capacity. All of the scales have automatic recording attachements and the weight is obtained while the train is going over the track at a good speed.

Mrs. Mullen Gets Divorce.

One divorce case was heard yesterday afternoon by Judge Ensign who granted a decree to Mary Mullen from Edward Mullen on the ground of desertion. They were married in Milwaukee in June, 1891, and the desertion is alleged to have occurred in 1894.

Tearing Down Old Dock.

Workmen have commenced tearing down the Duluth, Missabe & Northern's ore dock, No. 1, in the West end and the timbers will be used in constructing cribs for the new coal dock the road is to erect at a cost of $100,000. A crew of fifty men is at work tearing down the old ore dock. The coal dock is expected to be completed by the first of September. Barnett & Record company have the contract for its erection.

Changes Plea.

Axel Silliman, who was arrested last week charged with attempting to pass a draft on the Crookston bank on a Bowery saloonkeeper, and who at the time said that he thought he had money in the bank and refused to plead guilty, yesterday afternoon was brought down from the county jail and changed his plea to guilty. He was sentenced to thirty days by Judge Wimdom.

Masque Ball.

A masque ball was enjoyed last evening at Eagles hall by the Sisters of Israel and their friends. Prizes were awarded for the most effective costumes and they went to Mr. and B. Walt, Mr. Aranson of Superior, and Miss Sadie Bergeson. The judges were H. A. Cohen of Milaca, B. J. Cook, Joseph Schwartz, and Mrs. Hirschfield. A large sum of money was realized and it will be devoted to charity work. Mrs. D. Silk is president of the society and to her and the committee in charge of the affair, Messrs Harry Silk and D. Silk, much credit is due.

Temple Service.

Regular Sabbath services are held at Temple Emanuel, Second street and Seventh avenue east, every Friday night at 8 o'clock. Dr. Lefkowitz will preach tomorrow night on the subject, "The Way of Giving." The services at Temple Emanuel are open to the public.

Good Roads Meeting.

The Farmers' Progressive association of Wrenshall has called a good roads meeting, to be held next Saturday at Wrenshall. This association started the good roads movement in Northern Minnesota with a meeting held at Wrenshall a year ago. It is expected that a number of outsiders, including several from Duluth, will attend the gathering.

St. Paul's Auxiliary.

The Women's auxiliary of St. Paul's church will meet with Mrs. Wylie and Mrs. Suffed at 1531 East Superior street, tomorrow afternoon, at 1:56 p. m. Lenten sewing for the hospital will be done at this time, and Rev. Mr. Reed will give a talk on "The Work of One Man in South Africa." Mrs. Wanless will sing.

Naval Officer Returns.

Chief Yeoman J. A. Shaw, in charge of the Duluth naval recruiting station, is expected to return tomorrow, after having spent the past two weeks on a recruiting expedition to Willow City, N. D. Twelve men were secured for enlistment during the two weeks. Mr. Shaw took the men direct to Minneapolis, where they were examined by Lieut. Wettingill and the medical physician in charge.

PERSONALS

Mrs. Joseph Croze of Houghton, Mich., is visiting her son, W. W. Croze of South Seventeenth avenue east.

Charles F. Hector of Lakeside left yesterday for a trip to Massena, N. Y. On his way he will visit his brother at Chicago.

Postmaster Guy Eaton returned last night from a few days' business trip to the Twin Cities.

L. Silverman, the Chicago banker, who owns considerable property on the ranges, is at the Spalding.

Mrs. A. Lynn of 214 South Nineteenth avenue east, has gone to Canon City, Colo., where her mother is seriously ill.

Mr. and Mrs. M. K. Knauff of Two Harbors are guests at the St. Louis.

Mr. and Mrs. J. N. Bailey of Bemidji, Minn., are registered at the St. Louis.

M. E. Messenger of Odanah, Wis., is a guest at the Lenox.

G. C. S. Campbell of St. Paul is registered at the Lenox.

J. H. Browning of Brainerd, Minn., is at the Lenox.

Mrs. O. H. Cooper of 1404 East Fourth street, left this evening for Biloxi, Miss., and New Orleans.

TRYING HER BIG GUNS.

Washington, March 7.—The navy department has been advised that the monitor Florida returned to the Norfolk navy yard today after making a series of experiments at sea with her big guns, intended to determine the exact effect of the blast upon the persons in the turrets. The experiments resulted very satisfactorily.

THE FACE ON THE CENT.

Washington Post: Get out your pennies and hunt for any Indian physiognomy there.

It is the head of a gracious American woman who for some years was held in admiration both for her beauty and her goodness, and who, only a few weeks ago, passed on to her great reward. Her name was Sarah Longacre Keen. She lived in Philadelphia. For thirty-five years she was the secretary of the Philadelphia branch of the Woman's Foreign Missionary Society of the Methodist Episcopal church.

When Sarah was a child of 5 or 6 years of age, a delegation of Indians from the Northwest visited Washington. They came to see the sights and pay their respects to the big chief of the nation.

After having spent considerable time at the capital, the Indians were taken to Philadelphia. Here they were shown the mint. The little girl's father was a fine engraver, and he had official connection with this great money factory. He was a kindly, benevolent man as well, and he invited this delegation of red men to some sort of entertainment at his home.

One of the chiefs had his attention attracted to the little miss, and in a mood of sportiveness he took off his headdress and put it on her head. She was not frightened, but, lending herself to the enjoyment of the joke, she stood for a moment and let the company look at her. Some one present, who had both an eye for beauty and artistic skill, was so struck by the appearance which little Sarah Longacre made in her Indian headdress that he sketched her on the spot. The sketch was engraved by her father.

Just then the penny in its present form was about to be issued, but the figure with which its face was to be ornamented had not been chosen. This engraved sketch went into competition for the honor. It was accepted in preference to all others, and the imprint of it was transferred to the neat little pennies which Uncle Sam for so many years has been sending out into the world.

"Its quality has made it famous."

TOO LATE TO CLASSIFY

Harper Method Shampooing and care of the Scalp and Hair, at Miss Horrigan's.

WANTED — BOY TO START IN AT bottom and learn business. Must have references. 331 West First street.

Post cards at lowest prices. Largest assortment. Specials on 5 and 10 cent goods. The Palace Store, 24 E. Sup. St.

Hair Dressing, Switches, Facial Massage, Shampooing. Scott's parlors, 17 E. Sup. St. Manicuring 25c. Zenith, 1241.

HAIR, WARTS AND MOLES REMOVed by electricity; scalp treatment at Miss Kelly's, opposite Glass Block.

DEATHS.

GREGG—Adria B. Gregg, 37 years of age, and a school teacher, died of heart disease yesterday at her home at 1427 East Superior street.

VINCENT—Mitchell C. Vincent, the 9-months-old son of Mr. and Mrs. M. C. Vincent of 117 East Eighth street died March 5 of enteric colitis.

BENSON—Andrew Benson, 57 years of age, died at his home 1512 East Fourth street, March 2. Interment was at Park Hill.

UNDEN—Elsie Unden, the infant daughter of Mr. and Mrs. Charles Unden of 416 East Tenth street, died March 4, of convulsions.

We offer 30 per cent off on all funeral designs over $5. Elschen Bros., florists, 116 West Superior street.

CARD OF THANKS.

WE WISH TO CONVEY TO OUR many friends and neighbors our heartfelt thanks and appreciation for the kindness and sympathy shown during the illness of our beloved husband and father.

MRS. EVA MANTHEY AND CHILDREN.

ALL CHIPPED IN FOR CHARITY

Kansasans Help to Pay for Train for Injured Baby.

Goodland, Kan., March 7.—All the inhabitants of this town chipped in for a special train to carry their pastor's baby to Denver for treatment. Billy Bruno, the 5-year-old, had fallen into a tub of scalding water, and they solved the problem in the most direct way possible.

Mrs. T. A. Bruno, wife of the pastor, was hard at her washing. "Sandy" Horton of the Double Triangle outfit was obligingly turning the crank of the washing machine. On the floor beside the washing machine stood a tub of boiling water, and Billy, the 5-year-old, was rummaging around "in the underbrush," as Sandy described it.

Mrs. Bruno and Sandy went into the yard with a basketful of clothes to hang them up. While they were gone they heard Billy yell.

They found the poor little fellow in the tub of water.

Mrs. Bruno grabbed him out and Sandy didn't wait. He was on his pony and down the street before the baby's mother had seen the thing, firing his guns as he went. Everybody rushed to the doors, as Sandy had figured, and as he rode he yelled: "Billy Bruno's scalded."

He ordered the men to gather at the store and kept on his way to the railroad station, where he ordered a special train from Coolidge, ten miles away.

Coming back to the store, Sandy called for contributions for the special. Little piles of gold were soon tumbling into his hat, and when the special pulled in they were emptied into the conductor's hands.

The train pulled out, bearing the suffering victim and its parents, and an eager group waited at the station until a telegram announced the child located in a Denver hospital "expected to live" by the physicians.

GETS ONLY ONE DOLLAR BECAUSE OF HIS BELIEF.

Terre Haute, Ind., March 7.—The Rev. M. B. Moffett, who sued the Big Four Railroad company for $10,000 damages for killing his father, was awarded $1 by the jury after a hot legal battle. Lawyers for the railroad showed that the Rev. Mr. Moffett and his father had been preachers of predestination of the strictest order. It was argued that the death of the elder Mr. Moffett on the railroad track under a train had been preordained and that the railroad company was in no way liable. The jury took the same view of the matter, holding that it was inconsistent for preachers of predestination to ask for damages in a death case.

WHITE PLAGUE HIGH IN MORTALITY LIST.

PULMONARY TUBERCULOSIS CHIEF CAUSE OF DEATH IN GOVERNMENT FIGURES.

Out of only two-fifths of the population of the United States more than half a million lives were offered up in 1905 as a sacrifice to diseases. Startling as this death rate may seem, it was less than that for the preceding year, but was in excess of the number of deaths registered for any other year. The death rate from Nephritis, Bright's Disease, Apoplexy, Cancer, Diabetes, and Appendicitis is increasing while that from old age, bronchitis, convulsions, peritonitis and scarlet fever, is decreasing.

TUBERCULOSIS LEADS.

The greatest death rate recorded for any disease in this year was that from the pulmonary tuberculosis, amounting to 57,770. Pneumonia follows closely, with a death rate of 39,068, exclusive of broncho pneumonia. The much dreaded cancer shows a steady growth. The death rate figures 24,320. These figures are taken from statistics as compiled by the United States census bureau, and they are official. It is appalling to note the great number of deaths resulting from the diseases, deaths that in many instances can be prevented by timely and proper treatment; treatment that is found usually in the hands of a specialist, and treatment that has been perfected by long and continued experience in practice.

The local physician is of vast importance. He is always ever ready and prompt, but from his limited experience in the treatment of these particular diseases, he is probably not sufficiently familiar to treat them as scientifically as one who has grown up in this particular special practice. Dr. Rea as a specialist in these diseases, ranks in high favor. He has been engaged in this particular line of practice for nearly twenty years. He is thoroughly familiar with the phases of each disease and its condition of severity in the climates in which it is more prevalent.

As for instance—Kentucky, Louisiana, Mississippi, Tennessee, and some of the coast states, where the atmosphere is dense, the pulmonary diseases prevail. In the Western states, in the high altitude of the Middle states, the percentage of pulmonary diseases is much less. In the Great Lake region, such as Superior, Huron and Erie, and in the Red River Valley country, there is more tuberculosis than in the nearby highlands.

Some of the cures he has made:

L. S. Dreasler, Ellison, N. D., cured of piles, nervous prostration, stomach and bowel troubles. Had suffered for years, lost flesh and strength and was not able to do any kind of work.

Lucy Brouders, Kent, Minn., cured of rheumatism that had afflicted her for years. Her feet were drawn up and at times she could scarcely walk.

W. W. Pease, Wahpeton, N. D. Doctors said he had consumption and must change climate to get well. Dr. Rea's treatment gained for him seventeen pounds the first month and Dr. Rea said he didn't have consumption at all.

Henry Schwaka, Nerstrand, Minn., cured of chronic rheumatism. Had suffered for years and had tried all kinds of doctors.

Miss Farney, Marshalltown, Iowa, the daughter of a prominent and a wealthy capitalist, cured of consumption.

Mrs. Mark Anton, Plankinton, S. D., cured of general debility and catarrh of the stomach.

Daniel Smith, Woonsocket, S. D., a prominent German of that place, cured of long standing deafness in twenty minutes.

Mrs. Lydia Head, Ensor, Ky., cured of nervous prostration and general weakness. Could not walk up steps when she came to consult him.

Miss Flo Roland, Muscatine, Iowa, cured of chronic constipation and nervousness; had tried all kinds of doctors and medicines.

John Boreman, La Fayette, Ind., cured of stricture of bowels and heart trouble.

Mrs. Elliott, Vincennes, Ind., cured of catarrh of liver.

Elmer Wosley, Fort Wayne, Ind., cured of cancer of arm and hand. Had consulted doctors in Cincinnati and many other large cities and all pronounced that he would have to lose his hand.

Mrs. Charles Roth's girl, Mitchell, S. D., cured of cross eyes.

Frank Peters, Redfield, S. D., cured of nervousness.

Louis Bicking, Watertown, S. D., cured of slow consumption and stomach trouble.

Clara Erickson, Thief River Falls, Minn., cured of nervousness and of mental debility that had almost wrecked her mind.

Mrs. Joseph Fraser, Mora, Minn., cured of cancerous growth of the breast. No operations are used in these treatments. The treatment is injected into the growth and it is killed in a few treatments.

J. C. Lundquist, Christine, N. D., cured of catarrh, catarrhal deafness, bladder and kidney troubles, a very serious case. He had been doctored by a number of other doctors. Dr. Rea quickly cured him and he is glad to tell of it.

Child of C. Boll, Baldwin, Wis., cured of a bad case of eczema. Had been treated by doctors but had given up all hopes of ever being cured. Cured in three months.

Julius Ponto, Menomonie, Wis., cured of chronice catarrhal bronchitis.

E. R. Morgan, Elmwood, Wis., cured of a bad cancer of the face with the hypodermic injection treatment.

George Kothlow, Menomonie, Wis., cured of catarrh and bronchial troubles.

John Consbruck, Hastings, Minn., cured of cancer of the face in two treatments.

F. J. Swaboda, Hopkins, Minn., cured of chronic bladder and kidney troubles.

Mrs. Margaret Gangloff, Denison, Minn., cured of a bad skin cancer on the face in one treatment.

Louis Doer, Rannaby, Minn., cured of almost total blindness by cataract. Cured by the absorption method.

C. J. Wendt, Duluth, Minn., cured of chronic eczeme all over the body. Of two years' standing.

William Reid, Little Falls, Minn., cured of cancer of the lip in one treatment.

H. P. Jackson, Morris, Minn., cured of long standing piles. Cured without operation.

L. S. Dreasler, Ellson, N. D., cured of fistula of the rectum. Quickly cured of this most terrible disease.

Mrs. Martin Downs, Willmar, Minn., cured completely of partial blindness.

Gregor Johnson, Harwick, Minn., cured of ulcerated sore leg. Thought he was crippled for life.

Ole Larson, Wild Rice, N. D., cured of a disease of stomach.

Mike Ritman, Litchville, N. D., cured of external piles.

That Dr. Rea cures them are sufficient reasons to prove that he is one of the greatest specialists of modern times.

Burleigh Mitton, former publisher Journal-Observer, Redfield, S. D.

MINNEAPOLIS, MINN.,
(Special to The Herald).

Dr. Rea, the noted specialist of Louisville, Ky., announces a professional visit to Duluth, Spalding hotel, Saturday, March 9, from 9 a. m. to 8 at night.

Minneapolis office, 202 Nicollet avenue.

PAINTING, PAPER HANGING AND DECORATING.

Just arrived, our new samples of Tekko and another lot of new papers.

THE MARKET IS STRONGER

Wheat Prices Advance Again in All of American Markets.

Flax is Quiet and Closes About Unchanged in Duluth.

Duluth Board of Trade, March 7.—Wheat advanced again in the American markets today. Prices were higher from the opening and with a steady demand, closed at better prices. Liverpool closed ¼d to ½d higher, Berlin ½c higher and Budapest ½c higher.

The May option closed ⅝c higher in Duluth, ¼-⅜c in Chicago, St. Louis and Kansas City, ¼c in Minneapolis, New York and Winnipeg. The July option closed ¼c higher in Duluth, Chicago, New York and St. Louis, ½c in Minneapolis and ⅝c in Kansas City and Winnipeg.

May corn closed ⅛c higher in Chicago and was ⅜d higher in Liverpool. May oats closed 1⅛c higher in Chicago.

Car receipts at Duluth were 97 against 27 last year, and at Minneapolis 308 against 282 last year, making a total for the Northwest of 405 against 309 last year. Chicago received 24 against 6 last year. Winnipeg received 113 against 102 last year.

Primary receipts of wheat were 641,000 bus., last year 530,000 bus. Shipments 256,000 bus., last year 1,109,000 bus. Clearances of wheat and flour aggregated 241,000 bus.

Primary receipts of corn were 644,000 bus., last year 510,000 bus. Shipments 548,000 bus., last year 435,000 bus. Clearances of corn were 546,000 bus.

Wheat trading was active in the Duluth market. May wheat opened ¼c higher at 79⅝c, advanced to 79⅞c by 10, declined to 79¾c by 11:05, rallied to 80c by 11:20, fell off to 79¾c by 12:05 and closed at that price, a gain of ⅜c over yesterday. July wheat opened ⅜c higher at 80½c, declined to 80¾c, rallied to 80⅞-⅞c, fell off to 80¼c, rallied to 80⅝c and declined by the close to 80⅜c, a gain of ¼c over yesterday. September wheat was inactive and closed unchanged from yesterday at 78½c.

Durum wheat was unchanged and cash spring wheat was selling at the May price.

Flax was rather quiet here. May flax opened ⅛c higher at $1.21⅜, declined to $1.21⅛, rallied to $1.21⅝, declined to $1.21⅜, rallied to $1.21⅝ and closed at $1.21½, unchanged from yesterday. July flax opened unchanged at $1.22¾, advanced to $1.22⅝, declined to $1.22, rallied to $1.22⅝ and closed at $1.22¼, unchanged from yesterday. October flax was inactive and closed ¼c higher at $1.19.

March oats closed ⅛c higher and the other coarse grains unchanged.

Wheat—No. 1 hard on track, 80¾c. To arrive: No. 1 northern, 79¾c; No. 2 northern, 77¾c. THE CHICAGO MARKET.

Good Demand From Commission Houses and Shorts Strengthens Wheat.

Chicago, March 7.—The wheat market opened firm today on a good demand from commission houses and shorts, which was based chiefly upon higher prices at Liverpool. May wheat opened a shade to ¼@⅜c higher at 76¼@76⅜c, and for a time held within that range. Minneapolis, Duluth and Chicago reported receipts of 429 cars against 400 cars last week and 335 cars one year ago.

Wheat was in good demand all day and the market continued firm. The high point for May was 77@¼c. The close was firm with May ¼@⅝c higher at 76⅝c.

The corn market was firm because of local receipts, which were lower than previous estimates and unfavorable weather for the crop movement. Shorts were fair buyers. May corn opened ¼c to ⅜c higher at 47c to 47¼c, sold at 47⅛@⅜c and then declined to 47c. Local receipts were 306 cars, with two of contract grade.

Prices eased off in the last half of the session on selling by longs, May declining to 46¾c. Later the loss was recovered and the close was firm with May ⅛c higher at 47c.

The oats market was firm. Trading in the May option was very light, but there was an excellent demand for July. Local receipts, which were below expectations, and unfavorable weather were the chief bullish factors. May oats opened ¼@⅜c to ⅝@¾c higher at 42¼c to 42⅝c and sold at 42½c. Local receipts were 121 cars.

The provisions market was strong and trading was active. A steady market for live hogs held prices firm. May pork opened 10c higher at $16.40 and sold up to $16.50. Lard was a shade higher at $9.62½ and sold up to $9.65@9.67½. Ribs opened 5c higher at $9.10 and advanced to $9.15.

Close: Wheat, May 76¾c; July 77⅝@¾c. Corn, May 47c; July 46⅝@¾c. Oats, May 42⅝@⅝c; July 37⅝c. Pork, May $16.40; July, $16.57½@16.20. Lard, May $9.60; July $9.62½; Ribs, May $9.12½; July $9.25. Rye, cash 67c. Barley, cash, 64@68½c. Flax, clover and timothy, nothing doing. Cash wheat, No. 2 red 75¾@76¼c; No. 3 red 74@75c; No. 2 hard 74@77c; No. 3 hard, 66½@75c; No. 1 northern, 81½@81c; No. 2 northern, 80@82c; No. 3 spring, 77@83c. Corn, No. 2, nothing doing; No 3, 43@44c. Oats, No. 2, 42½c; No. 3, 41½@42c.

Liverpool Grain.

Liverpool, March 7.—Wheat, spot firm; No. 2, red western winter, 6s 3d; futures, steady; March 6s 5d; May 6s 5⅝d; July 6s 2⅝d. Corn, spot, steady; American mixed, new, 4s 5½d; American mixed, old firm, 4s 8½d; futures, firm; March 4s 4⅞d; May 4s 5¼d.

Grain Gossip.

Logan & Bryan, Chicago, to Paine, Webber & Co.: Wheat—Our market made further headway again today and while the full advance was not held, considering the pressure put upon it by short selling, the gain, small as it is, is quite gratifying. The trade received many reports of damage in the Southwest and the market was favored with further reports of good flour business being worked for export. At times the market showed considerable snap and in every way its action indicates a much better feeling than earlier in the week. We are getting into the season of year when the crop damage, if it exists, will be uncovered to the satisfaction of all. On the breaks the buying side continues to appeal to us.

Corn—The pit talent profess to believe selling pressure put on market today was by commission houses employed by the principal longs. If this is true their operations have been pretty well covered up. Market is purely a scalping one in its tendency and likely to remain so until afte rthe government figures have been received and digested.

Oats—While admitting the price is high we must not forget May oats are exceedingly weak hold. The cash situation is strong. Stocks are decidedly moderate for a big speculative market like Chicago. Small as they are they would be smaller if cars could be secured to satisfy the demands for oats from Eastern centers.

Provisions—The strength in grain stimulated market. However, the closing was rather weak.

Minneapolis Flour.

Minneapolis, March 7.—The flour demand is quiet. Buyers are not showing any perturbation over the stronger tone in the wheat market, believing that the advance is only temporary. The supply situation in the East is in a position to become acute, and millers are looking for an improvement in the demand. The car situation, however, will have to improve before business, if it should improve, could be satisfactorily handled. Shipments, 42,543 barrels. First patents, $4.20@4.30; second patents, $4.05@4.15; first clears, $3.25@3.35; second clears, $2.40@2.60.

St. Paul Live Stock.

St. Paul, March 9.—Cattle: Receipts, 400; quiet, prices about steady and unchanged. Hogs: Receipts, 2,200; steady; range, $6.65@6.75; bulk, $6.70. Sheep: Receipts, none; steady; lambs, slightly lower; sheep, $3.00@6.25; lambs, $2.25@7.10.

New York Money.

New York, March 7.—Close: Money on call, firm, 4¾@6 per cent; ruling rate, 5½ per cent; closing bid, 5 per cent; offered at 5½ per cent. Time loans, dull and firm; sixty days, 5¾@6 per cent; ninety days and six months, 5¾ per cent. Prime mercantile paper, 5¾@6 per cent. Sterling exchange, steady, with actual business in bankers' bills at $4.84.60@4.84.65 for demand, and at $4.80.20@4.80.25 for sixty day bills; posted rates, $4.81½ and $4.85½; comercial bills, $4.80½. Bar silver, 68½c. Mexican dollars, 53c. Government bonds, easy; railroad bonds, irregular.

The Cotton Market.

New York, March 7.—The cotton market opened barely steady at a decline of 1 point to an advance of 4 points. Cables were a little disappointing and March opened lower, but later months sold up to a net advance of 3 to 7 points during the early session, March showing the greatest gain. The advance carried prices to a new high level for the bull movement, and the market during the middle of the morning was within a point or two of the best. Trading was moderately active and rather more generally.

Spot closed steady; middling uplands, 11.45; middling gulf, 11.70. Sales, 1,060 bales. Futures closed steady. Closing bids: March, 9.91; April, 9.95; May, 10.03; June, 10.07; July, 10.11; August, 10.14; September, 10.14; October, 10.32; December, 10.39; January, 10.57.

Chicago Live Stock.

Chicago, March 7.—Cattle—Estimated receipts, 5,000; market strong to 10c higher. Beeves, $4.25@6.90; cows and heifers, $1.75@5.25; stockers and feeders, $2.75@4.90; Texans, $4@4.75; calves, $3@7.25. Hogs—Estimated receipts, 22,000; market steady. Rough heavy, $6.80@6.90; light, $6.80@6.95; mixed and butchers, $6.90@7; good heavy, $6.92½@7; pigs, $6.15@6.75; bulk of sales, $6.87½@6.95. Sheep—Estimated receipts 12,000; market steady. Sheep, $3.75@6.25; lambs, $4.80@7.75.

THE PRODUCE MARKET.

The following prices, with the exception of those on hay, feed and meats, are the official quotations of the Duluth Produce exchange and shippers can rely upon them as being correct. The list is corrected daily by the secretary, and it shows accurately the market conditions up to 12 o'clock on the date of issue. The weekly market letter, published on Fridays, is not an official statement of the exchange, but the information is gathered personally from the different dealers:

It takes a man of very sanguine temperament to persuade himself that he is fortunate because his wife does not read the ads, and is, thus, not a "bargain-hunter."

STOCKS ARE UNSETTLED

By Failure to Clear Up the Mystery Regarding Reading.

Fluctuations Were Frequent and the Trading Very Active.

New York, March 7.—There was continued excitement and disorder in the early stock market today as an after-effect of the turmoil of yesterday. The opening movement of prices indicated that the bear party had recovered from the demoralization caused by the unexpected report yesterday that control of Reading had passed. A vigorous onslaught on prices was made at the start. Reading itself relapsed three points from last night's closing prices and Canadian Pacific dropped over three points on a renewal of yesterday's weakness. There were a number of other declines of one to one and a half among the most active speculative stocks. An immediate rally followed and the nervous and unsettled state of the market was shown in the frequent fluctuation and great activity of the trading. The failure to clear up the mystery surrounding Reading was the unsettling influence. The identity of the buyers and their motives remained in doubt.

Henry Frick was at his office in the Trinity building, but refused to be interviewed. At Mr. Harriman's office it was said that he was expected there at noon. Mr. Harriman's associates at Union Pacific headquarters said they had no knowledge of any Reading deal.

J. J. Hill was asked to express his opinion concerning the Reading matter.

"I know nothing about Reading and I don't want to know anything about it," he said.

New York, March 7.—Prices of the speculative favorites broke violently in the opening dealings under a heavy unloading at the recovered level of yesterday's rally. A few of the less important stocks showed gain, but these were without apparently influence of the general weakness of the list. Canadian Pacific sold off 4¼, Great Northern 4, Atchison 1⅛, Union Pacific and Southern Pacific nearly a point and Pennsylvania, St. Paul and Kansas & Texas, United States Steel large fractions. There were gains of about a point in Minneapolis, St. Paul and Sault Ste. Marie, Northwestern and Denver & Rio Grande and of a large fraction in Colorado & Southern. Reading and Canadian Pacific rallied 2 points almost immediately and the market steadied.

When the market began to demonstrate its resistance pressure large purchasing orders were placed in the active features and prices were marked to where it closed, and Canadian Pacific got back all but a fraction of its loss. In other stocks the level at the recovery averaged well near last night's closing. Denver & Rio Grande gained 2⅝, Brooklyn Transit 2⅜, Minneapolis, St. Paul & Sault Ste. Marie 2, the preferred 1. Toledo, St. Louis & Western 1¾, Erie second preferred 1½, Sugar 1¼, and Union Pacific and Pennsylvania, Colorado & Southern, Locomotive and Cotton Oil 1. Long Island jumped 5. General selling was resumed later, some stocks declining lower prices than at the outset. Atchison and Southern Railway broke 2, Anaconda 1¼ and Northern Pacific and Missouri Pacific 1. New York and Harlem sold at 365, a decline of 35 points from the previous sale in May, 1905. The market steadied at 11 o'clock.

There was an occasional dip in some individual stocks, but the general list drifted narrowly and then hardened. Union Pacific rose 1½ over last night, St. Paul, Louisville & Nashville, Colorado Southern second preferred and Republic Steel 1 and Virginia Iron 3½. Chicago & Alton sold down 3½d, Southern Railway preferred 2⅝; Chicago Great Western preferred 1⅜, Virginia Carolina Chemical 1⅝; Great Northern ore certificates 1¼ and Northwestern 1. Reading dropped to the lowest at noon and was unsettled. Bonds were irregular.

Rumors of weakness developed in the Morgan stocks after 12 o'clock. The drive brought out an immense amount of liquidation and the precipitate fall in the prices of Erie and the Southern Railway stocks caused a general break in the market. The Western group and Reading responded to a support after a time and the market was steadier at 1 o'clock. The chief losses were Southern Railway preferred 6⅝, the common 4, Erie 3, Atchison 2½, Baltimore & Ohio, Chesapeake & Ohio, Erie first preferred, Kansas & Texas, Mexican Central, Rock Island, Atlantic Coast Line, Amalganated Copper, United States Steel and Smelting 1 to 1⅝. Lackawanna sold 14½ higher. The rally carried the Pacifics and St. Paul to the highest of the day. Attempts to market stocks at the higher range of prices disclosed an insufficient demand, and the market again weakened. Atchison and Reading got the worst of this selling movement, the first named yielding 3¼ and the latter 4 points. Buying for both accounts again stiffened prices. Southern Pacific moved up 1 over yesterday's closing and Union Pacific 2.

The market closed very weak. In the final hour stocks which had shown resistance yielded with the rest. Union Pacific reacted 1⅝ below last night, St. Paul fell 1⅝, New York Central 1¼, Great Northern preferred and Colorado Fuel 2, Louisville & Nashville 5. Consolidated Gas 3, Chesapeake & Ohio 3¼ and Reading 5⅝.

Stock Gossip.

Logan & Bryan to Paine, Webber & Co.: Market closed lower all around with Reading one of the chief sufferers. The early market promised much in the way of recovery. It was unnatural to think the market would recover fully from its spasm of liquidation over night. It was hoped, however, we had seen the worst of the break, but the closing today is fully as unsettled and nervous and as weak in a speculative sense as anything we have had thus far.

THE COPPER STOCKS.

Copper Gossip.

New York to Gay & Sturgis: Unsatisfactory labor conditions in the Butte district demoralized stock market and the aggressive policy of the interstate commerce commission has caused a difference of opinion as to what action the directors will take on dividends at the approaching meeting of the Anaconda Copper company and the Amalgamated Copper company.

The Anaconda directors will meet this month to take dividend action, and the Amalgamated directors will hold a meeting for the same purpose next month.

Interests familiar with the Amalgamated Copper company not long ago expressed the opinion that the March meeting of the Anaconda directors and the April meeting of the Amalgamated would witness an increase in the dividends of both corporations.

Developments since then, however, have caused a reversal of opinion. It can be stated however, that H. H. Rogers has not taken the matter under consideration as yet.

Based on earnings, larger disbursements to Amalgamated as well as Anaconda shareholders would be justified. While the stock market has been declining, prices for copper have been advancing, and what is more, there has been an increase rather than a decrease in copper consumption. The Anaconda is said to be earning nearly $15,000,000 a year, based on 25-cent copper, and the Amalgamated is credited with earnings of 25 per cent on its outstanding capital stock. Notwithstanding this favorable showing the tendency of Amalgamated copper shares has been decidedly downward. Amalgamated is paying at the rate of 8 per cent on its stock, which is selling around 107. The income on the investment, is, therefore, approximately 7.40 per cent. Should the Amalgamated directors declare a dividend at the rate of 10 per cent at the next meeting, the income, based on the present market price would be approximately 9½ per cent.

The disturbing feature at present is the threatened strike in the Butte district. A suspension of production for any length of time would unquestionably result in a sharp advance in copper prices, but the Amalgamated would lose heavily, as it has not stocks on hand and has sold its possible production four months ahead. Since its organization, the Amalgamated Co. has declared $46,925,000 to stockholders. The next dividend, if 2 per cent is declared, will mean an additional disbursement of about $3,100,000 which will bring total disbursements by the company since its organization to above $50,000,000, or about one-third of the capital stock. There has been considerable talk of late that the Amalgamated Copper company would issue additional stock in order to take over the so-called Cole-Ryan properties. While this may be done eventually there is no intention of putting through such a plan in the near future.

Interests closely identified with Amalgamated place little credence in the story that John D. Ryan is to sever his connections with Amalgamated Copper company and devote all of his time to the development of the enterprises with which he has become associated with during the last several years.

* * *

Boston to Gay & Sturgis: The local market today afforded no encouragement to the bulls. Stocks were for sale all day and rallies were fitful and shortlived. The comparatively small amount of liquidation was taken but buyers were unable to get stocks at their limits in almost all cases. Some consideration was given to the statistics published today showing the imports of copper in February equalled exports, a condition never before known. This is capable of more than one explanation, however. There was very little buying demand evident and it is not likely to appear until the decline in general market has run its course and credit facilities improve.

Midway Horse Market.

Minnesota Transfer, St. Paul, March 7.—Barrett & Zimmerman's report: Market good. A number of buyers over from the sales yesterday to fill out their loads. All classes of horses except a load of inferior stuff, moved freely. Good mares are in urgent demand. Among the recent carload buyers were P. K. Eastman Wilton, N. D.; A. N. Courtney, Seattle, Wash.; T. M. Gorman, McCanna, N. D.; W. Davidson, Turtle Lake, N. D. The following consignors returned home today: L. D. Goldberg, Wausau, Wis.; H. A. Clingman, Odessa, Minn.; John Montgomery, Wakonda, S. D.; G. O. Bailey, Webster, S. D.

THE COUNTY OPTION BILL

(Continued from page 1.)

not been considered by his finance committee, and this led to extensive discussion about the rights of the committee as opposed to those of the senate, and other more or less relevant matters. Senator Durment said that if the state could not afford such a silver service as other states have given under similar circumstances, it could not afford to keep the legislature in session. Furthermore, if the finance committee is going to run things, the senate might as well go home and leave it to finish the work. Senator Sageng, Populist, wanted to cut the appropriation to $5,000, but he wasn't allowed to do it.

* * *

The joint committee to investigate the Duluth board of trade and Minneapolis chamber of commerce met this morning, and decided to begin work next Tuesday afternoon at 3 o'clock, when the Minneapolis exchange will be taken up. Witnesses have been subpoenaed from Minneapolis, and when Duluth is reached, about five witnesses from there will be summoned.

* * *

Representative Hugo of Duluth was speaker pro tem today in the absence of Speaker Johnson, and the house session move with accustomed smoothness.

* * *

The house killed a bill providing that $5,000 should be taken from the state aid to rural schools to pay an inspector. Representatives C. B. Miller, Rachie, Bills, F. T. White and J. A. Cates opposed it, saying that it is impracticable and ridiculous and unjust to the schools.

* * *

Representative Tighe moved that all the pending revenue measures be grouped together and considered in that way, and action will be taken on his plan tomorrow.

* * *

Fifty-four signers of the New Ulm petition, protesting against the investigation of the Loftus Shippers' association, asked the house to strike their names from the paper, as they had found that it was being used to reflect upon Representative Peterson, whom they say is all right.

* * *

Following new bills arrived: Representative Phillips, providing for holding primary elections four weeks ahead of general elections instead of seven weeks; Representative Wright, appropriating money for the contest expenses of J. D. O'Brien and J. D. Dencegre, amounting to $2,315; Representative Tighe, tax amendment to the constitution, similar to the one voted upon last fall; Senator Putnam, repealing tax of 4

STREET CARS.

NOTICE TO THE PUBLIC.

This company operates a street railway line in the city of Duluth between Third avenue east and the end of Rice's Point, and another street railway line in the city of Superior between Twenty-first street and the end of Connor's Point. These lines are separated by the waters of St. Louis Bay, and are operated as two distinct and separate lines.

The fare for a continuous ride in one direction between any two points on either one of these lines is 5c.

The public is hereby notified that this company does not, by undertaking to carry any passenger, or by accepting fare for such carriage, assume any responsibility beyond that of carrying such passenger safely between points on the above mentioned lines.

This company is not responsible for close connections, nor safe transportation, between the above mentioned lines by any ferryboat or other means of transportation. While the employes of this company have been instructed to keep themselves posted and give upon request all the information they can as to the probability of connections being made with other transportation lines, the company has no better means of foreseeing unexpected interruptions in the service of such lines nor of telling how long such interruptions will continue, than the public has, and therefore cannot be responsible for notice of such interruptions.

SHERIFF'S EXECUTION SALE—

Under and by virtue of an Execution issued out of and under the seal of the District Court of the State of Minnesota, in and for the Eleventh Judicial District, and County of St. Louis, on the 1st day of March, 1907, upon a Judgment rendered and docketed in said Court and County in an action therein, wherein the First National Bank of Rochester, Minnesota, was Plaintiff and Albert Harrington and Laura Harrington were defendants, in favor of said Plaintiff and against said Defendants and each of them for the sum of Five Thousand Four Hundred Seventy-seven and 04-100 Dollars and Eighty Cents increased costs, which said execution has to me, as sheriff of said St. Louis County, been duly directed and delivered, I have levied upon and will sell at public auction to the highest cash bidder, at the front door of the District Court House, in the City of Duluth, in said County of St. Louis, on Monday, the 22nd day of April, 1907, at ten o'clock in the forenoon of that day, all the right, title and interest that the above named judgment debtors had in and to the real estate hereinafter described, on the 21st day of October, 1897, being the date of the rendition of said judgment, or any interest therein which said judgment debtors have since that day acquired. The description of the property being as follows, to-wit:

That part of Lots Four (4) and Five (5) in Block Six (6), Longview Addition to Duluth, lying in the Northeast Quarter of the Southeast Quarter of the Southeast Quarter of Section Fourteen (14) in Township Fifty (50) North of Range Fourteen (14) West, in St. Louis County, Minnesota, according to the respective plats thereof on file and of record in the office of the Register of Deeds in and for St. Louis County, Minnesota.

Dated Duluth, Minn., March 6th, 1907.
WM. J. BATES,
Sheriff St. Louis County, Minn.
By F. L. MAGIE,
Deputy.
FRANCIS H. DE GROAT,
Attorney for Judgment Creditor.
Duluth Evening Herald—March 7-14-21, 1907.

OFFICE OF THE YOUNG WOMEN'S CHRISTIAN ASSOCIATION OF DULUTH, MINNESOTA.

Duluth, Minn., Mar. 2nd, 1907.

To the Above Mennmebrs of the Young Women's Christian Association of Duluth, Minnesota:

Notice is hereby given that by order, and pursuant to resolution, of the Board of Directors, a special meeting of the active members of the Young Women's Christian Association of Duluth, Minnesota, has been called, to be held at the Association Rooms in the City of Duluth, on Wednesday, the third day of April, 1907, at 8 o'clock P. M., to consider the following questions, to-wit:

(1) The question of reincorporating this association as "Young Women's Christian Association, of Duluth," under the provisions of Sections 2164 to 2168 of the Revised Laws of Minnesota of 1905, and of authorizing, approving and ratifying all the acts of the Board of Directors, done and to be done, in furtherance of such reincorporation.

(2) The question of authorizing the Board of Directors to transfer and set over all the property of this association to such reincorporated Association, upon such terms as will secure each of the members of this association in the enjoyment of the rights and privileges of similar membership in such reincorporated association.

MARY McN. AGNEW,
President.
DELIA G. MATTOCKS,
Recording Secretary.
Duluth Evening Herald, March-7-14-21-1907.

Day after day The Herald want columns show a procession of opportunities—opportunities to buy, to sell, to lease, to hire, to find people to work for you, to find people to work for, to find boarders, lodgers, tenants, or partners. These want ad. opportunities touch almost all phases of life and living in this city.

ASK FOR AN ELECTION

People of Brookston Want to Incorporate a Village.

Objections Made to Licensed Saloon at That Place.

The town of Brookston on the Cass Lake branch of the Great Northern railway line, figured prominently before the county board this morning by reason of an application for a call of election to incorporate a village, a petition for a liquor license, and a number of protests from lumber and timber interests and the federal government against the granting of a license.

The petition, which is signed by twenty-five of the residents of Brookston, asks that certain territory in sections 27, 34 and 35, 51-18, be organized into a village and an election be called for that purpose. The petition was drawn up by W. E. Culkin, who appeared on behalf of the signers and urged speedy action by the county board. It is probable that the commissioners will have taken some action in the matter before the board adjourns this afternoon.

• • •

The application for a license to sell liquor at Brookston was made by Harry C. Shur, proprietor of the hotel at that place.

Protest to the granting of the license was made by J. W. Morgan, Indian agent, in behalf of the government. Mr. Morgan says that the question of whether the federal government has any jurisdiction in the matter is now before the supreme court. The territory was once in the Fond du Lac reservation and the question has been raised whether the platting of a townsite and village organization relieves the government of any further control of liquor traffic in the territory described. Other protests to Shur's application have been made by the St. Louis River Mercantile company, the Northern Lumber company, the Cloquet Tie and Post Co., and the Great Northern Railway company. All call attention to the fact that there are a great many Indians in the vicinity of Brookston and that the sale of liquor to them would be a dangerous practice.

Mr. Shur appeared in his own behalf and urged that he be granted to run a saloon in his hotel. He claimed that blind pigs have been operated and are now being operated at Brookston. He said it would be much better for all concerned to have a licensed saloon properly conducted than to continue under the present conditions.

• • •

Twenty-five of the legal voters in unorganized township 61-20 have petitioned that it be organized into the town of Sturgeon. A number of settlers have petitioned for a new road to start on the line between sections 19 and 20, 52-20, and terminating in the center of the northwest corner of section 24, 52-21. A petition has been presented asking for the repair of about a mile of the Itasca road, east of the bridge, to the old Vermilion road. Another petition, largely signed, asked for the extension of the Payne-Whiteface river road, in 53-19, crossing the St. Louis river and terminating in the west township line of 53-20.

• • •

Reports by the various county officers showed the following receipts for February: Clerk of the district court, $805.17; sheriff, $774.54; register of deeds, $996.55; register of titles, $118.18.

• • •

Two bids were received for the buildings on the new courthouse site. T. W. Wahl offered the county $900 for the several houses, and John W. Shellenberger offered to take buildings for $750.

• • •

Nine bids were received from local physicians for the medical attendance of prisoners in the county jail the coming year, the physicians to furnish their own medicines. The bids, which were on a monthly salary basis, follow Dr. Dreuning, $50; Dr. Oredson, $68; Dr. Goffe, $50; Dr. Fahey, $35; Dr. McCormick, $50; Dr. Grawn, $40; Dr. Cavanaugh, $35; Dr. Bergroth, $60; Dr. Norton, $50; Dr. Ralph C. Adams, $40. The board expected to award the contract this afternoon.

• • •

Two estimates were submitted for the repairing of the northeast wall of the courthouse. Anderson & Gow estimated the cost at $576 and an estimate by another party figured the expense at $285.

• • •

Dr. E. L. Tuohy filed his acceptance as chairman of the county board of health at a monthly salary of $20. He stipiated that for extra work he was to be paid an additional compensation.

• • •

The rent of the county superintendent of schools office in the Manhattan building has been raised from $15 to $17.50 per month. The board was notified that it will be necessary to execute a lease very soon if the offices are desired another year.

• • •

The board adjourned until 2 o'clock this afternoon when it was expected to pass the resolutions and dispose of all other business remaining for consideration.

Removal Notice.

W. G. Joerns and the Geoffrey company, real estate and mining, have moved their offices to Room 15, Phoenix block. Zenith 'phone 612.

Of course, a store ad. may be a "pulling" one, but if it is not placed in The Herald, before enough of the right kind of people, "what's the use?"

RECOVERY PROBABLE

Physician Says Miss Butchart's Chance of Living is Good.

Argyle Sticks to Story But Letter is Very Contradictory.

"I think from present indications Miss Butchart's chances for recovery are very good," said Dr. McAuliffe, who has been attending her since the shooting of Tuesday evening.

The doctor stated that while there had been no pronounced change either way, there had been no alarming symptoms and it is altogether probable that her ultimate recovery will be attained. He could not say how soon the operation for the removal of the bullet could be performed.

Argyle still sticks to his story that he was only firing into the air to frighten the women when he shot Miss Butchart, and asserts that the letter to Coroner McCuen was written six weeks ago, since which time he had changed his mind about shooting the people he had blacklisted in it, and was of an altogether peaceful state of mind when the accident occurred.

The charge preferred by the police against Argyle when arraigned in municipal court yesterday was assault in the first degree, with intent to kill. If Miss Butchart recovers it will be under this section of the laws that he will be tried and the outside limit of his imprisonment will be ten years, if convicted, the minimum being five.

The most important, and in fact, the only conclusive evidence against the man is the letter taken from him yesterday and unless he had intended to commit suicide as stated in the letter, what could have induced him to allow the missive to be found on him is hard to explain.

The police believe that up to the very time when Officers Gillon and Smollett entered and made the arrest yesterday morning, he had confidently intended to end his own life, but that his nerve failed him when the crucial moment arrived.

WILL PLAY VETERANS

Younger Members of Curling Club Challenge Older Ones.

Friendly Rivalry Between Two Factions Will be Settled.

The younger members of the curling club or rather those who have commenced to curl since the club moved to Third avenue east have the idea that they can beat the old members of the club who have played the game before the present rink was built.

The old members think they are still the best and to settle the matter there will be a match on Saturday afternoon and evening at the rink between these two factions, when some very interesting games will be seen.

There will be no handicaps allowed by the young members to the old men neither will the old members give the young fellows any leeway and the points they get they have got to earn on the ice and not with the chalk on the score board.

Supper will be served at the rink at 6:30 p. m., and all the members of the club are invited to attend and see these games. Ten games will be arranged if possible, five to be played in the afternoon and five in the evening.

A full list of those who will be expected to play will be published in the Herald Friday, and any member whose name is mentioned, who cannot play is asked to call up the secretary immediately, so his place can be filled.

In the opinion of the old members, they will have a big margin of points over the young men when the end of the contest is played, but the young fellows think different and say they can make the old men look like a lot of has-beens at the game.

Walter C. Harris will look after the interests of the young fellows, and H. H. Smith for the old members.

NEEDLES EXTRACTED.

Operations May Save Woman Charged With Attempt to Kill Herself.

New York, March 7.—Mrs. Dolly Duessler, aged 22 years of age, who swalowed a packet of needles several months ago, is under treatment in Bellevue hospital, where the surgeon states she still has scores of needles in her body.

At the Fordham hospital, where the woman was first treated, five operations were performed and fifty needles extracted. Some of the needles are located as far apart as back, chest and arms, and it is feared that two of them, which have traveled to the vicinity of the heart, may puncture that organ.

A charge of attempted suicide may be made against the woman. It is not known how she came to swallow the needles.

LARAMIE WOMAN DIES OF VERY RARE DISEASE.

Laramie, Wyo., March 7.—The fourth case of purpura ever known in the United States was yesterday the cause of the death of Mrs. Sina Barkhurst of Laramie. Purpura is the most baffilling of all diseases, and the recovery of a case has never been known.

Mrs. Barkhurst was attacked by the disease last Wednesday. A hemorrhage of the entire body resulted, the blood bursting from the veins and spreading over the entire body beneath the skin. Sunday the entire body turned green except the eyes. Tuesday the colored turned to gray, except the eyes, which remained green. Yesterday death resulted.

GRAND JURY INDICTS SIX

Fourteen True Bills in First Batch Returned in Court.

Daniel Aho Charged With Murder in Second Degree.

The result of the first day's work of the grand jury became known this noon when fourteen indictments were filed in the district court against six men already in custody of the sheriff.

Daniel Aho, the young Finlander from Tivoli, who recently shot and killed his mother, was indicted for murder in the second degree.

C. H. Spellman, alias B. E. Thomas, alias C. A. Shirley, alias George Holly, was indicted for forgery in the second degree on four counts. Spellman was caught in the East, after several years' successful operation among boarding-house keepers in this and other cities in the Northwest.

C. H. Mansfield was also indicted on two counts for forgery in the second degree.

John Wall was indicted on two counts for criminally assaulting Martha Olson, the wife of a settler in 62-18, along the line of the Duluth, Rainy Lake & Winnipeg road. One indictment charges a statutory offense, and the other assault in the second degreee.

James Fitzgerald was indicted for forgery in the second degree under four counts. All his offenses are claimed to have been committed in this city.

Edward Vold was indicted for an unmentionable offense with his sister Sigred.

Do Not Crowd the Season.

The first warm days of spring bring with them a desire to get out and enjoy the exhilirating air and sunshine. Children that have been housed up all winter are brought out and you wonder where they all come from. The heavy winter clothing is thrown aside and many shed their flannels. Then a cold wave comes and people say that grip is epidemic. Colds at this season are even more dangerous than in midwinter, there is much danger of pneumonia. Take Chamberlain's Cough Remedy, however, and you will have nothing to fear. It always cures, and we have never known a cold to result in pneumonia when it was used. It is pleasant and safe to take. Children like it. For sale by all druggists.

NOTICE

I will sell at public auction to the highest bidder, for cash, on Monday, the 11th day of March, 1907, at 10 o'clock a. m., at No. 302 N. Central avenue, West Duluth, all that stock of merchandise consisting of dry goods, notions, gents' furnishings, boots and shoes and millinery and also the store fixtures and furniture and book accounts and other assets belonging to the Hendricks Dry Goods Co. FRED REYNOLDS,
Trustee.

GRIP PIONEER SICK AGAIN.

Survived Six Physicians Whom the First Case Called.

Rahway, N. J. March 7.—The fact that Henry Kipp Woodruff, a member of the common council here, is ill at his home in Union street with the grip, recalls the fact that an ailment he had in 1882 was the first of its kind in the United States to be diagnosed by the doctors as the grip.

At the time of Mr. Woodruff's illness in 1882, the grip was spreading in an extraordinary way through Russia. Mr. Woodruff was a fireman in New York then, a member of the Eagle engine company. Several physicians were in attendance on him. It was duly announced at that time that Mr. Woodruff would not live a week and if he did, it was further asserted, he would be a raving maniac. Poultices of hot onions were applied to his wrists and ankles to increase circulation. Of the seven doctors the only one now living is Mr. Woodruff's family physician.

WOULD BE MISSIONARY.

Congo Pygmy Refuses to Return to the Jungle.

New York, March 7.—Ota Bengan, the Congo pygmy, who has been living in the Howard orphan asylum, Brooklyn, since he was taken from the monkeyhouse in the Bronx zoo last September, through the efforts of the negro clergymen of New York, refused to go back to the jungle yesterday.

Prof. S. Y. Verner, who brought him to this country and turned him over to the park authorities until such time as he should return to Africa, started for the Congo yesterday with an American exploring expedition. Before he started he called on Ota Benga and told him he would take him back to Africa if he wished to go.

The pygmy, who is learning the English language, wants to become qualified at a missionary before he returns and told Prof. Verner so.

The Baptist Ministers' association of New York, it is stated, intends to send Ota to the Virginia seminary at Lynchburg as soon as he gets a good hold on the English language. It is thought it will take about eight years to make a good missionary out of Ota.

OUR SPRING STYLES NOW READY.
In selecting our goods we exercise the greatest care to buy only those fabrics which will give good wearing value. Those are made up in the latest styles (and fit guaranteed), at almost the same price you would pay for an inferior piece of goods in a ready-to-wear suit.
MORRISON, Tailor,
8 LAKE AVENUE SOUTH.

SCORNS AID, PAYS DEBTS.

Daniel L. Dresser Declares He Will Meet Every Moral Obligation.

New York, March 7.—Daniel Leroy Dresser, brother-in-law of George W. Vanderbilt, legally a bankrupt for four years, has been discharged from bankruptcy.

Mr. Dresser collapsed financially on March 7, 1903, when his firm, Dresser & Co., was forced to the wall as a result of the bursting of the bubble of the United States Shipbuilding company.

The fight that Mr. Dresser has made to retrieve his fortunes and pay off his debts appeals strongly to his creditors. Before he failed he was worth $2,000,000, and he lost every dollar. He refused all tenders of aid from his wealthy relatives, and started in to rehabilitate himself financially by his own efforts.

Though legally absolved from the payment of the balance by his discharge from bankruptcy, Mr. Dresser said yesterday that the moral obligation to cancel every penny of the debt remained, and he intended to discharge it.

LASH FOR WIFE-BEATER.

Sentence Passed in Baltimore for First Time In Twenty Years.

Baltimore, Md., March 7.—For the first time in almost twenty years a sentence for the use of the whipping-post at the city jail has been passed by Judge Wright, in part two of the criminal court. It was in the case of Sadler Brooks, colored, who was charged with beating his wife, Mary Brooks, on Feb. 19. He was sentenced to serve two months in jail in addition to receiving nine lashes at the post.

Brooks has an ugly record for wife beating, having been convicted three times for treating his wife brutally. He seemed entirely indifferent when the sentence was passed, and when he was taken to the lockup in the courthouse, after the trial, he laughed at the idea of being whipped.

"Huh," he grunted to Deputy Warden Noonan. "Dat ain't much. I'se kin stand more dan nine cracks."

The use of the whipping-post was advocated several months ago by Edward J. Burns, a member of a recent grand jury, who recommended it, and it was considered seriously by that body, afterward being mentioned in its report. The last cases of whipping for wife beating at the city jail occurred between fifteen and twenty years ago, when a negro named Foote, with two white men, Myers and Eisenberg, were lashed.

Since in recent years there has been no call for the post, it was taken down from its usual position in the jail and placed in a loft. It will now have to be placed in position again, it is thought.

The lashing may be done at any time during the stay of Brooks in jail, which will be for two months.

WAITRESS' SWEET VOICE WINS RICH HUSBAND.

Plainwell, Mich., March 7.—Miss Luella Smith, daughter of Mr. and Mrs. V. P. Smith, and Alex M. Kennedy, a wealthy Chicago horseman, were married Thursday night.

The bride, who is the possesor of a promising voice, went to Chicago to study vocal music. It was necessary that she earn some money, and she became a waitress at Dr. Miller's "Temple of Health." There she and Mr. Kennedy became acquainted, the acquaintance ripened into love, and the marriage followed.

Mr. and Mrs. Kennedy will make their home in Chicago, where the former owns considerable real estate. His young wife will continue the study of music.

PROSTATIC TROUBLES
Stricture—Bladder
Many men are subjected to severe suffering by some form of Stricture, usually brought on by using injurious injections—or a contagious disease that has been neglected and become chronic. The symptoms most frequent are difficult and painful urination, and others too numerous to mention. There are more dangerous diseases of the Kidneys, Bladder and Prostate that originate from neglected Stricture for any duration that is not troubled with an inflamed, paralyzed condition of the neck of the bladder that incapacitates this organ for regulating the flow of urine. The damaging effect of Stricture are not lacking to the whole system, for Nervousness, Short Memory, Weakness of both body and mind and many other indications of general decline of the nervous system are sure to come sooner or later.
The success we have met with in handling this affliction, warrants us in making the claim that we can positively eradicate this disease and restore the organs to their normal healthy conditions. We invite you to call. Consultation free and confidential.
The Most Reliable and Successful Specialist in Diseases of Men in the Northwest.
